-

Item 8.01 Other Events.

Idaho Power Cost Adjustment Filing

On April 15, 2011, Idaho Power Company (Idaho Power) made its annual power cost adjustment (PCA) filing with the Idaho Public Utilities Commission (IPUC). The PCA tracks Idaho Power s actual net power supply costs (primarily fuel and purchased power less off-system sales) and compares these amounts to net power supply costs currently being recovered in retail rates. In its application, Idaho Power requested a \$40.5 million reduction to current PCA rates, effective for the period from June 1, 2011 to May 31, 2012. The requested reduction to current PCA rates was net of Idaho Power s additional request in the application to recover in PCA rates \$10.0 million of Idaho Power s energy efficiency rider deferral balance that the IPUC had previously deemed prudently incurred and had authorized for recovery in Idaho Power s PCA rates.

If Idaho Power s applications are approved as filed, the rate increases Idaho Power had requested from the IPUC in its March 15, 2011 fixed cost adjustment mechanism and pension contribution recovery applications will be more than offset by the PCA rate decrease requested in its April 15, 2011 application.
