NEW JERSEY MINING COMPANY
NOTES TO FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation:

The unaudited financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America for interim financial information, as well as the instructions to Form 10-QSB. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation of the interim financial statements have been included. Operating results for the nine month period ended September 30, 2005, are not necessarily indicative of the results that may be expected for the full year ending December 31, 2005.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-KSB/A for the year ended December 31, 2004.

The Company presents its financial statements in accordance with SFAS No. 7, Accounting for Development Stage Entities, as Management believes that while the Company's planned principal operations have commenced, the revenue generated from them is not sufficient to cover all corporate costs. Additional exploration and development of the Company's properties is required to report as an entity not in the development stage.

2. Description of Business

New Jersey Mining Company (the Company) was incorporated as an Idaho corporation on July 18, 1996. The Company's primary business is exploring for and developing gold, silver and base metal mining resources in Idaho.

3. Net Loss Per Share

Statement of Financial Accounting Standards No. 128, Earnings per Share, requires dual presentation of basic earnings per share (EPS) and diluted EPS on the face of income statements for all entities with complex capital structures. Basic EPS is computed as net income divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock options, warrants, and other convertible securities. For the three and nine month periods ended September 30, 2005 and 2004, the effect of the Company's outstanding options and common stock equivalents would have been anti-dilutive. Accordingly, only basic EPS is presented.

4. Revenue Recognition

Revenue is recognized when title and risk of ownership of metals or metal bearing concentrate have passed and collection is reasonably assured. Revenue from the sale of metals may be subject to adjustment upon final settlement of estimated metal prices, weights and assays, and are recorded as adjustments to revenue in the period of final settlement of prices, weights and assays; such adjustments are typically not material in relation to the initial invoice amounts.

5. Inventory

Dore' and concentrate inventories are stated at the lower of cost or net realizable value determined by using a weighted average method.

6. Reclassifications

Certain prior period amounts have been reclassified to conform to the 2005 statement of operations presentation. These reclassifications have no effect on net loss as previously reported.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

This report contains both historical and prospective statements concerning the Company and its operations. Prospective statements (known as "forward-looking statements") may or may not prove true with the passage of time because of future risks and uncertainties. The Company cannot predict what factors might cause actual results to differ materially from those indicated by prospective statements.

The Company is executing its strategy to conduct small-scale mining and mineral processing operations on higher grade ore reserves it has located on its exploration properties while it is in the exploration stage. The financial strategy is to generate cash from these operations to pay for corporate expenses and to provide additional funds for exploration, thus reducing the need to raise funds through financing activities including sale of common stock. The Company plans to continue exploration for gold, silver and base metal deposits in the greater Coeur d'Alene Mining District of northern Idaho. The Company has three mines at which most exploration is being conducted; the Golden Chest, the New Jersey, and the Silver Strand. Production of gold ore is in progress at the Golden Chest mine. Permitting has been completed and production of silver-gold ore may occur at the Silver Strand mine in 2006. Production from lower grade reserves at the New Jersey mine is being deferred until more exploration has been completed.

Financial Condition

The Company maintains a minimal cash balance by increasing or decreasing its exploration expenditures as limited by availability of cash from operations or from financing activities. The cash balance at the end of the present quarter is \$78,128, and Figure 1 shows the corresponding balances for previous accounting periods.

[The balance of this page has been intentionally left blank.]

Based on the current cash balance and assuming operations at the Golden Chest continue, Management expects to have the financial resources to stay in business for at least 18 months.

Results of Operations

Operations at the Golden Chest, an exploration property, only commenced in the second quarter of 2005 so comparisons to previous periods are not relevant. The gross profit (loss) from operations in the present quarter was \$(1,257) and it was \$(64,507) year to date. There was significant other income of \$40,393 in the present quarter, largely from the sale of logs from Company property, which may not recur again for several years. Figure 2 shows the net loss for the present quarter of \$73,523 and the net losses in previous accounting periods.

Gold production in pyrite concentrates and bullion was 348 ounces in the third quarter and 495 ounces year to date. Gold production is expected to range from 300 to 400 ounces per quarter during the next four quarters. Revenues were \$98,061 in the third quarter and \$153,308 year to date. There are no comparisons to production for the prior year since operations commenced in 2005.

Mining operations at the Golden Chest mine are projected to continue for approximately 18 months based on existing ore reserves. Efforts are being made to expand the amount of ore reserves in parallel veins and separate ore shoots, but no assurance can be made at this time whether additional reserves will be found.

Mining and mineral processing operations have not been done yet through the coldest winter months from mid-December to mid-February. Operating difficulties could arise during this period which would have an adverse effect on results of operations. To help mitigate effects of winter, efforts have been made to winterize operations. Mineral processing equipment would be cleaned during such a period of weather, and historically, significant amounts of gold have been recovered during such cleanouts.

Mining operations could start at the Silver Strand mine in 2006, however a capital expenditure of approximately \$250,000 will be required to bring the mine into production. No additional capital expenditures are expected for the mineral processing plant. The source of this additional capital has not yet been determined. Operating results at the Silver Strand mine will depend upon the price of silver as well as gold. Present silver and gold prices are sufficient in management's estimation to generate a gross profit at the Silver Strand mine based on the operating plan which was part of the permitting process.

The amount of money to be spent on exploration at the Company's mines and prospects will depend upon the amount of gross profit generated by operations and the amount of money raised by financing activities. Basically, management expects to be able to continue the present operating scenario at the Golden Chest mine and mineral processing plant for 18 months, but expanded exploration activities will depend upon the results of financing activities.

Item 3. Controls and Procedures

An evaluation was performed by the Company's president and principal financial officer of the effectiveness of the design and operation of our disclosure controls and procedures. And on that evaluation, the Company's president and principal financial officer concluded that disclosure controls and procedures were effective as of September 30, 2005, in ensuring that all material information required to be filed in this quarterly report has been made known to them in a timely fashion.

There has been no change in our internal controls over financial reporting during the quarter ended September 30, 2005 that has materially affected, or is reasonable likely to materially affect, the Company's internal controls over financial reporting.

[The balance of this page has been intentionally left blank.]

PART II - OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

None

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Neither the constituent instruments defining the rights of the registrant's securities filers nor the rights evidenced by the registrant's outstanding common stock have been modified, limited or qualified.

During the third quarter of 2005, the Company made an offer to certain accredited and sophisticated investors. No underwriter or brokers were involved in the sale and, therefore, no commissions were paid. Units were sold for \$0.40 and each unit consisted of one share of common stock plus one warrant exercisable to purchase one common share for \$0.60 per share until June 1, 2010. A total of 270,250 units were sold in the period ending September 30, 2005 for \$108,100. Both the common stock and the common stock underlying the warrant are restricted as defined under Rule 144. In Management's opinion, the offer and sale of the securities were made in reliance on exemptions from registration provided by Section 4(2) and Rule 506 of Regulation D of the Securities Act of 1933, as amended and other applicable Federal and state securities laws.

The Company issued 80,000 shares of restricted common stock to President Fred W. Brackebusch for management services rendered in the third quarter of 2005. The shares were valued at a price of \$0.40 per share. In Management's opinion, the securities were issued pursuant to exemption from registration under Section 4(2) of the Securities Act of 1933, as amended.

The Company issued 3,750 shares of restricted common stock to Mine Systems Design, Inc., a company controlled by our President, Fred W. Brackebusch, for office rent in the third quarter of 2005. The shares issued were valued at a price of \$0.40 per share. In Management's opinion, the securities were issued pursuant to exemptions from registration under Section 4(2) of the Securities Act of 1933, as amended.

During the third quarter of 2005, the Company issued 18,965 shares at an average price of \$0.48 to various accredited and sophisticated individuals for goods and services. In Management's opinion, the securities were issued pursuant to exemptions from registration under Section 4(2) of the Securities Act of 1933, as amended.

Item 3. DEFAULTS UPON SENIOR SECURITIES

The registrant has no outstanding senior securities.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None

Item 5. OTHER INFORMATION

None

Item 6. EXHIBITS AND REPORTS ON FORM 8-K

Exhibit

Number Description

31.1 Certification pursuant to Section 906 of the Sarbanes-Oxley act of 2002.

32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Reports on Form 8-K.

None.

[The balance of this page has been intentionally left blank.]

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
