

FRANKLIN FLOATING RATE TRUST

Form N-30D

April 03, 2002

SHAREHOLDER LETTER

YOUR FUND'S GOAL: FRANKLIN FLOATING RATE TRUST'S PRIMARY GOAL IS TO PROVIDE AS HIGH A LEVEL OF CURRENT INCOME AND PRESERVATION OF CAPITAL AS IS CONSISTENT WITH INVESTMENT PRIMARILY IN SENIOR SECURED CORPORATE LOANS AND CORPORATE DEBT SECURITIES WITH FLOATING INTEREST RATES.

Dear Shareholder:

This semiannual report for Franklin Floating Rate Trust covers the period ended January 31, 2002.

ECONOMIC OVERVIEW

After a sluggish start to 2001, the U.S. economy slowed further and entered a recession in the second half of the year as businesses cut down on expenditures and scaled back production. The terrorist attacks of September 11 only exacerbated the downturn. The Federal Reserve Board (the Fed), having anticipated the potential slowdown early in the year, continued its campaign of cutting short-term interest rates, lowering the federal funds target rate to just 1.75% on January 31, 2002, from 3.75% at the beginning of the period.

The dollar value, number of shares or principal value, and complete legal titles of all portfolio holdings are listed in the Fund's Statement of Investments (SOI). The SOI begins on page 10.

WHAT ARE SYNDICATED BANK LOANS?

SYNDICATED BANK LOANS ARE TYPICALLY SECURED, FLOATING RATE LOANS TO CORPORATE BORROWERS MADE BY A GROUP, OR SYNDICATE, OF BANKS AND OTHER LENDERS. A GROUP OF LENDERS PROVIDES CAPITAL TO COMPANIES FOR VARIED PURPOSES, SUCH AS MERGER AND ACQUISITION ACTIVITY, LEVERAGED BUYOUTS OR REFINANCINGS. BORROWING RATES ARE GENERALLY PEGGED TO AN INDEX, SUCH AS LIBOR, THE LONDON INTERBANK OFFERED RATE.

Long-term interest rates were flat during the six months under review, with the 10-year Treasury note yield ending the period where it began, at 5.07%. Short-term interest rates, as measured by the 3-month London InterBank Offered Rate (LIBOR), the benchmark underlying many of the Trust's floating rate loans, fell substantially, to 1.88% on January 31, 2002, down from 3.67% on July 31, 2001. Equity markets fluctuated wildly during the period, but remained range bound. At period-end, the Dow Jones Industrial Average stood at 9920.00, compared with 10522.80 at the beginning of the period.¹

SYNDICATED BANK LOAN MARKET

The second half of 2001 was challenging for the bank loan asset class, as yield and asset value declines negatively impacted returns. September and October were two of the worst-performing months ever for the syndicated bank loan market with returns of -2.00% and -1.60%. Loan prices began to fall following the events of September 11, as investors priced in the certainty of a recession and realized that loan credit quality would most likely continue to deteriorate. Investors shunned higher risk, single B-rated names in favor of loans closer to investment-grade quality. Although the new-issue market did not shut down completely, most lower-rated deals remained on the sidelines. Moody's(R), an independent credit rating agency, added to this dire outlook when it increased its peak default rate forecast. The market punished specific sectors, including lodging and transportation, whose

1. Source: Standard & Poor's Micropal. The Dow Jones Industrial Average is price-weighted based on the average market price of 30 blue chip stocks. Total return, calculated by Wilshire Associates, Inc., includes reinvested dividends.

2

businesses fell due to the attacks, and telecommunications, which was suffering from overcapacity and too little demand.

In November, the loan market recovered, taking its cue from the equity and high yield bond market recoveries in October, and posted a 1.60% gain. The secondary

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

market's turnaround benefited from strong money inflows largely due to a number of new institutional investors. The dearth of primary market issuance after September forced investors to look to the secondary market for opportunities as well.

Although financial markets seemed to have stabilized since September 11, the economic slowdown and difficult environment for loans persisted throughout the period. In particular, credit quality continued to deteriorate. According to Standard & Poor's Portfolio Management Data, 11 issuers defaulted during the fourth quarter, setting a new quarterly record for high yield bond and loan defaults. Credit agency downgrades also outpaced upgrades by 9.5 times among high yield borrowers.

Borrowers started to demand concessions from lenders through amendments and waivers to help them get through the difficult times. Furthermore, low interest rates, as a result of the Fed's attempts to stimulate the economy, reduced yields. Short-term interest rates plummeted to their lowest levels in decades, with the three-month LIBOR falling below 2.00%, sharply reducing the interest paid by borrowers.

PORTFOLIO NOTES

Within this challenging environment, Franklin Floating Rate Trust posted a -0.70% cumulative total return for the six months ended January 31, 2002, as shown in the Performance Summary on page 8. The Fund's share price, as measured by net asset value, declined from \$9.24 on July 31, 2001, to \$8.85 at period-end, with the bulk of the decline occurring after the September 11 attacks.

During the six months under review, we continued to pursue our strategy of focusing on providing loans to companies with strong franchise value and asset coverage. Consistent with that approach, we added to our investments in the bank debt of Mission Energy Holding, parent company of Edison Mission Energy (EME), one of the world's largest independent electricity producers. EME's portfolio of power projects includes 33 domestic and 40 international power projects with aggregate generation capacity of 28,036 megawatts. EME also markets energy and manages risks associated with energy price fluctuations. A significant portion of the capacity and output from EME's facilities is sold under long-term contracts, providing more predictable revenue streams.

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

As a subsidiary of California utility Edison International, EME approached the bank loan market during a difficult period, with the entire California utility sector under pressure and facing uncertainty. Under these circumstances, the company had to pay lenders a significant interest rate over LIBOR. Eventually, the improvement in California's energy market, which also benefited EME's credit profile, caused the loans to trade at a significant premium over the par price, resulting in a healthy profit for the Fund.

4

The Trust also added to investments in the \$900 million senior secured credit facility of Extended Stay America (ESA), which the company used to refinance outstanding debt. ESA, the fastest-growing hotel chain in U.S. history, operates 432 extended-stay lodging hotels in 41 states. ESA has a different business model than a typical hotel, which we view as more defensive. Three-quarters of the company's customers travel by car, and the average length of stay is significantly longer than at a typical leisure hotel. Also, ESA is geographically dispersed with a broad customer base and does not cater to large groups in urban areas. We believe ESA is well-positioned to weather further economic weakness due to its strong balance sheet, ample liquidity and unique business model.

During the reporting period, we also invested in the \$225 million term loan of the Newkirk Master Limited Partnership, a real estate joint venture owned by three well-respected investment companies. The Newkirk partnerships own 242 properties throughout 35 states and are well diversified across various property types including retail, office and industrial, with virtually no lodging exposure. We considered this investment attractive because of its strong management team and property diversification, and the fact that approximately 80% of the properties are leased to investment grade tenants, giving us confidence that there will be a reliable stream of lease payments to service the term debt.

As the economic downturn became more pronounced, we began to position the Fund more defensively and made various investments in the food industry. We participated in one of the industry's larger mergers when Suiza Foods Company acquired Dean

5

Foods and formed a national dairy and foods company. As a result of the merger, the new Dean Foods company is now the country's largest fluid milk processor and third-largest ice cream processor. We noted that the \$25 billion U.S. dairy industry is a mature but highly fragmented industry with excess capacity and that these factors have driven consolidation in recent years. We liked the company because the combined entity is the only company in the U.S. with a nationwide capacity for fluid dairy product distribution.

Looking forward, we will maintain our strategy of holding loans from companies that we believe possess defensive market positions and strong asset coverage in industries that we feel will do well even during periods of economic decline. With its relatively stable share price and potential for high, current income,

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

we believe the Fund is an attractive investment for investors seeking to diversify portfolios heavily weighted in equities.

6

We appreciate your investment in Franklin Floating Rate Trust and welcome any comments or suggestions you might have.

Sincerely,

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

Shares repurchased within 12 months of investment are subject to 1% early withdrawal charge. The Fund's manager agreed in advance to waive a portion of its management fees. If the manager had not taken this action, the Fund's total return would have been lower. The fee waiver may be discontinued at any time, upon notice to the Fund's Board of Trustees.

1. Cumulative total return represents the change in value of an investment over the periods indicated and does not include the early withdrawal charge.

2. Average annual total return represents the average annual change in value of an investment over the periods indicated and includes the 1% early withdrawal charge, assuming shares were redeemed within 12 months of purchase. Six-month return has not been annualized.

3. In accordance with SEC rules, we provide standardized average annual total return information through the latest calendar quarter.

4. The distribution rate is based on the annualization of daily distributions totaling 4.5274 cents per share during the last 30 days of January and the \$8.85 NAV on 1/31/02.

5. Yield, calculated as required by the SEC, is based on the earnings of the Fund's portfolio for the 30 days ended 1/31/02.

8 Past performance does not guarantee future results.

FRANKLIN FLOATING RATE TRUST
Notes to Financial Statements (unaudited)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Franklin Floating Rate Trust (the Fund) is registered under the Investment Company Act of 1940 as a non-diversified, closed-end, continuously offered investment company. The Fund seeks current income and preservation of capital. The following summarizes the Fund's significant accounting policies.

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

A. SECURITY VALUATION:

The Fund invests primarily in senior secured corporate loans and senior secured debt that meet credit standards established by Franklin Advisers, Inc. The Fund values its securities based on quotations provided by banks, broker/dealers or pricing services experienced in such matters. Restricted securities and securities for which market quotations are not readily available are valued at fair value as determined by management in accordance with procedures established by the Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION:

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of securities and income items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollars equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. INCOME TAXES:

No provision has been made for income taxes because the Fund's policy is to qualify as a regulated investment company under the Internal Revenue Code and to distribute substantially all of its taxable income.

D. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS:

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Discount from securities is amortized on a yield to maturity basis. Facility fees received are recognized as income over the expected term of the loan. Dividend income and distributions to shareholders are recorded on the ex-dividend date.

E. ORGANIZATION COSTS:

Organization costs are amortized on a straight-line basis over five years.

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONT.)

F. ACCOUNTING ESTIMATES:

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expense during the reporting period. Actual results could differ from those estimates.

G. LINE OF CREDIT:

During the period ended January 31, 2002, the Fund borrowed \$100 million under various credit facilities and paid \$122,757 in interest and commitment fee expenses.

On December 21, 2001, the Fund terminated all existing credit facilities and entered into, along with certain other Franklin Templeton Funds, a \$200 million senior unsecured credit facility for the purpose of funding shareholder redemptions. The termination date of this agreement is December 20, 2002. Interest expense is calculated on the Fund's borrowings at market rates. Commitment fees are allocated amongst the participating funds based on the relative proportion of net assets of each fund and are accrued at a rate of .09% per year. At January 31, 2002, the Fund had not utilized this credit facility.

H. AUDIT GUIDE:

In November 2000, a revised AICPA Audit and Accounting Guide, Audits of Investment Companies, was issued, and is effective for fiscal years beginning after December 15, 2000. The revised Guide requires the Fund to amortize all premium and discount on fixed-income securities. Such amortization is included in net investment income but did not impact the net assets or the distributions of the Fund. Prior to August 1, 2001, premiums on fixed income securities were included in realized gains and losses. The cumulative effect of this accounting change resulted in a reduction of \$58,234 in the recorded cost of investments and a corresponding increase in net unrealized appreciation.

The effect of this change for the period ended January 31, 2002 was to decrease net investment income by \$59,746, increase unrealized gains by \$34,033, and increase realized gains by \$25,724. The statement of changes in net assets and the financial highlights for prior periods have not been restated to reflect this change in accounting policy.

2. SHARES OF BENEFICIAL INTEREST

The Fund may, on a quarterly basis, make tender offers at net asset value for the repurchase of a portion of the common shares outstanding. The price will be established as of the close of business on the day the tender offer ends. An early withdrawal charge may be imposed on shares offered for tender which have been held for less than twelve months.

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

FRANKLIN FLOATING RATE TRUST

Notes to Financial Statements (unaudited) (CONTINUED)

2. SHARES OF BENEFICIAL INTEREST (CONT.)

At January 31, 2002, there were an unlimited number of shares authorized (\$.01 par value). Transactions in the Fund's shares were as follows:

	PERIOD ENDED JANUARY 31, 2002		YEAR ENDED JULY 31, 2001	
	SHARES	AMOUNT	SHARES	AMOUNT
Shares sold	16,520,350	\$ 149,078,831	135,483,175	\$ 1,490,788,311
Shares issued in reinvestment of distributions ..	6,625,895	59,201,766	19,247,577	1,727,882,055
Shares redeemed	(82,739,020)	(735,916,634)	(106,217,953)	(956,827,367)
Net increase (decrease)	(59,592,775)	\$(527,636,037)	48,512,799	\$ 463,752,999

3. TRANSACTIONS WITH AFFILIATES

Certain officers and trustees of the Fund are also officers and/or directors of Franklin Advisers, Inc. (Advisers), Franklin/Templeton Distributors, Inc. (Distributors), Franklin Templeton Services, LLC (FT Services) and Franklin/Templeton Investor Services, LLC (Investor Services), the Fund's investment manager, principal underwriter, administrative manager and transfer agent, respectively.

The Fund pays an investment management fee to Advisers of .80% per year of the average daily net assets of the Fund.

Management fees were reduced on assets invested in the Sweep Money Fund.

Distributors received contingent deferred sales charges for the period of \$864,712.

The Fund pays an administrative fee to FT Services based on the net assets of the Fund as follows:

ANNUALIZED FEE RATE	AVERAGE DAILY NET ASSETS
.150%	First \$200 million
.135%	Over \$200 million, up to and including \$700 million
.100%	Over \$700 million, up to and including \$1.2 billion
.075%	In excess of \$1.2 billion

The Fund pays a transfer agent fee to Investor Services of .40% per year of the average daily net assets of the Fund.

4. INCOME TAXES

At January 31, 2002, the unrealized depreciation based on the cost of

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

investments for income tax purposes of \$2,601,169,950 was as follows:

Unrealized appreciation	\$ 25,897,647
Unrealized depreciation	(358,717,100)

Net unrealized depreciation	\$ (332,819,453)
	=====

26

FRANKLIN FLOATING RATE TRUST

Notes to Financial Statements (unaudited) (CONTINUED)

4. INCOME TAXES (CONT.)

At July 31, 2001, the Fund had tax basis capital losses of \$4,581,379 which may be carried over to offset future capital gains. Such losses expire in 2008.

At July 31, 2001, the Fund has deferred capital losses occurring subsequent to October 31, 2000 of \$2,231,923. For tax purposes, such losses will be reflected in the year ending July 31, 2002.

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of defaulted securities, foreign currency transactions, and bond premiums.

Net realized capital losses differ for financial statement and tax purposes primarily due to differing treatment of wash sales, foreign currency transactions, and bond premiums.

5. INVESTMENT TRANSACTIONS

Purchases and sales of securities (excluding short-term securities) for the period ended January 31, 2002 aggregated \$702,869,234 and \$1,185,559,917, respectively.

6. CREDIT RISK AND DEFAULTED SECURITIES

The Fund has 6.05% of its portfolio invested in below investment grade and comparable quality unrated high yield securities, which tend to be more sensitive to economic conditions rather than higher rated securities. At January 31, 2002, the Fund held defaulted securities with a value aggregating \$189,145,791 representing 8.65% of the Fund's net assets. For information as to specific securities, see the accompanying Statement of Investments.

For financial reporting purposes, the Fund discontinues accruing income on defaulted bonds and provides an estimate for losses on interest receivable.

7. RESTRICTED SECURITIES

The fund may purchase securities through a private offering that generally

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

cannot be resold to the public without prior registration under the Securities Act of 1933. The costs of registering such securities are paid by the issuer. At January 31, 2002, the Fund held one restricted security as follows:

SHARES	ISSUER	ACQUISITION		
		DATE	COST	VALUE
72,960	Rivus Internet Group Inc.	5/10/00	\$18,240	\$--
