UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

for the quarterly period ended March 31, 2010

Transition report pursuant to Section 13 or 15(d) of the Exchange Act

for the transition period from to

Commission File No. 000-28344

FIRST COMMUNITY CORPORATION

(Exact name of registrant as specified in its charter)

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

South Carolina
(State of Incorporation)

57-1010751
(I.R.S. Employer Identification)

5455 Sunset Boulevard, Lexington, South Carolina 29072

(Address of Principal Executive Offices)

(803) 951-2265

(Registrant's Telephone Number, Including Area Code)

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date: On May 13, 2010, 3,257,490 shares of the issuer's common stock, par value \$1.00 per share, were issued and outstanding.

Cash and cash equivalents at beginning of period	20,844	12,367
Cash and cash equivalents at end of period	35,734	32,066
Supplemental disclosure:		
Cash paid during the period for:		
Interest	\$ 2,602	\$ 3,695
Income taxes	\$	\$ 350
Non-cash investing and financing activities:		
Unrealized gain (loss) on securities	\$ 554	\$ (925)
Transfer of loans to foreclosed property	\$ 1,972	\$ 681

Table of Contents**Notes to Consolidated Financial Statements****Note 1 - Basis of Presentation**

In the opinion of management, the accompanying unaudited consolidated balance sheets, the consolidated statements of income, the consolidated statements of changes in shareholders' equity, and the consolidated statements of cash flows of First Community Corporation (the Company), present fairly in all material respects the Company's financial position at March 31, 2010 and December 31, 2009, the Company's results of operations for the three months ended March 31, 2010 and 2009, and the Company's cash flows for the three months ended March 31, 2010 and 2009. The results of operations for the three months ended March 31, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

In the opinion of management, all adjustments necessary to fairly present the consolidated financial position and consolidated results of operations have been made. All such adjustments are of a normal, recurring nature. All significant intercompany accounts and transactions have been eliminated in consolidation. The consolidated financial statements and notes thereto are presented in accordance with the instructions for Form 10-Q. The information included in the Company's 2009 Annual Report on Form 10-K should be referred to in connection with these unaudited interim financial statements.

Note 2 Earnings Per Share

The following reconciles the numerator and denominator of the basic and diluted earnings per share computation:

(In thousands except average market price)

	Three months ended March 31,	
	2010	2009
Numerator (Net income available to common shareholders)	\$ 423	\$ 408
Denominator		
Weighted average common shares outstanding for:		
Basic earnings per share	3,238	3,231
Dilutive securities:		
Stock options - Treasury stock method		
Diluted earnings per share	3,238	3,231
The average market price used in calculating assumed number of shares	\$ 6.19	\$ 6.56

At March 31, 2010 there were 190,256 outstanding options at an average exercise price of \$13.28 and warrants for 196,000 shares at \$8.69. None of the options or warrants have an exercise price below the average market price of \$6.19 for the three-month period ended March 31,

2010 and therefore are not deemed to be dilutive.

Note 3 Assets and Liabilities Measured at Fair Value

In connection with the adoption of the Fair Value Option, the company adopted the requirements of the FASB ASC Fair Value Measurement Topic which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Fair Value Measurement Topic also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Table of Contents

Note 3 Assets and Liabilities Measured at Fair Value - continued

- Level 1** Quoted prices in active markets for identical assets or liabilities.
- Level 2** Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value on a recurring basis:

Investment Securities Available for Sale: Measurement is on a recurring basis based upon quoted market prices, if available. If quoted market prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for prepayment assumptions, projected credit losses, and liquidity. Level 1 securities include those traded on an active exchange or by dealers or brokers in active over-the-counter markets. Level 2 securities include mortgage-backed securities issued both issued by government sponsored enterprises and private label mortgage-backed securities. Generally these fair values are priced from established pricing models. Level 3 securities include corporate debt obligations and asset backed securities that are less liquid or for which there is an inactive market.

Investment Securities Held-to-Maturity: Investment securities that are held-to-maturity and considered other-than-temporarily-impaired are recorded at fair value in accordance with the FASB ASC Topic on Investments- Debt and Equity Securities on a non recurring basis. If the Company does not expect to recover the entire amortized cost basis of the security, other-than-temporary-impairment (OTTI) is considered to have occurred. See Note 4 for determining allocation between current earnings and comprehensive income. Measurement is based upon quoted market prices, if available. If quoted market prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for prepayment assumptions, projected credit losses, and liquidity. Level 2 securities include private label mortgage-backed securities. Generally these fair values are priced from established pricing models.

Loans: Loans that are considered impaired are recorded at fair value on a non-recurring basis. Once a loan is considered impaired measurement is based upon FASB ASC 310-10-35 Loan Impairment . The fair value is estimated using one of several methods, including collateral liquidation value, market value of similar debt and discounted cash flows. Those impaired loans not requiring a specific charge against the allowance represent loans for which the fair value of the expected repayments or collateral meet or exceed the recorded investment in the loan. At March 31, 2010, substantially all of the total impaired loans were evaluated based on the fair value of the underlying collateral. When the Company records the fair value based upon a current appraisal the fair value measurement is considered when a current appraisal is not available or there is estimated further impairment the measurement is considered a Level 3 measurement.

Other Real Estate Owned (OREO): OREO is carried at the lower of carrying value or fair value on a non-recurring basis. Fair value is based upon independent appraisals or management s estimation of the collateral. When the OREO value is based upon a current appraisal or when a current appraisal is not available or there is estimated further impairment the measurement is considered a Level 3 measurement.

Derivative Financial Instruments: Interest rate swaps and interest rate caps are carried at fair value and measured on a recurring basis. The measurement is based on valuation techniques including discounted cash flows analysis for each derivative. The analysis reflects the contractual remaining term of derivative, interest rates,

Table of Contents**Note 3 Assets and Liabilities Measured at Fair Value - continued**

volatility and expected cash payments. The measurement of the interest rate swap and cap are considered to be a Level 3 measurement.

Goodwill and Other Intangible Assets: Goodwill and other intangible assets are measured for impairment on an annual basis, as of September 30th, or more frequently if there is a change in circumstances. If the goodwill or other intangibles exceed the fair value, an impairment charge is recorded in an amount equal to the excess. Impairment is tested utilizing accepted valuation techniques utilizing discounted cash flows of the business unit, and implied fair value based on a multiple of earnings and tangible book value for merger transactions. The measurement of these fair values is considered a Level 3 measurement. The goodwill impairment test as of September 30, 2009, reflected impairment in the amount of \$27.8 million, and, as a result, the balance of goodwill was written off as of that date.

Federal Home Loan Bank Advances: Certain Federal Home Loan Bank advances are accounted for in accordance with the provisions of the Fair Value Option Topic. The fair value is calculated on a recurring basis using a discounted cash flow model based on current rate for advances with similar remaining terms. The measurement of these advances is considered Level 3 measurement.

The following tables reflect the changes in fair values for the three-month periods ended March 31, 2010 and 2009 and where these changes are included in the income statement:

	\$ 132,768	\$ 2,704	\$ 3,636	\$ 131,836

During the three months ended March 31, 2010 and March 31, 2009, the Company received proceeds of \$2,000 and \$11,187, respectively, from the sale of investment securities available-for-sale, amounting to gains of \$2,000 and \$354,000 in earnings for each respective period.

As prescribed by FASB ASC 320-10-35 for the quarter ended March 31, 2010, the Company recognized the credit component of an other-than-temporary impairment (OTTI) of its debt securities in earnings and the non-credit component in other comprehensive income (OCI) for those securities in which the Company does not intend to sell the security and it is more likely than not the Company will not be required to sell the securities prior to recovery.

Table of Contents**Note 4 Investment Securities continued**

At March 31, 2010 corporate and other securities available-for-sale included the following at fair value: corporate bonds at \$6.5 million, corporate debt obligations (CDOs) of \$4.8 million, mutual funds at \$878,000 and Federal Home Loan Mortgage Corporation preferred stock of \$388,000. At December 31, 2009 corporate and other securities available-for-sale included the following at fair value: corporate bonds at \$6.3 million, CDOs of \$4.9 million, mutual funds at \$865,000 and Federal Home Loan Mortgage Corporation preferred stock of \$348,000.

During the three months ended March 31, 2010 and March 31, 2009, the Company recorded other-than-temporary impairment losses on held-to-maturity and available-for-sale securities as follows:

(Dollars in thousands)

	Three months ended March 31, 2010			Three months ended March 31, 2009		
	Held-to-maturity mortgage-backed securities	Available-for-sale securities	Total	Held-to-maturity mortgage-backed securities	Available-for-sale securities	Total
Total OTTI charge realized and unrealized	\$ 28	\$ 115	\$ 143	\$ 1,301	\$ 510	\$ 1,811

Balance related to credit losses on debt securities at end of period	\$	207	\$	354	\$ 147

Table of Contents**Note 4 Investment Securities - continued**

As of March 31, 2010, those debt securities with OTTI in which only the amount of loss related to credit was recognized in earnings consisted of two non-agency mortgage backed securities. The Company uses a third party to obtain information about the structure in order to determine how the underlying cash flows will be distributed to each security. Relevant assumptions such as prepayment rate, default rate and loss severity on a loan level basis are used in determining the expected recovery of the remaining unrealized losses. The average prepayment rate, default rate and severity used in the valuations were approximately 11%, 5%, and 53%, respectively.

The following table shows gross unrealized losses and fair values, aggregated by investment category and length of time that individual securities have been in a continuous loss position at March 31, 2010 and December 31, 2009.

Table of Contents*Note 4 Investment Securities continued*

Government Sponsored Enterprise, Mortgage-Backed Securities: Beginning in 2008 and continuing through 2009 and into 2010 the bond markets and many institutional holders of bonds have come under a great deal of stress partially as a result of increasing delinquencies in the sub-prime mortgage lending market. At March 31, 2010, First Community Bank, N.A. (the Bank) owns mortgage-backed securities (MBSs) including collateralized mortgage obligations (CMOs) with a book value of \$77.0 million and approximate fair value of \$79.4 million issued by government sponsored entities (GSEs). Current economic conditions have impacted MBSs issued by GSEs such as FHLMC and FNMA. These entities have experienced increasing delinquencies in the underlying loans that make up the MBSs and CMOs. As of March 31, 2010 and December 31, 2009, all of the MBSs issued by GSEs are classified as Available for Sale. Unrealized losses on these investments are not considered to be other than temporary and we have the intent and ability to hold these until they mature or recover the current book value. The contractual cash flows of the investments are guaranteed by the GSE. Accordingly, it is expected that the securities would not be settled at a price less than the amortized cost of the Company's investment. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider the investments to be other-than-temporarily impaired at March 31, 2010.

Non-agency mortgage backed securities: The Company also holds private label mortgage-backed securities (PLMBSs) including CMOs at March 31, 2010 with an amortized cost of \$62.6 million and approximate fair value of \$54.6 million. Although these are not classified as sub-prime obligations or considered the high risk tranches, the majority of structured investments within all credit markets have been impacted by volatility and credit concerns and economic stresses throughout 2008 and continuing into 2009 and 2010. The result has been that the market for these investments has become less liquid and the spread as compared to alternative investments has widened dramatically. During the second quarter of 2008, the Company implemented a leverage strategy whereby we acquired approximately \$63.2 million in certain non-agency MBSs and CMOs. All of the mortgage assets acquired in this transaction were classified as prime or ALT-A securities and represented the senior or super-senior tranches of the securities. The assets acquired as part of this strategy were classified as held-to-maturity in the investment portfolio. Due to the significant spreads on these securities they were all purchased at discounts. A detailed analysis of each of the CMO pools included in this leverage transaction as well as privately held CMOs held previously in the available-for-sale portfolio have been analyzed by reviewing underlying loan delinquencies, collateral value and resulting credit support. These securities have continued to experience increasing delinquencies in the underlying loans that make up the MBSs and CMOs. Management monitors each of these pools on a quarterly basis to identify any deterioration in the credit quality, collateral values and credit support underlying the investments.

During the quarter ended March 31, 2010, the Company identified four PLMBS with a fair value of \$3.3 million that it considers other-than-temporarily-impaired. As prescribed by FASB ASC 320-10-65, the Company has recognized an impairment charge in earnings of \$75,500 and no impairment charge during the first quarter of 2010 through other comprehensive income. The \$75,500 represents the estimated credit losses on these securities for the quarter ended March 31, 2010. The credit losses were estimated by projecting the expected cash flows estimating prepayment speeds, increasing defaults and collateral loss severities. The credit loss portion of the impairment charge represents the difference between the present value of the expected cash flows and the amortized cost basis of the securities. The Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities before recovery of its amortized cost.

It is expected that the PLMBS portfolio will not be settled at a price less than the amortized cost of the Company's investment. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider the remaining balance of these investments to be other-than-temporarily impaired at March 31, 2010.

Table of Contents**Note 4 Investment Securities - continued**

The following table summarizes as of March 31, 2010 the number of CUSIPs, par value, carrying value and fair value of the non-agency mortgage-backed/CMOs securities by credit rating. The credit rating reflects the lowest credit rating by any major rating agency. All non-agency mortgage-backed /CMO securities are in the super senior or senior tranche.

(Dollars in thousands)

Credit Rating		Number of CUSIPs	Par Value	Amortized Cost	Fair Value
AAA	17	\$ 9,732	\$ 9,120	\$ 9,131	
AA1	1	2,694	2,595	2,110	
AA	2	4,848	4,678	4,559	
A1	1	3,873	3,642	3,523	
A3	1	414	414	411	
BAA1	1	466	583	466	
Below Investment Grade	19	45,469	41,556	34,363	
Total	42	\$ 67,496	\$ 62,588	\$ 54,563	

Corporate Bonds: The Company's unrealized loss on investments in corporate bonds relates to bonds with eight different issuers. The economic conditions throughout 2008, 2009 and 2010 have had a significant impact on all corporate debt obligations. As a result, the spreads on all of the securities have widened dramatically and the liquidity of many of these investments has been negatively impacted. Each of these bonds is rated BBB (investment grade) or better with the exception of four bonds downgraded below investment grade as of March 31, 2010. The first is rated C by Fitch and Ca by Moody and is a preferred term security with a par value of \$2.0 million, book value of \$1.90 million and fair value of \$941,000 (PRETSL XIII B class). During the quarter ended March 31, 2010, the Company identified this bond as other-than-temporarily-impaired and recognized an impairment charge for the credit component in earnings of \$67,000. The second bond was downgraded in 2009 and is a collateralized debt obligation (CDO ACE 2005-15 3A), rated CCC- by S&P, with a carrying value of \$998,000 and fair value of \$905,000. This bond matures in December 2010 and it is anticipated that we will receive the par value of the bond at maturity. The third bond is also a CDO, (ACE 2005 12AD) rated CCC+ by S&P and B3 by Moody's with a carrying value of \$4.9 million and a fair value of \$3.93 million and matures in July 2014. The fourth bond is rated Ba1 by Moody and BBB- S&P (SLMA O) with a carrying value of \$998,000 and a fair value of \$780,000 and matures in July 2014. All of the corporate bonds held by the Company are reviewed on a quarterly basis to identify downgrades by rating agencies as well as deterioration of the underlying collateral or the issuer's ability to service the debt obligation. Because the Company has the ability and it is more likely than not the Company can hold these investments until a recovery of fair value, which may be maturity, the Company does not consider the investments to be other-than-temporarily impaired at March 31, 2010, except to the extent OTTI has been previously recognized on the PRETSL XIII noted above.

Small Business Administration Pools: These pools are guaranteed pass-thru with the full faith and credit of the United States government. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider the investments to be other-than-temporarily impaired at March 31, 2010.

State and Local Governments and Other: The unrealized losses on these investments are attributable to increases in interest rates, rather than credit quality. Because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity,

the Company does not consider the investments to be other-than-temporarily impaired at March 31, 2010.

Table of Contents**Note 4 Investment Securities - continued**

The amortized cost and fair value of investment securities at March 31, 2010 by contractual maturity follow. Expected maturities differ from contractual maturities because borrowers may have the right to call or prepay the obligations with or without prepayment penalties. Mortgage-backed securities are based on average life at estimated prepayment speeds.

(Dollars in thousands)	Held-to-maturity		Available-for-sale	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 3,595	\$ 3,589	\$ 15,900	\$ 14,834
Due after one year through five years	17,361	15,340	64,636	65,089
Due after five years through ten years	23,817	20,437	35,956	35,301
Due after ten years	8,912	9,103	15,555	16,742
	\$ 53,685	\$ 48,469	\$ 132,047	\$ 131,966

Note 5 - Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting, and or disclosure of financial information by the Company.

In January 2010, compensation guidance was updated to reflect the SEC's views of when escrowed share arrangements are considered to be compensatory. Historically, the SEC staff has expressed the view that an escrowed share arrangement involving the release of shares to certain shareholders based on performance-related criteria is presumed to be compensatory. Facts and circumstances may indicate that the arrangement is an incentive made to facilitate a transaction on behalf of the company if the escrowed shares will be released or canceled without regard to continued employment. In such cases, the SEC staff generally believes that the arrangement should be recognized and measured according to its nature and reflected as a reduction of the proceeds allocated to the newly issued securities. The SEC staff believes that an escrowed share arrangement in which the shares are automatically forfeited if employment is terminated is compensation. The guidance is effective upon issuance and had no impact on the Company's financial statements.

In January 2010, fair value guidance was amended to require disclosures for significant amounts transferred in and out of Levels 1 and 2 and the reasons for such transfers and to require that gross amounts of purchases, sales, issuances and settlements be provided in the Level 3 reconciliation. The new disclosures are effective for the Company for the current quarter and have been reflected in the Fair Value footnote.

Guidance related to subsequent events was amended in February 2010 to remove the requirement for an SEC filer to disclose the date through which subsequent events were evaluated. The amendments were effective upon issuance and had no significant impact on the Company's financial statements.

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

Consolidation guidance was amended in February 2010 to defer guidance regarding the analysis of interests in variable interest entities issued in June 2009 for entities having attributes of investment companies or that apply investment company measurement principles. Disclosure requirements provided in the June 2009 guidance were not deferred. The amendments were effective January 1, 2010 and had no effect on the Company's financial statements.

In March 2010, guidance related to derivatives and hedging was amended to exempt embedded credit derivative features related to the transfer of credit risk from potential bifurcation and separate accounting. Embedded features related to other types of risk and other embedded credit derivative features were not exempt from potential bifurcation and separate accounting. The amendments will be effective for the Company on July 1, 2010 although early adoption is permitted. The Company does not expect these amendments to have any impact on the financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Table of Contents

Note 6 Fair Value of Financial Instruments

FASB ASC 825-10-50 Disclosure about Fair Value of Financial Instruments , requires the company to disclose estimated fair values for its financial instruments. Fair value estimates, methods, and assumptions are set forth below.

Cash and short term investments - The carrying amount of these financial instruments (cash and due from banks, federal funds sold and securities purchased under agreements to resell) approximates fair value. All mature within 90 days and do not present unanticipated credit concerns.

Investment Securities - Fair values are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments.

Loans - The fair value of loans are estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. As discount rates are based on current loan rates as well as management estimates, the fair values presented may not be indicative of the value negotiated in an actual sale.

Accrued Interest Receivable - The fair value approximates the carrying value.

Interest rate cap/floor - The fair value approximates the carrying value.

Deposits - The fair value of demand deposits, savings accounts, and money market accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposits is estimated by discounting the future cash flows using rates currently offered for deposits of similar remaining maturities.

Federal Home Loan Bank Advances - Fair value is estimated based on discounted cash flows using current market rates for borrowings with similar terms.

Short Term Borrowings - The carrying value of short term borrowings (securities sold under agreements to repurchase and demand notes to the U.S. Treasury) approximates fair value.

Junior Subordinated Debentures - The fair values of junior subordinated debentures is estimated by using discounted cash flow analyses based on incremental borrowing rates for similar types of instruments.

Accrued Interest Payable - The fair value approximates the carrying value.

Commitments to Extend Credit - The fair value of these commitments is immaterial because their underlying interest rates approximate market.

Table of Contents**Note 6 Fair Value of Financial Instruments - continued**

The carrying amount and estimated fair value of the Company's financial instruments are as follows:

(Dollars in thousands)	March 31, 2010		December 31, 2009

Note 7 Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Nonrecognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were available to be issued and, with the exception of the two items disclosed below, no additional subsequent events occurred requiring accrual or disclosure.

On April 6, 2010, First Community Bank, the subsidiary bank of First Community Corporation entered into a formal written agreement with the Office of the Comptroller of the Currency (OCC), our primary bank regulator. The Agreement is based on the findings of the OCC during a 2009 on-site examination of the Bank. As reflected in the Agreement, the OCC's primary concern with First Community Bank is driven by the rating agencies' downgrades of non-agency MBSs in its investment portfolio. These securities, purchased in 2004 through 2008, were all rated AAA by the rating agencies at the time of purchase; however, they have been impacted by the economic recession and the stress on the residential housing sector. These ratings do not reflect the discounted purchase price paid by the Bank. They only reflect their analysis of the performance of the security overall, and therefore, a downgrade does not capture the risk of loss to the Bank. The Agreement did not require any

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

adjustment to the Bank's balance sheet or income statement; nor did it change the Bank's well capitalized status. The OCC has separately established the following individual minimum capital ratios for the Bank: a Tier I leverage capital ratio of at least 8.00%, a Tier I

Table of Contents

risk-based capital ratio of at least 10.00%, and a Total risk-based capital ratio of at least 12.00%. As of March 31, 2010, the Bank exceeds these ratios. The Board of Directors has appointed an independent compliance committee made up of directors to monitor and report on compliance with the terms of the agreement. Management has already submitted revisions to certain policies to the OCC and anticipates that all of the revisions will be submitted by the end of May 2010.

Subsequent to March 31, 2010, we restructured a portion of our available-for-sale investments. We sold the CDO ACE 2005-12 AI, (see note 4 Corporate Bond section), and realized a loss in the amount of \$1.7 million. Approximately \$41.0 million in available-for-sale GSE bonds and MBSs were sold that realized a gain of approximately \$1.7 million. The funds received from this transaction were primarily invested in other securities that have a lower regulatory risk weighting such as GNMA mortgage-backed securities and SBA pools. Both of these types of securities carry a zero percent regulatory risk weighting and are backed by the full faith and credit of the United States Government. A significant portion of the proceeds were reinvested into adjustable rate securities. As a result of this transaction, we believe we have structured the balance sheet to continue to provide for improvement in our net interest margin in a rising interest rate environment, reduced the level of investments rated below investment grade as well as improved our overall regulatory capital ratios.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This report contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may relate to, among other matters, the financial condition, results of operations, plans, objectives, future performance, and business of our Company. Forward-looking statements are based on many assumptions and estimates and are not guarantees of future performance. Our actual results may differ materially from those anticipated in any forward-looking statements, as they will depend on many factors about which we are unsure, including many factors which are beyond our control. The words may, would, could, should, will, expect, anticipate, predict, project, potential, continue, assume, forecast, goal, and estimate, as well as similar expressions, are meant to identify such forward-looking statements. Potential risks and uncertainties that could cause our actual results to differ materially from those anticipated in our forward-looking statements include, without limitation, those described under the heading Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2009 as filed with the Securities and Exchange Commission (the SEC) and the following:

- increases in competitive pressure in the banking and financial services industries;
- our ability to comply with the terms of the formal written agreement between the Bank and the OCC within the timeframes specified;
- changes in the interest rate environment which could reduce anticipated or actual margins;
- changes in political conditions or the legislative or regulatory environment;
- reduced earnings due to higher credit losses generally and specifically potentially because losses in our real estate loan portfolio may be greater than expected due to economic factors, including declining real estate values, increasing interest rates, increasing unemployment, or changes in payment behavior or other factors;
- high concentrations of real estate-based loans collateralized by real estate in a weak commercial real estate market;
- general economic conditions, either nationally or regionally and especially in our primary service area, being less favorable than expected resulting in, among other things, a deterioration in credit quality;

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

- changes occurring in business conditions and inflation;
- changes in technology;
- changes in deposit flows;
- the adequacy of our level of allowance for loan loss;
- the rate of delinquencies and amounts of loans charged-off;
- the rates of loan growth;
- adverse changes in asset quality and resulting credit risk-related losses and expenses;
- the effect of final rules amending Regulation E that prohibit financial institutions from charging consumer fees for paying overdrafts on ATM and one-time debit card transactions, unless the consumer consents or opts-in to the overdraft service for those types of transactions;
- changes in monetary and tax policies;
- loss of consumer confidence and economic disruptions resulting from terrorist activities or other military actions;

Table of Contents

- changes in the securities markets; and
- other risks and uncertainties detailed from time to time in our filings with the SEC.

These risks are exacerbated by the developments over the last 24 months in national and international financial markets, and we are unable to predict what effect these uncertain market conditions will have on the Company. There can be no assurance that the unprecedented developments experienced over the last 24 months will not materially and adversely affect our business, financial condition and results of operations.

All forward-looking statements in this report are based on information available to us as of the date of this report. Although we believe that the expectations reflected in our forward-looking statements are reasonable, we cannot guarantee you that these expectations will be achieved. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Overview

The following discussion describes our results of operations for the quarter ended March 31, 2010 as compared to the quarter ended March 31, 2009 and also analyzes our financial condition as of March 31, 2010 as compared to December 31, 2009. Like most community banks, we derive most of our income from interest we receive on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities.

There are risks inherent in all loans, so we maintain an allowance for loan losses to absorb probable losses on existing loans that may become uncollectible. We establish and maintain this allowance by charging a provision for loan losses against our operating earnings. In the following section we have included a discussion of this process, as well as several tables describing our allowance for loan losses and the allocation of this allowance among our various categories of loans.

In addition to earning interest on our loans and investments, we earn income through fees and other expenses we charge to our customers. We describe the various components of this non-interest income, as well as our non-interest expense, in the following discussion.

The following discussion and analysis also identifies significant factors that have affected our financial position and operating results during the periods included in the accompanying financial statements. We encourage you to read this discussion and analysis in conjunction with the financial statements and the related notes and the other statistical information also included in this report.

Critical Accounting Policies

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our unaudited consolidated financial statements as of March 31, 2010 and our notes included in the consolidated financial statements in our 2009 Annual Report on Form 10-K as filed with the SEC.

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgment and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgment and assumptions we make, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

We believe the allowance for loan losses is the critical accounting policy that requires the most significant judgment and estimates used in preparation of our consolidated financial statements. Some of the more critical judgments

Table of Contents

supporting the amount of our allowance for loan losses include judgments about the credit worthiness of borrowers, the estimated value of the underlying collateral, the assumptions about cash flow, determination of loss factors for estimating credit losses, the impact of current events, and conditions, and other factors impacting the level of probable inherent losses. Under different conditions or using different assumptions, the actual amount of credit losses incurred by us may be different from management's estimates provided in our consolidated financial statements. Refer to the portion of this discussion that addresses our allowance for loan losses for a more complete discussion of our processes and methodology for determining our allowance for loan losses.

The evaluation and recognition of other-than-temporary impairment (OTTI) on certain investments including our private label mortgage-backed securities and other corporate debt security holdings requires significant judgment and estimates. Some of the more critical judgments supporting the evaluation of OTTI include projected cash flows including prepayment assumptions, default rates and severities of losses on the underlying collateral within the security. Under different conditions or utilizing different assumptions, the actual OTTI recognized by us may be different from the actual amounts recognized in our consolidated financial statements. See Note 4 to the financial statements for the disclosure of certain of the assumptions used as well as OTTI recognized in the financial statements during the three months ended March 31, 2010 and 2009.

Recent Legislative and Regulatory Initiatives to Address Financial and Economic Crises.

The Congress, Treasury and the federal banking regulators, including the FDIC, have taken broad action since early September 2008 to address volatility in the U.S. banking system.

In October 2008, the Emergency Economic Stabilization Act of 2008 (EESA) was enacted. The EESA authorizes the Treasury to purchase from financial institutions and their holding companies up to \$700 billion in mortgage loans, mortgage-related securities and certain other financial instruments, including debt and equity securities issued by financial institutions and their holding companies in a Troubled Asset Relief Program (TARP). The purpose of TARP is to restore confidence and stability to the U.S. banking system and to encourage financial institutions to increase their lending to customers and to each other. The Treasury has allocated \$250 billion towards the TARP Capital Purchase Program (CPP). Under the CPP, the Treasury will purchase debt or equity securities from participating institutions. The TARP also will include direct purchases or guarantees of troubled assets of financial institutions. Participants in the CPP are subject to executive compensation limits and are encouraged to expand their lending and mortgage loan modifications.

On November 21, 2008 as part of the TARP CPP, First Community Corporation entered into a Letter Agreement and Securities Purchase Agreement (collectively, the CPP Purchase Agreement) with the Treasury, pursuant to which First Community sold (i) 11,350 shares of First Community's Fixed Rate Cumulative Perpetual Preferred Stock, Series T (the Series T Preferred Stock) and (ii) a warrant (the CPP Warrant) to purchase 195,915 shares of First Community's common stock for an aggregate purchase price of \$11,350,000 in cash.

The Series T Preferred Stock qualifies as Tier 1 capital and is entitled to cumulative dividends at a rate of 5% per annum for the first five years, and 9% per annum thereafter. However, First Community currently must consult with the Federal Reserve before it pays these dividends and must consult with the OCC before it may redeem the Series T Preferred Stock. Contrary to the original restrictions in the EESA, however, it will not necessarily be required to raise additional equity capital in order to redeem this stock. The CPP Warrant has a 10-year term and is immediately exercisable upon its issuance, with an exercise price, subject to anti-dilution adjustments, equal to \$8.69 per share of the common stock. Please see the Form 8-K we filed with the SEC on November 25, 2008, for additional information about the Series T Preferred Stock and the CPP Warrant.

EESA also increased FDIC deposit insurance on most accounts from \$100,000 to \$250,000. This increase is in place until the end of 2010 and is not covered by deposit insurance premiums paid by the banking industry.

Following a systemic risk determination, the FDIC established the TLGP on October 14, 2008. The TLGP includes the TAGP, which provides unlimited deposit insurance coverage through December 31, 2010 for noninterest-bearing transaction accounts (typically business checking accounts) and certain funds swept into noninterest-bearing savings accounts. Institutions participating in the TLGP pay a 10 basis points fee (annualized) on the balance of each covered account in excess of \$250,000, while the extra deposit insurance is in place. The TLGP also includes the

Table of Contents

Debt Guarantee Program (DGP), under which the FDIC guarantees certain senior unsecured debt of FDIC-insured institutions and their holding companies. The unsecured debt must be issued on or after October 14, 2008 and not later than June 30, 2009, and the guarantee is effective through the earlier of the maturity date or June 30, 2012. On March 17, 2009, the FDIC adopted an interim rule that extends the DGP and imposes surcharges on existing rates for certain debt issuances. This extension allows institutions that have issued guaranteed debt before April 1, 2009 to issue guaranteed debt during the extended issuance period that ends on October 31, 2009. For such institutions, the guarantee on debt issued on or after April 1, 2009, will expire no later than December 31, 2012. The DGP coverage limit is generally 125% of the eligible entity's eligible debt outstanding on September 30, 2008 and scheduled to mature on or before June 30, 2009 or, for certain insured institutions, 2% of their liabilities as of September 30, 2008. Depending on the term of the debt maturity, the nonrefundable DGP fee ranges from 60 to 110 basis points (annualized) for covered debt outstanding until the earlier of maturity or June 30, 2012 and 75 to 125 basis points (annualized) for covered debt outstanding until after June 30, 2012. The TAGP and DGP are in effect for all eligible entities, unless the entity opted out on or before December 5, 2008. We are participating in the TAGP, but opted out of the DGP.

On February 10, 2009, the Treasury announced the Financial Stability Plan, which earmarked \$350 billion of the TARP funds authorized under EESA. Among other things, the Financial Stability Plan includes:

- A capital assistance program that invested in mandatory convertible preferred stock of certain qualifying institutions determined on a basis and through a process similar to the Capital Purchase Program;
- A consumer and business lending initiative to fund new consumer loans, small business loans and commercial mortgage asset-backed securities issuances;
- A public-private investment fund that is intended to leverage public and private capital with public financing to purchase up to \$500 billion to \$1 trillion of legacy toxic assets from financial institutions; and
- Assistance for homeowners by providing up to \$75 billion to reduce mortgage payments and interest rates and establishing loan modification guidelines for government and private programs.

On February 17, 2009, the American Recovery and Reinvestment Act (the Recovery Act) was signed into law in an effort to, among other things, create jobs and stimulate growth in the United States economy. The Recovery Act specifies appropriations of approximately \$787 billion for a wide range of Federal programs and will increase or extend certain benefits payable under the Medicaid, unemployment compensation, and nutrition assistance programs. The Recovery Act also reduces individual and corporate income tax collections and makes a variety of other changes to tax laws. The Recovery Act also imposes certain limitations on compensation paid by participants in the TARP.

On March 23, 2009, the Treasury, in conjunction with the FDIC and the Federal Reserve, announced the Public-Private Partnership Investment Program for Legacy Assets which consists of two separate plans, addressing two distinct asset groups:

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

- The first plan is the Legacy Loan Program, which has a primary purpose to facilitate the sale of troubled mortgage loans by eligible institutions, including FDIC-insured federal or state banks and savings associations. Eligible assets are not strictly limited to loans; however, what constitutes an eligible asset will be determined by participating banks, their primary regulators, the FDIC and the Treasury. Under the Legacy Loan Program, the FDIC has sold certain troubled assets out of an FDIC receivership in two separate transactions relating to the failed Illinois bank, Corus Bank, NA, and the failed Texas bank, Franklin Bank, S.S.B. These transactions were completed in September 2009 and October 2009, respectively.
- The second plan is the Securities Program, which is administered by the Treasury and involves the creation of public-private investment funds to target investments in eligible residential mortgage-backed securities and commercial mortgage-backed securities issued before 2009 that originally were rated AAA or the equivalent by two or more nationally recognized statistical rating organizations, without regard to rating enhancements (collectively, Legacy Securities). Legacy Securities must be directly secured by actual mortgage loans, leases or other assets, and may be purchased only from financial institutions that meet TARP eligibility requirements. Treasury

Table of Contents

received over 100 unique applications to participate in the Legacy Securities PPIP and in July 2009 selected nine public-private investment fund managers. As of December 31, 2009, public-private investment funds have completed initial and subsequent closings on approximately \$6.2 billion of private sector equity capital, which was matched 100% by Treasury, representing \$12.4 billion of total equity capital. Treasury has also provided \$12.4 billion of debt capital, representing \$24.8 billion of total purchasing power. As of December 31, 2009, public-private investment funds have drawn-down approximately \$4.3 billion of total capital which has been invested in certain non-agency residential mortgage backed securities and commercial mortgage backed securities and cash equivalents pending investment.

On May 22, 2009, the FDIC levied a one-time special assessment on all banks which was paid on September 30, 2009.

On November 12, 2009, the FDIC issued a final rule to require banks to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012 and to increase assessment rates effective on January 1, 2011.

Although it is likely that further regulatory actions will arise as the Federal government attempts to address the economic situation, we cannot predict the effect that fiscal or monetary policies, economic control, or new federal or state legislation may have on our business and earnings in the future.

Insurance of Accounts and Regulation by the FDIC. The deposits at our bank are insured up to applicable limits by the Deposit Insurance Fund of the FDIC. The Deposit Insurance Fund is the successor to the Bank Insurance Fund and the Savings Association Insurance Fund, which were merged effective March 31, 2006. As insurer, the FDIC imposes deposit insurance premiums and is authorized to conduct examinations of and to require reporting by FDIC insured institutions. It also may prohibit any FDIC insured institution from engaging in any activity the FDIC determines by regulation or order to pose a serious risk to the insurance fund. The FDIC also has the authority to initiate enforcement actions against savings institutions, after giving the Office of Thrift Supervision an opportunity to take such action, and may terminate the deposit insurance if it determines that the institution has engaged in unsafe or unsound practices or is in an unsafe or unsound condition.

Under regulations effective January 1, 2007, the FDIC adopted a new risk-based premium system that provides for quarterly assessments based on an insured institution's ranking in one of four risk categories based upon supervisory and capital evaluations. For deposits held as of March 31, 2010, institutions are assessed at annual rates ranging from 12 to 50 basis points, depending on each institution's risk of default as measured by regulatory capital ratios and other supervisory measures. Effective April 1, 2009, assessments take into account each institution's reliance on secured liabilities and brokered deposits. This resulted in assessments ranging from 7 to 77.5 basis points. In May 2009, the FDIC issued a final rule which levied a special assessment applicable to all insured depository institutions totaling 5 basis points of each institution's total assets less Tier 1 capital as of June 30, 2009, not to exceed 10 basis points of domestic deposits. This special assessment was part of the FDIC's efforts to rebuild the Deposit Insurance Fund. We paid this onetime special assessment in the amount of \$300 thousand to the FDIC at the end of the third quarter 2009.

In November 2009, the FDIC issued a rule that required all insured depository institutions, with limited exceptions, to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. The FDIC also adopted a uniform three-basis point increase in assessment rates effective on January 1, 2011. In December 2009, we paid \$ 2.9 million in prepaid risk-based assessments. At March 31, 2010 remaining \$2.5 million in prepaid deposit insurance is included in accrued interest receivable and other assets in the accompanying balance sheet as of March 31, 2010.

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

FDIC insured institutions are required to pay a Financing Corporation assessment, in order to fund the interest on bonds issued to resolve thrift failures in the 1980s. For the first quarter of 2010, the Financing Corporation assessment equaled 1.14 basis points for domestic deposits. These assessments, which may be revised based upon the level of deposits, will continue until the bonds mature in the years 2017 through 2019.

The FDIC may terminate the deposit insurance of any insured depository institution, including the bank, if it

Table of Contents

determines after a hearing that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the OCC. It also may suspend deposit insurance temporarily during the hearing process for the permanent termination of insurance, if the institution has no tangible capital. If insurance of accounts is terminated, the accounts at the institution at the time of the termination, less subsequent withdrawals, shall continue to be insured for a period of six months to two years, as determined by the FDIC. Management of the bank is not aware of any practice, condition or violation that might lead to termination of the bank's deposit insurance.

Comparison of Results of Operations for Three Months Ended March 31, 2010 to the Three Months Ended March 31, 2009

Net Income

Our net income for the three months ended March 31, 2010 was \$589,000, or \$0.13 diluted earnings per share, as compared to \$572,000 or \$0.13 diluted earnings per share, for the three months ended March 31, 2009. The slight increase in net income between the two periods is primarily due to an increase of \$397,000 in net interest income and a lower effective tax rate between the two periods. The effect of these positive changes were offset by an increase in the provision for loan losses of \$99,000, a decrease in non-interest income of \$226,000 and an increase in non-interest expense of \$162,000 between the two periods. Average earning assets decreased by \$18.3 million in the first quarter of 2010 as compared to the same period in 2009. Average earning assets were \$572.9 million during the three months ended March 31, 2009 as compared to \$554.7 million during the three months ended March 31, 2010. The decrease in average earning assets was a result of prepaying approximately \$27.0 million in Federal Home Loan Bank advances late in the fourth quarter of 2009 as well as repaying \$3.3 million in maturing advances in the first quarter of 2010. Despite the decrease in average earning assets, we realized an increase in net interest income of \$397,000 in the first three months of 2010 as compared to the first three months of 2009 as a result of a 38 basis point increase in our net interest margin on a tax equivalent basis.

Net Interest Income

Please refer to the table at the end of this Item 2 for the yield and rate data for interest-bearing balance sheet components during the three-month periods ended March 31, 2010 and 2009, along with average balances and the related interest income and interest expense amounts.

Net interest income was \$4.7 million for the three months ended March 31, 2010 as compared to \$4.3 million for the three months ended March 31, 2009. This increase was due to an increase in our net interest margin. The net interest margin on a taxable equivalent basis increased by 38 basis points from 3.08% at March 31, 2009 to 3.46% at March 31, 2010. The yields on earning assets decreased by 38 basis points in the first quarter of 2010 as compared to the same period in 2009. The yield on earning assets for the three months ended March 31, 2010 and 2009 was 5.23% and 5.61%, respectively. The cost of interest-bearing liabilities during the first three months of 2010 was 2.04% as compared to 2.85% in the same period of 2009, resulting in a 81 basis points decrease. As a result of the ongoing recessionary economic conditions during 2008, throughout 2009 and thus far in 2010, interest rates continue to remain at historically low levels. There were three primary contributors to the improvement in the net interest margin. First, the repricing of time deposits has resulted in the cost of those funds decreasing by 125 basis points during the first quarter of 2010 as compared to the same period in 2009. Second, during the fourth quarter of 2009, we prepaid \$27.0 million in Federal Home Loan Bank advances which contributed to an 18 basis point decrease in cost of other borrowed funds in the first quarter of 2010 as compared to the same period in 2009. Third, the percentage of non-interest bearing deposits supporting our total funding sources increased from 11.5% in the first quarter of 2009 to 13.3% in the same period of 2010.

Provision and Allowance for Loan Losses

At March 31, 2010 and December 31, 2009, the allowance for loan losses was \$4.9 million, or 1.42% and 1.41% of total loans, respectively. Our provision for loan losses was \$550,000 for the three months ended March 31, 2010, as compared to \$451,000 for the three months ended March 31, 2009. This provision is made based on our assessment of general loan loss risk and asset quality. The allowance for loan losses represents an amount which we believe will be adequate to absorb probable losses on existing loans that may become uncollectible. Our judgment as to the

Table of Contents

adequacy of the allowance for loan losses is based on a number of assumptions about future events, which we believe to be reasonable, but which may or may not prove to be accurate. Our determination of the allowance for loan losses is based on evaluations of the collectability of loans, including consideration of factors such as the balance of impaired loans, the quality, mix, and size of our overall loan portfolio, the experience ability and depth of lending personnel, economic conditions (local and national) that may affect the borrower's ability to repay, the amount and quality of collateral securing the loans, our historical loan loss experience, and a review of specific problem loans. We also consider subjective issues such as changes in the lending policies and procedures, changes in the local/national economy, changes in volume or type of credits, changes in volume/severity of problem loans, quality of loan review and board of director oversight, and concentrations of credit. Periodically, we adjust the amount of the allowance based on changing circumstances. We charge recognized losses to the allowance and add subsequent recoveries back to the allowance for loan losses.

We perform an analysis quarterly to assess the risk within the loan portfolio. The portfolio is segregated into similar risk components for which historical loss ratios are calculated and adjusted for identified changes in current portfolio characteristics. Historical loss ratios are calculated by product type and by regulatory credit risk classification. The allowance consists of an allocated and unallocated allowance. The allocated portion is determined by types and ratings of loans within the portfolio. The unallocated portion of the allowance is established for losses that exist in the remainder of the portfolio and compensates for uncertainty in estimating the loan losses. There can be no assurance that charge-offs of loans in future periods will not exceed the allowance for loan losses as estimated at any point in time or that provisions for loan losses will not be significant to a particular accounting period. The allowance is also subject to examination and testing for adequacy by regulatory agencies, which may consider such factors as the methodology used to determine adequacy and the size of the allowance relative to that of peer institutions. Such regulatory agencies could require us to adjust our allowance based on information available to them at the time of their examination.

The increase in the provision for the first three months of 2010 as compared to the same period in 2009 is a result of the ongoing economic downturn experienced throughout our markets and the country. Real estate values have been dramatically impacted during the current economic cycle. With our loan portfolio consisting of a large percentage of real estate secured loans, we like most financial institutions, have experienced increasing delinquencies and problem loans. In some cases, this downturn has resulted in an impairment to the value of our collateral and our ability to sell the collateral upon foreclosure. There is a risk that this trend will continue. The real estate collateral in each case provides an alternate source of repayment in the event of default by the borrower and may deteriorate in value during the time the credit is extended. If real estate values continue to decline, it is also more likely that we would be required to increase our allowance for loan losses. If during a period of reduced real estate values we are required to liquidate the property collateralizing a loan to satisfy the debt or to increase the allowance for loan losses, it could materially reduce our profitability and adversely affect our financial condition.

The effects of the slowing economy have resulted in some deterioration of our loan portfolio in general as evidenced by the increase in non-performing assets from \$8.3 million (1.37% of total assets) at December 31, 2009 to \$9.1 million (1.47% of total assets) at March 31, 2010. While we believe these ratios are favorable in comparison to current industry results, we continue to be concerned about the impact of this economic environment on our customer base of local businesses and professionals. There are 33 loans included in non-performing status (non-accrual loans and loans past due 90 days and still accruing). The largest is for \$828,000 and is secured by a first lien on a single family residential property. The average balance of the remaining 32 loans is approximately \$101,000 and the majority of these loans are secured by first mortgage liens. At the time the loans are placed in non-accrual status, we typically obtain an updated evaluation and generally, if the loan balance exceeds fair value, write the balance down to the fair value. At March 31, 2010, we had \$67,000 in loans delinquent more than 90 days and still accruing interest, and loans totaling \$3.6 million that were delinquent 30 days to 89 days. We anticipate that all of the principal and interest will be collected on those loans greater than 90 days or more delinquent and still accruing interest.

Our management continuously monitors non-performing, classified and past due loans, to identify deterioration regarding the condition of these loans. We have identified 4 loan relationships in the amount of \$3.8 million that are current as to principal and interest and not included in non-performing assets that could represent potential problem loans. Two of these relationships are in the amount of \$1.5 million each. The first includes a first and second mortgage totaling \$1.0 million on a single family residential property as well as mortgages on several investment properties totaling \$500,000. Subsequent to the quarter ending March 31, 2010, the borrower indicated he would be

Table of Contents

unable to make further payments on his personal residential loans. The loans totaling \$1.0 million have subsequently been placed in non-accrual status and written down by approximately \$135,000 based on a current appraisal. The additional investment properties secured by the \$500,000 loan are occupied and it is not anticipated that we will incur any significant losses. The second relationship in the amount of \$1.5 million is a mortgage on a developed parking complex in Columbia, whereby individual parking spaces are to be sold to individuals. We are in the process of obtaining a new appraisal but it is not anticipated that we will incur a material loss if we are required to foreclose on the property in the future. The other two relationships are in the amount of \$349,000 and \$448,000, and each relationship has previously been in delinquent status and brought current. These loans are on various investment properties and it is not anticipated that we would have a material loss in the event we should subsequently foreclose on the properties.

Table of ContentsAllowance for Loan Losses

(Dollars in thousands)	Three Month Ended	
	2010	2009
Average loans outstanding	\$ 343,559	\$ 332,404
Loans outstanding at period end	\$ 342,203	\$ 330,208
Non-performing assets:

Consumer	268	10.6%	133	10.6%
Unallocated	1,019	N/A	991	N/A
Total	\$ 4,868	100.0%	\$ 4,854	100.0%

Accrual of interest is discontinued on loans when management believes, after considering economic and business conditions and collection efforts that a borrower's financial condition is such that the collection of interest is doubtful. A delinquent loan is generally placed in nonaccrual status when it becomes 90 days or more past due. At the time a loan is placed in nonaccrual status, all interest, which has been accrued on the loan but remains unpaid is reversed and deducted from earnings as a reduction of reported interest income. No additional interest is accrued on the loan balance until the collection of both principal and interest becomes reasonably certain.

Non-interest Income and Non-interest Expense

Non-interest income during the first quarter of 2010 was \$822,000 as compared to \$1.0 million during the same period in 2009. Deposit service charges decreased \$71,000 and mortgage origination fees decreased \$93,000. Commissions on the sale of non-deposit investment products increased \$25,000. The decrease in deposit service charges results from a lower level of overdraft protection fees due to a decrease in the number of items being presented on insufficient funds. Recent changes to Regulation E that become effective on July 1, 2010 for new customers and August 15, 2010 for existing customers require that customers affirmatively opt in to our overdraft protection program. To the extent customers, who have utilized this product, do not opt in this will reduce fees related to the program that result from ATM and point of sale transactions. Mortgage origination fees decreased primarily as a result of a lower level of refinancing activity in the first quarter of 2010 as compared to the same period of 2009. In addition, changes to underwriting and appraisal requirements established by FNMA and FHLMC as well as changes in regulatory environment have resulted in making it harder for individuals to qualify for loans. Fees related to investment advisory and sale of non-deposit investment products increased \$25,000. The increase is a result of our continued emphasis on this source of revenue. In the three months ended March 31, 2009, we had gains on the sale of securities in the amount of \$354,000, as compared to \$2,000 in the comparable period of 2010. The proceeds from the sale of certain agency mortgage backed securities in the first quarter of 2009 were primarily reinvested in other agency mortgage-backed securities (GNMA securities) with lower regulatory risk weightings and slightly longer maturities. Other-than-temporary-impairment charges of \$143,000 (credit component) on four private label mortgage backed securities were recognized during the first three months of 2010 (see note 4 to financial statements). We engaged a third party to obtain information about structure and anticipated cash flows and to assist us in evaluating and monitoring our private label mortgage backed securities portfolio. During the first quarter of 2009, we recognized other-than-temporary impairment charges in the amount of \$657,000 on three investments. The first charge in the amount of \$510,000 was an equity investment in another financial institution that was closed by the OCC and placed into receivership on May 1, 2009. The charge of \$510,000 represented the entire balance of the

Table of Contents

investment and we do not have any additional exposure to this financial institution. An additional charge of \$147,000 (credit component) was taken on two private label mortgage backed securities (see note 4 to financial statements).

Total non-interest expense increased by \$162,000 or 4.0%, during the first quarter of 2010, as compared to the same quarter in 2009. Salary and benefit expense increased by \$114,000 from \$2.0 million in the first quarter of 2009 to \$2.1 million in the first quarter of 2010. This increase is primarily a result of normal salary adjustments made over the last twelve months. FDIC insurance assessments increased by \$83,000 in the first quarter of 2010 as compared to the same period in 2009. The assessment rate for the first quarter of 2010 was approximately 17 basis points. It is anticipated that this rate will increase to approximately 22 basis points for the remainder of 2010. In November 2009, all insured institutions, with limited exceptions, were required to prepay insurance assessments for a three year period. Our prepayment made in December 2009 totaled approximately \$2.9 million. At March 31, 2010 the remaining prepaid insurance assessment amounted to \$2.5 million and is included in Other assets. The other changes in non-interest expense categories reflect normal modest fluctuations between the two periods.

The following is a summary of the components of other non-interest expense:

(In thousands)	Three months ended			
	2010		March 31, 2009	
Data processing	\$	93	\$	80
Supplies		30		56
Telephone		77		76
Correspondent services		9		21
Insurance		51		50
Postage		48		49
Professional fees		289		353
Director fees		62		50
Other		348		274
	\$	1,007	\$	1,009

Income Tax Expense

Our effective tax rate was 25.7% and 35.2% in the first quarter of 2010 and 2009, respectively. The higher effective tax rate in 2009 is primarily a result of the other-than-temporary charge on the equity investment incurred during the quarter. The capital loss is only deductible to the extent we have capital gains that it can be offset against. Our effective tax rate is currently expected to remain between 28.0% to 30.0% throughout the remainder of 2010.

Financial Position

Assets totaled \$617.5 million at March 31, 2010 as compared to \$605.8 million at December 31, 2009, an increase of \$11.7 million. Loans at March 31, 2010 were \$342.2 million as compared to \$344.2 million at December 31, 2009. We funded in excess of \$12.4 million of new loan production in the first quarter of 2010, but due to scheduled pay downs during the period as well as transfers from loans to other real estate owned loans, new loan production declined by \$2.0 million. At March 31, 2010, loans accounted for 60.8% of earning assets, as compared to

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

62.1% at December 31, 2009. The loan-to-deposit ratio at March 31, 2010 was 73.6% as compared to 76.6% at December 31, 2009. Investment securities decreased from \$195.8 million at December 31, 2009 to \$193.6 million at March 31, 2010. Short-term federal funds sold and interest-bearing bank balances increased from \$14.1 million at December 31, 2009 to \$27.5 million at March 31, 2010. Deposits increased by \$15.6 million to \$465.2 million at March 31, 2010 as compared to \$449.6 million at December 31, 2009. Due to the current economic cycle and the significant emphasis by regulators and the investment community on tangible capital, regulatory capital ratios and overall liquidity, we have attempted to control the growth of our balance sheet and enhance our liquidity during the first quarter of 2010. We have focused on growing our core deposit base while continuing to fund soundly underwritten loans. To enhance our liquidity and improve our exposure to rising interest rates (see Market Risk Management section), the growth in deposits was primarily invested in interest-bearing deposits with the Federal Reserve Bank of Richmond.

Table of Contents

Subsequent to March 31, 2010, we restructured a portion of our available-for-sale investments. We sold a CDO with a carrying value of \$4.9 million and realized a loss in the amount of \$1.7 million. This security had been previously downgraded to below investment grade (See Note 4 to financial statements) and did not mature until July 2014. Approximately \$41.0 million in GSE bonds and mortgage-backed securities were sold that realized a gain of approximately \$1.7 million. The funds received from this transaction were primarily invested in other securities that have a lower regulatory risk weighting such as GNMA mortgage-backed securities and SBA pools. Both of these types of securities carry a zero percent regulatory risk weighting and are backed by the full faith and credit of the United States Government. A significant portion of the proceeds were reinvested into adjustable rate securities. As a result of this transaction, we believe we have structured the balance sheet to continue to provide for improvement in our net interest margin in a rising interest rate environment, reduced the level of investments rated below investment grade, as well as improved our overall regulatory capital ratios.

The following table shows the composition of the loan portfolio by category:

(In thousands)	March 31, 2010		December 31, 2009	
	Amount	Percent	Amount	Percent
Commercial, financial & agricultural	\$ 22,194	6.5%	\$ 22,758	6.6%
Real estate:				
Construction	16,871	4.9%	19,972	5.8%
Mortgage residential	50,017	14.6%	50,985	14.8%
Mortgage commercial	216,955	63.4%	214,178	62.2%
Consumer	36,166	10.6%	36,294	10.6%
Total gross loans	342,203	100.0%	344,187	100.0%
Allowance for loan losses	(4,868)		(4,854)	
Total net loans	\$ 337,335		\$ 339,333	

In the context of this discussion, a real estate mortgage loan is defined as any loan, other than loans for construction purposes and advances on home equity lines of credit, secured by real estate, regardless of the purpose of the loan. Advances on home equity lines of credit are included in consumer loans. We follow the common practice of financial institutions in our market areas of obtaining a security interest in real estate whenever possible, in addition to any other available collateral. This collateral is taken to reinforce the likelihood of the ultimate repayment of the loan and tends to increase the magnitude of the real estate loan components. Generally we limit the loan-to-value ratio to 80%.

Market Risk Management

The effective management of market risk is essential to achieving our strategic financial objectives. Our most significant market risk is interest rate risk. We have established an Asset/Liability Management Committee (ALCO) to monitor and manage interest rate risk. The ALCO monitors and manages the pricing and maturity of assets and liabilities in order to diminish the potential adverse impact that changes in interest rates could have on net interest income. The ALCO has established policy guidelines and strategies with respect to interest rate risk exposure and liquidity.

A monitoring technique employed by the ALCO is the measurement of interest sensitivity gap, which is the positive or negative dollar difference between assets and liabilities that are subject to interest rate repricing within a given period of time. Also, asset/liability simulation modeling is

performed to assess the impact varying interest rates and balance sheet mix assumptions will have on net interest income. Interest rate sensitivity can be managed by repricing assets or liabilities, selling securities available-for-sale, replacing an asset or liability at maturity or by adjusting the interest rate during the life of an asset or liability. Managing the amount of assets and liabilities repricing in the same time interval helps to hedge the risk and minimize the impact on net interest income of rising or falling interest rates.

We are currently liability sensitive within one year. However, neither the gap analysis nor asset/liability modeling is precise indicators of our interest sensitivity position due to the many factors that affect net interest income including changes in the volume and mix of earning assets and interest-bearing liabilities. Net interest income is also impacted by other significant factors, including changes in the volume and mix of earning assets and interest-bearing liabilities.

Table of Contents

Through simulation modeling we monitor the effect that an immediate and sustained change in interest rates of 100 basis points and 200 basis points up and down will have on net interest income over the next twelve months.

We entered into a five year interest rate swap agreement on October 8, 2008. The swap agreement has a \$10.0 million notional amount. We receive a variable rate of interest on the notional amount based on a three month LIBOR rate and pay a fixed rate interest of 3.66%. The contract was entered into to protect us from the negative impact of rising interest rates. Our exposure to credit risk is limited to the ability of the counterparty to make potential future payments required pursuant to the agreement. Our exposure to market risk of loss is limited to the changes in the market value of the swap between reporting periods. At March 31, 2010 and 2009, the fair value of the contract was a negative \$643,000 and \$752,000, respectively. A fair value adjustment for the swap of (\$196,000) and (\$10,000) was recognized in other income for the periods ended March 31, 2010 and 2009, respectively. The fair value of the contract is the present value, over the remaining term of the contract, of the difference between the swap rate to maturity at the reporting date multiplied by the notional amount and the fixed interest rate of 3.66% multiplied by the notional amount of the contract.

Based on the many factors and assumptions used in simulating the effect of changes in interest rates, the following table estimates the percentage change in net interest income at March 31, 2010 and December 31, 2009 over twelve months.

Net Interest Income Sensitivity

Change in short-term interest rates	March 31, 2010	December 31, 2009
+200bp	+ 5.25%	+2.26%
+100bp	+ 2.60%	+ 1.85%
Flat		
-100bp	- 1.22%	-1.61%
-200bp	- 3.41%	-6.89%

Even though we are liability sensitive, the model at March 31, 2010 reflects a decrease in net interest income in a declining rate environment. This primarily results from the current level of interest rates being paid on our interest bearing transaction accounts as well as money market accounts. The interest rates on these accounts are at a level where they cannot be repriced in proportion to the change in interest rates. The increase and decrease of 100 and 200 basis points assume a simultaneous and parallel change in interest rates along the entire yield curve.

We also perform a valuation analysis projecting future cash flows from assets and liabilities to determine the Present Value of Equity (PVE) over a range of changes in market interest rates. The sensitivity of PVE to changes in interest rates is a measure of the sensitivity of earnings over a longer time horizon. At March 31, 2010, the PVE exposure in a plus 200 basis point increase in market interest rates was estimated to be 28.2% as compared to 43.6% at December 31, 2009.

Liquidity and Capital Resources

Edgar Filing: FIRST COMMUNITY CORP /SC/ - Form 10-Q

We believe our liquidity remains adequate to meet operating and loan funding requirements. Interest-bearing bank balances, federal funds sold, trading securities and investment securities available-for-sale represents 26.1% of total assets at March 31, 2010. We believe that our existing stable base of core deposits along with continued growth in this deposit base will enable us to meet our long-term and short-term liquidity needs successfully. These needs include the ability to respond to short-term demand for funds caused by the withdrawal of deposits, maturity of repurchase agreements, extensions of credit and the payment of operating expenses. Sources of liquidity in addition to deposit gathering activities include maturing loans and investments, purchase of federal funds from other financial institutions and selling securities under agreements to repurchase. We monitor closely the level of large certificates of deposits in amounts of \$100,000 or more as they tend to be more sensitive to interest rate levels, and thus less reliable sources of funding for liquidity purposes. At March 31, 2010, the amount of certificates of deposits of \$100,000 or more represented 18.8% of total deposits. These deposits are issued to local customers many of whom have other

Table of Contents

product relationships with the bank and none are brokered deposits. At March 31, 2010, we have \$14.9 million in brokered certificates of deposits with remaining maturities ranging from 2.0 to 9.0 years. The brokered deposits were obtained in April and May 2008 to fund a specific leverage strategy. Subsequent to March 31, 2010, we exercised the call feature on certain of these brokered CD s and further reduced the balance by \$5.0 million.

Through the operations of our Bank, we have made contractual commitments to extend credit in the ordinary course of our business activities. These commitments are legally binding agreements to lend money to our customers at predetermined interest rates for a specified period of time. At March 31, 2010, we had issued commitments to extend credit of \$44.3 million, including \$25.0 million in unused home equity lines of credit, through various types of lending arrangements. We evaluate each customer s credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. Collateral varies but may include accounts receivable, inventory, property, plant and equipment, commercial and residential real estate. We manage the credit risk on these commitments by subjecting them to normal underwriting and risk management processes.

Other than as described elsewhere in this report, we are not aware of any trends, events or uncertainties that we expect to result in a significant adverse effect on our liquidity position. However, no assurances can be given in this regard, as rapid growth, deterioration in loan quality, and poor earnings, or a combination of these factors, could change the liquidity position in a relatively short period of time.

The Company has generally maintained a high level of liquidity and adequate capital, which along with continued retained earnings, we believe will be sufficient to fund the operations of the Bank for at least the next 12 months. Shareholders equity was 6.9% and 6.8% of total assets at March 31, 2010 and December 31, 2009, respectively. The Bank maintains federal funds purchased lines, in the total amount of \$20.0 million with two financial institutions, although these have not utilized in 2009 or the first quarter of 2010. In addition, the Bank has a repo line in the amount of \$10.0 million with another financial institution. Specific investment securities would be pledged if and when we were to utilize the line. The FHLB Atlanta has approved a line of credit of up to 25% of the Bank s assets, which would be collateralized by a pledge against specific investment securities and or eligible loans. We regularly review the liquidity position of the Company and have implemented internal policies establishing guidelines for sources of asset based liquidity and evaluate and monitor the total amount of purchased funds used to support the balance sheet and funding from noncore sources. We believe that our existing stable base of core deposits along with continued growth in this deposit base will enable us to meet our long term liquidity needs successfully.

The Federal Reserve Board and bank regulatory agencies require bank holding companies and financial institutions to maintain capital at adequate levels based on a percentage of assets and off-balance sheet exposures, adjusted for risk weights ranging from 0% to 100%. Under the capital adequacy guidelines, regulatory capital is classified into two tiers. These guidelines require an institution to maintain a certain level of Tier 1 and Tier 2 capital to risk-weighted assets. Tier 1 capital consists of common shareholders equity, excluding the unrealized gain or loss on securities available for sale, minus certain intangible assets. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100% based on the risks believed to be inherent in the type of asset. Tier 2 capital consists of Tier 1 capital plus the general reserve for loan losses, subject to certain limitations. We are also required to maintain capital at a minimum level based on total average assets, which is known as the Tier 1 leverage ratio. At both the holding company and bank level, we are subject to various regulatory capital requirements administered by the federal banking agencies. To be considered well capitalized, we must maintain total risk-based capital of at least 10%, Tier 1 capital of at least 6%, and a leverage ratio of at least 5%. Generally, to be considered adequately capitalized, the OCC and Federal Reserve regulatory capital guidelines for Tier 1 capital, total capital and leverage capital ratios are 4.0%, 8.0% and 4.0%, respectively.

On April 6, 2010, First Community Bank, the subsidiary bank of First Community Corporation entered into a formal written agreement with the Office of the Comptroller of the Currency (OCC), our primary bank regulator. The Agreement is based on the findings of the OCC during a 2009 on-site examination of the Bank. As reflected in the Agreement, the OCC s primary concern with First Community Bank is driven by the

rating agencies downgrades of non-agency mortgage backed securities (MBS) in its investment portfolio. These securities, purchased in 2004 through 2008, were all rated AAA by the rating agencies at the time of purchase; however, they have been impacted by the economic recession and the stress on the residential housing sector. These ratings do not reflect the discounted

Table of Contents

purchase price paid by the Bank. They only reflect their analysis of the performance of the security overall, and therefore, a downgrade does not capture the risk of loss to the Bank. The Agreement did not require any adjustment to the Bank's balance sheet or income statement; nor did it change the Bank's well capitalized status. The OCC has separately established the following individual minimum capital ratios for the Bank: a Tier I leverage capital ratio of at least 8.00%, a Tier 1 risk-based capital ratio of at least 10.00%, and a Total risk-based capital ratio of at least 12.00%. As of March 31, 2010, the Bank exceeds these ratios. The Board of Directors has appointed an independent compliance committee made up of directors to monitor and report on compliance with the terms of the agreement. Management has already submitted revisions to certain policies to the OCC and anticipates that all of the revisions will be submitted by the end of May 2010.

The Bank's risk-based capital ratios of leverage ratio, Tier 1, and total capital were 8.16%, 11.72%, and 12.89%, respectively, at March 31, 2010 as compared to 7.83%, 11.47%, and 12.61%, respectively, at December 31, 2009. The Company's risk-based capital ratios of leverage ratio, Tier 1, and total capital were 8.72%, 12.53%, and 13.69, respectively at March 31, 2010 as compared to 8.41%, 12.41% and 13.56%, respectively at December 31, 2009. Our management anticipates that the Bank and the Corporation will remain a well capitalized institution for at least the next 12 months. In addition we believe that we will continue to exceed the individual capital ratios established by the OCC noted above for at least the next twelve months.

The ability of the Company to pay cash dividends is dependent upon receiving cash in the form of dividends from the Bank. The dividends that may be paid by the Bank to the Company are subject to legal limitations and regulatory capital requirements. The approval of the OCC is required if the total of all dividends declared by a national bank in any calendar year exceeds the total of its net profits for that year combined with its retained net profits for the preceding two years, less any required transfers to surplus. Further, the Company cannot pay cash dividends on its common stock during any calendar quarter unless full dividends on the Series T preferred stock for the dividend period ending during the calendar quarter have been declared and the Company has not failed to pay a dividend in the full amount of the Series T preferred stock with respect to the period in which such dividend payment in respect of its common stock would occur. However, restrictions currently exist, including within the Formal Agreement the Bank signed with the OCC on April 6, 2010, that prohibit the Bank from paying cash dividends to the Company. In addition, the Company must currently obtain preapproval of the Federal Reserve Board before paying dividends.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in our quantitative and qualitative disclosures about market risk as of March 31, 2010 from that presented in our annual report on Form 10-K for the year ended December 31, 2009. See the Market Risk Management subsection in Item 2, Management Discussion and Analysis of Financial Condition and Results of Operations for quantitative and qualitative disclosures about market risk, which information is incorporated herein by reference.

Item 4. Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our current disclosure controls and procedures are effective as of March 31, 2010. There have been no significant changes in our internal controls over financial reporting during the fiscal quarter ended March 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

The design of any system of controls and procedures is based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings.

There are no material pending legal proceedings to which the Company or any of its subsidiaries is a party or of which any of their property is the subject.

Item 1A. Risk Factors.

Not Applicable.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On September 21, 2006, our board of directors approved a new plan to repurchase up to 150,000 shares of our common stock on the open market. At both the April 17, 2007 and January 15, 2008 meetings our board of directors increased the shares authorized to be repurchased by 50,000 for a total of 250,000 shares. The Board has not established an expiration date for this repurchase plan. There was no share repurchase activity during the first quarter of 2010. The maximum number of shares that may yet be repurchased under the plan is 42,487. Currently, we must seek approval of the Federal Reserve Bank of Richmond prior to repurchasing any shares of our common stock.

Item 3. Defaults Upon Senior Securities.

Not Applicable.

Item 4. (Removed and Reserved.)

Item 5. Other Information.

None.
