PART I - FINANCIAL INFORMATION

ITEM 1. Financial Statements.

Statement Regarding Financial Information

The condensed consolidated financial statements of Aeolus Pharmaceuticals, Inc. and its wholly-owned subsidiary, Aeolus Sciences, Inc. (collectively the “Company”), included herein have been prepared by management, without audit (except for the Consolidated Balance Sheet as of September 30, 2010), pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Certain information normally included in the consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States has been condensed or omitted pursuant to such rules and regulations. However, the Company believes that the disclosures are adequate to make the information presented not misleading. The Company recommends that you read the consolidated financial statements included herein in conjunction with the audited consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K/A for the fiscal year ended September 30, 2010, filed with the SEC on December 30, 2010.

AEOLUS PHARMACEUTICALS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

A. Organization and Business and Basis of Presentation

Aeolus Pharmaceuticals, Inc. is a biopharmaceutical company that is developing a platform of a new class of broad-spectrum catalytic antioxidant compounds based on technology discovered at Duke University and National Jewish Health. These compounds, known as metalloporphyrins, scavenge reactive oxygen species (“ROS”) at the cellular level, mimicking the effect of the body’s own natural antioxidant enzyme superoxide dismutase (“SOD”). While the benefits of antioxidants in reducing oxidative stress are well-known, research with the Company’s compounds indicates that metalloporphyrins can be used to affect signaling via ROS at the cellular level. In addition, there is evidence that high-levels of ROS can affect gene expression and this may be modulated through the use of metalloporphyrins. The Company believes this could have a profound beneficial impact on people who have been exposed, or are about to be exposed, to high-doses of radiation.

The Company’s lead compound, AEOL 10150, is a metalloporphyrin specifically designed to neutralize reactive oxygen and nitrogen species. The neutralization of these species reduces oxidative stress, inflammation, and subsequent tissue damage-signaling cascades resulting from radiation exposure. Aeolus is leveraging the significant investment made by U.S. government agencies to develop this promising compound for use in oncology indications, where it would be used in combination with radiation therapy, and is currently in development for use as both a therapeutic and prophylactic drug. Data has been published showing that AEOL 10150 does not interfere with the therapeutic benefit of radiation therapy in prostate and lung cancer preclinical studies. In 2011 Aeolus expects to release data showing the drug’s impact, if any, when used in combination with radiation and/or chemotherapy. In mid-2011 it expects to begin Phase I/II studies in non-small cell lung cancer (“NSCLC”). Later in 2011 the Company expects to begin a Phase I/II study in Mesothelioma, where approximately 30% of the patients succumb to the effects of the radiation therapy.

AEOL 10150 is also currently at Technical Readiness Level (“TRL”) 7 as a medical countermeasure (“MCM”) for GI-ARS and Lung-ARS, both of which are caused by exposure to high levels of radiation due to a radiological or nuclear event. To date, this development program has largely been funded by the National Institutes of Health (“NIH”) – National Institute of Allergy and Infectious Diseases (“NIAID”) through programs at the University of Maryland and Duke University.

In December 2009, Aeolus was informed by the U.S. Department of Health and Human Services (“HHS”) Biomedical Advanced Research and Development Authority (“BARDA”) that it had been chosen to submit a full proposal for funding of its Lung-ARS program from its current stage all the way through U.S. Food and Drug Administration (“FDA”) approval, based on a summary “white paper” submitted by the Company earlier in 2009. Aeolus submitted a full proposal in February 2010. The Company was notified in July 2010 that its proposal had been chosen by BARDA, and then entered into negotiations for a development contract with the agency. The Company is awaiting a final decision from BARDA on the contract. If the contract from BARDA is awarded, it is expected that it will fund all of the costs necessary to bring AEOL 10150 to FDA approval for that indication.

NIAID’s Radiation/Nuclear Medical Countermeasures development program is currently testing AEOL 10150 as a countermeasure for GI-ARS caused by exposure to high levels of radiation due to a radiological or nuclear event. Similarly, the NIH’s CounterACT program has tested, and continues to test, AEOL 10150 as a medical countermeasure for exposure to chemical vesicants such as chlorine gas and mustard gas. In September 2010, BARDA invited Aeolus to submit a full proposal in response to its “White Paper” for the development of AEOL 10150 as an MCM to chlorine gas exposure. The proposal seeks funding to take the compound from its current state to FDA approval over a three

year period. Aeolus submitted its full proposal to BARDA in December 2010, and expects a response from BARDA by the third quarter of 2011.

AEOL 10150 has already performed well in animal safety studies, been well-tolerated in two human clinical trials, demonstrated efficacy in two species in acute radiation syndrome (“ARS”) studies and demonstrated statistically significant survival efficacy in an acute radiation-induced lung injury model. AEOL 10150 has also demonstrated efficacy in validated animal models for GI-ARS, chlorine gas exposure, and sulfur mustard gas exposure. Efficacy has been demonstrated in Lung-ARS in both rodent and non-human primate studies (“NHP”), with AEOL 10150 treated groups showing significantly reduced weight loss, inflammation, oxidative stress, lung damage, and most importantly, mortality. Therapeutic efficacy was demonstrated when delivered after exposure to radiation (24 hours after exposure for mice in the GI-ARS study and NHPs in the Lung-ARS studies, and two hours after exposure for mice in the Lung-ARS studies). The Company is looking at a longer post exposure period in studies that will begin in early 2011.

Aeolus has an active Investigational New Drug Application (“IND”) on file with the FDA for AEOL 10150 as a potential treatment for amyotrophic lateral sclerosis (“ALS”). In the first half of 2011, the Company plans to file an IND for cancer with the oncology division of the FDA as well as with the Hematology and Imaging Division for Lung-ARS. Extensive toxicology and pharmacology packages are already in place. Aeolus has already completed two Phase 1 safety studies in 50 humans demonstrating the drug to be safe and well tolerated. Chemistry, Manufacturing, and Controls (“CMC”) work has been completed, and pilot lots have been prepared for scaling-up.

Aeolus has two programs underway for the development of its second drug candidate, AEOL 11207, for the treatment of epilepsy and Parkinson’s disease. These programs are being funded, in part, by private foundations, including the Michael J. Fox Foundation and Citizens United for Research in Epilepsy (CURE), and government grants.

The “Company” or “Aeolus” refers collectively to Aeolus Pharmaceuticals, Inc., a Delaware corporation (“Aeolus”), and its wholly owned subsidiary, Aeolus Sciences, Inc., a Delaware corporation. As of December 31, 2010, Aeolus also owned a 35.0% interest in CPEC LLC, a Delaware limited liability company (“CPEC”). The Company’s primary operations are located in Mission Viejo, California.

All significant intercompany activity has been eliminated in the preparation of the condensed consolidated financial statements. The unaudited condensed consolidated financial statements have been prepared in accordance with the requirements of Form 10-Q and Rule 10-01 of Regulation S-X. Some information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to those rules and regulations. In the opinion of management, the accompanying unaudited consolidated financial statements include all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the consolidated financial position, results of operations and cash flows of the Company. The condensed balance sheet at September 30, 2010 was derived from the Company’s audited financial statements included in the Company’s Annual Report on Form 10-K/A for the fiscal year ended September 30, 2010. The unaudited condensed consolidated financial statements included herein should be read in conjunction with the audited consolidated financial statements and the notes thereto included in that Annual Report on Form 10-K/A and in the Company’s other SEC filings. Results for the interim period are not necessarily indicative of the results for any other period.

B. Liquidity

The Company had cash and cash equivalents of approximately \$2,867,000 on December 31, 2010, and approximately \$2,355,000 on September 30, 2010. The increase in cash was primarily due to \$1.0 million in gross proceeds from the December 2010 financing and the two awards from the IRS under the Qualifying Therapeutic Discovery Program (“QTDP”). In October 2010, we were notified that we had been awarded the maximum amount, of about \$244,000, under the QTDP, which is administered by the IRS and the U.S. Department of Health and Human Services (“HHS”), in support of our development of AEOL 10150 as an medical countermeasure (“MCM”) for Lung-ARS. In November 2010, we received approximately \$244,000 from the IRS as full payment for the Lung-ARS award. In October 2010, we were also notified that we had been awarded the maximum amount, of approximately \$244,000, under the QTDP in support of our development of AEOL 11207 as a potential treatment for Parkinson’s Disease. In November 2010, we received about \$92,000 from the IRS as an initial payment for the Parkinson’s program award. We expect to receive the balance of about \$152,000 after we file our 2010 fiscal year tax return and submit the request for payment to the IRS. We believe we have adequate financial resources to conduct operations into the second quarter of fiscal year 2012, but in order to fund on-going operating cash requirements beyond that point, or to further accelerate or expand our programs, we need to raise significant additional funds.

The Company has incurred significant losses from operations of approximately \$7,620,000 (including a non-cash charge for increases in valuation of warrants of approximately \$7,202,000) and approximately \$25,869,000 (including

a non-cash charge for increases in valuation of warrants of approximately \$21,347,000), and cash outflows from operations of approximately \$517,000 and approximately \$2,446,000, for the three months ended December 31, 2010 and for the fiscal year ended September 30, 2010, respectively. The Company expects to incur additional losses and negative cash flow from operations during the remainder of fiscal year 2011 and for several more years.

As a result of the October 2009 Financing and the Amendment, both of which are defined and discussed more fully in Note G– Stockholders’ Equity, which is included in the Company’s Annual Report on Form 10-K/A for the fiscal year ended September 30, 2010, the Company was able to raise a total of about \$1.65 million during the first quarter of fiscal year 2010. On July 30, 2010, the Company announced the exercise of the October 2009 Put Option with Xmark Funds, discussed more fully in Note G – Stockholders’ Equity in that Annual Report on Form 10-K/A, under which the Company raised additional gross proceeds of \$1.65 million. In addition, on August 11, 2010, the Company completed a common stock and warrant financing for gross proceeds of \$1 million, and granted the Xmark Funds an option to call another \$1 million during the first quarter of fiscal 2011. During the first quarter of fiscal 2011, Xmark Funds called its option, resulting in gross proceeds of \$1 million to the Company. Cash on hand, plus the proceeds from the December 2010 option call is expected to enable the Company to continue operations into the second quarter of fiscal 2012. The level of research and development activity will depend heavily upon the successful execution of a contract with BARDA for Lung-ARS. If the Company is successful in obtaining the contract, research and development activities will increase significantly. If the Company is not successful in obtaining the contract, spending on Lung-ARS development by the Company will be halted, resulting in lower research and development expenses.

If the Company is unable to obtain additional funding for its operations beyond the second quarter of 2012, it will need to eliminate or substantially limit some or all of its activities, merge with another company, sell, lease or license some or all of its assets, or cease operations entirely. There can be no assurance that the Company will be able to obtain additional financing on favorable terms, or at all, or that the Company will be able to merge with another Company or sell, lease or license any or all of its assets.

C. Net Loss Per Common Share

The Company computes basic net loss per weighted average share attributable to common stockholders using the weighted average number of shares of common stock outstanding during the period. The Company computes diluted net income (loss) per weighted average share attributable to common stockholders using the weighted average number of shares of common and dilutive potential common shares outstanding during the period. Potential common shares outstanding consist of stock options, convertible debt, warrants and convertible preferred stock using the treasury stock method and are excluded if their effect is anti-dilutive. Diluted weighted average common shares excluded incremental shares of approximately 76,864,000 as of December 31, 2010 issuable upon the exercise or conversion of convertible debt, stock options to purchase common stock, convertible preferred stock and warrants to purchase common stock. These shares were excluded due to their anti-dilutive effect as a result of the Company's net loss for the quarter ended December 31, 2010.

D. Warrant Liability

On October 1, 2009, the Company adopted new accounting guidance originally referred to as Emerging Issues Task Force 07-5, recently codified by FASB as Account Standards Codification ("ASC") Topic 815. The guidance revised previously existing guidance for determining whether an Instrument (or Embedded Feature) is indexed to an entity's own stock. Equity-linked instruments (or embedded features) that otherwise meet the definition of a derivative are not accounted for as derivatives if certain criteria are met, one of which is that the instrument (or embedded feature) must be indexed to the entity's own stock. The Company first applied the new guidance to outstanding instruments as of October 1, 2009.

Increases or decreases in fair value of the warrants are included as a component of other income (expenses) in the accompanying statement of operations for the respective period. As of December 31, 2010, the aggregate liability for warrants increased to approximately \$34,955,000, resulting in an additional charge to the statements of operations for the quarter ended December 31, 2010 of approximately \$7,202,000. The warrant liability and revaluations have not and will not have any impact on the Company's working capital, liquidity or business operations.

E. Note Payable

Senior Convertible Notes to Related Parties

On August 1, 2008, the Company entered into a Securities Purchase Agreement (the "SCN Purchase Agreement") with three accredited institutional investors (the "August 2008 Investors") pursuant to which the Company agreed to sell to the August 2008 Investors units comprised of senior unsecured convertible notes of the Company (the "Notes"), in an aggregate principal amount of up to \$5,000,000, which bear interest at a rate of 7% per year and mature on the 30-month anniversary of their date of issuance, and warrants to purchase up to an aggregate of 10,000,000 additional shares of the Company's common stock (the "August 2008 Warrant Shares"), each with an initial exercise price of \$0.50 per share, subject to adjustment as provided in the warrants (the "August 2008 Warrants"). Each unit (collectively, the "August 2008 Units") is comprised of \$1,000 in Note principal and August 2008 Warrants to purchase up to 2,000 shares of the Company's common stock, and has a purchase price of \$1,000.

On August 1, 2008, pursuant to the SCN Purchase Agreement, the Company sold and issued to the August 2008 Investors an aggregate of 500 August 2008 Units comprised of Notes in the aggregate principal amount of \$500,000 and August 2008 Warrants to purchase up to 1,000,000 shares of common stock for an aggregate purchase price of \$500,000 (the “SCN Financing”).

On each of September 4, 2008, October 1, 2008, November 3, 2008 and December 1, 2008, the Company sold and issued to the August 2008 Investors an aggregate of 125 August 2008 Units comprised of Notes in the aggregate principal amount of \$125,000 and August 2008 Warrants to purchase up to 250,000 shares of common stock for an aggregate purchase price of \$125,000 (the “Subsequent Financings”).

The Notes issued in the SCN Financing and the Subsequent Financings had an initial conversion price of \$0.35 per share, subject to adjustment as provided in the Notes. In addition, the August 2008 Investors had the option to purchase up to an additional 4,000 August 2008 Units, in one or more closings at their sole option at any time on or before December 31, 2013.

Interest on the Notes accrued at the rate of 7.0% per annum from the date of issuance, and was payable semi-annually, on January 31 and July 31 of each year. Interest was payable, at the Company's sole election, in cash or shares of common stock, to holders of Notes on the record date for such interest payments, with the record dates being each January 15 and July 15 immediately preceding an interest payment date. The effective interest rate of the Notes, including the effect of the amortization of the embedded conversion feature and the note discount, was 39.4%.

The net proceeds to the Company from the sale of 1,000 August 2008 Units in the SCN Financing and Subsequent Financing, after deducting for expenses, were approximately \$844,000. The Company used the net proceeds to fund the development of AEOL 10150 and to fund ongoing operations of the Company. Offering costs of the private placement were \$156,000 and were allocated to the Notes and August 2008 Warrants based upon their respective fair values. The offering costs attributed to the Notes in the amount of \$100,000 were capitalized as Debt Issuance Costs. The Debt Issuance Costs were amortized over the life of the Notes in the SCN Financing.

Pursuant to the Securities Purchase and Exchange Agreement dated October 6, 2009 (the "October 2009 Purchase Agreement"), as more fully described in Note G— Stockholders' Equity, which is included in the Company's Annual Report on Form 10-K/A for the fiscal year ended September 30, 2010, the holders of the Notes agreed to convert all \$1,000,000 in principal amount of the Notes into common stock at a conversion rate of \$0.35 per share and to exchange their remaining option to purchase an additional \$4,000,000 in Notes for warrants to purchase up to 14,285,714 shares of common stock with an initial exercise price of \$0.28 per share, subject to adjustment as provided in the warrants.

On December 24, 2009, the Company entered into an amendment (the "Amendment") to the October 2009 Purchase Agreement, pursuant to which the Company agreed to lower the conversion price of the Notes from \$0.35 per share to \$0.28 per share and as a result, issued an additional 714,286 shares of common stock to the former holders of the Notes. The Amendment was executed to resolve a misunderstanding regarding one of the financing terms in the October 6, 2009 financing between the Company and the investors in the financing. The Company did not receive any proceeds from the issuance. As a result of the Amendment and the issuance of the additional shares, the Company recorded a charge of \$343,000 in the Statement of Operations as interest expense for the value of the shares issued on the date of issuance.

Affiliates of Xmark Opportunity Partners, LLC were the sole investors in the SCN Financing. Together with its affiliates, Xmark Opportunity Partners, LLC beneficially owned approximately 52% of the Company's outstanding common stock prior to the SCN Financing. Xmark Opportunity Partners, LLC is the sole manager of Goodnow Capital, LLC ("Goodnow") and possesses sole power to vote and direct the disposition of all securities of the Company held by Goodnow. Goodnow has the right to designate up to two directors for election to the Company's Board of Directors, pursuant to the terms of a purchase agreement between Goodnow and the Company. David C. Cavalier, a current director of the Company and Managing Partner of Xmark Opportunity Partners LLC, is President of Goodnow. The transaction was evaluated by the Company's management and the Board of Directors for fairness to ensure the terms were reasonable given the related party nature of the SCN Financing by providing an option for non-related party investors to participate in the transaction.

Elan Note Payable

In August 2002, Aeolus borrowed \$638,000 from Elan Corporation, plc (“Elan”) pursuant to a promissory note. The note payable accrued interest at 10% compounded semi-annually. The note was convertible at the option of Elan into shares of the Company’s Series B non-voting convertible preferred stock (“Series B Stock”) at a rate of \$43.27 per share. The original note matured on December 21, 2006. However, in February 2007, the Company and Elan terminated the note, the Company paid \$300,000 in cash to Elan, Elan forgave \$225,000 of the note payable and Elan and the Company entered into a new two-year note payable in the amount of \$453,000 under substantially the same terms as the original note. In February 2009, the Company and Elan agreed to amend the new note payable to extend its maturity date from February 7, 2009 to February 7, 2011 and increased the interest rate of the convertible promissory note from 10% to 11% effective February 7, 2009. As of the date of the amendment, an aggregate of \$553,000 in principal and interest was outstanding under the convertible promissory note. In the event of an event of default under the convertible promissory note, Elan may demand immediate payment of all amounts outstanding under the note. For purposes of the note, an event of default includes, among other items, a default in the payment of the note principal or interest when due and payable, an uncured breach by the Company of its obligations to Elan pursuant the agreements under which the convertible promissory note was issued, an inability of the Company to pay its debts in the normal course of business, the cessation of business activities by the Company (other than as a result of a merger or consolidation with a third party) without Elan’s prior written consent and the appointment of a liquidator, receiver, administrator, examiner, trustee or similar officer of the Company or over all or substantially all of its assets under the law.

During the term of the note payable, Elan has the option to convert the note into shares of Series B Stock at a rate of \$9.00 per share. Upon the maturity of the note payable, Aeolus has the option to repay the note either in cash or in shares of Series B Stock and warrants having a then fair market value equal to the amount due under the note; provided that the fair market value used for calculating the number of shares to be issued will not be less than \$13.00 per share. As of December 31, 2010 and 2009, the outstanding balance, including interest, on the note payable to Elan was approximately \$657,000 and 610,000, respectively.

On February 7, 2011, the due date of the loan, Aeolus elected to exercise its right to repay the note (see also, Section I. Subsequent Events below), with a maturity value of approximately \$663,000, with 50,993 shares of the Company's Series B Stock and a warrant to purchase an aggregate of 896,037 shares of the Company's Series B Stock at an exercise price of \$0.01 per share. The warrants have a term of five years, a cashless exercise provision and customary anti-dilution adjustments in the event of stock splits, stock combination, reorganizations and similar events.

F. Stockholders' Equity

Preferred Stock

The Certificate of Incorporation of Aeolus authorizes the issuance of up to 10,000,000 shares of Preferred Stock, at a par value of \$.01 per share. The Board of Directors has the authority to issue Preferred Stock in one or more series, to fix the designation and number of shares of each such series, and to determine or change the designation, relative rights, preferences, and limitations of any series of Preferred Stock, without any further vote or action by the stockholders of the Company.

As of December 31, 2010, 475,087 shares of Series B Stock were outstanding, all of which were held by Elan. Each share of Series B Stock is convertible into one share of common stock.

Common Stock

October 2009 Financing

On October 6, 2009, the Company entered into the October 2009 Purchase Agreement with several accredited institutional investors (the "October 2009 Investors") pursuant to which the Company sold and issued to the October 2009 Investors in a private placement an aggregate of 5,892,857 units (the "October 2009 Units"), comprised of an aggregate of 5,892,857 shares of common stock (the "October 2009 Shares") and warrants to purchase up to an aggregate of 11,785,714 additional shares of common stock (the "October 2009 Warrants"), with an initial exercise price of \$0.28 per share, subject to adjustment as provided in the October 2009 Warrants, with each October 2009 Unit representing one share of common stock and a October 2009 Warrant to purchase two shares of common stock, at a purchase price of \$0.28 per October 2009 Unit for aggregate gross proceeds of \$1,650,000 (collectively, the "October 2009 Financing"). The October 2009 Warrants are exercisable for a seven year period from their date of issuance; contain a "cashless exercise" feature that allows the holder to exercise the October 2009 Warrants without a cash payment to the Company under certain circumstances; contain a dividend participation right which allows the holder to receive any cash dividends paid on the common stock without exercising the October 2009 Warrant and contain a provision that provides for the reduction of the exercise price to \$0.01 in the event of any such payment of cash dividends by the Company or upon a change of control and contain anti-dilution provisions in the event of a stock dividend or split, dividend payment or other issuance, reorganization, recapitalization or similar event.

The Company also granted to the October 2009 Investors the option to acquire, collectively, up to an additional 5,892,857 October 2009 Units (the "Additional Units"), comprised of an aggregate of 5,892,857 shares of common stock and warrants to purchase up to an aggregate of 11,785,714 additional shares of common stock at the per

Additional Unit purchase price of \$0.28 (the “October 2009 Call Option”). In addition, the October 2009 Investors granted to the Company the option to require these October 2009 Investors, severally and not jointly, to acquire up to 5,892,857 Additional Units, less any Additional Units acquired under the October 2009 Call Option, at the per Additional Unit purchase price of \$0.28 (the “October 2009 Put Option”). The October 2009 Call Option was exercisable at any time, and from time to time, on or prior to June 30, 2010. The October 2009 Put Option was exercisable at any time from June 30, 2010 to July 30, 2010. On July 30, 2010, the Company exercised the October 2009 Put Option in full for \$1.65 million in gross cash proceeds and issued 5,892,857 shares of common stock and 11,785,714 warrants to the October 2009 Investors.

In addition, the October 2009 Investors agreed to convert all \$1,000,000 in principal amount of the Notes into common stock of the Company at a conversion rate of \$0.35 per share (the "Conversion Shares"), which was subsequently lowered to \$0.28 as discussed below, and to exchange their remaining option to purchase an additional \$4,000,000 in Notes for warrants to purchase up to 14,285,714 shares of common stock in substantially the same of form and terms of the October 2009 Warrants issued in the October 2009 Financing, including an initial exercise price of \$0.28 per share, subject to adjustment as provided in the warrants (the "Note Warrants"). As consideration for the October 2009 Investors to convert the Notes, the Company agreed to exchange warrants to purchase up to 2,000,000 shares of common stock issued to the October 2009 Investors in connection with the sale of the Notes, warrants to purchase up to 2,150,000 shares of common stock issued to the October 2009 Investors and one of their affiliates in connection with a financing completed in November 2005 and warrants to purchase up to 13,392,857 shares of common stock issued to the October 2009 Investors in connection with a financing completed in March 2009 (collectively, the "Prior Warrants") for warrants to purchase up to an aggregate of 17,542,857 shares of common stock in substantially the same form and terms of the October 2009 Warrants issued in the October 2009 Financing, including an initial exercise price of \$0.28 per share, subject to adjustment pursuant to the warrants (the "Exchange Warrants") (collectively, the "Conversion").

In connection with the October 2009 Financing and the Conversion, the Company also entered into a Registration Rights Agreement (the "October 2009 Rights Agreement") with the October 2009 Investors. In addition, the October 2009 Investors agreed to terminate the Company's Registration Rights Agreements dated November 21, 2005 and March 30, 2009. Pursuant to the October 2009 Rights Agreement, the Company agreed to file one or more registration statements (collectively, the "Registration Statements") with the Securities and Exchange Commission (the "SEC") covering the resale of the October 2009 Shares, the Conversion Shares and all shares of common stock issuable upon exercise of the October 2009 Warrants, the Note Warrants and the Exchange Warrants (collectively, the "Registrable Securities") upon demand of the holders of a majority of the Registrable Securities (a "Demand Registration"). Such holders have the right to two Demand Registrations, subject to certain exceptions. In the event the holders exercise their right to a Demand Registration, the Company has agreed to file a Registration Statement to register the resale of the Registrable Securities within a certain number of days after the request and to use commercially reasonable efforts to cause the Registration Statement to be declared effective by the SEC as soon as practicable after the filing thereof. The Company also agreed to use its commercially reasonable efforts to keep the Registration Statements effective for a specified period.

The net proceeds to the Company from the October 2009 Financing, after deducting for expenses, were approximately \$1.6 million. The Company has used, and intends to continue to use, the net proceeds from the October 2009 Financing to finance animal efficacy studies in Acute Radiation Syndrome, the development of AEOL 10150 and ongoing operations of the Company.

The fair value of the October 2009 Warrants, the Note Warrants and the Exchange Warrants was estimated to be \$10,585,000 using the Black-Scholes option pricing model with the following assumptions: dividend yield of 0%; expected volatility of 93%; risk free interest rate of 2.9%; and an expected life of seven years. The fair value of the Prior Warrants cancelled on October 6, 2009 was \$3,352,000. The proceeds from the October 2009 Financing were allocated based upon the relative fair values of the October 2009 Warrants and the October 2009 Shares. Due to the anti-dilution provisions of the October 2009 Warrants, the Note Warrants and the Exchange Warrants, these warrants were deemed to be a liability under current accounting guidance and as a result the warrant liability was increased by \$7,233,000 of which \$6,213,000 was recorded as a charge to the Statement of Operations and \$1,020,000 of proceeds from the October 2009 Financing was allocated to the value of the October 2009 Warrants.

Affiliates of Xmark Opportunity Partners, LLC were the sole investors in the October 2009 Financing and, together with the Company, were the sole participants in the Conversion. Together with its affiliates, Xmark Opportunity Partners, LLC beneficially owned approximately 71% of the Company's outstanding common stock prior to the

October 2009 Financing and the Conversion. Xmark Opportunity Partners, LLC is the sole manager of Goodnow and possesses sole power to vote and direct the disposition of all securities of the Company held by Goodnow. Goodnow has the right to designate up to two directors for election to the Company's Board of Directors pursuant to the terms of a purchase agreement between Goodnow and the Company. David C. Cavalier, a current employee, director and Chairman of the Board of the Company, and Managing Partner of Xmark Opportunity Partners LLC, is President of Goodnow.

On December 24, 2009, the Company entered into an amendment (the "Amendment") to the October 2009 Purchase Agreement pursuant to which the Company agreed to lower the conversion price of the Notes from \$0.35 per share to \$0.28 per share and as a result, issued to the investors in the Company's October 2009 Financing an additional 714,286 shares of the Company's common stock upon conversion of the Notes (the "Issuance"). The Agreement was executed to resolve a misunderstanding regarding one of the financing terms between the Company and the October 2009 Investors. The Company did not receive any proceeds from the Issuance. The fair value of the common stock on the date of issuance was \$343,000 and was charged to the Statement of Operations as interest expense.

On July 30, 2010, the Company exercised the October 2009 Put Option. As a result of the exercise, the Company received \$1.65 million in gross proceeds from the investors in exchange for 5,892,857 additional Units (the "Additional Units"), comprised of an aggregate of 5,892,857 shares of common stock and warrants to purchase up to an aggregate of 11,785,714 additional shares of common stock at a purchase price of \$0.28 per share.

Net cash proceeds from the exercise of the October 2009 Put Option were approximately \$1.6 million after legal costs associated with the exercise and subsequent issuance of stock and warrants.

August 2010 Financing

On August 12, 2010, the Company announced an additional financing with certain existing investors (the “August 2010 Investors”). Under the terms of the agreement, the Company received \$1 million in gross proceeds in exchange for the issuance of 2.5 million shares of common stock and warrants to purchase up to 1,875,000 shares at an exercise price of \$0.50 per share. The Company also granted to the August 2010 Investors the option to acquire, collectively, up to an additional 2,500,000 units, comprised of an aggregate of 2,500,000 shares of common stock and warrants to purchase up to an aggregate of 1,875,000 additional shares of common stock at an exercise price of \$0.50 (the “August 2010 Call Option”). In addition, the August 2010 Investors granted to the Company the option to require these August 2010 Investors, severally and not jointly, to acquire up to 2,500,000 additional units, less any additional units acquired under the August 2010 Call Option, at the per additional unit purchase price of \$0.40 (the “August 2010 Put Option”).

On December 28, 2010, the investors exercised their Call Option and the Company received \$1 million in proceeds in exchange for 2,500,000 common shares and 1,875,000 warrants, with an initial exercise price of \$0.50 per share, subject to adjustment as provided in the warrants (the “Additional Warrants”). The Additional Warrants are exercisable for a seven-year period from their date of issuance; contain a “cashless exercise” feature that allows the holder to exercise the Additional Warrants without a cash payment to the Company under certain circumstances; contain a dividend participation right which allows the holder to receive any cash dividends paid on the Common Stock without exercising the Additional Warrant; contain a provision that provides for the reduction of the exercise price to \$0.01 in the event of any such payment of cash dividends by the Company or upon a change of control; and contain anti-dilution provisions in the event of a stock dividend or split, dividend payment or other issuance, reorganization, recapitalization or similar event. The net proceeds to the Company from the December 2010 financing, after deducting for expenses, were approximately \$990,000.

Dividends

The Company has never paid a cash dividend on its common stock and does not anticipate paying cash dividends on its common stock in the foreseeable future. If we pay a cash dividend on our common stock, we also must pay the same dividend on an as converted basis on our Series B preferred stock. In addition, under the terms of the warrants to purchase up to 61,822,749 shares of our common stock issued to Xmark Opportunity Partners, LLC or its affiliates (“Xmark”) in four transactions (on each of October 6, 2009, July 30, 2010, August 11, 2010 and December 31, 2010), if we were to pay a dividend on our common stock, the exercise price of these warrants would be reset from \$0.28 per share or \$0.50 per share, as applicable, to \$0.01 per share and the warrant holders would also be entitled receive any such dividend paid.

Warrants

As of December 31, 2010, warrants to purchase an aggregate of 68,276,667 shares of common stock were outstanding. Details of the warrants for common stock outstanding at December 31, 2010 were as follows:

Number of Shares	Exercise Price	Expiration Date
50,000	\$ 0.35	May 2011
50,000	\$ 1.00	May 2011
50,000	\$ 1.50	May 2011
50,000	\$ 2.00	May 2011
50,000	\$ 2.50	May 2011
7,000,000	\$ 0.75	June 2011
1,776,668	\$ 0.28	May 2012
20,000	\$ 0.39	September 2014
15,000	\$ 0.50	September 2014
15,000	\$ 0.60	September 2014
43,614,285	\$ 0.28	October 2016
11,785,714	\$ 0.28	July 2017
1,875,000	\$ 0.50	August 2017
1,875,000	\$ 0.50	December 2017
50,000	\$ 0.38	April 2020
68,276,667	\$ 0.34	

G. Stock-Based Compensation

Below is a summary of stock option activity for the three months ended December 31, 2010:

	Number of Shares	Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Outstanding at 9/30/2010	7,921,904	\$ 1.12	7.00	\$ 874,345
Granted	170,000	\$ 0.62	9.91	\$ 11,625
Exercised	—	\$ 0.00	0.00	\$ —
Expired or Canceled	(55,748)	\$ 31.75	0.00	\$ —
Forfeited	—	\$ —	—	\$ —
Vested (RSAs)	—	\$ —	—	\$ —
Outstanding at 12/31/2010	8,036,156	\$ 0.89	6.86	\$ 1,463,680

For the three months ended December 31, 2010 all stock options were issued with an exercise price at or above the fair market value of the Company's common stock on the date of grant.

The details of stock options for the three months ended December 31, 2010 were as follows:

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Number Outstanding at December 31, 2010	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Number Exercisable at December 31, 2010	Weighted Average Exercise Price	
\$ 0.29-0.32	1,526,250	\$ 0.30	8.82	1,526,250	\$ 0.30	
\$ 0.33-0.45	2,928,500	\$ 0.40	9.19	1,723,504	\$ 0.39	
\$ 0.55-0.73	674,111	\$ 0.60	7.07	509,739	\$ 0.59	
\$ 0.75-0.89	667,835	\$ 0.81	5.18	667,835	\$ 0.81	
\$ 0.90-1.45	516,500	\$ 0.94	5.53	516,500	\$ 0.94	
\$ 1.50	1,256,019	\$ 1.50	2.57	1,256,019	\$ 1.50	
\$ 1.52-1.85	211,250	\$ 1.84	3.72	211,250	\$ 1.84	
\$ 2.10-12.85	237,045	\$ 6.46	2.47	237,045	\$ 6.46	
\$ 15.00-19.38	18,646	\$ 17.91	0.40	18,646	\$ 17.91	
\$ 0.29-19.38	8,036,156	\$ 0.89	6.86	6,666,788	\$ 0.99	

Stock-based compensation expense recognized in the statement of operations is as follows (in thousands):

	For the three months ended	
	December 31, 2010	2009
Research and Development Expenses	20	24
General and Administrative Expenses	167	166
	187	190

The total deferred compensation expense for outstanding and unvested stock options for the three months ended December 31, 2010 was approximately \$497,000. The weighted average remaining recognition period for the total deferred compensation expense is approximately seven months. The fair value of the options associated with the above compensation expense was determined at the date of the grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	For the three months ended	
	December 31, 2010	2009
Dividend yield	0%	0%
Expected volatility	92.0%	96%
Risk-free interest rate	3.1%	3.3%
Expected term	10 years	10 years

H. Commitments

The Company acquires assets still in development and enters into research and development arrangements with third parties that often require milestone and royalty payments to the third party contingent upon the occurrence of certain future events linked to the success of the asset in development. Milestone payments may be required, contingent upon the successful achievement of an important point in the development life-cycle of the pharmaceutical product e.g., approval of the product for marketing by a regulatory agency). If required by the arrangement, the Company may have to make royalty payments based upon a percentage of the sales of the pharmaceutical product in the event that

regulatory approval for marketing is obtained. Because of the contingent nature of these payments, they are not included in the table of contractual obligations.

These arrangements may be material individually, and in the unlikely event that milestones for multiple products covered by these arrangements were reached in the same period, the aggregate charge to expense could be material to the results of operations in any one period. In addition, these arrangements often give Aeolus the discretion to unilaterally terminate development of the product, which would allow Aeolus to avoid making the contingent payments; however, Aeolus is unlikely to cease development if the compound successfully achieves clinical testing objectives.

I. Subsequent Events

On February 7, 2011, the due date of the loan payable to Elan Corporation (see Section E. Note Payable above), Aeolus elected to exercise its right to repay the note, with a maturity value of approximately \$663,000, with 50,993 shares of the Company's Series B Stock and a warrant to purchase an aggregate of 896,037 shares of the Company's Series B Stock at an exercise price of \$0.01 per share. The warrants have a term of five years, a cashless exercise provision and customary anti-dilution adjustments in the event of stock splits, stock combination, reorganizations and similar events. In connection with the issuance, Aeolus amended its certificate of incorporation on February 7, 2011 to increase the authorized number of shares of the Company's Series B Stock from 600,000 to 1,600,000.

We have evaluated subsequent events through the issuance of these condensed consolidated financial statements and determined that no other material subsequent events have occurred.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Introduction

Unless otherwise noted, the terms "we," "our" or "us" refer collectively to Aeolus Pharmaceuticals, Inc. and our wholly owned subsidiary, Aeolus Sciences, Inc.

This report contains, in addition to historical information, statements by us with respect to expectations about our business and future results which are "forward-looking" statements under the Private Securities Litigation Reform Act of 1995. These statements and other statements made elsewhere by us or by our representatives, which are identified or qualified by words such as "likely," "will," "suggests," "expects," "might," "believe," "could," "should," "may," "estimates," "predict," "continue," "would," "anticipates," "plans," or similar expressions, are based on a number of assumptions that are subject to risks and uncertainties. Such statements include, but are not limited to, those relating to Aeolus' product candidates and funding options, as well as its proprietary technologies and uncertainties and other factors that may cause Aeolus' actual results to be materially different from historical results or from any results expressed or implied by such forward-looking statements. Important factors that could cause results to differ include risks associated with uncertainties of progress and timing of clinical trials, scientific testing, obtaining regulatory approval, the need to obtain (and obtaining) funding for pre-clinical and clinical trials and operations, the scope and validity of intellectual property protection for Aeolus' product candidates, proprietary technologies and their uses, new accounting and SEC requirements and competition from other biopharmaceutical companies. Certain of these factors and others are more fully described in Aeolus' filings with the SEC, including, but not limited to, Aeolus' Annual Report on Form 10-K/A for the fiscal year ended September 30, 2010, filed with the Securities and Exchange Commission on December 30, 2010. All forward-looking statements are based on information available as of the date hereof, and we do not assume any obligation to update such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof.

Operations Summary

Aeolus Pharmaceuticals, Inc. (“we,” “us” or the “Company”), a Southern California-based biopharmaceutical company, is developing a new class of broad spectrum catalytic antioxidant compounds based on technology discovered at Duke University and National Jewish Health.

Our lead compound, AEOL 10150, is entering human clinical trials in oncology, where it will be used in combination with radiation therapy. AEOL 10150 has previously been tested in two Phase I clinical trials with no serious adverse events reported. The compound is also being developed as a medical countermeasure against the pulmonary sub-syndrome of acute radiation syndrome (“Pulmonary Acute Radiation Syndrome” or “Lung-ARS”) as well as the gastrointestinal sub-syndrome of acute radiation syndrome (“GI-ARS”), both caused by exposure to high levels of radiation due to a radiological or nuclear event. It is also being developed for use as a countermeasure for exposure to chemical vesicants such as chlorine gas and sulfur mustard gas. AEOL 10150 has already performed well in animal efficacy and safety studies in each of these potential indications. A significant portion of the funding for the medical countermeasure development programs to date has come from various government entities. Although we expect this funding to continue, there is no guarantee that it will do so.

We were incorporated in the State of Delaware in 1994. Our common stock trades on the OTC Bulletin Board under the symbol "AOLS." Our principal executive offices are located at 26361 Crown Valley Parkway, Suite 150 Mission Viejo, California 92691, and our phone number at that address is (949) 481-9825. Our website address is www.aeoluspharma.com. However, the information on, or that can be accessed through, our website is not part of this report. We also make available free of charge through our website our most recent annual report on Form 10-K/A, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC.

We do not generate revenue from sales. Therefore, we must rely on public or private equity offerings, debt financings, collaboration arrangements or grants to finance our operations. Our strategy is to use non-dilutive capital wherever possible to develop our exciting platform of broad-spectrum catalytic antioxidant compounds in important unmet indications of national strategic importance. We plan to continue to leverage that capital, like the investments made by U.S. government agencies, such as The National Institute of Allergy and Infectious Diseases ("NIAID") and National Institutes of Health's ("NIH") Countermeasures Against Chemical Threats ("CounterACT"), in AEOL 10150 as a medical countermeasure, to concurrently develop these promising compounds for use in significant unmet medical indications, like oncology. We are currently doing this with AEOL 10150, where we are leveraging the potential substantial government investment in research and development of AEOL 10150 as a medical countermeasure to develop the compound in oncology indications, where it would be used in combination with radiation therapy.

Need for Additional Funds

With the financing announced in December 2010, we believe we have adequate financial resources to fund our operations into the second quarter of fiscal 2012. In order to fund on-going operating cash requirements beyond the first half of fiscal year 2012, or to accelerate or expand our programs, however, we may need to raise significant additional funds. Our need for additional financing is discussed under "Liquidity and Capital Resources".

Results of Operations

Three months ended December 31, 2010 versus three months ended December 31, 2009

We had net losses of approximately \$7,620,000 (including a non-cash charge for increases in valuation of warrants of approximately \$7,202,000) for the three months ended December 31, 2010, versus net losses of approximately \$15,276,000 (including a non-cash charge for increases in valuation of warrants of approximately \$13,860,000) for the three months ended December 31, 2009.

Revenue for the three months ended December 31, 2010 was approximately \$337,000, which compares to zero revenue for the three months ended December 31, 2009. The revenue is from two grants awarded to the Company, each for approximately \$244,000, under the Qualifying Therapeutic Discovery Grant Program administered by the IRS and the U.S. Department of Health and Human Services. The Company received payment in full for one grant in support of development of AEOL 10150 as a medical countermeasure for Lung-ARS in November and approximately \$92,000 as a partial payment in support of our development of AEOL 11207 as a potential treatment for Parkinson's Disease.

Research and development ("R&D") expenses increased about \$6,000, or 4%, to approximately \$190,000 for the three months ended December 31, 2010 from approximately \$184,000 for the three months ended December 31, 2009. We currently have seven development programs in progress: the study of our drug candidates as a potential countermeasure against the effects of sulfur mustard gas on the lung and skin, as a protectant against the effects of radiation on the lungs and on the gastro-intestinal tract, as a countermeasure against the effects of chlorine gas, as a potential treatment for epilepsy and for the potential treatment for Parkinson's disease.

In December 2009, Aeolus was informed by the U.S. Department of Health and Human Services (“HHS”) Biomedical Advanced Research and Development Authority (“BARDA”) that it had been chosen to submit a full proposal for funding of its Lung-ARS program from its current stage all the way through U.S. Food and Drug Administration (“FDA”) approval, based on a summary “white paper” submitted by the Company earlier in 2009. Aeolus submitted a full proposal in February 2010. The Company was notified in July 2010 that its proposal had been chosen by BARDA, and then entered into negotiations for a development contract with the agency. The Company is awaiting a final decision from BARDA on the contract. If the contract from BARDA is awarded, it is expected that it will fund all of the costs necessary to bring AEOL 10150 to FDA approval for that indication.

R&D expenses for our antioxidant program have totaled approximately \$37,102,000 from inception through December 31, 2010. Because of the uncertainty of our research and development and clinical studies, we are unable to predict the total level of spending on the program or the program completion date. However, we expect R&D expenses during fiscal 2011 will be higher than fiscal 2010 if we are awarded the BARDA contract. We anticipate that much of the increase in R&D spending should be reimbursed under that contract, if awarded. If the contract is not awarded, R&D expenses are expected to be relatively in line with the level of expenditures in fiscal 2010.

General and administrative (“G&A”) expenses increased about \$144,000, or 35%, to approximately \$550,000 for the three months ended December 30, 2010 from approximately \$406,000 for the three months ended December 31, 2009. Consulting Fees increased by \$50,000 due to the engagement of consultants to provide financial and chemistry, manufacturing, and controls (“CMC”) support during the three months ended December 31, 2010. Legal fees increased by approximately \$35,000 as a result of higher reliance on our outside legal counsel for review and compliance related to financings and SEC filings during the current quarter, as well as contract reviews.

We incurred interest expense of approximately \$15,000 for the three months ended December 31, 2010 compared to interest expense of approximately \$826,000 for the three months ended December 31, 2009. The decrease in interest expense is the result of the conversion of notes payable to equity in the three months ended December 31, 2009.

As previously disclosed, certain of our warrants to purchase common stock were deemed to be a liability upon adoption of a new accounting pronouncement on October 1, 2009. Subsequent changes to the fair market value resulted in an offsetting charge in the statements of operations of approximately \$7,202,000 for the three months ended December 31, 2010, and approximately \$13,860,000 for the three months ending December 31, 2009. The warrant liability and revaluations have not and will not have any impact on our working capital, liquidity or business operations.

Liquidity and Capital Resources

In October 2010, we were notified that we had been awarded the maximum amount, of about \$244,000, under the Qualifying Therapeutic Discovery Grant Program (“QTDP”) administered by the IRS and the U.S. Department of Health and Human Services (“HHS”) in support of our development of AEOL 10150 as an medical countermeasure (“MCM”) for Lung-ARS. In November 2010, we received approximately \$244,000 from the IRS as full payment for the Lung-ARS award.

In October 2010, we were also notified that we had been awarded the maximum amount, of approximately \$244,000, under the QTDP administered by the IRS and the HHS in support of our development of AEOL 11207 as a potential treatment for Parkinson’s disease. In November 2010, we received about \$92,000 from the IRS as an initial payment for the Parkinson’s program award. We expect to receive the balance of about \$152,000 after we file our 2010 fiscal year tax return and submit the request for payment to the IRS.

We do not have any revenue and therefore we rely on investors, grants, collaborations and licensing of our compounds to finance our operations. At December 31, 2010, we had approximately \$2,867,000 of cash and cash equivalents, an increase of approximately \$512,000 from September 30, 2010. The increase in cash was primarily due to the funding of expenses from operations, which was more than offset by the \$1.0 million in net proceeds from the December 2010 financing and the two awards from the IRS. We believe we have adequate financial resources to conduct operations into the second quarter of fiscal year 2012, but in order to fund on-going operating cash requirements beyond that point, or to further accelerate or expand our programs, we need to raise significant additional funds.

We incurred significant losses from operations of approximately \$7,620,000 (including a non-cash charge for increases in valuation of warrants of approximately \$7,202,000) and cash outflows from operations of approximately \$517,000 for the three months ended December 31, 2010. Our ongoing future cash requirements will depend on numerous factors, particularly the progress of our catalytic antioxidant program, clinical trials and ability to negotiate and complete collaborative agreements or out-licensing arrangements. In order to help fund our on-going operating cash requirements, we intend to seek new collaborations for our antioxidant research program that include initial cash payments and on-going research support. In addition, we might sell additional shares of our stock and/or debt and explore other strategic and financial alternatives, including a merger or joint venture with another company, the sale of stock and/or debt, the establishment of new collaborations for current research programs, that include initial cash

payments and ongoing research support and the out-licensing of our compounds for development by a third party.

There are significant uncertainties as to our ability to access potential sources of capital. We may not be able to enter into any collaboration on terms acceptable to us, or at all, due to conditions in the pharmaceutical industry or in the economy in general or based on the prospects of our catalytic antioxidant program. Even if we are successful in obtaining collaboration for our antioxidant program, we may have to relinquish rights to technologies, product candidates or markets that we might otherwise develop ourselves. These same risks apply to any attempt to out-license our compounds.

Similarly, due to market conditions, the illiquid nature of our stock and other possible limitations on equity offerings, we may not be able to sell additional securities or raise other funds on terms acceptable to us, if at all. Any additional equity financing, if available, would likely result in substantial dilution to existing stockholders.

Our forecast of the period of time through which our financial resources will be adequate to support our operations is forward-looking information, and actual results could vary.

Off-Balance Sheet Commitments

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk.

Our exposure to market risk is presently limited to the interest rate sensitivity of our cash and cash equivalents, which is affected by changes in the general level of U.S. interest rates. However, we believe that we are not subject to any material market risk exposure and do not expect that changes in interest rates would have a material effect upon our financial position. A hypothetical 10% change in interest rates would not have a material effect on our Statement of Operations or Cash Flows for the three months ending December 31, 2010. We do not have any foreign currency or other derivative financial instruments. Our debt bears interest at a fixed rate.

ITEM 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

We maintain “disclosure controls and procedures” as such term is defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). In designing and evaluating our disclosure controls and procedures, our management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Based on his evaluation as of the end of the period covered by this report, our Chief Executive Officer who also serves as our principal financial and accounting officer has concluded that our disclosure controls and procedures were not effective such that the information relating to our company, required to be disclosed in our Securities and Exchange Commission reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and (ii) is accumulated and communicated to our management, including our Chief Executive Officer, to allow timely decisions regarding required disclosure.

Our management concluded that our disclosure controls and procedures were not effective as a result of a material weakness in our internal control over financial reporting as of December 31, 2010. In making the assessment of our internal control over financial reporting as of December 31, 2010, our management used criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) in an Internal Control Integrated Framework. Our management has determined that material weaknesses existed as of December 31, 2010 as a result of the lack of segregation of duties and weaknesses in financial reporting and close processes, based on the criteria set forth by COSO.

A “material weakness,” as defined by the Public Company Accounting Oversight Board (PCAOB) is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

To address the material weaknesses, management has established mitigating controls to minimize the potential for material misstatements in the financial statements. Management has determined that given our size, level of operations and financial resources, it is not practicable for us to eliminate the segregation of controls weakness. However, management has established mitigating controls to minimize the impact of the lack of segregation of duties and is considering the addition of external or internal resources to assist with the financial reporting and close processes.

Changes in Internal Control over Financial Reporting

Except as noted above, there have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) during the quarter ended December 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings.

None.

ITEM 1A. Risk Factors.

None.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

ITEM 3. Defaults Upon Senior Securities.

None.

ITEM 4. Removed and Reserved.

N/A.

ITEM 5. Other Information.

None.

ITEM 6. Exhibits

Exhibit #	Description
10.1	* Consulting Agreement, dated December 1, 2010, by and among Aeolus Pharmaceuticals, Inc., Aeolus Sciences, Inc. and Brian J. Day.
31.1	Certification of the Chief Executive Officer pursuant to Exchange Act Rules 13a-14(a) and 15d-14(a).
31.2	Certification of the Chief Financial Officer pursuant to Exchange Act Rules 13a-14(a) and 15d-14(a).
32.1	Certification by the Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. §1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

* Filed as Exhibit 10.1 to the Company's Current Report on Form 8-K filed with the Securities and Exchange Commission on December 3, 2010.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

AEOLUS PHARMACEUTICALS, INC.
