- (a) Income from this issue is considered a preference item for purposes of calculating the alternative minimum tax ( AMT ).
- (b) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2009.
- (c) Pre-Refunded bonds are escrowed with U.S. government obligations and/or U.S. government agency securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.
- (d) All or a portion of this security is held at the broker as collateral for open futures contracts.
- (e) Security is exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions that are exempt from registration, normally to qualified institutional buyers. This security has been deemed liquid pursuant to guidelines approved by the Board of Directors, unless otherwise noted.
- (f) Security is issued on a when-issued basis.
- (g) Bonds are escrowed to maturity by government securities and/or U.S. government agency securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.
- (h) Variable rate demand obligations have a demand feature under which the Fund can tender them back to the issuer on no more than 7 days notice. Date shown is the date of the next interest rate change.
- # Aggregate cost for federal income tax purposes is substantially the same.

**Bond Ratings (unaudited)**

The definitions of the applicable rating symbols are set forth below:

*Standard & Poor's Ratings Service (Standard & Poor's)* Ratings from AA to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standings within the major rating categories.

|                            |  |
|----------------------------|--|
| AAA                        | Bonds rated AAA have the highest rating assigned by Standard & Poor's. Capacity to pay interest and repay principal is extremely strong.   |
| AA                         | Bonds rated AA have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in a small degree.  |
| A                          | Bonds rated A have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.  |
| BBB                        | Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category than in higher rated categories.  |
| BB, B,<br>CCC,<br>CC and C | Bonds rated BB, B, CCC, CC and C are regarded, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB represents the lowest degree of speculation and C the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions. |
| D                          | Bonds rated D are in default and payment of interest and/or repayment of principal is in arrears.  |

*Moody's Investors Service (Moody's)* Numerical modifiers 1, 2 and 3 may be applied to each generic rating from Aaa to Caa, where 1 is the highest and 3 the lowest ranking within its generic category.

|     |  |
|-----|--|
| Aaa | Bonds rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as gilt edge. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes can be visualized as most unlikely to impair the fundamentally strong position of such issues.                             |
| Aa  | Bonds rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities. |
| A   | Bonds rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment some time in the future.   |
| Baa | Bonds rated Baa are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or   |

may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds rated Ba are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and therefore

**Bond Ratings (unaudited)(continued)**

|     |   |
|-----|---|
|     | not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.   |
| B   | Bonds rated B generally lack characteristics of desirable investments. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small. |
| Caa | Bonds rated Caa are of poor standing. These may be in default, or present elements of danger may exist with respect to principal or interest.   |
| Ca  | Bonds rated Ca represent obligations which are speculative in a high degree. Such issues are often in default or have other marked short-comings.   |
| C   | Bonds rated C are the lowest class of bonds and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.  |

*Fitch Ratings Service ( Fitch )* Ratings from AA to CCC may be modified by the addition of a plus (+) or minus ( ) sign to show relative standings within the major rating categories.

|                   |   |
|-------------------|---|
| AAA               | Bonds rated AAA have the highest rating assigned by Fitch. Capacity to pay interest and repay principal is extremely strong.  |
| AA                | Bonds rated AA have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in a small degree.   |
| A                 | Bonds rated A have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.   |
| BBB               | Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category than in higher rated categories.   |
| BB, B, CCC and CC | Bonds rated BB, B, CCC and CC are regarded, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB represents a lower degree of speculation than B, and CC the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions. |
| NR                | Indicates that the bond is not rated by Standard & Poor's, Moody's or Fitch.  |

**Short-Term Security Ratings**

|        |  |
|--------|--|
| SP-1   | Standard & Poor's highest rating indicating very strong or strong capacity to pay principal and interest; those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign.   |
| A-1    | Standard & Poor's highest commercial paper and variable-rate demand obligation (VRDO) rating indicating that the degree of safety regarding timely payment is either overwhelming or very strong; those issues determined to possess overwhelming safety characteristics are denoted with a plus (+) sign. |
| VMIG 1 | Moody's highest rating for issues having a demand feature VRDO.  |
| MIG1   | Moody's highest rating for short-term municipal obligations.   |
| P-1    | Moody's highest rating for commercial paper and for VRDO prior to the advent of the VMIG 1 rating.   |
| F1     | Fitch's highest rating indicating the strongest capacity for timely payment of financial commitments; those issues determined to possess overwhelming strong credit feature are denoted with a plus (+) sign.  |

**Notes to Schedule of Investments (unaudited)**

**1. Organization and Significant Accounting Policies**

Western Asset Municipal Partners Fund Inc. (the Fund) was incorporated in Maryland on November 24, 1992 and is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Board of Directors authorized 100 million shares of \$0.001 par value common stock. The Fund's primary investment objective is to seek a high level of current income which is exempt from federal income taxes, consistent with the preservation of capital. As a secondary investment objective, the Fund intends to enhance portfolio value by purchasing tax exempt securities that, in the opinion of the investment manager may appreciate in value relative to other similar obligations in the marketplace.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

**(a) Investment Valuation.** Securities are valued based on transactions in municipal obligations, quotations from municipal bond dealers, market transactions in comparable securities and various other relationships between securities. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. When prices are not readily available, or are determined not to reflect fair value, the Fund may value these securities at fair value as determined in accordance with the procedures approved by the Fund's Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value.

Effective January 1, 2008, the Fund adopted Statement of Financial Accounting Standards No. 157 (FAS 157). FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets carried at fair value:

|                              | March 31, 2009 | Quoted Prices<br>(Level 1) | Other Significant<br>Observable Inputs<br>(Level 2) | Significant<br>Unobservable<br>Inputs<br>(Level 3) |
|------------------------------|----------------|----------------------------|---|--|
| Investments in Securities    | \$ 209,791,967 |                            | \$ 209,791,967                                      |  |
| Other Financial Instruments* | (299,953)      | \$ (299,953)               |   |  |
| Total                        | \$ 209,492,014 | \$ (299,953)               | \$ 209,791,967                                      |  |

\* Other financial instruments include futures contracts.

**(b) Financial Futures Contracts.** The Fund may use futures contracts to gain exposure to, or hedge against, changes in the value of equities, interest rates or foreign currencies. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

Upon entering into a futures contract, the Fund is required to deposit with a broker cash or cash equivalents in an amount equal to a certain percentage of the contract amount. This is known as the initial margin. Subsequent payments ( variation margin ) are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses and the Fund recognizes a realized gain or loss when the contract is closed. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. With futures, there is minimal counterparty risk to the Fund since futures are exchange traded and the

**Notes to Schedule of Investments (unaudited) (continued)**

exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

The Fund may enter into futures contracts for various reasons, including in connection with their interest rate management strategy. Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. The change in the value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in interest rates, if applicable. In addition, there is the risk that a Fund may not be able to enter into a closing transaction because of an illiquid secondary market. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

**(c) Securities Traded on a When-Issued Basis**

The Fund may trade securities on a when-issued basis. In a when-issued transaction, the securities are purchased or sold by the Fund with payment and delivery taking place in the future in order to secure what is considered to be an advantageous price and yield to the Fund at the time of entering into the transaction. Purchasing such securities involves the risk of loss if the value of the securities declines prior to settlement. These securities are subject to market fluctuations and their current value is determined in the same manner as for other securities..

**(d) Security Transactions.** Security transactions are accounted for on a trade date basis.

**3. Investments**

At March 31, 2009, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

|                               |    |              |
|-------------------------------|----|--------------|
| Gross unrealized appreciation | \$ | 4,199,254    |
| Gross unrealized depreciation |    | (14,082,935) |
| Net unrealized depreciation   | \$ | (9,883,681)  |

At March 31, 2009, the Fund had the following open futures contracts:

|                            | Number<br>of<br>Contracts | Expiration<br>Date | Basis<br>Value | Market<br>Value | Unrealized<br>Loss |
|----------------------------|---------------------------|--------------------|----------------|-----------------|--------------------|
| <b>Contracts to Sell:</b>  |                           |                    |                |                 |                    |
| U.S. Treasury 30-Year Bond | 100                       | 6/09               | \$ 12,670,359  | \$ 12,970,312   | \$ (299,953)       |

Edgar Filing: WESTERN ASSET MUNICIPAL PARTNERS FUND INC. - Form N-Q

For the period ended March 31, 2009, the Fund held When-Issued securities with a total cost of \$730,770.

*Derivative Instruments and Hedging Activities*

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities, requires enhanced disclosure about an entity's derivative and hedging activities.

The following is a summary of the fair valuations of the Fund's derivative instruments categorized by risk exposure at March 31, 2009.

| Primary Underlying<br>Risk Disclosure | Unrealized<br>Appreciation | Futures Contracts | Unrealized<br>Depreciation | Total        |
|---------------------------------------|----------------------------|-------------------|----------------------------|--------------|
| Interest Rate Contracts               |                            | \$                | (299,953)                  | \$ (299,953) |
| Foreign Exchange Contracts            |                            |                   |                            |              |
| Credit Contracts                      |                            |                   |                            |              |
| Equity Contracts                      |                            |                   |                            |              |
| Other Contracts                       |                            |                   |                            |              |
| <b>Total</b>                          |                            | \$                | (299,953)                  | \$ (299,953) |

**Notes to Schedule of Investments (unaudited) (continued)**

**3. Recent accounting pronouncement**

In April 2009, the Financial Accounting Standards Board ( FASB ) issued FASB Staff Position No. 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly ( FSP 157-4 ). FSP 157-4 provides additional guidance for estimating fair value in accordance with FAS 157, when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate a transaction is not orderly. FSP 157-4 is effective for fiscal years and interim periods ending after June 15, 2009. Management is currently evaluating the impact the adoption of FSP 157-4 will have on the Fund 's financial statement disclosures.

ITEM 2. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act")) are effective as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the disclosure controls and procedures required by Rule 30a-3(b) under the 1940 Act and 15d-15(b) under the Securities Exchange Act of 1934.

(b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the registrant's last fiscal quarter that have materially affected, or are likely to materially affect the registrant's internal control over financial reporting.

ITEM 3. EXHIBITS.

Certifications pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are attached hereto.
