UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K
(Mark One)

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the fiscal year ended December 31, 2015.

or
 Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission File No. 1-13998
Insperty, Inc.
(Exact name of registrant as specified in its charter)

Delaware 76-0479645
(State or other jurisdiction of incorporation or (I.R.S. Employer Identification No.)
organization)

19001 Crescent Springs Drive 77339
Kingwood, Texas (Zip Code)
(Address of principal executive offices)

Registrant's Telephone Number, Including Area Code: (281) 358-8986

Securities Registered Pursuant to Section 12(b) of the Act:

Common Stock, par value \$0.01 per share	New York Stock Exchange
Rights to Purchase Series A Junior Participating Preferred Stock	New York Stock Exchange
(Title of class)	(Name of Exchange on Which Registered)

Securities Registered Pursuant to Section 12(g) of the Act: NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was

Edgar Filing: INSPERITY, INC. - Form 10-K

required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

As of February 5, 2016, 21,257,515 shares of the registrant's common stock, par value \$0.01 per share, were outstanding. As of the last business day of the registrant's most recently completed second quarter, the aggregate market value of the common stock held by non-affiliates (based upon the June 30, 2015 closing price of the common stock as reported by the New York Stock Exchange) was approximately \$966 million.

DOCUMENTS INCORPORATED BY REFERENCE

Part III information is incorporated by reference from the proxy statement for the 2016 annual meeting of stockholders, which the registrant intends to file within 120 days of the end of the fiscal year.

PART I

Unless otherwise indicated, “Insperty,” “we,” “our” and “us” are used in this annual report to refer to Insperty, Inc. and its consolidated subsidiaries. This annual report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. You can identify such forward-looking statements by the words “expects,” “intends,” “plans,” “projects,” “believes,” “estimates,” “likely,” “possibly,” “probably,” “goal,” “opportunity,” “objective,” “target,” “assume,” “outlook,” “guidance,” “predicts,” “appears,” “indicator” and other expressions. In the normal course of business, in an effort to help keep our stockholders and the public informed about our operations we may, from time to time, issue such forward-looking statements, either orally or in writing. Generally, these statements relate to business plans or strategies, projected or anticipated benefits or other consequences of such plans or strategies, or projections involving anticipated revenues, earnings or other operating results. We base the forward-looking statements on our current expectations, estimates and projections. We caution you that these statements are not guarantees of future performance and involve risks, uncertainties and assumptions that we cannot predict. In addition, we have based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Therefore, the actual results of the future events described in such forward-looking statements in this annual report, or elsewhere, could differ materially from those stated in such forward-looking statements. Among the factors that could cause actual results to differ materially are the risks and uncertainties discussed in this annual report, including, without limitation, factors discussed in Item 1, “Business,” Item 1A, “Risk Factors,” and Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

ITEM 1. BUSINESS.

General

Insperty, Inc., (“Insperty”) provides an array of human resources (“HR”) and business solutions designed to help improve business performance. Since our formation in 1986, we have evolved from being solely a professional employer organization (“PEO”), an industry we pioneered, to our current position as a comprehensive business performance solutions provider.

Our long-term strategy is to provide the best small and medium-sized businesses in the United States with our specialized human resources service offering and to leverage our buying power and expertise to provide additional valuable services to clients. Our most comprehensive HR services offerings are provided through our Workforce Optimization[®] and Workforce Synchronization[™] solutions (together, our “PEO HR Outsourcing solutions”), which encompass a broad range of human resources functions, including payroll and employment administration, employee benefits, workers’ compensation, government compliance, performance management and training and development services, along with our cloud-based human capital management platform, the Employee Service CenterSM (“ESC”). Our Workforce Optimization solution is our most comprehensive HR outsourcing solution and is our primary offering. Our Workforce Synchronization solution, which is generally offered only to our mid-market client segment, is a lower cost offering with a longer commitment that includes the same compliance and administrative services as our Workforce Optimization solution and makes available, for an additional fee, the strategic HR products and organizational development services that are included with our Workforce Optimization solution.

In addition to our PEO HR Outsourcing solutions, we offer a number of other business performance solutions, including Human Capital Management, Payroll Services, Time and Attendance, Performance Management, Organizational Planning, Recruiting Services, Employment Screening, Financial and Expense Management Services, Retirement Services and Insurance Services, many of which are offered via desktop applications and cloud-based delivery models. These other products and services are offered separately, as a bundle or along with our PEO HR Outsourcing solutions.

Our PEO HR Outsourcing solutions are designed to improve the productivity and profitability of small and medium-sized businesses. These solutions relieve business owners and key executives of many employer-related administrative and regulatory burdens, which enables them to focus on the core competencies of their businesses. Our PEO HR Outsourcing solutions also promote employee performance through human resources management techniques designed to improve employee satisfaction. We provide our PEO HR Outsourcing solutions by entering into a Client Service Agreement (“CSA”), pursuant to which we and our client act as co-employers of the employees who work at the client’s worksite (“worksites employees”). Under the CSA, we assume responsibility for personnel administration and assist our clients in complying with employment-related governmental regulations, while the client retains the employees’ services in its business and remains the employer for various other purposes. We charge a comprehensive service fee (“comprehensive service fee” or “gross billing”), which is invoiced concurrently with the processing of payroll for the worksite employees of the client. The comprehensive

- 2 -

Table of Contents

service fee consists of the payroll of our worksite employees plus an additional amount reflected as a percentage of the payroll cost of the worksite employees.

We accomplish the objectives of our PEO HR Outsourcing solutions through a “high-touch/high-tech” approach to service delivery. In advisory areas, such as recruiting, employee performance management and employee training, we employ a high-touch approach designed to ensure that our clients receive the personal attention and expertise needed to create a customized human resources solution. For transactional processing, we employ a high-tech approach that utilizes the ESC, our cloud-based PEO HR Outsourcing solutions portal, to provide an online platform through which our clients, worksite employees and we manage employee information, payroll, benefits and retirement solutions, creating efficiencies for all parties. In addition, the ESC, our cloud-based PEO HR Outsourcing solutions portal, is designed to provide automated, personalized PEO HR Outsourcing solutions to our clients and worksite employees.

As of December 31, 2015, we had 60 offices, including 52 PEO HR Outsourcing solutions sales offices in 26 markets. In addition, we had four regional service centers along with human resources and client service personnel located in a majority of our 26 sales markets, which serviced an average of 153,144 worksite employees per month in the fourth quarter of 2015. Our service centers coordinate PEO HR Outsourcing solutions for clients on a regional basis and localized face-to-face human resources services.

We were organized as a corporation in 1986. Our principal executive offices are located at 19001 Crescent Springs Drive, Kingwood, Texas 77339. Our telephone number at that address is (281) 358-8986 and our website address is insperity.com. Our stock is traded on the New York Stock Exchange under the symbol “NSP.” We file or furnish periodic reports with the Securities and Exchange Commission (“SEC”), including our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934. Through the investor relations section of our website, we make available electronic copies of the documents that we file or furnish to the SEC, the charters of the committees of our Board of Directors and other documents related to our corporate governance, including our Code of Conduct. Access to these electronic filings is available free of charge as soon as reasonably practicable after filing or furnishing them to the SEC. Printed copies of our committee charters or other governance documents and filings can be requested by writing to our corporate secretary at the address on the cover of this report.

PEO Industry

The PEO industry began to evolve in the early 1980s largely in response to the burdens placed on small and medium-sized employers by an increasingly complex legal and regulatory environment. While various service providers were available to assist these businesses with specific tasks, PEOs emerged as providers of a more comprehensive range of services relating to the employer/employee relationship. In a PEO arrangement, the PEO assumes certain aspects of the employer/employee relationship as defined in the contract between the PEO and its client. Because PEOs provide employer-related services to a large number of employees, they can achieve economies of scale that allow them to perform employment-related functions more efficiently, provide a greater variety of employee benefits, and devote more attention to human resources management than a client can individually.

We believe the key factors driving demand for PEO services include:

- the focus on growth and productivity of the small and medium-sized business community in the United States, utilizing outsourcing to concentrate on core competencies
- the need to provide competitive health care and related benefits to attract and retain employees
- the increasing costs associated with health and workers’ compensation insurance coverage, workplace safety programs, employee-related complaints and litigation

complex regulation of employment issues and the related costs of compliance, including the allocation of time and effort to such functions by owners and key executives

A significant factor in the development of the PEO industry has been increasing recognition and acceptance of PEOs and the co-employer relationship by federal and state governmental authorities. Insperty and other industry leaders, in concert with the National Association of Professional Employer Organizations (“NAPEO”), have worked with the relevant governmental entities for the establishment of a regulatory framework that protects clients and employees, discourages unscrupulous and financially unsound PEOs, and promotes further development of the industry. Currently, 41 states have enacted legislation either recognizing PEOs or requiring licensing, registration, or certification, and several others are considering such regulation. Such laws vary from state to state but generally provide for monitoring the fiscal responsibility of PEOs. State regulation assists in screening insufficiently capitalized PEO operations and helps to resolve interpretive issues

- 3 -

Table of Contents

concerning employer/employee status for specific purposes under applicable state law. We have actively supported such regulatory efforts and are currently recognized, licensed, registered, certified or pursuing registration in all of these states. The cost of compliance with these regulations is not material to our financial position or results of operations.

In 2014, the Small Business Efficiency Act (“SBEA”) was enacted. The SBEA created a federal regulatory framework for the payment of wages to worksite employees and the reporting and remittance of payroll taxes on those wages paid by PEOs certified under the statute (“CPEOs”). We actively supported the enactment of this law. The law is effective with respect to wages for services performed on or after January 1, 2016. The law instructed the Secretary of the Treasury to establish a certification program not later than July 1, 2015. However, during 2015, the Internal Revenue Service (“IRS”) stated that it intends to delay the certification program until July 1, 2016. The SBEA clarifies that a CPEO, rather than the client, will be treated as the employer for purposes of reporting and remitting payroll taxes. It also clarifies that a CPEO shall be treated as a successor employer for purposes of the wage base of worksite employees on which federal payroll taxes are applied. In addition, the law clarifies that clients of a CPEO remain eligible for specified tax credits for which they would have been eligible absent the CPEO relationship. We intend to become a CPEO. Implementation of these provisions will require us to modify our internal processes and systems. The cost of implementation and compliance with the new law is not expected to be material to our financial position or results of operations.

Service Offerings

PEO HR Outsourcing Solutions

We serve small and medium-sized businesses by providing our PEO HR Outsourcing solutions, which encompass a broad range of services. Both of our PEO HR Outsourcing solutions offer the following:

- benefits and payroll administration
- health and workers’ compensation insurance programs
- personnel records management
- employer liability management
- assistance with government compliance
- general HR advice
- access to the ESC for employees, managers and client owners
- 401(k) retirement plan sponsored by us

Our Workforce Optimization solution also provides additional services that our Workforce Synchronization clients can purchase for an additional fee, including the following:

- employee recruiting and support
- employee performance management
- training and development services

Our PEO HR Outsourcing solutions are designed to attract and retain high-quality employees, while relieving client owners and key executives of many employer-related administrative and regulatory burdens. Among the employment-related laws and regulations that may affect a client are the following:

Table of Contents

- Internal Revenue Code (the “Code”)
- Federal Income Contribution Act (FICA)
- Federal Unemployment Tax Act (FUTA)
- Fair Labor Standards Act (FLSA)
- Employee Retirement Income Security Act, as amended (ERISA)
- Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA)
- Immigration Reform and Control Act (IRCA)
- Title VII (Civil Rights Act of 1964)
- Health Insurance Portability and Accountability Act (HIPAA)
- Age Discrimination in Employment Act (ADEA)
- Americans with Disabilities Act (ADA)
- The Family and Medical Leave Act (FMLA)
- Genetic Information Nondiscrimination Act of 2008
- Drug-Free Workplace Act
- Occupational Safety and Health Act (OSHA)
- Worker Adjustment and Retraining Notification Act (WARN)
- Uniformed Services Employment and Reemployment Rights Act (USERRA)
- State unemployment and employment security laws
- State workers’ compensation laws
- Health Care and Education Reconciliation Act of 2010 (the “Reconciliation Act”)
- Patient Protection and Affordable Care Act (PPACA)
- State and local law equivalents of the foregoing

While these laws and regulations are complex, and in some instances overlapping, we assist our PEO HR Outsourcing solutions clients in complying with these laws and regulations by providing services in the following categories:

Administrative Functions. Administrative functions encompass a wide variety of processing and recordkeeping tasks, mostly related to payroll administration and regulatory compliance. Specific examples include:

- payroll processing
- payroll tax deposits
- quarterly payroll tax reporting
- employee file maintenance
- unemployment claims processing
- workers’ compensation claims reporting

Benefit Plans Administration. We maintain several benefit plans including the following:

- group health plan
- health savings account program
- health care flexible spending account plan
- an educational assistance program
- an adoption assistance program
- group term life insurance
- group universal life insurance
- accidental death and dismemberment insurance
- short-term and long-term disability insurance
- a 401(k) retirement plan
- cafeteria plans for group health and health savings account contributions

The group health plan includes medical, dental, vision and prescription drug coverage, as well as a work-life program. All benefit plans are provided to eligible employees based on the specific eligibility provisions of each plan. We are the policyholder responsible for the costs and premiums associated with any group insurance policies that provide benefits under these plans, and we act as plan sponsor and administrator of the plans. We negotiate the terms and costs of the plans, maintain the plans in accordance with applicable federal and state regulations and serve as liaison for the delivery of these benefits to worksite and corporate employees. COBRA coverage is extended to eligible terminated worksite and corporate employees and other eligible individuals, in accordance with applicable law. We believe that

the variety and comprehensive nature of our benefit plan offerings are generally not available to employees in our small and medium-sized business target market and are usually offered only by larger companies that can spread program costs over a much larger group of employees. As a result, we believe the availability of these benefit plans provides our clients with a competitive advantage that small and medium-sized businesses are typically unable to attain on their own.

- 5 -

Table of Contents

Employee Service Center. The ESC is our cloud-based human capital management platform for our PEO HR Outsourcing solutions. The ESC is designed to provide role-based access to a wide range of human capital management functions, along with personalized content to the managers, owners and worksite employees of our PEO HR Outsourcing solutions clients, including:

For managers and client owners:

- WebPayroll for the submission, approval and reporting of payroll data
- Tools to manage the onboarding of new employees
- Employee administration functions such as viewing or changing information about employees
- Access to client-specific compliance-related information relevant to many HR areas, including the Affordable Care Act
- A reporting and analytics tool to create, view, save and export reports and data about employees
 - Ability to manage employee time and attendance information, absences and paid time off
- Access to Talent Management tools in the areas of Recruiting, Performance Management and Learning Management
- Access to a library of online human resources forms
- Access to a wide range of best-practices human resources management content through Insperty Mobile, access to review and approve payroll transactions and employee time entry from most mobile devices

For worksite employees:

- Access to view, edit and change a range of employee profile information
- Online check stubs, pay history reports and W-2s
- Employee-specific benefits content, including summary plan descriptions and enrollment status
 - Access to 401(k) retirement plan information through the Retirement Service Center powered by Insperty
- e-Learning web-based training
- Links to benefits providers and other key vendors
- Performance management tools including self-reviews and review history
 - Ability to submit time and attendance information, absences and paid time off requests
- Through Insperty Mobile, access to view a wide range of employee-specific information such as pay stub, insurance coverage and ID card, 401(k) balances and other commonly accessed data

Personnel Management. In addition to the services that we deliver through the ESC, we provide a wide variety of personnel management services that give our clients access to HR advisors and additional resources normally found only in the human resources departments of large companies. All PEO HR Outsourcing solutions clients have access to our advice concerning personnel policies and practices, including recruiting, discipline and termination procedures. Other personnel management services we provide include:

- Drafting and reviewing personnel policies and employee handbooks
- Designing job descriptions
- Performing prospective employee screening and background investigations
- Designing performance appraisal processes and forms
- Professional development and issues-oriented training
- Employee counseling

- substance abuse awareness training
- outplacement services
- compensation guidance

Employer Liability Management. Under the CSA, we assume many of the employment-related responsibilities associated with the administrative functions, benefit plans administration and personnel management services we provide. For many of those employment-related responsibilities that are the responsibility of the client or of both the client and us, we may assist our clients in managing and limiting exposure. This includes first-time and ongoing safety-related risk management reviews, as well as the implementation of safety programs designed to reduce workplace accidents and consequently, workers' compensation claims. We also provide guidance to clients for avoiding discrimination, sexual harassment and civil rights violations, and we assist with termination decisions when consulted to attempt to minimize liability on those grounds. While we do not provide legal services to our clients, we employ in-house and external counsel who specialize in several areas of

- 6 -

Table of Contents

employment law, have broad experience in disputes concerning the employer/employee relationship and provide support to our human resources service specialists. As part of our comprehensive service, we also maintain employment practice liability insurance coverage for ourselves and our clients, monitor changing government laws and regulations, and notify clients of the potential effect of such changes on employer liability.

MarketPlaceSM provided by Insperty[®]. Through our many alliances with best-of-class providers, Insperty's MarketPlace is an eCommerce portal that brings a wide range of products and services to our clients, worksite employees and their families. Through MarketPlace, which is provided through the ESC, our clients also have the opportunity to offer their products and services to other clients and worksite employees.

MidMarket Solutions.TM We believe the mid-market sector, which we generally define as those companies with employees ranging from approximately 150 to 2,000 worksite employees, has historically been under-served by the PEO industry. Currently, we have a dedicated sales management and consulting staff who concentrate solely on the mid-market sector. In addition, we have service personnel who have been trained and specialize in the mid-market sector. Our average number of worksite employees per month with our mid-market clients increased 11.6% over 2014, representing approximately 23.3% of our total paid worksite employees during 2015.

Other Product and Services Offerings

Our other product and services offerings are designed to expand the type of business performance improvement services we offer to our current and prospective clients and to increase our overall client base by providing products and services that can be offered separately from our PEO HR Outsourcing solutions. We also strive to leverage our relationships with clients of our other other products and services to cross sell our PEO HR Outsourcing solutions as well as additional products and services. We offer all of our products and services to both PEO HR Outsourcing solutions clients and non-PEO HR Outsourcing solutions clients, with the exception of Human Capital Management and Payroll Services, which are offered separately to non-PEO HR Outsourcing solutions clients because comparable solutions are already included within the PEO HR Outsourcing solutions.

During 2015 and 2014, revenues from our other products and services offerings as a percentage of our total revenues were 1.6% and 1.5%, respectively. Also during 2015 and 2014, our gross profit from our other products and services offerings as a percentage of our total gross profit was 6.8% and 6.5%, respectively.

The following are the key components of our other products and services, which are offered separately or as a bundle:

Human Capital Management. Insperty HCMTM is a comprehensive human capital management solution for human resources data and processes. This cloud-based solution is a unified human resources suite that includes payroll processing, payroll tax compliance, employee administration, benefits management and enrollment, reporting and analytics, and employee and manager self-service. The solution is offered as a stand-alone cloud-based solution or in conjunction with our Payroll Services offering and/or our Time and Attendance products. We initially launched this product in late 2012.

Payroll Services. Insperty[®] Payroll Services offers a robust cloud-based payroll solution that is designed to help alleviate administrative burdens associated with payroll processing and government-related compliance and includes a premium level of support from our highly skilled service team. Our payroll solution is integrated with three additional offerings, including Insperty NetSaverTM, an online 401(k) solution for small businesses; a pay-as-you-go workers' compensation program; and HR Essentials, an HR platform that assists companies with tracking employee data, important milestones and company property.

Time and Attendance. Our Time and Attendance products and services provide small to medium-sized businesses with software, hardware and services to track, allocate, and analyze employee resources and provide inputs into clients' payroll processing and accounting systems. The service is delivered as a cloud-based solution or as an "on-premise" client-server solution. For customers utilizing the Time and Attendance solution in conjunction with our PEO HR Outsourcing solutions, we provide access through the ESC.

Performance Management. Our Performance Management products and services provide human resources software offerings including a suite of desktop products: Insperity® Descriptions Now®, Insperity® Policies Now®, Insperity® Performance Now®, and Insperity® Ultimate Employer®; along with Insperity® PerformSmart® a performance management cloud-based offering. Insperity PerformSmart is available, for a fee, to both our Workforce Optimization and Workforce Synchronization clients. For customers utilizing PerformSmart in conjunction with our PEO HR Outsourcing solutions, we

- 7 -

Table of Contents

provide access through the ESC. We intend to continue to sell packaged software through online subscription arrangements and through various reseller arrangements.

Organizational Planning. Organizational planning offers cloud-based and desktop software used by companies to facilitate the creation, management and communication of detailed organizational management charts.

Recruiting Services. Our Recruiting Services offer direct hire placement on an as-needed basis and provides outsourced support for individual requisitions or large-scale hiring projects. In addition, we provide consulting services to assist in the creation and maintenance of consistent hiring practices and retention strategies. We also provide compensation services, behavior-based interview training and talent assessment.

Employment Screening. Our Employment Screening services offer a customized approach to background-check reporting for companies. Services include criminal records checks; verification of employment history or education; driving record, civil record and credit history checks; and confirmation of extraordinary credentials.

Financial Solutions. Insperty® Financial Solutions offers a suite of financial management tools and solutions for small to medium-sized companies that provides business owners with financial intelligence. The core products and services include Insperty Reveal®, a web-based financial dashboard and toolset, and an online bookkeeping and controller service offered through an alliance with a third party.

Expense Management. Our Expense Management product delivers employee expense management solutions that automate employee expense reporting, enforce travel and expense policies, and provide management reporting and analysis. The service is delivered both as a cloud-based solution and as a desktop software product.

Retirement Services. Our Retirement Services solutions deliver comprehensive 401(k) retirement plan recordkeeping and administrative services to small and medium-sized businesses, primarily in connection with a 401(k) retirement plan sponsored by us related to our PEO HR Outsourcing solutions clients. Services include employee education and enrollment, participant communications, elective deferral withholding and transmission, matching contribution calculation, loan and distribution processing, regulatory filing preparation and nondiscrimination testing.

Insurance Services. Our Insurance Services solutions offer assistance through our licensed insurance agency to small and medium-sized businesses in all 50 states to secure affordable, customizable business insurance packages and life, health and disability insurance policies. Insurance Services also assists individuals in obtaining insurance coverages.

Client Service Agreement

All PEO HR Outsourcing solutions clients execute a CSA with us. The CSA generally provides for an ongoing relationship between Insperty and the PEO HR Outsourcing solutions client. For most clients, the CSA generally is an annual contract subject to termination by Insperty or the client upon 30 days' written notice or upon shorter notice in the event of default. CSAs for our mid-market clients are generally two-year contracts, subject to earlier termination by clients upon payment of a termination fee or otherwise by the parties upon an event of default. The CSA establishes our comprehensive service fee, which is subject to periodic adjustments to account for changes in the composition of the client's workforce, employee benefit election changes and statutory changes that affect our costs. Under the CSA, clients active in January of any year are obligated to pay the estimated payroll tax component of the comprehensive service fee in a manner that reflects the pattern of incurred payroll tax costs. This practice aligns clients' payments to Insperty for payroll taxes with Insperty's obligations to make payments to tax authorities, which are higher in the earlier part of the year and decrease as limits on wages subject to payroll tax are reached. New clients enrolling subsequent to January of any year are invoiced at a relatively constant rate throughout the remaining portion of the year, resulting in Insperty's improving profitability over the course of the year for those clients because

of the typical pattern of incurred payroll tax costs.

The CSA also establishes the division of responsibilities between Insperty and the client as co-employers. Pursuant to the CSA, we are responsible for personnel administration and for compliance with certain employment-related government regulations. In addition, we assume liability for payment of salaries and wages (as well as related payroll taxes) of our worksite employees and responsibility for providing specified employee benefits to such persons. These liabilities are not contingent on the prepayment by the client of the associated comprehensive service fee and, as a result of our employment relationship with each of our worksite employees, we are liable for payment of salary and wages to the worksite employees as reported by the client and are responsible for providing specified employee benefits to such persons regardless of whether the client pays the associated comprehensive service fee. The client retains the employees' services and remains liable for complying with certain government regulations that require control of the worksite or daily supervisory responsibility or is otherwise beyond our

- 8 -

Table of Contents

ability to assume. A third group of responsibilities and liabilities are assumed by both Insperty and the client where such concurrent responsibility is appropriate. The specific division of applicable responsibilities under our CSAs generally is as follows:

Insperty

- Payment of wages and salaries as reported by the client and related tax reporting and remittance (local, state and federal withholding, FICA, FUTA, state unemployment)
- Workers' compensation compliance, procurement, management and reporting
- Compliance with the Code, COBRA, HIPAA and ERISA (for each employee benefit plan sponsored by Insperty), as well as monitoring changes in other governmental laws and regulations governing the employer/employee relationship and updating the client when necessary
- Offering benefits under Insperty-sponsored employee benefit plans that comply with PPACA requirements
- Employee benefits administration of plans sponsored solely by Insperty

Client

- Payment, through Insperty, of commissions, bonuses, vacations, paid time off, sick pay, paid leaves of absence and severance payments
- Payment and related tax reporting and remittance of non-qualified deferred compensation and equity-based compensation
- Ownership and protection of all client intellectual property rights
- Compliance with OSHA regulations, EPA regulations, FLSA, FMLA, WARN, USERRA and state and local equivalents and compliance with government contracting provisions
- Compliance with federal, state and local pay or play health care mandates and all such other similar federal, state and local legislation
- Compliance with the National Labor Relations Act ("NLRA"), including all organizing efforts and expenses related to a collective bargaining agreement and related benefits
- Professional licensing requirements, fidelity bonding and professional liability insurance
- Products produced and/or services provided
- COBRA, HIPAA, PPACA, Code and ERISA compliance for client-sponsored benefit plans

Concurrent

- Implementation of policies and practices relating to the employee/employer relationship
- Compliance with all federal, state and local employment laws, including, but not limited to Title VII of the Civil Rights Act of 1964, ADEA, Title I of ADA, the Consumer Credit Protection Act and immigration laws and regulations

We maintain employment practice liability insurance coverages (including coverages for our clients) to manage our exposure for various employee-related claims, and as a result, our incurred costs in excess of annual premiums with respect to this exposure have historically been insignificant to our operating results.

Because we are a co-employer with the client for some purposes, it is possible that we could incur liability for violations of such laws, even if we are not responsible for the conduct giving rise to such liability. Our CSA ordinarily addresses this issue by providing that the client will indemnify us for liability incurred to the extent the liability is attributable to conduct by the client. Notwithstanding this contractual right to indemnification, it is possible that we could be unable to collect on a claim for indemnification and may therefore be ultimately responsible for satisfying the liability in question.

In most instances, clients are required to remit their comprehensive service fees no later than one day prior to the applicable payroll date by wire transfer or automated clearinghouse transaction. Although we are ultimately liable, as the employer for payroll purposes, to pay employees for work previously performed, we retain the ability to terminate immediately the CSA and associated worksite employees or to require prepayment, letters of credit or other collateral upon deterioration in a client's financial condition or upon non-payment by a client. These rights, the periodic nature of payroll, and the overall quality of our client base have resulted in an excellent overall collections history.

Table of Contents

PEO HR Outsourcing Solutions Clients

Insperty's PEO HR Outsourcing solutions provide value-added, full-service human resources solutions we believe are most suitable to a specific segment of the small and medium-sized business community. We target successful businesses with approximately 10 to 2,000 employees that recognize the advantage in the strategic use of high-performance human resources practices. We have set a long-term goal to serve approximately 10% of the overall small and medium-sized business community in terms of worksite employees. We serve clients and worksite employees located throughout the United States. By region, our 2015 revenue change compared to 2014 and revenue distribution for the year ended December 31, 2015, was as follows:

	Revenue Change	%	% of Total Revenues	%
Northeast	10.0	%	25.9	%
Southeast	16.1	%	10.3	%
Central	17.9	%	15.4	%
Southwest	2.8	%	25.5	%
West	12.5	%	22.9	%

All prospective PEO HR Outsourcing solutions clients are evaluated on the basis of a comprehensive analysis of employer-related risks entailing many factors, including industry and operations, workplace safety and workers' compensation, unemployment history, operating stability, group medical information, human resources practices and other employer risks. As part of our client selection strategy, we strive to minimize offering our PEO HR Outsourcing solutions to businesses falling within certain specified NAICS (North American Industry Classification System) codes for those industries that we believe present a higher employer risk such as employee injury, high turnover or litigation.

Our PEO HR Outsourcing solutions client base is broadly distributed throughout a wide variety of industries including:

Industry	% of Client Base	%
Computer and information services	17	%
Management, administration and consulting services	17	%
Finance, insurance and real estate	14	%
Manufacturing	10	%
Wholesale trade	9	%
Engineering, accounting and legal services	8	%
Medical services	6	%
Retail trade	5	%
Not-for-profit and similar organizations	4	%
Construction	4	%
Other	6	%

This diverse client base lowers our exposure to downturns or volatility in any particular industry. However, our performance could be affected by a downturn in one of these industries or by general economic conditions within the small and medium-sized business community.

We focus heavily on client retention. During 2015 and 2014, our retention rate was approximately 85% and 82%, respectively. Of our PEO HR Outsourcing solutions clients that remain with us for more than one year, our retention

record over the last five years is approximately 82%. For all PEO HR Outsourcing solutions clients, the average annual retention rate over the last five years was approximately 81%. Client attrition is attributable to a variety of factors, including: (i) client non-renewal due to price or service factors; (ii) client business failure, sale, merger, or disposition; (iii) our termination of the CSA resulting from the client's non-compliance or inability to make timely payments; and (iv) competition from other PEOs or business services firms.

Table of Contents

Marketing and Sales

As of December 31, 2015, we had 52 PEO HR Outsourcing solutions sales offices located in 26 markets. Our sales offices typically consist of six to eight Business Performance Advisors (“BPAs”), a district sales manager and an office administrator. To take advantage of economic efficiencies, multiple sales offices may share a physical location. Insperty’s markets and their respective year of entry are as follows:

Market	Sales Offices	Initial Entry Date
Houston	5	1986
San Antonio	1	1989
Austin	1	1989
Orlando	1	1989
Dallas/Fort Worth	5	1993
Atlanta	2	1994
Phoenix	1	1995
Chicago	3	1995
Washington D.C.	2	1995
Denver	2	1996
Los Angeles	5	1997
Charlotte	1	1997
St. Louis	1	1998
San Francisco	3	1998
New York	4	1999
Maryland	2	2000
New Jersey	2	2000
San Diego	1	2001
Boston	2	2001
Minneapolis	2	2002
Raleigh	1	2006
Kansas City	1	2007
Columbus	1	2010
Nashville	1	2011
Philadelphia	1	2012
Seattle	1	2015

Our existing and prospective markets are identified using a systematic market evaluation and selection process. We continue to evaluate a broad range of factors in the selection process, using a market selection model that weighs various criteria we believe are reliable predictors of successful penetration based on our experience. Among the factors we consider are:

- market size, in terms of small and medium-sized businesses engaged in selected industries that meet our risk profile
- market receptivity to PEO services, including the regulatory environment and relevant history with other PEO providers
- existing relationships within a given market, such as vendor or client relationships
- expansion cost issues, such as advertising and overhead costs
- direct cost issues that bear on our effectiveness in controlling and managing the cost of our services, such as workers’ compensation and health insurance costs, unemployment risks and various legal and other factors
-

a comparison of the services we offer to alternatives available to small and medium-sized businesses in the relevant market, such as the cost to the target clients of procuring services directly or through other PEOs
long-term strategy issues, such as the general perception of markets and our estimate of the long-term revenue growth potential of the market

- 11 -

Table of Contents

We develop a mix of national and local advertising media and a placement strategy tailored to each individual market. After selecting a market and developing our marketing mix, but prior to entering the market, we engage in an organized media and public relations campaign to prepare the market for our entry and to begin the process of generating sales leads. We market our services through various business promotions and a broad range of media outlets, including television, radio, newspapers, periodicals, direct mail and the Internet. We employ public relations firms for most of our markets as well as advertising consultants to coordinate and implement our marketing campaigns. We have developed an inventory of television, radio and newsprint advertisements, which are utilized in this effort.

We routinely seek to develop new marketing approaches and campaigns to capitalize on changes in the competitive landscape for our human resources services and to more successfully reach our target market. We have an agreement with the Professional Golf Association Champions Tour to be the title sponsor of the annual Insperty Invitational™ presented by UnitedHealthcare® professional golf tournament held annually in The Woodlands, Texas (a suburb of Houston). In addition, we have arrangements with Arnold Palmer and Jim Nantz, a sports commentator, to serve as our national spokespersons. Our marketing campaigns use this event and the relationships with Mr. Palmer and Mr. Nantz as a focal point of our brand marketing efforts.

Our organic growth model generates sales leads from five primary sources: direct sales efforts, advertising, referrals, marketing alliances and the Internet. These leads result in initial presentations to prospective PEO HR Outsourcing solutions clients, and ultimately, prospective PEO HR Outsourcing solutions client census reports. A prospective PEO HR Outsourcing solutions client's census report reflects information gathered by the BPA about the prospect's employees, including base compensation, level of benefits coverage options, job classification, state of employment and workers' compensation classification. This information is used to generate a bid from our customized bid system, which applies Insperty's proprietary pricing model to the census data. Concurrent with this process, we evaluate prospective clients through the previously described comprehensive employer risk analysis. Upon completion of a favorable employer risk evaluation, the BPA presents the bid and attempts to complete the sale and enroll the prospect. Our selling process typically takes approximately 90 days for clients with less than 150 employees, and 180 or longer days for mid-market clients. The process can be extended during economic downturns.

We have implemented cross-selling channels between our PEO HR Outsourcing solutions business and our other products and services in order to execute on our cross-selling strategy. This strategy focuses on using our PEO HR Outsourcing solutions to increase market penetration in each of our other products and services and using our other product and service offerings as a source of leads for our PEO HR Outsourcing solutions. The cross-selling channels attempt to reduce barriers to selling our products and services and allow us to tailor service packages to better meet the specific needs of the business.

Competition

We provide a value-added, full-service human resources solution through our PEO HR Outsourcing solutions, which we believe is most suitable to a specific segment of the small and medium-sized business community. This full-service approach is exemplified by our commitment to provide a high level of service and technology personnel, which has produced a ratio of corporate staff to worksite employees (the "staff support ratio") that is higher than average for the PEO industry. Based on an analysis of the 2012 through 2014 annual NAPEO surveys of the PEO industry, we have successfully leveraged our full-service approach into significantly higher returns for Insperty on a per worksite employee per month basis. During the three-year period from 2012 through 2014, our staff support ratio averaged 57% higher than the PEO industry average. During the same three-year period, our gross profit per worksite employee and operating income per worksite employee exceeded industry averages by 151% and 120%, respectively.

Competition in the PEO industry revolves primarily around quality of services, scope of services, choice and quality of benefits packages, reputation and price. We believe reputation, national presence, regulatory expertise, financial resources, risk management and information technology capabilities distinguish leading PEOs from the rest of the industry. We also believe we compete favorably in these areas; however, other PEOs may offer their PEO services at more competitive prices than we may be able to offer.

Due to the differing geographic regions and market segments in which most PEOs operate, and the relatively low level of market penetration by the industry, we consider our primary competition for our PEO HR Outsourcing solutions to be the traditional in-house provision of human resources services. The PEO industry is highly fragmented, and we believe Insperty is one of the largest PEO service providers in the United States. Our largest national competitors include the PEO divisions of large business services companies such as Automatic Data Processing, Inc. and Paychex, Inc., and other national PEOs, such as TriNet Group, Inc. In addition, we compete to some extent with: (i) fee-for-service providers such as payroll processors and

- 12 -

Table of Contents

human resources consultants; (ii) human resources technology solution companies; and (iii) large regional PEOs in certain areas of the country. As Insperty and other large PEOs expand nationally, we expect that competition may intensify.

Vendor Relationships

Insperty provides benefits to its worksite employees under arrangements with a variety of vendors. We consider our contracts with UnitedHealthcare (“United”) and member insurance companies of ACE American Insurance Company (“ACE”) to be the most significant elements of our employee benefits package. These contracts would be the most difficult to replace.

We provide group health insurance coverage to our worksite employees through a national network of carriers including United, UnitedHealthcare of California, Kaiser Permanente, Blue Shield of California, HMSA BlueCross BlueShield of Hawaii and Tufts, all of which provide fully insured policies or service contracts. During 2015, we terminated our relationship with Unity Health Plan. The health insurance contract with United provides approximately 85% of our health insurance coverage and expires on December 31, 2019, subject to cancellation by either party upon 180 days’ notice. For a discussion of our contract with United, which is accounted for using a partially self-funded insurance accounting model, please read Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates – Benefits Costs.”

Our workers’ compensation coverage (the “ACE Program”) has been provided through an arrangement with ACE since 2007. The ACE Program is a fully insured policy whereby ACE has the responsibility to pay all claims incurred under the policy regardless of whether we satisfy our responsibilities. For additional discussion of the ACE Program, which includes terms shifting some of the economic burden to us, please read Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates – Workers’ Compensation Costs.”

Information Technology

Insperty utilizes a variety of information technology capabilities to provide its human resources services and business performance improvement services to its clients and worksite employees and for its own administrative and management information requirements.

Insperty’s PEO HR Outsourcing solutions information system is a proprietary system that utilizes internally developed and licensed software applications. This system manages transactions and information specific to our PEO HR Outsourcing solutions and to Insperty, including:

- worksite employee enrollment
- human resources management
- benefits and defined contribution plan administration
- payroll processing
- client invoicing and collection
- management information and reporting
- sales bid calculations

Central to this system are transaction processing capabilities that allow us to process a high volume of payroll, invoice and bid transactions that meet the specific needs of our clients and prospects. We administer our employee benefits through a proprietary application designed to process employee eligibility and enrollments, manage carrier relationships and maintain a variety of plan offerings. Our retirement services operations are conducted utilizing an

industry-leading retirement plan administration application in a third-party hosted environment. Aspects of all of these components are delivered to our PEO HR Outsourcing solutions clients and worksite employees through the ESC. We utilize commercially available software for other business functions such as finance and accounting, sales force activity management and customer relationship management.

Our products and services utilize a variety of owned and licensed software applications to deliver business performance improvement services to our clients, including to some of our PEO HR Outsourcing solutions clients.

Insperty has hosting facilities located at two separate leased facilities, located in Bryan, Texas and The Woodlands, Texas. The hosting facilities house the majority of our business applications, telecommunications equipment and network equipment. Each hosting facility houses a mix of primary production applications, disaster recovery, replication and back-up applications, and pre-production environments with the Bryan facility acting as our primary data center for all mission-critical applications. Both hosting facilities are designed to run all of our critical business applications and have sufficient capacity to

- 13 -

Table of Contents

handle all of our operations on a stand-alone basis, if required. Periodically, we perform testing to ensure our disaster recovery capabilities remain effective and available. We leverage the hosting facilities and related infrastructure that we originally designed for our PEO HR Outsourcing solutions system to support the systems required for our other products and services.

Our network infrastructure is designed to ensure appropriate connectivity exists among all of our facilities and employees and provides appropriate Internet connectivity to conduct business with our clients and worksite employees. The network infrastructure is provided through industry standard core network hardware and via high-speed network services provided by multiple vendors.

We have incorporated a variety of measures to maintain the security and privacy of the information managed through our systems and applications. These measures include industry standard technologies designed to protect, monitor and assess our data centers and network environment; best practice security policies and procedures; and a variety of measures designed to control access to sensitive and private information.

Industry Regulations

The operations for our PEO HR Outsourcing solutions are affected by numerous federal and state laws relating to tax, insurance and employment matters. By entering into a co-employer relationship with our worksite employees, we assume certain obligations and responsibilities of an employer under these federal and state laws. Because many of these federal and state laws were enacted prior to the development of nontraditional employment relationships, such as PEOs, temporary employment and outsourcing arrangements, many of these laws do not specifically address the obligations and responsibilities of nontraditional employers. Currently, 41 states have passed laws that recognize PEOs or require licensing, registration or certification requirements for PEOs, and several others are considering such regulation. The SBEA, which was enacted in 2014, will establish a certification program and create a federal regulatory framework for the payment of wages to worksite employees and for the reporting and remittance of payroll taxes on those wages by CPEOs. This law was effective January 1, 2016, however, the IRS has delayed the certification application process to July 1, 2016.

As an employer, we are subject to federal statutes and regulations governing the employer/employee relationship. Subject to the issues discussed below, we believe that our operations are in compliance, in all material respects, with all applicable federal statutes and regulations.

Employee Benefit Plans

We offer various employee benefits plans to eligible employees, including our worksite employees. These plans include:

- a 401(k) retirement plan
- cafeteria plans under Code Section 125
- a group health plan, which includes medical, dental, vision and prescription drug coverage, as well as a work-life program
- a health savings account program
- a welfare benefits plan, which includes life, disability and accidental death and dismemberment coverage
- a health care flexible spending account plan
- an educational assistance program
- an adoption assistance program
- a commuter benefits program

Generally, employee benefit plans are subject to provisions of the Code, ERISA and COBRA. The number and complex nature of federal and state regulations relating to employer-sponsored health plans has continued to increase over time. We believe that additional regulatory burdens placed on employers can increase the demand for our services because small and medium-sized businesses are especially challenged in their efforts to comply with governmental regulations due to limited resources and a lack of expertise. As a co-employer in the PEO relationship, we assume or share many of the employer-related responsibilities and assist our clients in complying with many employment-related governmental laws and regulations. Historically, we believe that we have successfully marketed the compliance component of our service offering and that our compliance-related services have increased the value proposition of our service offering.

Employer Status. In order to qualify for favorable tax treatment under the Code, employee benefit plans must be established and maintained by an employer for the exclusive benefit of its employees. Generally, an entity is an “employer” of individuals for federal employment tax purposes if an employment relationship exists between the entity and the individuals

- 14 -

Table of Contents

under the common law test of employment. In addition, the officers of a corporation are deemed to be employees of that corporation for federal employment tax purposes. The common law test of employment, as applied by the IRS, involves an examination of approximately 20 factors to ascertain whether an employment relationship exists between a worker and a purported employer. Generally, the test is applied to determine whether an individual is an independent contractor or an employee for federal employment tax purposes and not to determine whether each of two or more companies is a “co-employer.” Substantial weight is typically given to the question of whether the purported employer has the right to direct and control the details of an individual’s work. Among the factors that appear to have been considered more important by the IRS are:

- the employer’s degree of behavioral control (the extent of instructions, training and the nature of the work)
- the financial control or the economic aspects of the relationship
- the intended relationship of the parties (whether employee benefits are provided, whether any contracts exist, whether services are ongoing or for a project, whether there are any penalties for discharge/termination, and the frequency of the business activity)

ERISA Requirements. Employee pension and welfare benefit plans are also governed by ERISA. ERISA defines “employer” as “any person acting directly as an employer, or indirectly in the interest of an employer, in relation to an employee benefit plan.” ERISA defines the term “employee” as “any individual employed by an employer.” The United States Supreme Court has held that the common law test of employment must be applied to determine whether an individual is an employee or an independent contractor under ERISA. A definitive judicial interpretation of “employer” in the context of a PEO or employee leasing arrangement has not been established.

If Insperty were found not to be an employer with respect to worksite employees for ERISA purposes, its plans would not comply with ERISA. Further, as a result of such finding, Insperty and its plans would not enjoy, with respect to worksite employees, the preemption of state laws provided by ERISA and could be subject to varying state laws and regulations, as well as to claims based upon state common laws. Even if such a finding were made, we believe we would not be materially adversely affected because we would endeavor to make available similar benefits at comparable costs.

In addition to ERISA and the Code provisions discussed herein, issues related to the relationship between Insperty and its worksite employees may also arise under other federal laws, including other federal income tax laws.

Patient Protection and Affordable Care Act. The PPACA was signed into law on March 23, 2010. The PPACA was subsequently amended on March 30, 2010, by the Reconciliation Act. The PPACA and the Reconciliation Act (collectively the “Act”) entail sweeping health care reforms with original staggered effective dates from 2010 through 2018, some of which were subsequently extended until as late as 2020. While the Act did not have a material adverse impact on our results of operations in 2015, the future impact of the following provisions or changes to the provisions is unknown at this time.

Beginning in 2014, the Act provided for the establishment of state insurance exchanges (“Exchanges”) to make health insurance available to individuals and small employers (initially defined as 100 employees or less). States had the option of building a state-based exchange, entering into a state-federal partnership exchange or accepting the federally-facilitated exchange. States that accept the federally-facilitated exchange can transition to a state-based exchange at a later date. The Exchanges provide consumers with educational services and information on available options and offer a variety of health plans. Small business tax credits and subsidies are available to qualifying businesses and individuals who purchase health insurance through the Exchanges. At this time, the Exchanges, tax credits and subsidies have not had a material impact on our operations, but the impact of future changes to these provisions is unknown.

Additionally in 2014, the Act ushered in a number of insurance market reforms for the small group and individual markets. The reforms required guaranteed issue and renewability of coverage, eliminated certain underwriting practices by issuers, consolidated the number of risk pools in each state and restricted the permissible factors and variable ranges of those factors that can be considered in determining health insurance premiums. Transition relief permitted states to delay the effective date of some of these reforms. At this time, we are unable to determine whether the insurance market reforms will have an adverse impact on our business operations, our ability to attract and retain clients, or our ability to increase service fees to offset any increased costs.

The health insurance industry became subject to additional excise taxes in 2014, and reinsurance taxes were imposed on insurers and third-party administrators for the purpose of helping to offset the cost for insurance covering high-risk individuals. As the policyholder, all or a portion of these increased costs were passed on to us by our carriers. At this time, these taxes have not had a material impact on our operations, but the impact of future changes to these provisions is unknown.

Table of Contents

Effective January 1, 2015, new “pay or play” requirements applied to large employers with at least 50 full-time and full-time equivalent employees in the prior calendar year (“Applicable Large Employers” or “ALEs”). ALEs who fail to offer “minimum essential coverage” satisfying minimum value and affordability requirements may be subject to a penalty if a full-time employee obtains coverage from an Exchange and receives a subsidy or tax credit for such coverage. However, for 2015 only, certain ALEs with less than 100 full-time and full-time equivalent employees in 2014 will not be subject to pay or play penalties, provided certain transition relief requirements are satisfied. While clients are responsible for employer pay or play health care mandates under the CSA, the Insperty Group Health Plan qualifies as minimum essential coverage and is designed to satisfy the minimum value and affordability requirements. Clients are not required to use the affordability safe harbor utilized by us.

Information contained in the Congressional Record, which specifically references PEOs, indicates that any pay or play penalties should apply separately to clients of a PEO and not at the PEO level. However, the Act and subsequently issued IRS guidance do not expressly address the issue of whether the pay or play penalties apply only at the client level or whether the penalties can be applied at the PEO level. At this time, we are unable to determine if pay or play penalties may be assessed against a PEO for coverage provided to worksite employees under a PEO sponsored plan.

In December 2015, the effective date of the rules imposing excise taxes on employers and insurers who offer excessive health benefits under so-called “Cadillac plans” was delayed until 2020. We anticipate taking appropriate steps to avoid, to the extent necessary and possible, benefits under our group health plan from triggering such excise taxes, which our carrier may pass on to us in the form of increased premiums. At this time, we are unable to determine the effect that the excise taxes will have on our ability to match pricing with any increased costs.

401(k) Retirement Plans. Our 401(k) Retirement Plans are operated pursuant to guidance provided by the IRS under Revenue Procedure 2002-21 and Revenue Procedure 2003-86, each of which provides guidance for the operation of defined contribution plans maintained by PEOs that benefit worksite employees. This guidance provides qualification standards for PEO plans which, if met, negate the inquiry of common law employer status for purposes of the exclusive benefit rule. All of Insperty’s 401(k) Retirement Plans have received determination letters from the IRS confirming the qualified status of the plans.

Employment Taxes

As a co-employer, Insperty assumes responsibility and liability for the payment of federal and state employment taxes with respect to wages and salaries paid to our worksite employees. There are essentially three types of federal employment tax obligations:

- withholding of income tax requirements governed by Code Section 3401, et seq.
- obligations under FICA, governed by Code Section 3101, et seq.
- obligations under FUTA, governed by Code Section 3301, et seq.

Under these Code sections, employers have the obligation to withhold and remit the employer portion and, where applicable, the employee portion of these taxes.

Code Section 3401, which applies to federal income tax withholding requirements, contains an exception to the general common law test applied to determine whether an entity is an “employer” for purposes of federal income tax withholding. Code Section 3401(d)(1) states that if the person for whom services are rendered does not have control of the payment of wages, the “employer” for this purpose is the person having control of the payment of wages. The Treasury regulations issued under Code Section 3401(d)(1) state that a third party can be deemed to be the employer of workers under this section for income tax withholding purposes where the person for whom services are rendered does not have legal control of the payment of wages. While several courts have examined Code Section 3401(d)(1),

its ultimate scope has not been delineated. Moreover, the IRS has to date relied extensively on the common law test of employment in determining liability for failure to comply with federal income tax withholding requirements.

Accordingly, while we believe that we can assume the withholding obligations for worksite employees, in the event we fail to meet these obligations, the client may be held ultimately liable for those obligations. While this interpretive issue has not to our knowledge discouraged clients from enrolling with Insperty, there can be no assurance that a definitive adverse resolution of this issue would not do so in the future. These interpretive uncertainties may also impact our ability to report employment taxes on our own account rather than the accounts of our clients.

Table of Contents

For worksite employee wages for services performed on or after January 1, 2016, and subject to the adoption of applicable regulations, the provisions of the SBEA clarify that a CPEO shall be treated as the employer under Subtitle C – Employment Taxes of the Code, and shall be responsible for reporting employment taxes on its own account rather than the accounts of CPEO clients. The IRS has stated that it intends to begin accepting applications for certification under the SBEA on July 1, 2016. We intend to seek qualification as a CPEO.

Unemployment Taxes

We record our state unemployment (“SUI”) tax expense based on taxable wages and tax rates assigned by each state. State unemployment tax rates vary by state and are determined, in part, based on Insperty’s prior years’ compensation experience in each state. Certain rates are determined, in part, by each client’s own compensation experience. In addition, states have the ability under law to increase unemployment tax rates, including retroactively, to cover deficiencies in the unemployment tax funds. Overall, state unemployment tax rates increased substantially from 2010 to 2012 due to U.S. economic conditions, but declined from 2013 to 2015 and are anticipated to further decline in 2016. Rate notices are typically provided by the states during, or prior to, the first quarter of each year; however, some notices are received later. Until we receive the final tax rate notices, we estimate our expected SUI rate in those particular states.

Employers in certain states are experiencing higher FUTA tax rates as a result of certain states not repaying their unemployment loans from the federal government in a timely manner. We are obligated to pay the federal government at a higher rate in these situations. As such, we estimate the additional tax owed in states that have had a history of not repaying their federal loans in a timely manner.

State Regulation

While some states do not explicitly regulate PEOs, 41 states have adopted provisions for licensing, registration, certification or recognition of PEOs, and several others are considering such regulation. Such laws vary from state to state but generally provide for monitoring the fiscal responsibility of PEOs, and in some cases codify and clarify the co-employment relationship for unemployment, workers’ compensation and other purposes under state law. We believe that we are in compliance with the material requirements in all 41 states. Regardless of whether a state has licensing, registration or certification requirements for PEOs, we must comply with a number of other state and local regulations that could impact our operations.

Corporate Office Employees

We had approximately 2,400 corporate employees as of December 31, 2015. We believe our relations with our corporate employees are good. None of our corporate employees are covered by a collective bargaining agreement.

Intellectual Property

Insperty currently has registered trademarks, copyrights and other intellectual property. We believe that our trademarks as a whole are of considerable importance to our business.

ITEM 1A. RISK FACTORS.

The statements in this section describe the known material risks to our business and should be considered carefully.

Adverse Economic Conditions Could Negatively Affect Our Industry, Business and Results of Operations

The small and medium-sized business market is sensitive to changes in economic activity levels as well as the credit markets. As a result, the demand for the outsourced HR services we provide clients could be adversely impacted by weak economic conditions or difficulty obtaining credit. Current and prospective clients may respond to such conditions by reducing employment levels, compensation levels, employee benefit levels and outsourced HR services. In addition, during periods of weak economic conditions, current clients may have difficulty meeting their financial obligations to us and may select alternative HR services at more competitive rates than we offer. Such developments could adversely impact our financial condition, results of operations and future growth rates.

- 17 -

Table of Contents

We Assume Liability for Worksite Employee Payroll, Payroll Taxes and Benefits Costs and Are Responsible for Their Payment Regardless of the Amount Billed to or Paid by Our Clients

Under the CSA, we become a co-employer of worksite employees and assume the obligations to pay the salaries, wages and related benefits costs and payroll taxes of such worksite employees. We assume such obligations as a principal, not as an agent of the client. Our obligations include responsibility for:

- payment of the salaries and wages for work performed by worksite employees, regardless of whether the client timely pays us the associated service fee
- withholding and payment of federal and state payroll taxes with respect to wages and salaries reported by Insperty
- providing benefits to worksite employees even if our costs to provide such benefits exceed the fees the client pays us

If a client does not pay us, or if the costs of benefits we provide to worksite employees exceed the fees a client pays us, our ultimate liability for worksite employee payroll and benefits costs could have a material adverse effect on our financial condition or results of operations.

Increases in Health Insurance Costs or Inability to Secure Replacement Contracts on Competitive Terms Could Have a Material Adverse Effect on Our Financial Condition or Results of Operations

Maintaining health insurance plans that cover worksite employees is a significant part of our business. Our primary health insurance contract expires on December 31, 2019, subject to cancellation by either party upon 180 days' notice. In the event we are unable to secure replacement contracts on competitive terms, significant disruption to our business could occur.

Health insurance costs are in part determined by our claims experience and comprise a significant portion of our direct costs. If we experience an increase in the number or severity of claims, our health insurance costs could increase. Claim activity levels are impacted by a number of factors, including, but not limited to, macro-economic changes, proposed and enacted regulatory changes and medical outbreaks. Contractual arrangements with our clients limit our ability to incorporate such increases into service fees, which could result in a delay before such increases could be reflected in service fees. As a result, such increases could have a material adverse effect on our financial condition or results of operations. For additional information related to our health insurance costs, please read Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates – Benefits Costs."

Health Care Reform Could Affect Our Health Insurance Plan and Could Lead to a Significant Disruption in Our Business

The PPACA was signed into law on March 23, 2010. The PPACA was subsequently amended on March 30, 2010 by the Reconciliation Act. The Act entails sweeping health care reforms with original staggered effective dates from 2010 through 2018, some of which were subsequently extended out as far as 2020. Some provisions in the Act still require the issuance of additional guidance from HHS and the states.

Beginning in 2014, a number of key provisions of the Act took effect, including the Exchanges, insurance market reforms and the imposition of excise taxes on the health insurance industry and reinsurance taxes on insurers and third-party administrators. Additionally, the pay or play penalties on Applicable Large Employers took effect in 2015, however there was a one-year delay until 2016 for ALEs with less than 100 full-time and full-time equivalent employees in 2014, provided that certain transition relief requirements are satisfied. Collectively, these items have the potential to significantly change the insurance marketplace for small and medium sized businesses and how employers provide insurance to employees. In addition, as a co-employer in the PEO relationship, we assume or share many of

the employer-related responsibilities and assist our clients in complying with many employment-related governmental regulations. Generally, the Act and subsequently issued guidance by IRS and HHS have not addressed or in some instances are unclear as to their application in the PEO relationship or whether such provisions should be applied at the PEO or client level.

We are currently unable to determine the impact of the Act on our benefit plans, business model and future results of operations. In future periods, the changes may result in increased costs to us and could affect our ability to attract and retain clients. Additionally, contractual arrangements and competitive market conditions may limit or delay our ability to increase service fees to offset any associated potential increased costs. For additional information related to the Act, please read Item 1. “Business – Industry Regulations – Patient Protection and Affordable Care Act.”

Increases in Workers' Compensation Costs or Inability to Secure Replacement Coverage on Competitive Terms Could Lead to a Significant Disruption to Our Business

Our workers' compensation coverage has been provided through an arrangement with ACE since 2007. Under our current arrangement with ACE, we bear the economic burden for the first \$1 million layer of claims per occurrence and the economic burden for claims over \$1 million, up to a maximum aggregate amount of \$5 million per policy year for claims that exceed the first \$1 million. ACE bears the burden for all claims in excess of these levels. The ACE Program is a fully insured policy whereby ACE has the responsibility to pay all claims incurred under the policy regardless of whether we satisfy our responsibilities. For additional discussion of our policy with ACE, please read Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates – Workers' Compensation Costs."

Workers' compensation costs are a significant portion of our direct costs. If we were to experience an unexpected large increase in the number or severity of claims, our workers' compensation costs could increase, which could have a material adverse effect on our results of operations or financial condition.

The current workers' compensation coverage with ACE expires on September 30, 2016 and may be extended until September 30, 2017 if our claims do not exceed certain thresholds and certain other program conditions are satisfied. In the event we are unable to secure replacement coverage on competitive terms, significant disruption to our business could occur.

Our Ability to Adjust and Collect Service Fees for Increases in Unemployment Tax Rates May be Limited

We record our SUI tax expense based on taxable wages and tax rates assigned by each state. SUI tax rates vary by state and are determined, in part, based on prior years' compensation experience in each state. Prior to the receipt of final tax rate notices, we estimate our expected SUI tax rate in those states for which tax rate notices have not yet been received for purposes of pricing. In a period of adverse economic conditions state unemployment funds may experience a significant increase in the number of unemployment claims. Accordingly, SUI tax rates would likely increase substantially. Some states have the ability under law to increase SUI tax rates retroactively to cover deficiencies in the unemployment fund.

In addition, FUTA may be retroactively increased in certain states in the event the state fails to timely repay federal unemployment loans. Employers in such states are experiencing higher FUTA tax rates as a result of not repaying their unemployment loans from the federal government in a timely manner. The Benefit Cost Ratio Add-On ("BCR") is an additional tax on the FUTA wage base for employers in states that continue to have outstanding federal unemployment insurance loans beginning with the fifth year in which there is a balance due on the loan. States have the option to apply for a waiver before July 1st of the year in which the BCR is applicable. As of December 31, 2015 there were three states with outstanding unemployment loans and of those, all but one, Connecticut, filed for and received a BCR waiver in 2015; however, there is no certainty the states will receive waivers in 2016. If waivers are not obtained in 2016, Insperty will be required to pay the BCR taxes.

Generally, our contractual agreements allow us to incorporate such statutory tax increases into our service fees upon the effective date of the rate change. However, our ability to fully adjust service fees in our billing systems and collect such increases over the remaining term of the clients' contracts could be limited, resulting in a potential tax increase not being fully recovered. As a result, such increases could have a material adverse effect on our financial condition or results of operations.

Our Contracts for Our PEO HR Outsourcing Solutions May be Canceled on Short Notice. Our Inability to Renew Client Contracts or Attract New Clients Could Materially and Adversely Affect Our Financial Conditions or Results

of Operations

Our standard CSA can generally be canceled by us or the client with 30 days' notice. Accordingly, the short-term nature of the CSA makes us vulnerable to potential cancellations by existing PEO HR Outsourcing Solution clients, which could materially and adversely affect our financial condition or results of operations. In addition, in the event we have a high proportion of terminating clients from our mid-market client base (which are generally under a two-year CSA), the financial impact of such an event could be significant due to the number of worksite employees involved and the time it takes to replace mid-market clients. Also, our results of operations are dependent in part upon our ability to retain or replace our clients upon the termination or cancellation of the CSA. Our client attrition rate was approximately 15% in 2015. There can be no assurance that the number of contract cancellations will continue at these levels and such cancellations may increase in the future due to various factors, including but not limited to, economic conditions in the markets we operate. Clients electing to purchase our services or electing an alternative solution often do so at the beginning of the calendar year. As a result, we typically experience our largest concentration of new client additions and attrition in the first quarter of each year.

- 19 -

Table of Contents

Competition and Other Developments in the HR Services Industry May Impact Our Growth and/or Profitability

The human resources services industry, including the PEO industry, is highly fragmented. Many PEOs have limited operations and fewer than 1,000 worksite employees, but there are several industry participants that are comparable to our size or larger. We also encounter competition from “fee for service” companies such as payroll processing firms, insurance companies, human resources consultants and human resources technology solutions as well as cloud-based self-service bundled human resources offerings. Our competitors include the PEO divisions of large business services companies, such as Automatic Data Processing, Inc. and Paychex, Inc., and other national PEOs such as TriNet Group, Inc. In many cases, these competitors offer a reduced service PEO offering at a lower price than our PEO HR Outsourcing solutions. We expect that as the PEO industry grows and its regulatory framework becomes better established, well organized competition with greater resources than we have may enter the PEO market, possibly including large “fee for service” companies currently providing a more limited range of services. In addition, competitors may be able to offer or develop new technology-based lower service models that may require us to make substantial investments in order to effectively compete.

In 2013, we began offering a lower priced reduced service level PEO offering referred to as Workforce Synchronization in response to certain mid-market client needs and the evolving PEO marketplace. As of December 2015, approximately 10% of our worksite employees were co-employed by Workforce Synchronization clients. In the event we were to experience a significant increase in the number of clients using the Workforce Synchronization offering or increased pricing pressures in the PEO marketplace without corresponding reductions in operating costs, our operating margins may decline, which could have a material adverse impact on our financial condition or results of operations.

We May Be Subject to Liabilities for Client and Employee Actions

A number of legal issues remain unresolved with respect to the co-employment arrangement between a PEO and its worksite employees, including questions concerning the ultimate liability for violations of employment and discrimination laws. Our CSA establishes the contractual division of responsibilities between Insperty and our clients for various personnel management matters, including compliance with and liability under various governmental regulations.

Because we act as a co-employer, we may be subject to liability for violations of various employment and discrimination laws despite these contractual provisions, even if we do not participate in such violations. Although the CSA generally provides that the client is to indemnify us for certain liabilities attributable to the client’s conduct, we may not be able to collect on such a contractual indemnification claim and thus may be responsible for satisfying such liabilities to the extent that such liabilities are not covered or insured against under our insurance policies. In addition, worksite employees may be deemed to be our agents, which may subject us to liability for the actions of such worksite employees.

Changes in Federal, State and Local Regulation or Our Inability to Obtain Licenses Under New Regulatory Frameworks Could Have a Material Adverse Effect on Our Results of Operations or Financial Condition

As a major employer, our operations are affected by numerous federal, state and local laws and regulations relating to labor, tax, benefit, insurance and employment matters. By entering into a co-employer relationship with employees assigned to work at client locations, we assume certain obligations and responsibilities of an employer under these laws. However, many of these current laws (such as the Act, ERISA and federal and state employment tax laws) do not specifically address the obligations and responsibilities of non-traditional employers such as PEOs, and the definition of “employer” under these laws is not uniform. While the SBEA is expected to provide clarification under

federal employment tax laws for CPEOs, until further administrative guidance is issued, including the requirements for CPEOs, we cannot be certain as to the benefit that this law will provide. In addition, many of the states in which we operate have not addressed the PEO relationship for purposes of compliance with applicable state laws governing the employer/employee relationship. Any adverse application of new or existing federal or state laws to the PEO relationship with our worksite employees and client companies could have a material adverse effect on our results of operations or financial condition.

While some states do not explicitly regulate PEOs, 41 states have passed laws that have recognition, licensing, certification or registration requirements for PEOs and several other states are considering such regulation. Such laws vary from state to state, but generally provide for monitoring the fiscal responsibility of PEOs, and in some cases codify and clarify the co-employment relationship for unemployment, workers' compensation and other purposes under state law. In addition, the SBEA will provide certain benefits for companies that qualify as a CPEO. While we generally support licensing regulation because it serves to validate the PEO relationship, we may not be able to satisfy licensing requirements or other applicable regulations for all states. In addition, there can be no assurance that we will be able to renew our licenses in all states or that we will be able to qualify as a CPEO following the implementation of the SBEA.

- 20 -

Table of Contents

Geographic Market Concentration Makes Our Results of Operations Vulnerable to Regional Economic Factors

Our New York, California and Texas markets accounted for approximately 10%, 18% and 24% (including 12% in Houston), respectively, of our worksite employees for the year ended December 31, 2015. Accordingly, while we have a goal of expanding in our current markets and into new markets, for the foreseeable future, a significant portion of our revenues may be subject to economic factors specific to New York, California and Texas.

A Determination that a Client is Liable for Employment Taxes Not Paid by a PEO May Discourage Clients from Contracting with Us in the Future

Under the CSA, we assume sole responsibility and liability for paying federal employment taxes imposed under the Code with respect to wages and salaries we pay our worksite employees. There are essentially three types of federal employment tax obligations:

• income tax withholding requirements

• FICA

• FUTA

Under the Code, employers have the obligation to withhold and remit the employer portion and, where applicable, the employee portion of these taxes. Most states impose similar employment tax obligations on the employer. While the CSA provides that we have sole legal responsibility for making these tax contributions, the applicable state taxing authority or, prior to the implementation of the SBEA and the Company becoming a CPEO, the IRS could conclude that such liability cannot be completely transferred to us. Accordingly, in the event that we fail to meet our tax withholding and payment obligations, the client may be held jointly and severally liable for those obligations. While this interpretive issue has not, to our knowledge, discouraged clients from enrolling with Insperty, a definitive adverse resolution of this issue or a delay in the implementation of the SBEA may discourage clients from enrolling in the future.

Failure of Our Information Technology Systems, Including From Cyber Attacks and Data Breaches, Could Damage Our Reputation, Materially Disrupt Our Business Operations, and Increase Our Costs and Cause Losses

Many of the HR services offerings we provide to clients are conducted through a technology infrastructure using both internally developed and purchased commercial software, a wide variety of hardware infrastructure technologies, and a multi-carrier wide area network. The processing of payroll, benefits and other transactions is dependent upon this complex infrastructure some of which is provided by third party vendors. Hardware or applications we develop or procure from third party vendors may contain defects in design or other problems that could unexpectedly compromise the confidentiality, integrity or availability of data or our systems. Any delays or failures caused by network outages, software or hardware failures, or other data processing disruptions, could result in our inability to timely process transactions. If such failures cause us to not meet client service expectations, we may lose existing clients and may have difficulty attracting new clients.

In connection with our HR services offerings, we collect, use, transmit and store large amounts of personal and business information about our worksite employees and clients, including payroll information, personal and business financial data, social security numbers, bank account numbers, tax information and other sensitive personal and business information. We are focused on ensuring that the technology infrastructure that we use safeguards and protects personal and business information. We have programs in place to prevent, detect and respond to data security incidents, and we take steps to require that our third party vendors protect sensitive information. Nonetheless, attacks on information technology systems continue to grow in frequency and sophistication, and we and our third party vendors are sometimes targeted by unauthorized parties using malicious tactics, code and viruses. Because the

techniques used to obtain unauthorized access and disable or sabotage systems change frequently and may be difficult to detect for long periods of time, we and our third party vendors may be unable to anticipate these techniques or implement adequate preventive measures. As these threats continue to evolve, we may be required to invest significant additional resources to modify and enhance our information security and controls or to investigate and remediate any security vulnerabilities. While our technology infrastructure is designed to safeguard and protect personal and business information, we do not have the ability to monitor the implementation of similar safeguards by our vendors, clients or worksite employees.

Any cyber-attack, unauthorized intrusion, malicious software infiltration, network disruption, corruption of data, or theft of private or other sensitive information, or inadvertent acts by our own employees, could result in the disclosure or misuse of confidential or proprietary information, and could have a material adverse effect on our business operations or that of

- 21 -

Table of Contents

our clients, result in liability or regulatory sanction, or cause a loss of confidence in our ability to serve clients. Although we believe that we maintain a stringent program of information security and controls, the impact of a data security incident could have a material adverse effect on our business, results of operations and financial condition. We are also subject to various federal and state laws, rules and regulations relating to the collection, use, transmission and security of personal and business information. Most states and the District of Columbia have enacted notification rules that may require notification to regulators, clients or employees in the event of a privacy breach. It is possible that these federal and states laws may be interpreted and applied in a manner that is inconsistent with our data practices. If so, in addition to the possibility of fines, this could result in an order requiring that we change our data practices, which could have a material adverse effect on our business. Complying with these various laws could cause us to incur substantial costs or require us to change our business practices in a manner adverse to our business. The future enactment of more restrictive laws, rules or regulations could have a material adverse impact on us through increased costs or restrictions on our businesses and noncompliance could result in regulatory penalties and significant liability.

The Failure of Our Insurance Carriers or Financial Institutions Could Have a Material Adverse Effect on Us

As part of our PEO HR Outsourcing solutions, we contract with various insurance carriers to provide insurance coverage including health insurance, workers' compensation insurance and employment practices liability insurance. In addition, we obtain insurance coverage for various commercial risks in our business such as property insurance, errors and omissions insurance, general liability insurance, fiduciary liability insurance, automobile liability insurance, and directors' and officers' liability insurance. The failure of any insurance carrier providing such coverage could leave us exposed to uninsured risk and could have a material adverse effect on our business.

In conjunction with providing services to clients, we rely on financial institutions to electronically transfer funds for the collection of our comprehensive service fee as well as the payment of wages and associated payroll tax withholdings. Failure by these financial institutions, for any reason, to deliver their services in a timely manner could result in material interruptions to our operations, impact client relations, and result in significant penalties or liabilities to us.

New and Higher Federal, State and Local Taxes Could Have a Material and Adverse Impact on Our Financial Condition and Results of Operations

In times of economic slowdowns, states and municipalities in which we operate may experience reductions in tax revenues and corresponding budget deficits. In response to the budget shortfalls, many states and municipalities have in the past and may in the future increase or enact new taxes on businesses operating within their tax jurisdiction, including business activity taxes and income taxes. In addition, federal, state and local taxing agencies may increase their audit activity in an effort to identify additional tax revenues. New tax assessments on our operations could result in increased costs. Our ability to adjust our service fees and incorporate additional tax assessments into our billing system could be limited. As a result, such higher taxes could have a material adverse impact on our financial condition or results of operations.

Failure to Integrate or Realize the Expected Return on Our Acquisitions and Investments Could Have a Material Adverse Impact on Our Financial Condition or Results of Operations

We have adopted a strategy to market and sell additional products and services within and outside of traditional PEO HR Outsourcing solutions. As part of this strategy, periodically we make strategic long-term decisions to invest in and/or acquire new companies, business units or assets. Acquiring new businesses involves a number of risks such as over-valuation of the acquired companies, entering markets or businesses in which we have no prior experience, integrating the technology, operations, and personnel, diversion of management's attention from other business concerns and litigation resulting from the activities of the acquired company. The occurrence of one or more of these

events could result in the loss of existing or prospective clients or employees, not achieving anticipated revenues or profitability, or impairment of acquired assets. Such developments could have a material impact to our financial condition, results of operations and future growth rates.

In connection with our goodwill impairment assessments, we recorded impairment charges of \$2.5 million in our Employment Screening reporting unit in 2014, \$3.3 million in our Expense Management reporting unit in 2013 and \$4.2 million in our Performance Management reporting unit in 2012. In addition, we recorded a \$2.7 million impairment charge related to our minority investment in The Receivables Exchange in 2013. Based on market conditions or changes in operating plans, the fair value of our other acquired businesses could decline, requiring us to record additional impairment charges for all or portions of the investments. Please read Note 5, "Goodwill and Other Intangible Assets" and Note 6, "Other Asset Impairments," to the Consolidated Financial Statements for additional information.

Table of Contents

Our Business Could Be Disrupted as a Result of Actions of Certain Stockholders

In 2015, our largest stockholder made public statements critical of our performance, advocated that we make certain changes regarding our strategic plan, operating expenses, capital allocation, management and corporate governance, and suggested that we should pursue strategic alternatives. In March 2015, prior to our 2015 annual meeting of stockholders, we entered into an agreement with this stockholder pursuant to which, among other things, we appointed three new directors nominated by the stockholder to our Board of Directors. Two then-current directors, who had decided not to seek re-election when their terms expired, departed our Board of Directors following the 2015 annual meeting. In addition, this stockholder agreed to customary standstill restrictions, which will expire in February 2016.

If our largest or any of our other stockholders commences a proxy contest, further advocates for changes or engages in other similar activities, then our business could be adversely affected because we may have difficulty attracting and retaining clients due to perceived uncertainties as to our future direction and negative public statements about our business; responding to proxy contests and other similar actions by stockholders is likely to result in us incurring substantial additional costs and significantly divert the attention of management and our employees; and, if individuals are elected to our Board of Directors with a specific agenda, the execution of our strategic plan may be disrupted or a new strategic plan altogether may be implemented.

Any proxy contest in connection with our 2016 annual meeting of stockholders may be particularly disruptive because if two or more of the stockholder nominees are elected, then a majority of our Board of Directors would be comprised of directors who were nominated by stockholders and who obtained their board seats in connection with an actual or threatened proxy contest. This outcome may constitute a change in control of the Company under our Incentive Plans. Further, if there is a newly constituted Board of Directors comprised of a majority of such directors, they may not support our current strategic plan, which may adversely affect our business while a new strategic plan is developed and implemented.

We cannot predict, and no assurances can be given, as to the outcome or timing of any matters relating to the foregoing actions by stockholders or the ultimate impact on our business, financial condition or results of operations. Further, any of these matters or any further actions by this or other stockholders may impact and result in volatility of the price of our common stock, including if this stockholder were to exit its investment in our common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

We believe our current real estate and facilities are adequate for the purposes for which they are intended and provide for further expansion to accommodate our long-term growth and expansion goals. We believe that short-term leased facilities are readily available if needed to accommodate near-term needs if they arise. We will continue to evaluate the need for additional facilities based on the extent of our product and service offerings, the rate of client growth, the geographic distribution of our client base and our long-term service delivery requirements.

Corporate Facilities

Our corporate headquarters is located in Kingwood, Texas, in a 327,000 square foot campus-style facility. This 33-acre company-owned office campus includes approximately 12 acres of undeveloped land for future expansion. Development and support operations are located in the Kingwood facility.

In December 2015, we began the construction of a 100,000 square foot office facility located on our corporate campus in Kingwood, Texas. The new facility, which is expected to be completed in 2017, is estimated to cost approximately \$25 million. We expect to fund the construction costs with cash on hand and cash from operations, as well as funds

available under our credit facility. We expect to relocate personnel from our Houston service center to this new facility.

We have hosting facilities, totaling approximately 2,000 square feet, located at two separate leased facilities. The hosting facilities house the majority of our business applications, telecommunications equipment and network equipment. The facilities are located in Bryan, Texas and The Woodlands, Texas and are under lease until 2022 and 2019, respectively.

- 23 -

Table of Contents

Service Centers

We currently have four regional service centers located in Atlanta, Dallas, Houston and Los Angeles.

The Atlanta service center, which currently services approximately 33% of our worksite employee base, is located in a 40,500 square foot facility under lease until 2022.

The Dallas service center, which currently services approximately 21% of our worksite employee base, is located in a 48,600 square foot facility under lease until 2016. In addition to the service center operations, the facility also contains sales operations.

The Houston service center, which currently services approximately 20% of our worksite employee base, is located in a 60,600 square foot facility under lease until 2016. In addition to the service center operations, the facility also contains corporate support operations.

The Los Angeles service center, which currently services approximately 26% of our worksite employee base, is located in a 38,000 square foot facility under lease until 2019.

Sales Offices

As of December 31, 2015, we had PEO HR Outsourcing solutions sales and service personnel in 47 facilities located in 26 sales markets throughout the United States. All of the facilities are leased and some are shared by multiple sales offices and/or client service personnel. As of December 31, 2015, we had 52 PEO HR Outsourcing solutions sales offices in these 26 markets. To take advantage of economic efficiencies, multiple sales offices may share a physical location. Each sales office is typically staffed by six to eight BPAs, a district sales manager and an office administrator. In addition, we have placed certain client service personnel in a majority of our sales markets to provide high-quality, localized service to our clients in those major markets. We expect to continue placing various client service personnel in sales markets as a critical mass of clients is attained in each market.

ITEM 3. LEGAL PROCEEDINGS.

We are not a party to any material pending legal proceedings other than ordinary routine litigation incidental to our business that we believe would not have a material adverse effect on our financial condition or results of operations, except as discussed in Note 13 to the Consolidated Financial Statements, "Commitments and Contingencies," which is incorporated herein by reference.

ITEM S-K 401 (b). EXECUTIVE OFFICERS OF THE REGISTRANT.

The following table sets forth the names, ages (as of February 5, 2016) and positions of Insuperity's executive officers:

Name	Age	Position
Paul J. Sarvadi	59	Chairman of the Board and Chief Executive Officer
Richard G. Rawson	67	President
A. Steve Arizpe	58	Executive Vice President of Client Services and Chief Operating Officer
Jay E. Mincks	62	Executive Vice President of Sales and Marketing
Douglas S. Sharp	54	Senior Vice President of Finance, Chief Financial Officer and Treasurer
Daniel D. Herink	49	Senior Vice President of Legal, General Counsel and Secretary

Edgar Filing: INSPERITY, INC. - Form 10-K

Paul J. Sarvadi has served as Chairman of the Board and Chief Executive Officer since August 2003. Mr. Sarvadi co-founded Insperity in 1986 and served as Vice President and Treasurer of Insperity from its inception in 1986 through April 1987, as Vice President from April 1987 through 1989 and as President and Chief Executive Officer from 1989 to August 2003. Prior to founding Insperity, Mr. Sarvadi started and operated several small businesses. Mr. Sarvadi has served as President of NAPEO and was a member of its Board of Directors for five years. Mr. Sarvadi was selected as the 2001 National Ernst & Young Entrepreneur Of The Year® for service industries. In 2004, he received the Conn Family Distinguished New Venture Leader Award from Mays Business School at Texas A&M University. In 2007, he was inducted into the Texas Business Hall of Fame.

- 24 -

Table of Contents

Richard G. Rawson is President of Insperty and most of its subsidiaries, a Class III director, and has been a director of Insperty since 1989. He has been President since August 2003. Before being elected President, he served as Executive Vice President of Administration, Chief Financial Officer and Treasurer of the Company from February 1997 until August 2003. Prior to that, he served as Senior Vice President, Chief Financial Officer and Treasurer of Insperty since 1989. Prior to joining Insperty in 1989, Mr. Rawson served as a Senior Financial Officer and Controller for several companies in the manufacturing and seismic data processing industries. Mr. Rawson has served NAPEO as Chairman of the Accounting Practices Committee and several other offices and became President in 1999-2000. Mr. Rawson has a Bachelor of Business Administration in finance from the University of Houston and currently serves as a board member for the C.T. Bauer College of Business.

A. Steve Arizpe has served as Executive Vice President of Client Services and Chief Operating Officer since August 2003. He joined Insperty in 1989 and has served in a variety of roles, including Houston Sales Manager, Regional Sales Manager and Vice President of Sales. Prior to joining Insperty, Mr. Arizpe served in sales and sales management roles for NCR Corporation and Clarke-American. He has also served as a director of the Texas Chapter of NAPEO. Mr. Arizpe graduated from Texas A&M University in 1979, earning his degree in Business Management.

Jay E. Mincks has served as Executive Vice President of Sales and Marketing since January 1999. Mr. Mincks served as Vice President of Sales and Marketing from February 1997 through January 1999. He joined Insperty in 1990 and has served in a variety of other roles, including Houston Sales Manager and Regional Sales Manager for the Western United States. Prior to joining Insperty, Mr. Mincks served in a variety of positions, including management positions, in the sales and sales training fields with various large companies. He holds a business degree from the University of Houston.

Douglas S. Sharp has served as Senior Vice President of Finance, Chief Financial Officer and Treasurer since May 2008. He served as Vice President of Finance, Chief Financial Officer and Treasurer from August 2003 until May 2008. Mr. Sharp joined Insperty in January 2000 as Vice President of Finance and Controller. From July 1994 until he joined Insperty, he served as Chief Financial Officer for Rimkus Consulting Group, Inc. Prior to that, he served as Controller for a small publicly held company; as Controller for a software company; and as an Audit Manager for Ernst & Young LLP. Mr. Sharp has served as a member of the Accounting Practices Committee of NAPEO. Mr. Sharp is also a certified public accountant.

Daniel D. Herink has served as Senior Vice President of Legal, General Counsel and Secretary since May 2008. Mr. Herink joined Insperty in 2000 as Assistant General Counsel and was promoted to Associate General Counsel in 2002. He was elected to his current position in May 2007. Mr. Herink previously served as an attorney at Rodriguez, Colvin & Chaney, L.L.P. and McGinnis, Lochridge & Kilgore, L.L.P. He earned his Bachelor of Science degree in business administration from the University of Nebraska and a Doctorate of Jurisprudence from The University of Texas School of Law, where he was a member of the Texas Law Review and The Order of the Coif. Mr. Herink is also a certified public accountant.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Price Range of Common Stock

Our common stock is traded on the New York Stock Exchange under the symbol "NSP." As of February 5, 2016, there were 358 holders of record of our common stock. This number does not include stockholders for whom shares were held in "nominee" or "street name." The following table sets forth the high and low sales prices for the common stock as reported on the New York Stock Exchange transactional tape.

	High	Low	Dividends per Share	
2015				
First Quarter	\$55.42	\$32.43	\$0.19	
Second Quarter	55.11	47.83	0.22	
Third Quarter	52.95	41.77	0.22	
Fourth Quarter	49.00	41.88	0.22	
2014				
First Quarter	\$36.23	\$26.85	\$0.17	
Second Quarter	33.74	29.82	0.19	
Third Quarter	33.47	27.29	0.19	
Fourth Quarter	34.97	27.01	2.19	(1)

(1) Includes a \$2.00 per share special dividend

Dividend Policy

During 2015 and 2014, we paid dividends of \$21.2 million and \$69.5 million, respectively, including a special cash dividend of \$50.7 million paid in the fourth quarter of 2014. The payment of dividends is made at the discretion of our Board of Directors and depends upon our operating results, financial condition, capital requirements, general business conditions and such other factors as our Board of Directors deems relevant.

Issuer Purchases of Equity Securities

In January 2016, we completed a modified Dutch auction tender offer whereby 3,013,531 shares of our common stock were repurchased and retired for \$143.1 million, excluding approximately \$1.1 million of transaction costs. The tender offer was funded with borrowings of \$104.4 million under our credit facility and the remainder with cash on hand.

The following table provides information about our purchases of Insperty common stock during the three months ended December 31, 2015:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program ⁽¹⁾	Maximum Number of Shares that may yet be Purchased under the Program ⁽¹⁾
10/01/2015 – 10/31/2015	—	\$—	—	703,073
11/01/2015 – 11/30/2015	178,741	43.75	178,741	524,332

Edgar Filing: INSPERITY, INC. - Form 10-K

12/01/2015 – 12/31/2015	—	—	—	524,332
Total	178,741	\$43.75	178,741	524,332

(1) Our Board of Directors has authorized a program to repurchase shares of our outstanding common stock. During the three months ended December 31, 2015, 178,741 shares were repurchased under the program and no shares were withheld to satisfy tax withholding obligations for the vesting of restricted stock awards. Unless terminated early by resolution of the

Board of Directors, the repurchase program will expire when we have repurchased all shares authorized for repurchase under the repurchase program.

Performance Graph

The following graph compares our cumulative total stockholder return since December 31, 2010, with the S&P Smallcap 600 Index and the S&P 1500 Composite Human Resources and Employment Services Index. The graph assumes that the value of the investment in our common stock and each index (including reinvestment of dividends) was \$100 on December 31, 2010.

	12/10	12/11	12/12	12/13	12/14	12/15
Insperty, Inc.	100.00	88.53	120.37	136.48	138.55	200.38
S&P Smallcap 600	100.00	101.02	117.51	166.05	175.61	172.14
S&P 1500 Composite Human Resources and Employment Services	100.00	83.15	93.39	167.47	167.51	180.64

This graph shall not be deemed “filed” for purposes of Section 18 of the Securities and Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that section, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933 or the Exchange Act, regardless of any general incorporation language in such filing.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this annual report. Historical results are not necessarily indicative of trends in operating results for any future period.

The statements contained in this annual report that are not historical facts are forward-looking statements that involve a number of risks and uncertainties. The actual results of the future events described in such forward-looking statements in this annual report could differ materially from those stated in such forward-looking statements. Among the factors that could cause actual results to differ materially are the risks and uncertainties discussed in Item 1A. Risk Factors and the uncertainties set forth from time to time in our other public reports and filings and public statements.

Overview

Our long-term strategy is to provide the best small and medium-sized businesses in the United States with our specialized human resources service offering and to leverage our buying power and expertise to provide additional valuable services to clients. Our most comprehensive HR services offerings are provided through our Workforce Optimization[®] and Workforce Synchronization[™] solutions (together, our PEO HR Outsourcing solutions), which encompass a broad range of human resources functions, including payroll and employment administration, employee benefits, workers' compensation, government compliance, performance management and training and development services. Our overall operating results can be measured in terms of revenues, payroll costs, gross profit or operating income per worksite employee per month. We often use the average number of worksite employees paid during a period as our unit of measurement in analyzing and discussing our results of operations.

In addition to our PEO HR Outsourcing solutions, we offer a number of other business performance solutions, including Human Capital Management, Payroll Services, Time and Attendance, Performance Management, Organizational Planning, Recruiting Services, Employment Screening, Financial and Expense Management Services, Retirement Services and Insurance Services, many of which are offered via desktop applications and cloud-based delivery models. These other products or services are offered separately, as a bundle, or along with our PEO HR Outsourcing solutions.

We ended 2015 averaging 153,144 paid worksite employees in the fourth quarter, which represents a 12.0% increase over the fourth quarter of 2014. Approximately 23% of our average paid worksite employees were in our mid-market sector for the years ended December 31, 2014 and 2015, which is generally defined as companies with 150 to 2,000 worksite employees. We expect the average number of paid worksite employees per month to be between 155,900 and 157,300 in the first quarter of 2016.

Our average gross profit per worksite employee per month was \$250 in 2015 and \$257 in 2014, which included a contribution to average gross profit from our other products and services offerings of \$17 per worksite employee per month in both 2015 and 2014.

Adjusted operating expenses increased 2.1% in 2015 to \$360.1 million. On a per worksite employee per month basis, adjusted operating expenses decreased from \$225 in 2014 to \$206 in 2015.

Our adjusted net income in 2015 was \$54.5 million, a \$17.8 million increase compared to 2014. Our adjusted EBITDA increased 30.8% over 2014 to \$110.0 million.

We ended 2015 with working capital of \$54.3 million. During 2015, we paid \$21.2 million in dividends and repurchased shares of our common stock at a cost of \$67.1 million.

Revenues

We account for our revenues in accordance with Accounting Standards Codification (“ASC”) 605-45, Revenue Recognition. Our PEO HR Outsourcing solutions gross billings to clients include the payroll cost of each worksite employee at the client location and a markup computed as a percentage of each worksite employee’s payroll cost. We invoice the gross billings concurrently with each periodic payroll of our worksite employees. Revenues, which exclude the payroll cost component of gross billings, and therefore, consist solely of the markup, are recognized ratably over the payroll period as worksite employees perform their service at the client worksite. This markup includes pricing components associated with our estimates of payroll taxes, benefits and workers’ compensation costs, plus a separate component related to our HR services. We

- 30 -

Table of Contents

include revenues that have been recognized but not invoiced in unbilled accounts receivable on our Consolidated Balance Sheets.

Our revenues are primarily dependent on the number of clients enrolled, the resulting number of worksite employees paid each period and the number of worksite employees enrolled in our benefit plans. Because our total markup is computed as a percentage of payroll cost, certain revenues are also affected by the payroll cost of worksite employees, which may fluctuate based on the composition of the worksite employee base, inflationary effects on wage levels and differences in the local economies of our markets.

Direct Costs

The primary direct costs associated with revenue-generating activities for our PEO HR Outsourcing solutions are:

- employment-related taxes (“payroll taxes”)
- costs of employee benefit plans
- workers’ compensation costs

Payroll taxes consist of the employer’s portion of Social Security and Medicare taxes under FICA, federal unemployment taxes and state unemployment taxes. Payroll taxes are generally paid as a percentage of payroll cost. The federal unemployment tax rates are defined by federal regulations. State unemployment tax rates are subject to claim histories and vary from state to state.

Employee benefits costs are comprised primarily of health insurance premiums and claims costs (including dental and pharmacy costs), but also include costs of other employee benefits such as life insurance, vision care, disability insurance, education assistance, adoption assistance, a flexible spending account program and a work-life program.

Workers’ compensation costs include administrative and risk charges paid to the insurance carrier, and claims costs, which are driven primarily by the frequency and severity of claims.

Gross Profit

Our gross profit per worksite employee is primarily determined by our ability to accurately estimate and control direct costs and our ability to incorporate changes in these costs into the gross billings charged to PEO HR Outsourcing solutions clients, which are subject to pricing arrangements that are typically renewed annually. We use gross profit per worksite employee per month as our principal measurement of relative performance at the gross profit level.

Operating Expenses

Salaries, wages and payroll taxes – Salaries, wages and payroll taxes are primarily a function of the number of corporate employees, their associated average pay and any additional incentive compensation. Our corporate employees include client services, sales and marketing, benefits, legal, finance, information technology, administrative support personnel and those associated with our other products and services.

Stock-based compensation – Our stock-based compensation relates to the recognition of non-cash compensation expense over the vesting period of restricted stock and long-term incentive plan awards.

Commissions – Commissions expense consists primarily of amounts paid to sales managers and BPAs. Commissions are based on the number of new accounts sold and a percentage of revenue generated by such personnel.

Advertising – Advertising expense primarily consists of media advertising and other business promotions in our current and anticipated sales markets, including the Insperity Invitational™ presented by UnitedHealthcare® sponsorship.

General and administrative expenses – Our general and administrative expenses primarily include:

- rent expenses related to our service centers and sales offices
- outside professional service fees related to legal, consulting and accounting services
- administrative costs, such as postage, printing and supplies
- employee travel and training expenses
- technology and facility repairs and maintenance costs

- 31 -

Table of Contents

Depreciation and amortization – Depreciation and amortization expense is primarily a function of our capital investments in corporate facilities, service centers, sales offices, technology infrastructure and that associated with our acquisitions.

Impairment charges and other – Impairment charges and other consist of non-cash expense associated with the decline in fair value of long-lived and intangible assets, including goodwill. Please read Note 1 “Accounting Policies,” Note 5 “Goodwill and Other Intangible Assets” and Note 6 “Other Asset Impairments,” to the Consolidated Financial Statements for additional information.

Income Taxes

Our provision for income taxes typically differs from the U.S. statutory rate of 35%, due primarily to state income taxes, non-deductible expenses and various tax credits. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities used for financial reporting purposes and the amounts used for income tax purposes. Significant items resulting in deferred income taxes include prepaid assets, accruals for workers’ compensation expenses, stock-based compensation and depreciation. Changes in these items are reflected in our financial statements through a deferred income tax provision.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). The preparation of these financial statements requires our management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate these estimates, including those related to health and workers’ compensation insurance claims experience, client bad debts, income taxes, property and equipment, goodwill and other intangibles, and contingent liabilities. We base these estimates on historical experience and on various other assumptions that management believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

We believe the following accounting policies are critical and/or require significant judgments and estimates used in the preparation of our Consolidated Financial Statements:

Benefits costs – We provide group health insurance coverage to our worksite employees through a national network of carriers including United, UnitedHealthcare of California, Kaiser Permanente, Blue Shield of California, HMSA BlueCross BlueShield of Hawaii and Tufts, all of which provide fully insured policies or service contracts. In 2015, we terminated our relationship with Unity Health Plan.

The health insurance contract with United provides the majority of our health insurance coverage. As a result of certain contractual terms, we have accounted for this plan since its inception using a partially self-funded insurance accounting model. Accordingly, we record the costs of the United plan, including an estimate of the incurred claims, taxes and administrative fees (collectively the “Plan Costs”), as benefits expense in the Consolidated Statements of Operations. The estimated incurred claims are based upon: (i) the level of claims processed during the quarter; (ii) estimated completion rates based upon recent claim development patterns under the plan; and (iii) the number of participants in the plan, including both active and COBRA enrollees. Each reporting period, changes in the estimated ultimate costs resulting from claim trends, plan design and migration, participant demographics and other factors are incorporated into the benefits costs.

Additionally, since the plan's inception, under the terms of the contract, United establishes cash funding rates 90 days in advance of the beginning of a reporting quarter. If the Plan Costs for a reporting quarter are greater than the premiums paid and owed to United, a deficit in the plan would be incurred and we would accrue a liability for the excess costs on our Consolidated Balance Sheets. On the other hand, if the Plan Costs for the reporting quarter are less than the premiums paid and owed to United, a surplus in the plan would be incurred and we would record an asset for the excess premiums on our Consolidated Balance Sheets. The terms of the arrangement with United require us to maintain an accumulated cash surplus in the plan of \$9.0 million, which is reported as long-term prepaid insurance. As of December 31, 2015, Plan Costs were less than the premiums paid and owed to United by \$2.2 million. As this amount is less than the agreed-upon \$9.0 million surplus maintenance level, the \$6.8 million difference is included in accrued health insurance costs, a current liability, on our Consolidated Balance Sheets. In addition, the premiums owed to United at December 31, 2015, were \$3.1 million, which is included in accrued health insurance costs, a current liability, on our Consolidated Balance Sheets.

- 32 -

Table of Contents

We believe that recent claims activity is representative of incurred and paid trends during the reporting period. The estimated completion rate and annual trend used to compute incurred but not reported claims involves a significant level of judgment. Accordingly, an increase (or decrease) in the completion rate or annual trend used to estimate the incurred claims would result in an increase (or decrease) in benefits costs and net income would decrease (or increase) accordingly.

The following table illustrates the sensitivity of changes in the completion rate and annual trend on our estimate of total benefit costs of \$1.2 billion in 2015:

Change in Completion Rate and Annual Trend	Change in Benefits Costs (in thousands)	Change in Net Income (in thousands)
(2.5)%	\$(14,108)	\$8,465
(1.0)%	(5,642)	3,385
1.0%	5,642	(3,385)
2.5%	14,108	(8,465)

Workers' compensation costs – Since October 1, 2007, our workers' compensation coverage has been provided through our arrangement with ACE. Under the ACE Program, we bear the economic burden for the first \$1 million layer of claims per occurrence, and effective October 1, 2010, we also bear the economic burden for a maximum aggregate amount of \$5 million per policy year for claim amounts that exceed the first \$1 million. ACE bears the economic burden for all claims in excess of these levels. The ACE Program is a fully insured policy whereby ACE has the responsibility to pay all claims incurred under the policy regardless of whether we satisfy our responsibilities. Our coverage from September 1, 2003 through September 30, 2007 was provided through selected member insurance companies of American International Group, Inc.

Because we bear the economic burden for claims up to the levels noted above, such claims, which are the primary component of our workers' compensation costs, are recorded in the period incurred. Workers' compensation insurance includes ongoing health care and indemnity coverage whereby claims are paid over numerous years following the date of injury. Accordingly, the accrual of related incurred costs in each reporting period includes estimates, which take into account the ongoing development of claims and therefore requires a significant level of judgment.

We employ a third-party actuary to estimate our loss development rate, which is primarily based upon the nature of worksite employees' job responsibilities, the location of worksite employees, the historical frequency and severity of workers' compensation claims, and an estimate of future cost trends. Each reporting period, changes in the actuarial assumptions resulting from changes in actual claims experience and other trends are incorporated into our workers' compensation claims cost estimates. During the years ended December 31, 2015 and 2014, we reduced accrued workers' compensation costs by \$1.3 million and \$2.9 million, respectively, for changes in estimated losses related to prior reporting periods. Workers' compensation cost estimates are discounted to present value at a rate based upon the U.S. Treasury rates that correspond with the weighted average estimated claim payout period (the average discount rate utilized in both 2015 and 2014 was 1.0%) and are accreted over the estimated claim payment period and included as a component of direct costs in our Consolidated Statements of Operations.

Our claim trends could be greater than or less than our prior estimates, in which case we would revise our claims estimates and record an adjustment to workers' compensation costs in the period such determination is made. If we were to experience any significant changes in actuarial assumptions, our loss development rates could increase (or decrease), which would result in an increase (or decrease) in workers' compensation costs and a resulting decrease (or increase) in net income reported in our Consolidated Statements of Operations.

Table of Contents

The following table illustrates the sensitivity of changes in the loss development rate on our estimate of workers' compensation costs totaling \$78.8 million in 2015:

Change in Loss Development Rate	Change in Workers' Compensation Costs (in thousands)	Change in Net Income (in thousands)
(5.0)%	\$ (3,121)	\$ 1,873
(2.5)%	(1,561)	936
2.5%	1,561	(936)
5.0%	3,121	(1,873)

At the beginning of each policy period, the insurance carrier establishes monthly funding requirements comprised of premium costs and funds to be set aside for payment of future claims ("claim funds"). The level of claim funds is primarily based upon anticipated worksite employee payroll levels and expected workers' compensation loss rates, as determined by the carrier. Monies funded into the program for incurred claims expected to be paid within one year are recorded as restricted cash, a short-term asset, while the remainder of claim funds are included in deposits, a long-term asset in our Consolidated Balance Sheets. In 2015, we received \$5.3 million for the return of excess claim funds related to the workers' compensation program, which decreased deposits. As of December 31, 2015, we had restricted cash of \$37.4 million and deposits of \$136.5 million. We have estimated and accrued \$162.2 million in incurred workers' compensation claim costs as of December 31, 2015. Our estimate of incurred claim costs expected to be paid within one year are recorded as accrued workers' compensation costs and included in short-term liabilities, while our estimate of incurred claim costs expected to be paid beyond one year are included in long-term liabilities on our Consolidated Balance Sheets.

Contingent liabilities – We accrue and disclose contingent liabilities in our Consolidated Financial Statements in accordance with ASC 450-10, Contingencies. GAAP requires accrual of contingent liabilities that are considered probable to occur and that can be reasonably estimated. For contingent liabilities that are considered reasonably possible to occur, financial statement disclosure is required, including the range of possible loss if it can be reasonably determined. From time to time we disclose in our financial statements issues that we believe are reasonably possible to occur, although we cannot determine the range of possible loss in all cases. As issues develop, we evaluate the probability of future loss and the potential range of such losses. If such evaluation were to determine that a loss was probable and the loss could be reasonably estimated, we would be required to accrue our estimated loss, which would reduce net income in the period that such determination was made.

Deferred taxes – We have recorded a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. While we have considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, our ability to realize our deferred tax assets could change from our current estimates. If we determine that we would be able to realize our deferred tax assets in the future in excess of the net recorded amount, an adjustment to reduce the valuation allowance would increase net income in the period that such determination is made. Likewise, should we determine that we will not be able to realize all or part of our net deferred tax assets in the future, an adjustment to increase the valuation allowance would reduce net income in the period such determination is made.

Allowance for doubtful accounts – We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our clients to pay their comprehensive service fees. We believe that the success of our business is heavily dependent on our ability to collect these comprehensive service fees for several reasons, including:

-
-

the fact that we are at risk for the payment of our direct costs and worksite employee payroll costs regardless of whether our clients pay their comprehensive service fees

- the large volume and dollar amount of transactions we process
- the periodic and recurring nature of payroll, upon which the comprehensive service fees are based

To mitigate this risk, we have established very tight credit policies. We generally require our PEO HR Outsourcing solutions clients to pay their comprehensive service fees no later than one day prior to the applicable payroll date. In addition, we generally maintain the right to terminate the CSA and associated worksite employees or to require prepayment, letters of credit or other collateral if a client's financial position deteriorates or if the client does not pay the comprehensive service fee. As a result of these efforts, losses related to client nonpayment have historically been low as a percentage of revenues. However, if our clients' financial conditions were to deteriorate rapidly, resulting in nonpayment,

- 34 -

Table of Contents

our accounts receivable balances could grow and we could be required to provide for additional allowances, which would decrease net income in the period that such determination was made.

Property and equipment – Our property and equipment relate primarily to our facilities and related improvements, furniture and fixtures, computer hardware and software and capitalized software development costs. These costs are depreciated or amortized over the estimated useful lives of the assets. If we determine that the useful lives of these assets will be shorter than we currently estimate, our depreciation and amortization expense could be accelerated, which would decrease net income in the periods of such a determination. In addition, we periodically evaluate these costs for impairment. If events or circumstances were to indicate that any of our long-lived assets might be impaired, we would assess recoverability based on the estimated undiscounted future cash flows to be generated from the applicable asset. In addition, we may record an impairment loss, which would reduce net income, to the extent that the carrying value of the asset exceeded the fair value of the asset. Fair value is generally determined using an estimate of discounted future net cash flows from operating activities or upon disposal of the asset. Please read Note 1 to the Consolidated Financial Statements, “Accounting Policies,” for additional information.

Goodwill and other intangibles – Goodwill is tested for impairment on an annual basis and between annual tests in certain circumstances, and is written down when impaired. Purchased intangible assets other than goodwill are amortized over their useful lives unless these lives are determined to be indefinite. Our purchased intangible assets are carried at cost less accumulated amortization. Amortization is computed over the estimated useful lives of the respective assets, which ranges from three to 10 years. Please read Note 5 to the Consolidated Financial Statements, “Goodwill and Other Intangible Assets,” for additional information.

New Accounting Pronouncements

We believe that we have implemented the accounting pronouncements with a material impact on our financial statements and do not believe there are any new or pending pronouncements that will materially impact our financial position or results of operations. In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, Revenue from Contracts with Customers (Topic 606). ASU No. 2014-09 outlines a single comprehensive revenue recognition model for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. Under ASU No. 2014-09, an entity recognizes revenue for the transfer of promised goods or services to customers in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. ASU No. 2014-09 is effective for annual reporting periods ending after December 15, 2017, and early adoption is not permitted. Companies may use either a full retrospective or a modified retrospective approach to adopt ASU No. 2014-09. We are currently evaluating the guidance and have not determined the impact this standard may have on our Consolidated Financial Statements.

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes, which requires companies to present deferred income tax assets and deferred income tax liabilities as noncurrent in a classified balance sheet instead of the current requirement to separate deferred income tax liabilities and assets into current and noncurrent amounts. ASU 2015-17 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early application is permitted either prospectively or retrospectively. In December 2015 we adopted ASU No. 2015-17 retrospectively, resulting in a reclassification of a \$6.3 million deferred tax asset from current to long term in 2014.

(1) Includes non-cash impairment and other charges in the first and second quarters of 2015 of \$9.8 million and \$1.3 million, respectively, offset by a reduction of \$0.6 million in the fourth quarter of 2015. Please read Note 6 to the Consolidated Financial Statements, "Other Asset Impairments," for additional information.

(2) Includes a non-cash impairment charge in the second quarter of 2014 of \$2.5 million. Please read Note 5 to the Consolidated Financial Statements, "Goodwill and Other Intangible Assets," for additional information. Also includes a non-cash charge in the fourth quarter of 2014 of \$1.2 million. Please read Note 1 to the Consolidated Financial Statements, "Accounting Policies," for additional information.

(3) Includes the impact of dividends exceeding earnings under the two-class method, resulting in a \$0.05 earnings per share decrease in 2014. Please read Note 11 to the Consolidated Financial Statements, "Net Income Per Share," for additional information.

(4) Please read Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Non-GAAP Financial Measures" for a reconciliation of the non-GAAP financial measures to their most directly comparable financial measures calculated and presented in accordance with GAAP.

(5) Gross billings of \$9,032 and \$9,044 per worksite employee per month, less payroll cost of \$7,544 and \$7,541 per worksite employee per month, respectively.

Revenues

Our revenues, which represent gross billings net of worksite employee payroll cost, increased 10.4% in 2015 compared to 2014, but decreased 1.0%, or \$15 on a per worksite employee per month basis compared to 2014. The revenue increase was primarily due to an 11.6% increase in the average number of worksite employees paid per month, while the 1.0% decrease in revenues per worksite employee per month was primarily due to decreases in the benefits and service fee pricing.

Total revenue	\$2,603,614	\$2,357,788	10.4	%		

(1) Comprised primarily of revenues generated by our other products and services offerings

The percentage of total PEO HR Outsourcing solutions revenues in our significant markets include the following:

	Year ended December 31,		
	2015	2014	
Texas	23.7	% 25.3	%
California	18.3	% 17.8	%
New York	9.5	% 9.7	%
Other	48.5	% 47.2	%
Total	100.0	% 100.0	%

Our growth in the number of worksite employees paid is affected by three primary sources: new client sales, client retention and the net change in existing clients through worksite employee new hires and layoffs. During 2015, new client sales and client retention improved, while the net change in existing clients remained consistent with 2014. As a result, our year-over-year growth in average worksite employees paid per month in 2015 was 11.6% compared to 2.5% in 2014.

Gross Profit

Gross profit was \$437.9 million in 2015, an 8.4% increase over 2014. The average gross profit per worksite employee per month was \$250 in 2015 and \$257 in 2014. Included in gross profit in both the 2015 and 2014 periods is a \$17 per worksite employee per month contribution from our other products and services offerings.

Our pricing objectives attempt to achieve a level of revenue per worksite employee to match or exceed changes in primary direct costs and operating expenses. Our revenues per worksite employee per month decreased 1.0% to \$1,488 in 2015 versus 2014 and our direct costs, which primarily include payroll taxes, benefits and workers' compensation expenses, decreased 0.6% to \$1,238 per worksite employee per month. The primary direct cost components changed as follows:

-

Benefits costs – The cost of group health insurance and related employee benefits decreased \$3 per worksite employee per month, but increased 1.4%, on a per covered employee basis compared to 2014. The percentage of worksite employees covered under our health insurance plan was 70.4% in 2015 and 71.7% in 2014. Please read “—Critical Accounting Policies and Estimates – Benefits Costs” for a discussion of our accounting for health insurance costs.

Workers’ compensation costs – Workers’ compensation costs increased 14.7%, or \$1 per worksite employee per month, compared to 2014, due primarily to an 11.6% increase in the average number of worksite employees paid per month.

As a

- 37 -

Table of Contents

percentage of non-bonus payroll cost, workers' compensation costs increased to 0.68% in 2015 from 0.67% in 2014. During 2015, we recorded reductions in workers' compensation costs of \$1.3 million, or 0.01% of non-bonus payroll costs, for changes in estimated losses related to prior reporting periods, compared to \$2.9 million, or 0.03% of non-bonus payroll costs, in 2014. The 2015 and 2014 period costs include the impact of a 1.0% discount rate used to accrue workers' compensation loss claims. Please read "—Critical Accounting Policies and Estimates – Workers' Compensation Costs" for a discussion of our accounting for workers' compensation costs.

Payroll tax costs – Payroll taxes increased 10.3%, but decreased \$6 on a per worksite employee per month basis, compared to 2014, due primarily to an 11.6% increase in total payroll cost in 2015, offset in part by lower state unemployment tax rates. Payroll taxes as a percentage of payroll cost decreased to 6.85% in 2015 compared to 6.93% in 2014.

Operating Expenses

The following table presents certain information related to our operating expenses:

	Year ended December 31,				Year ended December 31,		
	2015	2014	% Change		2015	2014	% Change
	(in thousands)			(per worksite employee per month)			
Salaries, wages and payroll taxes	\$211,060	\$200,118	5.5	% \$120	\$127	(5.5)%
Stock-based compensation	13,345	11,053	20.7	% 8	7	14.3	%
Commissions	18,479	15,285	20.9	% 11	10	10.0	%
Advertising	15,980	20,084	(20.4)% 9	13	(30.8)%
General and administrative expenses	84,259	84,717	(0.5)% 47	54	(13.0)%
Impairment charges and other	10,480	3,687	184.2	% 6	2	200.0	%
Depreciation and amortization	18,565	21,387	(13.2)% 11	14	(21.4)%
Total operating expenses	\$372,168	\$356,331	4.4	% \$212	\$227	(6.6)%

Operating expenses were \$372.2 million in 2015, a 4.4% increase over 2014. We recorded \$10.5 million of impairment and other charges in 2015 and a \$3.7 million impairment charge in 2014. Please read Note 1 "Accounting Policies," Note 5 "Goodwill and Other Intangible Assets," and Note 6 "Other Asset Impairments," to the Consolidated Financial Statements for additional information. Operating expenses per worksite employee per month decreased to \$212 in 2015 from \$227 in 2014. The components of operating expenses changed as follows:

Salaries, wages and payroll taxes of corporate and sales staff increased 5.5%, but decreased \$7 on a per worksite employee per month basis, compared to 2014. The increase was primarily due to a 2.7% rise in headcount, including an 11.8% increase in BPAs, and increased incentive compensation, primarily attributable to a higher level of achievement on our 2015 annual incentive goals as compared to 2014.

Stock-based compensation increased 20.7%, or \$1 per worksite employee per month, compared to 2014. This increase was primarily due to awards issued under our new Long-Term Incentive Program. Stock-based compensation expense represents amortization of restricted stock and long-term incentive awards granted to employees and the annual stock grant made to non-employee directors. Please read Note 1 "Accounting Policies" and Note 10 "Incentive Plans," to the Consolidated Financial Statements for additional information.

Edgar Filing: INSPERITY, INC. - Form 10-K

Commissions expense increased 20.9%, or \$1 per worksite employee per month, compared to 2014, primarily due to commissions associated with our PEO HR Outsourcing solutions.

Advertising costs decreased 20.4%, or \$4 per worksite employee per month, compared to 2014, primarily due to decreased spending on radio and television advertising and sponsorships.

General and administrative expenses were flat, but decreased \$7 per worksite employee per month, compared to 2014.

Depreciation and amortization expense decreased 13.2%, or \$3 per worksite employee per month, compared to 2014, primarily due to the July 2015 sale of our aircraft, which eliminated the depreciation on those assets.

- 38 -

Table of Contents

Income Tax Expense

During 2015 we incurred federal and state income tax expense of \$26.2 million on pre-tax income of \$65.6 million. Our provision for income taxes differed from the U.S. statutory rate of 35% primarily due to state income taxes and non-deductible expenses. Our effective income tax rate was 40.0% in 2015 compared to 41.2% in 2014.

Net Income

Net income for 2015 was \$39.4 million, or \$1.58 per diluted share, compared to \$28.0 million, or \$1.05 per diluted share in 2014. On a per worksite employee per month basis, net income was \$23 in 2015 compared to \$18 in 2014. Diluted earnings per share in 2014 includes a \$0.05 earnings per share decrease related to the accounting treatment under the two-class method of dividends exceeding net income. Please read Note 11 to the Consolidated Financial Statements, "Net Income Per Share," for additional information.

(7) Gross billings of \$9,044 and \$8,797 per worksite employee per month, less payroll cost of \$7,541 and \$7,323 per worksite employee per month, respectively.

Table of Contents

Revenues

Our revenues which represent gross billings net of worksite employee payroll cost, increased 4.5% in 2014 compared to 2013, due to a 2.0%, or \$29 increase in revenues per worksite employee per month and a 2.5% increase in the average number of worksite employees paid per month. The 2.0% increase in revenues per worksite employee per month was primarily due to increases in the benefits and payroll tax pricing to offset increases in these direct costs.

We provide our PEO HR Outsourcing solutions to small and medium-sized businesses in strategically selected markets throughout the United States. By region, our PEO HR Outsourcing solutions revenue change from 2013 and distribution for the years ended December 31, 2014 and 2013 were as follows:

	Year ended December 31,			Year ended December 31,		
	2014	2013	% Change	2014	2013	
	(in thousands)			(% of total revenue)		
Northeast	\$601,526	\$577,280	4.2	% 26.0	% 26.0	%
Southeast	225,709	212,664	6.1	% 9.7	% 9.6	%

Other revenue ⁽¹⁾	42,389	35,836	18.3	%		
Total revenue	\$2,357,788	\$2,256,112	4.5	%		

⁽¹⁾ Comprised primarily of revenues generated by our other products and services offerings

The percentage of total PEO HR Outsourcing solutions revenues in our significant markets include the following:

	Year ended December 31,		
	2014	2013	
Texas	25.3	% 25.6	%
California	17.8	% 17.5	%
New York	9.7	% 9.5	%
Other	47.2	% 47.4	%
Total	100.0	% 100.0	%

Our growth in the number of worksite employees paid is affected by three primary sources: new client sales, client retention and the net change in existing clients through worksite employee new hires and layoffs. During 2014, new client sales and the net change in existing clients improved, while client retention was consistent with 2013. As a result, our year-over-year growth in average worksite employees paid per month in 2014 was 2.5% compared to 1.5% in 2013.

Gross Profit

Gross profit was \$403.8 million in 2014, a 2.7% increase over 2013. The average gross profit per worksite employee per month was \$257 in both 2014 and 2013. Included in gross profit in 2014 is a \$17 per worksite employee per month contribution from our other products and services offerings compared to \$14 per worksite employee per month in the 2013 period.

Our pricing objectives attempt to achieve a level of revenue per worksite employee to match or exceed changes in primary direct costs and operating expenses. Our revenues per worksite employee per month increased 2.0% to \$1,503 in 2014 versus 2013, our direct costs, which primarily include payroll taxes, benefits and workers' compensation expenses, increased 2.4% to \$1,246 per worksite employee per month. The primary direct cost components changed as follows:

- 41 -

Table of Contents

Benefits costs – The cost of group health insurance and related employee benefits increased \$12 per worksite employee per month, or 2.4%, on a per covered employee basis compared to 2013. The percentage of worksite employees covered under our health insurance plan was 71.7% in 2014 and 72.1% in 2013. Please read “—Critical Accounting Policies and Estimates – Benefits Costs” for a discussion of our accounting for health insurance costs.

Workers’ compensation costs – Workers’ compensation costs increased 25.2%, or \$8 per worksite employee per month, compared to 2013. As a percentage of non-bonus payroll cost, workers’ compensation costs increased to 0.67% in 2014 from 0.55% in 2013. During 2014, we recorded reductions in workers’ compensation costs of \$2.9 million, or 0.03% of non-bonus payroll costs, for changes in estimated losses related to prior reporting periods, compared to \$9.3 million, or 0.09% of non-bonus payroll costs in 2013. The 2014 period costs include the impact of a 1.0% discount rate used to accrue workers’ compensation loss claims, compared to a 0.8% discount rate used in the 2013 period. Please read “—Critical Accounting Policies and Estimates – Workers’ Compensation Costs” for a discussion of our accounting for workers’ compensation costs.

Payroll tax costs – Payroll taxes increased 4.0%, or \$7 per worksite employee per month, compared to 2013, due primarily to a 5.6% increase in total payroll cost in 2014 offset by lower state unemployment tax rates. Payroll taxes as a percentage of payroll cost decreased to 6.93% in 2014 compared to 7.04% in 2013.

Operating Expenses

The following table presents certain information related to our operating expenses:

	Year ended December 31,			Year ended December 31,			
	2014	2013	% Change	2014	2013	% Change	
	(in thousands)			(per worksite employee per month)			
Salaries, wages and payroll taxes	\$200,118	\$181,444	10.3	% \$127	\$119	6.7	%
Stock-based compensation	11,053	11,103	(0.5))% 7	7	—	
Commissions	15,285	14,581	4.8	% 10	9	11.1	%
Advertising	20,084	21,508	(6.6))% 13	14	(7.1))%
General and administrative expenses	84,717	83,986	0.9	% 54	55	(1.8))%
Impairment charges and other	3,687	3,342	10.3	% 2	2	—	
Depreciation and amortization	21,387	21,064	1.5	% 14	14	—	
Total operating expenses	\$356,331	\$337,028	5.7	% \$227	\$220	3.2	%

Operating expenses were \$356.3 million in 2014, a 5.7% increase over 2013. We recorded \$3.7 million of impairment charges in 2014 and a \$3.3 million impairment charge in 2013. Please read Note 1 “Accounting Policies” and Note 5 “Goodwill and Other Intangible Assets” to the Consolidated Financial Statements for additional information. Operating expenses per worksite employee per month increased to \$227 in 2014 from \$220 in 2013. The components of operating expenses changed as follows:

Salaries, wages and payroll taxes of corporate and sales staff increased 10.3%, or \$8 per worksite employee per month, compared to 2013, primarily due to a 2.5% rise in headcount and increased incentive compensation. Our incentive compensation expense accounted for approximately one half of the 10% year over year increase. The increase in incentive compensation expense during 2014 was the result of achieving our corporate incentive goals during the year; whereas our corporate incentive goals were not achieved during 2013.

•

Stock-based compensation decreased 0.5%, but remained flat on a per worksite employee per month basis compared to 2013. Stock-based compensation expense represents amortization of restricted stock awards granted to employees and the annual stock grant made to non-employee directors. Please read Note 1 to the Consolidated Financial Statements, "Accounting Policies," for additional information.

Commissions expense increased 4.8%, or \$1 per worksite employee per month, compared to 2013.

Advertising costs decreased 6.6%, or \$1 per worksite employee per month, compared to 2013, primarily due to decreased spending on radio, print media and television advertising.

Table of Contents

General and administrative expenses were flat, but decreased \$1 per worksite employee per month, compared to 2013.

Depreciation and amortization expense increased 1.5%, but remained flat on a per worksite employee per month basis, compared to 2013.

Other Income (Expense)

Other income was \$0.2 million in 2014 compared to other expense of \$2.5 million in 2013. Included in 2013 is a \$2.7 million non-cash impairment charge related to our minority investment in The Receivables Exchange. Please read Note 6 to the Consolidated Financial Statements, "Other Asset Impairments," for additional information.

Income Tax Expense

During 2014 we incurred federal and state income tax expense of \$19.6 million on pre-tax income of \$47.6 million. Our provision for income taxes differed from the U.S. statutory rate of 35% primarily due to state income taxes and non-deductible expenses. Our effective income tax rate was 41.2% in 2014 compared to 40.4% in 2013.

Net Income

Net income for 2014 was \$28.0 million, or \$1.05 per diluted share, compared to \$32.0 million, or \$1.25 per diluted share in 2013. On a per worksite employee per month basis, net income was \$18 in 2014 compared to \$21 in 2013. Diluted earnings per share in 2014 includes a \$0.05 earnings per share decrease related to the accounting treatment under the two-class method of dividends exceeding net income. Please read Note 11 to the Consolidated Financial Statements, "Net Income Per Share," for additional information.

Non-GAAP Financial Measures

Non-GAAP financial measures are not prepared in accordance with GAAP and may be different from non-GAAP financial measures used by other companies. Non-GAAP financial measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. Investors are encouraged to review the reconciliation of the non-GAAP financial measures used to their most directly comparable GAAP financial measures as provided in the tables below.

Non-bonus payroll cost is a non-GAAP financial measure that excludes the impact of bonus payrolls paid to our worksite employees. Bonus payroll cost varies from period to period, but has no direct impact to our ultimate workers' compensation costs under the current program. As a result, our management refers to non-bonus payroll cost in analyzing, reporting and forecasting our workers' compensation costs. We include these non-GAAP financial measures because we believe they are useful to investors in allowing for greater transparency related to the costs incurred under our current workers' compensation program.

Following is a GAAP to non-GAAP reconciliation of non-bonus payroll costs:

	Year ended December 31,		
	2015	2014	2013
	(in thousands, except per worksite employee)		
Payroll cost (GAAP)	\$13,202,564	\$11,829,133	\$11,205,652
Less: bonus payroll cost	1,611,857	1,509,010	1,274,575
Non-bonus payroll cost	\$11,590,707	\$10,320,123	\$9,931,077

Edgar Filing: INSPERITY, INC. - Form 10-K

Payroll cost per worksite employee (GAAP)	\$7,544	\$7,541	\$7,323
Less: Bonus payroll cost per worksite employee	921	962	833
Non-bonus payroll cost per worksite employee	\$6,623	\$6,579	\$6,490

EBITDA represents net income computed in accordance with GAAP, plus interest expense, income tax expense and depreciation and amortization expense. Adjusted EBITDA represents EBITDA plus non-cash impairments, stockholder

- 43 -

Table of Contents

advisory expenses and stock-based compensation. We believe EBITDA and adjusted EBITDA are often useful measures of our operating performance, as they allow for additional analysis of our operating results separate from the impact of these items.

Following is a GAAP to non-GAAP reconciliation of EBITDA and adjusted EBITDA:

	Year-ended December 31,				
	2015	2014	2013	2012	2011
	(in thousands)				
Net income (GAAP)	\$39,390	\$28,004	\$32,032	\$40,402	\$30,470
Income tax expense	26,229	19,623	21,700	27,888	20,305
Interest expense	459	370	383	354	108
Depreciation and amortization	18,565	21,387	21,064	18,250	15,218
EBITDA	84,643	69,384	75,179	86,894	66,101
Impairment charges and other	10,480	3,687	6,021	4,191	—
Stock-based compensation	13,345	11,053	11,103	9,814	8,601
Stockholder advisory expenses	1,546	—	—	—	—
Non-operational items	—	—	—	—	7,496
Adjusted EBITDA	\$110,014	\$84,124	\$92,303	\$100,899	\$82,198

Adjusted cash, cash equivalents and marketable securities excludes funds associated with federal and state income tax withholdings, employment taxes and other payroll deductions, as well as client prepayments. We believe adjusted cash, cash equivalents and marketable securities is a useful measure of our available funds.

Following is a GAAP to non-GAAP reconciliation of cash, cash equivalents and marketable securities:

	December 31,	
	2015	2014
	(in thousands)	
Cash, cash equivalents and marketable securities (GAAP)	\$279,413	\$305,087
Less: Amounts payable for withheld federal and state income taxes, employment taxes and other payroll deductions	185,719	152,132
Client prepayments	17,037	87,887
Adjusted cash, cash equivalents and marketable securities	\$76,657	\$65,068

Adjusted operating expenses represent operating expenses excluding the impact of impairment and other charges related to the sale of two aircraft and stockholder advisory expenses in 2015, an impairment charge associated with our Employment Screening reporting unit in 2014 and an impairment charge associated with our Expense Management reporting unit in 2013. We believe adjusted operating expenses is a useful measure of our operating costs, as it allows for additional analysis of our operating expenses separate from the impact of these items.

Following is a GAAP to non-GAAP reconciliation of operating expenses and adjusted operating expenses:

	Year-ended December 31,		
	2015	2014	2013
	(in thousands)		
Operating expenses (GAAP)	\$372,168	\$356,331	\$337,028
Less: Impairment charges and other	10,480	3,687	3,342
Stockholder advisory expenses	1,546	—	—

Adjusted operating expenses	\$ 360,142	\$ 352,644	\$ 333,686
-----------------------------	------------	------------	------------

Adjusted net income and adjusted diluted net income per share of common stock represent net income and diluted net income per share computed in accordance with GAAP, excluding the impact of: (i) impairment and other charges of \$10.5

Table of Contents

million related to the sale of two aircraft in 2015; (ii) a \$2.5 million impairment charge associated with the Employment Screening reporting unit in 2014; (iii) a \$1.2 million non-cash charge related to a revision to our office consolidation plans in 2014; (iv) a \$3.3 million impairment charge associated with the Expense Management reporting unit in 2013; (v) a \$2.7 million impairment charge related to The Receivables Exchange in 2013; (vi) a \$2.0 million tax credit relating to tax years 2009 - 2012 and recorded in 2013; (vii) a \$4.2 million impairment charge associated with the Performance Management reporting unit in 2012; (viii) non-operational expenses of \$4.4 million related to the exchange of an aircraft and \$3.1 million related to the settlement of a dispute with the Employment Development Department of the State of California in 2011; (ix) stock-based compensation expenses of \$13.3 million in 2015, \$11.1 million in 2014, \$11.1 million in 2013, \$9.8 million in 2012 and \$8.6 million in 2011; and (x) stockholder advisory expenses of \$1.5 million in 2015. Under the two-class earnings per share method, the undistributed losses resulting from dividends exceeding net income in 2014 and 2012 are not allocated to participating securities. Our management believes adjusted net income and adjusted diluted net income per share of common stock are useful measures of our operating performance, as they allow for additional analysis of our operating results separate from the impact of these items.

Following is a GAAP to non-GAAP reconciliation of adjusted net income:

	Year-ended December 31,				
	2015	2014	2013	2012	2011
	(in thousands)

Adjusted diluted net income per share of common stock	\$2.19	\$1.43	\$1.65	\$1.89	\$1.53

Liquidity and Capital Resources

We periodically evaluate our liquidity requirements, capital needs and availability of resources in view of, among other things, our expansion plans, potential acquisitions, debt service requirements and other operating cash needs. To meet short-term liquidity requirements, which are primarily the payment of direct and operating expenses, we rely primarily on cash from operations. Longer-term projects or significant acquisitions may be financed with debt or

equity. We have in the past sought, and may in the future seek, to raise additional capital or take other steps to increase or manage our liquidity and capital resources. We had \$279.4 million in cash, cash equivalents and marketable securities at December 31, 2015, of which approximately \$185.7 million was payable in early January 2016 for withheld federal and state income taxes, employment taxes and other payroll deductions, and \$17.0 million were client prepayments that were payable in January 2016. At December 31, 2015, we had working capital of \$54.3 million compared to \$66.7 million at December 31, 2014. The reduction in working capital reflects, in part, cash flow from operations, offset by share repurchases and dividends. We currently believe that our cash on hand, marketable securities, cash flows from operations and availability under our revolving credit facility

- 45 -

Table of Contents

(“credit facility”) will be adequate to meet our liquidity requirements for 2016. We intend to rely on these same sources, as well as public and private debt or equity financing, to meet our longer-term liquidity and capital needs.

We have a credit facility with a syndicate of financial institutions. In February 2015, the credit facility was increased from \$100 million to \$125 million and the expiration date was extended from September 2015 to February 2020. The credit facility, which may be increased to \$150 million based on the terms and subject to the conditions set forth in the agreement related to the facility, is available for working capital and general corporate purposes, including acquisitions, and was undrawn at December 31, 2015. At December 31, 2015, we had outstanding letters of credit totaling \$0.6 million issued under the credit facility. In January 2016, we borrowed \$104.4 million under the credit facility, which we used to fund a portion of the purchase price for our modified Dutch auction tender offer. Please read Item 9B. “Other Information,” Note 7 to the Consolidated Financial Statements, “Revolving Credit Facility” and Note 15 to the Consolidated Financial Statements, “Subsequent Events,” for additional information.

Cash Flows from Operating Activities

Our cash flows from operating activities in 2015 were \$65.1 million. Our primary source of cash from operations is the comprehensive service fee and payroll funding we collect from our PEO HR Outsourcing solutions clients. Cash and cash equivalents, and thus our reported cash flows from operating activities, are significantly impacted by various external and internal factors, which are reflected in part by the changes in our balance sheet accounts. These include the following:

Timing of client payments / payroll levels – We typically collect our comprehensive service fee, along with the client’s payroll funding, from clients at least one day prior to the payment of worksite employee payrolls and associated payroll taxes. Therefore, the last business day of a reporting period has a substantial impact on our reporting of operating cash flows. For example, many worksite employees are paid on Fridays and at month-end; therefore, operating cash flows decrease in the reporting periods that end on a Friday. In the year ended December 31, 2015, the last business day of the reporting period ended on a Thursday, client prepayments were \$17.0 million and accrued worksite employee payroll was \$161.9 million. In the year ended December 31, 2014, which ended on a Wednesday, client prepayments were \$87.9 million and accrued worksite employee payroll was \$192.4 million.

Workers’ compensation plan funding – Under our workers’ compensation insurance arrangements, we make monthly payments to the carriers comprised of premium costs and funds to be set aside for payment of future claims (“claim funds”). These pre-determined amounts are stipulated in our agreements with the carriers and are based primarily on anticipated worksite employee payroll levels and workers’ compensation loss rates during the policy year. Changes in payroll levels from those that were anticipated in the arrangements can result in changes in the amount of the cash payments, which will impact our reporting of operating cash flows. Our claim funds paid, based upon anticipated worksite employee payroll levels and workers’ compensation loss rates, were \$54.2 million in 2015 and \$58.3 million in 2014. However, our estimates of workers’ compensation loss costs were \$64.5 million and \$54.0 million in 2015 and 2014, respectively. During 2015, we received \$5.3 million for the return of excess claim funds related to the workers’ compensation program, which increased working capital. During 2014, we paid the insurance carrier an additional \$7.2 million in claim funds for prior policy years, which resulted in a decrease to working capital.

Medical plan funding – Our health care contract with United establishes participant cash funding rates 90 days in advance of the beginning of a reporting quarter. Therefore, changes in the participation level of the United plan have a direct impact on our operating cash flows. In addition, changes to the funding rates, which are determined solely by United based primarily upon recent claim history and anticipated cost trends, also have a significant impact on our operating cash flows. Since inception of the United plan, premiums paid and owed to United have exceeded Plan Costs, resulting in a \$2.2 million surplus, which is \$6.8 million below our agreed-upon \$9.0 million surplus maintenance level. The \$6.8 million difference is therefore reflected as a current liability, and \$9.0 million is reflected

as a long-term asset on our Consolidated Balance Sheets at December 31, 2015. In addition, the premiums owed to United at December 31, 2015, were \$3.1 million, which is included in accrued health insurance costs, a current liability, on our Consolidated Balance Sheets.

Operating results – Our net income has a significant impact on our operating cash flows. Our net income increased 40.7% to \$39.4 million in 2015 from \$28.0 million in 2014. Please read “Results of Operations – Year Ended December 31, 2015 Compared to Year Ended December 31, 2014.”

Cash Flows Used in Investing Activities

- 46 -

Table of Contents

Net cash flows from investing activities were \$12.4 million during 2015. We invested \$17.8 million in capital expenditures, primarily due to property and equipment purchases, offset by net proceeds of \$17.9 million from the sale of marketable securities and \$12.2 million related to the sale of our aircraft.

In December 2015 we began the construction of a 100,000 square foot office facility located on our corporate campus in Kingwood, Texas. The new facility, which is expected to be completed in 2017, is estimated to cost \$25 million. We expect to fund the construction costs with available cash on hand and borrowings under our credit facility.

Cash Flows Used in Financing Activities

Our cash flows used in financing activities were \$84.4 million during 2015, primarily due to \$67.1 million in share repurchases and \$21.2 million in dividends paid.

Table of Contents

Contractual Obligations and Commercial Commitments

The following table summarizes our contractual obligations and commercial commitments as of December 31, 2015, and the effect they are expected to have on our liquidity and capital resources (in thousands):

	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Contractual obligations					
Non-cancelable operating leases	\$48,458	\$13,961	\$20,619	\$10,566	\$3,312
Purchase obligations ⁽¹⁾	35,961	20,554	⁽²⁾ 10,940	3,267	1,200
Other long-term liabilities:					
Accrued workers' compensation claim costs ⁽³⁾	162,184	37,438	44,361	28,835	51,550
Total contractual cash obligations	\$246,603	\$71,953	\$75,920	\$42,668	\$56,062

(1) The table includes purchase obligations associated with non-cancelable contracts individually greater than \$100,000 and one year.

(2) Includes \$13 million related to the construction of a new facility on our corporate campus. For more information, please read Item 2. "Properties."

(3) Accrued workers' compensation claim costs include the short and long-term amounts. For more information, please read, "– Critical Accounting Policies and Estimates – Workers' Compensation Costs."

Seasonality, Inflation and Quarterly Fluctuations

Our quarterly earnings are impacted by the seasonal nature of our medical claims costs. Typically, medical claims costs tend to increase throughout the year with the fourth quarter being the period with the highest costs, which has a negative impact on our fourth quarter earnings. This trend is primarily the result of many worksite employees' medical plan deductibles being fully met by the fourth quarter, which increases our liability with respect to those claims. We have also experienced variability on a quarterly basis in medical claims costs based on the unpredictable nature of large claims. These historical trends may change and other seasonal trends may develop in the future. For further information related to our health insurance costs, please read Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates - Benefits Costs."

We believe the effects of inflation have not had a significant impact on our results of operations or financial condition.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are primarily exposed to market risks from fluctuations in interest rates and the effects of those fluctuations on the market values of our cash equivalent short-term investments and our available-for-sale marketable securities. In addition, borrowings under our credit facility bear interest at a variable market rate. As of December 31, 2015, we had not drawn on the credit facility. Please read Item 9B. "Other Information" and Note 7 to the Consolidated Financial Statements, "Revolving Credit Facility," for additional information. Our cash equivalent short-term investments consist primarily of overnight investments, which are not significantly exposed to interest rate risk, except to the extent that changes in interest rates will ultimately affect the amount of interest income earned on these investments. Our available-for-sale marketable securities are subject to interest rate risk because these securities generally include a fixed interest rate. As a result, the market values of these securities are affected by changes in prevailing interest rates.

We attempt to limit our exposure to interest rate risk primarily through diversification and low investment turnover. Our investment policy is designed to maximize after-tax interest income while preserving our principal investment. As a result, our marketable securities consist of tax-exempt short and intermediate-term debt securities, which are primarily pre-refunded municipal bonds that are secured by escrow funds containing U.S. Government Securities.

- 48 -

Table of Contents

The following table presents information about our available-for-sale marketable securities as of December 31, 2015 (dollars in thousands):

	Principal Maturities	Coupon Interest Rate	Effective Yield	
2016	\$7,205	4.91	% 0.45	%
2017	2,255	5.50	% 0.76	%
2018	125	—	0.88	%
Total	\$9,585	4.99	% 0.53	%
Fair Market Value	\$9,875			

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

The information required by this Item 8 is contained in a separate section of this Annual Report. See “Index to Consolidated Financial Statements.”

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

In accordance with Exchange Act Rules 13a-15 and 15a-15, we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2015.

Design and Evaluation of Internal Control over Financial Reporting

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we included a report of management’s assessment of the design and effectiveness of our internal controls as part of this Annual Report on Form 10-K for the fiscal year ended December 31, 2015. Ernst & Young, LLP, our independent registered public accounting firm, also audited our internal control over financial reporting. Management’s report and the independent registered public accounting firm’s audit report are included in our 2015 Consolidated Financial Statements under the captions entitled “Management’s Report on Internal Control” and “Report of Independent Registered Public Accounting Firm,” and are incorporated herein by reference.

There has been no change in our internal controls over financial reporting that occurred during the three months ended December 31, 2015, that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION.

Recent Development

In January 2016, we completed a modified Dutch auction tender offer whereby 3,013,531 shares of our common stock were repurchased for \$143.1 million, excluding \$1.1 million of transaction costs. The shares were then canceled and retired. The tender offer was funded with borrowings of \$104.4 million under our credit facility and the remainder with cash on hand.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
Insperty, Inc.

We have audited the accompanying Consolidated Balance Sheets of Insperty, Inc. as of December 31, 2015 and 2014, and the related Consolidated Statements of Operations, Comprehensive Income, Stockholders' Equity and Cash Flows for each of the three years in the period ended December 31, 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Insperty, Inc. at December 31, 2015 and 2014, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Insperty, Inc.'s internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 12, 2016 expressed an unqualified opinion thereon.

MANAGEMENT'S REPORT ON INTERNAL CONTROL

The Company has assessed the effectiveness of its internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) (2013 framework). The Company’s management is responsible for establishing and maintaining adequate internal controls over financial reporting. The effectiveness of the Company’s internal control over financial reporting as of December 31, 2015 has been audited by the Company’s independent registered public accounting firm, as stated in their report that is included herein.

Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements. Because of the inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

The Company’s assessment of the effectiveness of its internal control over financial reporting included testing and evaluating the design and operating effectiveness of its internal controls. In management’s opinion, the Company has maintained effective internal control over financial reporting as of December 31, 2015, based on criteria established in the COSO 2013 framework.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
Insperty, Inc.

We have audited Insperty, Inc.'s internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Insperty, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Insperty, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Consolidated Balance Sheets of Insperty, Inc. as of December 31, 2015 and 2014, and the related Consolidated Statements of Operations, Comprehensive Income, Stockholders' Equity and Cash Flows for each of the three years in the period ended December 31, 2015 of Insperty, Inc. and our report dated February 12, 2016 expressed an unqualified opinion thereon.

INSPERITY, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2015

1. Accounting Policies

Description of Business

Insperty, Inc. (“Insperty” or “we”, “our”, and “us”) provides an array of human resources (“HR”) and business solutions designed to help improve business performance. Since our formation in 1986, we have evolved from being solely a professional employer organization (“PEO”), an industry we pioneered, to our current position as a comprehensive business performance solutions provider. We were organized as a corporation in 1986 and have provided PEO services since inception.

Our most comprehensive HR services offerings are provided through our Workforce Optimization[®] and Workforce Synchronization[™] solutions (together, our “PEO HR Outsourcing solutions”), which encompass a broad range of human resources functions, including payroll and employment administration, employee benefits, workers’ compensation, government compliance, performance management, and training and development services, along with our cloud-based human capital management platform, the Employee Service CenterSM (“ESC”).

In addition to our PEO HR Outsourcing solutions, we offer a number of other business performance solutions, including Human Capital Management, Payroll Services, Time and Attendance, Performance Management, Organizational Planning, Recruiting Services, Employment Screening, Financial and Expense Management services, Retirement Services and Insurance Services, many of which are offered via desktop applications and cloud-based delivery models. These other products and services are offered separately, as a bundle, or along with our PEO HR Outsourcing solutions.

We provide our PEO HR Outsourcing solutions by entering into a co-employment relationship with our clients, under which Insperty and its clients each take responsibility for certain portions of the employer-employee relationship. Insperty and its clients designate each party’s responsibilities through its Client Service Agreement (“CSA”), under which Insperty becomes the employer of the employees who work at the client’s location (“worksites employees”) for most administrative and regulatory purposes.

As a co-employer of its worksite employees, we assume many of the rights and obligations associated with being an employer. We enter into an employment agreement with each worksite employee, thereby maintaining a variety of employer rights, including the right to hire or terminate employees, the right to evaluate employee qualifications or performance, and the right to establish employee compensation levels. Typically, Insperty only exercises these rights in consultation with its clients or when necessary to ensure regulatory compliance. The responsibilities associated with our role as employer include the following obligations with regard to our worksite employees: (i) to compensate its worksite employees through wages and salaries; (ii) to pay the employer portion of payroll-related taxes; (iii) to withhold and remit (where applicable) the employee portion of payroll-related taxes; (iv) to provide employee benefit programs; and (v) to provide workers’ compensation insurance coverage.

In addition to our assumption of employer status for our worksite employees, our PEO HR Outsourcing solutions also include other human resources functions for our clients to support the effective and efficient use of personnel in their business operations. To provide these functions, we maintain a significant staff of professionals trained in a wide variety of human resources functions, including employee training, employee recruiting, employee performance management, employee compensation and employer liability management. These professionals interact and consult with clients on a daily basis to help identify each client’s service requirements and to ensure that we are providing

appropriate and timely personnel management services.

Revenue and Direct Cost Recognition

We account for our PEO HR Outsourcing solutions revenues in accordance with Accounting Standards Codification (“ASC”) 605-45, Revenue Recognition, Principal Agent Considerations. Our PEO HR Outsourcing solutions revenues are primarily derived from our gross billings, which are based on (i) the payroll cost of its worksite employees; and (ii) a markup computed as a percentage of the payroll cost. The gross billings are invoiced concurrently with each periodic payroll of its worksite employees. Revenues, which exclude the payroll cost component of gross billings and therefore consist solely of markup, are recognized ratably over the payroll period as worksite employees perform their service at the client worksite.

F-12

Table of Contents

Revenues that have been recognized but not invoiced are included in unbilled accounts receivable on our Consolidated Balance Sheets.

In determining the pricing of the markup component of our gross billings, we take into consideration our estimates of the costs directly associated with our worksite employees, including payroll taxes, benefits and workers' compensation costs, plus an acceptable gross profit margin. As a result, our operating results are significantly impacted by our ability to accurately estimate, control and manage our direct costs relative to the revenues derived from the markup component of our gross billings.

Consistent with our revenue recognition policy, our direct costs do not include the payroll cost of our worksite employees. Our direct costs associated with our revenue generating activities are primarily comprised of all other costs related to our worksite employees, such as the employer portion of payroll-related taxes, employee benefit plan premiums and workers' compensation insurance costs.

Segment Reporting

We operate one reportable segment under ASC 280, Segment Reporting.

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Insperty, Inc. and its wholly owned subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with United States Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Concentrations of Credit Risk

Financial instruments that could potentially subject us to concentration of credit risk include accounts receivable and marketable securities.

Cash, Cash Equivalents and Marketable Securities

We invest our excess cash in federal government and municipal-based money market funds and debt instruments of U.S. municipalities. All highly liquid investments with stated maturities of three months or less from date of purchase are classified as cash equivalents. Liquid investments with stated maturities of greater than three months are classified as marketable securities in current assets.

We account for marketable securities in accordance with ASC 320, Investments – Debt and Equity Securities. We determine the appropriate classification of all marketable securities as held-to-maturity, available-for-sale or trading at the time of purchase, and re-evaluate such classification as of each balance sheet date. At December 31, 2015 and 2014, all of our investments in marketable securities were classified as available-for-sale, and as a result, were reported at fair value. Unrealized gains and losses are reported as a component of accumulated other comprehensive income (loss) in stockholders' equity. The amortized cost of debt securities is adjusted for amortization of premiums and accretion of discounts from the date of purchase to maturity. Such amortization is included in interest income as an addition to or deduction from the coupon interest earned on the investments. We use the specific identification

method of determining the cost basis in computing realized gains and losses on the sale of our available-for-sale securities. Realized gains and losses are included in other income.

Fair Value of Financial Instruments

The carrying amounts of cash, cash equivalents, accounts receivable and accounts payable approximate their fair values due to the short-term maturities of these instruments.

F-13

Table of Contents

Property and Equipment

Property and equipment are recorded at cost and are depreciated over the estimated useful lives of the related assets using the straight-line method. The estimated useful lives of property and equipment for purposes of computing depreciation are as follows:

Buildings and improvements	5-30 years
Computer hardware and software	2-5 years
Software development costs	3-5 years
Furniture, fixtures and other	5-7 years
Aircraft	15-20 years

Software development costs relate primarily to software coding, system interfaces and testing of our proprietary professional employer information systems and are accounted for in accordance with ASC 350-40, Internal Use Software. Capitalized software development costs are amortized using the straight-line method over the estimated useful lives of the software, generally three years. We recognized \$3.3 million, \$4.1 million and \$3.6 million in amortization of capitalized computer software costs in 2015, 2014 and 2013, respectively. Unamortized software development costs were \$7.1 million and \$6.0 million in 2015 and 2014, respectively.

We account for our software products in accordance with ASC 985-20, Costs of Software to be Sold. This Topic establishes standards of financial accounting and reporting for the costs of computer software to be sold, leased, or otherwise marketed as a separate product or as part of a product or process, whether internally developed and produced or purchased.

We periodically evaluate our long-lived assets for impairment in accordance with ASC 360-10, Property, Plant, and Equipment. ASC 360-10 requires that an impairment loss be recognized for assets to be disposed of or held-for-use when the carrying amount of an asset is deemed to not be recoverable. If events or circumstances were to indicate that any of our long-lived assets might be impaired, we would assess recoverability based on the estimated undiscounted future cash flows to be generated from the applicable asset. In addition, we may record an impairment loss to the extent that the carrying value of the asset exceeded the fair value of the asset. Fair value is generally determined using an estimate of discounted future net cash flows from operating activities or upon disposal of the asset. Due to a change in office consolidation plans, we recorded a \$1.2 million non-cash charge related to office design fees in 2014.

Goodwill and Other Intangible Assets

Our purchased intangible assets are carried at cost less accumulated amortization. Amortization is computed over the estimated useful lives of the respective assets, ranging from three to 10 years.

Our goodwill and intangible assets are subject to the provisions of ASC 350, Intangibles – Goodwill and Other. Accordingly, we perform our annual goodwill impairment testing as of December 31st of each calendar year or earlier if indicators of impairment exist on an interim basis. Step one of the impairment testing involves a comparison of the estimated fair value of a reporting unit to the related carrying value. Fair value is estimated using a discounted cash flow model. If the estimated fair value is less than its related carrying value, step two of the goodwill impairment test is completed, which involves allocating the estimated fair value of the reporting unit to individual assets and liabilities. If the carrying value of goodwill is greater than the estimated fair value, an impairment exists, which results in a write-down of the goodwill to the estimated fair value. Furthermore, ASC 350 requires purchased intangible assets other than goodwill to be amortized over their useful lives unless these lives are determined to be indefinite. Please read Note 5, “Goodwill and Other Intangible Assets,” for additional information.

Health Insurance Costs

We provide group health insurance coverage to our worksite employees through a national network of carriers including UnitedHealthcare (“United”), UnitedHealthcare of California, Kaiser Permanente, Blue Shield of California, HMSA BlueCross BlueShield and Tufts, all of which provide fully insured policies or service contracts. In 2015, we terminated our relationship with Unity Health Plan.

The policy with United provides the majority of our health insurance coverage. As a result of certain contractual terms, we have accounted for this plan since its inception using a partially self-funded insurance accounting model.

F-14

Table of Contents

Accordingly, we record the cost of the United portion of the plan, including an estimate of the incurred claims, taxes and administrative fees (collectively the “Plan Costs”) as benefits expense in the Consolidated Statements of Operations. The estimated incurred claims are based upon: (i) the level of claims processed during each quarter; (ii) estimated completion rates based upon recent claim development patterns under the plan; and (iii) the number of participants in the plan, including both active and COBRA enrollees. Each reporting period, changes in the estimated ultimate costs resulting from claim trends, plan design and migration, participant demographics and other factors are incorporated into the benefits costs.

Additionally, since the plan’s inception, under the terms of the contract, United establishes cash funding rates 90 days in advance of the beginning of a reporting quarter. If the Plan Costs for a reporting quarter are greater than the premiums paid and owed to United, a deficit in the plan would be incurred and a liability for the excess costs would be accrued in our Consolidated Balance Sheets. On the other hand, if the Plan Costs for the reporting quarter are less than the premiums paid and owed to United, a surplus in the plan would be incurred and we would record an asset for the excess premiums in our Consolidated Balance Sheets. The terms of the arrangement require us to maintain an accumulated cash surplus in the plan of \$9.0 million, which is reported as long-term prepaid insurance. In addition, United requires a deposit equal to approximately one day of claims funding activity, which was \$3.5 million as of December 31, 2015, and is reported as a long-term asset. As of December 31, 2015, Plan Costs were less than the net premiums paid and owed to United by \$2.2 million. As this amount is less than the agreed-upon \$9.0 million surplus maintenance level, the \$6.8 million difference is included in accrued health insurance costs, a current liability, in our Consolidated Balance Sheets. In addition, the premiums owed to United at December 31, 2015, were \$3.1 million, which is also included in accrued health insurance costs, a current liability in our Consolidated Balance Sheets.

Workers’ Compensation Costs

Our workers’ compensation coverage has been provided through an arrangement with the ACE Group of Companies (“the ACE Program”) since 2007. The ACE Program is fully insured in that ACE has the responsibility to pay all claims incurred regardless of whether we satisfy our responsibilities. Under the ACE Program, we bear the economic burden for the first \$1 million layer of claims per occurrence, and effective October 1, 2010, we also bear the economic burden for a maximum aggregate amount of \$5 million per policy year for claim amounts that exceed the first \$1 million. ACE bears the economic burden for all claims in excess of these levels.

Because we bear the economic burden for claims up to the levels noted above, such claims, which are the primary component of our workers’ compensation costs, are recorded in the period incurred. Workers’ compensation insurance includes ongoing health care and indemnity coverage whereby claims are paid over numerous years following the date of injury. Accordingly, the accrual of related incurred costs in each reporting period includes estimates, which take into account the ongoing development of claims and therefore requires a significant level of judgment.

We employ a third party actuary to estimate our loss development rate, which is primarily based upon the nature of worksite employees’ job responsibilities, the location of worksite employees, the historical frequency and severity of workers compensation claims, and an estimate of future cost trends. Each reporting period, changes in the actuarial assumptions resulting from changes in actual claims experience and other trends are incorporated into our workers’ compensation claims cost estimates. During the years ended December 31, 2015 and 2014, we reduced accrued workers’ compensation costs by \$1.3 million and \$2.9 million, respectively, for changes in estimated losses related to prior reporting periods. Workers’ compensation cost estimates are discounted to present value at a rate based upon the U.S. Treasury rates that correspond with the weighted average estimated claim payout period (the average discount rate utilized in both 2015 and 2014 was 1.0%) and are accreted over the estimated claim payment period and included as a component of direct costs in our Consolidated Statements of Operations.

Table of Contents

The following table provides the activity and balances related to incurred but not reported workers' compensation claims:

	Year ended December 31,	
	2015	2014
	(in thousands)	
Beginning balance	\$ 136,088	\$ 120,833
Accrued claims	67,559	55,971
Present value discount	(3,095)	(1,998)
Paid claims	(38,368)	(38,718)
Ending balance	\$ 162,184	\$ 136,088
Current portion of accrued claims	\$ 37,438	\$ 44,040
Long-term portion of accrued claims	124,746	92,048
	\$ 162,184	\$ 136,088

The current portion of accrued workers' compensation costs at December 31, 2015 and 2014 includes \$1.6 million of workers' compensation administrative fees in both periods.

As of December 31, the undiscounted accrued workers' compensation costs were \$172.3 million in 2015 and \$145.8 million in 2014.

At the beginning of each policy period, the insurance carrier establishes monthly funding requirements comprised of premium costs and funds to be set aside for payment of future claims ("claim funds"). The level of claim funds is primarily based upon anticipated worksite employee payroll levels and expected workers' compensation loss rates, as determined by the insurance carrier. Monies funded into the program for incurred claims expected to be paid within one year are recorded as restricted cash, a short-term asset, while the remainder of claim funds are included in deposits, a long-term asset in our Consolidated Balance Sheets. In 2015, we received \$5.3 million for the return of excess claim funds related to the workers' compensation program, which decreased deposits. As of December 31, 2015, we had restricted cash of \$37.4 million and deposits of \$136.5 million.

Our estimate of incurred claim costs expected to be paid within one year is included in short-term liabilities, while our estimate of incurred claim costs expected to be paid beyond one year are included in long-term liabilities on our Consolidated Balance Sheets.

Stock-Based Compensation

At December 31, 2015, we have two stock-based employee compensation plans under which we may issue awards. We account for these plans under the recognition and measurement principles of ASC 718, Compensation – Stock Compensation, which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values.

We generally make annual grants of restricted and unrestricted stock under our stock-based incentive compensation plans to our directors, officers and other management. Restricted stock grants to officers and other management vest over three to five years from the date of grant. Restricted stock grants issued to directors upon their initial appointment to the board are one-third vested on each anniversary of the grant date. Annual stock grants issued to directors are 100% vested on the grant date. Shares of restricted stock are based on fair value on date of grant and the associated expense, net of estimated forfeitures, is recognized over the vesting period.

In 2015, we adopted the Insuperity Long-Term Incentive Program (the “LTIP”). The LTIP provides for performance based long-term compensation awards in the form of performance units to certain employees based on the achievement of pre-established performance goals. Each performance unit represents the right to receive one common share at a future date based on our performance against certain targets. Performance units have a vesting schedule of three years. The fair value of each performance unit is the market price of our common stock on the date of grant. The compensation expense for such awards is recognized on a straight line basis over the vesting term. Over the performance period the number of shares expected to be issued is adjusted upward or downward based on the probability of achievement of the performance target.

F-16

Table of Contents

Company-Sponsored 401(k) Retirement Plans

Under our 401(k) retirement plan for corporate employees (the “Corporate Plan”), we matched 50% of eligible corporate employees’ contributions, up to 6% of the employees’ eligible compensation in 2015, 2014 and 2013. Under our separate 401(k) retirement plan for worksite employees (the “Worksite Employee Plan”), the match percentage for worksite employees ranges from 0% to 6%, as determined by each client company. Matching contributions under the Corporate Plan and the Worksite Employee Plan are immediately vested. During 2015, 2014 and 2013, we made matching contributions to the Corporate and Worksite Employee Plans of \$98.7 million, \$81.5 million and \$74.7 million, respectively. Of these contributions, \$95.3 million, \$78.4 million and \$71.7 million were made under the Worksite Employee Plan on behalf of worksite employees. The remainder represents matching contributions made under the Corporate Plan on behalf of corporate employees.

Advertising

We expense all advertising costs as incurred.

Income Taxes

We use the liability method in accounting for income taxes. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and income tax carrying amounts of assets and liabilities and are measured using the enacted tax rates and laws in effect when the differences are expected to reverse.

Reclassifications

Certain prior year amounts have been reclassified to conform to the 2015 presentation.

New Accounting Pronouncements

We believe that we have implemented the accounting pronouncements with a material impact on our financial statements.

In May 2014, the Financial Accounting Standards Board issued Accounting Standards (“FASB”) Update (“ASU”) No. 2014-09, Revenue from Contracts with Customers (Topic 606). ASU No. 2014-09 outlines a single comprehensive revenue recognition model for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. Under ASU No. 2014-09, an entity recognizes revenue for the transfer of promised goods or services to customers in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. ASU No. 2014-09 is effective for annual reporting periods ending after December 15, 2017, and early adoption is not permitted. Companies may use either a full retrospective or a modified retrospective approach to adopt ASU No. 2014-09. We are currently evaluating the guidance and have not determined the impact this standard may have on our Consolidated Financial Statements.

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes, which requires companies to present deferred income tax assets and deferred income tax liabilities, along with any valuation allowance, as noncurrent in a classified balance sheet instead of the current requirement to separate deferred income tax liabilities and assets into current and noncurrent amounts. ASU 2015-17 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early application is permitted either prospectively or retrospectively. In December 2015, we adopted ASU No. 2015-17 retrospectively, resulting in a reclassification of a \$6.3 million deferred tax asset from current to long term in 2014.

Table of Contents

2. Cash, Cash Equivalents and Marketable Securities

The following table summarizes our investments in cash equivalents and marketable securities held by investment managers and overnight investments:

	December 31,	
	2015	2014
	(in thousands)	
Overnight holdings:		
Money market funds (cash equivalents)	\$247,720	\$271,840
Investment holdings:		
Money market funds (cash equivalents)	26,048	14,125
Marketable securities	9,875	28,631
	283,643	314,596
Cash held in demand accounts	19,377	20,369
Outstanding checks	(23,607)	(29,878)
Total cash, cash equivalents and marketable securities	\$279,413	\$305,087
Cash and cash equivalents	\$269,538	\$276,456
Marketable securities	9,875	28,631
	\$279,413	\$305,087

Our cash and overnight holdings fluctuate based on the timing of the client's payroll processing cycle. Included in the cash balance as of December 31, 2015 and December 31, 2014, are \$185.7 million and \$152.1 million, respectively, in withholdings associated with federal and state income taxes, employment taxes and other payroll deductions, as well as \$17.0 million and \$87.9 million, respectively, in client prepayments.

We account for our financial assets in accordance with ASC 820, Fair Value Measurement. This standard defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. The fair value measurement disclosures are grouped into three levels based on valuation factors:

Level 1 - quoted prices in active markets using identical assets

Level 2 - significant other observable inputs, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other observable inputs

Level 3 - significant unobservable inputs

The following tables summarize the levels of fair value measurements of our financial assets:

	Fair Value Measurements			
	(in thousands)			
	December 31, 2015	Level 1	Level 2	Level 3
Money market funds	\$273,768	\$273,768	\$—	\$—
Municipal bonds	9,875	—	9,875	—
Total	\$283,643	\$273,768	\$9,875	\$—

Table of Contents

	Fair Value Measurements			
	(in thousands)			
	December 31, 2014	Level 1	Level 2	Level 3
Money market funds	\$285,965	\$285,965	\$—	\$—
Municipal bonds	28,631	—	28,631	—
Total	\$314,596	\$285,965	\$28,631	\$—

The municipal bond securities valued as Level 2 investments are primarily pre-refunded municipal bonds that are secured by escrow funds containing U.S. Government securities. Our valuation techniques used to measure fair value for these securities during the period consisted primarily of third party pricing services that utilized actual market data such as trades of comparable bond issues, broker/dealer quotations for the same or similar investments in active markets and other observable inputs.

The following is a summary of our available-for-sale marketable securities:

	Amortized Cost	Gross Unrealized Gains (in thousands)	Gross Unrealized Losses	Estimated Fair Value
December 31, 2015				
Municipal bonds	\$9,875	\$3	\$(3)	\$9,875
December 31, 2014				
Municipal bonds	\$28,626	\$16	\$(11)	\$28,631

As of December 31, 2015, the contractual maturities of our marketable securities were as follows:

	Amortized Cost (in thousands)	Estimated Fair Value
Less than one year	\$7,341	\$7,341
One to five years	2,534	2,534
Total	\$9,875	\$9,875

3. Accounts Receivable

Our accounts receivable is primarily composed of trade receivables and unbilled receivables. Our trade receivables, which represent outstanding gross billings to clients, are reported net of allowance for doubtful accounts of \$1.1 million and \$1.2 million as of December 31, 2015 and 2014, respectively. We establish an allowance for doubtful accounts based on management's assessment of the collectability of specific accounts and by making a general provision for other potentially uncollectible amounts.

We make an accrual at the end of each accounting period for our obligations associated with the earned but unpaid wages of our worksite employees and for the accrued gross billings associated with such wages. These accruals are included in accrued worksite employee payroll cost and unbilled accounts receivable; however, these amounts are presented net in the Consolidated Statements of Operations. We generally require clients to pay invoices for service fees no later than one day prior to the applicable payroll date. As such, we generally do not require collateral. Client prepayments directly attributable to unbilled accounts receivable have been netted against such receivables as the

gross billings have been earned and the payroll cost has been incurred, thus we have the legal right of offset for these amounts. Unbilled accounts receivable consisted of the following:

F-19

Table of Contents

	December 31,	
	2015	2014
	(in thousands)	
Accrued worksite employee payroll cost	\$161,917	\$192,396
Unbilled revenues	45,835	55,645
Customer prepayments	(17,037)	(87,887)
Unbilled accounts receivable	\$190,715	\$160,154

4. Deposits

The contractual arrangement with United for health insurance coverage requires us to maintain an accumulated cash surplus in the plan of \$9.0 million, which is reported as long-term prepaid health insurance. Please read Note 1, “Accounting Policies,” for a discussion of our accounting policies for health insurance costs.

As of December 31, 2015, we had \$3.7 million in health insurance long-term deposits. Please read Note 1, “Accounting Policies,” for a discussion of our accounting policies for health insurance costs.

As of December 31, 2015, we had \$136.5 million in workers’ compensation long-term deposits. Please read Note 1, “Accounting Policies,” for a discussion of our accounting policies for workers’ compensation costs.

5. Goodwill and Other Intangible Assets

We perform our annual asset impairment test as of December 31, the end of our calendar year. During the fourth quarters of 2015, 2014 and 2013, we performed step one of the annual impairment test for each of our reporting units. We concluded that the estimated fair value of our Expense Management unit in 2013 was below its respective carrying value.

Additionally, any time impairment indicators are identified, we perform an interim impairment test. During the second quarter of 2014, impairment indicators were identified in our Employment Screening business, due to changes in management, the reporting unit’s financial results and the loss of certain customers.

The declines in the estimated fair values of Employment Screening and Expense Management resulted primarily from lower projected revenue growth rates and profitability levels. Upon completion of step two of the goodwill impairment tests, we recognized goodwill and other intangible asset impairments of \$2.5 million in 2014 related to our Employment Screening business unit and \$3.3 million in 2013 related to our Expense Management reporting unit. The fair values of the reporting units were estimated using a discounted cash flow model. The material assumptions used in the model included the weighted average cost of capital and long-term growth rates. We consider this a Level 3 fair value measure.

Table of Contents

The following table presents the gross carrying amount and accumulated amortization for each class of intangible assets and the gross carrying amount and accumulated impairment for goodwill:

	December 31, 2014	Twelve Months Ended December 31, 2015		December 31, 2015
	Balance	Impairment	Amortization Expense	Balance
	(in thousands)			
Gross carrying amount:				
Trademarks	\$220	\$—	\$—	\$220
Customer relationships	6,392	—	—	6,392

Total	\$(13,311)) \$—	\$(869)) \$(14,180)
Net carrying amount:				
Trademarks	\$158	\$—	\$(39)) \$119
Customer relationships	1,613	—	(830)) 783
Goodwill	12,686	—	—	12,686
Total goodwill and other intangible assets	\$14,457	\$—	\$(869)) \$13,588

Our amortization expense related to purchased intangible assets other than goodwill was \$0.9 million in 2015, \$1.5 million in 2014 and \$2.0 million in 2013, and is estimated to be \$0.5 million in 2016, \$0.3 million in 2017, \$36,000 in 2018, \$12,000 in 2019 and \$7,000 in 2020.

6. Other Asset Impairments

In the first quarter of 2015, we entered into a plan to sell our two aircraft, and as a result, we recorded impairment and other charges of \$9.8 million, representing the difference between the carrying value and the estimated fair value of the assets as well as a provision for potential settlement of a Texas sales and use tax assessment. In July 2015, we received proceeds, net of selling costs, of \$12.2 million for both aircraft and recorded an additional \$1.3 million impairment charge in the second quarter of 2015. In the fourth quarter of 2015, we reduced our use tax accrual by \$0.6 million due to a pending \$0.2 million settlement of the Texas sales and use tax assessment. These net charges of \$10.5 million are included in impairment charges and other on our Consolidated Statement of Operations.

In 2011, we acquired a minority interest in The Receivables Exchange ("TRE"), an online marketplace for the sale of accounts receivable, for \$2.8 million. In the second quarter of 2013, TRE issued similar securities at per share amounts substantially below the per share book value of our investment. Accordingly, we valued the investment based on a similar security market transaction, which is a Level 2 valuation technique. This resulted in a non-cash impairment charge of \$2.7 million in 2013, which is included in other income (expense) in our Consolidated Statements of Operations. Due to federal income tax limitations on capital losses, no tax benefit associated with the impairment was recognized.

7. Revolving Credit Facility

We have a \$125 million revolving credit facility (the “Facility”), which may be increased to \$150 million based on the terms and subject to the conditions set forth in the agreement relating to the Facility (the “Credit Agreement”). The Facility is available for working capital and general corporate purposes, including acquisitions, and issuances of letters of credit. Our obligations under the Facility are secured by 65% of the stock of our captive insurance subsidiary and are guaranteed by all of our domestic subsidiaries. At December 31, 2015, we had not drawn on the Facility. As of December 31, 2015, we had an outstanding \$0.6 million letter of credit issued under the Facility.

The Facility matures on February 6, 2020. Borrowings under the Facility bear interest at an alternate base rate or LIBOR, at our option, plus an applicable margin. Depending on our leverage ratio, the applicable margin varies (i) in the case of LIBOR loans, from 2.00% to 2.75% and (ii) in the case of alternate base rate loans, from 0.00% to 0.75%. The alternate base rate is the highest of (i) the prime rate most recently published in The Wall Street Journal, (ii) the federal funds rate plus 0.50% and (iii) the 30-day LIBOR rate plus 2.00%. We also pay an unused commitment fee on the average daily unused portion of the Facility at a rate of 0.25%. Interest expense and unused commitment fees are recorded in other income (expense).

The Facility contains both affirmative and negative covenants that we believe are customary for arrangements of this nature. Covenants include, but are not limited to, limitations on our ability to incur additional indebtedness, sell material assets, retire, redeem or otherwise reacquire our capital stock, acquire the capital stock or assets of another business, make investments and pay dividends. In addition, the Credit Agreement requires us to comply with financial covenants limiting our total funded debt, minimum interest coverage ratio and maximum leverage ratio. In December 2014 and 2012, the Credit Agreement was amended to modify the interest coverage ratio covenant to exclude the impact of special dividends paid of \$50.7 million and \$25.7 million, respectively. We were in compliance with all financial covenants under the Credit Agreement at December 31, 2015.

In January 2016, we borrowed \$104.4 million under the Facility to fund a portion of the purchase price of our modified Dutch auction tender offer. Please read Note 15, “Subsequent Events,” for additional information.

8. Income Taxes

Deferred taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities used for financial reporting purposes and the amounts used for income tax purposes. Significant components of the net deferred tax assets and net deferred tax liabilities as reflected on the Consolidated Balance Sheets are as follows:

	December 31,	
	2015	2014
	(in thousands)	
Deferred tax liabilities:		
Prepaid assets	\$(3,952)	\$(9,291)
Depreciation	(1,741)	(8,083)
Software development costs	(2,699)	(2,252)
Total deferred tax liabilities	(8,392)	(19,626)
Deferred tax assets:		
Accrued incentive compensation	8,818	7,204
Net operating loss carryforward	1,463	1,556
Workers' compensation accruals	7,586	6,308
Accrued rent	1,229	1,058
Stock-based compensation	4,553	3,615
Intangibles	1,159	1,575
Minority investment impairment	1,016	1,003
Other	564	551
Total deferred tax assets	26,388	22,870
Valuation allowance	(1,020)	(1,003)
Total net deferred tax assets	25,368	21,867
Net deferred tax assets	\$16,976	\$2,241

In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes, which requires companies to present deferred income tax assets and deferred income tax liabilities as noncurrent in a classified balance sheet instead of the current requirement to separate deferred income tax liabilities and assets into current and noncurrent amounts. ASU 2015-17 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early application is permitted either prospectively or retrospectively. In December 2015 we adopted ASU No. 2015-17 retrospectively, resulting in a reclassification of a \$6.3 million deferred tax asset from current to long term in 2014.

Table of Contents

The components of income tax expense are as follows:

	Year ended December 31,		
	2015	2014	2013
	(in thousands)		
Current income tax expense:			
Federal	\$35,221	\$18,034	\$20,476
State	5,741	3,322	3,512
Total current income tax expense	40,962	21,356	23,988
Deferred income tax (benefit) expense:			
Federal	(13,632) (1,764) (2,258
State	(1,101) 31	(30
Total deferred income tax benefit	(14,733) (1,733) (2,288
Total income tax expense	\$26,229	\$19,623	\$21,700

As a result of nonqualified stock option exercises, disqualifying dispositions of certain employee incentive stock options and vesting of restricted stock awards, we had a net income tax benefit of \$2.2 million in 2015, \$0.5 million in 2014 and \$1.3 million in 2013. The excess income tax benefit is reported as a component of additional paid-in capital.

The reconciliation of income tax expense computed at U.S. federal statutory tax rates to the reported income tax expense from continuing operations is as follows:

	Year ended December 31,		
	2015	2014	2013
	(in thousands)		
Expected income tax expense at 35%	\$22,967	\$16,670	\$18,806
