FOR IMMEDIATE RELEASE

Bladex Reports Second Quarter Net Income of \$27.0 million, or \$0.74 per share

Financial Highlights

Second Quarter 2007 vs. First Quarter 2007:

- Net Income grew 82% to \$27.0 million, driving the Bank's return on equity ("ROE") to 18.0% p.a.
- Operating income⁽¹⁾ increased 86% to \$26.1 million, reflecting higher gains on the Bank's treasury and asset management activities, which grew 460% to \$18.2 million.
 - The average commercial portfolio grew 7% to \$3.8 billion.
 - The Bank's efficiency ratio improved from 35% to 28%.

Second Quarter 2007 vs. Second Quarter 2006:

- Net income grew 202%.
- Operating income increased 258%, driven by higher gains on the Bank's treasury asset management activities, and increased net interest income.
 - The average loan portfolio increased 31%, the average commercial portfolio grew 18%.

Six Months of 2007 vs. Six Months of 2006:

- Net Income amounted to \$41.8 million, or \$1.15 per share, an increase of 63%.
- Operating income reached \$40.2 million, an increase of 143%, driven primarily by higher gains on the Bank's proprietary asset management activities, increased net interest income, and higher gains on securities available for sale.

⁽¹⁾ Operating income refers to net income, excluding reversals of provisions for credit losses, and recoveries (impairment) on assets.

Panama City, Republic of Panama, July 19, 2007 - Banco Latinoamericano de Exportaciones, S.A. (NYSE: BLX) ("Bladex" or the "Bank") announced today its results for the second quarter ended June 30, 2007.

Comments from the Chief Executive Officer

Jaime Rivera, Bladex's Chief Executive Officer, stated the following regarding the quarter's results:

"The second quarter saw the efforts that we have been making along a number of fronts, bear fruit in a decisive manner.

Our Treasury Division had a banner quarter, as Bladex was able to make good on our views on both trends in the market and distortions in the risk reward relationship within the Region. Importantly, the Treasury Division in its upgraded form affords the Bank the tools needed to leverage our corporate skills beyond calls on credit risk to provide us with diversification in the form of market risk based revenue.

Our Commercial Division put forth its fifth consecutive quarter of operating revenue growth. Following the Bank's strategic decision of last year, the Division has developed a growing corporate franchise that is providing fully 46% of the group's revenues. During the second quarter alone, its average credit balances increased a marked 7%, while the leasing activity is playing an increasingly important role in supporting our margins in the face of ample market liquidity. Significantly, growth took place across most of our markets, and as a result, portfolio diversification improved further. Brazilian exposure, which traditionally has represented around 45% of our commercial portfolio, is now 36%.

With efficiency levels improving further and credit quality at historically strong levels, year-to-date operating income, at \$40.2 million, has already exceeded the \$39.3 million operating income total of the full year 2006. Significantly, annualized ROE levels for the second quarter were 18.0%, an especially telling figure in light of our strong 21.2% Tier 1 capitalization.

On the institutional side of the business, the second quarter saw progress along several fronts as well. Among some other favorable developments, S&P upgraded the Bank's outlook to "Positive", while Moody's upgraded our BFSR. In addition, our stock was added to the Russell 3000® Index, and we signed a cooperation agreement with China Development Bank.

For the balance of 2007, Bladex will continue working along the path determined by our 2010 strategic plan: a selective but consistent expansion of our client franchise, combined with a gradual and well-executed deployment of new services that leverage the Bank's core competencies, and aligning our risk management methodology with Basel II standards.

Based on our results, with a well-honed team in place, and a generally favorable external environment, I am specially excited about the prospects for our company".

BUSINESS OVERVIEW**Business Segment Analysis - Operating Income**

The following tables set forth the Bank's operating income by business segment, as well as changes per operating income component:

(In US\$ million)

	Operating Income			Change			
	1Q07	2Q07	Change	Net interest income	Non-interest income	Operating expenses	Operating Total

The following graphs illustrate the percentage distribution of the Bank's operating revenues and net income for the periods indicated:

Operating Revenues ⁽¹⁾ Composition

⁽¹⁾ Operating revenues exclude reversals of provisions for credit losses, and recoveries (impairment) on assets.

Net Income Composition

Commercial Division

The Commercial Division incorporates the Bank's financial intermediation and fee generation activities. Operating income from the Commercial Division includes net interest income from loans, fee income, and allocated operating expenses.

Quarterly Variation

Operating income from the Commercial Division for the second quarter 2007 reached \$10.1 million, a \$0.1 million increase compared to the first quarter of 2007. For the quarter, higher net interest income (4%) and non-interest operating income (11%) were offset by increased operating expenses reflecting higher professional services. Compared to the second quarter of 2006, operating income from the Commercial Division increased 12%, primarily due to a 19% increase in net interest income, driven by higher average loan balances.

Six Months Variation

For the first six months of 2007, the Commercial Division's operating income amounted to \$20.1 million, an increase of 31% compared to the same period of 2006 reflecting a 26% increase in the average accruing loan portfolio. Excluding the impact of revenues from the 2006 impaired portfolio, operating income increased 44%, or \$6.1 million. The Bank does not have impaired credits on its books since the end of 2006 and as a result, the Bank has not recognized revenues from this portfolio during 2007.

As of June 30, 2007, the Bank's commercial portfolio totaled \$3,935 million, up \$186 million, or 5%, from March 31, 2007, and up \$614 million, or 18%, from June 30, 2006. The Bank's average commercial portfolio for the second quarter 2007 was \$3.8 billion, 7% higher than in the prior quarter. See Exhibit X for information related to the Bank's commercial portfolio distribution by country. The following graph shows the average commercial portfolio for the periods indicated:

5

During the second quarter of 2007, the Bank disbursed \$2,028 million, versus \$2,071 million in the first quarter of 2007. Please refer to Exhibit XII for the Bank's distribution of credit disbursements by country.

As of June 30, 2007, the corporate market segment represented 49% of the Bank's total commercial portfolio, compared to 48% as of March 31, 2007, and 40% a year ago. On June 30, 2007, 72% of the Bank's corporate portfolio represented trade financing.

The commercial portfolio as a whole continues to be short-term in nature, with 66% maturing within one year, and 64% representing trade financing operations.

Treasury Division

The Treasury Division incorporates the Bank's investment securities, as well as proprietary asset management activities. Operating income from the Treasury Division is presented net of allocated operating expenses, and includes net interest income on securities, gains and losses on derivatives and hedging activities, securities sales and trading, and foreign exchange transactions.

Quarterly Variation

During the second quarter of 2007, operating income from the Treasury Division amounted to \$16.1 million, compared to \$4.0 million in the first quarter of 2007, and compared to a loss of \$1.7 million in the second quarter of 2006. The \$12.0 million quarterly increase in operating income was due to higher trading gains on the Bank's proprietary asset management activity and higher net gains on the sale of securities available for sale ("AFS"). These increases were partially offset by lower net interest income resulting from reduced securities balances and the cost of leveraging up the Bank's investment in asset management activity, as well as from increased operating expenses related to deferred variable compensation of the asset management team.

Six Months Variation

For the first six months of 2007, the Treasury Division's operating income amounted to \$20.1 million, compared to \$1.2 million for the same period in 2006, reflecting higher gains from asset management activity and the AFS portfolio.

During the second quarter of 2007, the Bank sold a portion of its AFS securities, generating gains of \$3.9 million. Primarily as a result of these sales, the securities portfolio (including investment securities AFS, securities held to maturity "HTM" and trading securities) decreased by 50% during the quarter to \$311 million. As of June 30, 2007, the securities portfolio represented 8% of the Bank's total credit portfolio, and consisted of Latin American securities (please refer to Exhibit XI for a per country distribution of the AFS portfolio).

As of June 30, 2007, the deposits balance was \$1.4 billion, which remained stable compared to the previous quarter, and increased 12% from June 30, 2006, reflecting higher deposits from state-owned banks.

CONSOLIDATED RESULTS OF OPERATIONS

Net Income

Net income for the second quarter of 2007 amounted to \$27.0 million, an increase of 82% from the previous quarter, and 202% from the second quarter of 2006. These increases were mainly the result of higher gains on the Bank's treasury and proprietary asset management activities, as well as increased net interest income from the Commercial Division.

Year-to-date, net income amounted to \$41.8 million, up 63% from the \$25.6 million reported during the same period of 2006. This is a result of a 143% increase in operating income, which was driven by higher gains on the Bank's proprietary asset management activities, increased net interest income (28%), and higher gains on the AFS portfolio.

NET INTEREST INCOME AND MARGINS

The table below shows the Bank's net interest income and net interest margin for the periods indicated:

(In US\$ million, except percentages)

	6M06	6M07	2Q06	1Q07	2Q07
Net Interest Income					
Commercial Division	\$ 23.1	\$ 30.2	\$ 12.9	\$ 14.8	\$ 15.4
Treasury Division	3.4	3.6	2.0	2.2	1.4
Consolidated	\$ 26.5	\$ 33.8	\$ 14.9	\$ 17.1	\$ 16.7
Net Interest Margin					
(1)	1.75%	1.76%	1.87%	1.82%	1.70%

(1) Net interest income divided by average balance of interest-earning assets.

Quarterly Variation

The Commercial Division's net interest income increase of \$0.5 million, or 4%, from the first quarter of 2007, was mostly due to increased average loan portfolio balances (8%), which offset a 12 bps decline in net interest margin ("NIM").

The Treasury Division's net interest income decreased of \$0.9 million, or 39%, when compared to the first quarter of 2007, was due to lower average balances in the investment securities portfolio following the sale of 67% of the AFS portfolio during the quarter, and to lower net interest income in the asset management activity, reflecting increased cost of leveraging up the Bank's investment in its asset management activity.

Six Months Variation

The \$7.1 million, or 31%, increase in net interest income of the Commercial Division, reflects the growth of the average loan portfolio (26%), and increased net interest margins in the commercial portfolio.

Net interest income from the Treasury Division increased \$0.2 million compared to the same period of last year, largely due to a 28% increase in average balances in the securities portfolio.

FEES AND COMMISSIONS

The following table provides a breakdown of fees and commissions for the periods indicated:

(In US\$ thousands)

	6M06	6M07	2Q06	1Q07	2Q07
Letters of credit	\$ 1,796	\$ 1,322	\$ 815	\$ 654	\$ 669

Fees and commissions, net	\$ 2,881	\$ 2,800	\$ 1,309	\$ 1,275	\$ 1,525

⁽¹⁾ Includes commission expenses.

Fees and commissions, net for the second quarter of 2007 increased 20%, or \$250 thousand, compared to the first quarter of 2007, mostly due to increased fee income from the Bank's e-learning and payments activities and other services.

The 3%, or \$81 thousand, decline in fees and commissions, net for the first six months of 2007 compared to the same period of 2006, was mostly due to lower letter of credit and guarantees activity, partially offset by increased loan fees and other services activities.

PORTFOLIO QUALITY AND PROVISION FOR CREDIT LOSSES

As of June 30, 2007, the Bank had no credits in non-accruing or past-due status.

As of June 30, 2007, the allowance for loan losses totaled \$69.0 million, an increase of \$12.4 million from March 31, 2007, driven by the growth in the loan portfolio. This increase in the allowance for loan losses was the result of a provision charge against results of \$6.2 million and loan recoveries of \$6.2 million. The allowance for off-balance sheet credit losses amounted to \$13.5 million, a decrease of \$7.6 million from March 31, 2007, reflecting changes in the country mix of the letter of credit portfolio.

As of June 30, 2007, the ratio of the allowance for credit losses to the commercial portfolio ratio was 2.1%, unchanged from March 31, 2007, and compared to 2.5% as of June 30, 2006.

The following table depicts information about the allowance for credit losses, for the dates indicated:

OPERATING EXPENSES AND EFFICIENCY

The following table shows a breakdown of the components of operating expenses for the periods indicated:

(In US\$ thousands)

	6M06	6M07	2Q06	1Q07	2Q07
Salaries and other employee expenses	\$ 7,025	\$ 10,497	\$ 3,495	\$ 4,263	\$ 6,234

Total Operating Expenses	\$ 12,648	\$ 17,847	\$ 6,321	\$ 7,586	\$ 10,262

2Q07 vs. 1Q07

The \$2.7 million increase in operating expenses was principally due to:

- \$2.0 million increase in salaries and other employee expenses mostly related to deferred variable compensation of the Bank's proprietary asset management team, in line with the solid performance of this business line;
- \$0.5 million increase in professional services, due to legal expenses associated with the Bank's proprietary asset management activity and other commercial business, as well as the renewal of the Bank's EMTN Program.
- \$0.2 million increase in other operating expenses, associated primarily with increased business travel expenses.

6M07 vs. 6M06

Operating expenses increased by \$5.2 million as a result of higher salary expenses associated with the deferred variable compensation of the Bank's proprietary asset management as well as higher salary expenses associated with the development of the corporate segment and the revenue units in Treasury; depreciation expenses related to the new technology platform, and increased professional services associated with legal expenses related to new business initiatives.

Driven by net operating revenues that continued increasing faster than operating expenses, the Bank's efficiency ratio improved from 35% in the first quarter of 2007 to 28% in the second quarter of 2007.

The bank has aligned its operations into two major business segments, based on the nature of clients, products and on credit risk standards.

The Commercial division primarily provides foreign trade and working capital financing to Latin American banks and exporting corporations,

through loans, letters of credit, and acceptances, guarantees covering commercial and country risk, and credit commitments. This area also covers trade

related services to its Latin American clients, such as payments and e-learning.

The Treasury division is responsible for managing the Bank's asset and liability position, liquidity, secondary market available for sale

portfolio, the proprietary trading desk, and, currency and interest rate risk.

Interest expenses are allocated based on average credits.

(1) Non-interest operating income consists of net other income (expense), excluding reversals of provisions for credit losses and impairment on assets

(2) Operating expenses are calculated based on average credits.

(3) Operating income refers to net income excluding reversals of provisions for credit losses and impairment on assets.

(4) Includes loans, net of unearned income and deferred loan fees.

(5) Includes cash and due from banks, interest-bearing deposits with banks, securities available for sale and held to maturity, trading securities.
