## AGILENT TECHNOLOGIES, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

## 1. OVERVIEW

Agilent Technologies, Inc. ( we , Agilent or the company ), incorporated in Delaware in May 1999, is a measurement company, providing core bio-analytical and electronic measurement solutions to the communications, electronics, life sciences and chemical analysis industries. In the first quarter of 2006, we completed the divestiture of our semiconductor products business. In the third quarter of 2006, we completed the initial public offering of our semiconductor test solutions business, Verigy Ltd., ( Verigy ). Verigy was a majority-owned subsidiary of Agilent until the distribution of our remaining Verigy shares to Agilent stockholders on October 31, 2006. The results of our semiconductor products business and our semiconductor test solutions business are presented as discontinued operations for fiscal year 2006 in the condensed consolidated financial statements.

Our fiscal year end is October 31, and our fiscal quarters end on January 31, April 30 and July 31. Unless otherwise stated, all dates refer to our fiscal year and fiscal periods.

#### 2. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

*Reclassifications*. The amounts comprising of other income (expense), net in the consolidated statement of operations for the three and six months ended April 30, 2006, were reclassified to conform to the more detailed presentation used in 2007, which separately discloses interest income and interest expense.

Basis of Presentation. We have prepared the accompanying financial data for the three and six months ended April 30, 2007 and 2006 pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles (GAAP) in the U.S. have been condensed or omitted pursuant to such rules and regulations. The following discussion should be read in conjunction with our 2006 Annual Report on Form 10-K.

In the opinion of management, the accompanying condensed consolidated financial statements contain all normal and recurring adjustments necessary to present fairly our condensed consolidated balance sheet as of April 30, 2007 and October 31, 2006, condensed consolidated statement of operations for the three and six months ended April 30, 2007 and 2006, and condensed consolidated statement of cash flows for the six months ended April 30, 2007 and 2006.

The preparation of condensed consolidated financial statements in conformity with GAAP in the U.S. requires management to make estimates, judgments and assumptions that affect the amounts reported in our condensed consolidated financial statements and accompanying notes. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, restructuring and asset impairment charges, inventory valuation, investment impairments, share-based compensation, retirement and post-retirement benefit plan assumptions, valuation of long-lived assets and accounting for income taxes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management s best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates.

## 3. NEW ACCOUNTING PRONOUNCEMENTS

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, Accounting for Income Tax Uncertainties (FIN No. 48). FIN No. 48 defines the threshold for recognizing the benefits of tax return positions in the financial statements as more-likely-than-not to be sustained by the taxing authority and provides guidance on the derecognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN No. 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of disclosures associated with any recorded income tax uncertainties. FIN No. 48 is effective for fiscal years beginning after December 15, 2006. The differences between the amounts recognized in the consolidated financial statements prior to the adoption of FIN No. 48 and the amounts reported after adoption will be accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. We are currently evaluating the impact of FIN No. 48 on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and other Postretirement Plans, an amendment of FASB statements No. 87, 88, 106, and 132(R) (SFAS No. 158), which requires companies

to recognize a net liability or asset to report the funded status of their defined benefit pension and other postretirement benefit plans on their balance sheets. Funded status is the difference between the fair market value of plan assets and the benefit obligation. The company will adopt the recognition provisions of SFAS No. 158 as of October 31, 2007 and plans to adopt the measurement date requirement as of October 31, 2009. SFAS No. 158 will be applied prospectively. If the company had adopted SFAS No. 158 at the end of fiscal 2006, using the company s year end actuarial valuations, the impact would have been a reduction in assets of \$2 million, an increase in liabilities of \$26 million, and a reduction of accumulated other comprehensive income of \$28 million.

In September 2006, the Staff of the SEC issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB No. 108). SAB No. 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of determining whether the current year s financial statements are materially misstated. We adopted SAB No. 108 in our first quarter and the adoption had no material impact on our consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FAS 115 (SFAS No. 159). SFAS No. 159 allows companies to choose, at specified election dates, to measure eligible financial assets and liabilities at fair value that are not otherwise required to be measured at fair value. Unrealized gains and losses shall be reported on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS No. 159 also establishes presentation and disclosure requirements. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007 and will be applied prospectively. We are currently evaluating the impact of adopting SFAS No. 159 on our consolidated financial statements.

## 4. SHARE-BASED COMPENSATION

We follow the accounting provisions of SFAS No. 123 (revised 2004), Share-Based Payment (SFAS No. 123 (R)), for share-based awards granted to employees and directors including employee stock option awards, restricted stock units, employee stock purchases made under our Employee Stock Purchase Plan (ESPP) and performance share awards under our Long-Term Performance Program (LTPP) using the estimated grant date fair value method of accounting in accordance with SFAS No. 123 (R).

The impact on our results for share-based compensation was as follows:

	April 2007 (in m	e Months Ended 1 30, uillions, except hare data)	2006		April 2007 (in m	Ionths Ended 130, illions, except hare data)	2006	
Cost of products	\$	11	\$	8	\$	21	\$	15
Research and development	8		4		14		10	
Selling, general and administrative	21		10		41		29	
Total share-based compensation expense	\$	40	\$	22	\$	76	\$	54
Impact on net income per share:								
Basic	\$	0.10	\$	0.05	\$	0.19	\$	0.12
Diluted	\$	0.10	\$	0.05	\$	0.18	\$	0.12

In the second quarter of 2007, we issued 1.9 million restricted stock units. The estimated fair value of the restricted stock unit awards was determined based on the market price of Agilent s common stock on the date of grant. The restricted stock units were granted under the Agilent Technologies, Inc. 1999 Stock Plan. Restricted stock units generally vest at a rate of 25 percent per year over a period of four years from the date of grant and generally have a maximum contractual term of ten years.

Under the LTPP, the company s executive officers and other key employees are entitled to receive unrestricted shares of the company s stock after the end of a three-year period, if specified performance targets are met. The final award may vary as it is based on certain performance metrics. During the second quarter of 2007, we received the final performance results of our three years ended 2006 LTPP, which indicated that we exceeded our specified performance targets. Consequently, we recorded an incremental share-based compensation expense of \$6 million for the three months ended April 30, 2007 to reflect this Plan s performance results.

In addition, in the three months ended April 30, 2007, we recorded \$4 million of expense for the acceleration of unvested awards related to the separation of a senior executive.

Share-based compensation from continuing operations capitalized within inventory at April 30, 2007 and 2006 was \$1 million and \$1.5 million, respectively. The windfall tax benefit realized from exercised stock options and similar awards was immaterial for the three and six months ended April 30, 2007 and 2006.

The following assumptions were used during the three and six months ended April 30, 2007 and 2006 to estimate the fair value of options granted, ESPP purchases and the LTPP:

	Three Months April 30,	Ended		Six Months En	nded		
	2007		2006	2007		2006	
Stock Option Plans:							
Weighted average risk-free interest rate	4.4	%	4.7	% 4.6	%	4.3	%
Dividend yield	0	%	0	% 0	%	0	%
Weighted average volatility	26	%	28	% 30	%	29	%
Expected life	4.6 yrs		4.25 yrs	4.6 yrs		4.25 yrs	
ESPP:							
Weighted average risk-free interest rate				4.8	%	4.3	%
Dividend yield				0	%	0	%
Weighted average volatility				32	%	30	%
Expected life				0.5-2 yrs		0.5-1 yrs	
LTPP:							
Volatility of Agilent shares	30	%		31	%	28	%
Volatility of selected peer-company shares	15%-57	%		15%-57	%	23%-82	%
Price-wise correlation with selected peers	29	%		29	%	50	%

For the three and six months ended April 30, 2007 and 2006, the fair value of share-based awards for employee stock option awards and employee stock purchases made under our ESPP was estimated using the Black-Scholes option pricing model. For the three and six months ended April 30, 2007 and 2006, shares granted under the LTPP were valued using a Monte Carlo simulation. Both the Black-Scholes and Monte Carlo simulation fair value models require the use of highly subjective and complex assumptions, including the option s expected life and the price volatility of the underlying stock.

The expected stock price volatility assumption was determined using the implied volatility for our stock for the three and six months ended April 30, 2007 and 2006. We estimate the stock price volatility using the implied volatility of Agilent s publicly traded, similarly priced, stock options. We have determined that implied volatility is more reflective of market conditions and a better indicator of expected volatility than using historical volatility or a combined method of determining volatility.

In the first quarter of 2007, we revised our estimate of the expected life of our employee stock options. In revising this estimate, we considered several factors, including the expected lives used by a peer group of companies and the historical option exercise behavior of our employees. In the first quarter of 2007, we granted the majority of our employee stock options to executive employees and the review of our data indicated that our executive employees, on average, exercise their options at 4.6 years.

Under the anti-dilution provision of the 1999 Stock Plan, on November 1, 2006, Agilent adjusted the exercise price downward and number of option shares upward for each outstanding employee stock option to preserve the value of the options after the Verigy spin-off. The impact of the adjusted exercise price and number of options has been reflected in our disclosures as of November 1, 2006.

## 5. PROVISION FOR TAXES

We recorded \$33 million and \$6 million of income tax provision for the three months and six months ended April 30, 2007. The tax provision for the six months ended April 30, 2007 includes a benefit of \$50 million related to the reversal of a tax reserve for potential non-U.S. exposures where the statute of limitations has now expired. The provision for taxes was recorded for income

generated in jurisdictions other than those in which the Company has full valuation allowances. We intend to maintain full valuation allowances in these jurisdictions until sufficient positive evidence exists to support the reversal of the valuation allowances.

#### 6. NET INCOME PER SHARE

The following is a reconciliation of the numerators and denominators of the basic and diluted net income per share computations for the periods presented below.

	Apri 2007		2006			Six M Apri 2007	*	2006	i
Numerator:									
Income from continuing operations	\$	123	\$	121		\$	273	\$	1,095
Income from and gain (loss) on sale of discontinued									
operations of our semiconductor products business, net			(16		)			1,82	1
Income from discontinued operations of our									
semiconductor test solutions business, net			10					15	
Net income	\$	123	\$	115		\$	273	\$	2,931
Denominators:									
Basic weighted-average shares	402		430			405		452	
Potentially dilutive common stock equivalents	11		12			11		11	
Diluted weighted-average shares	413		442			416		463	

The dilutive effect of share-based awards is reflected in diluted net income per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation required by SFAS No. 123 (R).

The following table presents options to purchase shares of common stock, which were not included in the computation of diluted net income per share because they were anti-dilutive.

		ee Months I il 30,	Ended	2006	i	Six M Apri 2007		<b>2006</b>
Options to purchase shares of common stock (in								
millions)	7			7		7		8
Weighted-average exercise price	\$	44		\$	49	\$	44	\$ 47
Average common stock price	\$	33		\$	37	\$	33	\$ 36

## 7. RESTRICTED CASH & CASH EQUIVALENTS AND LONG-TERM DEBT

Restricted cash and cash equivalents as of April 30, 2007 was \$1,604 million. In January 2006, Agilent Technologies World Trade, Inc., a consolidated wholly owned subsidiary of Agilent, ( World Trade ), entered into a Master Repurchase Agreement and related Confirmation (together, the Repurchase Agreement ) with a third party pursuant to which World Trade sold 15,000 Class A preferred shares of one of its wholly owned subsidiaries having an aggregate liquidation preference of \$1.5 billion. Pursuant to the Repurchase Agreement, World Trade is obligated to repurchase from the third party those preferred shares for 100 percent of their aggregate liquidation preference in January 2011. The \$1.5 billion obligation of our subsidiary to repurchase the preferred shares has been classified as long-term debt on our condensed consolidated balance sheet. Included in restricted cash and cash equivalents is \$1,581 million of short-term restricted commercial paper maintained in connection with our obligations per the Repurchase Agreement.

#### 8. INVENTORY

	April 30, 2007	October 31, 2006
	(in millions)	
Finished goods	\$ 297	\$ 285
Work in progress	52	51
Raw materials	301	291
Total inventory	\$ 650	\$ 627

## 9. GOODWILL AND OTHER INTANGIBLE ASSETS

The following table presents goodwill balances and the movements for each of our reportable segments during the six months ended April 30, 2007:

	Electro Measu (in mil	rement		nalytical urement		Total		
Goodwill at October 31, 2006	\$	272	\$	113		\$	385	
Foreign currency translation impact			(1		)	(1		)
Goodwill arising from acquisitions	36		4			40		
Goodwill at April 30, 2007	\$	308	\$	116		\$	424	

The components of other intangibles as of April 30, 2007 and October 31, 2006 are shown in the table below:

	Purch Gross Carry Amou (in mi	ing nt	Accun	s nulated tization	Net Bo Value	
As of October 31, 2006:						
Purchased technology	\$	208	\$	143	\$	65
Customer relationships	50		32		18	
Total	\$	258	\$	175	\$	83
As of April 30, 2007:						
Purchased technology	\$	229	\$	156	\$	73
Customer relationships	55		35		20	
Total	\$	284	\$	191	\$	93

We recorded approximately \$40 million of goodwill and \$26 million of other intangibles during the six months ended April 30, 2007, primarily related to four acquisitions that closed in the first quarter of 2007. Pro forma disclosures were not required for these acquisitions, as they are not material.

Amortization of intangible assets was \$8 million and \$16 million for the three and six months ended April 30, 2007, respectively, and \$7 million and \$11 million for the same periods in the prior year. Future amortization expense related to existing purchased intangible assets is estimated to be \$17 million for the remainder of 2007, \$24 million for 2008, \$17 million for 2009 and \$35 million thereafter.

## 10. RETIREMENT PLANS AND POST RETIREMENT PENSION PLANS

Components of net periodic costs. For the three and six months ended April 30, 2007 and 2006, our net pension and post retirement benefit costs were comprised of the following:

				Non-U.S. Plans				U.S. Post Retirement Benefit Plans										
	200			200			200	7		200	6		200	7		200	6	
Service cost benefits earned during	(																	
the period	\$	10		\$	12		\$	9		\$	11		\$	1		\$	1	
Interest cost on benefit obligation	10			10			16			14			7			7		
Expected return on plan assets Amortization and deferrals:	(14		)	(13		)	(23		)	(19		)	(7		)	(6		)
Actuarial (gain) loss	(1		)	(1		)	8			8						2		
Prior service cost													(2		)	(3		)
Total net plan costs	\$	5		\$	8		\$	10		\$	14		\$	(1	)	\$	1	
Distribution of net plan costs																		
Continuing operations	\$	5		\$	7		\$	10		\$	13		(1		)	\$	1	
Discontinued operations				1	·					1			(-		,	,

In the U.S., because of lump sum payouts during the three months ended January 31, 2007, we recorded a settlement in accordance with by SFAS No. 88, Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits, (SFAS No. 88). The impact to the U.S. Plans was a gain of \$1 million.

We contributed approximately zero and \$8 million to our U.S. defined benefit plans during the three and six months ended April 30, 2007 and zero and \$41 million, respectively, for the same periods in 2006. We contributed approximately \$7 million and \$16 million to our non-U.S. defined benefit plans during the three and six months ended April 30, 2007 and \$21 million and \$29 million, respectively, for the same periods in 2006. The reduced funding amounts in the U.S. were due to an improved funded status, primarily due to an increase in asset returns. We expect to contribute approximately \$25 million to our U.S. and non-U.S. defined benefit plans during the remainder of fiscal 2007.

#### 11. WARRANTIES

## Standard Warranty

We accrue for standard warranty costs in accordance with Statement of Financial Accounting Standards No. 5, Accounting for Contingencies (SFAS No. 5), based on historical trends in warranty charges as a percentage of gross product shipments. The accrual is reviewed regularly and periodically adjusted to reflect changes in warranty cost estimates. Estimated warranty charges are recorded within cost of products at the time products are sold. Our standard warranty terms typically extend for one year from the date of delivery.

	FY 2007 (in millions)		FY 200	6	
Beginning balance at November 1,	\$ 29		\$	40	
Accruals for warranties issued during the period	29		25		
Accruals related to pre-existing warranties (including changes in estimates)	(1	)	(1		)
Settlements made during the period	(28	)	(30		)
Ending balance at April 30.	\$ 29		\$	34	

## **Extended Warranty**

Revenue from our extended warranty contracts with terms beyond one year is deferred and recognized on a straight-line basis over the contract period. Related costs are expensed as incurred. Amounts representing warranty contracts for the next twelve months are included in deferred revenue on the condensed consolidated balance sheet and were \$50 million and \$43 million at April 30, 2007 and October 31, 2006, respectively. The long-term amounts are recorded in other liabilities on the condensed consolidated balance sheet and were \$55 million at both April 30, 2007 and October 31, 2006.

	FY 2007 (in millions)	FY 2006
Beginning balance at November 1,	\$ 98	\$ 76
Recognition of revenue	(20	) (12)
Deferral of revenue for new contracts	27	26
Ending balance at April 30.	\$ 105	\$ 90

## 12. RESTRUCTURING

We initiated several restructuring plans in prior periods: the 2001 Plan, the 2002 Plan and the 2003 Plan ( Prior Plans ). As of April 30, 2007, we have executed all key activities on the Prior Plans. However, charges in connection with the consolidation of excess facilities continue to be recorded due to changes in market conditions from those originally expected. Payments will continue to be made related to these properties over the next five years.

Our FY2005 Plan was announced in the fourth quarter of 2005. As a consequence of selling our semiconductor products business and spinning off our semiconductor test solutions business, the FY2005 Plan is designed to align our workforce with our smaller revenue base. The FY2005 Plan consists of voluntary and involuntary terminations. During the three and six months ended April 30, 2007 we incurred \$7 million and \$16 million, respectively, in charges related to the FY2005 Plan, mostly associated with individuals notified prior to October 31, 2006.

A summary of restructuring activity for the six months ended April 30, 2007 is shown in the table below:

	Workfor Reduction (in million	on	Cons of Ex Facil			Total		
Ending balance at October 31, 2006	\$ 1	13	\$	58		\$	71	
Total charges	16					16		
Cash payments	(25	)	(14		)	(39		)
Ending balance at April 30, 2007	\$ 4	1	\$	44		\$	48	

The restructuring accrual for all plans, which totaled \$48 million as of April 30, 2007 and \$71 million as of October 31, 2006, is recorded in other accrued liabilities and other long-term liabilities on the condensed consolidated balance sheet and represents estimated future cash outlays. Completion of the workforce reduction component of the FY2005 Plan is expected by the end of fiscal year 2007; however, lease payments for excess facilities are expected to extend over the next five years.

A summary of the statement of operations impact of the charges resulting from all restructuring plans is shown below:

	Apr 200'	ee Months En il 30, 7 millions)	nded 2006		Apri 2007		Ended 2006
Cost of products	\$	3	\$	7	\$	6	\$ 16

operations	7		61		16		95
Restructuring charges in discontinued operations			5				10
Total restructuring and asset impairment charges	\$	7	\$	66	\$	16	\$ 105

## 13. COMPREHENSIVE INCOME

The following table presents the components of comprehensive income:

	Apri 2007		Ended	2006		
Net income	\$	123		\$	115	
Other comprehensive income:						
Change in unrealized gain (loss) on investments	1			(1		)
Change in unrealized gain (loss) on derivative instruments	(6		)	(5		)
Foreign currency translation	58			33		
Deferred taxes				2		
Comprehensive income	\$	176		\$	144	

	April 2007	onths Ended 30, llions)		2006		
Net income	\$	273		\$	2,931	
Other comprehensive income:						
Change in unrealized gain (loss) on investments	1			(5		)
Change in unrealized gain (loss) on derivative instruments	2			(6		)
Foreign currency translation	45			37		
Deferred taxes	(3		)	1		
Comprehensive income	\$	318		\$	2,958	

#### 14. STOCK REPURCHASE PROGRAM

In the fourth quarter of 2006, our Board of Directors authorized a \$2 billion stock repurchase program and subsequently, during the second quarter of 2007, they approved an acceleration of the remaining amount of repurchases under the program. We plan to complete the accelerated repurchases by the end of 2007.

The following repurchases under the above program were completed in the periods presented below:

## Quarter Ended

	Number of Common Stock Repurchased (in millions)	Amoun Commo Stock R	
October 31, 2006	1.7	\$	56
January 31, 2007	7.6	253	
April 30, 2007	11.4	382	
Program to date as of April 30, 2007	20.7	\$	691

The remaining amount that is authorized under the plan is approximately \$1.3 billion. All such shares and related costs are held as treasury stock and accounted for using the cost method.

#### 15. SEGMENT INFORMATION

We are a measurement company, providing core bio-analytical and electronic measurement solutions to the communications, electronics, life sciences and chemical analysis industries. During 2006, we completed the divestiture of our semiconductor products business and spin-off of our semiconductor test solutions business. After this reorganization, Agilent has two businesses bio-analytical measurement and electronic measurement each of which comprises a reportable segment. The segments were determined based primarily on how the chief operating decision maker views and evaluates our operations. Other factors, including customer base, homogeneity of products, technology and delivery channels, were also considered in determining our reportable segments.

A significant portion of the segments expenses arise from shared services and infrastructure that we have historically provided to the segments in order to realize economies of scale and to efficiently use resources. These expenses, collectively called corporate charges, include costs of centralized research and development, legal, accounting, real estate, insurance services, information technology services, treasury and other corporate infrastructure expenses. Charges are allocated to the segments, and the allocations have been determined on a basis that we considered to be a reasonable reflection of the utilization of services provided to or benefits received by the segments. For 2006, corporate charges previously allocated to our semiconductor products business and semiconductor test systems business, but not classified within discontinued operations, were not reallocated to our other segments. These charges are presented below as a component of the reconciliation between the segments income from operations and Agilent s income from continuing operations and are classified as unallocated semiconductor products business corporate charges and unallocated semiconductor test systems business corporate charges.

The following tables reflect the results of our reportable segments under our management reporting system. These results are not necessarily in conformity with generally accepted accounting principles in the U.S. The performance of each segment is measured based on several metrics, including income from operations. These results are used, in part, by the chief operating decision maker in evaluating the performance of, and in allocating resources to, each of the segments.

The profitability of each of the segments is measured after excluding amortization and impairment of other intangibles, restructuring and asset impairment charges, share based compensation expense, investment gains and losses, interest income, interest expense and other items as noted in the reconciliation below.

	Electronic Measurement (in millions)		Bio-analyti Measurem	otal
Three months ended April 30, 2007:

As of October 31, 2006	\$ 2,156	\$ 922	\$	3,078

## 16. SUBSEQUENT EVENTS

## Acquisition of Stratagene Corporation

On April 5, 2007, we signed a definitive agreement to acquire Stratagene Corporation (Nasdaq STGN), a publicly traded life sciences company based in La Jolla, California. Stratagene is a developer, manufacturer and marketer of specialized life science research and diagnostic products. Under the terms of the agreement, each share of Stratagene common stock will be converted into the right for shareholders to receive a cash payment of \$10.94, or an aggregate amount of approximately \$250 million. The acquisition, subject to certain customary closing conditions, is expected to close in early June.

## Revolving Credit Facility

On May 11, 2007, we entered into a five-year credit agreement, which provides for a \$300 million unsecured credit facility that will expire on May 11, 2012. The company may use amounts borrowed under the facility for general corporate purposes. The company is not borrowing under the facility at this time, but may borrow under the facility from time to time as needs arise.

## ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (UNAUDITED)

The following discussion should be read in conjunction with the condensed consolidated financial statements and notes thereto included elsewhere in this Form 10-Q and in our Annual Report on Form 10-K. This report contains forward-looking statements including, without limitation, statements regarding trends, seasonality and growth in the markets we sell into, our strategic direction, remediation activities, new product and service introductions, product pricing, changes to our manufacturing processes, the impact of local government regulations on our ability to pay vendors or conduct operations, our liquidity position, our ability to generate cash from continuing operations, growth in our businesses, our investments, our financial results, revenue generated from international sales, our cost-control activities, the status of our restructuring programs including our lease and severance payment obligations, our transition to lower-cost regions, and the existence or length of an economic recovery that involve risks and uncertainties. Our actual results could differ materially from the results contemplated by these forward-looking statements due to various factors, including those discussed below in Risks, Uncertainties and Other Factors That May Affect Future Results and elsewhere in this Form 10-O.

## **Basis of Presentation**

The financial information presented in this Form 10-Q is not audited and is not necessarily indicative of our future consolidated financial position, results of operations or cash flows. Our fiscal year end is October 31, and our fiscal quarters end on January 31, April 30 and July 31. Unless otherwise stated, all dates refer to our fiscal year and fiscal periods.

In the first quarter of 2006, we completed the divestiture of our semiconductor products business. In the third quarter of 2006, we completed the initial public offering of our semiconductor test solutions business, Verigy Ltd. (Verigy). Verigy was a majority-owned subsidiary of Agilent until the distribution of our remaining Verigy shares to Agilent stockholders on October 31, 2006. The results of our semiconductor products business and our semiconductor test solutions business are presented as discontinued operations for fiscal year 2006 in the condensed consolidated financial statements.

## **Executive Summary**

Agilent Technologies, Inc. ( we , Agilent or the company ) is a measurement company, providing core bio-analytical and electronic measurement solutions to the communications, electronics, life sciences and chemical analysis industries. Agilent has two businesses focused on the electronic measurement market and the bio-analytical measurement market.

For the three and six months ended April 30, 2007, total orders were \$1.40 billion and \$2.65 billion, respectively, up 10 percent and 8 percent in comparison to the same periods last year. Bio-analytical orders grew 14 percent, the fourth consecutive quarter of double digit order growth. Electronic measurement orders were up 8 percent for the quarter, double the average of the prior four quarters. We saw signs that wireless manufacturing test market may be bottoming.

Net revenue of \$1.32 billion and \$2.60 billion for the three and six months ended April 30, 2007 was up 7 percent and 8 percent, respectively, from the same periods last year. Two percent of the net revenue growth was due to currency for the three and six months ended April 30, 2007. Bio-analytical revenues were up 15 percent in the three months ended April 30, 2007 and electronic measurement revenues grew only 3 percent, mostly reflecting the weakness of the wireless manufacturing test market.

Income from continuing operations for the three and six months ended April 30, 2007 was \$123 million and \$273 million, respectively, and \$121 million and \$1,095 million for the corresponding periods last year. A gain of \$56 million in the three months ended April 30, 2006 was recorded on the sale of the San Jose site and, for the six months ended April 30, 2006, a gain of \$901 million was recorded on the sale of an equity investment, Lumileds. Net income for the six months ended April 30, 2006 includes \$1,821 million from, and gain on the sale of, discontinued operations of our semiconductor products business and \$15 million for the income from discontinued operations of our semiconductor test solutions business.

In the six months ended April 30, 2007, we generated \$395 million of operating cash compared with \$127 million generated in the six moths of the prior year. The improvement in year over year operating cash was driven by the increase in net operating income together with a \$45 million reduction in disbursements relating to restructuring activities, a \$92 million decrease in tax payments and a \$46 million reduction in contributions to defined benefit plans when compared to the prior year.

Looking forward, our focus will be to grow revenue at a faster rate than the electronic measurement and bio-analytical markets, primarily through increasing market share, expanding our served market size with new products and channels and by complementary acquisitions. Our primary strategy is to pursue profitable growth by expanding our leadership in core/adjacent markets and seeking revenue growth opportunities.

## **Critical Accounting Policies and Estimates**

Management s Discussion and Analysis of Financial Condition and Results of Operations is based upon our Condensed Consolidated Financial Statements, which have been prepared in accordance with generally accepted accounting principles (GAAP) in the U.S. The preparation of condensed consolidated financial statements in conformity with GAAP in the U.S. requires management to make estimates, judgments and assumptions that affect the amounts reported in our condensed consolidated financial statements and accompanying notes. Our critical accounting policies are those that affect our financial statements materially and involve difficult, subjective or complex judgments by management. Those policies are revenue recognition, restructuring and asset impairment charges, inventory valuation, investment impairments, share-based compensation, retirement and post-retirement benefit plan assumptions, valuation of long-lived assets and accounting for income taxes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management s best knowledge of current events and actions that may impact the company in the future, actual results may be different from the estimates.

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used or changes in the accounting estimate that are reasonably likely to occur could materially change the financial statements.

Share-based compensation. The expected stock price volatility assumption was determined using the implied volatility for our stock for the three and six months ended April 30, 2007 and 2006. We estimate the stock price volatility using the implied volatility of Agilent s publicly traded, similarly priced, stock options. We have determined that implied volatility is more reflective of market conditions and a better indicator of expected volatility than using historical volatility or a combined method of determining volatility. In reaching this conclusion, we have considered many factors including the extent to which our options are traded and our ability to find traded options with similar terms and prices to the options we are valuing. A 10 percent increase in our estimated volatility from 25 percent to 35 percent would generally increase the value of an award and the associated compensation cost by approximately 25 percent if no other factors were changed.

In the first quarter of 2007, we revised our estimate of the expected life of our employee stock options. In revising this estimate, we considered several factors, including the expected lives used by a peer group of companies and the historical option exercise behavior of our employees. In the first quarter of 2007, we granted the majority of our employee stock options to executive employees and the review of our data indicated that our executive employees, on average, exercise their options at 4.6 years. See Note 4, Share-Based Compensation, to the condensed consolidated financial statements for more information.

*Goodwill and purchased intangible assets.* No events occurred or circumstances changed during the six months ended April 30, 2007 that required us to test goodwill or purchased intangibles for impairment.

#### **Adoption of New Pronouncements**

See Note 3, New Accounting Pronouncements, to the condensed consolidated financial statements for a description of new accounting pronouncements.

## **Restructuring and Asset Impairment**

We initiated several restructuring plans in prior periods: the 2001 Plan, the 2002 Plan and the 2003 Plan ( Prior Plans ). We have executed all key activities on the Prior Plans. However, charges in connection with the consolidation of excess facilities continue to be recorded due to changes in market conditions from those originally expected. Payments will continue to be made related to these properties over the next five years.

Our FY2005 Plan was announced in the fourth quarter of 2005. As a consequence of selling our semiconductor products business and spinning off our semiconductor test solutions business, the FY2005 Plan is designed to align our workforce with our smaller revenue base. The FY2005 Plan consists of voluntary and involuntary terminations. During the three and six months ended April 30, 2007 we incurred \$7 million and \$16 million, respectively, in charges related to the FY2005 Plan, mostly associated with individuals notified prior to October 31, 2006. Future charges of approximately \$1 million are also expected for these individuals, with some limited additional charges expected for individuals to be notified in future periods. We expect to complete all actions associated with the FY2005 Plan by the end of fiscal 2007.

Subsequent to the FY2005 Plan, we continue to realign our businesses to the changing economic environment, although such actions do not constitute a restructuring plan as each action is individually immaterial. Actions taken to date are expected to result in approximately \$18 million of workforce management charges over the next year, of which approximately \$3 million was recorded in the second quarter of 2007.

See Note 12, Restructuring and Asset Impairment, of the condensed consolidated financial statements for more details relating to the restructuring plans and asset impairment activity.

## **Foreign Currency**

Our revenues, costs and expenses, and monetary assets and liabilities are exposed to changes in foreign currency exchange rates as a result of our global operating and financing activities. We hedge net cash flow and balance sheet exposures that are not denominated in the functional currencies of our subsidiaries on a short term and anticipated basis. We do experience some fluctuations within individual lines of the condensed consolidated statement of operations and balance sheet as our hedging program is not designed to offset the currency movements in each category of revenues, expenses, monetary assets and liabilities. However, movements in exchange rates net of our hedging activities had no material effect on our net income in the periods presented.

## **Results from Continuing Operations**

## **Orders and Net Revenue**

	Three Months Ended April 30,					Six Months Ended April 30,				ver Year (	Change Six	
	200 (in	7 millions)	2000	6	200	7	200	6	Month	S	Months	
Orders	\$	1,400	\$	1,276	\$	2,650	\$	2,453	10	%	8	%
Net revenue:												
Products	\$	1,095	\$	1,028	\$	2,160	\$	1,995	7	%	8	%
Services and other	225	5	211		440		411		7	%	7	%
Total net revenue	\$	1,320	\$	1,239	\$	2,600	\$	2,406	7	%	8	%

Agilent orders increased 10 percent and 8 percent for the three month and six months ended April 30, 2007, respectively, compared to the same periods in 2006.

Our bio-analytical measurement business recorded order growth of 14 percent for both the three and six month periods ended April 30, 2007 when compared to the prior year periods with strength in all of our markets. In comparison with the prior year, electronic measurement orders grew by 8 percent in the three months ended April 30, 2007 with sustained momentum in the general purpose test market and an indication that orders may be bottoming in the wireless manufacturing test market.

Agilent net revenue increased 7 percent and 8 percent for the three month and six months ended April 30, 2007 compared to the same periods last year.

The bio-analytical measurement business achieved revenue growth of 15 percent and 19 percent for the three and six months ended April 30, 2007 with strength across the portfolio of instruments, consumables and services.

Electronic measurement business revenues increased by 3 percent for both the three and six months ended April 30, 2007 compared with the prior year. Communications test revenue continued to be impacted by the weakness in wireless manufacturing test market.

Services and other revenue include revenue generated from servicing our installed base of products, warranty extensions and consulting. Services and other revenue for the three month and six months ended April 30, 2007 increased by 7 percent for both periods, as compared to the same periods last year. Service revenue trends tend to lag product revenue due to the deferral of significant service revenue, which is recognized over extended time periods.

### **Backlog**

At April 30, 2007, our unfilled orders for the electronic measurement business amounted to approximately \$810 million, as compared to approximately \$750 million at April 30, 2006. At April 30, 2007, our unfilled orders for the bio-analytical measurement business were approximately \$260 million, as compared to approximately \$220 million at April 30, 2006. We expect that a large majority of the unfilled orders for both businesses will be delivered to customers within nine months. On average, our unfilled orders represent approximately two months worth of revenues. In light of this experience, backlog on any particular date, while indicative of short-term revenue performance, is not necessarily a reliable indicator of medium or long-term revenue performance.

## **Operating Results**

	<b>Three Months Ended</b>				Six Moi	nths Ended		Year over Year Change				
	April 2007	30,	200	6	April 30 2007	),	2006		Three Months	Six Months		
Total gross margin	55.3	%	51.	7	% 54.7	%	51.7	% 4	ppts	3 ppts		
Operating margin	9.9	%	7.9		% 8.7	%	5.5	% 2	ppts	3 ppts		
(in millions)												
Research and development	\$	173	\$	172	\$	341	\$	337	1	% 1	%	
Selling, general and administrative	\$	426	\$	427	\$	854	\$	829		3	%	

Total gross margins increased 4 percentage points and 3 percentage points for the three and six months ended April 30, 2007 compared to the same periods last year. The improvement in gross margins during the three months ended April 30, 2007 continued to be influenced by the refunctionalization of general infrastructure allocations from cost of goods sold to research and development and selling, general and administrative expenses which took place after the second quarter of 2006. Going forward, this change should not drive any further impact on gross margin comparisons as the shift was effective in our third quarter of 2006 results. The lower allocations to gross margins reflect the ongoing headcount profile that is now less manufacturing intensive since the divestiture of our semiconductor products business. In addition, the relative strength of foreign currencies has continued to increase gross margins when compared with the prior year. The increase has been offset by corresponding increases in expenses and the offset of hedging gains and losses and, overall, had an immaterial impact on income from operations.

Research and development expenses increased 1 percent for the three and six months ended April 30, 2007 compared to the same periods last year. The main drivers for the increase continued to be the above-mentioned general infrastructure refunctionalization and currency changes. In addition, incremental increases for share based compensation in the three and six months ended April 30, 2007 have been offset by reductions in restructuring charges. We remain committed to bringing new products to market, and have focused our development efforts on key strategic opportunities in order to align our business with available markets and position ourselves to capture market share.

Selling, general and administrative expenses remained constant and increased by 3 percent for the three month and six months ended April 30, 2007, compared to the same periods last year. There were significant reductions in restructuring costs of \$38 million and \$54 million for the three and six months ended April 30, 2007, respectively. These costs reductions were partially offset by the impact of the general infrastructure refunctionalization, currency movements and acquisition costs. In addition, there were increases in share-based compensation of \$11 million and \$12 million for the three and six months ended April 30, 2007 compared to the same periods last year and a donation made in the first quarter of 2007 of \$20 million to the Agilent Foundation.

At April 30, 2007, our headcount for continuing operations was approximately 18,900 as compared to approximately 18,750 at April 30, 2006.

## **General Infrastructure and Shared Services**

For Agilent overall we have decreased our infrastructure costs compared to last year, primarily through continuing restructuring activities and streamlining our operations. We have reduced the number of employees in our workforce that provide support services such as finance, IT and workplace services and moved many of our global shared services operations sites to lower cost regions.

#### **Provision for Income Taxes**

For the three months and six months ended April 30, 2007, we recorded an income tax provision of \$33 million and \$6 million on continuing operations compared to an income tax provision of \$23 million and \$33 million in the same periods last year. The income tax provision for the six months ended April 30, 2007 includes a benefit of \$50 million related to the resolution of non-U.S.

tax issues associated with the 2000 spin-off of Agilent from Hewlett-Packard. The provision was recorded for taxes on income generated in jurisdictions other than those in which the Company has full valuation allowances. We intend to maintain full valuation allowances in these jurisdictions until sufficient positive evidence exists to support the reversal of the valuation allowances.

For 2007, the current estimate of the annual effective tax rate is 13 percent on continuing operations. The income tax rate for continuing operations was 2 percent for the six months ended April 30, 2007. The tax rates for both the six months ended April 30, 2007 and fiscal year 2007 benefited from the resolution of \$50 million of international tax issues. The benefit was treated as a discrete event during the quarter ended January 31, 2007. Excluding the impact of the \$50 million tax benefit, we anticipate the full-year 2007 effective tax rate on continuing operations to be approximately 19 percent. The overall tax rate reflects taxes in jurisdictions other than the U.S. and foreign jurisdictions in which income tax expense or benefit continues to be offset by adjustments to the valuation allowances. This tax rate may change over time as the amount or mix of income and taxes changes. Our effective tax rate is calculated using our projected annual pre-tax income or loss from continuing operations and is affected by research tax credits, the expected level of other tax benefits, the effects of business acquisitions and dispositions, the impact of changes to valuation allowances, changes in other comprehensive income, as well as changes in the mix of income and losses in the jurisdictions in which the Company operates which have varying statutory rates.

In connection with an Internal Revenue Service ( IRS ) audit of our U.S. federal income tax returns for 2000 through 2002, we received various Notices of Proposed Adjustment ( NOPA ). In particular, we received a NOPA in October 2006 and a NOPA in January 2007 in which the IRS claims significant increases to our U.S. taxable income, which could result in a commensurate increase in our U.S. income taxes payable. The October 2006 NOPA relates to the use of Agilent s brand name by our foreign affiliates. The January 2007 NOPA relates to a deemed dividend between Agilent s affiliates. We expect to receive a Revenue Agent s Report with respect to the October 2006 NOPA in due course in which we anticipate the IRS will assert a significant aggregate tax deficiency, plus interest and possible penalties. The January 2007 NOPA may be included in the Revenue Agent s Report if we are unsuccessful in addressing it before the IRS audit concludes. We believe that the claimed IRS adjustments are inconsistent with applicable tax laws and that the chance of the IRS prevailing on the claims is remote. Accordingly, we will oppose the claimed adjustments vigorously. In accordance with SFAS No. 5, Accounting for Contingencies, we have not accrued an income tax liability in our financial statements as we believe the possibility that the IRS will be successful in its claim for the adjustments is remote.

For all U.S. and other tax jurisdictions, we recognize potential liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes and interest will be due. If our estimate of income tax liabilities proves to be less than the ultimate assessment, a further charge to expense would be required. If events occur and the payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when we determine the liabilities are no longer necessary.

## **Segment Overview**

Agilent is the world spremier measurement company providing core bio-analytical and electronic measurement solutions to the communications, electronics, life sciences and chemical analysis industries. Agilent has two businesses focused on the electronic measurement market and the bio-analytical measurement market.

## **Electronic Measurement**

Our electronic measurement business provides standard and customized solutions that are used in the design, development, manufacture, installation, deployment and operation of electronic equipment and systems and communications networks and services.

## Orders and Net Revenue

	Three Months	Ended	Six Months End	led	Year over Year Change				
	April 30, 2007	2006	April 30, 2007	2006	Three Months	Si: M	x onths		
	(in millions)								
Orders	\$ 943	\$ 875	\$ 1,760	\$ 1,674	8	% 5	%		
Net revenue	\$ 892	\$ 867	\$ 1717	\$ 1,661	3	% 3	%		

Overall orders for the three and six months ended April 30, 2007 increased 8 percent and 5 percent compared with the same periods last year, with growth in our nano-positioning, oscilloscopes, digital test systems, parametric test and aerospace/defense focused businesses. Weakness in business associated with wireless manufacturing test persisted but the orders were better than those in the previous quarter.

Revenues for the three and six months ended April 30, 2007 increased 3 percent compared to the same periods last year. General purpose test revenues of \$563 million and \$1,072 million increased 10 percent and 11 percent, respectively, for the three and six months ended April 30, 2007, compared to the same periods last year. Our general purpose end markets continue to experience solid growth fueled by the ongoing global economic expansion and rising consumer spending on electronics. We saw growth this quarter driven by successful test solutions to emerging consumer technologies such as the high definition multimedia interface ( HDMI ) 1.3 for converged high-definition audio/visual system transmission. The computing and semiconductor end markets continued to perform well as ever-increasing complexity of device and system technologies require our leading-edge test solutions. Communications test revenues of \$329 million and \$645 million decreased 7 percent for both of the three and six months ended April 30, 2007 compared to the same periods last year. The decrease was driven mainly by weaker demand in wireless manufacturing test. Other communications test markets (such as wireline and wireless R&D) were more stable with moderate growth compared to last year.

Looking forward, we project continued opportunities for growth in our electronic measurement business. We expect growth to be driven by our customers expansion of wireless 3G coverage and services (high data rate, multi-media services supported by multi-functional handsets) as well as by opportunities in broadband access, voice-over-internet-protocol and fiber-to-the-home, all fueled by consumer demand for voice/data/video converged services. We believe the aerospace/defense market s overall longer-term trends of spending growth in areas of signal intelligence, communications, surveillance and information warfare bode well for longer-term growth in test and measurement sales into this market. This growth potential could be mitigated by potential slowdowns in spending on new communications technologies, governmental budgetary shifts and contraction in the semiconductor market.

#### **Operating Results**

	Three Months Ended				Six Mo	nths Ended		Year over Year Change				
	April	30,	20/		April 3	0,	2006	_	hree	Six		
	2007		200		2007		2006	IV	Ionths	Months		
Gross margin	58.7	%	55.	.5	% 57.8	%	55.2	% 3	ppts	3ppts		
Operating margin	14.6	%	13	.8	% 13.1	%	12.6	% 1	ppts	1ppts		
(in millions)												
Research and development	\$	129	\$	116	\$	253	\$	229	11	% 10	%	
Selling, general and administrative	\$	265	\$	245	\$	514	\$	478	8	% 8	%	

Gross margin increased 3 percentage points for the three and six months ended April 30, 2007 compared to the same periods last year. Several factors drove the improvement in the three and six months ended April 30, 2007 compared with the same periods in the prior year: a change in the classification of corporate overhead charges from cost of sales to operating expenses along with lower corporate overhead spending; movement of spending and activities from product cost to operating expenses; improved product material costs and more favorable mix of products.

Research and development expenses for the three and six months ended April 30, 2007 increased 11 percent and 10 percent, respectively, as compared to the same periods last year. The increase was driven by continued investment in new technologies and market expansion opportunities, the impact of currency movement and internal reclassification of costs from cost of sales to research and development.

Selling, general and administrative expenses increased 8 percent for both the three and six months ended April 30, 2007 over the same periods in the prior year. The increase was driven by selective spending increases in support of growth initiatives, acquisitions, unfavorable impact of currency movements and a change in the classification of corporate overhead charges from cost of sales to operating expenses. Income from operations for the three months and six months ended April 30, 2007 increased \$10 million and \$16 million when compared to the same periods last year.

## **Bio-analytical Measurement**

Our bio-analytical measurement business provides application-focused solutions that include instruments, software, consumables and services that enable customers to identify, quantify and analyze the physical and biological properties of substances and products. Our seven key product categories include: microarrays, microfluidics, gas chromatography, liquid chromatography, mass spectrometry, software and informatics, and related consumables, reagents and services.

#### Orders and Net Revenue

	Three Months B	inded	Six Months End	ded	Year over Year Change				
	April 30,	2007	April 30,	2007	Three	Six			
	2007 (in millions)	2006	2007	2006	Months	Months			
Orders	\$ 457	\$ 401	\$ 890	\$ 779	14	% 14 %			
Net revenue	\$ 428	\$ 372	\$ 883	\$ 745	15	% 19 %			

Bio-analytical measurement business had a strong quarter and first half year, with double digit year over year growth for both orders and revenue. Results were consistent with our normal seasonal patterns and reflected the strong demand across virtually all of our markets.

Orders for the three month and six months ended April 30, 2007, grew 14 percent when compared to the same periods last year, with the second quarter achieving double digit growth for the forth consecutive quarter. In our chemical analysis business, we continued to see strength from food and environmental markets together with demand for instrumentation in petrochemical industries. In life sciences we saw demand from pharmaceutical companies, contract research organizations, and generic drug manufacturers.

Revenue for the three and six months ended April 30, 2007, grew 15 percent and 19 percent, respectively, from the same periods last year. Chemical analysis and life sciences had year over year growth of 11 percent and 20 percent, respectively, for the second quarter and revenues of \$234 million and \$194 million, respectively. This performance was also reflected in the results for the six months ended April 30, 2007, as both segments had year over year growth of 16 percent for chemical analysis and 22 percent for life sciences.

Chemical analysis continues to see good demand for environmental and forensic testing solutions. Continued higher average oil prices have also driven demand for our petrochemical testing solutions. Environmental, one of our larger markets, had growth of approximately 14 percent for the three month and approximately 11 percent for the six month results compared to the same periods last year. This performance was driven by increased testing of drinking water, solid waste testing, and air monitoring, especially in China and India. Our forensics market also increased with year over year growth of over 30 percent and approximately 40 percent for the three and six months ended April 30, 2007. Increased drug use in select regions coupled with an expanded list of abused substances drove the demand for new testing protocols for this market. Petrochemical showed slower year over year growth in the second quarter compared with the same period last year, as customers transitioned to our new gas chromatography (GC) and gas chromatography/mass spectrometry (GC/MS) products pushing out revenues for this market into the third quarter. On a year to date basis, petrochemical grew nearly 20 percent versus the prior year, as this market continues to benefit from system replacements in Americas and Europe, construction of new refineries in India and China, and worldwide demand for alternative fuels s
