### IMPORTANT NOTICES REGARDING PRIVACY, DELIVERY OF SHAREHOLDER DOCUMENTS, PORTFOLIO HOLDINGS AND PROXY VOTING

**Privacy**. The Eaton Vance organization is committed to ensuring your financial privacy. Each of the financial institutions identified below has in effect the following policy ("Privacy Policy") with respect to nonpublic personal information about its customers:

Only such information received from you, through application forms or otherwise, and information about your Eaton Vance fund transactions will be collected. This may include information such as name, address, social security number, tax status, account balances and transactions.

None of such information about you (or former customers) will be disclosed to anyone, except as permitted by law (which includes disclosure to employees necessary to service your account). In the normal course of servicing a customer's account, Eaton Vance may share information with unaffiliated third parties that perform various required services such as transfer agents, custodians and broker/dealers.

Policies and procedures (including physical, electronic and procedural safeguards) are in place that are designed to protect the confidentiality of such information.

We reserve the right to change our Privacy Policy at any time upon proper notification to you. Customers may want to review our Policy periodically for changes by accessing the link on our homepage: www.eatonvance.com.

Our pledge of privacy applies to the following entities within the Eaton Vance organization: the Eaton Vance Family of Funds, Eaton Vance Management, Eaton Vance Investment Counsel, Boston Management and Research, and Eaton Vance Distributors, Inc.

In addition, our Privacy Policy only applies to those Eaton Vance customers who are individuals and who have a direct relationship with us. If a customer's account (i.e., fund shares) is held in the name of a third-party financial adviser/ broker-dealer, it is likely that only such adviser's privacy policies apply to the customer. This notice supersedes all previously issued privacy disclosures.

For more information about Eaton Vance's Privacy Policy, please call 1-800-262-1122.

**Delivery of Shareholder Documents.** The Securities and Exchange Commission permits funds to deliver only one copy of shareholder documents, including prospectuses, proxy statements and shareholder reports, to fund investors with multiple accounts at the same residential or post office box address. This practice is often called "householding" and it helps eliminate duplicate mailings to shareholders.

Eaton Vance, or your financial adviser, may household the mailing of your documents indefinitely unless you instruct Eaton Vance, or your financial adviser, otherwise.

If you would prefer that your Eaton Vance documents not be householded, please contact Eaton Vance at 1-800-262-1122, or contact your financial adviser.

Your instructions that householding not apply to delivery of your Eaton Vance documents will be effective within 30 days of receipt by Eaton Vance or your financial adviser.

**Portfolio Holdings.** Each Eaton Vance Fund and its underlying Portfolio will file a schedule of its portfolio holdings on Form N-Q with the SEC for the first and third quarters of each fiscal year. The Form N-Q will be available on the Eaton Vance website www.eatonvance.com, by calling Eaton Vance at 1-800-262-1122 or in the EDGAR database on the SEC's website at www.sec.gov. Form N-Q may also be reviewed and copied at the SEC's public reference room in Washington, D.C. (call 1-800-732-0330 for information on the operation of the public reference room).

**Proxy Voting.** From time to time, funds are required to vote proxies related to the securities held by the funds. The Eaton Vance Funds or their underlying Portfolios (if applicable) vote proxies according to a set of policies and procedures approved by the Funds' and Portfolios' Boards. You may obtain a description of these policies and procedures and information on how the Funds or Portfolios voted proxies relating to Portfolio securities during the most recent 12 month period ended June 30, without charge, upon request, by calling 1-800-262-1122. This description is also available on the SEC's website at www.sec.gov.

| Like all fixed-income markets, the municipal bond market responds to many factors, from changes in interest rates and economic trends to fluctuations in municipal bond issuance. Another key variable is the policy of the Federal Reserve, the nation s central bank, known popularly as The Fed. The Fed s policies are important to the nation s economy and markets.   |
| Founded in the wake of crisis, the Federal Reserve plays a vital role   |
| The Federal Reserve System was established by the Federal Reserve Act of 1913 in the wake of a series of financial crises, the most recent of which the Panic of 1907 had caused bank failures, a rash of bankruptcies, a dramatic loss of confidence and a severe economic downturn. Congress was determined to create a central bank that provided a vigilant monetary policy, price stability, a more elastic currency and more careful supervision over the nation s banks. |

The Open Market Committee: influencing the money supply and credit conditions...

The Fed has a number of tools at its disposal to adjust monetary policy. Of these, the most commonly used tools are open market operations. The Federal Open Market Committee (FOMC) meets regularly to review inflation, credit conditions and the overall health of the economy. The Fed uses its own research, as well as that of other key economic agencies, to review its various policy options. Treasury, corporate and municipal bond investors alike eagerly await the transcripts of FOMC meetings for a hint of future interest rate trends.

If it deems a change necessary in short-term rates, the Fed will announce an adjustment to its target for the Federal Funds rate its primary market instrument. To effect that change, the FOMC issues a directive to the trading desk of the Federal Reserve Bank of New York, whose responsibility it is to implement the policy.

Open market operations: The Fed intervenes...

If the Fed sees weakness in the economy and little threat of inflation, it may make outright purchases of Treasury securities either from the street or privately from foreign central banks thus adding reserves to the banking system. This action tends to lower interest rates, increase loans and stimulate economic activity. In so doing, the Fed is said to be *easing* monetary policy.

On the other hand, if the Fed sees the economy overheating and inflation looming, it may sell Treasury securities, thus draining reserves from the system. This action tends to raise rates, discourage consumer and business borrowing and dampen economic activity. In this case, the Fed is said to be *tightening* monetary policy.

While changes in Fed policy primarily affect short-term rates, long-term rates are determined by inflationary expectations. However, the Fed s actions can have a significant effect on market psychology and, over time, impact market rates across the borrowing spectrum for homebuyers seeking mortgages, businesses seeking bank loans and municipal bond issuers.

Fed-watching: A continuing pre-occupation of the market...

Interpreting the Federal Reserve s actions has long been of keen interest to bond market investors. Until the mid-1990s, analysts needed to keep daily tabs on bank reserves and the Fed s daily open market activity to determine a change in monetary policy. Starting in February 1994, however, the Fed began to indicate specifically its target Federal Funds rate. That marked a significant change, as analysts were now free to focus less on current policy and more on future potential changes in policy.

Throughout its history, the Federal Reserve has contributed to a more stable and safer monetary system. As that history unfolds, investors will surely continue to monitor its activities closely.

Sincerely,

Cynthia J. Clemson Co-Director Municipal Investments Robert B. MacIntosh Co-Director Municipal Investments

#### MARKET RECAP

The U.S. economy continued to generate moderate growth during the year ended September 30, 2005, although surging energy prices and high interest rates were a continuing concern for investors. Late in the period, the economy was faced with new challenges resulting from Hurricane Katrina and its potential impact on energy and commodity supplies.

The economy has remained on solid footing in 2005...

The nation s Gross Domestic Product grew at a rate of 3.8% in the third quarter of 2005, according to preliminary Commerce Department figures, following gains of 3.3% in the second quarter and 3.8% in the first quarter. Manufacturing reported a mixed picture, with overall factory activity accelerating somewhat, while areas such as durable goods, metals and textiles remained weak. Consumer spending declined, as soaring energy costs took their toll. While the housing sector showed signs of strain in selected markets due to rising interest rates, the overall housing market remained strong.

With consumers tightening their belts, the burden shifted to businesses. However, the outlook for capital spending was clouded, as businesses remained wary of investing in new equipment, facilities and software in a period of rising energy costs and higher interest rates.

Gulf Coast state economies were dealt a severe blow by Hurricane Katrina...

In the waning days of the fiscal year, Hurricane Katrina struck states along the Gulf Coast. The storm inflicted a catastrophic blow to Louisiana and less dramatic damage on Mississippi, Alabama and Florida. While the economies of the affected states will no doubt suffer in the short run, the national economy is also likely to feel some impact from damage to key ports and oil refineries. The pace of the region s recovery is unclear at this writing, and will likely remain a concern, especially as heating fuel demand rises in coming months.

Municipal bond yields exceeded Treasury yields

| Principal and interest payments of Treasury securities are guaranteed by the U.S. government.  |

|  |
| The Federal Reserve continued its policy of tightening credit during the fiscal year   |

Inflation accelerated somewhat during the period, an increase apparent not only in core energy costs, but also in finished products, a sign that producers are passing their higher energy costs along to consumers. The Federal Reserve hiked short-term interest rates, suggesting it will continue to raise rates in an effort to keep the economy from growing too quickly and keep inflation under control. Beginning in June 2004, the Fed increased its Federal Funds rate a key short-term interest rate barometer on twelve consecutive occasions, raising that benchmark from 1.00% to 4.00%, including its most recent rate hike in November 2005.

Against this backdrop, the municipal bond market generated solid gains for the period. For the year ended September 30, 2005, the Lehman Brothers Municipal Bond Index an unmanaged market index of municipal bonds had a total return of 4.05%.\*

The views expressed throughout this report are those of the various portfolio managers and are current only through the end of the period of the report as stated on the cover. These views are subject to change at any time based upon market or other conditions, and Eaton Vance disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for an Eaton Vance fund are based on many factors, may not be relied on as an indication of trading intent on behalf of any Eaton Vance fund.

<sup>\*</sup> It is not possible to invest directly in an Index. The Index s total return does not reflect expenses that would have been incurred if an investor individually purchased or sold the securities represented in the Index.

|---|
| INVESTMENT UPDATE   |
| The Fund  |
| Based on share price (the Fund is a closed-end fund traded on the American Stock Exchange), the Fund had a total return of 16.51% for the year ended September 30, 2005. That return was the result of an increase in share price from \$14.82 on September 30, 2004 to \$16.17 on September 30, 2005 and the reinvestment of \$1.001 in monthly dividends and \$0.0029 in capital gain distributions.(1) |
| Based on net asset value, the Fund had a total return of 8.77% for the year ended September 30, 2005. That return was the result of an increase in net asset value per share from \$15.03 on September 30, 2004 to \$15.31 on September 30, 2005, and the reinvestment of all distributions.  |
| For comparison, the Lehman Brothers Municipal Bond Index an unmanaged market index of municipal bonds had a total return of 4.05% for the year ended September 30, 2005.(2)   |
| Based on the last dividend of the fiscal year and a share price of \$16.17, the Fund had a market yield of 6.199 at September 30, 2005.(3) The Fund s market yield is equivalent to a taxable yield of 9.52%.(4)  |

| Portfolio Manager  |
|  |
| Management Discussion  |
| The U.S. economy continued to recover, although rising energy costs and a severe hurricane season hurt consumer spending. Manufacturing was uneven, especially the struggling auto industry. Construction remained a bright spot. The U.S. jobless rate was 5.1% in September 2005, down from 5.4% a year ago.       |
| Insured* transportation bonds represented the Fund s largest sector weighting at September 30, 2005. The Fund s investments included highways, turnpikes, a monorail facility, airports and a bridge and tunnel authority. This sector, with its non-discretionary revenues, performed relatively well for the Fund. |
| Insured* general obligations (GOs) constituted large investments for the Fund. Investments included issues for selected state and local school districts, as well as large urban issuers that management believes have a good local  |

economy and a solid tax base.

Coupons in the 5.00% to 5.25% range were among the Fund's lagging performers, as these current coupon bonds were less attractive to investors. Coupon distribution remained a key to performance during the fiscal year. In addition, with spreads narrowing, the Fund was helped somewhat by its several investments in A-rated and BBB-rated bonds.

At September 30, 2005, the Fund had leverage in the amount of approximately 36% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Fund performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

|   |
| Cynthia J. Clemson  |
| Portfolio Manager   |
| Management Discussion   |
|   |
| California s job growth strengthened in 2005, with employment rising above the pre-2001 recession peak. The construction sector was the primary engine of growth, generating nearly 60% of new jobs. Financial services and retail sectors also generated strong job creation. The state s September 2005 jobless rate was 5.1%, down from 6.1% a year ago. |
| Insured* general obligations (GOs) remained the Fund s largest sector weighting at September 30, 2005. Investments included local school district bonds, as well as issues of the state, whose credit rating was upgraded in the summer of 2005, reflecting an improved economic and revenue climate.   |
| Insured* lease revenue/certificates of participation (COPs) once again constituted large commitments for the Fund. These bonds provided communities flexible financing alternatives for a variety of municipal projects, including water and civic center projects.   |

Management continued to look for relative value opportunities in the market. The Fund continued to be very diversified with regard to issuer and coupons. Over the past fiscal year, some 5.00% coupons and zero coupons have lagged.

At September 30, 2005, the Fund had leverage in the amount of approximately 37% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

| *Private insurance does not decrease the risk of principal fluctuations associated with this investment.   |
|  |
|  |
|  |
| Craig Brandon  |
| Portfolio Manager  |
| Management Discussion  |
| Despite having moderated somewhat, Florida s job growth ranked among the highest in the nation in 2005. Tourism reached record levels, while construction was boosted by continuing relocation and retirement trends. Florida alone now accounts for one-fifth of the nation s job gains since the 2001 recession. The state s jobless rate was 3.5% in September 2005, down from 4.8% a year ago. |
| Insured* special tax revenue bonds were the Fund s largest sector weightings at September 30, 2005. These bonds are used to finance specifically stated improvements. Special taxes are imposed by governments with a portion of the proceeds dedicated to the repayment of bonds.   |

Insured\* transportation bonds represented a large focus for the Fund. Investments included state, county and

local bonds for port project improvements, expressways and turnpike projects.

Management continued to emphasize relative value to enhance income potential. Adjustments to the Fund s structure included diversifiying its coupon profile and updating call protection to improve the Fund s upside potential. Although the Fund outpaced its benchmark, performance was constrained somewhat because, as an insured\* fund, it had fewer lower-rated, investment-grade bonds.

At September 30, 2005, the Fund had leverage in the amount of approximately 37% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Fund performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

| Portfolio Manager   |
| Management Discussion   |
|   |
| Massachusetts continued to gain jobs in 2005, although the pace of job creation was slow by historical standards. Health care remained a major generator of new jobs, driven by strong demand from hospitals, medical offices, nursing homes and assisted care facilities. Residential construction also remained strong. The Commonwealth s September 2005 jobless rate was 4.7%, down from 4.9% a year ago. |
| Insured* private and public education bonds remained among the Fund s largest sector weightings at September 30, 2005. Colleges continued to enjoy steady to strong applicant demand and more pricing flexibility than other sectors, with tuition increases again outpacing the rate of inflation.   |
| Insured* transportation bonds were significant holdings. The Fund had investments in issues for the Commonwealth s turnpike authority and included zero coupon issues, which had a positive effect upon performance   |

during the fiscal year.

Some bonds with coupons in the 5.00 to 5.25% range had a negative impact upon the Fund s performance. These current coupon bonds were less attractive to investors in a falling interest rate environment.

At September 30, 2005, the Fund had leverage in the amount of approximately 37% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Fund performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

| Eaton Vance Insured Michigan Municipal Bond Fund as of September 30, 2005   |
|---|
| INVESTMENT UPDATE   |
| The Fund  |
| Based on share price (the Fund is a closed-end fund traded on the American Stock Exchange), the Fund had a total return of 11.26% for the year ended September 30, 2005. That return was the result of an increase in share price from \$15.49 on September 30, 2004 to \$16.20 on September 30, 2005 and the reinvestment of \$0.948 in monthly dividends. (1) |
| Based on net asset value, the Fund had a total return of 7.52% for the year ended September 30, 2005. That return was the result of an increase in net asset value per share from \$14.84 on September 30, 2004 to \$15.00 on September 30, 2005, and the reinvestment of all distributions.  |
| For comparison, the Lehman Brothers Municipal Bond Index an unmanaged market index of municipal bonds had a total return of 4.05% for the year ended September 30, 2005.(2)   |
| Based on the last dividend of the fiscal year and a share price of \$16.20, the Fund had a market yield of 5.85% at September 30, 2005.(3) The Fund s market yield is equivalent to a taxable yield of 9.37%.(4)  |

|   |
| Management Discussion   |
|   |
| Michigan s economy registered the worst employment performance in the nation in 2005. Manufacturing remained the key problem area, reflecting the ailing auto industry. Hiring also slowed in construction, trade and finance. In contrast, leisure, tourism, government, education and health care showed modest gains. The state s September 2005 jobless rate was 6.4%, down from 7.1% a year ago. |
| Insured* general obligations (GOs) constituted the Fund s largest sector weighting at September 30, 2005. Investments included local and county school districts, as well as joint building authorities from communities with strong underlying local economies.  |
| Hospital bonds remained a large investment for the Fund. Among its hospital investments were some A-rated bonds. These lower-rated investment-grade bonds generally outperformed the insured* segment of the market and   |

boosted the Fund s performance.

Coupons in the 5.00% to 5.25% range were among the Fund s lagging performers, as these current coupon bonds were less attractive to investors. Thus, coupon distribution remained a key to performance during the fiscal year. In addition, with spreads narrowing, the Fund was helped somewhat by its several investments in A-rated and BBB-rated bonds.

At September 30, 2005, the Fund had leverage in the amount of approximately 38% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Fund performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

| Portfolio Manager   |
|   |
| Management Discussion   |
| New Jersey s economy slowed in 2005, with the pace of job growth falling below the national rate. Housing, construction and mortgage financing were keys to growth, providing around one-fifth of the new jobs added in the past year. The state s manufacturing and telecommunications industries continued to shed jobs. The state s September 2005 jobless rate was 4.3%, down from 4.6% a year ago. |
| Insured* transportation bonds were the Fund s largest sector weightings at September 30, 2005. The Fund s investments included issues for a metropolitan New York/New Jersey port authority, a marine transportation facility for Newark, a state turnpike authority and a transportation authority that oversees expressways and aviation projects in southern New Jersey.                             |
| Insured* public education bonds constituted a large commitment by the Fund, with investments in state   |

university and local community colleges. Colleges continued to enjoy steady to strong applicant demand and more

pricing flexibility than other sectors, with tuition increases again outpacing the rate of inflation.

Some bonds with coupons in the 5.00 to 5.25% range had a negative impact upon the Fund s performance. These current coupon bonds were less attractive to investors in a falling interest rate environment.

At September 30, 2005, the Fund had leverage in the amount of approximately 36% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Fund performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

| Management Discussion   |
| New York s job outlook improved in 2005, although at a pace below that of the nation. The service sector remained the primary source of job creation, with housing and consturction also providing a lift. The manufacturing sector continued its slump, although the pace of job loss was less dramatic than in recent years. The state s September 2005 jobless rate was 5.2%, down from 5.6% a year ago. |
| Insured* private education bonds were the Fund s largest weighting at September 30, 2005. Investments focused on industrial development agency and dormitory authority bonds for some of the state s well-regarded universities. The bonds financed the construction of housing, lab and classroom facilities.  |
| Insured* transportation bonds remained among the Fund s prominent investments. Bonds for New York transportation facilities largely backed by non-discretionary toll income performed well in an uncertain economic   |

Although the Fund outpaced its benchmark, its performance was constrained slightly by an underweighting in lower-rated bonds. Amid narrow spreads, BBB and A-rated bonds—underweighted in the Fund—generally outperformed their higher-quality counterparts.

At September 30, 2005, the Fund had leverage in the amount of approximately 35% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

| Management Discussion   |
|   |
| Ohio generated job growth in 2005, although at an uneven pace. Business services, education and health care were the primary sources of growth, while retailing, government and manufacturing continued to post job losses. Durable goods manufacturing was especially weak. The state s September 2005 jobless rate was 5.8%, down from 6.1% a year ago. |
| Insured* general obligations (GOs) were the Fund s largest sector weighting at September 30, 2005. Management again focused on local school district bonds from areas with strong local economies and solid property tax revenues.  |
| Insured* public education bonds were a large commitment for the Fund. The education sector generally has  |

more defensive characteristics in an uncertain economy and has enjoyed stable to rising tuition revenues. Investments

included a range of universities throughout the state and a community and technical college.

The Fund performance was constrained slightly by a low weighting in lower-rated bonds. Amid narrow spreads, BBB and A-rated bonds—underweighted in the Fund—generally outperformed their higher-quality counterparts.

At September 30, 2005, the Fund had leverage in the amount of approximately 37% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

| Thomas M. Metzold  Portfolio Manager   |
|  |
| Management Discussion  |
| Pennsylvania continued its recovery in 2005, posting its strongest job growth since 2000. Business services, health care and tourism provided the strongest job growth, with construction also contributing significantly. Manufacturing remained in decline, although the pace of job loss abated somewhat. Pennsylvania s September 2005 jobless rate was 4.8%, down from 5.6% a year ago. |
| Insured* general obligations (GOs) were the Fund s largest sector weighting at September 30, 2005. The Fund s investments were primarily city and county school district bonds. Given the apparent economic slowdown, insured* GOs provided an added measure of security.  |
| Insured* transportation bonds remained a significant commitment for the Fund and were a primary reason for   |

the Fund s out performance. Investments emphasized port authority, turnpike and highway issues, which have seen

increased vehicle traffic and rising toll revenues.

Insured\* escrowed/pre refunded bonds were among the Fund s less robust performers. Backed by Treasury bonds, escrowed bonds underperformed the lower quality segment of the market, as spreads continued to narrow during the fiscal year.

At September 30, 2005, the Fund had leverage in the amount of approximately 37% of the Fund s total assets. The Fund uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Fund performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Fund s current performance may be lower or higher than the quoted return.

AMBAC - AMBAC Financial Group, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 83.7% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 4.7% to 37.0% of total investments.

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$22,461,895 or 14.8% of the Fund's net assets applicable to common shares.
- (2) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (3) When-issued security.
- (4) Security (or a portion thereof) has been segregated to cover when-issued securities.
- (5) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

AMBAC - AMBAC Financial Group, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by California municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 88.5% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 0.5% to 26.9% of total investments.

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$6,846,787 or 12.0% of the Fund's net assets applicable to common shares.
- (2) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (3) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

AMBAC - AMBAC Financial Group, Inc.

Duin aim al Amazant

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by Florida municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 92.7% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 3.5% to 48.2% of total investments.

<sup>(1)</sup> Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$5,007,642 or 13.1% of the Fund's net assets applicable to common shares.

<sup>(2)</sup> Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.

<sup>(3)</sup> Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.

(4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

AMBAC - AMBAC Financial Group, Inc.

CIFG - CDC IXIS Financial Guaranty North America, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by Massachusetts municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 83.3% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 3.0% to 23.6% of total investments.

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$4,257,315 or 16.1% of the Fund's net assets applicable to common shares.
- (2) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (3) Security (or a portion thereof) has been segregated to cover when-issued securities.
- (4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
- (5) When-issued security.

AMBAC - AMBAC Financial Group, Inc.

CIFG - CDC IXIS Financial Guaranty North America, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by Michigan municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 81.9% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.5% to 25.4% of total investments.

See notes to financial statements

<sup>(1)</sup> Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$3,531,679 or 15.6% of the Fund's net assets applicable to common shares.

<sup>(2)</sup> Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.

<sup>(3)</sup> Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

AMBAC - AMBAC Financial Group, Inc.

CIFG - CDC IXIS Financial Guaranty North America, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by New Jersey municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 83.3% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 0.9% to 22.8% of total investments.

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$5,791,649 or 14.8% of the Fund's net assets applicable to common shares.
- (2) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (3) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
- (4) Security (or a portion thereof) has been segregated to cover when-issued securities.
- (5) When-issued security.

AMBAC - AMBAC Financial Group, Inc.

CIFG - CDC IXIS Financial Guaranty North America, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by New York municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 84.8% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 2.0% to 30.4% of total investments.

See notes to financial statements

#### Eaton Vance Insured New York Municipal Bond Fund II as of September 30, 2005

#### PORTFOLIO OF INVESTMENTS CONT'D

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$5,314,719 or 13.6% of the Fund's net assets applicable to common shares.
- (2) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (3) Security (or a portion thereof) has been segregated to cover when-issued securities.
- (4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
- (5) When-issued security.

AMBAC - AMBAC Financial Group, Inc.

CIFG - CDC IXIS Financial Guaranty North America, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by Ohio municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 86.9% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 0.4% to 32.9% of total investments.

- (1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$5,925,934 or 15.9% of the Fund's net assets applicable to common shares.
- (2) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (3) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.
- (4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

AMBAC - AMBAC Financial Group, Inc.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Fund invests primarily in debt securities issued by Pennsylvania municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at September 30, 2005, 90.4% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.9% to 26.6% of total investments.

<sup>(1)</sup> Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2005, the aggregate value of the securities is \$5,642,742 or 12.9% of the Fund's net assets applicable to common shares.

<sup>(2)</sup> Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.

<sup>(3)</sup> Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at September 30, 2005.

(4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
