FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

The following unaudited financial statements of International Star, Inc. have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q. Accordingly, these financial statements may not include all of the information and disclosures required by generally accepted accounting principles for complete financial statements. These financial statements should be read in conjunction with the audited financial statements and the notes thereto for the fiscal year ending December 31, 2010. In the opinion of management, these unaudited financial statements contain all adjustments necessary to fairly present the Company's financial position as of June 30, 2011, and its results of operations and its cash flows for the six-month period ended June 30, 2011.

INTERNATIONAL STAR, INC.

AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2011

(Unaudited)

A. ORGANIZATION AND BASIS OF PRESENTATION

Organization

The main focus of business of International Star, Inc. (the Company), commencing January 1, 2004, is the exploration of mining claims and mining properties. The Company has, in accordance with guidelines of the Securities and Exchange Commission (SEC), appropriately disclosed that the company is considered an exploration stage company.

During 2006 the Company relocated its principal offices from Henderson, Nevada to Mount Pleasant, Texas and then to Shreveport, Louisiana.

Basis of presentation

The interim consolidated financial statements of the Company and subsidiaries for the period ended June 30, 2011 are not audited. The financial statements are prepared in accordance with the requirements for unaudited interim periods, and consequently do not include all disclosures required to be in conformity with accounting principles generally accepted in the United States of America.

In the opinion of management, the accompanying consolidated financial statements contain all adjustments, consisting only of normal recurring accruals, necessary for a fair presentation of the Company's financial position as of June 30, 2011, and the results of its operations and cash flows for the three and six months ended June 30, 2011 and 2010.

The results of operations for the six months ended June 30, 2011, are not necessarily indicative of the results for a full year period.

B. SIGNIFICANT ACCOUNTING POLICIES

1. Principles of Consolidation and Accounting Methods

These consolidated financial statements include the accounts of International Star, Inc., and Qwik Track, Inc. (a wholly owned subsidiary) for the six months ended June 30, 2011. Qwik Track, Inc. has no assets and has not had any operations during the previous three years. The Company uses the accrual method of accounting.

2. Use of Estimates

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

3. Dividend Policy

The Company did not declare or pay any dividends during the period ended June 30, 2011. There are no legal, contractual or other restrictions, which limit the Company's ability to pay dividends. Payment of future dividends, if any, on the Company's common stock, will be dependent upon the amounts of its future after-tax earnings, if any, and will be subject to the discretion of its Board of Directors. The Company's Board of Directors is not legally obligated to declare dividends, even if the Company is profitable. The Company has never paid any dividends on its common stock and has no plans to do so in the near future. Instead, the Company plans to retain any earnings to finance the development of its business and for general corporate purposes.

4. Mineral Properties and Equipment

Mineral property acquisition costs are initially capitalized when incurred. These costs are then assessed for impairment when factors are present to indicate the carrying costs may not be recoverable. Mineral exploration costs are expensed when incurred.

5. Earnings (Loss) Per Share

Basic earnings (loss) per common share is computed by dividing net earnings (loss) by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per common share is computed by dividing net earnings by the weighted average number of common shares and potential common shares outstanding during the period, unless the calculation is anti-dilutive. At June 30, 2011, the Company had no dilutive potential common shares.

6. Stock Based Compensation

The Company accounts for its stock based compensation and stock options using the fair value method. Under this method, share-based awards are fair valued and the related stock compensation expense, when applicable, is reported in the current financial statements.

7. Income Taxes

The Company accounts for income taxes under an asset and liability approach that requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in the Company's financial statements or tax returns. In estimating future tax consequences, all expected future events, other than enactment of changes in the tax laws or rates, are considered.

Due to the uncertainty regarding the Company's future profitability, the future tax benefits of its net operating losses have been fully offset by a valuation allowance.

8. Fair Value of Financial Instruments

The respective carrying value of the Company's financial instruments approximated their fair values.

9. Recent Accounting Pronouncements

The Company does not expect that the adoption of other recent accounting pronouncements will have a material effect on its financial statements.

10. Revenue Recognition

Revenue will be recognized on the sale and delivery of a product or the completion of a service provided.

11. Statement of Cash Flows

For the purposes of the statement of cash flows, the Company considers all highly liquid investments with a maturity of three months or less to be cash equivalents.

12. Financial and Concentration Risk

The Company does not have any concentration or related financial credit risk.

8

13. Reclassifications

Certain prior period amounts have been reclassified to conform to current period presentation.

C. DIVESTITURE OF PITA KING BAKERIES INTERNATIONAL, INC.

Effective January 1, 2004, the original shareholders of Pita King Bakeries International, Inc. and the management of International Star, Inc. (the Company) mutually agreed to dissolve their business relationship. Under terms of this dissolution, the original shareholders of Pita King Bakeries International, Inc. returned 4,000,000 shares of common stock to the Company and the Company agreed to forgive a \$35,000 loan made to Pita King Bakeries International, Inc. The original shareholders of Pita King Bakeries International, Inc. were allowed to retain 139,500 shares of the Company's common stock which they had received as part of the original purchase of Pita King Bakeries International, Inc. by the Company. The Company has recognized a loss of \$99,472 on the divestiture of Pita King Bakeries International, Inc.

D. COMMON STOCK

The Company issued 12,500,000 shares of common stock for \$100,000 during the three months ended June 30, 2011.

E. NOTES PAYABLE – RELATED PARTY

The Company entered into a loan agreement with Kilpatrick's Rose-Neath Funeral Homes, Crematorium and Cemeteries, Inc. on December 3, 2007. This company is controlled through ownership by a shareholder/director of International Star, Inc. Under terms of the agreement, the Company has an available credit line balance of \$500,000 with interest accruing at 6% per annum. The interest is due and payable on a quarterly basis (every three months). The loan is collateralized by a security interest to the above mentioned lender in the amount of 51% interest in the mineral rights of all mining claims owned by the Company or in which the Company has an interest in its properties located in Mohave County, Arizona, along with any future claims acquired by the Company. At June 30, 2011, the Company had borrowed \$500,000 under the terms of this loan agreement and had accrued interest of \$90,000. This note has a maturity date of December 3, 2012.

The Company entered into another loan agreement with Kilpatrick's Rose-Neath Funeral Homes, Crematorium and Cemeteries, Inc. on December 1, 2008. Under terms of the agreement, the Company has an available credit line of \$200,000 with interest accruing at 10% per annum. The interest rate increased from 10% to 18% per annum as of March 31, 2009, which was the maturity date of the Note. At June 30, 2011, the Company had borrowed \$200,000 under the terms of this loan agreement, and had accrued interest of \$84,950.

F. ADVANCES FROM SHAREHOLDER

As of June 30, 2011, the Company owes a total of \$200,000 for repayment of funds advanced in prior periods by the Chairman of the Board of Directors. These advances are non-interest bearing and payable on demand.

G. NOTES PAYABLE – BEAIRD

The Company entered into a loan agreement with Beaird Operating Companies on October 13, 2010. Under the terms of the loan agreement the Company received \$200,000 and in correlation with the note the Company issued 20,000,000 warrants. This note is due on December 13, 2011. All principal and interest at the rate of 12%, per annum, is due at that time. Accrued interest for this loan was \$17,000 at June 30, 2011. The loan is collateralized by a security interest to the above mentioned lender in the amount of 49% interest in the mineral rights of all mining

claims owned by the Company or in which the Company has an interest in its properties located in Mohave County, Arizona, along with any future claims acquired by the Company. The related stock warrants were valued at \$58,000 using the Black-Scholes model. Inputs to this model for the fair value calculation were as follows: exercise price, \$.01; stock price on date of issuance, \$.0095; expected term, 2 years; expected volatility, 59%; dividend rate, 0%; and, risk-free rate, .22%. This amount is recorded as a discount on the note payable and will be amortized over the term of the note. As of June 30, 2011, \$24,857 of the discount had been amortized to interest expense.

On April 25, 2011 the Company received an additional \$150,000 under a note payable due December 13, 2011 with interest of 12% secured by a 49% interest in the Company's mineral rights in Mohave County, Arizona. Accrued interest for this loan was \$3,250 at June 30, 2011. In connection with the debt, the Company issued 15,000,000 warrants to purchase the Company's common stock at an exercise price of \$.01 per share, any time prior to the later of April 25, 2013 or the date that the principal is fully paid. These warrants may be cancelled by the Company after April 25, 2012. No value has been recognized for the warrants.

As of June 30, 2011, 35,000,000 warrants were still outstanding.

H. COMMITMENTS AND CONTINGENCIES

Under the terms of the Beaird loans explained in Footnote G above, any unpaid principal on the maturity date of December 13, 2011, will increase by 1.5 times and will continue to accrue interest at a rate of 12% per annum. No amounts have been recorded for this contingency in these consolidated financial statements.

I. STOCK OPTIONS

The Company entered into an employment agreement effective April 1, 2008 whereby the Company would issue two separate option agreements to the Company president. The first option agreement would have allowed the Company president to purchase up to 5,000,000 shares of the Company common stock at \$.01 per share and the second option agreement would have allowed the Company president to purchase up to 5,000,000 shares of the Company common stock at \$.03 per share. The vesting of the option agreements were to be based upon performance incentives to be determined by the Board of Directors. The employment agreement was amended on August 13, 2008, to allow the Company to issue stock options for an aggregate of 10,000,000 shares of common stock of the Company on such dates and according to such terms as designated by the Board of Directors of the Company.

On April 28, 2010, the Company issued 10,000,000 stock options to its President. These options are fully vested as of the grant date, have a contractual term of 5 years, and are exercisable at \$0.01 per share. The Company uses the Black-Scholes model to estimate the fair value of its options. Assumptions used in calculating the fair value for these options were as follows: exercise price of stock option – \$0.01; stock price on date of issuance – \$0.01; expected term – 5 years; expected volatility – 69%; dividend rate – \$0.00; risk-free interest rate – 0.43%. Using these assumptions, we estimated the grant date fair value of these options to be \$0.0056 per option, or \$56,000. This amount was recorded as compensation expense in our financial statements for the year ended December 31, 2010. As no options were exercised subsequent to grant date, all 10,000,000 options are still outstanding. Other information regarding the number of options outstanding and exercisable at March 31, 2011 is as follows:

	Outstanding	Exercisable
Number of options	10,000,000	10,000,000
Weighted average remaining contractual term (years)	3.8	3.8
Weighted average exercise price	\$ 0.01	\$ 0.01
Aggregate intrinsic value	\$ 0	\$ 0

J. GOING CONCERN

The Company will need additional working capital for its future planned activity and to service its debt, which raises substantial doubt about its ability to continue as a going concern. Continuation of the Company as a going concern is

dependent upon obtaining sufficient working capital to be successful in that effort. The management of the Company has developed a strategy, which it believes will accomplish this objective, through additional loans, and equity funding, which will enable the Company to operate for the coming year.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

Cautionary Note Regarding Forward-Looking Statements

This Management's Discussion and Analysis of Financial Condition and Results of Operations includes a number of forward-looking statements that reflect our management's current views with respect to future events and financial performance. Those statements include statements regarding our intent, belief or current expectations, and those of members of our management team, as well as the assumptions on which such statements are based. Prospective investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve risk and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements. Readers are urged to carefully review and consider the various disclosures made by us throughout this Quarterly Report, as well as in our other reports filed by us with the Securities and Exchange Commission ("SEC"). Important factors not currently known to management could cause actual results to differ materially from those in forward-looking statements. We undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in future operating results over time. We believe that our assumptions are based upon reasonable data derived from and known about our business and operations. No assurances are made that actual results of operations or the results of any future activities will not differ materially from our assumptions.

Since our trading shares are classified as "penny stocks", we are not entitled to rely upon the "safe harbor" provisions adopted by the SEC under the Securities Exchange Act of 1934 (the "Exchange Act") with respect to forward-looking statements. Nevertheless, investors are urged to give serious consideration to those factors which we have identified as outside of our control, and the consequences to us and our investors if our anticipated results do not come to pass as expected as a result of material deviations which may occur from the assumptions we have relied upon in making forward-looking statements.

Our Business

We were organized under the laws of the State of Nevada on October 28, 1993, as Mattress Showrooms, Inc. In 1997, we changed our corporate name to International Star, Inc. and became engaged in the business of construction, sale and operation of state of the art waste management systems, specializing in turnkey systems for management of hospital, industrial, petroleum, chemical and municipal solid waste collection systems. Despite our efforts, we were unable to develop this business beyond the start-up stage. Following our unsuccessful venture in waste management, we refocused our business efforts on mineral exploration in 1998. Currently, we are engaged in the acquisition and exploration of precious and base metals mineral properties.

Since 1998, we have examined various mineral properties prospective for precious and base metals and minerals and have acquired interests in those we believe may contain precious and base metals and minerals. Our properties are located in Arizona. Although we have confirmed the existence of mineralization in some of our properties, we have not established that any of our properties contain reserves. A reserve is that part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination. Further exploration will be needed before a final determination can be made whether any mineral extraction on our property is economically and legally feasible. Therefore, at present we have no reserves and no income from mineral production.

Our determination as to whether any of the mineral properties we now hold, or which we may acquire in the future, contain commercially mineable deposits, and whether such properties should be brought into production, will depend

upon the availability of financing, the results of our exploration program and independent feasibility analysis and the recommendation of engineers and geologists. We cannot be certain that any of our properties contain commercially mineable mineral deposits, and no assurance can be given that we will ever generate a positive cash flow from production operations on such properties.

Going Concern

We have incurred substantial operating and net losses, as well as negative operating cash flow, since our inception. Accordingly, we continued to have significant stockholder deficits and working capital deficits during the year ended December 31, 2010, as further explained in our Annual Report on Form 10-K for the year ended December 31, 2010. In recognition of these trends, our independent registered accountants included cautionary statements in their report on our financial statements for the year ended December 31, 2010, that expressed “substantial doubt” regarding our ability to continue as a going concern. Specifically, our independent accountants have opined that the continuation of our Company as a going concern is dependent upon obtaining sufficient working capital to be successful in that effort.

Our management has developed a long-term strategy for generating revenues from our mineral properties, with a short-term focus on obtaining additional equity or debt funding until such operating revenues can be generated. We will continue to consider available and feasible options to raise additional capital as needed to fund our operating costs and to continue work on establishing the existence of mineral reserves within our properties to enable us to seek feasible revenue generating opportunities. We do not anticipate generating any revenue from our mineral properties during the third quarter of 2011.

We have used financing obtained in October 2010 and April 2011 to satisfy our operating and exploration expenses for the first six months of 2011, and we plan to continue to use this financing to fund our operations through the third quarter of 2011. See “– GENERAL – Financing.” Unless we are able to generate substantial revenues from our mineral properties during 2011, we will need to raise additional equity or debt financing to fund future operating costs and mineral exploration work and to service our debt obligations. We cannot assure that we will be able to obtain the necessary funding or, even if such financing is obtained, that we will be able to establish the existence of mineral reserves or generate revenues from our properties sufficient to sustain our continued operations or at all.

Our Properties

We currently hold interests in properties that we believe show potential for mineral development. These properties consist of unpatented mining claims located on federal public land managed by the United States Department of Interior, Bureau of Land Management (“BLM”). We are obligated to pay a maintenance fee to the BLM of \$189 per claim plus a \$14 local filing fee for each newly filed claim and \$140 per claim per year for each existing claim.

Unpatented mining claims are “located” or “staked” by individuals or companies on particular parcels of federal public land upon which the individual or company asserts the right to extract and develop a mineral deposit. Mining claims may be one of two types: lode and placer. Lode claims are claims on land where mineral deposits have been discovered encased in or surrounded by hard rock, such as veins, fissures, lodes and disseminated ore bodies. Placer claims are claims upon land containing deposits of loose, unconsolidated material, such as gravel beds, or containing certain consolidated sedimentary deposits lying at the surface. Federal law limits each lode claim to no more than 1,500 feet along the length of the deposit and no more than 300 feet to either side of the center line of the deposit. A placer claim may be up to 20 acres for a single individual or corporation, and up to as many as 160 acres for an association of at least eight owners.

If the statutes and regulations for the location and maintenance of a mining claim are complied with, the locator obtains a valid possessory right to the contained minerals. Failure to pay maintenance fees may render the mining claim void or voidable. We believe we have valid claims, but, because mining claims are self-initiated and self-maintained, it is impossible to ascertain their validity solely from public real estate records. If the government challenges the validity of an unpatented mining claim, we would have the burden of proving the present economic feasibility of mining minerals located on the claims.

Property and Location

Our current mineral property consists of approximately 1.7 square miles of land located in the northern Black Mountains in Mohave County, Arizona, approximately 56 miles from Las Vegas, Nevada, and 22 miles south of the Hoover Dam on U.S. Highway 93 (the “Black Mountains Property”). The property is easily accessed by partially paved entry off Highway 93 and has availability to electricity and water.

Our Black Mountains Property consists of approximately 54 lode claims, almost all of which have been recorded with the BLM and Mohave County. Our claim holdings in this area began with placer claims in the adjacent Detrital Wash area acquired in 1998 through a mineral lease and in 2004 through an exploration rights agreement. In 2008, we released all of our placer claims in the Detrital Wash area due to economically insufficient placer mineralization. Our subsequent claims, except for five lode claims acquired by lease in April 2011, have been staked by the Company over or nearby the Company’s previous claim holdings. The claims we have staked in our Black Mountains Property cover areas of bedrock mineralization indicated by historical data obtained by the Company and confirmed by geochemical assays of mineral samples performed for the Company by licensed independent labs and evaluated according to National Instrument (NI) 43-101 standards, as well as other areas where we have obtained evidence of mineralization occurring in the bedrock.

Effective April 1, 2011, we acquired five lode mining claims covering the former Van Deemen gold mine located within the area of our existing claims in the northern Black Mountains in Mohave County through a 10-year lease agreement with La Cuesta International, Inc. We are required to make rental payments every six months, beginning upon signing of the lease, in an amount of \$5,000 for each of the first two six-month periods, \$7,500 for each of the next two periods, and \$10,000 per period thereafter. Upon commencement of any commercial mineral production on the leased property, we must pay the greater of 2% of the net smelter returns or \$10,000 during each calendar quarter in which we produce and sell ores and minerals from the property in commercial quantities. We also have the option to purchase the leased claims for \$200,000, including prior rental and royalty payments.

In addition to the five leased claims, we have located and recorded 18 lode claims covering areas surrounding the leased Van Deemen mine claims. Based on historical information we have obtained, the Van Deemen area was initially explored for gold in the 1930s and 1940s. In the 1970s, the area was actively explored for copper, with the greatest focus of copper exploration occurring east of the old Pope Mine about 2.5 miles north of the Van Deemen. Since the 1980s, the area has been explored primarily for gold. From 1983 to 1985, Amselco Exploration Inc. conducted the first serious exploratory drilling for gold on the Van Deemen prospect. Amselco completed 13 drill holes in 1983 and nine drill holes in 1985. Red Dog Mining also completed a brief phase of shallow air track drilling in 1985 in the zone of gold mineralization identified by Amselco. The area was then acquired by Fischer-Watt Gold Co. in late 1985. In 1986 and 1987, Fischer-Watt Gold Co. and Arizona Star Resources, through a joint venture, conducted a more complete evaluation of the property. Drilling results from the Fischer-Watt and Arizona Star work reported gold mineralization in three small open pits occurring in low angle faults with associated quartz-sericite-hematite-pyrite-clay alteration.

The Black Mountains Property is underlain by three basic rock units or “packages” of rocks. The oldest rock unit consists of Precambrian schist and gneissic rocks which are the reconstituted (metamorphic) equivalents of former shale, siltstone, and volcanic rocks. The next youngest rock unit, which is believed to be of Laramide (Upper Cretaceous/Lower Tertiary) age, comprises a suite of granitoid plutonic rocks that intrude the Precambrian strata and that, in large part, consist of alaskite and subordinate pegmatitic masses. The youngest rock unit is a succession of volcanic rocks of intermediate composition. This unit forms a partial cover over the older units and has been dated in age as Miocene (Middle Tertiary).

The property exhibits features of a metamorphic core complex. These features include the somewhat arch-like, cross-sectional (east-west) profile of this area of the Black Mountains, detached cover rocks, a preponderance of shallow-dipping penetrative structures (foliations) in the plutonic/metamorphic basement, and the composition of the plutonic rocks. Our 2010 mapping revealed that a portion of the section of metamorphic rocks (schist, etc.) that separates the plutonic rocks of the core from the cover rocks (known as the carapace) is also detached and, throughout the property, variously rests on plutonic rocks and other sections of the carapace. This is commonly referred to as a detachment (or decollement) zone. This detachment zone contains evidence of mineralization including gold, copper, molybdenum and other minerals.

Based on the presence of gold producing mines in the Black Mountains area and the data we have collected, we believe deposits of precious and base metals may exist within the Black Mountains Property. Our current exploration efforts are primarily focused on the establishment of gold reserves with a secondary focus on copper and other minerals. We cannot assure that we will discover such deposits or that, if such deposits are discovered, we will be able to commercially produce such mineral deposits.

Historically, from time to time, various third parties have located or attempted to locate placer and lode claims over portions of our lode claim holdings in the Black Mountains area. As of this Report, we do not believe there are currently any valid claims conflicting with our existing claims in this area. We plan to continue to monitor for and investigate any claims that appear to conflict with our Black Mountains lode claims. We believe our claims are properly located and that we have valid and superior legal interest in these properties over any subsequent claim holders.

During the first six months of 2011, we paid a total of \$5,278 in filing fees to the BLM and Mohave County to record new claims in the Black Mountains Property. We did not incur any annual maintenance fees for our previously recorded lode claims during the first six months of 2011.

Operations

In 2008, through geology and mining engineer consultants, we developed a program of testing geological samples from our Detrital Wash property for mineralization and mapping the existing geology. Assay results from the initial phases of this program during 2008 and 2009 indicated significant copper and molybdenum mineralization in the areas of our Detrital Wash claims as well as the presence of gold and silver rich zones of mineralization along trends containing historically mined deposits. Based on these and subsequent results, we converted our claims to lode claims and have progressively modified our claim holdings to the current block in the northern Black Mountains. Our sampling, assays and mapping during 2010 showed gold mineralization to be the most prevalent of the tested minerals in our properties, with some evidence of copper, molybdenum and other minerals. As a result, we have shifted the primary focus of our exploration program to the establishment of gold reserves. During the first six months of 2011, we recorded claims located during the fourth quarter of 2010, staked and recorded additional claims in areas nearby our existing claims, and acquired the Van Deemen claims by lease agreement in a continued effort to modify our claim holdings to focus our limited financial resources on the areas that we believe hold the most significant potential for mineral reserves. We have also obtained information regarding historical exploration in the Van Deemen area and have begun efforts to compile and evaluate this information under current industry standards. See “– Exploration Program” for more information regarding our exploration program.

During the remainder of 2011, we plan to continue efforts to compile and evaluate the historical data regarding our Black Mountains Property, particularly in the Van Deemen area, along with results of our previous work. Based on the recommendations of our geologists, we may locate additional claims or release existing claims depending on our assessments of their mineral potential and available funds. We may also conduct further geochemical and geophysical testing to continue assessing the mineral reserve potential of the property if necessary and subject to available funds. We plan to continue to seek potential joint venture or other opportunities to complete the exploration work and to bring the property to the production stage should sufficient reserves be established. We also continue to consider options to raise additional capital as needed to fund our exploration program and our ongoing operating and compliance costs. We cannot guarantee that we will have, or be able to obtain, the necessary funds to complete our planned exploration activities. See “– GENERAL – Plan of Operation” and “– GENERAL – Going Concern.”

Financial Condition and Results of Operations

We have incurred substantial net losses since our inception as an exploration stage company. Our ability to generate revenue is dependent on our ability to establish the existence of mineral reserves on our properties. We have not generated any revenue during any period since the date of our inception, and unless and until we establish that such reserves exist and are able to commercial extract those reserves, we will not have any revenue from our mineral operations.

Our current management has engaged consultants who have developed an exploration plan involving various methods of geochemical and geophysical testing, in compliance with industry standards, to determine whether mineral reserves exist on our properties. We have conducted drilling, mapping and sampling activities as part of this plan, including multiple phases of assaying collected geological samples. We believe the assay results, mapping and historical exploration data obtained on our current properties warrant further exploration of our properties. See “– GENERAL – Plan of Operation.” However, further exploration work is subject to sufficient capital resources.

We intend to use our current funds to continue the compilation and evaluation of the historical and current exploration data on our properties and to substantially fund our operating and compliance costs for the remainder of 2011. However, additional funding may be needed to complete exploration work on our properties and to continue to fund our future operating and compliance costs. We cannot guarantee that we will obtain any such financing on terms that will be favorable to us or at all, or, even if such financing is obtained, that we will determine that mineral reserves exist or that we will be able to commercially exploit any reserves found on our properties. See “– GENERAL – Going Concern.”

As of June 30, 2011, our total assets, which consist solely of cash, are \$127,261. Our property and equipment are fully depreciated as of June 30, 2011. Our total assets at December 31, 2010, were \$96,315 consisting of \$96,147 in cash and \$168 in property and equipment, net of depreciation. The increase in our total assets during the six months ended June 30, 2011, is due to the \$250,000 in total funding we obtained in April 2011, which we have used to pay our exploration and other operating expenses incurred during the first six months of 2011. See “– GENERAL – Financing” for more information on the April 2011 funding. These expenses consisted largely of costs associated with our exploration program as well as legal compliance and accounting expenses. We expect to use the cash on hand at June 30, 2011, to fund our operating and compliance costs and exploration activities during the third quarter of 2011. We anticipate these funds being depleted during the fourth quarter of 2011 unless we are able to raise additional funds to support our continued operations.

Our total liabilities as of June 30, 2011, are \$1,762,207, an increase of \$179,666 over total liabilities at December 31, 2010, of \$1,582,541. This increase is largely attributable to the \$150,000 in debt financing we obtained in April 2011, along with \$48,250 in additional accrued interest on our two lines of credit obtained in December 2007 and December 2008, respectively, and the loans we obtained in October 2010 and April 2011. See Footnotes E and G in the Notes to the Consolidated Financial Statements and “– GENERAL – Financing.” The increase is also partly due to the increased value of our October 2010 loan resulting from the amortization of the loan discount, which reflects our issuance of stock warrants to the lender concurrently with our receipt of the loan, and to a slight increase in accrued expenses. These increases were offset in part by a 10% decrease in our accounts payable due to the use of available funds to pay current operating expenses during the period and certain outstanding expenses from the prior year. During the third quarter of 2011, we anticipate additional increases in accrued interest on our outstanding debt obligations and in the value of our October 2010 loan resulting from the continued amortization of the loan discount. We expect that our other liabilities during the third quarter of 2011 will be dictated primarily by costs associated with our exploration program on our Black Mountains Property and efforts to secure a joint venture or other opportunity to commercially exploit our mineral properties or to secure additional funds to continue our exploration work.

Six Months Ended June 30, 2011, Compared to Six Months Ended June 30, 2010

Net Loss. Our net loss for the six-month period ended June 30, 2011, was \$248,720, compared to a net loss of \$238,568 during the six-month period ended June 30, 2010, an increase of 4.26%. The slight increase in our net loss for the first six months of 2011 over the same period in 2010 was due primarily to increases in our mineral exploration costs, professional fees and interest expenses during the first six months of 2011 as compared to the first six months of 2010. These increases were partially offset by significantly lower compensation and management fees expense

resulting from the expense we incurred in connection with the stock options we issued during 2010.

Mineral Exploration Costs Expense. Mineral exploration costs expense for the six-month period ended June 30, 2011, was \$96,252, compared to \$73,179 for the six-month period ended June 30, 2010, an increase of \$23,073, or 31.52%. This over 30% increase primarily reflects the costs incurred during the first six months of 2010 to locate and record new claims, to acquire the Van Deemen claims and to obtain historical information regarding the Van Deemen area, as well as sampling, assaying and mapping activities. Mineral exploration costs during the first six months of 2010 consisted primarily of expenses associated with drilling work on our Black Mountains Property, including related sampling and assay costs, and new mapping of our Black Mountains Property.

Professional Fees Expense. Professional fees expense for the first six months of 2011 increased over the same period in 2010 by \$21,129, or 47.17%, to \$65,927, compared to \$44,798 during the first six months of 2010. The significant increase in professional fees for the first six months of 2011 over the same period in 2010 is primarily due to increased costs related to the preparation and filing of our annual and quarterly reports, along with expenses incurred in connection with our April 2011 financing.

Compensation and Management Fees Expense. Our compensation and management fees expense during the first half of 2011 decreased by \$56,000 from \$77,000 during the first half of 2010 to \$21,000 during the first half of 2011. This decrease is solely related to the expense incurred in 2010 as a result of our issuance of a fully vested stock option for 10,000,000 shares of our common stock to our president in April 2010 pursuant to his employment agreement. All other amounts of compensation and management fees expense for the first half of 2010 and the first half of 2011 consisted of salary to our president.

Depreciation and Amortization Expense. Depreciation and amortization expense was slightly higher during the first six months of 2011 compared to the first six months of 2010 due to our decision to fully depreciate the remaining value of our property and equipment during the first quarter of 2011.

General and Administrative Expense. Our general and administrative costs decreased by \$2,556, or 49.35%, to \$2,623 during the six-month period ended June 30, 2011, compared to \$5,179 during the six-month period ended June 30, 2010. This decrease is attributable to reduced administrative expenses in 2011 compared to 2010.

Interest Expense. During the first six months of 2011, we incurred interest expense of \$62,750 as a result of interest accruing on our two lines of credit obtained from Kilpatrick's Rose-Neath Funeral Homes, Crematorium and Cemeteries, Inc. in December 2007 and December 2008, respectively, and on our October 2010 and April 2011 loans from an unrelated third party lender. Interest expense for the first six months of 2011 also includes \$14,500 in amortized discount on our October 2010 loan resulting from our issuance of stock warrants in connection with the loan. See "– GENERAL – Financing" and Footnotes E and G in the Notes to the Consolidated Financial Statements. Our interest expense for the first six months of 2010 consisted of interest accrued on the December 2007 and December 2008 lines of credit. We have thus far been unable to repay any of these debts due to our limited funds.

Three Months Ended June 30, 2011, Compared to Three Months Ended June 30, 2010

Net Loss. Our net loss for the quarter ended June 30, 2011, was \$147,275, compared to a net loss of \$157,997 during the quarter ended June 30, 2010, a decrease of 6.79%. The decrease in our net loss for the second quarter of 2011 over the second quarter of 2010 was due to the compensation expense incurred during the second quarter of 2010 in connection with our issuance of stock options, offset in part by increases in our mineral exploration costs, professional fees and interest expenses.

Mineral Exploration Costs Expense. Mineral exploration costs expense for the three-month period ended June 30, 2011, was \$60,960, compared to \$26,759 for the three-month period ended June 30, 2010, an increase of \$34,201, or 127.81%. This over two-fold increase is primarily the result of costs we incurred during the second quarter of 2010 in connection with our acquisition of the Van Deemen claims and certain historical information regarding the Van Deemen area, along with our location of additional claims during the first half of 2011. Mineral exploration costs during the second quarter of 2010 consisted primarily of assay costs and expenses related to sampling and mapping activities on our Black Mountains Property.

Professional Fees Expense. Professional fees expense for the second quarter of 2011 was \$41,033, an increase of \$4,978, or 13.81%, over professional fees expense for the first quarter of 2010 of \$36,055. The increase is primarily due expenses incurred in connection with our April 2011 financing and costs related to compliance with new SEC

reporting requirements, offset in part by the recognition in the second quarter of 2010 of certain legal and accounting fees for which comparable expenses in 2011 were recognized in the first quarter.

Compensation and Management Fees Expense. The decrease in our compensation and management fees expense during the second quarter of 2011 as compared to the second quarter of 2010 is attributable to the \$56,000 expense incurred in April 2010 in connection with the issuance of a stock option for 10,000,000 shares of our common stock to our president. Compensation and management fees expense for the second quarter of 2011 consisted solely of salary to our president.

Depreciation and Amortization Expense. Because we fully depreciated the remaining value of our property and equipment during the first quarter of 2011, we had no depreciation and amortization expense during the second quarter of 2011.

General and Administrative Expense. Our general and administrative costs decreased by \$3,095, or 79.83%, to \$782 during the quarter ended June 30, 2011, compared to \$3,877 during the quarter ended June 30, 2010. This decrease is attributable primarily to reduced travel and administrative expenses during the second quarter of 2011 compared to the second quarter of 2010.

Interest Expense. During the second quarter of 2011, we incurred interest expense of \$34,000 as a result of interest accruing on our two lines of credit obtained from Kilpatrick's Rose-Neath Funeral Homes, Crematorium and Cemeteries, Inc. in December 2007 and December 2008, respectively, and on our October 2010 and April 2011 loans from an unrelated third party lender. Interest expense for the second quarter of 2011 also includes \$7,250 in amortized discount on our October 2010 loan resulting from our issuance of stock warrants in connection with the loan. See “– GENERAL – Financing” and Footnotes E and G in the Notes to the Consolidated Financial Statements. Our interest expense for the second quarter of 2010 consisted of interest accrued on the December 2007 and December 2008 lines of credit. We have thus far been unable to repay any of these debts due to our limited funds.

Exploration Program

In 2008, through consultants, including a geologist and a registered professional mining engineer, both of whom were “qualified persons” under NI 43-101, and an additional geologist, we developed a new exploration program for our Detrital Wash area claims of testing geological samples for the existence of minerals and mapping the existing geology. Our consultants utilized the initial results of this program obtained in 2008, which indicated the presence of copper, molybdenum and silver mineralization, to further design the exploration program to evaluate the mineral potential of our property and the viability of extracting any mineral reserves discovered.

As part of the initial phase of this exploration program, we located lode claims in the northern Black Mountains and White Hills in 2008 over or nearby our then existing placer claims in the Detrital Wash area based on evidence of mineralization in the bedrock. We concluded that the placer mineralization on the property was not economically sufficient for continued exploration at that time, and therefore, we released all of our placer claims in the Detrital Wash area in September 2008. Since 2008, we have released our White Hills claims and have progressively modified our lode claim holdings to the current block in the northern Black Mountains to focus on areas that we believe show the most potential for mineral deposits.

During 2008, we obtained historical records created by various mining companies from the 1960's through the 1980's in connection with substantial exploration conducted in the northern Black Mountains. Work completed by these companies included soil sampling, stream sampling, rock sampling and drilling, bouguer gravity surveys, and resistivity and IP (induced polarization) surveys. The historical soil, sediment and rock sampling data obtained by the Company indicated gold, copper and molybdenum mineralization on the property. Results of assays performed in 2008 by Mountain States R&D International, Inc., an Arizona registered and licensed lab (“Mountain States”), on 252 samples taken from our claims supported the historical data indicating significant copper and molybdenum mineralization in the areas of our claims.

Due to budget constraints, the assays performed in 2008 did not test for gold mineralization. However, the northern Black Mountains area includes several former gold mines, and the historical data we obtained indicates mineralization of gold in the vicinity of our claims. In March 2009, we submitted over 200 additional samples collected during our initial sampling phase and several new samples to Skyline Assayers & Laboratories in Tucson, Arizona, an Arizona registered and licensed lab (“Skyline”), to be assayed for copper, molybdenum, and silver as well as gold mineralization.

The Skyline assay results showed anomalous gold, silver, copper and molybdenum mineralization in the areas tested, as well as other indicator and pathfinder elements for both precious and base metals deposits. The results indicated the presence of gold and silver mineralization along trends containing historically mined deposits. These assays also showed improved results in copper and molybdenum values from the Company's 2008 sampling.

Based on the Mountain States and Skyline assay results data, along with historical results from previous exploration companies working the same property, we determined appropriate drilling locations for further exploration. We also staked additional lode claims and conducted follow-up soil, rock chip and channel sampling to test the extent and grade of any mineralization associated with the high value samples. The results of the assays on these samples showed mineralization generally consistent with the results of our previous assays.

During 2010, we completed a limited phase of drilling on our Black Mountains Property consisting of 10 locations where previous sampling had indicated evidence of mineralization. Samples were taken from the drill holes and nearby areas and submitted for assay at the Skyline lab in Tucson. We also conducted additional mapping of the geology in the Black Mountains Property and nearby areas and collected approximately 60 subsequent surface samples, which were assayed by ALS Chemex Labs in Reno, Nevada and submitted to our geologists for evaluation.

As a result of our 2010 drilling, sampling and mapping work, we significantly modified our claim holdings in our Black Mountains Property during the third and fourth quarters of 2010 and the first quarter of 2011. During the third quarter of 2010, we renewed with the BLM only 18 of 78 lode claims in the Black Mountains which we held prior to August 31, 2010. During the fourth quarter of 2010 and first quarter of 2011, we have staked and recorded approximately 30 new lode claims in the Black Mountains Property.

The modification of our claim holdings also reflects a decision by management, based on our 2010 exploration work, to shift the primary focus of our exploration program from copper and molybdenum targets toward exploration for gold reserves, with a secondary focus on copper, molybdenum and other minerals. As part of this current exploration phase, we have conducted additional sampling and assays in an effort to determine new drilling targets within our current claims. Samples collected in late 2010 and early 2011 were assayed by ALS Chemex Labs and showed anomalous gold mineralization along with other minerals in nearly all of the samples tested. In April 2011, we secured five additional recorded lode claims covering the former Van Deemen gold mine through a 10-year lease agreement. See “– GENERAL – Properties.” We have obtained substantial mapping, drilling and assay data regarding historical exploration work conducted on the Van Deemen area, primarily by Fischer-Watt Gold Co. and Arizona Star Resources in 1986 and 1987. Management is working with our primary geologist to compile and evaluate this data under NI 43-101 standards. We may seek to obtain any additional available historical data and conduct further exploration work as we deem necessary and as funding permits to fully evaluate the mineral reserve potential of our Black Mountains Property. This work is part of our ongoing effort to compile sufficient data to attract a joint venture or other opportunity to develop any reserves that are determined to exist on our properties. See “– GENERAL – Plan of Operation.”

Plan of Operation

We are currently working to evaluate under NI-43-101 standards the historical mapping, drilling and assay data we obtained from the Fischer-Watt Gold Co. and Arizona Star Resources work and to compile the historical data along with results of our prior exploration work on the Black Mountains Property in a digitized format. Once this work is completed, we may seek to obtain any additional available historical data on our properties and may conduct an additional limited phase of drilling and additional mapping, surface sampling and assays as management deems necessary and as funding permits to fully evaluate the potential for gold or other mineral reserves on our Black Mountains Property. We may also locate and record additional claims or release existing claims as warranted by the results of such exploration work and based on our financial resources.

Management's goal is to compile sufficient data on the Black Mountains Property to attract a joint venture or other sale or lease opportunity with a larger resource entity or investor to provide additional capital and infrastructure to complete the exploration program and bring the property to the production stage should mineral reserves be established. Upon completion of the data compilation, we intend to seek potential joint venture opportunities to fund any further exploration work needed toward the establishment of gold or other precious or base metal reserves in the Black Mountains Property and assessment of the feasibility of extracting potential mineral deposits on these properties. We may also seek other available financing options or opportunities to sell or lease our interest in our properties that we believe would be favorable to our shareholders.

Unless and until we can achieve revenues sufficient to maintain our operations, our exploration program is dependent on our ability to raise additional capital from time to time to fund our operating and exploration costs. We have secured capital which we believe will substantially fund our operating costs for the remainder of 2011. See “– GENERAL – Financing.” However, additional drilling and other substantial exploration work may require additional funds beyond our current financial resources. We cannot guarantee that we will be able to raise any necessary additional capital on terms favorable to us or at all. We also cannot assure, even if such financing is obtained, that mineral reserves will be determined to exist on our properties or that we will be able to successfully attract and consummate a joint venture to develop the property to production stage or any other opportunity to commercially exploit our properties. See “– GENERAL – Going Concern.” Our ability to establish and exploit any reserves of precious or base minerals found on our properties will depend, in part, on factors beyond our control, including technological capabilities in the mining industry, current economic conditions and the current market price of any minerals discovered.

We do not anticipate any purchase or sale of property, plant, or other significant equipment, and we do not expect any significant changes in the number of our employees. However, employees, consultants and expertise will be added to the Company as management deems necessary and when financing permits.

Financing

We do not have any revenues and continue to be dependent on debt and equity financing to meet our immediate cash needs. We continue to consider and pursue available means to fund our future operations and exploration activities, either by seeking additional capital through loans or private placements of our securities, or by entering into joint venture or similar arrangements with one or more other, more substantial companies.

On October 13, 2010 and April 25, 2011, we obtained loans of \$200,000 and \$150,000, respectively, from Beard Operating Companies, LLC (“Beard”), each of which carries simple interest at the rate of 12% per annum. All unpaid principal and accrued interest under these loans is due on December 13, 2011 (the “Maturity Date”). Under the terms of the loans, any unpaid principal will increase by 1.5 times as of the Maturity Date and will continue to accrue simple interest at a rate of 12% per annum. No payments are required until the Maturity Date; however, we have the right to prepay any amounts due to Beard at any time without penalty. The debt under these loans is secured in the aggregate by a 49% interest in the mineral rights of all mining claims owned by the Company or in which the Company has an interest in its properties located in Mohave County, Arizona, along with any future claims acquired by the Company. At our election, we may convert the security interest to a priority security interest on 49% of our share of proceeds from any joint venture or licensing agreement with respect to the mining claims, subject to certain conditions. In the event we default, Beard may institute legal action against us. In such event, Beard would be entitled to its collection costs, including attorney fees not to exceed 20% of the amount sought to be collected.

In connection with the October 2010 and April 2011 loans, we issued to Beard warrants to purchase up to 20,000,000 shares and 15,000,000 shares, respectively, of our common stock at an exercise price of \$0.01 per share payable in cash or by a reduction of the principal amount owed on the debt equal to the exercise price, or by a combination thereof. The warrants expire on the later of the second anniversary of the date of issuance or the date all principal due to Beard is fully paid. In addition, we granted certain piggyback registration rights under which Beard may register for resale shares held by Beard if we propose to register shares of our common stock (or any security which is convertible into or exchangeable or exercisable for common stock) under the Securities Act of 1933 (the “Securities Act”). We have no present plans to pursue a registered public offering of our common stock. See “UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.”

However, concurrently with the April 25, 2011 loan, we sold to Beaird 12,500,000 shares of our common stock at a price of \$0.008 per share for an aggregate of \$100,000. These shares were not issued in connection with the exercise of any stock warrants previously issued to Beaird. See “UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.” We did not obtain any additional funds through sales of our equity securities during the second quarter of 2011.

Historically, certain of our directors have from time to time advanced funds to our Company for the payment of operating expenses. These advances have been repaid in cash and through the issuance of restricted shares of our common stock. During 2009, our Chairman of the Board paid certain corporate filing fees and annual maintenance fees on our mining claims on behalf of the Company in an aggregate amount of \$16,817. In 2009 and 2010, our Chairman advanced an aggregate of \$183,183 in additional funds to the Company to be used as working capital. We have agreed to reimburse the Chairman for these advanced funds. As of this Report, we have not made any reimbursement payments to the Chairman for the advanced funds.

The Company has in the past obtained debt financing through lines of credit obtained from Kilpatrick’s Rose-Neath Funeral Homes, Crematorium and Cemeteries, Inc. (“KRFH”). We currently have outstanding principal balances of \$500,000 and \$200,000 from two lines of credit obtained from KRFH in December 2007 and December 2008, respectively. These funds were used to pay our operating and exploration expenses during 2008 and 2009, and no additional funds are available under these lines of credit. Our December 2008 line of credit became due on March 31, 2009, and our December 2007 line of credit becomes due on December 3, 2012. As of June 30, 2011, we owe \$90,000 and \$84,950, respectively, in interest on these two lines of credit. See Footnote E to the Financial Statements for more information regarding our lines of credit from KRFH.

Our Chairman of the Board, Ms. Virginia Shehee, may be deemed the beneficial owner of over 50% of the outstanding shares of KRFH due to the voting power she has obtained pursuant to a voting agreement. Due to the voting power she has obtained pursuant to a similar voting agreement, Ms. Shehee may also be deemed the beneficial owner of over 50% of the outstanding shares of Kilpatrick Life Insurance Company (“KLIC”), one of our major shareholders. Ms. Shehee serves as Chairman of the Board of KLIC and until July 1, 2008, served as its President and Chief Executive Officer. KLIC also employs as its Corporate Secretary Ms. Jacquelyn Wine. Ms. Wine is our Secretary, Treasurer/Chief Financial Officer and one of our directors.

We used the funds obtained from the October 2010 and April 2011 Beaird loans and stock issuance to fund our exploration and operating costs during the first six months of 2011. We plan to continue using the proceeds of our April 2011 Beaird loan and stock issuance to substantially fund our exploration and operating costs for the remainder of 2011. We do not anticipate achieving any revenues through the third quarter of 2011. We plan to seek additional funds through debt or equity financing as needed to continue our operations and to service our debt obligations from the Beaird loans and our December 2007 and December 2008 lines of credit. We can provide no assurance that we will be able to achieve sufficient revenues or raise the funds necessary for the repayment of these loans and for our continued operations on terms favorable to us or at all.

LIQUIDITY

Liquidity and Capital Resources

	Six months ended June 30,	
	2011	2010
Net cash used in operating activities	\$ (218,886)	\$ (127,341)
Net cash provided by investing activities	—	—
Net cash provided by financing activities	250,000	83,183

General

Overall, we had positive cash flows of \$31,114 for the six months ended June 30, 2011, resulting from \$250,000 in cash provided by our financing activities, offset by \$218,886 in cash used in our operating activities. No cash was provided by investing activities during the six months ended June 30, 2011. For the six months ended June 30, 2010, we had negative cash flows of \$44,158. The significant difference in cash flows for the six-month period ended June 30, 2011, versus the same period in 2010 primarily reflects the \$250,000 in funds we obtained in April 2011 compared to \$83,183 in funding we obtained during the first six months of 2010. This was reduced by significantly higher net cash used in operating activities during the first six months of 2011 compared to the interim period in 2010.

Cash Used in Our Operating Activities

For the six-month period ended June 30, 2011, net cash used in our operating activities was \$218,886, an increase of \$91,545, or 71.89%, from the same period in 2010. This significant increase was due primarily to the compensation expense we recognized in 2010 when we issued the stock option to our president and to our use of current funds in 2011 to pay down outstanding accounts payable and accrued expenses. The increase was partially offset by the accrued interest on our December 2007 and December 2008 lines of credit and our October 2010 and April 2011 loans, as well as the amortization of the loan discount on our October 2010 loan.

Cash Provided by Our Financing Activities

Net cash provided by our financing activities during the six-month period ended June 30, 2011, consisted of the \$150,000 loan and the \$100,000 common stock purchase by Beaird Operating Companies. This reflects an increase of \$166,817 as compared to net cash provided by financing activities during the six months ended June 30, 2010. Net cash provided by our financing activities during the six-month period ended June 30, 2010, was comprised of \$50,000 and \$33,183 in cash advances provided by our Chairman in January 2010 and April 2010, respectively.

Internal Sources of Liquidity

For the six-month period ended June 30, 2011, the funds generated from our operations were insufficient to fund our daily operations. We can provide no assurance that funds from our operations will meet the requirements of our daily operations in the future. Unless and until funds from our operations are sufficient to meet our operating requirements, we will continue to need to seek other sources of financing to maintain liquidity.

External Sources of Liquidity

Because we have been unable to generate revenues from operations, we must rely on external sources of liquidity to fund our our daily operations.

We obtained loans of \$200,000 and \$150,000 from Beaird on October 13, 2010 and April 25, 2011, respectively. In connection with the April 2011 loan, we also sold to Beaird shares of our common stock in the amount of \$100,000. See “– GENERAL – Financing” and “UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.” We used the funds from the October 2010 loan and a portion of the funds from the April 2011 loan and stock issuance to pay our operating expenses and exploration costs during the first six months of 2011. We plan to use the remainder of the proceeds from the April 2011 loan and stock issuance to substantially fund our exploration work and operating expenses during the remainder of 2011.

We continue to consider potential financing options to secure funds to continue our operations and exploration program and to fund our repayment of our debt obligations until we are able to achieve sufficient revenues from our

mineral properties to sustain our business. Our management will review any financing options at its disposal and will judge each potential source of funds on its individual merits. We can provide no assurance that we will be able to generate sufficient revenues to sustain our operations or raise additional funds on terms favorable to us or at all. See “GENERAL – Going Concern.”

Inflation

Management believes that inflation has not had a material effect on our results of operations in the second quarter of 2011, and does not expect that it will in the third quarter of 2011, except to the extent any significant increases in fuel and energy prices could materially and adversely impact the Company by increasing costs for our exploration program and any travel related expenses.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures.

Our management evaluated, with the participation of our President and our Treasurer/Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q, June 30, 2011. Based on this evaluation, our President and our Treasurer/Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report were effective in timely alerting management to material information relating to us and required to be included in our periodic filings with the SEC.

Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in our periodic reports under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our periodic reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b) Internal Control over Financial Reporting

There was no change in our internal control that occurred during the three-month period ended June 30, 2011, that has materially affected, or is reasonably likely to affect, the Company's internal control over financial reporting.

PART II

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time we may be involved in legal proceedings relating to claims arising out of operations in the normal course of business, as well as claims arising from our status as an issuer of securities and/or a publicly reporting company. At June 30, 2011, we know of no current or threatened legal proceedings involving us or our properties reportable under this Item 1.

ITEM 1A. RISK FACTORS

As of June 30, 2011, there were no material changes from the risk factors set forth in Part I, Item 1A, "Risk Factors," of our Form 10-K for the year ended December 31, 2010. See the discussion of our risk factors in the Form 10-K, as filed with the SEC. The risks described are not the only risks facing the Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On April 25, 2011, in connection with the \$150,000 loan received from Beard, we issued warrants to Beard to purchase up to 15,000,000 shares of our common stock at an exercise price of \$0.01 per share payable in cash or by a reduction of the principal amount owed on the debt equal to the exercise price, or by a combination thereof. See “MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS – GENERAL – Financing” for more information regarding this loan. We believe the issuance of these securities was exempt from registration under Rule 506 of Regulation D promulgated under Section 4(2) of the Securities Act. The warrants expire on the later of the second anniversary of the date of issuance or the date all principal due to the lender is fully paid. The warrants are not transferable. In addition, we granted certain piggyback registration rights under which the lender may register for resale shares held by the lender if we propose to register shares of our common stock (or any security which is convertible into or exchangeable or exercisable for common stock) under the Securities Act.

In addition, on April 25, 2011, concurrently with the loan transaction described above, we sold to Beard 12,500,000 shares of our common stock at a price of \$0.008 per share for an aggregate of \$100,000. We believe the issuance of these securities was exempt from registration under Rule 506 of Regulation D promulgated under Section 4(2) of the Securities Act. These shares were not issued in connection with the exercise of any stock warrants previously issued to Beard.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. (RESERVED)

ITEM 5. OTHER INFORMATION

None.
