(1) See Note 14 to our consolidated financial statements for an explanation of the calculations of our basic and diluted net income attributable to Houlihan Lokey, Inc. per share of common stock, and net income attributable to Houlihan Lokey, Inc. per share of common stock.

(2) The pro forma as adjusted data give effect to the consummation of the proposed corporate reorganization described in the section titled **Organizational Structure**, the sale by the selling stockholders of 13,059,139 shares of Class A common stock in this offering, the repayment of the short-term note and the payment of estimated offering expenses payable by us. Pro forma as adjusted net income attributable to Houlihan Lokey, Inc. reflects an adjustment to remove historical income and expense associated with the non-operating assets that will be distributed to certain of our existing owners as described under **Dividend Policy** .

Pro forma as adjusted weighted average number of shares outstanding reflects the elimination of our existing common stock and the 10.425-for-1 relationship of shares of our common stock issued in the corporate reorganization to the outstanding shares of common stock of Fram. Pro forma as adjusted weighted average number of shares outstanding does not give effect to (i) the issuance of restricted shares of Fram stock that we anticipate issuing to employees upon the settlement of deferred stock awards outstanding as of the date of this offering and the conversion in the corporate reorganization of such restricted shares into 1,277,855 restricted shares of Class B common stock (based on the midpoint of the price range listed on the cover page of this prospectus), which will be deposited in the HL Voting Trust and subject to lock-up agreements, (ii) the issuance of restricted shares of Fram stock that we anticipate granting under the 2006 Plan to employees in connection with this offering and the conversion in the corporate reorganization of such restricted shares into 3,086,759 restricted shares of Class B common stock, which will be deposited in the HL Voting Trust and subject to lock-up agreements, or (iii) the issuance of shares of Class B common stock that we anticipate issuing upon the conversion of certain outstanding convertible notes, which we expect will be subject to certain voting and lock up arrangements. See **Organizational Structure** for a description of the transactions.

CAPITALIZATION

The following table includes additional textual disclosure regarding the corporate reorganization and its impact on our cash and cash equivalents and capitalization.

The following table sets forth our cash and cash equivalents and capitalization as of June 30, 2015, as follows:

- on an actual basis;
- on a pro forma basis, giving effect to the corporate reorganization, including the making of a distribution to our direct holder that will ultimately be distributed pro rata and paid to our existing owners in the amount of

\$270.0 million, consisting of (i) a short-term note in the aggregate amount of \$197.2 million, to be repaid immediately after the consummation of this offering, which will be allocated \$94.5 million to ORIX USA and \$102.7 million to the HL Holders, (ii) the New Note and (iii) certain of our non-operating assets (valued in the aggregate at approximately \$22.8 million as of June 30, 2015 and which, together with the costs required to manage the non-operating assets, generated approximately \$0.1 million of income before provision for income taxes and approximately \$0.6 million of loss before provision for income taxes for income taxes for fiscal 2015 and the three months ended June 30, 2015, respectively), together with \$5.0 million in cash to be used to complete a potential additional investment and in the administration of these assets after the closing of this offering, which will be distributed to certain of the HL Holders, in each case as described under Organizational Structure. The Pro Forma column also reflects adjustments relating to the forgiveness of employee loans in the amount of \$1.4 million, the repayment of an employee loan in the amount of \$0.9 million, and the related reduction of certain stock subscriptions receivable of \$2.3 million; and

- on a pro forma as adjusted basis, giving effect to the pro forma adjustments and the sale by the selling stockholders of 13,059,139 shares of Class A common stock in this offering, the repayment of the short-term note, the issuance of 8,696 shares of Class A common stock under the 2016 Plan to our non-employee directors, and the payment of estimated expenses associated with this offering, the corporate reorganization and related activities payable by us, in the aggregate amount of \$10.5 million, less \$0.9 million that was paid and expensed prior to June 30, 2015, the repayment of the short-term note in the aggregate amount of \$197.2 million, and the repayment by ORIX Corporate Capital, Inc., a subsidiary of ORIX USA (OCC), of \$139.6 million, which is the amount outstanding under the existing cash management arrangement.

(1) Receivable from affiliates primarily consists of two notes payable on demand owed by affiliates of ORIX USA in connection with cash management services provided to us by ORIX USA. Such notes will be replaced

in connection with the offering by a single new Cash Management Agreement (as defined herein) with an affiliate of ORIX USA. The initial amount lent (and payable on demand) under the Cash Management Agreement is expected to be equal to the amount of the existing note owed by such affiliate of ORIX USA as of the closing date of this offering. See Management's Discussion and Analysis of Financial Condition and Result of Operations Liquidity and Capital Resources.

(2) Historically, in connection with the periodic separation of certain of our former employees, and pursuant to the existing Fram Stockholders' Agreement, Fram repurchased shares held by such persons in exchange for promissory notes. As of June 30, 2015, the aggregate principal amount of the various promissory notes is approximately \$18.5 million. As part of the corporate reorganization, we will assume Fram's obligations with respect to the promissory notes in exchange for an increase in like amount under our existing cash management arrangement with OCC. As described herein, upon the closing of the corporate reorganization, OCC will repay to us all amounts outstanding under the existing cash management arrangement (including the amount incurred in connection with our assumption of Fram's obligations under the promissory notes). For additional information on the promissory notes, see Description of Indebtedness.

- (3) The short-term note is to be repaid immediately after the consummation of this offering.

DILUTION

The following table includes additional textual disclosure regarding the calculation of pro forma as adjusted net tangible book value.

If you invest in our Class A common stock in this offering, your ownership interest will be immediately diluted to the extent of the difference between the initial public offering price per share and the pro forma as adjusted net tangible book value per share of our common stock after this offering. Pro forma net tangible book value per share represents our total tangible assets reduced by the amount of our total liabilities, divided by the total number of shares of our common stock outstanding after giving effect to the corporate reorganization.

After giving effect to the sale of 13,059,139 shares of Class A common stock in this offering, and the issuance of restricted shares of Fram stock that we anticipate granting under the 2006 Plan to employees in connection with this offering and the conversion of such restricted shares into restricted shares of Class B common stock, and after the payment of estimated offering expenses payable by us, our pro forma as adjusted net tangible book value as of June 30, 2015 would have been approximately \$(24.9) million, or approximately \$(0.38) per share. This amount represents an immediate dilution in pro forma as adjusted net tangible book value of approximately \$23.38 per share to new investors purchasing shares of Class A common stock in this offering. We determine dilution by subtracting the pro forma as adjusted net tangible book value per share after this offering from the amount of cash that a new investor paid for a share of Class A common stock. Pro forma as adjusted net tangible book value is calculated by taking pro forma stockholders' equity, then subtracting goodwill and other intangibles, and the deferred tax liability related to those intangibles.

The following table illustrates this dilution on a per share basis assuming the underwriters do not exercise their option to purchase additional shares of Class A common stock:

| | | |
|---|----|--------|
| Assumed initial public offering price per share | \$ | 23.00 |
| Pro forma as adjusted net tangible book value per share as of June 30, 2015 after this offering | | (0.38) |
| Dilution in net tangible book value per share to new investors | \$ | 23.38 |

The following table summarizes, on a pro forma as adjusted basis as of June 30, 2015, the differences between the number of shares purchased, the total consideration paid in cash and the average price per share that existing owners and new investors paid. The calculation below is based on an assumed initial public offering price of \$23.00 per share, which is the midpoint of the price range listed on the cover page of this prospectus, before deducting the estimated underwriting discount and estimated offering expenses payable by us:

| | Shares purchased | | Total consideration | | Average price per share |
|-----------------------|------------------|---------|---------------------|---------|-------------------------|
| | Number | Percent | Amount | Percent | |
| Existing shareholders | 52,144,865 | 80% | \$ 560,035,850 | 65% | \$ 10.74 |

Edgar Filing: HOULIHAN LOKEY, INC. - Form FWP

| | | | | | |
|---------------|------------|---------|-------------|---------|-------|
| New investors | 13,059,139 | 20% | 300,360,197 | 35% | 23.00 |
| Total | 65,204,004 | 100% \$ | 860,396,047 | 100% \$ | 13.20 |

A \$1.00 increase (decrease) in the assumed initial offering price would increase (decrease) total consideration paid by new investors, total consideration paid by all stockholders and average price per share paid by all stockholders by \$13.1 million, \$13.1 million and \$0.20 per share, respectively. An increase (decrease) of 1.0 million in the number of shares offered by the selling stockholders would increase (decrease) total consideration paid by new investors, total consideration paid by all stockholders and average price per share paid by all stockholders by \$23.0 million, \$23.0 million and \$0.35 per share, respectively.
