ANGELICA CORPORATION AND SUBSIDIARIES<br>NOTES TO CONSOLIDATED FINANCIAL STATEMENTS<br>QUARTER ENDED APRIL 28, 2001

```
(1) The accompanying consolidated condensed financial statements are unaudited, and it is suggested that these consolidated statements be read in conjunction with the fiscal 2001 Annual Report, including Notes to Financial Statements. However, it is the opinion of the Company that all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of the results during the
```

interim period have been included. Company considers short-term, highly liquid investments which are readily convertible into cash, as cash equivalents.

## ANGELICA CORPORATION AND SUBSIDIARIES

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF OPERATIONS

AND FINANCIAL CONDITION

QUARTER ENDED APRIL 28, 2001

Analysis of Operations
------------------------1

Combined sales and textile service revenues showed improvement over the comparable prior year period for the third quarter in a row, increasing 5.5 percent in the quarter. First quarter sales and revenues were up over last year for each of the three business segments for the second consecutive quarter. However, earnings of $\$ .17$ per share in the first quarter were lower than the $\$ .18$ per share earned in last year's first quarter as results continue to be negatively affected by extraordinary increases in energy costs, especially in the State of California. Consolidated net income decreased 8.1 percent to $\$ 1,449,000$ from $\$ 1,577,000$ last year.

Revenues of the Textile Services segment increased 7.9 percent in the first quarter, as net new business additions remained strong. Earnings of this segment increased 8.8 percent in the quarter as better management of linen costs and productivity improvements from installation of labor-saving equipment helped offset the sharply higher energy costs. First quarter results of this segment were also aided by a $\$ 500,000$ gain on the sale of a small number of unproductive hospitality accounts. Although sales of the Manufacturing and Marketing segment increased 4.5 percent, the increase was below expectations due largely to the lower level of new program rollouts. In addition, about half of the sales increase was from intersegment sales which are at lower gross margins than sales to third parties. As a result, first quarter earnings of this segment decreased 31.6 percent, despite another strong quarter for the smaller Canadian operations of this segment. Life Retail Stores had a 2.6 percent increase in first quarter
sales, as a result of a small 1.5 percent same-store sales increase and the opening of ten new stores during the quarter. However, the sales increase was insufficient to overcome normal operating cost increases, the negative short-term impact on earnings from the new store openings, and higher start-up costs for the catalogue and e-commerce distribution channels. Therefore, this segment posted an operating loss of $\$ 61,000$ compared with earnings of $\$ 543,000$ in the first quarter last year. Efforts are being undertaken at both Manufacturing and Marketing and Life Retail Stores to reduce operating expenses to offset the impact of lower-than-expected sales levels.

Selling, general and administrative expenses increased 8.1 percent in the first quarter compared with the same period last year. These expenses increased as a percent of combined sales and textile service revenues from 25.5 percent to 26.1 percent in the quarter reflecting lower-than-planned sales volumes. Corporate expenses, including interest expense, were 10.0 percent lower in the first quarter compared to the year-earlier period, which included certain one-time expenses related to the Company's strategic alternatives process.

Financial Condition

The Company had working capital of $\$ 124,358,000$ and a current ratio of 2.6 to 1 at April 28, 2001, down from $\$ 144,237,000$ and 4.2 to 1 a year ago due primarily to the reclassification from
long-term debt to current maturities of a $\$ 25,000,000$ debt payment due December 31, 2001. The ratio of long-term debt to debt-plus-equity was 26.7 percent at the close of the quarter, down from 34.9 percent a year ago and 27.1 percent at the beginning of the year.

Cash flow used in operating activities of $\$ 1,283,000$ in the first quarter compared with $\$ 5,046,000$ of cash flow provided in the first quarter last year. This decrease is primarily due to payments for the inventory build-up in last year's fourth quarter in the Manufacturing and Marketing segment. Cash used in investing activities was $\$ 3,561,000$ compared with cash used a year ago of $\$ 272,000$. Capital expenditures increased $\$ 1,717,000$ in the current year, primarily to improve productivity and reduce utility costs in the Textile Services segment. Cash flows used in financing activities decreased $\$ 2,118,000$ in the first quarter, due mainly to a reduction in dividends paid. Cash and short-term investments totaled $\$ 14,601,000$ at April 28, 2001, down from $\$ 17,441,000$ a year ago and $\$ 20,311,000$ at the beginning of the year.

As noted above, the Company's future aggregate cash requirements are affected by the $\$ 25,000,000$ of debt maturing on December 31, 2001. Based on the Company's cash generation from operations, as well as its strong working capital position, current ratio and ratio of long-term debt to debt-plus-equity, Management believes that internal funds available from operations plus external funds available from the issuance of additional debt and/or equity as needed in the future, will be sufficient for all planned operating and capital requirements, including acquisitions.

Forward-Looking Statements

Any forward-looking statements made in this document reflect the Company's current views with respect to future events and financial performance and are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties that may cause actual results to differ materially from those set forth in these statements. These potential risks and uncertainties include, but are not limited to, competitive and general economic conditions, the ability to retain current customers and to add new customers in competitive market environments, competitive pricing in the marketplace, delays in the shipment of orders, availability of labor at appropriate rates, availability and cost of energy and water supplies, availability of non-domestic image apparel contractors to manufacture and deliver at an appropriate cost and in a timely manner, the ability to attract and retain key personnel, unusual or unexpected cash needs for operations or capital transactions, and other factors which may be identified in the Company's filings with the Securities and Exchange Commission.

May 17, 2001
Dear Fellow Shareholder:
While results for the first quarter of fiscal 2002 at $\$ .17$ per share are below those for the first quarter last year at $\$ .18$ per share, the decline was caused primarily by external factors mostly outside of our control -increased energy costs that could not be passed along to our customers. Our Textile Services segment has eleven of its 26 laundry plants (accounting for 47 percent of our laundry processing requirements) in the state of California, which saw unprecedented increases in energy costs during the quarter. We estimate that our energy costs were $\$ 1,600,000$ more in the first quarter than they were a year ago, or equal to about $\$ 11$ per share before offset for energy surcharges we are collecting from some customers.

Combined sales and textile service revenues increased 5.5 percent to $\$ 119,473,000$ compared with $\$ 113,252,000$ in the same period last year, with all three business segments showing increases for the second quarter in a row. Pre-tax income was $\$ 2,264,000$ in the quarter, compared with $\$ 2,503,000$ last year, and net income was 8.1 percent lower at $\$ 1,449,000$ versus
\$1,577,000 in last year's first quarter.
At the Textile Services segment, revenues rose 7.9 percent in the first quarter to $\$ 65,487,000$ compared with $\$ 60,691,000$ last year, and operating earnings for the quarter were $\$ 4,740,000$ versus $\$ 4,356,000$, an increase of 8.8 percent. Helping to offset the impact of higher energy costs was a $\$ 500,000$ gain on the sale of a small number of unproductive hospitality accounts from one of our plants in Florida. We were especially pleased with the increased revenues from Textile Services, our largest segment. Based on new business added of $\$ 10,300,000$ in the first quarter against losses of $\$ 5,000,000$, net business added was $\$ 5,300,000$ in annual revenues, a first quarter record. Our customer retention is also at the highest rate in recent history. Certainly we are pleased with this, but even more importantly, the new business is being added at higher price levels than our current average prices. At Textile Services, our productivity has also increased impressively throughout the segment. This is a result of better management practices as well as the result of capital investments that have been made in the past two years. Capital expenditures are continuing to be made at relatively high levels to continue to reduce labor intensity and, more recently, to install more utility-efficient equipment in selected plants. The management team has embraced three important value-adding processes this year: Customer Profitability, Pricing and Customer Retention through increased customer satisfaction. Of course, intense cost scrutiny is a daily activity in this segment, as these efforts support responsible revenue growth.

The Manufacturing and Marketing segment's sales for the first quarter were $\$ 37,641,000$, compared with $\$ 36,036,000$ or 4.5 percent above last year. However, this increase was less than expected, as we experienced a slow-down in the "rollouts" planned for new and existing customers during this year's first quarter, and this shows signs of continuing into later quarters this year. In addition, a good part of the increased sales were to the Textile Services and Life Retail Stores segments at lower margins than outside sales. As a result, operating earnings of $\$ 818,000$ were below last year's level of $\$ 1,196,000$. Our Canadian operations, which were combined from two independent units into one last year, had a very strong quarter with a sales increase of 19.1 percent and an operating earnings increase of 71.4 percent, although their contribution is small relative to the U.S. operations of this segment. With the less-than-expected sales levels, Manufacturing and Marketing inventory levels were reduced only marginally in the quarter. Due to the first quarter's results and the impact of a possible further weakening of the economy, we are planning to reduce operating costs significantly in this segment as soon as practical. The benefit of these actions should be felt in the second half of the year.

In the first quarter, Life Retail Stores had a small same-store sales increase of 1.5 percent. This is the ninth quarter in a row where same-store sales have increased, which is an impressive accomplishment given the relatively weak retail environment of the past few months. Overall, sales increased 2.6 percent to $\$ 23,902,000$, compared with $\$ 23,291,000$ in the previous year first quarter. This increase, however, was not enough to offset the impact of normal increases in operating costs, nor the downward effect on earnings of opening in the quarter
ten additional stores which have not yet become fully productive. As a result, Life had a modest loss of $\$ 61,000$ in the quarter, compared with operating earnings of $\$ 543,000$ in the first quarter last year. Among the new stores opened were five stores in the Boston, MA area and three new stores in
the Atlanta, GA area. This reflects our strategy of having optimal presence in large healthcare marketplaces. We continue to be encouraged by the gradual growth of sales in the catalogue and e-commerce distribution channels, and we continue to invest for the future in these important channels.

Interest income decreased in the first quarter, reflecting the use of cash for the inventory build-up in last year's fourth quarter in the domestic operations of Manufacturing and Marketing and for the capital investments made to improve productivity and reduce utility costs at Textile Services. The new stores at Life in the first quarter also required cash investments in store fixtures and inventory. As a result, our cash levels were reduced to $\$ 14,601,000$ at the end of the quarter, down from $\$ 20,311,000$ at last year end. We are pleased that corporate expenses, including interest expense, were 10.0 percent below the level of the same quarter a year ago.

When the year began, it was expected that we would exceed last year's earnings by 25 to 30 percent. This now appears to be a challenge, given the economic conditions existing today and forecasted to continue throughout the remainder of the year. While the Health Services market - our largest single market, where we have 71 percent of our sales and revenues - is recession resistant, it is not immune from a weak economy. Consumer confidence is eroding nationally, and that will affect Life Retail sales along with all other retailers. At Manufacturing and Marketing, our Lodging and Food Service segments, along with Gaming (casinos) and Recreation (theme parks) may experience weaker demands. The most significant factor affecting our operating earnings, however, may not be on the revenue side, but rather on the cost side. Our Textile Services segment has utility-intensive plants and a large fleet of local and over-the-road vehicles. The continued increases in the cost of energy, especially in California but not restricted to that state, caused operating earnings to be lower than expectations. While we have offset these a bit by better labor and linen management, as well as energy surcharges to our customers, these savings are not sufficient to make up the cost differences. It is likely that we will experience fuel increases for our vehicles on a national basis this summer. We must reduce operating expenses at the Manufacturing and Marketing and the Life Retail segments to reflect their lower-than-planned sales levels as well.

We still expect to achieve double-digit earnings increases for the year, despite the cost challenges that we are facing. To do this, we must continue to reduce costs in all of our operations, avoid margin erosion, and grow our revenues responsibly. It is extremely difficult to quantify the earnings increase, given the uncertain economic conditions we are facing. At this time, our goal is to achieve 15 to 20 percent earnings per share growth for fiscal 2002. This will require hard work and intense attention to detail by the management teams throughout our Company.

Now is the time for Angelica to build upon its position in the Health Services market. We intend to expand our Textile Services operations in the future and have identified the Southwest and the Carolinas as target markets for us. These expansions will support our regional cluster strategy for this business. The healthcare linen supply business will continue to consolidate, and we are becoming ideally positioned to be a consolidator.

As we emerge from the slowdown in the economy and are able to incorporate the increased costs of energy, I am confident that Angelica will add value for our shareholders.

Respectfully submitted,
/s/ Don W. Hubble

Don W. Hubble
