China Precision Steel, Inc.
Notes to the Consolidated Financial Statements
(Unaudited)

1. Description of Business

China Precision Steel, Inc. (the “Company,” “CPSL” or “we”) is a niche and high value-added steel processing company principally engaged in the manufacture and sale of cold-rolled precision steel products for downstream applications including automobile components and spare parts, kitchen tools, electrical appliances, roofing and food packaging materials. Raw materials, hot-rolled steel coils, will go through certain reduction, heating and cutting processing procedures to give steel coils or plates different thickness and specifications for deliveries in accordance with customers’ requirements. Specialty precision steel offers specific control of thickness, shape, width, surface finish and other special quality features that compliment the emerging need for highly engineered end use applications. Precision steel pertains to the precision of measurements and tolerances of the above factors, especially thickness tolerance.

We have five wholly-owned subsidiaries, Partner Success Holdings Limited (“PSHL”), Blessford International Limited (“Blessford International”), Shanghai Chengtong Precision Strip Company Limited (“Chengtong”), Shanghai Blessford Alloy Company Limited (“Shanghai Blessford”) and Shanghai Tuorong Precision Strip Company Limited (“Tuorong”). The Company’s principal activities are conducted through our two operating subsidiaries, Shanghai Chengtong and Shanghai Blessford with manufacturing facilities located in Shanghai, the People’s Republic of China (the “PRC”). The sole activity of Tuorong is the ownership of land use rights with respect to facilities utilized by Chengtong and Shanghai Blessford. PSHL and Blessford International are both British Virgin Islands companies with the sole purpose of investment holding.

2. Basis of Preparation of Financial Statements

The financial statements have been prepared in order to present the consolidated financial position and consolidated results of operations in accordance with accounting principles generally accepted in the United States of America (“US GAAP”) and are expressed in terms of US dollars (see Note 3 “Functional Currency and Translating Financial Statements” below).

The accompanying unaudited consolidated financial statements as of September 30, 2011 and for the periods ended September 30, 2011 and 2010 have been prepared in accordance with US GAAP and with the instructions to Form 10-Q and Regulation S-X applicable to smaller reporting companies. In the opinion of management, these unaudited consolidated financial statements include all adjustments considered necessary to make the financial statements not misleading. The results of operations for the three months ended September 30, 2011 are not necessarily indicative of the results to be expected for the full year ending June 30, 2012.

3. Summary of Significant Accounting Policies

The following is a summary of significant accounting policies:

Cash and Cash Equivalents – The Company considers all highly liquid debt instruments purchased with a maturity period of three months or less to be cash equivalents. The carrying amounts reported in the accompanying consolidated balance sheets for cash and cash equivalents approximate their fair value.

Accounts Receivable – Credit periods vary substantially across industries, segments, types and size of companies in the PRC where we principally operate our business. Because of the niche products that we process, our customers are

usually also niche players in their own respective segment, who then sell their products to end product manufacturers. The business cycle is relatively long, as well as the credit periods. The Company offers credit to its customers for periods of 60 days, 90 days, 120 days and 180 days. We generally offer longer credit terms to long-standing recurring customers with good payment histories and sizable operations. Accounts receivable are recorded at the time revenue is recognized and are stated net of allowance for doubtful accounts.

Allowance for Doubtful Accounts – The Company maintains an allowance for doubtful accounts based on its assessment of the collectability of the accounts receivable. Management determines the collectability of outstanding accounts by maintaining regular communication with such customers and obtaining confirmation of their intent to fulfill their obligations to the Company. Management also considers past collection experience, our relationship with customers and the impact of current economic conditions on our industry and market. However, we note that the continuation or intensification of the current global economic crisis may have negative consequences on the business operations of our customers and adversely impact their ability to meet their financial obligations. To reserve for potentially uncollectible accounts receivable, management has made a 50% provision for all accounts receivable that are over 180 days past due and full provision for all accounts receivable over 1 year past due. From time to time, we will review these credit periods, along with our collection experience and the other factors discussed above, to evaluate the adequacy of our allowance for doubtful accounts, and to make changes to the allowance, if necessary. If our actual collection experience or other conditions change, revisions to our allowances may be required, including a further provision which could adversely affect our operating income, or write back of provision when estimated uncollectible accounts are actually collected. At September 30 and June 30, 2011, the Company had \$1,076,798 and \$1,063,620 of allowances for doubtful accounts, respectively.

Bad debts are written off for past due balances over two years or when it becomes known to management that such amount is uncollectible. There was no provision for bad debts recognized for the three months ended September 30, 2011 and 2010.

Inventories – Inventories are stated at the lower of cost or market. Cost is determined using the weighted average method. Market value represents the estimated selling price in the ordinary course of business less the estimated costs necessary to complete the sale.

Cost of inventories comprises all costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Costs of conversion of inventories include fixed and variable production overheads, taking into account the stage of completion.

Intangible Assets and Amortization – Intangible assets represent land use rights in China acquired by the Company and are stated at cost less amortization. Amortization of land-use rights is calculated on the straight-line method, based on the period over which the right is granted by the relevant authorities in China.

Advances to Suppliers – In order to insure a steady supply of raw materials, the Company is required from time to time to make cash advances to its suppliers when placing purchase orders, for a guaranteed minimum delivery quantity at future times when raw materials are required. The advance is seen as a deposit to suppliers and guarantees our access to raw materials during periods of shortages and market volatility, and is therefore considered an important component of our operations. Contracted raw materials are priced at prevailing market rates agreed by us with the suppliers prior to each delivery date. Advances to suppliers are shown net of an allowance which represents potentially unrecoverable cash advances at each balance sheet date. Such allowances are based on an analysis of past raw materials receipt experience and the credibility of each supplier according to its size and background. In general, we do not provide allowances against advances paid to those PRC state-owned companies as there is minimal risk of default. Our allowances for advances to suppliers are subjective critical estimates that have a direct impact on reported net earnings, and are reviewed quarterly at a minimum to reflect changes from our historic raw materials receipt experience and to ensure the appropriateness of the allowance in light of the circumstances present at the time of the review. It is reasonably possible that the Company's estimate of the allowance will change, such as in the case when the Company becomes aware of a supplier's inability to deliver the contracted raw materials or meet its financial obligations. As of September 30 and June 30, 2011, the Company had allowances of advances to suppliers of \$1,745,638 and \$1,724,275, respectively.

Allowances for advances to suppliers are written off when all efforts to collect the materials or recover the cash advances have been unsuccessful, or when it has become known to the management that there is no intention by the suppliers to deliver the contracted raw materials or refund the cash advances. To date, we have not written off any advances to suppliers.

-7-

Property, Plant and Equipment – Property, plant and equipment are stated at cost less accumulated depreciation. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to its present working condition and location for its intended use.

Depreciation is computed on a straight-line basis over the estimated useful lives of the related assets for financial reporting purposes. The estimated useful lives for significant property and equipment are as follows:

Buildings	10 years
Plant and machinery	10 years
Motor vehicles	5 years
Office equipment	5 years

Repairs and maintenance costs are normally charged to the statement of operations in the year in which they are incurred. In situations where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefits expected to be obtained from the use of the asset, the expenditure is capitalized as an additional cost of the asset.

Impairment of Long-Lived Assets – The Company accounts for impairment of property, plant and equipment and amortizable intangible assets in accordance with ASC Topic No. 360 “Property, Plant and Equipment” (“ASC 360”), which requires the Company to evaluate a long-lived asset for recoverability when there is an event or circumstance that indicates the carrying value of the asset may not be recoverable. An impairment loss is recognized when the carrying amount of a long-lived asset or asset group is not recoverable (when carrying amount exceeds the gross, undiscounted cash flows from use and disposition) and is measured as the excess of the carrying amount over the asset’s (or asset group’s) fair value.

Capitalized Interest – The Company capitalizes interest cost on borrowings incurred during the new construction or upgrade of qualified assets. Capitalized interest is added to the cost of the underlying assets and is amortized over the useful lives of the assets. During the three months ended September 30, 2011 and 2010, the Company capitalized \$nil and \$135,313, respectively, of interest to construction-in-progress.

Construction-in-Progress – Plant and production lines currently under development are accounted for as construction-in-progress. Construction-in-progress is recorded at acquisition cost, including land rights cost, development expenditure, professional fees and the interest expenses capitalized during the course of construction for the purpose of financing the project. Upon completion and readiness for use of the project, the cost of construction-in-progress is to be transferred to property, plant and equipment.

Contingent Liabilities and Contingent Assets – A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. It can also be a present obligation arising from past events that is not recognized because it is not probable that outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognized but is disclosed in the notes to the financial statements. When a change in the probability of an outflow occurs so that outflow is probable, the contingency is then recognized as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain events not wholly within the control of the Company.

Contingent assets are not recognized but are disclosed in the notes to the financial statements when an inflow of economic benefits is probable. When inflow is virtually certain, an asset is recognized.

Advances from Customers – Advances from customers represent advance cash receipts from customers and for which goods have not been delivered or services have not been rendered at each balance sheet date. Advances from customers for goods to be delivered or services to be rendered in the subsequent period are carried forward as deferred revenue.

Revenue Recognition – Revenue from the sale of goods and services is recognized on the transfer of risks and rewards of ownership, which generally coincides with the time when the goods are delivered to customers and the title has passed and services have been rendered. Revenue is reported net of all VAT taxes. Other income is recognized when it is earned.

Functional Currency and Translating Financial Statements – The Company’s principal country of operations is the PRC. Our functional currency is Chinese Renminbi; however, the accompanying consolidated financial statements have been expressed in United States Dollars (“USD”). The consolidated balance sheets have been translated into USD at the exchange rates prevailing at each balance sheet date. The consolidated statements of operations and cash flows have been translated using the weighted-average exchange rates prevailing during the periods of each statement. The registered equity capital denominated in the functional currency is translated at the historical rate of exchange at the time of capital contribution. All translation adjustments resulting from the translation of the financial statements into the reporting currency are dealt with as other comprehensive income in stockholders’ equity.

Accumulated Other Comprehensive Income – Accumulated other comprehensive income represents the change in equity of the Company during the periods presented from foreign currency translation adjustments.

Taxation – Taxation on overseas profits has been calculated on the estimated assessable profits for the year at the rates of taxation prevailing in the country in which the Company operates.

United States

China Precision Steel, Inc. is subject to United States federal income tax at a tax rate of 34%. No provision for income taxes in the United States has been made as China Precision Steel, Inc. had no taxable income in the 2011 and 2010 periods.

BVI

PSHL and Blessford International were incorporated in the British Virgin Islands and, under the current laws of the British Virgin Islands, are not subject to income taxes.

PRC

Provision for the PRC enterprise income tax is calculated at the prevailing rate based on the estimated assessable profits less available tax relief for losses brought forward. The Company does not accrue taxes on unremitted earnings from foreign operations as it is the Company’s intention to invest these earnings in the foreign operations indefinitely.

Enterprise income tax

On March 16, 2007, the National People’s Congress of China passed The Enterprise Income Tax Law (the “New EIT Law”), and on December 6, 2007, the State Council of China passed the Implementing Rules for the EIT Law (“Implementing Rules”) which took effect on January 1, 2008. The New EIT Law and Implementing Rules impose a unified enterprise income tax (“EIT”) of 25% on all domestic-invested enterprises and foreign-invested entities (“FIEs”), unless they qualify under certain limited exceptions. Therefore, nearly all FIEs are subject to the new tax rate alongside other domestic businesses rather than benefiting from the old FIE tax laws, and its associated preferential tax treatments, beginning January 1, 2008.

Despite these changes, the EIT Law gives the FIEs established before March 16, 2007 (“Old FIEs”) a five-year grandfather period during which they can continue to enjoy their existing preferential tax treatments, commonly referred to as “tax holidays”, until these holidays expire. As an Old FIE, Chengtong’s tax holiday of a 50% reduction in the 25% statutory rates expired on December 31, 2008 and it is currently subject to the 25% statutory rates since January 1, 2009; Shanghai Blessford’s full tax exemption from the enterprise income tax expired on December 31, 2009, and it is subject to a 50% reduction for the three subsequent years expiring on December 31, 2012. Subsequent to the expiry of their tax holidays, Chengtong and Shanghai Blessford will be subject to enterprise income taxes at 25% or the prevailing statutory rates. The discontinuation of any such special or preferential tax treatment or other incentives would have an adverse effect on any organization’s business, fiscal condition and current operations in China.

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets, including tax loss and credit carry forwards, and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company follows the provisions of the ASC Topic No. 740 “Accounting for Income Taxes” and “Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109” (“ASC 740”). ASC 740 requires the recognition of tax benefits or expenses based on the estimated future tax effects of temporary differences between the financial statements and tax bases of its assets and liabilities. Deferred tax assets and liabilities primarily relate to tax basis differences on unrealized gains on corporate equities, stock-based compensation, amortization periods of certain intangible assets and differences between the financial statements and tax bases of assets acquired.

The Company recognizes that virtually all tax positions in the PRC are not free of some degree of uncertainty due to tax law and policy changes in the PRC. However, the Company cannot reasonably quantify political risk factors and thus must depend on guidance issued by current officials in the PRC.

Based on all known facts and circumstances and current tax law, the Company believes that the total amount of unrecognized tax benefits as of September 30, 2011 is not material to its results of operations, financial condition or cash flows. The Company also believes that the total amount of unrecognized tax benefits as of September 30, 2011, if recognized, would not have a material effect on its effective tax rate. The Company further believes that there are no tax positions for which it is reasonably possible, based on current Chinese tax law and policy, that the unrecognized tax benefits will significantly increase or decrease over the next 12 months producing, individually or in the aggregate, a material effect on the Company’s results of operations, financial condition or cash flows.

Value added tax

The Provisional Regulations of the People’s Republic of China Concerning Value Added Tax promulgated by the State Council came into effect on January 1, 1994. Under these regulations and the Implementing Rules of the Provisional Regulations of the People’s Republic of China Concerning Value Added Tax, value added tax is imposed on goods sold in or imported into the PRC and on processing, repair and replacement services provided within the PRC.

Value added tax payable in the PRC is charged on an aggregated basis at a rate of 13% or 17% (depending on the type of goods involved) on the full price collected for the goods sold or, in the case of taxable services provided, at a rate of 17% on the charges for the taxable services provided, but excluding, in respect of both goods and services, any amount paid in respect of value added tax included in the price or charges, and less any deductible value added tax already paid by the taxpayer on purchases of goods and services in the same financial year.

The revised People's Republic of China Tentative Regulations on Value Added Tax became effective on January 1, 2009 with the issuance of Order of the State Council No. 538. With the implementation of this VAT reform, input VAT associated with the purchase of fixed assets is now deductible against output VAT.

Retirement Benefit Costs – According to the PRC regulations on pension, Chengtong and Shanghai Blessford contribute to a defined contribution retirement scheme organized by municipal government in the province in which Chengtong and Shanghai Blessford were registered and all qualified employees are eligible to participate in the scheme. Contributions to the scheme are calculated at 37% of the employees' salaries above a fixed threshold amount and the employees contribute 11%, while Chengtong and Shanghai Blessford contribute the balance contribution of 26%. The Group has no other material obligation for the payment of retirement benefits beyond the annual contributions under this scheme.

For the three months ended September 30, 2011 and 2010, the Company's pension cost charged to the statements of operations under the plan amounted to \$69,338 and \$55,935 respectively, all of which have been paid to the National Social Security Fund.

Fair Value of Financial Instruments – The carrying amounts of certain financial instruments, including cash, accounts receivable, other receivables, accounts payable, accrued expenses, and other payables approximate their fair values as at September 30 and June 30, 2011 because of the relatively short-term maturity of these instruments. The Company considers the carrying amount of long-term loans to approximate their fair values based on the interest rates of the instruments and the current market rate of interest.

Use of Estimates – The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

4. Concentrations of Business and Credit Risk

The Company's list of customers whose purchases from us were 10% or more of total sales during three months ended September 30, 2011 and 2010 is as follows:

a. Customers	2011		2010	
	\$	% to sales	\$	% to sales
Shanghai Shengdeji Metal Co. Ltd	7,505,117	18	9,097,037	27
Hangzhou Cogeneration Import & Export Co., Ltd.	7,504,827	18	*	*
Shanghai Changshuo Steel Company, Ltd	5,644,432	13	5,825,690	17
Zhejiang Yongfeng Steel Co., Ltd.	5,271,256	13	*	*

* Not 10% customers for the relevant periods

The Company's list of suppliers whose sales to us exceeded 10% of our total purchases during the three months ended September 30, 2011 and 2010 is as follows:

b. Suppliers	2011		2010	
	\$	% to purchases	\$	% to purchases
Shanghai Piyun Steel Co., Ltd.	9,450,311	26	*	*
Dachang Huizu Baosheng Steel Products Co., Ltd.	7,117,889	20	8,767,582	24

Edgar Filing: China Precision Steel, Inc. - Form 10-Q

Wuxi Hangda Trading Co., Ltd.	4,386,389	12	*	*
Zhejiang Wuchan Metal Group Co., Ltd.	*	*	8,209,383	22
Hangzhou Steel Materials Co., Ltd.	*	*	7,576,264	21

* Not 10% suppliers for the relevant periods

-11-

Our management continues to take appropriate actions to perform ongoing business and credit reviews of our customers to reduce our exposure to new and recurring customers who have been deemed to pose a high credit risk to our business based on their commercial credit reports, our collection history, and our perception of the risk posed by their geographic location.

5. Accounts Receivable

The Company provides credit in the normal course of business. The Company performs ongoing credit evaluations of its domestic and international customers and clients and maintains allowances for bad and doubtful accounts based on factors surrounding the credit risk of specific customers and clients, historical trends, and other information. Trade accounts receivable, net totaled \$48,462,563 and \$41,335,759 as of September 30, 2011 and June 30, 2011, respectively.

From time to time, accounts receivable are reviewed for changes from the historic collection experience to ensure the appropriateness of the allowances. These estimates have been relatively accurate in the past and currently there is no need to revise such estimates. However, we will review such estimates more frequently when needed, and make revisions if necessary. The continuation or intensification of the current global economic crisis and turmoil in the global financial markets may have negative consequences for the business operations of our customers and adversely impact their ability to meet their obligations to us. A significant change in our collection experience, deterioration in the aging of receivables and collection difficulties could require that we increase our estimate of the allowance for doubtful accounts. Any such additional bad debt charges could materially and adversely affect our future operating results.

6. Inventories

The Company was required under GAAP to write down the value of its inventories to their net realizable values (average selling prices less reasonable costs to convert the inventories into completed form) in the amounts of \$45,478 and \$44,922 as of September 30 and June 30, 2011, respectively.

As of September 30 and June 30, 2011, inventories consisted of the following:

	September 30, 2011	June 30, 2011
At cost:		
Raw materials	\$ 6,510,092	\$5,360,128
Work in progress	5,712,561	7,097,117
Finished goods	7,903,278	8,744,037
Consumable items	4,999,618	3,921,089
	25,125,549	25,122,371
Less: provision	(45,478)	(44,922)
	\$ 25,080,071	\$25,077,449

Costs of finished goods include direct labor, direct materials, and production overhead before the goods are ready for sale.

Consumable items represent parts used in our cold rolling mills and other equipment that need to be replaced from time to time when necessary to ensure optimal operating results, such as bearings and rollers.

Inventories amounting to \$8,532,636 (June 30, 2011: \$7,096,698) were pledged for short-term loans totaling \$19,266,012 (June 30, 2011: \$19,030,232) at September 30, 2011.

7. Advances to Suppliers

Cash advances are shown net of allowances of \$1,745,638 and \$1,724,275 at September 30 and June 30, 2011, respectively.

The majority of our advances to suppliers greater than 180 days as of September 30, 2011 is attributable to our advances to a single supplier, a subsidiary of a state-owned company in the PRC. We believe that advances paid to state-owned companies are ultimately collectible because they are backed by the full faith and credit of the PRC government. As such, we generally do not provide allowances against such advances.

8. Property, Plant and Equipment

Property, plant and equipment, stated at cost less accumulated depreciation, consisted of the following:

	September 30, 2011	June 30, 2011
Plant and machinery	\$ 76,748,667	\$ 75,670,080
Buildings	23,330,943	23,045,416
Motor vehicles	707,893	699,229
Office equipment	525,820	519,421
	101,313,323	99,934,146
Less: Accumulated depreciation	(27,124,425)	(24,622,925)
	\$ 74,188,898	\$ 75,311,221

Depreciation expense related to manufacturing is included as a component of cost of goods sold. During the three months ended September 30, 2011 and 2010, depreciation totaling \$1,606,329 and \$1,217,525, respectively, was included as a component of cost of goods sold.

Plant and machinery amounting to \$37,539,097 (June 30, 2011: \$38,109,339) and \$21,366,580 (June 30, 2011: \$21,744,337) were pledged for short-term loans totaling \$27,121,859 and long-term loans including current portion totaling \$18,000,000, respectively, at September 30, 2011 (June 30, 2011: \$27,189,629 and \$18,000,000, respectively).

9. Construction-In-Progress

As of September 30 and June 30, 2011, construction-in-progress consisted of the following:

	September 30, 2011	June 30, 2011
Construction costs	\$ 9,830	\$ 64,762

Construction-in-progress represents construction and installations of annealing furnaces.

10. Intangible Assets

Land use rights amounting to \$1,899,764 (June 30, 2011: \$1,886,717) were pledged for short-term loans totaling \$27,121,859 (June 30, 2011: \$27,189,629) at September 30, 2011.

The Company acquired land use rights in August 2004 and December 2006 for 50 years that expire in August 2054 and December 2056, respectively. The land use rights are amortized over a fifty-year term. An amortization amount of approximately \$37,000 is to be recorded each year starting from the financial year ended June 30, 2009 for the remaining lease period.

Amortizable intangible assets of the Company are reviewed when there are triggering events to determine whether their carrying value has become impaired, in conformity with ASC 360. The Company also re-evaluates the periods of amortization to determine whether subsequent events and circumstances warrant revised estimates of useful lives.

11. Short-Term Loans

Short-term loans consisted of the following:

	September 30, 2011	June 30, 2011
Bank loan dated July 29, 2011, due July 31, 2012, with an interest rate at 115% of the standard market rate set by the People's Bank of China ("PBOC") (7.544% at September 30, 2011) per annum (Notes 8 and 10)	7,855,847	8,159,397
Bank loan dated July 29, 2011, due July 31, 2012 with an interest rate at 115% of the standard market rate set by PBOC (7.544% at September 30, 2011) per annum (Notes 6, 8 and 10)	19,266,012	19,030,232
Bank loan dated January 19, 2011, due July 18, 2011 with an interest rate of 6.42% per annum	-	181,019
Total	\$ 27,121,859	\$27,370,648

The above bank loans outstanding at September 30, 2011 are Renminbi ("RMB") loans. All outstanding short-term loans carry an interest rate of 1.15 times of the standard market rate set by the PBOC, and are secured by inventories, land use rights, buildings and plant and machinery, and guaranteed by PSHL and our former Chairman, Mr. Wo Hing Li. In addition, pursuant to a bank loan agreement entered into between the Company and Raiffeisen Zentralbank Osterreich AG ("RZB"), Mr. Li undertakes to maintain a shareholding percentage in the Company of not less than 33.4% unless otherwise agreed to with RZB. All outstanding short-term loans have been renewed in July 2011 and are now due on July 31, 2012.

The weighted-average interest rate on short-term loans at September 30 and June 30, 2011 was 7.54% and 7.25%, respectively.

12. Long-Term Loan

	September 30, 2011	June 30, 2011
Bank loan dated June 29, 2010, due June 15, 2016 with an interest rate of the London Interbank Offered Rate ("LIBOR") plus 4.5% (4.986% at September 30, 2011) per annum (Note 8)	\$ 18,000,000	\$18,000,000

On January 29, 2010, Shanghai Blessford entered into a Senior Loan Agreement with DEG -Deutsche Investitions-Und Entwicklungsgesellschaft Mbh ("DEG") for a loan amount up to \$18,000,000 at an annual interest rate of 4.5% above the six-month USD LIBOR rate. The loan is to be repaid semi-annually over five years starting on December 15, 2011 and is secured by a mortgage on the new cold rolling line and annealing furnaces at Shanghai Blessford's facilities.

Maturities of long-term loan, including current portion, for the years ending June 30:

2012	\$3,600,000
2013	\$3,600,000
2014	\$3,600,000
2015	\$3,600,000
2016	\$3,600,000
	\$14,400,000
Total	\$18,000,000

13. Stock Warrants

On November 6, 2007, in connection with the Subscription Agreement, the Company issued to certain institutional accredited investors warrants to purchase 1,420,000 shares of Common Stock valued at \$5,374,748, and Roth Capital Partners, LLC, as placement agent, received warrants to purchase 225,600 shares of Common Stock valued at \$887,504. These amounts were recorded as syndication fees offsetting additional paid-in capital. Warrants issued to Roth Capital were not exercised and expired on November 5, 2010.

Information with respect to stock warrants outstanding is as follows:

Exercise Price	Outstanding June 30, 2011	Granted	Expired or Exercised	Outstanding September 30, 2011	Expiration Date
\$ 8.45	1,420,000	-0-	-0-	1,420,000	May 5, 2013

14. Income Taxes

For PRC enterprise income tax reporting purposes, the Company is required to compute a 10% salvage value when computing depreciation expense and add back the allowance for doubtful debts. For financial reporting purposes, the Company does not take into account a 10% salvage value when computing depreciation expenses.

The tax holiday resulted in tax savings as follows:

	Three months ended September 30,	
	2011	2010
Tax savings	\$ 54,312	\$ 50,295
Benefit per share		
Basic	\$ 0.00	\$ 0.00
Diluted	\$ 0.00	\$ 0.00

Significant components of the Group's deferred tax assets and liabilities as of September 30 and June 30, 2011 are as follows:

	September 30, 2011	June 30, 2011
Deferred tax assets and liabilities:		
Net operating loss carried forward	\$ 2,733,935	\$ 2,356,664
Temporary differences resulting from allowances	2,038,687	2,013,737
Net deferred income tax asset	4,772,622	4,370,401
Valuation allowance	(4,772,622)	(4,370,401)
	\$ -	\$ -

The Company has not recognized a deferred tax liability in respect of the undistributed earnings of its foreign subsidiaries of approximately \$18,379,164 as of September 30, 2011 because the Company currently plans to reinvest those unremitted earnings such that the remittance of the undistributed earnings of those foreign subsidiaries to the Company will be postponed indefinitely. A deferred tax liability will be recognized when the Company no longer plans to permanently reinvest undistributed earnings.

-15-

A reconciliation of the provision for income taxes with amounts determined by the PRC income tax rate to income tax expense per books is as follows.

	Three months ended September 30,	
	2011	2010
Computed tax at the PRC statutory rate of 25%	\$ (268,660)	\$ 197,611
Valuation allowance	402,221	92,637
Expenses not deductible for tax	13	-
Income not subject to tax	(24,950)	-
Overprovision	-	10,191
Benefit of tax holiday	(54,312)	(50,295)
Income tax expense per books	\$ 54,312	250,144

Income tax expense consists of:

	Three months ended September 30,	
	2011	2010
Income tax expense for the year – PRC	\$ 54,312	\$ 250,144
Deferred income tax benefit – PRC	-	-
Income tax expense per books	\$ 54,312	\$ 250,144

15. (Loss)/Earnings Per Share

ASC 260-10 requires a reconciliation of the numerator and denominator of the basic and diluted earnings/(loss) per share (EPS) computations.

For the three months ended September 30, 2011, warrants to purchase 1,420,000 shares at an exercise price of \$8.45 were not included as their effect would have been anti-dilutive, however, securities represented by the 1,420,000 warrants still outstanding could potentially dilute basic earnings per share in the future.

For the three months ended September 30, 2010, warrants to purchase 358,392 shares of common stock at an exercise price of \$3.00, 1,420,000 shares at an exercise price of \$8.45 and 225,600 shares at an exercise price of \$7.38 were not included as their effect would have been anti-dilutive.

The following reconciles the components of the EPS computation:

	Income (Numerator)	Shares (Denominator)	Per Share Amount
For the three months ended September 30, 2011:			
Net loss	\$ (1,079,095)		
Basic EPS loss available to common shareholders	\$ (1,079,095)	46,562,955	\$(0.02)
Effect of dilutive securities:			
Warrants		-	
Diluted EPS loss available to common shareholders	\$ (1,079,095)	46,562,955	\$(0.02)
For the three months ended September 30, 2010:			
Net income	\$ 644,511		
Basic EPS income available to common shareholders	\$ 644,511	46,562,955	\$0.01
Effect of dilutive securities:			

Edgar Filing: China Precision Steel, Inc. - Form 10-Q

Warrants

Diluted EPS income available to common shareholders	\$ 644,511	-	46,562,955	\$0.01
---	------------	---	------------	--------

-16-

16. Capital Commitments

As of September 30, 2011, the Company did not have any capital commitments (June 30, 2011: \$nil).

17. Impairment

We determine impairment of long-lived assets, including property, plant and equipment and amortizable intangible assets, by measuring the estimated undiscounted future cash flows generated by these assets, comparing the result to the assets' carrying values and adjust the assets to the lower of its carrying value or fair value and charging current operations for the measured impairment. The determination of the undiscounted future cash flows and fair value of these assets are subject to significant judgment.

As of September 30, 2011, as the Company's market capitalization was lower than the carrying value of its assets, management performed an impairment test in accordance with ASC360 and no impairment charges were recognized for the relevant period. As of September 30, 2011, the Company expects these assets to be fully recoverable based on the result of the impairment test. Goodwill amounting to \$99,999 as at September 30, 2011 was considered immaterial and not tested for impairment in accordance with ASC 350.

18. Recent Accounting Pronouncements

In January 2010, the FASB issued ASU 2010-06, "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"). ASU 2010-06 requires reporting entities to provide information about movements of assets among Levels 1 and 2 of the three-tier fair value hierarchy established by ASC 820. The guidance is effective for any fiscal year that begins after December 15, 2010 and should be used for quarterly and annual filings. The adoption the amendments in ASU 2010-06 did not have an impact on the Company's financial position or results of operations.

In May 2011, the FASB issued ASU 2011-04, "Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs" ("ASU 2011-04"). This update amends ASC Topic 820, "Fair Value Measurement and Disclosure." ASU 2011-04 clarifies the application of certain existing fair value measurement guidance and expands the disclosures for fair value measurements that are estimated using significant unobservable (Level 3) inputs. ASU 2011-04 is effective for annual and interim reporting periods beginning on or after December 15, 2011, which means that it will be effective for our fiscal quarter beginning January 1, 2012. The new guidance is to be adopted prospectively and early adoption is not permitted. We do not believe that adoption of ASU 2011-04 will have a significant impact on our financial position, results of operations or cash flows.

On June 16, 2011, the FASB issued ASU No. 2011-05, "Comprehensive Income (Topic 220): Presentation of Comprehensive Income" ("ASU 2011-05"). This update amends ASC Topic 220, "Comprehensive Income" to provide that total comprehensive income will be reported in one continuous statement or two separate but consecutive statements of financial performance. Presentation of total comprehensive income in the statement of stockholders' equity or the footnotes will no longer be allowed. The calculation of net income and basic and diluted net income per share will not be affected. ASU 2011-005 is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2011, which means that it will be effective for our fiscal year beginning July 1, 2012. Retrospective adoption is required and early adoption is permitted. We do not believe that adoption of ASU 2011-05 will have a significant impact on our financial position, results of operations or cash flows.

Overview of the Company’s Business

We are a niche and high value-added steel processing company principally engaged in the manufacture and sale of high precision cold-rolled steel products, in the provision of heat treatment and in the cutting and slitting of medium and high-carbon hot-rolled steel strips. We use commodity steel to create a high value-added specialty premium steel. Specialty precision steel pertains to the precision of measurements and tolerances of thickness, shape, width, surface finish and other special quality features of highly engineered end-use applications.

We produce and sell precision ultra-thin and high strength cold-rolled steel products ranging from 7.5 mm to 0.03 mm. We also provide heat treatment and cutting and slitting of medium and high-carbon hot-rolled steel strips not exceeding 7.5 mm thickness. Our process puts hot-rolled de-scaled (pickled) steel coils through a cold-rolling mill, utilizing our patented systems and high technology reduction processing procedures, to make steel coils and sheets in customized thicknesses according to customer specifications. Currently, our specialty precision products are mainly used in the manufacture of automobile parts and components, steel roofing, plane friction discs, appliances, food packaging materials, saw blades, textile needles, and microelectronics.

We conduct our operations principally in China through our wholly-owned operating subsidiaries, Chengtong and Shanghai Blessford, which are wholly owned subsidiaries of our direct subsidiary, PSHL. Most of our sales are made domestically in China; however, we began exporting during fiscal 2007 and our overseas market currently covers Indonesia, Thailand, the Caribbean, Nigeria, Ethiopia and Turkey. We intend to further expand into additional overseas markets in the future, subject to suitable market conditions and favorable regulatory controls.

First Quarter Financial Performance Highlights

During the quarter ended September 30, 2011, we saw growth in demand for our cold rolled steel products, period-on-period, together with fast rising costs. Domestic consumption remains relatively robust under China's 12th Five-Year Economic Development Plan which supports demand, however, high inflation and especially high raw material costs have substantially and adversely impacted our gross margin compared to the same period last year.

During the quarter ended September 30, 2011, we sold a total of 45,548 tons of products, an increase of 3,035 tons from 42,513 tons a year ago, due to an increase in demand in the domestic market as well as the addition of our third mill, which will increase our total annual production capacity ultimately to 260,000 tons when it reaches its full design capacity in the next two to three years. Such increase was mainly driven by increases in domestic demand for steel home appliances, roofing and food packaging products in connection with growing domestic consumer spending during the quarter ended September 30, 2011. Despite the growing consumption and the period-on-period sales volume growth, average cost per unit sold increased 24.7% while average selling prices increased only 16.2%, period-on-period. We were not able to fully pass on the increased cost to our customers as our products mainly compete with imported products and the strengthening of the RMB over the recent years has made the price of such imports more competitive. Increased volume and sales coupled with rising costs have led to a gross profit of \$61,770

and a net loss of \$1,079,095 for the three months ended September 30, 2011. Total Company backlog as of September 30, 2011 was \$19,922,102.

To combat high inflation and rising costs in China and to increase overall profitability, we are actively working on expanding our customer base to increase total demand which reduces per unit cost, optimizing our product mix by carrying out research and development (“R&D”) to improve profitability of existing products and launch new high value-add products, and prioritizing higher margin products among existing customers and markets. We will also continue to take appropriate actions to perform business and credit reviews of customers and suppliers and strengthen collection of accounts receivable with the goal to maintain overall healthy sales volume, margins and cash positions.

We believe that high barriers to entry in the Chinese domestic precision cold-rolled steel industry still exist because of the level of technological expertise and the amount of capital required for operation. Although we expect a continuation of volatility in demand in both domestic and international markets, and a difficult operating environment due to high inflation and rising costs which could have adverse impacts on our gross margins in the near future, the medium to long term prospects of our niche remain optimistic. We believe that our unique capabilities and know-how give us a competitive advantage to grow sales and build a globally recognized brand as we continue to carry out R&D and expand to new segments, customers and markets.

The following are some financial highlights for the first fiscal quarter:

Revenues: Our revenues were approximately \$42.2 million for the quarter, an increase of 24.4% from last year.

Gross Margin: Gross margin was 0.1% for the quarter, compared to 7.0% last year.

(Loss)/income from operations before tax: Loss from operations before tax was approximately \$1.0 million for the quarter, compared to income of approximately \$0.9 million last year.

Net (loss)/income: Net loss was approximately \$1.1 million for the quarter, compared to net income of approximately \$0.6 million last year.

Fully diluted (loss)/earnings per share: Fully diluted loss per share was \$0.02 for the quarter, compared to earnings per share of \$0.01 last year.

Results of Operations

The following table sets forth key components of our results of operations for the three months ended September 30, 2011 and 2010 and as a percentage of revenues.

(All amounts in U.S. dollars)

	2011		2010	
	Amount	% of Revenues	Amount	% of Revenues
Revenues	42,166,843	100.0	33,896,455	100.0
Cost of sales (including depreciation and amortization)	42,105,073	99.9	31,512,370	93.0
Gross profit	61,770	0.1	2,384,085	7.0

Sales Revenues

Sales volume increased by 3,035 tons, or 7.1%, period-on-period, to 45,548 tons for the three months ended September 30, 2011, from 42,513 tons for the three months ended September 30, 2010 and as a result, sales revenues increased by \$8,270,388, or 24.4%, period-on-period, to \$42,166,843 for the three months ended September 30, 2011, from \$33,896,455 for the three months ended September 30, 2010. The increase in sales revenues period-on-period is mainly attributable to the increase in demand for low-carbon cold-rolled products during the 2011 quarter.

Sales by Product Line

A break-down of our sales by product line for the periods ended September 30, 2011 and 2010 is as follows:

Product Category	2011			2010			Period-on-Period Qty. Variance
	Quantity (tons)	\$ Amount	% of Sales	Quantity (tons)	\$ Amount	% of Sales	
Low carbon hard rolled	261	239,887	1	3,625	2,800,212	8	(3,364)
Low carbon cold-rolled	37,060	33,275,228	79	23,498	21,082,008	62	13,562
H i g h - c a r b o n hot-rolled	2,242	2,482,929	6	1,652	1,402,884	4	590
High-carbon cold-rolled	4,339	4,316,010	10	5,472	5,136,462	15	(1,133)
Subcontracting income	1,646	1,032,321	2	8,266	3,145,202	10	(6,620)
Sales of scrap metal	-	820,468	2	-	329,687	1	-
Total	45,548	42,166,843	100	42,513	33,896,455	100	3,035

There were different trends of demand across various product categories during the three months ended September 30, 2011. Low-carbon cold-rolled steel products accounted for 79% of the current sales mix at an average selling price of \$898 per ton for the three months ended September 30, 2011, compared to 62% of the sales mix at an average selling price per ton of \$897 for the three months ended September 30, 2010. The increase in demand in this category during the quarter was a result of increased domestic demand for steel used in the production of home appliances, roofing and food packaging products as a result of growing domestic consumer spending. Low-carbon hard-rolled steel products accounted for 1% of the current sales mix at an average selling price of \$919 per ton for the three months ended September 30, 2011, compared to 8% of the sales mix at an average selling price per ton of \$772 for the three months ended September 30, 2010, due to a decrease in demand in the export market period-on-period as a result of our less competitive prices in the global market caused by the continued strengthening of the Renminbi against the US dollar during the period. High-carbon cold-rolled steel products accounted for 10% of the current sales mix at an average selling price of \$995 per ton for the three months ended September 30, 2011, compared to 15% of the sales mix at an average selling price of \$939 for the three months ended September 30, 2010. The products in this category are mainly used in the automobile industry and the decrease in sales volume period-on-period was a result of the slowing demand for automobiles in the PRC market. Subcontracting income revenues accounted for \$1,032,321, or 2%, of the sales mix for the three months ended September 30, 2011, decreased from \$3,145,202, or 10%, of the sales mix for the three months ended September 30, 2010.

2011 2010 Variance

Edgar Filing: China Precision Steel, Inc. - Form 10-Q

Average Selling Prices	(\$)	(\$)	(\$)	(%)
Low-carbon hard rolled	919	772	147	19.0
Low-carbon cold-rolled	898	897	1	0.1
High-carbon hot-rolled	1,107	849	258	30.4
High-carbon cold-rolled	995	939	56	6.0
Subcontracting income	627	380	247	65.0

-21-

The average selling price per ton increased to \$926 for the three months ended September 30, 2011, compared to \$797 in 2010, representing an increase of \$129, or 16.2%, period-on-period. This increase was mainly due to increases in general steel prices and therefore our selling prices during the quarter. There were increases in average selling prices across all product categories during the three months ended September 30, 2011.

Sales Breakdown by Major Customer

Customers	2011		2010	
	\$	% of Sales	\$	% of Sales
Shanghai Shengdejia Metal Co., Ltd.	7,505,117	18	9,097,037	27
Hangzhou Cogeneration Co., Ltd.	7,504,827	18	*	*
Shanghai Changshuo Steel Co., Ltd.	5,644,432	13	5,825,690	17
Zhejiang Yongfeng Steel Co., Ltd.	5,271,256	13	*	*
Changshu Jiacheng Steel Plating Co., Ltd.	1,702,702	4	*	*
SUMEC International Technology Co., Ltd.	*	*	2,590,163	8
Zhangjiagang Gangxing Innovative Construction Material Co., Ltd.	*	*	2,453,552	7
Zhejiang Zhongwei Materials Co., Ltd.	*	*	2,298,702	7
	27,628,334	66	22,265,144	66
Others	14,538,509	34	11,631,311	34
Total	42,166,843	100	33,896,455	100

* Not major customers for the relevant periods

Sales revenue generated from our top five major customers as a percentage of total sales was 66% for the three months ended September 30, 2011 and 2010. Sales to Hangzhou Cogeneration Co., Ltd., Zhejiang Yongfeng Steel Co., Ltd., and Changshu Jiacheng Steel Plating Co., Ltd., three new major customers for the quarter ended September 30, 2011, accounted for 35% of our sales revenues. The change in customer mix reflects management's continuous efforts in expanding our customer base and geographical coverage during the course of the quarter.

Cost of Goods Sold

Cost of sales increased by \$10,592,703, or 33.6%, period-on-period, to \$42,105,073 for the three months ended September 30, 2011, from \$31,512,370 for the three months ended September 30, 2010. Cost of sales represented 99.9% of sales revenues for the three months ended September 30, 2011, compared to 93.0% for the three months ended September 30, 2010. Average cost per unit sold increased to \$924 for the three months ended September 30, 2011, compared to \$741 for the three months ended September 30, 2010, representing an increase of \$183 per ton, or 24.7%, period-on-period.

	2011	2010	Variance	
	(\$)	(\$)	(\$)	(%)
Cost of goods sold				
- Raw materials	38,457,731	28,570,179	9,887,552	34.6
- Direct labor	150,802	129,859	20,943	16.1
- Manufacturing overhead	3,496,540	2,812,332	684,208	24.3
	42,105,073	31,512,370	10,592,703	33.6
Cost per unit sold				

Edgar Filing: China Precision Steel, Inc. - Form 10-Q

Total units sold (tons)	45,548	42,513	3,035	7.1
Average cost per unit sold (\$/ton)	924	741	183	24.7

The increase in average per unit cost of sales is represented by the combined effect of:

-22-

an increase in cost of raw materials per unit sold of \$172, or 25.6%, from \$672 for the three months ended September 30, 2010, to \$844 for the three months ended September 30, 2011; and

an increase in factory overhead per unit sold of \$11, or 16.7%, from \$66 for the three months ended September 30, 2010, to \$77 for the three months ended September 30, 2011.

The cost of raw materials consumed increased by \$9,887,552, or 34.6%, period-on-period, to \$38,457,731 for the three months ended September 30, 2011, from \$28,570,179 for the three months ended September 30, 2010. This increase was due to increases in total units sold and average raw material cost per unit sold.

Direct labor costs increased by \$20,943, or 16.1%, period-on-period, to \$150,802 for the three months ended September 30, 2011, from \$129,859 for the three months ended September 30, 2010. Manufacturing overhead costs increased by \$684,208, or 24.3%, period-on-period, to \$3,496,540 for the three months ended September 30, 2011, from \$2,812,332 for the three months ended September 30, 2010. The increase was mainly attributable to the combined effect of an increase in depreciation charged to manufacturing overhead of \$388,804, or 31.9%, period-on-period, to \$1,606,329 for the three months ended September 30, 2011, from \$1,217,525 for the three months ended September 30, 2010 and an increase in utilities of \$5,142, or 0.5%, period-on-period, to \$951,123 for the three months ended September 30, 2011, from \$945,981 for the three months ended September 30, 2010.

Gross Profit

Gross profit in absolute terms decreased by \$2,322,315 or 97.4%, period-on-period, to \$61,770 for the three months ended September 30, 2011, from \$2,384,085 for the three months ended September 30, 2010, and gross profit margin decreased to 0.1% for the three months ended September 30, 2011, from 7.0% for the three months ended September 30, 2010. The decrease in gross profit margin is mainly attributable to an increase in average cost per unit sold of 24.7% period-on-period offset by a 16.2% period-on-period increase in average selling prices.

Selling Expenses

Selling expenses decreased by \$41,901, or 38.0%, period-on-period, to \$68,304 for the three months ended September 30, 2011, from \$110,205 for the three months ended September 30, 2010. The decrease was mainly attributable to less selling commission costs associated with largely reduced export sales period-on-period.

Administrative Expenses

Administrative expenses decreased by \$577,394, or 66.3%, period-on-period, to \$294,076 for the three months ended September 30, 2011, compared to \$871,470 for the three months ended September 30, 2010. This was chiefly due to a decrease in exchange loss by \$328,751, period-on-period, due to an exchange gain recognized in the amount of \$219,051 on our USD long-term loan as a result of RMB appreciation against USD during the three months ended September 30, 2011, and a decrease in legal and professional expenses in the amount of \$98,526, or 75.5%, period-on-period, due to decreased legal and investor relations activities during the three months ended September 30, 2011.

(Loss)/Income from Operations

Income from operations decreased by \$1,713,304, or 126.1%, period-on-period, to a loss of \$355,054 for the three months ended September 30, 2011, from an income of \$1,358,250 for the three months ended September 30, 2010, as a result of the factors discussed above.

Other Income

Other income decreased \$1,319, or 86.9%, to \$199 for the three months ended September 30, 2011, from \$1,518 for the three months ended September 30, 2010. Such decrease was primarily due to lower cash balances period-on-period.

-23-

Interest Expense

Total interest expense increased \$204,815, or 44.0%, to \$669,928 for the three months ended September 30, 2011, from \$465,113 for the three months ended September 30, 2010, due to increases in interest rates period-on-period.

Income Tax

For the three months ended September 30, 2011, we recognized an income tax expense of \$54,312, compared to \$250,144 for the three months ended September 30, 2010. The decrease of \$195,832, or 78.3%, in income tax expense was a result of the lower taxable income period-on-period.

Net (Loss)/Income

Net income decreased by \$1,723,606, or 267.4%, period-on-period, to a net loss of \$1,079,095 for the three months ended September 30, 2011, compared to net income of \$644,511 for the three months ended September 30, 2010. The decrease in net income is attributable to a combination of all the factors discussed above, but principally the increase in the average cost per unit sold and decrease in gross margin.

Liquidity and Capital Resources

Our business is capital intensive and requires substantial expenditures for, among other things, the purchase and maintenance of equipment used in our operations. Our short-term and long-term liquidity needs arise primarily from capital expenditures, working capital requirements and principal and interest payments related to our outstanding indebtedness. We have met these liquidity requirements with cash provided by operations, equity financing, and bank debt. As of September 30, 2011, we had cash and cash equivalents of approximately \$2.2 million.

The following table provides detailed information about our net cash flow for all financial statement periods presented in this report:

CASH FLOW

	Three Months Ended September 30,	
	2011	2010
Net cash provided by/(used in) operating activities	\$ 303,740	\$ (10,115,902)
Net cash (used in) investing activities	(84,886)	(6,542,428)
Net cash (used in) financing activities	(810,921)	(51,479)
Net cash flow	(554,701)	(16,383,649)

Operating Activities

Net cash flows provided by operating activities for the three months ended September 30, 2011 were \$303,740, as compared to \$10,115,902 used in operating activities for the three months ended September 30, 2010, resulting in a net increase of \$10,419,642. This increase was mainly due to a decrease in cash outflow for advances to suppliers of \$12,028,136, a decrease in cash outflow for accounts payable and accrued expenses of \$5,692,839, and an increase in cash inflow from advances from customers of \$4,278,029, which were offset by a decrease in cash inflow from accounts receivable of \$13,471,634 during the three months ended September 30, 2011.

For the three months ended September 30, 2011, sales revenues generated from the top five major customers as a percentage of total sales stood at 66%, same as the prior period. The loss of all or portion of the sales volume from a

significant customer would have an adverse effect on our operating cash flows. We note that the continuation or intensification of the worldwide economic crisis may have negative consequences on the business operations of our customers and adversely impact their ability to meet their financial obligations to us, resulting in unrecoverable losses on our accounts receivable. We have been strengthening our collection activities and will continue to closely monitor any changes in collection experience and the credit ratings of our customers. From time to time we will review credit periods offered, along with our collection experience and the other relevant factors, to evaluate the adequacy of our allowance for doubtful accounts, and to make changes to the allowance, if necessary. Delays or non-payment of accounts receivable would have an adverse effect on our operating cash flows.

Investing Activities

Our uses of cash for investing activities during the three months ended September 30, 2011 were for the purchase of property, plant and equipment related to the addition of annealing furnaces at our Shanghai Blessford facilities. We believe this capital investment increases our capacity, expands product lines, improves product qualities and creates synergies with our existing production facilities, thereby creating opportunities to grow sales, enter new markets and further strengthen our leading position in the niche cold rolling segment that we operate in.

Net cash flows used in investing activities for the three months ended September 30, 2011 were \$84,886, as compared with \$6,542,428 for the three months ended September 30, 2010. Cash flows used in investing activities substantially decreased period-on-period as majority of the construction of the additional annealing furnaces have been completed during the year ended June 30, 2011.

We forecast lower capital expenditures in the coming years as the Company has already completed most of its major expansion plans and all the construction costs relating to our third cold rolling mill have been paid for as at September 30, 2011.

Financing Activities

Net cash flows used in financing activities for the three months ended September 30, 2011 were \$810,921, as compared to those used in financing activities for the three months ended September 30, 2010 of \$51,479, for a net increase of \$759,442. During the three months ended September 30, 2011, the Company made repayment of short-term loans in the amount of \$810,921.

On December 30, 2008, we filed a universal shelf registration statement with the SEC, which was declared effective on December 10, 2009. The shelf registration will permit us to issue securities valued at up to an aggregate of \$40 million. The effective registration statement provides us with the flexibility to issue registered securities, from time to time, in one or more separate offerings or other transactions with the size, price and terms to be determined at the time of issuance. Although we do not have any commitments or current intentions to sell securities under the registration statement, we believe that it is prudent to have a shelf registration statement in place to ensure financing flexibility should the need arise.

Our working capital requirements and the cash flow provided by future operating activities will vary from quarter to quarter, and are dependent on factors such as volume of business and payment terms with our customers. As such, we may need to rely on access to the financial markets to provide us with significant discretionary funding capacity. However, the current uncertainty arising out of domestic and global economic conditions, including the continuing disruption in credit markets, poses a risk to the economies in which we operate and may adversely impact our potential sources of capital financing. The general unavailability of credit could make capital financing more expensive for us or impossible altogether. Even if we are able to obtain credit, the incurrence of indebtedness could result in increased debt service obligations. Our inability to renew our current bank debt that is due in July 2012, and the unavailability of additional debt financing as a result of economic pressures on the credit and equity markets could have a material adverse effect on our business operations.

Current Assets

Current assets increased by \$7,462,830, or 6.1%, period-on-period, to \$128,873,123 as of September 30, 2011, from \$121,410,293 as of June 30, 2011, principally as a result of an increase in accounts receivable of \$7,126,804, or 17.2%, period-on-period and an increase in advances to suppliers of \$1,206,320, offset by a decrease in cash and cash equivalents of \$554,701, or 20.5%, period-on-period.

Accounts receivable, representing 37.6% of total current assets as of September 30, 2011, is a significant asset of the Company. We offer credit to our customers in the normal course of our business and accounts receivable is stated net of allowance for doubtful accounts. Credit periods vary substantially across industries, segments, types and size of companies in China where we principally operate our business. Because of the niche products that we process, our customers are usually also niche players in their own respective segment, who then sell their products to the end product manufacturers. The business cycle is relatively long, as well as the credit periods. The Company offers credit to its customers for periods of 60 days, 90 days, 120 days and 180 days. We generally offer longer credit terms to long-standing recurring customers with good payment histories and sizable operations. From time to time we review these credit periods, along with our collection experience and the other factors discussed above, to evaluate the adequacy of our allowance for doubtful accounts, and to make changes to the allowance, if necessary. If our actual collection experience or other conditions change, revisions to our allowances may be required, including a further provision which could adversely affect our operating income, or write back of provision when estimated uncollectible accounts are actually collected.

Our management determines the collectability of outstanding accounts by maintaining at least quarterly communication with such customers and obtaining confirmation of their intent to fulfill their obligations to the Company. In making this determination, our management also considers past collection experience, our relationship with customers and the impact of current economic conditions on our industry and market. We note that the continuation or intensification of the current global economic crisis may have negative consequences on the business operations of our customers and adversely impact their ability to meet their financial obligations. To reserve for potentially uncollectible accounts receivable, for the three months ended September 30, 2011, our management has made a 50% provision for all accounts receivable that are over 180 days past due and full provision for all accounts receivable over one year past due. From time to time, we will review these credit periods, along with our collection experience and the other factors discussed above, to evaluate the adequacy of our allowance for doubtful accounts, and to make changes to the allowance, if necessary. If our actual collection experience or other conditions change, revisions to our allowances may be required, including a further provision which could adversely affect our operating income, or write back of provision when estimated uncollectible accounts are actually collected.

The following table reflects the aging of our accounts receivable based on due date as of September 30 and June 30, 2011:

September 30, 2011							
US\$	Total	Current	1 to 30 days	31 to 90 days	91 to 180 days	181 to 360 days	over 1 year
TOTAL	49,539,361	22,864,253	1,776,691	5,758,596	17,973,828	40,955	1,125,038
%	100	46	4	12	36	<1	2
June 30, 2011							
US\$	Total	Current	1 to 30 days	31 to 90 days	91 to 180 days	181 to 360 days	over 1 year
TOTAL	42,399,379	20,132,384	1,570,163	6,829,813	12,801,682	94,799	970,538
%	100	48	4	16	30	<1	2

Management continues to take appropriate actions to perform business and credit reviews of any prospective customers (whether new or returning) to protect the Company from any who might pose a high credit risk to our business based on their commercial credit reports, our past collection history with them, and our perception of the risk posed by their geographic location. For example, since the three months ended September 30, 2010 we have halted all

our direct sales transactions with customers in the Philippines as we consider the associated credit risk to be relatively high. Based on publicly available reports, such as that issued by A.M. Best at the time, there is a high risk that financial volatility may erupt in that country due to inadequate reporting standards, a weak banking system or asset markets and/or poor regulatory structure. We expect to resume such exports when conditions improve. Management is also of the opinion that we do not currently have any high risk receivables on our accounts.

-26-

quarter to quarter, depending on the volume of business during the period and payment terms with our customers. As we expect a continuation of volatility in demand and steel prices in both domestic and international markets in the foreseeable future, our operating cash flows might be significantly negatively impacted by reduced sales and margins. Management has strengthened its sales and marketing activities, and continues to be in talks with potential customers whose past orders we had been unable to fill due to full capacity, which if successful, could result in additional sales and mitigate the impact of the weakened demand and margins on our operating cash flow. As of September 30, 2011, the Company also had \$4,514,143 in debt obligation for interest relating to its short-term and long-term loans. As such, we may need to rely on access to the financial markets to provide us with significant discretionary funding capacity. However, continued uncertainty arising out of domestic and global economic conditions, including the continuing disruption in credit markets, poses a risk to the economies in which we operate and may adversely impact our potential sources of capital financing. The general unavailability of credit could make capital financing more expensive for us or impossible altogether. Even if we are able to obtain credit, the incurrence of indebtedness could result in increased debt service obligations and could result in operating and financing covenants that could restrict our present and future operations.

Obligations under Material Contracts

Below is a table setting forth our material contractual obligations as of September 30, 2011, debt obligations include principal repayments and interest payments:

	Payments Due By Year				
	Total	Fiscal Year 2012	Fiscal Year 2013-2014	Fiscal Year 2015-2016	Fiscal Years 2017 and Beyond
Contractual obligations:					
Short-Term Debt Obligations	\$29,167,932	\$2,046,073	\$27,121,859	\$-	\$-
Current Portion of Long-Term Debt Obligations	\$4,452,606	\$4,452,606	\$-	\$-	\$-
Long-Term Debt Obligations	\$16,015,464	\$-	\$8,366,724	\$7,648,740	\$-
	\$49,636,002	\$6,498,679	\$35,488,583	\$7,648,740	\$-

Recent Accounting Pronouncements

In January 2010, the FASB issued ASU 2010-06, "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"). ASU 2010-06 requires reporting entities to provide information about movements of assets among Levels 1 and 2 of the three-tier fair value hierarchy established by ASC 820. The guidance is effective for any fiscal year that begins after December 15, 2010 and should be used for quarterly and annual filings. We are currently evaluating the impact on our financial statements of adopting the amendments in ASU 2010-06 and cannot estimate the impact of adoption at this time.

In May 2011, the FASB issued ASU 2011-04, "Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs" ("ASU 2011-04"). This update amends ASC Topic 820, "Fair Value Measurement and Disclosure." ASU 2011-04 clarifies the application of certain existing fair value measurement guidance and expands the disclosures for fair value measurements that are estimated using significant unobservable (Level 3) inputs. ASU 2011-04 is effective for annual and interim reporting periods beginning on or after December 15, 2011, which means that it will be effective for our fiscal quarter beginning January 1, 2012. The new guidance is to be adopted prospectively and early adoption is not permitted. We do not believe that adoption of ASU 2011-04 will have a significant impact on our financial position, results of operations or cash flows.

On June 16, 2011, the FASB issued ASU No. 2011-05, "Comprehensive Income (Topic 220): Presentation of Comprehensive Income" ("ASU 2011-05"). This update amends ASC Topic 220, "Comprehensive Income" to provide that total comprehensive income will be reported in one continuous statement or two separate but consecutive statements of financial performance. Presentation of total comprehensive income in the statement of stockholders' equity or the footnotes will no longer be allowed. The calculation of net income and basic and diluted net income per share will not be affected. ASU 2011-005 is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2011, which means that it will be effective for our fiscal year beginning July 1, 2012. Retrospective adoption is required and early adoption is permitted. We do not believe that adoption of ASU 2011-05 will have a significant impact on our financial position, results of operations or cash flows.

In September 2011, the FASB issued ASU 2011-08, “Intangibles – Goodwill and Other (Topic 350) – Testing Goodwill for Impairment” (“ASU 2011-08”). ASU No. 2011-08 amends existing guidance by permitting an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. Under the amendments in this ASU, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. ASU 2011-08 will be effective for interim and annual periods beginning on or after December 15, 2011 with early adoption permitted. We do not believe that adoption of ASU 2011-08 will have a material impact on our financial statements.

Seasonality

Our operating results and operating cash flows historically have been subject to seasonal variations. Our revenues are usually higher in the second half of the year than in the first half of the year and the first quarter is usually the slowest quarter because fewer projects are undertaken during and around the Chinese New Year holidays.

Off-Balance Sheet Arrangements

For the three months ended September 30, 2011, we did not have any off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not Applicable.

ITEM 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) that are designed to ensure that information that would be required to be disclosed in Exchange Act reports is recorded, processed, summarized and reported within the time period specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including to our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As required by Rule 13a-15 under the Exchange Act, our management, including our Chief Executive Officer, Mr. Hai Sheng Chen, and Chief Financial Officer, Ms. Leada Tak Tai Li, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2011. Based upon, and as of the date of this evaluation, Mr. Chen and Ms. Li, determined that because of the material weaknesses described below, as of September 30, 2011 our disclosure controls and procedures were not effective.

During its review of our consolidated financial statements for the fiscal quarter ended September 30, 2011, our management concluded that our accounting staff lacked sufficient accounting skills and experience necessary to fulfill our public reporting obligations according to U.S. GAAP and the SEC’s rules and regulations.

Management is currently seeking for and plans to appoint qualified personnel as soon as possible to remediate this material weakness. Our management does not believe that this material weakness had a material effect on our financial condition or results of operations or caused our financial statements as of and for the fiscal quarter ended September 30, 2011, such as to contain a material misstatement.

Changes in Internal Controls over Financial Reporting

We regularly review our system of internal control over financial reporting and make changes to our processes and systems to improve controls and increase efficiency, while ensuring that we maintain an effective internal control environment. Changes may include such activities as implementing new, more efficient systems, consolidating activities, and migrating processes.

-29-

There were no changes in our internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II
OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

From time to time, we may become involved in various lawsuits and legal proceedings, which arise, in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these, or other matters, may arise from time to time that may harm our business. We are currently not aware of any such legal proceedings or claims that we believe will have a material adverse affect on our business, financial condition or operating results.

ITEM 1A. RISK FACTORS.

Not Applicable.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. (REMOVED AND RESERVED).
ITEM 5. OTHER INFORMATION.

We have no information to disclose that was required to be in a report on Form 8-K during the period covered by this report, but was not reported. There have been no material changes to the procedures by which security holders may recommend nominees to our board of directors.

ITEM 6. EXHIBITS.
