FREESEAS INC.

(Exact Name of Registrant as Specified in its Charter)

Republic of the Marshall Islands

(Jurisdiction of incorporation or organization)

10, Eleftheriou Venizelou Street (Panepistimiou Ave.) 106 71, Athens, Greece

(Address of principal executive offices)

Ion G. Varouxakis

10, Eleftheriou Venizelou Street (Panepistimiou Ave.)

106 71, Athens, Greece

Telephone: +30-210-4528770

Fax: +30-210-4291010

(Name, Telephone, E-mail and/or Facsimile Number and Address of Company contact person)

Securities registered or to be registered pursuant to Section 12(b) of the Act

Title of each class	Name of each exchange on which registered
---------------------	---

Shares of common stock, par value \$0.001 per share	NASDAQ Global Market
---	----------------------

Securities registered or to be registered pursuant to Section 12(g) of the Act

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act

None

We had 6,475,625 shares of common stock outstanding as of December 31, 2011.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of “accelerated filer” and “large accelerated filer” in Rule 126-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing.

U.S. GAAP IFRS as issued by IASB Other

If “Other” has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

EXPLANATORY NOTE

This Amendment No. 2 to Form 20-F (the “Amended Form 20-F”) amends the Annual Report on Form 20-F of FreeSeas Inc. for the fiscal year ended December 31, 2011 originally filed with the U.S. Securities and Exchange Commission on May 7, 2012 and amended on May 16, 2012 (together, the “Form 20-F”). The Amended Form 20-F is being filed to include the Company's consolidated financial statements for the years ended December 31, 2011, 2010 and 2009 as audited by the Company's new independent registered public accounting firm, Sherb & Co., LLP. There have been no changes to the audited financial statements as originally filed in the Form 20-F that would constitute a restatement under generally accepted accounting principles.

The Amended Form 20-F speaks as of May 7, 2012, the original date of filing of the Form 20-F, except for (i) the deletion of a risk factor that is no longer applicable to the Company as a result of its change in independent registered accounting firm; (ii) the sections “Our Fleet” in Part I, Item 4, and “Recent Developments” and “Employment and Charter Rates” in Part I, Item 5; (iii) Note 17, “Subsequent Events,” in the consolidated financial statements included in Part III, Item 18; and (iv) the exhibits included in Part III, Item 19. Among other things, none of the changes in the Amended Form 20-F affect revenues, net income (loss) or shareholders' equity. Other than as set forth in the preceding sentence, the Amended Form 20-F does not reflect events occurring after May 7, 2012, the original date of filing of the Form 20-F, or modify or update the disclosure therein.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This annual report contains certain forward-looking statements. These forward-looking statements include information about possible or assumed future results of our operations and our performance. Our forward-looking statements include, but are not limited to, statements regarding us or our management's expectations, hopes, beliefs, intentions or strategies regarding the future and other statements other than statements of historical fact. In addition, any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. The words "anticipates," "forecasts," "believe," "continue," "could," "estimate," "expect," "intends," "may," "might," "plan," "possible," "potential," "predicts," "project," "should," "would" and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements in this annual report may include, for example, statements about:

• our future operating or financial results;

• our financial condition and liquidity, including our ability to comply with our loan covenants, to repay our indebtedness and to continue as a going concern;

• our ability to take deliveries of two dry bulk vessels under construction;

• potential liability from future litigation and incidents involving our vessels, including seizures by pirates, and our expected recoveries of claims under our insurance policies;

• our ability to pay dividends in the future;

• drybulk shipping industry trends, including charter rates and factors affecting vessel supply and demand;

• future, pending or recent acquisitions, business strategy, areas of possible expansion, and expected capital spending or operating expenses and general and administrative expenses;

• the useful lives and value of our vessels;

• our ability to receive in full or partially our accounts receivable and insurance claims;

• greater than anticipated levels of drybulk vessel new building orders or lower than anticipated rates of drybulk vessel scrapping;

• changes in the cost of other modes of bulk commodity transportation;

• availability of crew, number of off-hire days, dry-docking requirements and insurance costs;

• changes in condition of our vessels or applicable maintenance or regulatory standards (which may affect, among other things, our anticipated dry-docking costs);

• competition in the seaborne transportation industry;

• global and regional economic and political conditions;

• fluctuations in currencies and interest rates;

• our ability to leverage to our advantage Free Bulkers S.A.'s, our Manager, relationships and reputation in the drybulk shipping industry;

• the overall health and condition of the U.S. and global financial markets;

iii

• changes in seaborne and other transportation patterns;

- changes in governmental rules and regulations or actions taken by regulatory authorities;

• acts of terrorism and other hostilities; and

• other factors discussed in the section titled “Risk Factors” in this annual report.

The forward-looking statements contained in this annual report are based on our current expectations and beliefs concerning future developments and their potential effects on us. There can be no assurance that future developments affecting us will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements. These risks and uncertainties include, but are not limited to, those factors described under the heading “Risk Factors.” Should one or more of these risks or uncertainties materialize, or should any of our assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements contained in this annual report, or the documents to which we refer you in this annual report, to reflect any change in our expectations with respect to such statements or any change in events, conditions or circumstances on which any statement is based.

FreeSeas Inc. is a Republic of the Marshall Islands company that is referred to in this annual report on Form 20-F, together with its subsidiaries, as “FreeSeas Inc.,” “FreeSeas,” “the Company,” “we,” “us,” or “our.”

We use the term “deadweight tons,” or “dwt,” in describing the capacity of our drybulk carriers. Dwt, expressed in metric tons, each of which is equivalent to 1,000 kilograms, refers to the maximum weight of cargo and supplies that a vessel can carry. Drybulk carriers are generally categorized as Handysize, Handymax, Panamax and Capesize. The carrying capacity of a Handysize drybulk carrier typically ranges from 10,000 to 39,999 dwt and that of a Handymax drybulk carrier typically ranges from 40,000 to 59,999 dwt. By comparison, the carrying capacity of a Panamax drybulk carrier typically ranges from 60,000 to 79,999 dwt and the carrying capacity of a Capesize drybulk carrier typically is 80,000 dwt and above.

Unless otherwise indicated:

• All references to “\$” and “dollars” in this document are to U.S. dollars

Financial information presented in this document that is derived from financial statements appearing elsewhere in this document is prepared in accordance with the U.S. generally accepted accounting principles, and

• All references to dollar amounts in this document are expressed in thousands of U.S. dollars.

All share-related and per share information throughout the document have been adjusted to give effect to the one share for five share reverse stock split that was effective on October 1, 2010.

This report should be read in conjunction with our audited consolidated financial statements and the accompanying notes thereto, which are included in Item 18 to this annual report.

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION**A. Selected Consolidated Financial Data**

The selected consolidated financial information set forth below has been derived from our audited financial statements for the years ended December 31, 2011, 2010, 2009, 2008 and 2007. The information is only a summary and should be read in conjunction with our audited consolidated financial statements for the years ended December 31, 2011, 2010 and 2009 and notes thereto contained elsewhere herein. The financial results should not be construed as indicative of financial results for subsequent periods. See “Item 4. Information on the Company” and “Item 5. Operating and Financial Review and Prospects.”

	Year Ended December 31,				
	2011	2010	2009	2008	2007
Statement of Operations Data:					
Operating revenues	\$29,538	\$57,650	\$57,533	\$66,689	\$20,147
Income/ (loss) from operations	(84,109)	(17,000)	11,459	26,570	5,761

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

Risk Factors Relating to the Drybulk Shipping Industry

The international drybulk shipping industry is cyclical and volatile and charter rates have decreased significantly and may further decrease in the future, which may adversely affect our earnings, vessel values and results of operations.

The drybulk shipping industry is cyclical with volatility in charter hire rates and profitability. The degree of charter hire rate volatility among different types of drybulk vessels has varied widely. Since the middle of the third quarter of 2008, charter hire rates for drybulk vessels have decreased substantially, they may remain volatile for the foreseeable future and could continue to decline further. Additionally, charter rates have been particularly volatile during 2011 and have substantially decreased. As a result, our charter rates could further decline significantly, resulting in a loss and a reduction in earnings.

We anticipate that the future demand for our drybulk vessels will be dependent upon existing conditions in the world's economies, seasonal and regional changes in demand, changes in the number of drybulk vessels being ordered and constructed, particularly if there is an oversupply of vessels, changes in the capacity of the global drybulk fleet and the sources and supply of drybulk cargo to be transported by sea. Adverse economic, political, social or other developments could have a further material adverse effect on drybulk shipping in general and on our business and operating results in particular.

Our ability to re-charter our drybulk vessels upon the expiration or termination of their current time charters, the charter rates payable under any renewal or replacement charters will depend upon, among other things, the current state of the drybulk shipping market. If the drybulk shipping market is in a period of depression when our vessels' charters expire, it is likely that we may be forced to re-charter them at reduced rates, including rates whereby we incur a loss, which may reduce our earnings or make our earnings volatile.

In addition, because the market value of our vessels may fluctuate significantly, we may incur losses when we sell vessels, which may adversely affect our earnings. If we sell vessels at a time when vessel prices have fallen and before we have recorded an impairment adjustment to our financial statements, the sale may be at less than the vessel's carrying amount on our financial statements, resulting in a loss and a reduction in earnings.

The drybulk carrier charter market remains significantly below its high in the middle of 2008 and the average rates achieved in the three prior years, which has and may continue to adversely affect our revenues, earnings and

profitability and our ability to comply with our loan covenants and repay our indebtedness.

The drybulk shipping industry is cyclical with attendant volatility in charter hire rates and profitability. The degree of charter hire rate volatility among different types of dry bulk vessels has varied widely; however, the continued downturn in the drybulk charter market has severely affected the entire dry bulk shipping industry and charter hire rates for drybulk vessels have declined significantly from historically high levels. The Baltic Dry Index (the “BDI”), which is published daily by the Baltic Exchange Limited, a London-based membership organization that provides daily shipping market information to the global investing community, is a daily average of charter rates in selected shipping routes measured on a time charter and voyage basis covering Handysize, Supramax, Panamax and Capesize drybulk carriers. The BDI has long been viewed as the main benchmark to monitor the movements of the dry bulk vessel charter market and the performance of the entire drybulk shipping market. The BDI declined 94% in 2008 from a peak of 11,793 in May 2008 to a low of 663 in December 2008 and remained volatile during 2009, ranging from a low of 772 in January 2009 to a high of 4,661 in November 2009. The BDI continued its volatility in 2010, reaching a high of 4,209 in May 2010 and a low of 1,700 in July 2010, and 2011, ranging from a low of approximately 1,043 in February 2011 and a high of approximately 2,173 in October 2011. As of April 18, 2012, the BDI had fallen to 1,006. The decline and volatility in charter rates has been due to various factors, including the lack of trade financing for purchases of commodities carried by sea, which had resulted in a significant decline in cargo shipments. The decline and volatility in charter rates in the drybulk market also affects the value of our drybulk vessels, which follows the trends of drybulk charter rates, and earnings on our charters, and similarly, affects our cash flows, our ability to repay our indebtedness and compliance with the covenants contained in our loan agreements.

Economic recession and disruptions in world financial markets and the resulting governmental action in the United States and in other parts of the world could have a further material adverse impact on our results of operations, financial condition and cash flows.

We face risks resulting from changes in economic environments, changes in interest rates and instability in the banking, energy, commodities and securities markets around the world, among other factors. Major market disruptions, the adverse changes in market conditions and the regulatory climate in the United States and worldwide may adversely affect our business, impair our ability to borrow amounts under our existing credit facility or any credit facilities we enter into. In addition, the economic environment in Greece, which is where our operations are based, may have adverse impacts on us. We cannot predict how long the current market conditions will last. However, these economic and governmental factors, together with the concurrent decline in charter rates, could have a significant effect on our results of operations and could affect the price of our common stock.

An economic slowdown in the Asia Pacific region could exacerbate the effect of recent slowdowns in the economies of the European Union and may have a material adverse effect on our business, financial condition and results of operations.

We anticipate a significant number of the port calls made by our vessels will continue to involve the loading or discharging of drybulk commodities in ports in the Asia Pacific region. As a result, any negative changes in economic conditions in any Asia Pacific country, particularly in China, may exacerbate the effect of recent slowdowns in the economies of the European Union and may have a material adverse effect on our business, financial condition and results of operations, as well as our future prospects. Before the global economic financial crisis that began in 2008, China had one of the world's fastest growing economies in terms of gross domestic product ("GDP") which had a significant impact on shipping demand. The growth rate of China's GDP decreased to approximately 9.5% for the year ended December 31, 2011, as compared to approximately 10.3% for the year ended December 31, 2010, and continues to remain below pre-2008 levels. It is possible that China and other countries in the Asia Pacific region will continue to experience slowed or even negative economic growth in the near future. Moreover, the current economic slowdown in the economies of the European Union and other Asian countries may further adversely affect economic growth in China and elsewhere. Our business, financial condition and results of operations, as well as our future prospects, will likely be materially and adversely affected by a further economic downturn in any of these countries.

Changes in the economic and political environment in China and policies adopted by the government to regulate its economy may have a material adverse effect on our business, financial condition and results of operations.

The Chinese economy differs from the economies of most countries belonging to the Organization for Economic Cooperation and Development, or OECD, in such respects as structure, government involvement, level of development, growth rate, capital reinvestment, allocation of resources, rate of inflation and balance of payments position. Since 1978, increasing emphasis has been placed on the utilization of market forces in the development of the Chinese economy. There is an increasing level of freedom and autonomy in areas such as allocation of resources, production, pricing and management and a gradual shift in emphasis to a "market economy" and enterprise reform. Although limited price reforms were undertaken, with the result that prices for certain commodities are principally determined by market forces, many of the reforms are experimental and may be subject to change or abolition. We cannot assure you that the Chinese government will continue to pursue a policy of economic reform. The level of imports to and exports from China could be adversely affected by changes to these economic reforms, as well as by changes in political, economic and social conditions or other relevant policies of the Chinese government, such as changes in laws, regulations or export and import restrictions, all of which could, adversely affect our business, financial condition and operating results.

Risks involved with operating ocean-going vessels could affect our business and reputation, which may reduce our revenues.

The operation of an ocean-going vessel has inherent risks. These risks include the possibility of:

• crew strikes and/or boycotts;

• marine disaster;

• piracy;

• environmental accidents;

• cargo and property losses or damage; and

• business interruptions caused by mechanical failure, human error, war, terrorism, political action in various countries, labor strikes or adverse weather conditions.

The involvement of any of our vessels in an environmental disaster may harm our reputation as a safe and reliable vessel operator. Any of these circumstances or events could increase our costs or lower our revenues.

M/V Free Goddess was hijacked by Somali pirates on February 7, 2012 while transiting the Indian Ocean eastbound. The vessel is held off the coast of Somalia and the Company is currently in communication with the pirates for the release of the vessel and her crew. The vessel was on a time charter trip at the time she was hijacked. Under the charter party agreement, the BIMCO Piracy clause was applied which provided, among other things, for the charterers to have the vessel covered with kidnap and ransom insurance and loss of hire insurance. The vessel was also covered by the war risk underwriters who were duly informed about the transit and had confirmed cover.

An oversupply of drybulk vessel capacity may lead to reductions in charter rates and profitability.

The market supply of drybulk vessels has been increasing, and the number of drybulk vessels on order is near historic highs. As of December 31, 2011, newbuilding orders had been placed for an aggregate of approximately 32% of the total DWT of the then-existing global drybulk fleet, with deliveries expected mainly during the succeeding 36 months, although available data with regard to cancellations of existing newbuilding orders or delays of new build deliveries are not always accurate. As of December 31, 2010, newbuilding orders had been placed for an aggregate of approximately 47% of the total DWT of the then-existing global drybulk fleet, with deliveries expected mainly during the succeeding 36 months, although available data with regard to cancellations of existing new build orders or delays of new build deliveries are not always accurate. An over-supply of drybulk carrier capacity may result in a reduction of charter hire rates. Because the factors affecting the supply and demand for vessels are outside of our control and are unpredictable, the nature, timing, direction and degree of changes in industry conditions are also unpredictable.

Factors that influence demand for vessel capacity include:

• supply and demand for energy resources, commodities, semi-finished and finished consumer and industrial products;

• changes in the exploration or production of energy resources, commodities, semi-finished and finished consumer and industrial products;

• the location of regional and global exploration, production and manufacturing facilities;

• the location of consuming regions for energy resources, commodities, semi-finished and finished consumer and industrial products;

- the globalization of production and manufacturing; global and regional economic and political conditions, including armed conflicts, terrorist activities, embargoes and strikes;

• developments in international trade;

• changes in seaborne and other transportation patterns, including the distance cargo is transported by sea;

• environmental and other regulatory developments;

currency exchange rates; and weather.

The factors that influence the supply of vessel capacity include:

the number of newbuilding deliveries;

port and canal congestion;

the scrapping rate of older vessels;

vessel casualties; and

the number of vessels that are out of service.

We anticipate that the future demand for our drybulk carriers will be dependent upon continued economic growth in the world's economies, including China and India, seasonal and regional changes in demand, changes in the capacity of the global drybulk carrier fleet and the sources and supply of drybulk cargoes to be transported by sea. The capacity of the global drybulk carrier fleet seems likely to increase and economic growth may not continue. Adverse economic, political, social or other developments could have a material adverse effect on our business and operating results.

Increased inspection procedures and tighter import and export controls could increase costs and disrupt our business.

International shipping is subject to various security and customs inspection and related procedures in countries of origin and destination. Inspection procedures can result in the seizure of the contents of our vessels, delays in the loading, offloading or delivery and the levying of customs duties, fines or other penalties against us.

Since the terrorist attacks of September 11, 2001, there has been a variety of limitations intended to enhance vessel security.

Regulations by the U.S. Coast Guard and rules pursuant to the International Convention for the Safety of Life at Sea have imposed increased compliance costs on vessel owners and charterers. These costs include certification costs imposed by relevant agencies and bonding costs under U.S. Customs and Border Protection, as well as potential delays in transit due to increased security procedures regulating the entry into harbors or the discharge of cargo. For a further description of the various requirements, please see "Item 4. Information on the Company -Environmental and

Other Regulation-Vessel Security Regulations.”

4

It is possible that changes to inspection procedures could impose additional financial and legal obligations on us. Furthermore, changes to inspection procedures could also impose additional costs and obligations on our customers and may, in certain cases, render the shipment of certain types of cargo uneconomical or impractical. Any such changes or developments may have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

Risk Factors Relating to FreeSeas

At December 31, 2011 the Company's current liabilities exceeded its current assets, which could impair its ability to successfully operate its business and could have material adverse effects on its revenues, cash flows and profitability and its ability to comply with its debt covenants and pay its debt service and other obligations.

At December 31, 2011, the Company's current liabilities exceeded its current assets by \$47,186. As a result of the historically low charter rates for drybulk vessels which have been affecting the Company for over one year, and the resulting material adverse impact on the Company's results from operations, the Company has undertaken negotiations with each of its lenders to restructure the Company's debt repayments. On February 15, 2012, the Company received from Credit Suisse restructuring head terms for the full payment holiday of the principal and partial interest payment until March 31, 2014 conditional on the approval from our other lenders, Deutsche Bank Nederland and FBB.

In February, March and April 2012, the Company received notifications from the Deutsche Bank Nederland and FBB that the Company is in default under its loan agreements as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreements. Although the Company is seeking and will continue to seek waivers to these covenants from its lenders, and continues negotiations with the lenders to restructure its debt, there can be no assurances that we will be able to obtain such waivers or restructure our debt. If the Company is not able to obtain the necessary waivers and/or restructure its debt, this could lead to the acceleration of the outstanding debt under its debt agreements. The Company's failure to satisfy its covenants under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness would have a material adverse effect on the Company's business operations, financial condition and liquidity.

All of the above raises doubt regarding the Company's ability to continue as a going concern.

The Company is currently exploring several alternatives aiming to manage its working capital requirements and other commitments if current market charter hire rates continue, including a share capital increase, disposition of certain vessels in its current fleet, and taking steps to achieve additional reductions in operating and other costs.

Generally accepted accounting principles require that long-term debt be classified as a current liability when a covenant violation gives the lender the right to call the debt at the balance sheet date, absent a waiver. Accordingly, as of December 31, 2011, the Company is required to reclassify its long term debt as current liabilities in its consolidated balance sheet since the Company has not received waivers in respect of the covenants that are breached at such time. As the Company believes it will succeed in restructuring its debt and receive the necessary waivers, the consolidated financial statements as of December 31, 2011, were prepared assuming that the Company would continue as a going concern. Accordingly, the financial statements did not include any adjustments relating to the recoverability and classification of recorded asset amounts, the amounts and classification of liabilities, or any other adjustments that might result in the event the Company is unable to continue as a going concern, except for the current classification of debt.

The market values of our vessels have declined and may further decrease, and we may incur losses when we sell vessels or we may be required to write down their carrying value, which may adversely affect our earnings and our ability to implement our fleet renewal program.

The market values of our vessels will fluctuate depending on general economic and market conditions affecting the shipping industry and prevailing charter hire rates, competition from other shipping companies and other modes of transportation, the types, sizes and ages of our vessels, applicable governmental regulations and the cost of newbuildings.

If a determination is made that a vessel's future useful life is limited or its future earnings capacity is reduced, it could result in an impairment of its carrying amount on our financial statements that would result in a charge against our earnings and the reduction of our shareholders' equity. If for any reason we sell our vessels at a time when prices have fallen, the sale price may be less than the vessels' carrying amount on our financial statements, and we would incur a loss and a reduction in earnings. During the year ended December 31, 2011, we incurred an impairment loss of \$69,998 due to expected sales of certain vessels.

We have incurred secured debt under loan agreements for all of our vessels. The market value of our vessels is based, in part, on charter rates and the stability of charter rates over a period of time. As a result of global economic conditions, volatility in charter rates, generally declining charter rates, and other factors, we have recently experienced a decrease in the market value of our vessels. Due to the decline of the market value of our fleet, we were not in compliance with certain covenants of our existing loan agreements that relate to maintenance of asset values and, as a result, we may not be able to refinance our debt or obtain additional financing. There can be no assurances that charter rates will stabilize or increase, that the market value of our vessels will stabilize or increase or that we will regain compliance with the financial covenants in our loan agreements or that our lenders will agree to waivers or forbearances.

On November 8, 2011, we sold the M/V *Free Lady* for a sale price of \$21.9 million. If we fail to sell our other vessels currently held for sale (the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Impala*, and the M/V *Free Neptune*), or fail to sell them at prices acceptable to us, we may not be able to acquire the vessels necessary to implement our fleet renewal program which, in turn, could have a material adverse effect on our competitiveness and business operations.

We are in breach of certain loan covenants contained in our loan agreements. If we are not successful in obtaining waivers and amendments with respect to covenants breached, our lenders may declare an event of default and accelerate our outstanding indebtedness under the relevant agreement, which would impair our ability to continue to conduct our business, which raises substantial doubt about our ability to continue as a going concern.

Our loan agreements require that we comply with certain financial and other covenants. As a result of the drop in our drybulk asset values we were not in compliance with covenants relating to vessel values as of December 31, 2011. In addition, we were in breach of interest cover ratios, leverage and minimum liquidity covenants with certain banks not previously waived. A violation of these covenants constitutes an event of default under our credit facilities, which would, unless waived by our lenders, provide our lenders with the right to require us to post additional collateral, increase our interest payments and/or pay down our indebtedness to a level where we are in compliance with our loan covenants. Furthermore, our lenders may accelerate our indebtedness and foreclose their liens on our vessels, in which case our vessels may be auctioned or otherwise transferred which would impair our ability to continue to conduct our business. As a result of these breaches, our total indebtedness of \$88.9 million is presented within current liabilities in the December 31, 2011 consolidated balance sheet.

Pursuant to letter agreements dated September 6, 2011 and September 19, 2011 with Credit Suisse, which resolved a default by us under the Credit Suisse facility agreement, the Company agreed to execute a sale contract in respect of either of the M/V *Free Jupiter* or the M/V *Free Lady* no later than October 10, 2011. On November 8, 2011, we sold the M/V *Free Lady* for a sale price of \$21.9 million. Pursuant to the Fifth Supplemental Agreement dated November 7, 2011 with Credit Suisse, the Company agreed to enter into a period time charter of at least 12 months for all our mortgaged vessels no later than December 31, 2011, which charter would cover the vessel's debt service plus \$1.0 million. If the foregoing time charter was not entered into by the required date, the Company agreed that will sell either the M/V *Free Jupiter* or both the M/V *Free Goddess* and the M/V *Free Hero* by January 31, 2012. The Company has not concluded any time charter agreement and any agreement for the sale of the above mentioned vessels. On February 15, 2012, the Company received from Credit Suisse restructuring head terms for the full payment holiday of the principal and partial interest holiday payment until March 31, 2014, which is conditioned on receiving approval from our other lenders.

In February, March and April 2012, the Company received notifications from Deutsche Bank Nederland and FBB that the Company is in default under its loan agreements as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreements. Although the Company is seeking and will continue to seek waivers to these covenants from its lenders, and continues negotiations with the lenders to restructure its debt, there can be no assurances that we will be able to obtain such waivers or restructure our debt. If the Company is not able to

obtain the necessary waivers and/or restructure its debt, this could lead to the acceleration of the outstanding debt under its debt agreements. The Company's failure to satisfy its covenants under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness would have a material adverse effect on the Company's business operations, financial condition and liquidity.

All of the above raises doubt regarding the Company's ability to continue as a going concern.

Our loan agreements contain covenants that may limit our liquidity and corporate activities, including our ability to pay dividends.

If the drybulk market remains depressed or further declines, we may require further waivers and/or covenant amendments to our loan agreements relating to our compliance with certain covenants for certain periods of time. The waivers and/or covenant amendments may impose additional operating and financial restrictions on us and modify the terms of our existing loan agreements. Any such waivers or amendments, if needed, could contain such additional restrictions and might not be granted at all.

Our loan agreements require that we maintain certain financial and other covenants. The low drybulk charter rates and drybulk vessel values have previously affected, and may in the future affect, our ability to comply with these covenants. A violation of these covenants constitutes an event of default under our credit facilities and would provide our lenders with various remedies, including the right to require us to post additional collateral, enhance our equity and liquidity, withhold payment of dividends, increase our interest payments, pay down our indebtedness to a level where we are in compliance with our loan covenants, sell vessels in our fleet, or reclassify our indebtedness as current liabilities. Our lenders could also accelerate our indebtedness and foreclose their liens on our vessels. The exercise of any of these remedies could materially adversely impair our ability to continue to conduct our business. Moreover, our lenders may require the payment of additional fees, require prepayment of a portion of our indebtedness to them, accelerate the amortization schedule for our indebtedness and increase the interest rates they charge us on our outstanding indebtedness.

As described above, the Company was in breach of its financial covenants as of December 31, 2011 and received in February, March and April 2012 notifications from Deutsche Bank Nederland and FBB that the Company is in default under its loan agreements as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreements. Although the Company is seeking and will continue to seek waivers to these covenants from its lenders, it is uncertain that will be able to obtain such waivers. Management will seek to restructure the Company's indebtedness. If the Company is not able to obtain the necessary waivers and/or restructure its debt, this could lead to the acceleration of the outstanding debt. The Company's failure to satisfy its covenants under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness, would have a material adverse effect on the Company's business operations, financial condition and liquidity.

All of the above raises doubt regarding the Company's ability to continue as a going concern.

As a result of our loan covenants, our lenders have imposed operating and financial restrictions on us. These restrictions may limit our ability to:

• incur additional indebtedness;

• create liens on our assets;

• sell capital stock of our subsidiaries;

• make investments;

• engage in mergers or acquisitions;

• pay dividends;

• make capital expenditures;

• change the management of our vessels or terminate or materially amend our management agreements; and

• sell our vessels.

The amended and restated credit agreement dated September 15, 2009 with Deutsche Bank Nederland does not allow us to pay dividends without their prior written approval, such approval not to be unreasonably withheld. If we need covenant waivers, our lenders may impose additional restrictions and may require the payment of additional fees, require prepayment of a portion of our indebtedness to them, accelerate the amortization schedule for our indebtedness, and increase the interest rates they charge us on our outstanding indebtedness. We may be required to use a significant portion of the net proceeds from any future capital raising to repay a portion of our outstanding indebtedness. We agreed to pay Deutsche Bank Nederland up to 10% of the net proceeds of any capital raises up to a maximum of \$3.0 million in the aggregate. We have already paid approximately \$1.7 million from our proceeds from the July 2009 follow-on offering. These potential restrictions and requirements may limit our ability to pay dividends to you, finance our future operations, make acquisitions or pursue business opportunities.

Servicing debt may limit funds available for other purposes and inability to service debt may lead to acceleration of debt and foreclosure on our fleet.

To finance our fleet, we incurred secured debt under various loan agreements. As of December 31, 2011, we had outstanding an aggregate of \$88,946 in debt. We will be required to dedicate a significant portion of our cash flow from operations to pay the principal and interest on our debt. These payments will limit funds otherwise available for working capital, capital expenditures and other purposes. We will need to incur additional indebtedness as we further renew and expand our fleet, which may increase our ratio of debt to equity. We may not be able to obtain such financing when desired or on terms acceptable to us. The need to service our debt may limit funds available for other purposes, including distributing cash to our shareholders, and our inability to service debt could lead to acceleration of our debt and foreclosure of our fleet. We may not be able to generate cash flow in amounts that are sufficient for these purposes.

Our operations expose us to global political risks, such as wars and political instability that may interfere with the operation of our vessels causing a decrease in revenues from such vessels.

We are an international company and primarily conduct our operations outside the United States. Changing economic, political and governmental conditions in the countries where we are engaged in business or where our vessels are registered will affect us. In the past, political conflicts, particularly in the Middle East, resulted in attacks on vessels, mining of waterways and other efforts to disrupt shipping in the area. For example, recent political and governmental instability in Egypt and Libya may affect vessels trading in such regions. In addition, future political and governmental instability, revolutions and wars in regions where our vessels trade could affect our trade patterns and adversely affect our operations by causing delays in shipping on certain routes or making shipping impossible on such routes, thereby causing a decrease in revenues.

During a period of war or emergency, a government could requisition for title or seize our vessels. Requisition for title occurs when a government takes control of a vessel and becomes the owner. A government could also requisition our vessels for hire, when a government takes control of a vessel and effectively becomes the charterer at dictated charter rates. Government requisition of one or more of our vessels could reduce our revenues and net income.

We intend to continue to charter most of our vessels in the spot market, and as a result, we will be exposed to the cyclical and volatility of the spot charter market.

Since we intend to continue to charter most of our vessels in the spot market, we will be exposed to the cyclical and volatility of the spot charter market, and we may not have long term, fixed time charter rates to mitigate the adverse effects of downturns in the spot market. Handysize and Handymax vessels, which we currently operate, have been less volatile compared to larger vessels such as panamax and capesize vessels but this may discontinue in the future. We cannot assure you that we will be able to successfully charter our vessels in the future at rates sufficient to allow us to meet our obligations. The supply and demand for shipping capacity strongly influences freight rates. Because the factors affecting the supply and demand for vessels are outside of our control and are unpredictable, the nature, timing, direction and degree of changes in industry conditions are also unpredictable.

Factors that influence demand for drybulk vessel capacity include:

• demand for and production of drybulk products;

• global and regional economic and political conditions including developments in international trade, fluctuations in industrial and agricultural production and armed conflicts;

• the distance drybulk cargo is to be moved by sea;

• environmental and other regulatory developments; and

- changes in seaborne and other transportation patterns.

• The factors that influence the supply of drybulk vessel capacity include:

• the number of newbuilding deliveries;

port and canal congestion;

the scrapping rate of older vessels;

vessel casualties; and

the number of vessels that are out of service, i.e., laid-up, drydocked, awaiting repairs or otherwise not available for hire.

In addition to the prevailing and anticipated freight rates, factors that affect the rate of newbuilding, scrapping and laying-up include newbuilding prices, secondhand vessel values in relation to scrap prices, costs of bunkers and other operating costs, costs associated with classification society surveys, normal maintenance and insurance coverage, the efficiency and age profile of the existing fleet in the market and government and industry regulation of maritime transportation practices, particularly environmental protection laws and regulations. These factors influencing the supply of and demand for shipping capacity are outside of our control, and we may not be able to correctly assess the nature, timing and degree of changes in industry conditions.

We anticipate that the future demand for our drybulk carriers will be dependent upon economic growth in the world's economies, including China, Japan and India, seasonal and regional changes in demand, changes in the capacity of the global drybulk carrier fleet and the sources and supply of drybulk cargo to be transported by sea. The capacity of the global drybulk carrier fleet seems likely to increase, and we can provide no assurance as to the timing or extent of future economic growth. Adverse economic, political, social or other developments could have a material adverse effect on our business, results of operations, cash flows and financial condition. Should the drybulk market strengthen significantly in the future, we may enter into medium to long term employment contracts for some or all of our vessels.

We currently employ all of our vessels in the spot market, all with charters scheduled to expire within one to three months, by which time we will have to negotiate new employment for these vessels. If the rates in the charter market fall significantly throughout 2012, it will affect the charter revenue we will receive from these vessels, which would have an adverse effect on our revenues, cash flows and profitability, as well as our ability to comply with our debt covenants.

When our charters in the spot market end, we may not be able to replace them promptly, and any replacement charters could be at lower charter rates, which may materially, adversely affect our earnings and results of operations.

We will generally attempt to recharter our vessels at favorable rates with reputable charterers. All of our vessels currently operate in the spot market. If the drybulk shipping market is in a period of depression when our vessels' charters expire, it is likely that we may be forced to re-charter them at reduced rates, if such charters are available at all. We cannot assure you that we will be able to obtain new charters at comparable or higher rates or with comparable charterers, or that we will be able to obtain new charters at all. The charterers under our charters have no obligation to renew or extend the charters. We will generally attempt to recharter our vessels at favorable rates with reputable charterers as our charters expire. Failure to obtain replacement charters at rates comparable to our existing charters will reduce or eliminate our revenue, will adversely affect our ability to service our debt, and will delay our ability to pay dividends to shareholders. Further, we may have to reposition our vessels without cargo or compensation to deliver them to future charterers or to move vessels to areas where we believe that future employment may be more likely or advantageous. Repositioning our vessels would increase our vessel operating costs. If any of the foregoing events were to occur, our revenues, net income and earnings may be materially adversely affected.

Our growth depends on the growth in demand for and the shipping of drybulk cargoes.

Our growth strategy focuses on the drybulk shipping sector. Accordingly, our growth depends on growth in world and regional demand for and the shipping of drybulk cargoes, which could be negatively affected by a number of factors, such as declines in prices for drybulk cargoes or general political and economic conditions.

Reduced demand for and the shipping of drybulk cargoes would have a material adverse effect on our future growth and could harm our business, results of operations and financial condition. In particular, Asian Pacific economies and India have been the main driving force behind the past increase in seaborne drybulk trade and the demand for drybulk carriers. The negative change in economic conditions in any Asian Pacific country, but particularly in China or Japan, as well as India, may have a material adverse effect on our business, financial condition and results of operations, as well as our future prospects, by further reducing demand and resultant charter rates.

We depend upon a few significant customers for a large part of our revenues. The loss of one or more of these customers could adversely affect our financial performance.

We have historically derived a significant part of our revenue from a small number of charterers. During 2011, we derived approximately 46% of our gross revenue from three charterers, and during 2010, we derived approximately 42% of our gross revenues from three charterers. If we do remain dependent, in large part, on a small number of

charterers, if one or more of our charterers is unable to perform under one or more charters with us, if we are not able to find appropriate replacement charterers, or if a charterer exercises certain rights to terminate its charter, we could suffer a loss of revenues that could materially adversely affect our business, financial condition and results of operations.

Our charterers may terminate or default on their charters, which could adversely affect our results of operations and cash flow.

The ability of each of our charterers to perform its obligations under a charter will depend on a number of factors that are beyond our control. These factors may include general economic conditions, the condition of the drybulk shipping industry, the charter rates received for specific types of vessels, hedging arrangements, the ability of charterers to obtain letters of credit from its customers, cash reserves, cash flow considerations and various operating expenses. Many of these factors impact the financial viability of our charterers. Charterers may not pay or may attempt to renegotiate charter rates. Should a charterer fail to honor its obligations under its agreement with us, it may be difficult for us to secure substitute employment for the affected vessel, and any new charter arrangements we secure in the spot market or on a time charter may be at lower rates.

We lose a charterer or the benefits of a charter if a charterer fails to make charter payments because of its financial inability, disagreements with us or otherwise, terminates the charter because we fail to deliver the vessel within the time specified in the charter, the vessel is lost or damaged beyond repair, there are serious deficiencies in the vessel or prolonged periods of off-hire, default under the charter or the vessel has been subject to seizure for more than a specified number of days.

The M/V *Free Jupiter* was on time charter with Korea Line Corp., or KLC, a South Korean company, from June 8, 2007 until she was re-delivered to us on February 22, 2011. KLC made several unilateral deductions from hire payments during the three-year course of the time charter, and no hire was received from KLC from February 8, 2011 until the actual redelivery of the vessel on February 22, 2011. The Company commenced arbitration proceedings against KLC, and has taken action to obtain security, including the arrest of KLC assets. As a result, the Company obtained third-party security in the amount of \$1.68 million (which includes provision for interest and legal costs) in the form of a letter of undertaking (the "LOU") from KLC's P&I club covering KLC's unilateral deductions from the hire. The Company also obtained cash security held in escrow in the amount of \$159 from the execution of a lien on sub-hires. KLC has counterclaimed by way of set-off, alleging that KLC is entitled to retain the amount of hire that was deducted because of the Company's alleged breach of charterparty. The Company denies these allegations and continues to assert its claim to recover the full amount deducted by KLC. On January 25, 2011, KLC announced that it had filed a petition for the rehabilitation proceeding for court receivership in the Seoul Central District Court, and the court approved and confirmed a rehabilitation plan. Upon the issuance of the final award of the arbitration tribunal, and for any amount in excess of the third-party security and cash security, the Company may participate in the approved rehabilitation plan. As of December 31, 2011, the outstanding balance of the KLC time charter was \$1,372 after provisions of \$136, which is below the security obtained as described above. On January 17, 2012, the Company obtained an interim award under which it was awarded the part of the claim that KLC had admitted was undisputed, \$832, plus interest, legal costs, and the cost of the tribunal. Following the interim award, the Company received approximately \$321. The majority of the balance of \$511 that has been awarded is unsecured. The Company is considering its options if KLC does not pay the balance, including the possibility of pursuing this in the Korean rehabilitation proceedings, where the hearing of the Company's claim has been stayed pending the outcome of the London arbitration. The Company believes that, if the Korean claim succeeds, the Company should make a recovery in accordance with the rehabilitation plan, which has been approved by the Korean court. There will be a further award (if this matter does not settle) for the disputed balance which is adequately secured.

If our charterers fail to meet their obligations to us, we would experience material adverse effects on our revenues, cash flows and profitability and our ability to comply with our debt covenants and pay our debt service and other obligations. The actual or perceived credit quality of our charterers, and any defaults by them, may materially affect our ability to obtain the additional debt financing that we will require to acquire additional vessels or may significantly increase our costs of obtaining such financing. Our inability to obtain additional financing at all, or at a higher than anticipated cost, may materially impair our ability to implement our business strategy.

The international drybulk shipping industry is highly competitive, and we may not be able to compete successfully for charters with new entrants or established companies with greater resources.

We employ our vessels in a highly competitive market that is capital intensive and highly fragmented. Competition arises primarily from other vessel owners, some of which have substantially greater resources than we do. Competition for the transportation of drybulk cargo by sea is intense and depends on price, customer relationships, operating expertise, professional reputation and size, age, location and condition of the vessel. Due in part to the highly fragmented market, additional competitors with greater resources could enter the drybulk shipping industry and operate larger fleets through consolidations or acquisitions and may be able to offer lower charter rates than we are able to offer, which could have a material adverse effect on our fleet utilization and, accordingly, our profitability.

Charter rates are subject to seasonal fluctuations, which may adversely affect our operating results.

Our fleet consists of Handysize and Handymax drybulk carriers that operate in markets that have historically exhibited seasonal variations in demand and, as a result, in charter rates. This seasonality may result in quarter-to-quarter volatility in our operating results. The energy markets primarily affect the demand for coal, with increases during hot summer periods when air conditioning and refrigeration require more electricity and towards the end of the calendar year in anticipation of the forthcoming winter period. Grain shipments are driven by the harvest within a climate zone. Because three of the five largest grain producers (the United States, Canada and the European Union) are located in the northern hemisphere and the other two (Argentina and Australia) are located in the southern hemisphere, harvests occur throughout the year and grains require drybulk shipping accordingly. As a result of these and other factors, the drybulk shipping industry is typically stronger in the fall and winter months. Therefore, we expect our revenues from our drybulk carriers to be typically weaker during the fiscal quarters ending June 30 and September 30 and, conversely, we expect our revenues from our drybulk carriers to be typically stronger in fiscal quarters ending December 31 and March 31. Seasonality in the drybulk industry could materially affect our operating results.

We are subject to regulation and liability under environmental laws and the failure to comply with these regulations may subject us to increased liability, may adversely affect our insurance coverage and may result in a denial of access to, or detention in, certain ports. This could require significant expenditures and reduce our cash flows and net income.

Our business and the operation of our vessels are materially affected by government regulation in the form of international conventions and national, state and local laws and regulations in force in the jurisdictions in which the vessels operate, as well as in the country or countries of their registration, including those governing the management and disposal of hazardous substances and wastes, the cleanup of oil spills and other contamination, air emissions, and water discharges and ballast water management. We are also required by various governmental and quasi-governmental agencies to obtain certain permits, licenses and certificates with respect to our operations. Because such conventions, laws, regulations and permit requirements are often revised, or the required additional measures for compliance are still under development, we cannot predict the ultimate cost of complying with such conventions, laws, regulations or permit requirements, or the impact thereof on the resale prices or useful lives of our vessels. Additional conventions, laws and regulations may be adopted which could limit our ability to do business or increase the cost of our doing business and which may materially adversely affect our business, financial condition and results of operations.

Environmental requirements can also affect the resale prices or useful lives of our vessels or require reductions in cargo capacity, ship modifications or operational changes or restrictions. Failure to comply with these requirements could lead to decreased availability of or more costly insurance coverage for environmental matters or result in the denial of access to certain jurisdictional waters or ports, or detention in certain ports. Under local, national and foreign laws, as well as international treaties and conventions, we could incur material liabilities, including cleanup obligations and claims for natural resource, personal injury and property damages in the event that there is a release of petroleum or other hazardous materials from our vessels or otherwise in connection with our operations. The 2010 explosion of the Deepwater Horizon and the subsequent release of oil into the Gulf of Mexico or similar events may result in further regulation of the shipping industry, including modifications to statutory liability schemes.

The operation of our vessels is affected by the requirements set forth in the International Safety Management, or ISM Code. The failure of a shipowner or bareboat charterer to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels, and/or may result in a denial of access to, or detention in, certain ports.

The European Union is currently considering proposals to further regulate vessel operations. Individual countries in the European Union may also have additional environmental and safety requirements. It is difficult to predict what legislation or regulation, if any, may be adopted by the European Union or any other country or authority.

The International Maritime Organization or other regulatory bodies may adopt additional regulations in the future that could adversely affect the useful lives of our vessels as well as our ability to generate income from them or resell them at attractive prices.

The United States Oil Pollution Act of 1990, or OPA, established an extensive regulatory and liability regime for the protection and clean-up of the environment from oil spills. Under OPA, vessel owners, operators and bareboat charterers are “responsible parties” and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from discharges or threatened discharges of oil from their vessels, including bunkers (fuel).

Violations of, or liabilities under, environmental or other applicable laws and regulations can result in substantial penalties, fines and other sanctions, including, in certain instances, seizure or detention of our vessels. Events of this nature could have a material adverse effect on our business, financial condition and results of operations.

Technological innovation related to existing or new vessels could reduce the competitiveness of our older vessels and therefore the value of such vessels in the chartering and secondhand resale markets.

The charter hire rates and the value and operational life of a vessel are determined by a number of factors, including the vessel's efficiency, operational flexibility and physical life. Efficiency includes speed, fuel economy and the ability to load and discharge cargo quickly. Flexibility includes the ability to enter harbors, utilize related docking facilities and pass through canals and straits. The length of a vessel's physical life is related to its original design and construction, its maintenance and the impact of the stress of operations. If new drybulk carriers are built that are more efficient or more flexible or have longer physical lives than our older vessels, competition from these more technologically advanced vessels could adversely affect the competitiveness of our older vessels, and, in turn, the amount of charter hire payments we receive for our older vessels once their initial charters expire, and the resale value of our older vessels could significantly decrease.

Our vessels are exposed to inherent operational risks that may not be adequately covered by our insurance.

The operation of any vessel includes risks such as mechanical failure, collision, fire, contact with floating objects, cargo or property loss or damage and business interruption due to political circumstances in foreign countries, piracy, terrorist attacks, armed hostilities and labor strikes. With a drybulk carrier, the cargo itself and its interaction with the ship can be a risk factor. By their nature, drybulk cargoes are often heavy, dense, easily shifted, and react badly to water exposure. In addition, drybulk carriers are often subjected to battering treatment during unloading operations with grabs, jackhammers (to pry encrusted cargoes out of the hold), and small bulldozers. This treatment may cause damage to the vessel. Vessels damaged due to treatment during unloading procedures may be more susceptible to breach to the sea. Hull breaches in drybulk carriers may lead to the flooding of the vessels' holds. If a drybulk carrier suffers flooding in its forward holds, the bulk cargo may become so dense and waterlogged that its pressure may buckle the vessel's bulkheads leading to the loss of a vessel. If we are unable to adequately maintain our vessels we may be unable to prevent these events. Any of these circumstances or events could negatively impact our business, financial condition and results of operations.

Further, such occurrences could result in death or injury to persons, loss of property or environmental damage, delays in the delivery of cargo, loss of revenues from or termination of charter contracts, governmental fines, penalties or restrictions on conducting business, higher insurance rates and damage to our reputation and customer relationships generally. In the past, political conflicts have also resulted in attacks on vessels, mining of waterways and other efforts to disrupt international shipping, particularly in the Arabian Gulf region. Acts of terrorism and piracy have also affected vessels trading in regions such as the South China Sea and the Gulf of Aden and Indian Ocean off the coast of Somalia and Kenya. If these attacks and other disruptions result in areas where our vessels are deployed being characterized by insurers as "war risk" zones or Joint War Committee "war, strikes, terrorism and related perils" listed areas, as the Gulf of Aden currently is, premiums payable for such coverage could increase significantly and such insurance coverage may be more difficult or impossible to obtain. In addition, there is always the possibility of a marine disaster, including oil spills and other environmental damage. Although our vessels carry a relatively small amount of the oil used for fuel ("bunkers"), a spill of oil from one of our vessels or losses as a result of fire or explosion could be catastrophic under certain circumstances.

We may not be adequately insured against all risks, and our insurers may not pay particular claims. With respect to war risks insurance, which we usually obtain for certain of our vessels making port calls in designated war zone areas, such insurance may not be obtained prior to one of our vessels entering into an actual war zone, which could result in that vessel not being insured. Even if our insurance coverage is adequate to cover our losses, we may not be able to timely obtain a replacement vessel in the event of a loss. Under the terms of our credit facilities, we will be subject to restrictions on the use of any proceeds we may receive from claims under our insurance policies. Furthermore, in the future, we may not be able to maintain or obtain adequate insurance coverage at reasonable rates for our fleet. We may also be subject to calls, or premiums, in amounts based not only on our own claim records but also the claim records of all other members of the protection and indemnity associations through which we receive indemnity insurance coverage for tort liability. Our insurance policies also contain deductibles, limitations and exclusions which, although we believe are standard in the shipping industry, may nevertheless increase our costs in the event of a claim or decrease any recovery in the event of a loss. If the damages from a catastrophic oil spill or other marine disaster exceeded our insurance coverage, the payment of those damages could have a material adverse effect on our business and could possibly result in our insolvency.

In addition, we may not carry loss of hire insurance. Loss of hire insurance covers the loss of revenue during extended vessel off-hire periods, such as those that occur during an unscheduled drydocking due to damage to the vessel from accidents. Accordingly, any loss of a vessel or any extended period of vessel off-hire, due to an accident or otherwise, could have a material adverse effect on our business, financial condition and results of operations.

We may be subject to increased premium payments because we obtain some of our insurance through protection and indemnity associations.

We may be subject to increased premium payments, or calls, in amounts based not only on our and Free Bulkers S.A.'s (our "Manager") claim records but also the claim records of other members of the protection and indemnity associations through which we receive insurance coverage for tort liability, including pollution-related liability. Our protection and indemnity associations may not have enough resources to cover claims made against them. Our payment of these calls could result in significant expense to us, which could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Further declines in charter rates and other market deterioration could cause us to incur impairment charges.

We evaluate the recoverable amounts of our vessels to determine if events have occurred that would require an impairment of their carrying amounts. The recoverable amount of vessels is reviewed based on events and changes in circumstances that would indicate that the carrying amount of the assets might not be recovered. The review for potential impairment indicators and future undiscounted net operating cash flows related to the vessels is complex and requires us to make various estimates including future charter rates and earnings from the vessels which have been historically volatile.

When our estimate of future undiscounted net operating cash flows for any vessel is lower than the vessel's carrying value, the carrying value is written down, by recording a charge to operations, to the vessel's fair market value if the fair market value is lower than the vessel's carrying value. The carrying values of our vessels may not represent their fair market value because the market prices of secondhand vessels tend to fluctuate with changes in charter rates and the cost of newbuildings. Any impairment charges incurred as a result of declines in charter rates could have a material adverse effect on our business, results of operations, cash flows and financial condition.

We have failed to make payments due under our current contracts to purchase newbuilding vessels. As a result, the contracting shipyard has terminated one contract and could terminate the other contract or sell the vessel and, in either case, claim losses as a result of our default.

We have entered into contracts with a Chinese shipyard to purchase two newbuilding Handysize drybulk vessels, of approximately 33,600 dwt each, for an aggregate purchase price of approximately \$48.8 million (excluding extra costs of approximately \$1,080). As of December 31, 2011, we have paid the Chinese shipyard \$9.76 million in the aggregate. By letter dated February 25, 2012, the Company received notice from the shipyard that the Company had failed to pay the payment of \$3,660 due on February 11, 2012 under one of the contracts and was therefore in default under its obligations under this contract. The shipyard terminated this contract by notice dated April 28, 2012 to the Company.

If we do not renegotiate the payment terms under the remaining newbuilding contract, the shipyard could terminate it. In addition, the shipyard may claim losses incurred as a result of our default. In such event, we may not be able to reclaim the payments made by us. Further, the payment of any claims arising from such default and failure to successfully implement our fleet renewal plan could adversely affect our earnings, our financial conditions and our business opportunities. In addition, the Company's agreement with ABN AMRO Bank ("ABN AMRO") to finance these newbuilding vessels was terminated by ABN AMRO. Pursuant to a settlement agreement entered into on April 13, 2012, ABN AMRO agreed to return to the Company all commitment fees paid to date, totaling \$418 less legal fees, and all further obligations of the parties have been terminated. As a result, we no longer have financing committed for the remaining installments due under the remaining newbuilding contract, making it unlikely that we will be able to take delivery of this newbuilding.

Maritime claimants could arrest our vessels, which could interrupt our cash flow.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against a vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lien holder, such as our lenders, may enforce its lien by arresting a vessel through foreclosure proceedings. The arresting or attachment of one or more of our vessels could interrupt our cash flow and require us to pay large sums of funds to have the arrest lifted.

In addition, in some jurisdictions, such as South Africa, under the "sister ship" theory of liability, a claimant may arrest both the vessel which is subject to the claimant's maritime lien and any "associated" vessel, which is any vessel owned or controlled by the same owner or managed by the same manager. Claimants could try to assert "sister ship" liability against one of our vessels for claims relating to another of our vessels or a vessel managed by our Manager.

If we fail to manage our growth properly, we may not be able to successfully expand our market share.

We will continue exploring expansion opportunities as our financial resources permit. Our growth will depend on:

• locating and acquiring suitable vessels;

• placing newbuilding orders and taking delivery of vessels;

• identifying and consummating acquisitions or joint ventures;

integrating any acquired vessel successfully with our existing operations;

enhancing our customer base;

managing our expansion; and

obtaining the required financing.

If our financial resources permit, we could face risks in connection with growth by acquisition, such as undisclosed liabilities and obligations and difficulty experienced in obtaining additional qualified personnel, managing relationships with customers and suppliers, and integrating newly acquired operations into existing infrastructures.

We cannot give any assurance that we will be successful in executing our growth plans or that we will not incur significant expenses and losses in connection with the execution of those growth plans.

Our ability to successfully implement our business plan depends on our ability to obtain additional financing, which may affect the value of your investment in us.

We plan to continue to explore expansion opportunities. We will require substantial additional financing to fund any acquisitions of additional vessels and to implement our business plan. We cannot be certain that sufficient financing will be available on terms that are acceptable to us or at all. If we cannot raise the financing we need in a timely manner and on acceptable terms, we may not be able to acquire the vessels necessary to implement our business plans and consequently you may lose some or all of your investment in us.

While we expect that a significant portion of the financing resources needed to acquire vessels, if any, will be through long-term debt financing, we may raise additional funds through additional equity offerings. New equity investors may dilute the percentage of the ownership interest of our existing shareholders. Sales or the possibility of sales of substantial amounts of shares of our common stock in the public markets could adversely affect the market price of our common stock.

If we acquire additional drybulk carriers and those vessels are not delivered on time or are delivered with significant defects, our earnings and financial condition could suffer.

We expect to acquire additional vessels in the future. A delay in the delivery of any of these vessels to us or the failure of the contract counterparty to deliver a vessel at all could cause us to breach our obligations under a related time

charter and could adversely affect our earnings, our financial condition and the amount of dividends, if any, that we pay in the future. The delivery of these vessels could be delayed or certain events may arise which could result in us not taking delivery of a vessel, such as a total loss of a vessel, a constructive loss of a vessel, or substantial damage to a vessel prior to delivery. In addition, the delivery of any of these vessels with substantial defects could have similar consequences.

We currently rely on our Manager to manage and charter our fleet.

We currently have no employees and contract all of our financial, accounting, including our financial reporting and internal controls, and other back-office services, and the management of our fleet, including crewing, maintenance and repair, through our Manager. Our Manager has entered previously into a sub-management agreement with Safbulk, a company controlled by the Restis family, one of our shareholders, for the commercial management of our fleet, including negotiating and obtaining charters, relations with charter brokers and performance of post-charter activities. Such sub-management agreement was terminated in March 2012 and the Manager has commenced the provision of the commercial management of our fleet. We rely on our Manager to provide the technical management of our fleet and to attract charterers and charter brokers. The loss of its services or failure to perform its obligations could reduce our revenues and net income and adversely affect our operations and business if we are not able to contract with other companies to provide these services or take over these aspects of our business directly. FreeSeas has no control over our Manager. Our Manager is not liable to us for any losses or damages, if any, that may result from its management of our fleet unless the same shall have resulted from willful misconduct or gross negligence of our Manager or any person to whom performance of the management services has been delegated by our Manager. Pursuant to its agreement with us, our Manager's liability for such acts, except in certain limited circumstances, may not exceed ten times the annual management fee payable by the applicable subsidiary to our Manager. Although we may have rights against our Manager, if our Manager defaults on its obligations to us, we may have no recourse against our Manager. Further, we will need approval from our lenders if we intend to replace our Manager as our fleet manager.

If our Manager is unable to perform under its vessel management agreements with us, our results of operations may be adversely affected.

As we expand our fleet, we will rely on our Manager to recruit suitable additional seafarers and to meet other demands imposed on our Manager. We cannot assure you that our Manager will be able to meet these demands as we expand our fleet. If our Manager's crewing agents encounter business or financial difficulties, they may not be able to adequately staff our vessels. If our Manager is unable to provide the commercial and technical management service for our vessels, our business, results of operations, cash flows and financial position and our ability to pay dividends may be adversely affected.

We and one of our executive officers have affiliations with our Manager that could create conflicts of interest detrimental to us.

Our Chairman, Chief Executive Officer and President, Ion G. Varouxakis, is also the controlling shareholder and officer of our Manager. These dual responsibilities of our officer and the relationships between the two companies could create conflicts of interest between our Manager and us. Each of our operating subsidiaries has a nonexclusive management agreement with our Manager. Our Manager has subcontracted until March 2012, when the sub-agreement was terminated, the charter and post-charter management of our fleet to Safbulk, which is controlled by

FS Holdings Limited, one of our principal shareholders. Although our Manager currently serves as manager for vessels owned by us, our Manager is not restricted from entering into management agreements with other competing shipping companies. Our Manager could also allocate charter and/or vessel purchase and sale opportunities to others. There can be no assurance that our Manager would resolve any conflicts of interest in a manner beneficial to us.

Management and service fees are payable to our Manager, regardless of our profitability, which could have a material adverse effect on our business, financial condition and results of operations.

The management and service fees due from us to our Manager are payable whether or not our vessels are employed, and regardless of our profitability. We have no ability to require our Manager to reduce the management fees and service fees if our profitability decreases, which could have a material adverse effect on our business, financial condition and results of operations.

Our Manager is a privately held company, and there is little or no publicly available information about it.

The ability of our Manager to continue providing services for our benefit will depend in part on its own financial strength. Circumstances beyond our control could impair our Manager's financial strength. Because our Manager is privately held, it is unlikely that information about its financial strength would become public or available to us prior to any default by our Manager under the management agreement. As a result, an investor in us might have little advance warning of problems that affect our Manager, even though those problems could have a material adverse effect on us.

Because our seafaring employees are covered by collective bargaining agreements, failure of industry groups to renew those agreements may disrupt our operations and adversely affect our earnings.

All of the seafarers employed on the vessels in our fleet are covered by collective bargaining agreements that set basic standards. We cannot assure you that these agreements will prevent labor interruptions. Any labor interruptions could disrupt our operations and harm our financial performance.

Crew costs are a significant expense for us under our charters. Recently, the limited supply of and increased demand for well-qualified crew, due to the increase in the size of the global shipping fleet, has created upward pressure on crewing costs, which we generally bear under our period time and spot charters. Increases in crew costs may adversely affect our profitability.

Increases in interest rates would reduce funds available to purchase vessels and service debt.

We have purchased, and may purchase in the future, vessels with loans that provide for periodic interest payments based on indices that fluctuate with changes in market interest rates. If interest rates increase significantly, it would increase our costs of financing our acquisition of vessels, which could decrease the number of additional vessels that we could acquire and adversely affect our financial condition and results of operations and may adversely affect our ability to service debt.

The derivative contracts we have entered into to hedge our exposure to fluctuations in interest rates could result in higher than market interest rates and charges against our income.

We have entered into two interest rate swaps for purposes of managing our exposure to fluctuations in interest rates applicable to indebtedness under two of our credit facilities with Credit Suisse, which provide for a floating interest rate based on LIBOR. Our hedging strategies, however, may not be effective and we may incur substantial losses if interest rates move materially differently from the fixed rates agreed to in our derivative contracts. Since our existing interest rate swaps do not, and future derivative contracts may not, qualify for treatment as hedges for accounting purposes, we recognize fluctuations in the fair value of such contracts in our income statement. In addition, our financial condition could be materially adversely affected to the extent we do not hedge our exposure to interest rate fluctuations under our financing arrangements. Any hedging activities we engage in may not effectively manage our interest rate exposure or have the desired impact on our financial conditions or results of operations.

From time to time in the future, we may take positions in derivative instruments including freight forward agreements, or FFAs. FFAs and other derivative instruments may be used to hedge a vessel owner's exposure to the charter market by providing for the sale of a contracted charter rate along a specified route and period of time. Upon settlement, if the contracted charter rate is less than the average of the rates, as reported by an identified index, for the specified route and time period, the seller of the FFAs is required to pay the buyer an amount equal to the difference between the contracted rate and the settlement rate, multiplied by the number of days in the specified period. Conversely, if the contracted rate is greater than the settlement rate, the buyer is required to pay the seller the settlement sum. If we take positions in FFAs or other derivative instruments and do not correctly anticipate charter rate movements over the specified route and time period, we could suffer losses in the settling or termination of the FFA. This could adversely affect our results of operation and cash flow. As of the date of this annual report, we had no FFAs outstanding.

Economic conditions and regulatory pressures impacting banks in Greece may cause disruptions to one of our lenders, which may cause an increase in the cost of our borrowings from that lender.

One of our lenders is FBB, located in Greece. As a result of the recent financial crisis in Greece, Greek banks have been under significant pressure from the applicable banking regulators to increase capital, increase earnings or merge with other banks. There can be no assurances that our banking relationship with FBB would continue if FBB were to merge with another bank or that FBB might not attempt to invoke provisions in our loan agreement that permits it to pass along increases in its cost of regulations. In either event, our financial condition and results of operations could be materially adversely affected.

We are a holding company, and we will depend on the ability of our subsidiaries to distribute funds to us in order to satisfy our financial obligations or to make dividend payments.

We are a holding company and our subsidiaries, which are all wholly owned by us, conduct all of our operations and own all of our operating assets. We have no significant assets other than the equity interests in our wholly owned subsidiaries. As a result, our ability to make dividend payments depends on our subsidiaries and their ability to distribute funds to us. We and our subsidiaries will be permitted to pay dividends to us only for so long as we are in compliance with all applicable financial covenants, terms and conditions of our debt. In addition, we and our subsidiaries are subject to limitations on the payment of dividends under Marshall Islands laws. In 2009, we suspended the payment of cash dividends on our common stock because of prevailing economic conditions and to comply with restrictions in certain of our loan agreements. Because economic conditions remain uncertain, and because we are focusing on the renewal of our fleet, we have determined not to resume the payment of cash dividends at this time.

As part of its services to us, our Manager must continue to upgrade its operational, accounting and financial systems, and add more staff. If our Manager cannot upgrade these systems or recruit suitable additional employees, its services to us and, therefore, our performance may suffer.

Our current operating, accounting and financial systems are provided by our Manager and may not be adequate if our Manager's efforts to improve those systems may be ineffective. If our Manager cannot continue to upgrade its operational and financial systems effectively or recruit suitable employees, its services to us and, therefore, our performance may suffer and our ability to expand our business further will be restricted.

We and our Manager may be unable to attract and retain key executive officers with experience in the shipping industry, which may reduce the effectiveness of our management and lower our results of operations.

Our success depends to a significant extent upon the abilities and efforts of our and our Manager's executive officers. The loss of any of these individuals could adversely affect our business prospects and financial condition. Our success will depend on retaining these key members of our and our Manager's management team. Difficulty in retaining our executive officers, and difficulty in our Manager retaining its executive officers, could adversely affect our results of operations and ability to pay dividends. We do not maintain "key man" life insurance on any of our officers.

The aging of our fleet may result in increased operating costs in the future, which could adversely affect our ability to operate our vessels profitably.

The majority of our vessels were acquired second-hand, and we estimate their useful lives to be 28 years from their date of delivery from the yard, depending on various market factors and management's ability to comply with government and industry regulatory requirements. As of December 31, 2011, the average age of the vessels in our current fleet was 14 years. Part of our business strategy includes the continued acquisition of second hand vessels when we find attractive opportunities.

In general, expenditures necessary for maintaining a vessel in good operating condition increase as a vessel ages. Second hand vessels may also develop unexpected mechanical and operational problems despite adherence to regular survey schedules and proper maintenance. Cargo insurance rates also tend to increase with a vessel's age, and older vessels tend to be less fuel-efficient than newer vessels. While the difference in fuel consumption is factored into the freight rates that our older vessels earn, if the cost of bunker fuels were to increase significantly, it could disproportionately affect our vessels and significantly lower our profits. In addition, changes in governmental regulations, safety or other equipment standards may require:

• expenditures for alterations to existing equipment;

• the addition of new equipment; or

• restrictions on the type of cargo a vessel may transport.

We cannot give assurances that future market conditions will justify such expenditures or enable us to operate our vessels profitably during the remainder of their economic lives.

Although we inspect the secondhand vessels that we acquire prior to purchase, this inspection does not provide us with the same knowledge about a vessel's condition and the cost of any required (or anticipated) repairs that we would have had if this vessel had been built for and operated exclusively by us. Generally, we do not receive the benefit of warranties on secondhand vessels.

Unless we set aside reserves or are able to borrow funds for vessel replacement, at the end of a vessel's useful life our revenue will decline, which would adversely affect our business, results of operations and financial condition.

Unless we maintain reserves or are able to borrow or raise funds for vessel replacement, we may be unable to replace the vessels in our fleet upon the expiration of their useful lives, which we expect to be 28 years from their date of delivery from the yard. Our cash flows and income are dependent on the revenues earned by the chartering of our vessels to customers. If we are unable to replace the vessels in our fleet upon the expiration of their useful lives, our business, results of operations, financial condition and ability to pay dividends will be materially and adversely affected. Any reserves set aside for vessel replacement may not be available for dividends.

If any of our vessels fail to maintain their class certification and/or fail any annual survey, intermediate survey, dry-docking or special survey, that vessel would be unable to carry cargo, thereby reducing our revenues and profitability and violating certain loan covenants of our third-party indebtedness.

The hull and machinery of every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and the Safety of Life at Sea Convention, or SOLAS.

A vessel must undergo annual surveys, intermediate surveys, dry-dockings and special surveys. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Our vessels are on special survey cycles for hull inspection and continuous survey cycles for machinery inspection. Every vessel is also required to be dry-docked every two to three years for inspection of the underwater parts of such vessel.

If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, dry-docking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable, thereby reducing our revenues and profitability. That could also cause us to be in violation of certain covenants in our loan agreements. In addition, the cost of maintaining our vessels' classifications may be substantial at times and could result in reduced revenues.

Our vessels may suffer damage and we may face unexpected dry-docking costs, which could affect our cash flow and financial condition.

If our vessels suffer damage, they may need to be repaired at a dry-docking facility, resulting in vessel downtime and vessel off-hire. The costs of dry-dock repairs are unpredictable and can be substantial. We may have to pay dry-docking costs that our insurance does not cover. The inactivity of these vessels while they are being repaired and repositioned, as well as the actual cost of these repairs, would decrease our earnings. In addition, space at dry-docking facilities is sometimes limited and not all dry-docking facilities are conveniently located. We may be unable to find space at a suitable dry-docking facility or we may be forced to move to a dry-docking facility that is not conveniently located to our vessels' positions. The loss of earnings while our vessels are forced to wait for space or to relocate to dry-docking facilities that are farther away from the routes on which our vessels trade would also decrease our earnings.

The smuggling of drugs or other contraband onto our vessels may lead to governmental claims against us.

We expect that our vessels will call in ports in South America and other areas where smugglers are known to attempt to hide drugs and other contraband on vessels, with or without the knowledge of crew members. To the extent our vessels are found with contraband, whether inside or attached to the hull of our vessel and whether with or without the knowledge of any of our crew, we may face governmental or other regulatory claims which could have an adverse effect on our business, results of operations, cash flows and financial condition.

Rising fuel prices may adversely affect our profits.

Upon redelivery of vessels at the end of a period time or trip time charter, we may be obligated to repurchase bunkers on board at prevailing market prices, which could be materially higher than fuel prices at the inception of the charter period. In addition, although we rarely deploy our vessels on voyage charters, fuel is a significant, if not the largest, expense that we would incur with respect to vessels operating on voyage charter. As a result, an increase in the price of fuel may adversely affect our profitability. The price and supply of fuel is volatile and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by OPEC and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns and regulations.

Our Board of Directors has determined to suspend the payment of cash dividends as a result of the prevailing market conditions in the international shipping industry and our financial condition. Until such market conditions and our financial condition improve, it is not likely that we will reinstate the payment of dividends.

In light of a lower freight environment and a highly challenging financing environment, which has adversely affected our results of operations and our compliance with our debt obligations, our Board of Directors, beginning in February 2009, suspended the cash dividend on our common stock. Our dividend policy will be assessed by our Board of Directors from time to time; however, it is not likely that we will reinstate the payment of dividends until market conditions improve. In addition, our loan agreements do not allow us to pay dividends without the prior written approval of our lenders. See “Item 5. Operating and Financial Review and Prospects.” Therefore, there can be no assurance that, if we were to determine to resume paying cash dividends, our lenders would provide any required consent.

Because we generate all of our revenues in U.S. dollars but will incur a portion of our expenses in other currencies, exchange rate fluctuations could have an adverse impact on our results of operations.

We generate all of our revenues in U.S. dollars, but we expect that portions of our future expenses will be incurred in currencies other than the U.S. dollar. This difference could lead to fluctuations in our net income due to changes in the value of the dollar relative to the other currencies, in particular the Euro. Expenses incurred in foreign currencies against which the dollar falls in value can increase, decreasing net income. Although for the year ended December 31, 2010 and for the year ended December 31, 2011, the fluctuation in the value of the dollar against foreign currencies did not have a material impact on us.

We may have to pay tax on United States source income, which would reduce our earnings.

Under the laws of the countries of our and our subsidiaries incorporation and/or vessels' registration, we are not subject to tax on international shipping income; however, we are subject to registration and tonnage taxes, which have been included in "Vessel operating expenses" in our consolidated statement of operations. Pursuant to the Internal Revenue Code of the United States, or the Code, U.S. source income from the international operations of ships is generally exempt from U.S. tax if the company operating the ships meets both of the following requirements, (1) more than 50% of the value of our stock is owned, directly or indirectly, by "qualified shareholders," which includes persons (i) who are "residents" of our country of organization or of another foreign country that grants an "equivalent exemption" to corporations organized in the United States, and (ii) who comply with certain documentation requirements, which we refer to as the "Qualified Shareholder Ownership Test," or (2) our stock is primarily and regularly traded on one or more established securities markets in our country of organization, in another country that grants an "equivalent exemption" to United States corporations, or in the United States, which we refer to as the "Publicly-Traded Test;" and we are not considered "closely held," which we refer to as the "Closely-Held Test;"

To complete the exemption process, our shipowning subsidiaries must file a U.S. tax return, state the basis of their exemption and obtain and retain documentation attesting to the basis of their exemptions. Our subsidiaries will complete the filing process for 2011 on or prior to the applicable tax filing deadline.

All of our ship-operating subsidiaries currently satisfy the Publicly-Traded Test based on the trading volume and the widely-held ownership of our common stock, but no assurance can be given that this will remain so in the future, since continued compliance with this rule is subject to factors outside our control. Based on our U.S. source Shipping Income for 2009, 2010 and 2011, we would be subject to U.S. federal income tax of approximately \$159, \$34, and \$93 respectively, in the absence of an exemption under Section 883.

U.S. tax authorities could treat us as a "passive foreign investment company," which could have adverse U.S. federal income tax consequences to U.S. holders.

A foreign corporation will be treated as a "passive foreign investment company," or PFIC, for U.S. federal income tax purposes if either (1) at least 75% of its gross income for any taxable year consists of certain types of "passive income" or (2) at least 50% of the average value of the corporation's assets produce or are held for the production of those types of "passive income." For purposes of these tests, "passive income" includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties other than rents and royalties which are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services does not constitute "passive income." U.S. shareholders of a PFIC are subject to a disadvantageous U.S. federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC and the gain, if any, they derive from the sale or other disposition of their shares in the PFIC.

Based on our currently anticipated operations, we do not believe that we will be a PFIC with respect to any taxable year. In this regard, we intend to treat the gross income we derive or are deemed to derive from our time chartering activities as services income, rather than rental income. Accordingly, we believe that our time chartering activities does not constitute “passive income,” and the assets that we own and operate in connection with the production of that income do not constitute passive assets.

There is, however, no direct legal authority under the PFIC rules addressing our proposed method of operation, and a federal court decision has characterized income received from vessel time charters as rental rather than services income for U.S. tax purposes. Accordingly, no assurance can be given that the U.S. Internal Revenue Service, or IRS, or a court of law will accept our position, and there is a risk that the IRS or a court of law could determine that we are a PFIC. Moreover, no assurance can be given that we would not constitute a PFIC for any future taxable year if there were to be changes in the nature and extent of our operations.

If the IRS were to find that we are or have been a PFIC for any taxable year, our U.S. shareholders will face adverse U.S. tax consequences. Under the PFIC rules, unless those shareholders make an election available under the Code (which election could itself have adverse consequences for such shareholders), such shareholders would be liable to pay United States federal income tax at the then prevailing income tax rates on ordinary income plus interest upon excess distributions and upon any gain from the disposition of our common stock, as if the excess distribution or gain had been recognized ratably over the shareholder’s holding period of our common stock.

Risks Related to the Common Stock

The market price of our common stock has been and may in the future be subject to significant fluctuations.

The market price of our common stock has been and may in the future be subject to significant fluctuations as a result of many factors, some of which are beyond our control. Among the factors that have in the past and could in the future affect our stock price are:

• quarterly variations in our results of operations;

• our lenders' willingness to extend our loan covenant waivers, if necessary;

• changes in market valuations of similar companies and stock market price and volume fluctuations generally;

• changes in earnings estimates or publication of research reports by analysts;

• speculation in the press or investment community about our business or the shipping industry generally;

• strategic actions by us or our competitors such as acquisitions or restructurings;

• the thin trading market for our common stock, which makes it somewhat illiquid;

• the current ineligibility of our common stock to be the subject of margin loans because of its low current market price;

• regulatory developments;

• additions or departures of key personnel;

• general market conditions; and

• domestic and international economic, market and currency factors unrelated to our performance.

The stock markets in general, and the markets for drybulk shipping and shipping stocks in particular, have experienced extreme volatility that has sometimes been unrelated to the operating performance of individual companies. These broad market fluctuations may adversely affect the trading price of our common stock.

As long as our stock price remains below \$5.00 per share, our shareholders will face restrictions in using our shares as collateral for margin accounts. Further, if our stock price remains below \$1.00 or our market capitalization falls below \$5 million, we may be subject to delisting or be forced to take action to cure this problem.

The last reported sale price of our common stock on the NASDAQ Global Market on May 4, 2012 was \$1.11 per share. If the market price of our shares of common stock remains below \$5.00 per share, under Federal Reserve regulations and account maintenance rules of many brokerages, our shareholders will face restrictions in using such shares as collateral for borrowing in margin accounts. These restrictions on the use of our common stock as collateral may lead to sales of such shares creating downward pressure on and increased volatility in, the market price of our shares of common stock. In addition, many institutional investors will not invest in stocks whose prices are below \$5.00 per share. Under the rules of the NASDAQ Stock Market, listed companies have historically been required to maintain a share price of at least \$1.00 per share and if the share price declines below \$1.00 for a period of 30 consecutive business days, then the listed company would have a cure period of at least 180 days to regain compliance with the \$1.00 per share minimum. If our share price remains below \$1.00 for a period of 30 consecutive days, we may be required to take action, such as a reverse stock split, in order to comply with NASDAQ rules that may be in effect at the time. We are also required to maintain a minimum market capitalization of \$5 million. We may raise additional equity capital at the market and/or in privately negotiated transactions. The effect of this may be to depress our share price and dilute our shareholders' investment and there can be no assurance that these actions will have a positive impact on our share price or market capitalization. In the event we are not able to cure and regain compliance with the \$1.00 share or \$5 million market capitalization minimum, we may be delisted from NASDAQ. If a delisting of our common stock happens it could result in our shares being illiquid and our shareholders may find it difficult to sell our common stock. A delisting may also further depress the value of our common stock.

On December 9, 2011, we received a deficiency letter from NASDAQ stating that, because our common stock has not maintained a minimum bid price of \$1.00 per a share for the last 30 consecutive business days, the Company was no longer in compliance with NASDAQ Listing Rule Section 5450(a)(1). In order to regain compliance, the Company had until June 4, 2012 for the closing bid price of its common stock to meet or exceed \$1.00 for a minimum of 10 consecutive business days. On January 6, 2012, the Company received a deficiency letter from NASDAQ stating that, because the Company has not maintained a minimum Market Value of Publicly Held Shares (the "MVPHS") of \$5,000,000 for the last 30 consecutive business days, the Company is no longer in compliance with NASDAQ Listing Rule Section 5450(b)(1)(C). In order to regain compliance, the Company had until July 2, 2012 for the Company's MVPHS to meet or exceed \$5,000,000 for a minimum of 10 consecutive business days. By letter dated February 29, 2012, the Company received notice from NASDAQ that it has regained compliance with Listing Rules 5450(a)(1) and 5450(b)(1)(C), since for the last 10 consecutive business days, from February 14, 2012 to February 28, 2012, the closing bid price of the Company's common stock has been at \$1.00 per share or greater and the Company's minimum market value of publicly held shares has been \$5 million or greater, respectively.

Future sales or issuances of our stock could cause the market price of our common stock to decline.

Issuance of a substantial number of shares of our common stock in the public or private offerings or in payment of obligations due, or the perception that these issuances could occur, may depress the market price for our common stock. These issuances could also impair our ability to raise additional capital through the sale of our equity securities in the future. We may issue additional shares of our common stock in the future and our shareholders may elect to sell large numbers of shares held by them from time to time. Also, we may need to raise additional capital to achieve our business plans.

Because the Republic of the Marshall Islands, where we are incorporated, does not have a well-developed body of corporate law, shareholders may have fewer rights and protections than under typical United States law, such as Delaware, and shareholders may have difficulty in protecting their interest with regard to actions taken by our Board of Directors.

Our corporate affairs are governed by amended and restated articles of incorporation and by-laws and by the Marshall Islands Business Corporations Act, or BCA. The provisions of the BCA resemble provisions of the corporation laws of a number of states in the United States. However, there have been few judicial cases in the Republic of the Marshall Islands interpreting the BCA. The rights and fiduciary responsibilities of directors under the law of the Republic of the Marshall Islands are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain U.S. jurisdictions. Shareholder rights may differ as well. For example, under Marshall Islands law, a copy of the notice of any meeting of the shareholders must be given not less than 15 days before the meeting, whereas in Delaware such notice must be given not less than 10 days before the meeting. Therefore, if immediate shareholder action is required, a meeting may not be able to be convened as quickly as it can be convened under Delaware law. Also, under Marshall Islands law, any action required to be taken by a meeting of shareholders may only be taken without a meeting if consent is in writing and is signed by all of the shareholders entitled to vote, whereas under Delaware law action may be taken by consent if approved by the number of shareholders that would be required to approve such action at a meeting. Therefore, under Marshall Islands law, it may be more difficult for a company to take certain actions without a meeting even if a majority of the shareholders approve of such action. While the BCA does specifically incorporate the non-statutory law, or judicial case law, of the State of Delaware and other states with substantially similar legislative provisions, public shareholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling shareholders than would shareholders of a corporation incorporated in a U.S. jurisdiction.

It may not be possible for investors to enforce U.S. judgments against us.

We, and all our subsidiaries, are or will be incorporated in jurisdictions outside the U.S. and substantially all of our assets and those of our subsidiaries will be located outside the U.S. In addition, most of our directors and officers are or will be non-residents of the U.S., and all or a substantial portion of the assets of these non-residents are or will

be located outside the U.S. As a result, it may be difficult or impossible for U.S. investors to serve process within the U.S. upon us, our subsidiaries, or our directors and officers, or to enforce a judgment against us for civil liabilities in U.S. courts. In addition, you should not assume that courts in the countries in which we or our subsidiaries are incorporated or where our or the assets of our subsidiaries are located would enforce judgments of U.S. courts obtained in actions against us or our subsidiaries based upon the civil liability provisions of applicable U.S. federal and state securities laws or would enforce, in original actions, liabilities against us or our subsidiaries based on those laws.

Provisions in our organizational documents, our management agreement and under Marshall Islands corporate law could make it difficult for our shareholders to replace or remove our current Board of Directors or have the effect of discouraging, delaying or preventing a merger or acquisition, which could adversely affect the market price of our common stock.

Several provisions of our amended and restated articles of incorporation and by-laws, and certain provisions of the Marshall Islands corporate law, could make it difficult for our shareholders to change the composition of our Board of Directors in any one year, preventing them from changing the composition of management. In addition, these provisions may discourage, delay or prevent a merger or acquisition that shareholders may consider favorable. These provisions include:

- authorizing our Board of Directors to issue “blank check” preferred stock without shareholder approval;
- providing for a classified Board of Directors with staggered, three year terms;
- prohibiting cumulative voting in the election of directors;
- authorizing the removal of directors only for cause and only upon the affirmative vote of the holders of a two-thirds majority of the outstanding shares of our common shares, voting as a single class, entitled to vote for the directors;

• limiting the persons who may call special meetings of shareholders;

• establishing advance notice requirements for election to our Board of Directors or proposing matters that can be acted on by shareholders at shareholder meetings; and

• limiting our ability to enter into business combination transactions with certain shareholders.

Pursuant to the terms of our management agreement, our Manager is entitled to a termination fee if such agreement is terminated upon a “change of control,” which term includes, but is not limited to, the election of a director not recommended by the then-current Board of Directors, any person or entity or group of affiliated persons or entities that becomes a beneficial owner of 15% or more of our voting securities, a merger of FreeSeas where less than a majority of the shares of the resulting entity are held by the FreeSeas shareholders or the sale of all or substantially all of FreeSeas’ assets. The termination fee as of December 31, 2011 would be approximately \$101 million. In addition, we have implemented a shareholder rights plan pursuant to which the holders of our common stock receive one right to purchase one one-thousandth of a share of our Series A Participating Preferred Stock at an exercise price of \$90.00 per share, subject to adjustment. The rights become exercisable upon the occurrence of certain change in control events. These provisions and our shareholder rights plan could substantially impede the ability of public shareholders to benefit from a change in control and, as a result, may adversely affect the market price of our common shares and your ability to realize any potential change of control premium.

ITEM 4. INFORMATION ON THE COMPANY

Our Organization and Corporate Structure

We were incorporated on April 23, 2004 under the name “Adventure Holdings S.A.” pursuant to the laws of the Republic of the Marshall Islands to serve as the parent holding company of our ship-owning entities. On April 27, 2005, we changed our name to “FreeSeas Inc.”

We became a public reporting company on December 15, 2005, when we completed a merger with Trinity Partners Acquisition Company Inc., or Trinity, a blank check company formed to serve as a vehicle to complete a business combination with an operating business, in which we were the surviving corporation. At the time of the merger we owned three drybulk carriers. We currently own nine vessels, each of which is owned through a separate wholly owned subsidiary.

In January 2007, Ion G. Varouxakis purchased all of the common stock owned by our two other co-founding shareholders. He simultaneously sold a portion of the common stock owned by him to FS Holdings Limited, an entity controlled by the Restis family, and to certain other investors. Immediately following these transactions, our Board of Directors appointed Ion G. Varouxakis Chairman of the Board and President, our two other co-founding shareholders and one other director resigned from the Board of Directors, and two new directors were appointed to fill the vacancies.

On September 30, 2010, our shareholders approved a five-to-one reverse split of our outstanding common stock effective October 1, 2010.

As of December 31, 2011, we had outstanding 6,475,625 shares of our common stock.

Our common stock currently trades on the NASDAQ Global Market under the trading symbol “FREE”.

Our principal executive offices are located at 10, Eleftheriou Venizelou Street (Panepistimiou Ave.), 10671, Athens, Greece and our telephone number is 011-30-210-452-8770.

Capital Expenditures and Divestitures

During the last three fiscal years, our capital expenditures and divestitures related to our efforts to renew and expand our fleet were as follows:

On November 8, 2011, the Company sold the *M/V Free Lady*, a 2003-built, 50,246 dwt Handymax dry bulk vessel, for a sale price of \$21.9 million. From the net proceeds of the sale, the Company paid on November 8, 2011 the amount of \$19.8 million constituting prepayment towards the Credit Suisse loan facility.

On May 13, 2011, the Company sold the *M/V Free Envoy*, a 1984 built 26,318 dwt Handysize dry bulk vessel for a sale price of \$4.2 million and recognized a gain of \$1,561 as a result of the sale. From the net proceeds of the sale, the Company paid on May 13, 2011 an amount of \$3.7 million constituting prepayment towards the Deutsche Bank Nederland loan facility B. According to the loan terms, all future installments have been reduced to nil until the balloon payment due in November 2012.

We have entered into contracts with a Chinese shipyard to purchase two newbuilding Handysize drybulk vessels, of approximately 33,600 dwt each, for an aggregate purchase price of approximately \$48.8 million (excluding extra costs of approximately \$1,080). The vessels are scheduled for delivery in the second and third quarters of 2012. As of December 31, 2011, we have paid the Chinese shipyard \$9.76 million in the aggregate. By letter dated February 25, 2012, the Company received notice from the shipyard pursuant to its newbuilding contracts that the Company had failed to pay the payment of \$3,660 due on February 11, 2012 under one of the contracts and was therefore in default under its obligations under this contract. The shipyard terminated this contract by notice dated April 28, 2012 to the Company. If we do not renegotiate the payment terms under the remaining newbuilding contract, the shipyard could terminate it. In addition, the shipyard may claim losses incurred as a result of our default. In such event, we may not be able to reclaim the payments made by us. Further, the payment of any claims arising from such default and failure to successfully implement our fleet renewal plan could adversely affect our earnings, our financial conditions and our business opportunities. In addition, the Company's agreement with ABN AMRO to finance these newbuilding vessels was terminated by ABN AMRO. Pursuant to a settlement agreement entered into on April 13, 2012, ABN AMRO agreed to return to the Company all commitment fees paid to date, totaling \$418 less legal fees, and all further obligations of the parties have been terminated. As a result, we no longer have financing committed for the remaining installments due under the remaining newbuilding contract, making it unlikely that we will be able to take delivery of this newbuilding.

On July 30, 2010, we entered into an agreement to sell the *M/V Free Destiny* for a price of \$3,213. The vessel was delivered to the buyers on August 27, 2010 and we recognized a gain of \$807.

- On August 5, 2009, we purchased the *M/V Free Neptune* from an unaffiliated third party for approximately \$11 million and related purchase costs of \$302.

Our Fleet

We are an international drybulk shipping company incorporated under the laws of the Republic of the Marshall Islands with principal executive offices in Athens, Greece. Our existing fleet consists of six Handysize vessels and two Handymax (one of which was sold on November 8, 2011) vessels that carry a variety of drybulk commodities, including iron ore, grain and coal, which are referred to as “major bulks,” as well as bauxite, phosphate, fertilizers, steel products, cement, sugar and rice, or “minor bulks.” As of December 31, 2011, the aggregate dwt of our operational fleet was approximately 197,200 dwt and the average age of our fleet was approximately 14 years.

Our investment and operational focus is in the Handysize sector, which is generally defined as less than 40,000 dwt of carrying capacity. Handysize vessels are, we believe, more versatile in the types of cargoes that they can carry and trade routes they can follow, and offer less volatile returns than larger vessel classes. We believe this segment also offers better demand and supply demographics than other drybulk asset classes.

We have contracted the management of our fleet to our Manager, Free Bulkiers S.A., an entity controlled by Ion G. Varouxakis, our Chairman, President and Chief Executive Officer, and one of our principal shareholders. Our Manager provides technical management of our fleet, financial reporting and accounting services and office space. Our Manager has subcontracted until March 2012 the charter and post-charter management of our fleet to Safbulk Pty Ltd., a company controlled by the Restis family, which also is one of our shareholders. Such sub-management agreement was terminated in March 2012 and the Manager has resumed the commercial management of our fleet. While the Manager is responsible for finding and arranging charters for our vessels, the final decision to charter our vessels remains with us.

All of our vessels are currently being chartered in the spot market. The following table details the vessels in our fleet as of October 12, 2012:

Vessel Name	Type	Built	Dwt	Employment
M/V Free Jupiter	Handymax	2002	47,777	About 65-70 day time charter trip at \$6,000 per day for the first 70 days and \$9,500 per day thereafter, through October/November 2012
M/V Free Knight	Handysize	1998	24,111	About 20-25 day time charter trip at \$3,750 per day for the first 45 days and \$8,000 per day thereafter, through October 2012
M/V Free Maverick	Handysize	1998	23,994	About 30 day time charter trip at \$7,500 per day through October 2012
M/V Free Impala	Handysize	1997	24,111	Awaiting orders

M/V Free Neptune	Handysize	1996	30,838	About 20-25 day time charter trip at \$4,850 per day through October/November 2012
M/V Free Hero	Handysize	1995	24,318	About 20-25 day time charter trip at \$5,000 per day through October/November 2012
M/V Free Goddess	Handysize	1995	22,051	Following her release from pirates, continued her time charter trip at \$10,000 per day through November 2012

On October 11, 2012, the Company announced that all 21 crew members of the M/V *Free Goddess* are reported safe and well after the vessel's release by her hijackers. The M/V *Free Goddess* had been hijacked by Somali pirates on February 7, 2012 while transiting the Indian Ocean eastbound. The vessel was on a time charter trip at the time she was hijacked. Under the charterparty agreement, the BIMCO Piracy clause was applied, which provided among other things, for the charterers to have the vessel covered with kidnap and ransom insurance and loss of hire insurance. The vessel was also covered by the war risk underwriters, who confirmed cover. The Company is in arbitration proceedings with the charterer due to the charterer not fulfilling its obligations under the charterparty agreement.

Competitive Strengths

We believe that we possess a number of strengths that provide us with a competitive advantage in the drybulk shipping industry, including:

Positive macro environment. The broader shipping sector is currently at a cyclical low and poised for a significant upswing in a positive macroeconomic environment. Several key market indicators support increased seaborne dry trade, including growing Chinese and Japanese iron ore and coal imports as well as strengthening Indian demand for thermal coal imports. Industrial production in emerging and developing economies constitutes a major driving force and is expected to generate enhanced demand for dry bulk commodities in the near term. The rising world population and economic recovery in the importing regions are also expected to contribute to the overall growth of the seaborne dry bulk trade.

Solid Handysize fundamentals. We are strategically well positioned to take advantage of the growing Handysize fleet shortage. Approximately 42% of the worldwide Handysize fleet is over 21 years old, and nearing the end of its useful life, making it considerably older than any other fleet type. In addition, Handysize fleet growth is expected to be less than half the growth of any other vessel type. Operationally, Handysize vessels are more versatile than other drybulk vessels. Their shallow draft allows for access to smaller ports unserviceable by larger Panamax and Capesize vessels, and they are equipped with on-board cranes, enabling entry into ports with inadequate loading and discharging facilities.

Experienced management team. We have benefited from the expertise of our executive officers, including that of Ion G. Varouxakis, our Chairman, President and Chief Executive Officer, and that of our Manager's personnel, which consists of seasoned shipping professionals with long-standing experience in the industry. We believe that our management team has a proven track record of strong performance throughout a challenging economic climate, as we have actively and decisively renewed our fleet while reducing operating costs without sacrificing quality or safety in the process.

Business Strategy

Our primary objectives are to profitably grow our business and maximize value to our shareholders by pursuing the following strategies:

Optimize our fleet. Our fleet of drybulk carriers consists of Handysize and Handymax vessels. Given the relatively low number of Handysize drybulk vessels on order, and a relatively great number of Handysize drybulk vessels at an age of 20 years or older, we believe there will be continued demand for such vessels. Handysize vessels are typically shallow-drafted and equipped with onboard cranes. This makes them more versatile and able to access a wider range of loading and discharging ports than larger ships that are unable to service many ports due to their size or the lack of local port infrastructure. Many countries in the Asia Pacific region, including China, as well as countries in Africa and South America, have shallow ports. We believe that our vessels, and any Handysize that we may acquire, should enable us to transport a wider variety of cargoes and to pursue a greater number of chartering opportunities than if we owned larger drybulk vessels. Handysize vessels have also historically achieved greater charter rate stability than larger drybulk vessels. Since prices for vessels have fallen considerably since the middle of 2008, we may periodically encounter opportunities to acquire high quality, high specification secondhand vessels or newbuildings for attractive prices. We perform a technical review and financial analysis of each potential acquisition and only purchase vessels as market conditions and opportunities dictate and warrant. Furthermore, as part of our fleet renewal program, we will continue to sell vessels in order to renew our fleet when we believe it is in our and our stakeholders' best interests.

Build upon strategic relationships. We intend to continue to build upon our extensive experience and relationships with ship brokers, financial institutions, industrial partners and commodity traders. We use these relationships to identify chartering and acquisition opportunities and gain access to sources of additional financing, industry contacts and market intelligence. Our current specialization in a single asset class allows us to not only monitor markets with a single measure, but also makes us a partner of choice for businesses that have a need or requirement for a Handysize

specialist.

Vessel Employment

We have employed and continue to employ our vessels in the spot charter market, under trip time charters and period time charters.

A trip time charter is a short-term time charter for a voyage between load port(s) and discharge port(s) under which the charterer pays fixed daily hire rate on a semi-monthly basis for use of the vessel. A period time charter is charter for a vessel for a fixed period of time at a set daily rate. Under trip time charters and time charters, the charterer pays voyage expenses. Under all three types of charters, the vessel owners pay for vessel operating expenses, which include crew costs, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs. The vessel owners are also responsible for each vessel's dry-docking and intermediate and special survey costs. Lastly, vessels can be chartered under "bareboat" contracts whereby the charterer is responsible for the vessel's maintenance and operations, as well as all voyage expenses.

Vessels operating on period time charter provide more predictable cash flows, but can yield lower profit margins than vessels operating in the spot market during periods characterized by favorable market conditions. Vessels operating in the spot market generate revenues that are less predictable but may enable us to increase profit margins during periods of increasing drybulk charter rates. However, we would then be exposed to the risk of declining drybulk charter rates, which may be higher or lower than the rates at which we chartered our vessels. We are constantly evaluating opportunities for period time charters, but only expect to enter into additional period time charters if we can obtain contract terms that satisfy our criteria.

Although we have not previously done so, we may from time to time utilize forward freight agreements that enable us to enter into contractual obligations to sell the spot charter forward and thereby reduce our exposure to a potential deterioration of the charter market.

Customers

During 2011, we derived approximately 46% of our gross revenues from three charterers, and during 2010, we derived approximately 42% of our gross revenues from three charterers. We believe that our customer base is composed of established charterers.

Management of Operations and Fleet

Pursuant to our amended and restated services agreement with our Manager, our operations are executed and supervised by our Manager, based on the strategy devised by the board of directors and subject to the approval of our board of directors as described below. We paid a monthly fee of \$118.5, (on the basis that the dollar/Euro exchange rate is 1.35 or lower; if on the last business day of each month the dollar/Euro exchange rate exceeds 1.35 then the service fee payable will be adjusted for the following month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.35 dollar/Euro exchange rate) as compensation for services (described below) related to accounting, financial reporting, implementation of Sarbanes-Oxley internal control over financial reporting procedures and general administrative and management services. Effective June 1, 2011, the monthly fee increased to \$136.3. Our Manager is also entitled to a termination fee if the agreement is terminated upon a “change of control” as defined in the services agreement. The termination fee as of December 31, 2011 would have been \$100,525.

Our Manager provides us with the following services:

General Administration. Our Manager provides us with general administrative, office and support services necessary for our operations and our fleet, including technical and clerical personnel, communication, accounting, and data processing services.

Financial Accounting Services. Our Manager maintains our books, records and accounts and provides all services as are necessary for the preparation and maintenance of the our accounting records in accordance with U.S. GAAP, preparing and filing financial statements with the SEC and NASDAQ in accordance with applicable financial reporting requirements, and developing, implementing, monitoring and assessing our internal controls;

Sale and Purchase of Vessels. Our Manager advises our board of directors when opportunities arise to purchase, including through newbuildings, or to sell any vessels. All decisions to purchase or sell vessels require the approval of our board of directors. Any purchases or sales of vessels approved by our board of directors are arranged and completed by our Manager. This involves the appointment of superintendents to inspect and take delivery of vessels and to monitor compliance with the terms and conditions of the purchase contracts.

We also contract the technical and commercial management of our vessels to our Manager. Our Manager has a separate management contract with each of our ship-owning subsidiaries and provides a wide range of services on a fixed fee per vessel basis, as described below. These services include vessel operations, maintenance, regulatory compliance, crewing, supervising dry-docking and repairs, arranging insurance for vessels, vessel supplying, advising on the purchase and sale of vessels, and performing certain accounting and other administrative services, including financial reporting and internal controls requirements. Pursuant to our amended management agreement with our Manager, we pay our Manager a monthly technical management fee of \$16.5 (on the basis that the dollar/Euro exchange rate is 1.30 or lower; if on the first business day of each month the dollar/Euro exchange rate exceeds 1.30 then the management fee payable will be increased for the month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.30 dollar/Euro exchange rate) plus a fee of \$0.4 per day for superintendant attendance and other direct expenses. Effective June 1, 2011, the monthly technical management fee increased to \$18.975.

We also pay our Manager a fee equal to 1.25% of the gross freight or hire from the employment of FreeSeas' vessels and a 1% commission on the gross purchase price of any new vessel acquired or the gross sale price of any vessel sold by FreeSeas with the assistance of our Manager. Our Manager had previously entered into an agreement with Safbulk, for the provision of charter and post-charter services for our fleet. Such sub-management agreement was terminated in March 2012 and the Manager has resumed the commercial management of our fleet. Additionally, we pay our Manager a monthly fee of \$118.5 as compensation for services related to accounting, financial reporting, implementation of Sarbanes-Oxley internal control over financial reporting procedures and general administrative and management services plus expenses. Effective June 1, 2011, the monthly compensation has been increased to \$136.275.

Our Manager currently manages all of our vessels and we anticipate that our Manager will manage any additional vessels we may acquire in the future.

We believe that we pay our Manager industry-standard fees for these services.

Crewing and Employees

We currently have no employees, our Manager is responsible for employing all of the executive officers and staff to execute and supervise the operations. In addition, our Manager is responsible for recruiting, either directly or through a crewing agent, the senior officers and all other crew members for our vessels.

Long-Term Debt

We and our subsidiaries are parties to various loan facilities secured by our vessels. Please see “Item 5. Operating and Financial Review and Prospects – Long-Term Debt” for a description of these facilities, our current non-compliance with our obligations and covenants under the facility agreements, and the status of our efforts to restructure the terms of these agreements.

All the Company’s credit facilities bear interest at LIBOR plus a margin, ranging from 2.25% to 4.25%, and are secured by mortgages on the financed vessels and assignments of vessels’ earnings and insurance coverage proceeds. They also include affirmative and negative financial covenants of the borrowers, including maintenance of operating accounts, minimum cash deposits, average cash balances to be maintained with the lending banks and minimum ratios for the fair values of the collateral vessels compared to the outstanding loan balances. Each borrower is restricted under its respective loan agreement from incurring additional indebtedness, changing the vessels’ flag without the lender’s consent or distributing earnings. The weighted average interest rate for the year ended December 31, 2011 and 2010 was 2.9% and 3%, respectively. Interest expense incurred under the above loan agreements amounted to \$3,173 (net of capitalized interest \$282), \$3,932 and \$3,708 for the years ended December 31, 2011, 2010 and 2009, respectively, and is included in “Interest and Finance Costs” in the consolidated statements of operations.

Charter Hire Rates

Charter hire rates fluctuate by varying degrees among drybulk carrier size categories. The volume and pattern of trade in a small number of commodities (major bulks) affect demand for larger vessels. Therefore, charter rates and vessel values of larger vessels often show greater volatility. Conversely, trade in a greater number of commodities (minor bulks) drives demand for smaller drybulk carriers. Accordingly, charter rates and vessel values for those vessels are subject to less volatility.

Charter hire rates paid for drybulk carriers are primarily a function of the underlying balance between vessel supply and demand, although at times other factors may play a role. Furthermore, the pattern seen in charter rates is broadly

mirrored across the different charter types and the different drybulk carrier categories. However, because demand for larger drybulk vessels is affected by the volume and pattern of trade in a relatively small number of commodities, charter hire rates (and vessel values) of larger ships tend to be more volatile than those for smaller vessels.

In the time charter market, rates vary depending on the length of the charter period and vessel specific factors such as age, speed and fuel consumption.

In the voyage charter market, rates are influenced by cargo size, commodity, port dues and canal transit fees, as well as commencement and termination regions. In general, a larger cargo size is quoted at a lower rate per ton than a smaller cargo size. Routes with costly ports or canals generally command higher rates than routes with low port dues and no canals to transit. Voyages with a load port within a region that includes ports where vessels usually discharge cargo or a discharge port within a region with ports where vessels load cargo also are generally quoted at lower rates, because such voyages generally increase vessel utilization by reducing the unloaded portion (or ballast leg) that is included in the calculation of the return charter to a loading area.

Within the drybulk shipping industry, the charter hire rate references most likely to be monitored are the freight rate indices issued by the Baltic Exchange. These references are based on actual charter hire rates under charters entered into by market participants as well as daily assessments provided to the Baltic Exchange by a panel of major shipbrokers.

Property

In June 2011, we relocated our principal offices to Athens, Greece and we reimbursed the Manager in an amount equal to \$144 (equivalent of Euro 100) for the expenses incurred in relation to this relocation and early termination cost for previous lease agreement. In addition, we entered into an agreement with our Manager pursuant to which we agreed to pay our Manager 65% of the rents due from our Manager to the lessor of our rented office space, commencing in June 2011, and 65% of the apportioned common expenses and maintenance expenses.

Competition

We operate in markets that are highly competitive and based primarily on supply and demand. Ownership of drybulk carriers is highly fragmented and is divided among approximately 1,200 drybulk carrier owners. We compete for charters on the basis of price, vessel location, size, age and condition of the vessel, as well as on our reputation. There are many drybulk shipping companies which are publicly traded on the U.S. stock markets, such as DryShips Inc., Diana Shipping Inc., Eagle Bulk Shipping Inc., Euroseas Ltd., Excel Maritime Carriers Ltd. and Baltic Trading Limited, which are significantly larger than we are and have substantially more capital, more and larger vessels, personnel, revenue and profits and which are in competition with us. There is no assurance that we can successfully

compete with such companies for charters or other business.

Our Manager arranges our charters (whether spot charters, period time charters, bareboat charters or pools) through the use of brokers, who negotiate the terms of the charters based on market conditions. We compete with other owners of drybulk carriers in the, Handysize and Handymax sectors. Charters for our vessels are negotiated by our Manager utilizing a worldwide network of shipbrokers. These shipbrokers advise our Manager on a continuous basis of the availability of cargo for any particular vessel. There may be several shipbrokers involved in any one charter. The negotiation for a charter typically begins prior to the completion of the previous charter in order to avoid any idle time. The terms of the charter are based on industry standards.

Seasonality

Coal, iron ore and grains, which are the major bulks of the drybulk shipping industry, are somewhat seasonal in nature. The energy markets primarily affect the demand for coal, with increases during hot summer periods when air conditioning and refrigeration require more electricity and towards the end of the calendar year in anticipation of the forthcoming winter period. The demand for iron ore tends to decline in the summer months because many of the major steel users, such as automobile makers, reduce their level of production significantly during the summer holidays. Grains are completely seasonal as they are driven by the harvest within a climate zone. Because three of the five largest grain producers (the United States of America, Canada and the European Union) are located in the northern hemisphere and the other two (Argentina and Australia) are located in the southern hemisphere, harvests occur throughout the year and grains required drybulk shipping accordingly.

Environmental and Other Regulations

Government regulation and laws significantly affects the ownership and operation of our vessels. The vessels are subject to international conventions and treaties, national, state and local laws and regulations in force in the countries in which our vessels may operate or are registered, including those governing the management and disposal of hazardous substances and wastes, the cleanup of oil spills and other contamination, air emissions, and water discharges and ballast water management.

A variety of governmental and private entities subject our vessels to both scheduled and unscheduled inspections. These entities include the local port authorities (United States Coast Guard, harbor master or equivalent), classification societies, flag state administration (country of registry) and charterers. Certain of these entities require us to obtain permits, licenses, financial assurances and certificates for the operation of our vessels. Failure to maintain necessary permits or approvals could require us to incur substantial costs or result in the temporary suspension of operation of one or more of our vessels.

We believe that the heightened level of environmental and quality concerns among insurance underwriters, regulators and charterers is leading to greater inspection and safety requirements on all vessels and may accelerate the scrapping of older vessels throughout the industry. Increasing environmental concerns have created a demand for vessels that conform to the stricter environmental standards. We are required to maintain operating standards for all of our vessels that will emphasize operational safety, quality maintenance, continuous training of its officers and crews and compliance with U.S. and international regulations. We believe that the operation of our vessels is in substantial compliance with applicable environmental laws and regulations; however, because such laws and regulations are frequently changed and may impose increasingly stricter requirements, such future requirements may limit our ability to do business, increase our operating costs, force the early retirement of our vessels, and/or affect their resale value, all of which could have a material adverse effect on our financial condition and results of operations.

International Maritime Organization

The International Maritime Organization, or IMO, the United Nations agency for maritime safety and the prevention of pollution by ships, has adopted the International Convention for the Prevention of Marine Pollution, 1973, as modified by the related Protocol of 1978, or the MARPOL Convention, which has been updated through various amendments. The MARPOL Convention establishes environmental standards relating to oil leakage or spilling, garbage management, sewage, air emissions, handling and disposal of noxious liquids and handling of harmful substances in packaged forms. The IMO adopted regulations that set forth pollution prevention requirements applicable to drybulk carriers. These regulations have been adopted by over 150 nations, including many of the jurisdictions in which our vessels operate.

In September 1997, the IMO adopted Annex VI to the MARPOL Convention to address air pollution from ships. Annex VI sets limits on sulfur oxide and nitrogen oxide emissions from ship exhausts and prohibits deliberate emissions of ozone depleting substances, such as chlorofluorocarbons. Annex VI also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions. In October 2008, IMO adopted amendments to Annex VI regarding particulate matter, nitrogen oxide, and sulfur oxide emission standards that apply as of July 1, 2010. Among other things, the Annex VI amendments will progressively reduce sulfur oxide emissions from ships, with the global sulfur cap reduced initially to 3.50% (from the current 4.50%), effective from January 2012; then progressively to 0.50%, effective from January 2020. The limits applicable in Sulfur Emission Control Areas (SECAs) will be reduced to 1.00%, beginning on July 2010 (from the current 1.50%); being further reduced to 0.10%, effective from January 2015. The United States ratified the Annex VI amendments in October 2008, thereby rendering its emission standards equivalent to IMO requirements. As a result, Annex VI entered into force for the United States in January 2009. In March 2010, the IMO designated the area extending 200 miles from the territorial sea baseline adjacent to the Atlantic/Gulf and Pacific coasts of the United States and Canada, the main Hawaiian Islands, and the French Territories of St. Pierre and Miquelon as an Emission Control Area. The new SECA will enter into force in August 2011 and become legally enforceable in August 2012. New requirements associated with the SECA may increase the cost of operation of our vessels in U.S. and Canadian waters. Other SECAs may be designated, and the jurisdictions in which our vessels operate may adopt more stringent emission standards independent of IMO. We believe we are in substantial compliance with current Annex VI requirements, but we may incur costs to comply with the new standards in future years.

The operation of our vessels is also affected by the requirements set forth in the IMO's Management Code for the Safe Operation of Ships and Pollution Prevention, or the ISM Code. The ISM Code requires shipowners and bareboat charterers to develop and maintain an extensive "Safety Management System" that includes the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe operation and describing procedures for dealing with emergencies. The failure of a shipowner or management company to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels, and may result in a denial of access to, or detention in, certain ports. Currently, each of our vessels is ISM Code-certified. However, there can be no assurance that such certification will be maintained indefinitely.

Additional or new conventions, laws and regulations may also be adopted that could adversely affect our ability to operate our vessels.

The U.S. Oil Pollution Act of 1990

The United States Oil Pollution Act of 1990, or OPA, established an extensive regulatory and liability regime for the protection and clean up of the environment from oil spills. OPA affects all owners and operators whose vessels trade in the United States, its territories and possessions or whose vessels operate in waters of the United States, which includes the United States' territorial sea and its 200 nautical mile exclusive economic zone. The United States has also enacted the Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, which applies to the discharge of hazardous substances other than oil, whether on land or at sea. Both OPA and CERCLA affect our

operations.

Under OPA, vessel owners, operators, charterers and management companies are “responsible parties” and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and removal costs and other damages arising from discharges or threatened discharges of oil from their vessels, including bunkers (fuel). Effective July 31, 2009, the U.S. Coast Guard adjusted the limits of OPA liability for drybulk vessels to the greater of \$1000 per gross ton or \$854,400 and established a procedure for adjusting the limits for inflation every three years. CERCLA contains a liability scheme that is similar to that under the OPA, and liability under CERCLA is limited to the greater of \$300 per gross ton or \$5 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$0.5 million for any other vessel. These limits of liability do not apply if an incident was directly caused by violation of applicable U.S. federal safety, construction or operating regulations or by a responsible party’s gross negligence or willful misconduct, or if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with oil removal activities. In response to the 2010 oil spill in the Gulf of Mexico resulting from the explosion of the *Deepwater Horizon* drilling rig, bills have been introduced in the U.S. Congress to increase the limits of OPA liability for all vessels.

OPA requires owners and operators of vessels to establish and maintain with the United States Coast Guard evidence of financial responsibility sufficient to meet their potential liabilities under OPA. Under the regulations, vessel owners and operators may evidence their financial responsibility by showing proof of insurance, surety bond, self-insurance, or guaranty. Upon satisfactory demonstration of financial responsibility, a Certificate of Financial Responsibility, or COFR, is issued by the United States Coast Guard. This certificate must be carried aboard the vessel to comply with these financial responsibility regulations. We have complied with these financial responsibility regulations by obtaining and carrying COFRs for each of our vessels that operate in U.S. waters, currently the M/V *Free Goddess*, the M/V *Free Impala* and the M/V *Free Jupiter*. We may incur additional costs to obtain COFRs for additional vessels, if required, and to comply with increased limits of liability in the future.

OPA specifically permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, and some states have enacted legislation providing for unlimited liability for oil spills. In some cases, states, which have enacted such legislation, have not yet issued implementing regulations defining vessels owners’ responsibilities under these laws. We currently comply, and intend to continue to comply in the future, with all applicable state regulations in the ports where our vessels call. We currently maintain pollution liability coverage as part of our protection and indemnity insurance for each of our vessels in the amount of \$1 billion per incident. If the damages from a catastrophic pollution liability incident exceed our insurance coverage, the payment of those damages may materially decrease our net income.

The United States Clean Water Act

The United States Clean Water Act, or CWA, prohibits the discharge of oil or hazardous substances in navigable waters and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under the OPA and CERCLA.

The United States Environmental Protection Agency, or EPA, regulates the discharge of ballast water and other wastewater incidental to the operation of a vessel under the CWA. EPA regulations require vessels greater than 79 feet in length (excluding commercial fishing vessels) to obtain coverage under the Vessel General Permit, or VGP, to discharge ballast water and other wastewaters into U.S. waters by submitting a Notice of Intent. We have submitted Notices of Intent for all of our vessels. The new VGP requires vessel owners and operators to comply with a range of best management practices, reporting, and other requirements, for various types of discharges and incorporates United States Coast Guard requirements for ballast water management and exchange. In order to remain covered by the VGP, vessels must comply with numerous inspection, monitoring, reporting and recordkeeping requirements. Vessel owners/operators must, among other things, conduct and document routine self-inspection to track compliance with the VGP, and must conduct a comprehensive vessel inspection every 12 months. As part of a settlement of a lawsuit challenging the VGP, EPA has recently agreed to propose a new VGP with numerical restrictions on organisms in ballast water discharges by November 2011. Compliance with the current VGP and any new VGP could require the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures at potentially substantial cost, and/or otherwise restrict our vessels from entering U.S. waters.

Other Environmental Initiatives

In waters of the European Union, our vessels are subject to regulation European Union-level directives implemented by the various nations through laws and regulations of these requirements. These laws and regulations prescribe measures to prevent pollution, protect the environment, and support maritime safety. For instance, the European Union has adopted directives that require member states to refuse access to their ports to certain sub-standard vessels, according to vessel type, flag, and number of previous detentions. Member states must inspect at least 25% of vessels using their ports annually and provide increased surveillance of vessels posing a high risk to maritime safety or the marine environment. If deficiencies are found that are clearly hazardous to safety, health or the environment, the state is required to detain the vessel until the deficiencies are addressed. Member states are also required to implement a system of penalties for breaches of these standards.

The EU's directive on the sulfur content of fuels restricts the maximum sulfur content of marine fuels used in vessels operating in EU member states' exclusive economic zones. Under this directive, our vessels may need to make expenditures to comply with the sulfur fuel content limits in the marine fuel they use in order to avoid delays or other

obstructions to their operations. The EU has also issued a directive adopting the IMO's standards for the maximum sulfur content of marine fuels used in special sulfur oxide Emission Control Areas, or ECAs, in the Baltic Sea, the North Sea, and for any other seas or ports the IMO may designate as sulfur oxide ECAs 12 months after the date of entry into force of the designation. These and other related requirements may increase our costs of operating and may affect financial performance.

In 2005, the European Union adopted a directive on ship-source pollution. In October 2009, the European Union amended the directive to impose criminal sanctions for illicit ship-source discharges of polluting substances, including minor discharges, if committed with intent, recklessly, or with serious negligence and the discharges individually or in the aggregate result in deterioration of the quality of water. The directive could result in criminal liability for pollution from vessels in waters of European countries that adopt implementing legislation. Criminal liability for pollution may result in substantial penalties or fines and increased civil liability claims.

The European Union is currently considering proposals to further regulate vessel operations. Individual countries in the European Union may also have additional environmental and safety requirements. It is difficult to predict what legislation or regulation, if any, may be adopted by the European Union or any other country or authority.

Although the United States is not a party thereto, many countries have ratified and currently follow the liability plan adopted by the IMO and set out in the International Convention on Civil Liability for Oil Pollution Damage of 1969, or the 1969 Convention. Under this convention, and depending on whether the country in which the damage results is a party to the 1992 Protocol to the International Convention on Civil Liability for Oil Pollution Damage, a vessel's registered owner is strictly liable for pollution damage caused in the territorial waters of a contracting state by discharge of persistent oil, subject to certain complete defenses. The limits on liability outlined in the 1992 Protocol use the International Monetary Fund currency unit of Special Drawing Rights, or SDR. Under an amendment to the 1992 Protocol that became effective in November 2003, for vessels of 5,000 to 140,000 gross tons, liability is limited to approximately 4.51 million SDR plus 631 SDR for each additional gross ton over 5,000. For vessels of over 140,000 gross tons, liability is limited to 89.77 million SDR. The exchange rate between SDRs and U.S. dollars was 0.632939 SDR per U.S. dollar on March 28, 2011. Under the 1969 Convention, the right to limit liability is forfeited where the spill is caused by the owner's actual fault; under the 1992 Protocol, a shipowner cannot limit liability where the spill is caused by the owner's intentional or reckless conduct. Vessels trading in jurisdictions that are parties to these conventions must provide evidence of insurance covering the liability of the owner. In jurisdictions where the 1969 Convention has not been adopted, including the United States, various legislative schemes or common law govern, and liability is imposed either on the basis of fault or in a manner similar to that convention. We believe that our protection and indemnity insurance will cover the liability under the plan adopted by the IMO.

The U.S. National Invasive Species Act, or NISA, was enacted in 1996 in response to growing reports of harmful organisms being released into U.S. ports through ballast water taken on by ships in foreign ports. The United States Coast Guard adopted regulations under NISA that impose mandatory ballast water management practices for all vessels equipped with ballast water tanks entering U.S. waters. These requirements can be met by performing mid-ocean ballast exchange, which is the exchange of ballast water on the waters beyond the exclusive economic zone from an area more than 200 miles from any shore, by retaining ballast water on board the ship or by using environmentally sound alternative ballast water management methods approved by the United States Coast Guard. However, mid-ocean ballast exchange is mandatory for ships heading to the Great Lakes or Hudson Bay. Mid-ocean ballast exchange is the primary method for compliance with the United States Coast Guard regulations, since holding ballast water can prevent ships from performing cargo operations upon arrival in the United States, and alternative methods are still under development. Vessels that are unable to conduct mid-ocean ballast exchange due to voyage or safety concerns may discharge minimum amounts of ballast water (in areas other than the Great Lakes and the Hudson River), provided that they comply with recordkeeping requirements and document the reasons they could not follow the required ballast water management requirements. The Coast Guard has issued proposed standards for ballast water discharge, which could set maximum acceptable discharge limits for various invasive species, or lead to requirement for active treatment of ballast water. Compliance with any new regulations could require the installation of equipment on our vessels to treat ballast water before it is discharged or arranging for disposal at port facilities at potentially substantial costs.

At the international level, the IMO adopted an International Convention for the Control and Management of Ships' Ballast Water and Sediments, or the BWM Convention, in February 2004. The BWM Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits. The BWM Convention will not be in force until 12 months after it has been adopted by 30 countries, the combined merchant fleets of which represent not less than 35% of the gross tonnage of the world's merchant shipping. As of April 18, 2012, the BWM Convention has been adopted by 27 states, representing approximately 25.32% of the world's tonnage. Despite the lack of ratification, the Marine Environment Protection Committee of IMO passed a resolution in March 2010 calling upon those countries that have ratified the treaty to encourage the installation of ballast water management systems.

Greenhouse Gas Regulation

In February 2005, the Kyoto Protocol to the United Nations Framework on Climate Change, or Kyoto Protocol, entered into force. Under the Kyoto Protocol, adopting countries are required to implement national programs to reduce emissions of certain gases, generally referred to as greenhouse gases, which are suspected of contributing to global warming. Currently, emissions of greenhouse gases from international shipping are not subject to the Kyoto Protocol. At the December 2010 meeting of the United Nations Climate Change Conference in Cancun, the IMO proposed measures to control greenhouse gas emissions from international shipping. The EU indicated that if the IMO did not decide how to address greenhouse gas emissions from international shipping before December 2010, the EU would include international shipping in its emissions trading scheme. The IMO is currently evaluating various mandatory measures to reduce greenhouse gas emissions from international shipping, including market-based mechanisms and energy efficiency standards. In the United States, the EPA has issued a finding that greenhouse gases threaten public health and safety and has adopted regulations governing the emission of greenhouse gases from motor

vehicles and large stationary sources. The EPA may decide in the future to regulate greenhouse gas emissions from ships and is considering a petition from the California Attorney General to regulate greenhouse gas emissions from ocean-going vessels.

Any passage of climate change legislation or other regulatory initiatives by the IMO, the European Union, the United States or other countries where we operate that restrict emissions of greenhouse gases could require us to make significant financial expenditures that we cannot predict with any certainty at this time.

Vessel Security Regulation

Since the terrorist attacks of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security. On November 25, 2002, the Maritime Transportation Security Act of 2002, or MTSA, came into effect. To implement certain portions of the MTSA, in July 2003, the United States Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States of America. Similarly, in December 2002, amendments to SOLAS created a new chapter of the convention dealing specifically with maritime security. The new chapter went into effect in July 2004, and imposes various detailed security obligations on vessels and port authorities, most of which are contained in the newly created ISPS Code.

Among the various requirements are:

- on-board installation of automatic information systems, to enhance vessel-to-vessel and vessel-to-shore communications;

- on-board installation of ship security alert systems;
- the development of vessel security plans; and
- compliance with flag state security certification requirements.

The United States Coast Guard regulations, intended to align with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures provided such vessels have on board, by July 1, 2004, a valid International Ship Security Certificate that attests to the vessel's compliance with SOLAS security requirements and the ISPS Code. Our vessels are in compliance with the various security measures addressed by the MTSA, SOLAS and the ISPS Code. We do not believe these additional requirements will have a material financial impact on our operations.

Inspection by Classification Societies

The hull and machinery of every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and SOLAS.

A vessel must undergo annual surveys, intermediate surveys, dry-dockings and special surveys. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Our vessels are on special survey cycles for hull inspection and continuous survey cycles for machinery inspection. Every vessel is also required to be dry-docked every two to three years for inspection of the underwater parts of such vessel. If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, dry-docking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable. That could cause us to be in violation of certain covenants in our loan agreements.

At an owner's application, the surveys required for class renewal may be split according to an agreed schedule to extend over the entire period of class. This process is referred to as continuous class renewal.

All areas subject to survey as defined by the classification society are required to be surveyed at least once per class period, unless shorter intervals between surveys are prescribed elsewhere. The period between two subsequent surveys of each area must not exceed five years.

Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified as “in class” by a classification society which is a member of the International Association of Classification Societies. Our vessels are certified as being “in class” by their respective classification societies all of which are members of the International Association of Classification Societies.

The table below lists the next dry-docking and special surveys scheduled for our each vessel in our fleet, to the extent such dates are known as of the date of this annual report:

Vessel	Next Intermediate Dry-docking	Next Special Survey Dry-docking
M/V <i>Free Goddess</i>	Third quarter 2013	Third quarter 2015
M/V <i>Free Hero</i>	Third quarter 2013	Third quarter 2015
M/V <i>Free Impala</i>	Second quarter 2015	Second quarter 2012
M/V <i>Free Jupiter</i>	Second quarter 2015	Second quarter 2012
M/V <i>Free Knight</i>	Second quarter 2016	Second quarter 2013
M/V <i>Free Maverick</i>	First quarter 2016	First quarter 2013
M/V <i>Free Neptune</i>	Fourth quarter 2014	Third quarter 2016

ISM and ISPS certifications have been awarded to all of our vessels and to the Manager by either the vessel’s flag country or a member of the International Association of Classification Societies.

Risk of Loss and Liability Insurance

General

The operation of any cargo vessel includes risks such as mechanical failure, physical damage, collision, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. OPA, which imposes virtually unlimited liability upon owners, operators and bareboat charterers of any vessel trading in the exclusive economic zone of the United States of America for certain oil pollution accidents in the United States of America, has made liability insurance more expensive for ship owners and operators trading in the United States of America market. While we believe that our present insurance coverage is adequate, not all risks can be insured, and there can be no guarantee that any specific claim will be paid, or that we will always be able to obtain adequate insurance coverage at reasonable rates.

Hull and Machinery Insurance

We have obtained marine hull and machinery and war risk insurance, which include the risk of actual or constructive total loss, for all of our vessels. The vessels are each covered up to at least their fair market values or such higher amounts as may be required to meet the requirements of any outstanding indebtedness on a particular vessel, with deductibles in amounts of approximately \$100 to \$200.

Protection and Indemnity Insurance

Protection and indemnity insurance is provided by mutual protection and indemnity associations, or P&I associations, which covers our third-party liabilities in connection with our shipping activities. This includes third-party liability and other related expenses of injury or death of crew, passengers and other third parties, loss or damage to cargo, claims arising from collisions with other vessels, damage to other third-party property, pollution arising from oil or other substances, and salvage, towing and other related costs, including wreck removal. Protection and indemnity insurance is a form of mutual indemnity insurance, extended by protection and indemnity mutual associations, or “clubs.”

Our current protection and indemnity insurance coverage for pollution is \$1 billion per vessel per incident. The 14 P&I associations that comprise the International Group insure approximately 90% of the world’s commercial tonnage and have entered into a pooling agreement to reinsure each association’s liabilities. Each P&I association has capped its exposure to this pooling agreement at \$5.4 billion. As a member of a P&I association, which is a member of the International Group, we are subject to calls payable to the associations based on its claim records as well as the claim records of all other members of the individual associations and members of the pool of P&I associations comprising the International Group.

Loss of Hire Insurance

With the exception of kidnap and ransom insurance and its loss of hire extension (described below), we have not obtained loss of hire insurance for any of our vessels. Loss of hire insurance generally provides coverage against loss of charter hire that result from the loss of use of a vessel. We will review annually whether obtaining and/or maintaining this insurance is cost effective. Our ability to obtain loss of hire insurance is subject to market conditions and general availability.

Kidnap and Ransom

We have kidnap and ransom insurance on a case by case basis, generally when one of our vessels is transitioning in an area where acts of piracy are known to take place. Kidnap and ransom insurance generally provides coverage of ransom paid, including interest if ransom money are through financing products and including delivery expense of ransom, fees of negotiators and crisis management personnel and the cost of reinstatement of replacement crew. The loss of hire extension covers the insured for any hire lost during seizure for a certain number of days that have been agreed on at the inception of the coverage, typically either 90, 120 or 180 days.

Procedures in the Event of an Insured Event

Marine casualties are an inherent risk in the shipping industry. If one of our vessels undergoes a marine casualty, we intend to take prompt action in consultation with the appropriate insurers, as described above, to ascertain the extent of any damage to our vessel, its cargo, the crew, the vessel's ability to complete its charter and any environmental impact and the appropriate steps to try to mitigate the impact of the casualty on our financial condition and results of operations.

Legal Proceedings

We are not and have not been involved in any legal proceedings that have, or have had, a significant effect on our business, financial position, results of operations or liquidity, nor are we aware of any proceedings that are pending or threatened that may have significant effect on our business, financial position, results of operations or liquidity. From time to time, we may be subject to legal proceedings and claims in the ordinary course of business, principally personal injury and property casualty claims. We expect that these claims would be covered by insurance, subject to customary deductibles. Those claims, even if lacking in merit, could result in the expenditure of significant financial and managerial resources.

Exchange Controls

Under Marshall Islands law, there are currently no restrictions on the export or import of capital, including foreign exchange controls or restrictions that affect the remittance of dividends, interest or other payments to non-resident holders of our common stock.

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following management's discussion and analysis should be read in conjunction with our historical consolidated financial statements and accompanying notes included elsewhere in this report. This discussion contains forward-looking statements that reflect our current views with respect to future events and financial performance. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, such as those set forth in the section entitled "Risk Factors" and elsewhere in this report.

The historical consolidated financial results of FreeSeas described below are presented, unless otherwise stated, in thousands of United States dollars.

Overview

Our fleet currently consists of six Handysize vessels and one Handymax vessel that carry a variety of drybulk commodities, including iron ore, grain and coal, which are referred to as "major bulks," as well as bauxite, phosphate, fertilizers, steel products, cement, sugar and rice, or "minor bulks." As of April 30, 2012, the aggregate dwt of our operational fleet is approximately 197,200 dwt and the average age of our fleet is approximately 14.6 years.

Our investment focus is in the Handysize sector. Handysize vessels are, we believe, more versatile in the types of cargoes that they can carry and trade routes they can follow, and offer less volatile returns than larger vessel classes. We believe this segment also offers better demand and supply demographics than other drybulk asset classes. We may, however, acquire larger drybulk vessels if desirable opportunities arise.

We have contracted the management of our fleet to our Manager. Our Manager provides technical management of our fleet, commercial management of our fleet, financial reporting and accounting services and office space. While the Manager is responsible for finding and arranging charters for our vessels, the final decision to charter our vessels remains with us.

Recent Developments

The following are recent developments of the Company through the date of filing this Amended Form 20-F:

On May 11, 2012, we entered into a Standby Equity Distribution Agreement (the “SEDA”) with YA Global Master SPV Ltd. (“YA Global”), a fund managed by Yorkville Advisors, LLC, pursuant to which, for a 24-month period, we have the right to sell up to \$3,200 of shares of the Company’s common stock. The SEDA entitles us to sell and obligates YA Global to purchase, from time to time over a period of 24 months, shares of our common stock for cash consideration up to an aggregate of \$3,200, subject to conditions we must satisfy as set forth in the SEDA. For each share of common stock purchased under the SEDA, YA Global will pay 96% of the lowest daily volume weighted average price during the pricing period, which is the five consecutive trading days after we deliver an advance notice to YA Global. Each such advance may be for an amount not to exceed the greater of \$200 or 100% of the average daily trading volume of our common stock for the 10 consecutive trading days prior to the notice date. We registered the resale by YA Global of up to 1,839,721 shares of our common stock. As of the date of this report, we had sold 1,739,721 shares of our common stock under the SEDA for aggregate proceeds of \$432. Pursuant to the terms of the SEDA, we cannot deliver any further advance notices until such time as we file and have declared effective a new registration statement covering the resale of additional shares of our common stock by YA Global.

On May 31, 2012, FreeSeas entered a Sixth Supplemental Agreement with Credit Suisse AG, or Credit Suisse, which amends and restates the Facility Agreement dated December 24, 2007, as amended, between FreeSeas and Credit Suisse. The Sixth Supplemental Agreement, among other things, modifies the Facility Agreement to:

- Defer further principal repayments until March 31, 2014;

Reduce the interest rate on the facility to LIBOR plus 1% until March 31, 2014 from a current interest margin of 3.25%;

- Release restricted cash of \$1,125;

Waive compliance through March 31, 2014 with the requirement to maintain a minimum ratio of aggregate fair market value of the financed vessels to loan balance, after which date the required minimum ratio will be 115% beginning April 1, 2014, 120% beginning October 1, 2014, and 135% beginning April 1, 2015;

Establish certain financial covenants, including an interest coverage ratio, which must be complied with starting January 1, 2013, a consolidated leverage ratio, which must be complied with starting January 1, 2014, and a minimum liquidity ratio, which must be complied with starting July 1, 2014; and

Require the amount of any "Excess Cash," as determined in accordance with the Facility Agreement at each fiscal quarter end beginning June 30, 2012, to be applied to pay the amendment and restructuring fee described below and prepay the outstanding loan balance, depending on FreeSeas' compliance at the time with the vessel market value to loan ratio and the outstanding balance of the loan.

As of the date of this report, the outstanding balance under the Facility Agreement totaled \$36,450. An amendment and restructuring fee equal to 5% of the current outstanding indebtedness, \$1,823, will be due and payable on the earlier of March 31, 2014, the date of a voluntary prepayment, or the date the loan facility becomes due or is repaid in full. FreeSeas is also no longer required to sell additional vessels, as it had been under the terms of the Facility Agreement as previously in effect.

On July 11, and August 22, 2012, the Company received notices from FBB according to which failure to (i) pay the \$2,513 repayment installment due in June 2012 (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. The Company is in discussions to permanently amend the amortization schedule.

On August 10, 2012, pursuant to the approval of our Board of Directors at its April 2012 meeting, we issued 1,660,694 shares of our common stock our Manager in payment of the \$926 in unpaid fees due to the Manager for the first quarter of 2012 and 159,712 shares of our common stock to our four non-executive directors in payment of \$31 each in unpaid Board fees for the last three quarters of 2011.

On August 21, 2012, pursuant to the terms of a Note Purchase Agreement dated May 11, 2012 between us and YA Global, we raised an aggregate of \$250 from the sale of a promissory note pursuant to the Note Purchase Agreement. The note is repayable in 10 equal weekly installments and matures 90 days from the date of funding.

On September 7, 2012, we and certain of our subsidiaries entered into an amended and restated facility agreement with Deutsche Bank N.V. ("Deutsche Bank"). The amended and restated facility will be effective upon the filing of amended and restated mortgages on the M/V *Free Maverick* and M/V *Free Knight*, which filings are currently in process. As amended and restated, the facility agreement:

- Defers and reduces the balloon payment of \$16,009 due on Facility B from November 2012 to December 2015;

Edgar Filing: FREESEAS INC. - Form 20-F/A

Provides for monthly repayments of \$20 for each of Facility A and Facility B commencing September 30, 2012 through April 30, 2013 and a monthly repayment of \$11.5 for each of Facility A and Facility B on May 31, 2013;

· Suspends principal repayments from June 1, 2013 through June 30, 2014 on each of Facility A and Facility B;

Provides for quarterly repayments of \$337 for Facility A commencing June 30, 2014, which quarterly repayments have been reduced from \$750;

· Provides for quarterly repayments of \$337 for Facility B commencing June 30, 2014;

Bears interest at the rate of LIBOR plus 1% through March 31, 2014 and LIBOR plus 3.25% from April 1, 2014 through maturity, which were reduced from LIBOR plus 2.25% for Facility A and LIBOR plus 4.25% for Facility B;

Establishes certain financial covenants, including an interest coverage ratio that must be complied with starting January 1, 2013, a consolidated leverage ratio that must be complied with starting January 1, 2014, and a minimum liquidity ratio that must be complied with starting July 1, 2014;

· Removes permanently the loan to value ratio;

Requires the amount of any "Excess Cash," as determined in accordance with the amended and restated facility agreement at each fiscal quarter end beginning June 30, 2012, to be applied to pay the amendment and restructuring fee described below and prepay the outstanding loan balance; and

Removes the success fee originally due under the previous agreement and provides for an amendment and restructuring fee of \$1,480 payable on the earlier of March 31, 2014, the date of a voluntary prepayment, or the date the loan facility becomes due or is repaid in full.

On September 11, 2012, our Audit Committee approved the retention of Sherb & Co., LLP ("Sherb"), as our independent registered public accounting firm for the fiscal year ending December 31, 2012, and dismissed Ernst & Young (Hellas) Certified Auditors Accountants S.A. ("E&Y").

On October 3, 2012, our Board of Directors approved the issuance of an additional 2,196,500 shares of our common stock to our Manager in payment of the \$807 in unpaid fees due to the Manager for the third quarter of 2012 and 65,358 shares of our common stock to each of our non-executive directors in payment of \$30 each in unpaid Board fees for the first, second and third quarters of 2012.

On October 11, 2012, the Company and Dutchess Opportunity Fund, II, LP, a Delaware limited partnership ("Dutchess Capital"), entered into an Equity Line Facility (the "Line"). Pursuant to the Line, the Company has the right but not the obligation, for a 36-month period, to sell up to 2,352,962 shares of its common stock to Dutchess Capital.

On October 11, 2012, the M/V *Free Goddess*, which had been hijacked by Somali pirates in February 2012, was released.

Employment and Charter Rates

All of our vessels are currently being chartered in the spot market. The following table details the vessels in our fleet as of October 12, 2012:

Vessel Name	Type	Built	Dwt	Employment
M/V Free Jupiter	Handymax	2002	47,777	About 65-70 day time charter trip at \$6,000 per day for the first 70 days and \$9,500 per day thereafter, through October/November 2012
M/V Free Knight	Handysize	1998	24,111	About 20-25 day time charter trip at \$3,750 per day for the first 45 days and \$8,000 per day thereafter, through October 2012
M/V Free Maverick	Handysize	1998	23,994	About 30 day time charter trip at \$7,500 per day through October 2012
M/V Free Impala	Handysize	1997	24,111	Awaiting orders

M/V Free Neptune	Handysize	1996	30,838	About 20-25 day time charter trip at \$4,850 per day through October/ November 2012
M/V Free Hero	Handysize	1995	24,318	About 20-25 day time charter trip at \$5,000 per day through October/ November 2012
M/V Free Goddess	Handysize	1995	22,051	Following her release from pirates, continued her time charter trip at \$10,000 per day through November 2012

On October 11, 2012, the Company announced that all 21 crew members of the M/V *Free Goddess* are reported safe and well after the vessel's release by her hijackers. The M/V *Free Goddess* had been hijacked by Somali pirates on February 7, 2012 while transiting the Indian Ocean eastbound. The vessel was on a time charter trip at the time she was hijacked. Under the charterparty agreement, the BIMCO Piracy clause was applied, which provided among other things, for the charterers to have the vessel covered with kidnap and ransom insurance and loss of hire insurance. The vessel was also covered by the war risk underwriters, who confirmed cover. The Company is in arbitration proceedings with the charterer due to the charterer not fulfilling its obligations under the charterparty agreement.

Acquisition of Vessels

From time to time, as opportunities arise and depending on the availability of financing, we intend to acquire additional secondhand drybulk carriers. When a vessel is acquired free of charter, we enter into a new charter contract. The shipping industry uses income days (also referred to as "voyage" or "operating" days) to measure the number of days in a period during which vessels actually generate revenues.

Consistent with shipping industry practice, we treat the acquisition of a vessel (whether acquired with or without a charter) as the acquisition of an asset rather than a business. When we acquire a vessel, we conduct, also consistent with shipping industry practice, an inspection of the physical condition of the vessel, unless practical considerations do not allow such an inspection. We also examine the vessel's classification society records. We do not obtain any historical operating data for the vessel from the seller. We do not consider that information material to our decision on acquiring the vessel.

Prior to the delivery of a purchased vessel, the seller typically removes from the vessel all records and log books, including past financial records and accounts related to the vessel. Upon the change in ownership, the technical management agreement between the seller's technical manager and the seller is automatically terminated and the vessel's trading certificates are revoked by its flag state, in the event the buyer determines to change the vessel's flag state.

When a vessel has been under a voyage charter, the seller delivers the vessel free of charter to the buyer. When a vessel is under time charter and the buyer wishes to assume that charter, the buyer cannot acquire the vessel without the charterer's consent and an agreement between the buyer and the charterer for the buyer to assume the charter. The purchase of a vessel does not in itself transfer the charter because the charter is a separate service agreement between the former vessel owner and the charterer.

When we acquire a vessel and want to assume or renegotiate a related time charter, we must take the following steps:

• Obtain the charterer's consent to us as the new owner;

• Obtain the charterer's consent to a new technical manager;

• Obtain the charterer's consent to a new flag for the vessel, if applicable;

- Arrange for a new crew for the vessel;

• Replace all hired equipment on board the vessel, such as gas cylinders and communication equipment;

• Negotiate and enter into new insurance contracts for the vessel through our own insurance brokers;

• Register the vessel under a flag state and perform the related inspections in order to obtain new trading certificates from the flag state, if we change the flag state;

• Implement a new planned maintenance program for the vessel; and

• Ensure that the new technical manager obtains new certificates of compliance with the safety and vessel security regulations of the flag state.

Business Components and Activities

Our business comprises the following primary components:

Employment and operation of our drybulk carriers; and

Management of the financial, general and administrative elements involved in the ownership and operation of our drybulk vessels.

The employment and operation of our vessels involve the following activities:

Vessel maintenance and repair;

Planning and undergoing dry-docking, special surveys and other major repairs;

Organizing and undergoing regular classification society surveys;

Crew selection and training;

Vessel spares and stores supply;

Vessel bunkering;

Contingency response planning;

Onboard safety procedures auditing;

Accounting;

Vessel insurance arrangements;

• Vessel chartering;

• Vessel hire management; and

• Vessel performance monitoring.

36

Our Fleet—Illustrative Comparison of Possible Excess of Carrying Value Over Estimated Charter-Free Market Value of Certain Vessels

In “—Critical Accounting Policies—Impairment of Long Lived Assets,” we discuss our policy for impairing the carrying values of our vessels. Historically, the market values of vessels have experienced volatility, which from time to time may be substantial. As a result, the charter-free market value, or basic market value, of certain of our vessels may have declined below those vessels’ carrying value, even though we would not impair those vessels’ carrying value under our accounting impairment policy, due to our belief that future undiscounted cash flows expected to be earned by such vessels over their operating lives would exceed such vessels’ carrying amounts. Based on: (i) the carrying value of each of our vessels as of December 31, 2011 and (ii) what we believe the charter free market value of each of our vessels was as of December 31, 2011, the aggregate carrying value of three of the vessels in our fleet as of December 31, 2011 exceeded their aggregate charter-free market value by approximately \$52.2 million, as noted in the table below. This aggregate difference represents the approximate analysis of the amount by which we believe we would have to reduce our net income if we sold all of such vessels at December 31, 2011, on industry standard terms, in cash transactions, and to a willing buyer where we were not under any compulsion to sell, and where the buyer was not under any compulsion to buy. For purposes of this calculation, we have assumed that these vessels would be sold at a price that reflects our estimate of their charter-free market values as of December 31, 2011. However, as of December 31, 2011 and as of the date of this report, we are holding the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Impala* and the M/V *Free Neptune* for sale.

Our estimates of charter-free market value assume that our vessels are all in good and seaworthy condition without need for repair and if inspected would be certified in class without notations of any kind. Our estimates are based on information available from various industry sources, including:

- reports by industry analysts and data providers that focus on our industry and related dynamics affecting vessel values;
- news and industry reports of similar vessel sales;
- news and industry reports of sales of vessels that are not similar to our vessels where we have made certain adjustments in an attempt to derive information that can be used as part of our estimates;
- approximate market values for our vessels or similar vessels that we have received from shipbrokers, whether solicited or unsolicited, or that shipbrokers have generally disseminated;
- offers that we may have received from potential purchasers of our vessels; and

- vessel sale prices and values of which we are aware through both formal and informal communications with shipowners, shipbrokers, industry analysts and various other shipping industry participants and observers.

As we obtain information from various industry and other sources, our estimates of basic market value are inherently uncertain. In addition, vessel values are highly volatile; as such, our estimates may not be indicative of the current or future charter-free market value of our vessels or prices that we could achieve if we were to sell them.

We also refer you to the risk factor in “Item 3. Key Information—D. Risk Factors— The market values of our vessels have declined and may further decrease, and we may incur losses when we sell vessels or we may be required to write down their carrying value, which may adversely affect our earnings and our ability to implement our fleet renewal program”.

Drybulk Vessels	DWT	Year Built	Carrying Value as of 31/12/2011 (in million USD)	
Free Hero*	24,318	1995	\$ 8.6	
Free Jupiter*	47,777	2002	\$ 16.7	
Free Goddess	22,051	1995	\$ 19.0	**
Free Impala*	24,111	1997	\$ 9.5	
Free Knight	24,111	1998	\$ 31.8	**
Free Maverick	23,994	1998	\$ 30.9	**
Free Neptune*	30,838	1996	\$ 10.5	
Total	197,200		\$ 127.0	

* Vessels classified as held for sale.

Indicates drybulk carriers for which we believe, as of December 31, 2011, the basic charter-free market value is **lower than the vessel’s carrying value. We believe that the aggregate carrying value of these vessels exceeds their aggregate basic charter-free market value by approximately \$52.2 million.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of those financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosure at the date of our financial statements. Actual results may differ from these estimates under different assumptions and conditions. Critical accounting policies are those that reflect significant judgments of uncertainties and potentially result in materially different results under different assumptions and conditions. We have described below what we believe are our most critical accounting policies, because they generally involve a comparatively higher degree of judgment in their application. For a description of all our significant accounting policies, see Note 2 to our consolidated financial statements.

Impairment of Long-lived Assets: The Company follows the guidance under ASC 360, “Property, Plant and Equipment,” which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. The standard requires that, long-lived assets and certain identifiable intangibles held and used or disposed of by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. When the estimate of undiscounted cash flows, excluding interest charges, expected to be generated by the use of the asset is less than its carrying amount, the Company should evaluate the asset for an impairment loss. Measurement of the impairment loss is based on the fair value of the asset which is determined based on management estimates and assumptions and by making use of available market data. The Company evaluates the carrying amounts and periods over which long-lived assets are depreciated to determine if events have occurred which would require modification to their carrying values or useful lives. In evaluating useful lives and carrying values of long-lived assets, management reviews certain indicators of potential impairment, such as future undiscounted net operating cash flows, vessel sales and purchases, business plans and overall market conditions. In performing the recoverability tests the Company determines future undiscounted net operating cash flows for each vessel and compares it to the vessel’s carrying value. The future undiscounted net operating cash flows are determined by considering the Company’s alternative courses of action, estimated vessel’s utilization, its scrap value, the charter revenues from existing time charters for the fixed fleet days and an estimated daily time charter equivalent for the unfixed days over the remaining estimated useful life of the vessel, net of vessel operating expenses adjusted for inflation, and cost of scheduled major maintenance. When the Company’s estimate of future undiscounted net operating cash flows for any vessel is lower than the vessel’s carrying value, the carrying value is written down, by recording a charge to operations, to the vessel’s fair market value if the fair market value is lower than the vessel’s carrying value.

As of December 31, 2011, the Company performed an impairment assessment of its long-lived assets by comparing the undiscounted net operating cash flows for each vessel to its respective carrying value. The significant factors and assumptions the Company used in each future undiscounted net operating cash flow analysis included, among others, operating revenues, off-hire days, dry-docking costs, operating expenses and management fee estimates. Revenue assumptions were based on contracted time charter rates up to the end of life of the current contract of each vessel as well as Forward Freight Agreements (FFAs) and market historical average time charter rates for the remaining life of the vessel after the completion of the current contracts. In addition, the Company used an annual operating expenses escalation factor and an estimate of off hire days. All estimates used and assumptions made were in accordance with

the Company's internal budgets and historical experience of the shipping industry. The Company's assessment concluded that for vessels that it is intended to be held and used no impairment existed as of December 31, 2011, as the future undiscounted net operating cash flows per vessel exceeded the carrying value of each vessel. For the vessels for which alternative courses of action (including their sale) are under consideration, an impairment charge of \$69,998 was recognized in 2011 and is separately reflected in the 2011 consolidated statement of operations.

Vessels' Depreciation: The cost of the Company's vessels is depreciated on a straight-line basis over the vessels' remaining economic useful lives from the acquisition date, after considering the estimated residual value. Effective April 1, 2009, and following management's reassessment of the useful lives of the Company's assets, the fleet useful life was increased from 27 to 28 years. Management's estimate was based on the current vessels' operating condition, as well as the conditions prevailing in the market for the same type of vessels.

Accounting for Special Survey and Dry-docking Costs: Accounting for Special Survey and Dry-docking Costs: The Company follows the deferral method of accounting for special survey and dry-docking costs, whereby actual costs incurred are deferred and are amortized over periods of five and two and a half years, respectively. If special survey or dry-docking is performed prior to the scheduled date, the remaining un-amortized balances are immediately written-off. In our consolidated financial statements, costs deferred are presented on a consistent basis and are limited to actual costs incurred at the yard, paints, class renewal expenses, and parts used in the dry docking or special survey. Indirect costs and/or costs related to ordinary maintenance, carried out while at dry dock, are expensed when incurred as they do not provide any future economic benefit.

Accounting for Revenue and Expenses: Revenue is recorded when services are rendered, we have a signed charter agreement or other evidence of an arrangement, the price is fixed or determinable, and collection is reasonably assured. Voyage revenues for the transportation of cargo are recognized ratably over the estimated relative transit time of each voyage. A voyage is deemed to commence when a vessel is available for loading of its next fixed cargo and is deemed to end upon the completion of the discharge of the current cargo. Under a voyage charter, we agree to provide a vessel for the transportation of specific goods between specific ports in return for payment of an agreed upon freight rate per ton of cargo. Revenues from time chartering of vessels are accounted for as operating leases and are thus recognized on a straight line basis as the average revenue over the rental periods of such charter agreements, as service is provided. A time charter involves placing a vessel at the charterers' disposal for a period of time during which the charterer uses the vessel in return for the payment of a specified daily hire rate. Short period charters for less than three months are referred to as spot charters. Time charters extending three months to a year are generally referred to as medium term charters. All other time charters are considered long term. Voyage expenses, primarily consisting of port, canal and bunker expenses that are unique to a particular charter, are paid for by the charterer under time charter arrangements or by us under voyage charter arrangements, except for commissions, which are always paid for by us, regardless of charter type. All voyage and vessel operating expenses are expensed as incurred, except for commissions. Commissions are deferred over the related voyage charter period to the extent revenue has been deferred since commissions are earned as our revenues are earned. Probable losses on voyages in progress are provided for in full at the time such losses can be estimated.

Important Measures for Analyzing Results of Operations

We believe that the important measures for analyzing trends in the results of our operations consist of the following:

- Ownership days. We define ownership days as the total number of calendar days in a period during which each vessel in the fleet was owned by us. Ownership days are an indicator of the size of the fleet over a period and affect both the amount of revenues earned and the amount of expenses that we incur during that period.

- Available days. We define available days as the number of ownership days less the aggregate number of days that our vessels are off-hire due to major repairs, dry-dockings or special or intermediate surveys. The shipping industry uses available days to measure the number of ownership days in a period during which vessels are actually capable of generating revenues.

- Operating days. We define operating days as the number of available days in a period less the aggregate number of days that vessels are off-hire due to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels could actually generate revenues.

- Fleet utilization. We calculate fleet utilization by dividing the number of operating days during a period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency properly operating its vessels and minimizing the amount of days that its vessels are off-hire for any unforeseen reason.

- Off-hire. The period a vessel is unable to perform the services for which it is required under a charter. Off-hire periods typically include days spent undergoing repairs and dry-docking, whether or not scheduled.

- Time charter. A time charter is a contract for the use of a vessel for a specific period of time during which the charterer pays substantially all of the voyage expenses, including port costs, canal charges and bunkers expenses. The vessel owner pays the vessel operating expenses, which include crew wages, insurance, technical maintenance costs, spares, stores and supplies and commissions on gross voyage revenues. Time charter rates are usually fixed during the term of the charter. Prevailing time charter rates do fluctuate on a seasonal and year-to-year basis and may be substantially higher or lower from a prior time charter agreement when the subject vessel is seeking to renew the time charter agreement with the existing charterer or enter into a new time charter agreement with another charterer. Fluctuations in time charter rates are influenced by changes in spot charter rates.

- Voyage charter. A voyage charter is an agreement to charter the vessel for an agreed per-ton amount of freight from specified loading port(s) to specified discharge port(s). In contrast to a time charter, the vessel owner is required to pay substantially all of the voyage expenses, including port costs, canal charges and bunkers expenses, in addition

to the vessel operating expenses.

Time charter equivalent (TCE). The time charter equivalent, or TCE, equals voyage revenues minus voyage expenses divided by the number of operating days during the relevant time period, including the trip to the loading port. TCE is a non-GAAP, standard seaborne transportation industry performance measure used primarily to compare period-to-period changes in a seaborne transportation company's performance despite changes in the mix of charter types (i.e., spot charters, time charters and bareboat charters) under which the vessels may be employed during a specific period.

Adjusted EBITDA represents net earnings before taxes, depreciation and amortization, amortization of deferred revenue, back log asset, (gain)/loss on derivative instruments, stock-based compensation expense, vessel impairment loss, write-off of advances for vessels under construction, interest and finance cost net, provision and write-offs of insurance claims and bad debts, and (gain)/loss on sale of vessel. Under the laws of the Marshall Islands, we are not subject to tax on international shipping income. However, we are subject to registration and tonnage taxes, which have been included in vessel operating expenses. Accordingly, no adjustment for taxes has been made for purposes of calculating Adjusted EBITDA. Adjusted EBITDA is a non-GAAP measure and does not represent and should not be considered as an alternative to net income or cash flow from operations, as determined by U.S. GAAP, and our calculation of Adjusted EBITDA may not be comparable to that reported by other companies. The shipping industry is capital intensive and may involve significant financing costs. The Company uses Adjusted EBITDA because it presents useful information to management regarding the Company's ability to service and/or incur indebtedness by excluding items that we do not believe are indicative of our core operating performance, and therefore is an alternative measure of our performance. The Company also believes that Adjusted EBITDA is useful to investors because it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry. Adjusted EBITDA has limitations as an analytical tool, however, and should not be considered in isolation or as a substitute for analysis of the Company's results as reported under U.S. GAAP. Some of these limitations are: (i) Adjusted EBITDA does not reflect changes in, or cash requirements for, working capital needs; and (ii) although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such capital expenditures.

Revenues

Our revenues were driven primarily by the number of vessels we operate, the number of operating days during which our vessels generate revenues, and the amount of daily charter hire that our vessels earn under charters. These, in turn, are affected by a number of factors, including the following:

- The nature and duration of our charters;
- The amount of time that we spent repositioning its vessels;
- The amount of time that our vessels spent in dry-dock undergoing repairs;
- Maintenance and upgrade work;
- The age, condition and specifications of our vessels;
- The levels of supply and demand in the drybulk carrier transportation market; and
- Other factors affecting charter rates for drybulk carriers under voyage charters.

A voyage charter is generally a contract to carry a specific cargo from a load port to a discharge port for an agreed-upon total amount. Under voyage charters, voyage expenses such as port, canal and fuel costs are paid by the vessel owner. A trip time charter is a short-term time charter for a voyage between load port(s) and discharge port(s) under which the charterer pays fixed daily hire rate on a semi-monthly basis for use of the vessel. A period time charter is charter for a vessel for a fixed period of time at a set daily rate. Under trip time charters and time charters, the charterer pays voyage expenses. Under all three types of charters, the vessel owners pay for vessel operating expenses, which include crew costs, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs. The vessel owners are also responsible for each vessel's dry-docking and intermediate and special survey costs.

Vessels operating on period time charters provide more predictable cash flows, but can yield lower profit margins than vessels operating in the spot charter market for single trips during periods characterized by favorable market conditions.

Vessels operating in the spot charter market generate revenues that are less predictable, but can yield increased profit margins during periods of improvements in drybulk rates. Spot charters also expose vessel owners to the risk of declining drybulk rates and rising fuel costs. Our vessels were chartered in the spot market during the year ended December 31, 2011.

A standard maritime industry performance measure is the TCE. TCE rates are defined as our time charter revenues less voyage expenses during a period divided by the number of our available days during the period, which is consistent with industry standards. Voyage expenses include port charges, bunker (fuel oil and diesel oil) expenses, canal charges and commissions. Our average TCE rate for financial year 2009, 2010 and 2011 was \$16,105, \$15,742 and \$9,408 respectively.

Vessel Operating Expenses

Vessel operating expenses include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Vessel operating expenses generally represent costs of a fixed nature.

Principal Factors Affecting Our Business

The principal factors that affected our financial position, results of operations and cash flows include the following:

- Number of vessels owned and operated;
- Charter market rates and periods of charter hire;
- Vessel operating expenses and direct voyage costs, which are incurred in both U.S. dollars and other currencies, primarily Euros;
- Management fees and service fees;

Depreciation and amortization expenses, which are a function of vessel cost, any significant post-acquisition improvements, estimated useful lives, estimated residual scrap values, and fluctuations in the carrying value of our vessels, as well as, drydocking and special survey costs;

- Financing costs related to indebtedness associated with the vessels; and

- Fluctuations in foreign exchange rates.

Performance Indicators

(All amounts in tables in thousands of U.S. dollars except for fleet data and average daily results)

The following performance measures were derived from our audited consolidated financial statements for the year ended December 31, 2011, 2010 and 2009 included elsewhere in this report. The historical data included below is not necessarily indicative of our future performance.

	For the year ended December 31,					
	2011		2010		2009	
Adjusted EBITDA (1)	\$ 5,833		\$ 26,834		\$ 30,337	
Fleet Data:						
Average number of vessels (2)	8.21		9.65		9.35	
Ownership days (3)	2,998		3,523		3,414	
Available days (4)	2,960		3,430		3,373	
Operating days (5)	2,865		3,329		3,294	
Fleet utilization (6)	96.8 %		97.1 %		97.7 %	
Average Daily Results:						
Average TCE rate (7)	\$ 9,408		\$ 15,742		\$ 16,105	
Vessel operating expenses (8)	4,858		5,282		5,218	
Management fees (9)	634		561		549	
General and administrative expenses(10)	1,538		1,117		1,073	
Total vessel operating expenses (11)	\$ 5,492		5,843		5,767	

(1) Adjusted EBITDA represents net earnings before taxes, depreciation and amortization, amortization of deferred revenue, back log asset, (gain)/loss on derivative instruments, stock-based compensation expense, vessel impairment loss, write-off of advances for vessels under construction, interest and finance cost net, provision and write-offs of insurance claims and bad debts, and (gain)/loss on sale of vessel. Under the laws of the Marshall

Islands, we are not subject to tax on international shipping income. However, we are subject to registration and tonnage taxes, which have been included in vessel operating expenses. Accordingly, no adjustment for taxes has been made for purposes of calculating Adjusted EBITDA. Adjusted EBITDA is a non-GAAP measure and does not represent and should not be considered as an alternative to net income or cash flow from operations, as determined by U.S. GAAP, and our calculation of Adjusted EBITDA may not be comparable to that reported by other companies. The shipping industry is capital intensive and may involve significant financing costs. The Company uses Adjusted EBITDA because it presents useful information to management regarding the Company's ability to service and/or incur indebtedness by excluding items that we do not believe are indicative of our core operating performance, and therefore is an alternative measure of our performance. The Company also believes that Adjusted EBITDA is useful to investors because it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry. Adjusted EBITDA has limitations as an analytical tool, however, and should not be considered in isolation or as a substitute for analysis of the Company's results as reported under U.S. GAAP. Some of these limitations are: (i) Adjusted EBITDA does not reflect changes in, or cash requirements for, working capital needs; and (ii) although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such capital expenditures.

	For the year ended December 31,		
	2011	2010	2009
Net income/(loss)	\$ (88,196)	\$ (21,821)	\$ 6,859
Depreciation and amortization	9,579	17,253	17,748
Amortization of deferred revenue	(136)	(1,034)	(81)
Back log asset	—	—	907
Stock-based compensation expense	122	559	494
Vessel impairment loss	69,998	26,631	—
Impairment of advances for vessels under construction	11,717		
Gain/(loss) on derivative instruments	178	465	111
Interest and finance cost, net of interest income	3,999	4,338	4,299
(Gain) on sale of vessel	(1,561)	(807)	—
Provision and write-offs of insurance claims and bad debts	133	1,250	—
Adjusted EBITDA	\$ 5,833	\$ 26,834	\$ 30,337

Average number of vessels is the number of vessels that constituted our fleet for the relevant period, as measured (2) by the sum of the number of days each vessel was a part of our fleet during the period divided by the number of calendar days in the period.

Ownership days are the total number of days in a period during which the vessels in our fleet have been owned by (3) us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period.

Available days are the number of ownership days less the aggregate number of days that our vessels are off-hire (4) due to major repairs, dry dockings or special or intermediate surveys. The shipping industry uses available days to measure the number of ownership days in a period during which vessels should be capable of generating revenues.

Operating days are the number of available days less the aggregate number of days that our vessels are off-hire due (5) to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels could actually generate revenues.

We calculate fleet utilization by dividing the number of our fleet's operating days during a period by the number of (6) available days during the period. The shipping industry uses fleet utilization to measure a company's efficiency in properly operating its vessels and minimizing the amount of days that its vessels are off-hire for any unforeseen reasons.

TCE is a non-GAAP measure of the average daily revenue performance of a vessel on a per voyage basis. Our (7) method of calculating TCE is consistent with industry standards and is determined by dividing operating revenues (net of voyage expenses and commissions) by operating days for the relevant time period. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by the charterer under a time charter contract. TCE is a standard shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance despite changes in the mix of charter types (i.e., spot charters, time charters and bareboat charters) under which the vessels may be employed between the periods:

	For the year ended December 31,		
	2011	2010	2009
Operating revenues	\$ 29,538	\$ 57,650	\$ 57,533
Voyage expenses and commissions	(2,584)	(5,244)	(4,483)
Net operating revenues	26,954	52,406	53,050
Operating days	2,865	3,329	3,294
Time charter equivalent daily rate	\$ 9,408	\$ 15,742	\$ 16,105

Average daily vessel operating expenses, which includes crew costs, provisions, deck and engine stores, lubricating (8) oil, insurance, maintenance and repairs, is calculated by dividing vessel operating expenses by ownership days for the relevant time periods:

	For the year ended December 31,		
	2011	2010	2009

Vessel operating expenses	\$ 14,563	\$ 18,607	\$ 17,813
Ownership days	2,998	3,523	3,414
Daily vessel operating expense	\$ 4,858	\$ 5,282	\$ 5,218

- (9) Daily management fees are calculated by dividing total management fees paid on ships owned by ownership days for the relevant time period.
- (10) Average daily general and administrative expenses are calculated by dividing general and administrative expenses (excluding stock-based compensation expense) by ownership days for the relevant period.
- (11) Total vessel operating expenses, or TVOE, is a measurement of our total expenses associated with operating our vessels. TVOE is the sum of vessel operating expenses and management fees. Daily TVOE is calculated by dividing TVOE by fleet ownership days for the relevant time period.

Results of Operations

Year Ended December 31, 2011 as Compared to Year Ended December 31, 2010

REVENUES — Operating revenues for the year ended December 31, 2011 were \$29,538 compared to \$57,650 for the year ended December 31, 2010. The decrease of \$28,112 is mainly attributable to the lower average daily TCE rate of \$9,408 in the year ended December 31, 2011 compared to an average daily TCE rate of \$15,742 in the year ended December 31, 2010 on the back of weak spot charter market rates and to a lesser degree to the decrease of the average number of vessels in our fleet to 8.21 vessels for the year ended December 31, 2011 compared to 9.65 vessels for the year ended December 31, 2010.

VOYAGE EXPENSES AND COMMISSIONS — Voyage expenses, which include bunkers, cargo expenses, port expenses, port agency fees, tugs, extra insurance and various expenses, were \$807 for the year ended December 31, 2011, as compared to \$1,887 for the year ended December 31, 2010. The variance in voyage expenses reflects mainly the bunkers delivery – redelivery transactions which expired during 2011 and the reduced average number of vessels to 8.21 in the year ended December 31, 2011 from 9.65 in the year ended December 31, 2010.

For the year ended December 31, 2011, commissions charged amounted to \$1,777, as compared to \$3,357 for the year ended December 31, 2010. The decrease in commissions is mainly due to the decrease of operating revenues for the year ended December 31, 2011 compared to the year ended December 31, 2010. The commission fees represent commissions paid to the Manager, other affiliated companies associated with family members of our CEO, and unaffiliated third parties relating to vessels chartered during the relevant periods.

OPERATING EXPENSES — Vessel operating expenses, which include crew cost, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs, totaled \$14,563 in the year ended December 31, 2011, as compared to \$18,607 in the year ended December 31, 2010. The decrease of \$4,044, which is translated to daily operating expenses of \$4,858 for the year ended December 31, 2011 versus \$5,282 for the year ended December 31, 2010 is primarily due to the intensification of the cost cutting initiatives initiated in the fourth quarter of 2010 and continued throughout 2011 and the ownership of 8.21 vessels versus 9.65 during the prior year.

DEPRECIATION AND AMORTIZATION — For the year ended December 31, 2011, depreciation expense totaled \$8,664 as compared to \$15,365 for the year ended December 31, 2010. The decrease of \$6,701 in depreciation expense resulted from the classification of the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Lady* (which was sold on November 8, 2011), the M/V *Free Impala* and the M/V *Free Neptune*, as “held for sale” in our consolidated balance sheet for the year ended December 31, 2011, the sale of M/V *Free Destiny* on August 27, 2010, the sale of M/V *Free Envoy* on May 13, 2011 and the sale of M/V *Free Lady* on November 8, 2011. For the year

ended December 31, 2011, amortization of dry-dockings and special survey costs totaled \$915, a decrease of \$973 over the \$1,888 expenses reported in the year ended December 31, 2010. The main reason for the decrease is the write-off of certain dry-docking costs due to the classification of the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Lady*, the M/V *Free Impala* and the M/V *Free Neptune* as “held for sale,” for the year ended December 31, 2011.

MANAGEMENT FEES — Management fees for the year ended December 31, 2011 totaled \$1,900, as compared to \$1,978 in the year ended December 31, 2010. The \$78 decrease in management fees mainly resulted from the reduced average number of vessels under the technical management of the Manager to 8.21 in the year ended December 31, 2011 from 9.65 in the year ended December 31, 2010 counterbalanced by the increase of the monthly management fee per vessel to \$19.0 from \$16.5, effective June 1, 2011.

GENERAL AND ADMINISTRATIVE EXPENSES — General and administrative expenses, which include, among other things, legal, audit, audit related expenses, travel expenses, communications expenses, and services fees and expenses charged by the Manager, totaled \$4,734 (including \$122 stock-based compensation expense) for the year ended December 31, 2011, as compared to \$4,494 (including \$559 stock-based compensation expense) for the year ended December 31, 2010. The difference was primarily due to \$662 expenses related to the Company’s abandoned capital raising efforts.

PROVISION AND WRITE-OFFS OF INSURANCE CLAIMS AND BAD DEBTS — For the year ended December 31, 2011, the amount of \$133 refers to write-offs of various long outstanding accounts receivable, which is significantly below the \$1,250 of provisions and write-offs reported in the previous year that was mainly affected by the \$986 claim of the M/V *Free Jupiter*.

GAIN/LOSS ON SALE OF VESSEL — For the year ended December 31, 2011, the Company recognized a gain of \$1,561 on the sale of the M/V *Free Envoy*. For the year ended December 31, 2010, the Company recognized a gain of \$807 on the sale of the M/V *Free Destiny*.

VESSEL IMPAIRMENT LOSS — For the year ended December 31, 2011, the Company according to the provisions of ASC 360, has classified the M/V *Free Hero*, the M/V *Free Jupiter*, the M/V *Free Impala* and the M/V *Free Neptune* as “held for sale” at their estimated market values less costs to sell, as all criteria required for the classification as “Held for Sale” were met at the balance sheet date. On November 8, 2011, the Company sold the M/V *Free Lady* for a sale price of \$21,900. Due to the planned sale of the vessel, the Company for the purposes of preparing its interim financial statements performed an impairment exercise and recognized an impairment loss of \$36,415.

As of December 31, 2011, the Company compared the carrying values of the vessels classified as held for sale with their estimated market values less costs to sell and recognized an impairment loss of \$33,583 in the consolidated statements of operations.

For the year ended December 31, 2010, the M/V *Free Hero*, the M/V *Free Impala* and the M/V *Free Neptune*, according to the provisions of ASC 360, were classified as asset “held for sale”. The Company has individually assessed for recoverability the carrying values of each of the above vessels, including unamortized deferred dry docking costs of \$631. In performing its assessment, the Company compared the carrying values of these vessels with their estimated fair values at December 31, 2010. As a result of this assessment the Company has recognized an impairment loss of \$26,631 of which \$17,253 relates to the M/V *Free Impala* and \$9,378 to the M/V *Free Hero*. No impairment loss was recognized for the M/V *Free Neptune* as its fair value exceeded its carrying value.

IMPAIRMENT OF ADVANCES FOR VESSELS UNDER CONSTRUCTION — As of December 31, 2011, the Company has impaired the advances and the capitalized expenses relating to the vessels under construction after the cancelation of ABN AMRO financing commitment on December 30, 2011.

FINANCING COSTS — Financing costs amounted to \$4,003 in the year ended December 31, 2011 and \$4,375 for the year ended December 31, 2010. The decrease of the interest and financing costs incurred in the year ended December 31, 2011 as compared to 2010 was mainly attributed to a lower debt balance, lower weighted average interest rate and increased capitalized interest as compared to 2010 counterbalanced by increased financing fees due to the amendment of certain agreements in 2010.

GAIN/(LOSS) ON INTEREST RATE SWAPS — Under the terms of the two swap agreements, we make quarterly payments to the counterparty based on decreasing notional amounts, standing at \$5,993 and \$3,208 as of December 31, 2011 at fixed rates of 5.07% and 5.55% respectively, and the counterparty makes quarterly floating-rate payments of 3-month LIBOR to us based on the same decreasing notional amounts. The swaps mature in September 2015 and July 2015, respectively.

The change in fair value on the Company’s two interest rate swaps for the year ended December 31, 2011 and 2010 resulted in unrealized gains of \$361 and \$129, respectively. The settlements on the interest rate swaps for the year ended December 31, 2011 and 2010 resulted in realized losses of \$539 and \$594, respectively. The total change in fair value and settlements for the year ended December 31, 2011 and 2010 aggregate to losses of \$178 and \$465, respectively, which is separately reflected in “Loss on derivative instruments” in our consolidated statements of operations.

The change is attributable to the interest rate differential between floating and fixed interest rates in the year ended December 31, 2011 compared to the same period in 2010.

NET LOSS — Net loss for the year ended December 31, 2011 was \$88,196, as compared to net loss of \$21,821 for the year ended December 31, 2010. The increase of the net loss for the year ended December 31, 2011 resulted primarily from the impairment of vessels and vessels under construction and the weaker freight market during the year ended December 31, 2011 as compared to 2010.

Year Ended December 31, 2010 as Compared to Year Ended December 31, 2009

REVENUES — Operating revenues for the year ended December 31, 2010 were \$57,650 compared to \$57,533 for the year ended December 31, 2009. The slight increase of \$117 is attributable to the increase of the average number of vessels in our fleet from 9.35 for the year ended December 31, 2009 to 9.65 for the year ended December 31, 2010, which was partially offset by the lower average daily TCE rate of \$15,742 in the year ended December 31, 2010 compared to an average daily TCE rate of \$16,105 in the year ended December 31, 2009.

VOYAGE EXPENSES AND COMMISSIONS — Voyage expenses, which include bunkers, cargo expenses, port expenses, port agency fees, tugs, extra insurance and various expenses, were \$1,887 for the year ended December 31, 2010, as compared to \$1,394 for the year ended December 31, 2009. The variance in voyage expenses is due to (i) the higher bunker consumption due to increased consumption during off-hire and idle days, (ii) higher port expenses and (iii) the increased cargo inspection expenses due to the increased discharging of cargo in South and West African ports. For the year ended December 31, 2010, commissions charged amounted to \$3,357, as compared to \$3,089 for the year ended December 31, 2009. The increase in commissions is mainly due to the small increase of operating revenues for the year ended December 31, 2010 compared to the year ended December 31, 2009 and a slightly higher average commission of 5.8% over total operating revenues for the year ended December 31, 2010 versus an average commission of 5.4% over total operating revenues for the year ended December 31, 2009. The commission fees represent commissions paid to the Manager, other affiliated companies associated with family members of our CEO, and unaffiliated third parties relating to vessels chartered during the relevant periods. For the year ended December 31, 2010, commissions paid to the Manager equal 1.25% of gross hire or freight for vessels, which in turn pays 1.25% of gross hire and freight to Safbulk.

OPERATING EXPENSES — Vessel operating expenses, which include crew cost, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs, totaled \$18,607 in the year ended December 31, 2010, as compared to \$17,813 in the year ended December 31, 2009. The slight increase of \$794, which is translated to daily operating expenses of \$5,282 for the year ended December 31, 2010 versus \$5,218 for the year ended December 31, 2009 is mainly attributed to the higher operating expenses incurred during vessels dry-dockings which amounted to four for the year ended December 31, 2010 compared to three for the year ended December 31, 2009.

DEPRECIATION AND AMORTIZATION — For the year ended December 31, 2010, depreciation expense totaled \$15,365, as compared to \$16,006 for the year ended December 31, 2009. The decrease of \$641 in depreciation expense resulted from the change in our estimated useful life of the vessels as described below in the “Liquidity and Capital Resources” section, from the classification of M/V *Free Hero* as “held for sale” at December 31, 2010 and the sale of M/V *Free Destiny* on August 27, 2010. The decrease was to some extent alleviated by the increase of the average number of vessels to 9.65 in the year ended December 31, 2010 from 9.35 in the year ended December 31, 2009. For the year ended December 31, 2010, amortization of dry-dockings and special survey costs totaled \$1,888, an increase of \$146 over the expenses reported in the year ended December 31, 2009. During the year ended December 31, 2010, we amortized eight vessels’ scheduled dry-dockings and special surveys versus six vessels’ scheduled dry-docking and special surveys during the year ended December 31, 2009.

For the year ended December 31, 2010 and 2009, back-log asset’s amortization expense amounted to \$nil and \$907, respectively, and is included in voyage revenue, as the recognized asset in accordance with the acquisition of vessel the M/V *Free Maverick* has been fully amortized during 2009.

MANAGEMENT FEES — Management fees for the year ended December 31, 2010 totaled \$1,978, as compared to \$1,874 in the year ended December 31, 2009. The \$104 increase in management fees resulted from the increased average number of vessels under the technical management of the Manager to 9.65 in the year ended December 31, 2010 from 9.35 in the year ended December 31, 2009 and the higher monthly management fee since October 2009.

GENERAL AND ADMINISTRATIVE EXPENSES — General and administrative expenses, which include, among other things, legal, audit, audit related expenses, travel expenses, communications expenses, and services fees and expenses charged by the Manager, totaled \$4,494 (including \$559 stock-based compensation expense) for the year ended December 31, 2010, as compared to \$4,156 (including \$494 stock-based compensation expense) for the year ended December 31, 2009. The difference was primarily due to the higher non-cash stock-based compensation costs and write-off of \$184 of filing expenses.

PROVISION AND WRITE-OFFS OF INSURANCE CLAIMS AND BAD DEBTS — We agreed to settle the insurance claim of the M/V *Free Jupiter* in exchange of a full and definite settlement with the salvage company involved in the incident and a cash payment of \$530 to us. In accordance with the agreement, we wrote off \$986. The remaining balance of \$264 mainly refers to write-offs of long outstanding accounts receivable.

GAIN ON SALE OF VESSEL — We recognized a gain of \$807 on the sale of the M/V Free Destiny, a 1982-built 25,240 dwt Handysize dry bulk vessel, for a price of \$3,213. The vessel was delivered to the buyers on August 27, 2010.

VESSEL IMPAIRMENT LOSS — In September 2010, we initiated negotiations with various unrelated parties for the sale of the M/V *Free Hero*, the 1995 built 24,318 dwt Handysize dry bulk vessel. Accordingly, she was classified as an asset “held for sale,” which resulted in an impairment loss of \$9,378 as the vessel was recorded at the lower of its carrying amount or fair value less cost to sell. The effect of the suspension of the depreciation for the fourth quarter of 2010, as a result of the classification of the M/V *Free Hero* as asset “held for sale,” was to increase net income for the year ended December 31, 2010 by \$409 or \$0.06 per weighted average number of shares, both basic and diluted. Due to our intention to proceed with the sales of the M/V *Free Impala* and M/V *Free Neptune*, we performed an impairment test as of December 31, 2010 and concluded that no impairment charge was required for the M/V *Free Neptune*. An impairment charge of \$17,097 representing the amount by which the carrying amount of the vessel M/V *Free Impala* exceeded her fair value was recognized, which together with the associated deferred dry docking and special survey costs amounting to \$156 are reflected in “Vessel impairment loss” in the consolidated statement of operations.

FINANCING COSTS — Financing costs amounted to \$4,375 in the year ended December 31, 2010 and \$4,323 for the year ended December 31, 2009. The increase of \$52 was mainly due to the increased weighted average interest rate to 3.0% during the year ended December 31, 2010 compared to 2.5% in the year ended December 31, 2009, and the commitment fees of \$171 incurred in relation to the offer letter signed for the financing of the vessels under construction. The increase was partly counterbalanced by the decrease in amortization of deferred financing fees by \$134 in the year ended December 31, 2010.

GAIN/(LOSS) ON INTEREST RATE SWAPS — Under the terms of the two swap agreements, we make quarterly payments to the counterparty based on decreasing notional amounts, standing at \$7,646 and \$4,093 as of December 31, 2010 at fixed rates of 5.07% and 5.55% respectively, and the counterparty makes quarterly floating-rate payments of 3-month LIBOR to us based on the same decreasing notional amounts. The swaps mature in September 2015 and July 2015, respectively.

The gain (loss) on our two interest rate swaps, which is reflected in the consolidated statements of operations comprises of a realized loss of \$594 and an unrealized gain of \$129, and a realized loss of \$671 and an unrealized gain of \$560 for the year ended December 31, 2010 and 2009, respectively. The change is attributable to the interest rate differential between floating and fixed interest rates during 2010. We use interest rate swaps to manage net exposure to interest rate fluctuations related to its borrowings.

NET LOSS — Net loss for the year ended December 31, 2010 was \$21,821, as compared to \$6,859 net income for the year ended December 31, 2009. The net loss for the year ended December 31, 2010 resulted primarily from the charge of the following extraordinary non-cash items during 2010: (i) an impairment loss of \$26,631 of which \$17,253 relates to the M/V *Free Impala* and \$9,378 to the M/V *Free Hero*, (ii) the write-off of \$986 that related to the full and final settlement of the M/V *Free Jupiter* insurance claim and (iii) the gain of \$807 from the sale of M/V *Free Destiny*. After the elimination of these items our net loss would have been net income for the year ended December 31, 2010, which would have totaled \$4,989, as compared to \$6,859 in the year ended December 31, 2009. The decrease in net income resulted primarily from higher operating and voyage expenses, as well as general and administrative expenses, as explained above, which were only partially, offset by increased operating revenues and lower depreciation and amortization expenses.

Liquidity and Capital Resources

We have historically financed our capital requirements from equity provided by our shareholders, operating cash flows and long-term borrowings. As of December 31, 2011, our long-term borrowings totaled \$88,946. We have primarily used our funds for capital expenditures to acquire and maintain our fleet, comply with international shipping standards and environmental laws and regulations, fund working capital requirements, make principal repayments on outstanding loan facilities, and payment of dividends.

As a result of the historically low charter rates for drybulk vessels which have been affecting the Company for over one year, and the resulting material adverse impact on the Company's results from operations, the Company has undertaken negotiations with each of its lenders to restructure the Company's debt repayments. On February 15 2012, the Company received from Credit Suisse restructuring head terms for the full payment holiday of the principal and partial interest holiday payment until March 31, 2014, conditioned on approval from our other lenders. In addition, the Company is currently exploring several alternatives with a goal of managing its working capital requirements and other commitments if current market charter hire rates continue, including a share capital increase, disposition of certain vessels in its current fleet and taking steps to achieve additional reductions in operating and other costs.

Pursuant to letter agreements dated September 6, 2011 and September 19, 2011 with Credit Suisse, which resolved a default by us under the Credit Suisse facility agreement, the Company agreed to execute a sale contract in respect of either of the M/V *Free Jupiter* or the M/V *Free Lady* no later than October 10, 2011. On November 8, 2011, we sold the M/V *Free Lady* for a sale price of \$21.9 million. Pursuant to the Fifth Supplemental Agreement dated

November 7, 2011 with Credit Suisse, the Company agreed to enter into a period time charter of at least 12 months for all our mortgaged vessels no later than December 31, 2011, which charter would cover the vessel's debt service plus \$1.0 million. If the foregoing time charter was not entered into by the required date, the Company agreed that will sell either the M/V *Free Jupiter* or both the M/V *Free Goddess* and the M/V *Free Hero* by January 31, 2012. The Company has not concluded any time charter agreement and any agreement for the sale of the above mentioned vessels. On February 15, 2012, the Company received from Credit Suisse restructuring head terms for the full payment holiday of the principal and partial interest holiday payment until March 31, 2014, which is conditioned on receiving approval from our other lenders.

In February, March and April 2012, the Company received notifications from Deutsche Bank Nederland and FBB that the Company is in default under its loan agreements as a result of the breach of certain covenants and the failure to pay principal and interest due under the loan agreements. Although the Company is seeking and will continue to seek waivers to these covenants from its lenders, and continues negotiations with the lenders to restructure its debt, there can be no assurances that we will be able to obtain such waivers or restructure our debt. If the Company is not able to obtain the necessary waivers and/or restructure its debt, this could lead to the acceleration of the outstanding debt under its debt agreements. The Company's failure to satisfy its covenants under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness would have a material adverse effect on the Company's business operations, financial condition and liquidity.

All of the above raises doubt regarding the Company's ability to continue as a going concern.

Generally accepted accounting principles require that long-term debt be classified as a current liability when a covenant violation gives the lender the right to call the debt at the balance sheet date, absent a waiver. Accordingly, as of December 31, 2011, the Company is required to reclassify its long term debt as current liabilities in its consolidated balance sheet since the Company has not received waivers in respect of the covenants that are breached at such time. As the Company believed it would succeed in restructuring its debt and receive the necessary waivers, the consolidated financial statements as of December 31, 2011, were prepared assuming that the Company would continue as a going concern. Accordingly, the financial statements did not include any adjustments relating to the recoverability and classification of recorded asset amounts, the amounts and classification of liabilities, or any other adjustments that might result in the event the Company is unable to continue as a going concern, except for the current classification of debt.

In 2009, we suspended the payment of cash dividends on our common stock because of prevailing economic conditions and to comply with restrictions in certain of our loan agreements. Because economic conditions remain uncertain, and because we are focusing on managing our cash obligations and renewing our fleet, we will not resume the payment of cash dividends at this time.

The dry bulk carriers we owned had an average age of approximately 14 years as of December 31, 2011. Effective April 1, 2009, and following our reassessment of the useful lives of our assets, the vessels' useful life was increased from 27 to 28 years. Our estimate was based on the current vessels' operating condition and the conditions prevailing in the market for same type of vessels. However, economics, rather than a set number of years, determines the actual useful life of a vessel. As a vessel ages, the maintenance costs rise particularly with respect to the cost of surveys. So long as the revenue generated by the vessel sufficiently exceeds its maintenance costs, the vessel will remain in use. If the revenue generated or expected future revenue does not sufficiently exceed the maintenance costs, or if the maintenance costs exceed the revenue generated or expected future revenue, then the vessel owner usually sells the vessel for scrap.

Cash Flows

Year Ended December 31, 2011 as Compared to Year Ended December 31, 2010

OPERATING ACTIVITIES — Net cash from operating activities decreased by \$16,332 to \$4,470 for the year ended December 31, 2011, as compared to \$20,802 of net cash from operating activities for the year ended December 31, 2010. The decrease resulted from the weak freight market in the year ended December 31, 2011 compared to 2010 and the reduced average number of vessels to 8.21 in the year ended December 31, 2011 from 9.65 in the year ended December 31, 2010.

INVESTING ACTIVITIES — Net cash from investing activities during the year ended December 31, 2011 was \$18,422, as compared to \$2,819 used in investing activities for the year ended December 31, 2010. This increase mainly reflected the net proceeds of \$24,474, the Company received from the sale of M/V *Free Envoy* and M/V *Free Lady* during the year ended December 31, 2011 as compared to net proceeds of \$2,846, the Company received from the sale of M/V *Free Destiny* during the year ended December 31, 2010.

FINANCING ACTIVITIES — The cash used in financing activities for the year ended December 31, 2011 was \$26,255, as compared to \$20,630 used in for the year ended December 31, 2010. The increase in cash used in financing activities was mainly due to the prepayment of \$19,800 made on November 8, 2011 towards the Credit Suisse loan facility as a result of the sale of M/V *Free Lady*, counterbalanced by the deferral of scheduled payments due in 2011 relating to Deutsche Bank and FBB facilities amounting to \$750 and \$838, respectively, the inability to pay scheduled

loan repayments due in 2011 relating to Deutsche Bank facility amounting to \$750, the decrease in restricted cash of \$5,255 during the year ended December 31, 2011, attributed to the release of the pledged deposit to ABN AMRO Bank in respect of the guarantee provided for the second installments of Hull 1 and Hull 2, which the Company advanced to the shipyard in March and May 2011, respectively, and the release of \$375 deposit held in Credit Suisse as minimum cash requirement, as a result of the sale of M/V *Free Lady*, compared to the increase in restricted cash of \$3,130 during 2010.

Year Ended December 31, 2010 as Compared to Year Ended December 31, 2009

OPERATING ACTIVITIES — Net cash from operating activities decreased by \$589 to \$20,802 for the year ended December 31, 2010, as compared to \$21,391 of net cash from operating activities for the year ended December 31, 2009. The decrease resulted from higher operating, voyage, general and administrative expenses in the year ended December 31, 2010 compared to the year ended December 31, 2009.

INVESTING ACTIVITIES — Net cash used in investing activities during the year ended December 31, 2010 was \$2,819, as compared to \$11,302 for the year ended December 31, 2009. This decrease reflected primarily the expenditures for the construction of two newbuilding vessels and the net cash sale proceeds of \$2,846 from the sale of M/V *Free Destiny* in the year ended December 31, 2010, as compared to the acquisition of M/V *Free Neptune* in the year ended December 31, 2009 for a total cost of \$11,302.

FINANCING ACTIVITIES — The cash used in financing activities for the year ended December 31, 2010 was \$20,630, as compared to \$7,126 used in the year ended December 31, 2009. The increase in cash used in financing activities was due to the following cash movements: (i) scheduled repayment of bank loans of \$14,800, (ii) a \$2,700 prepayment on November 1, 2010 for the Deutsche Bank Nederland facility as a result of the sale of vessel M/V *Free Destiny* and (iii) an increase in restricted cash of \$3,130 attributed to the pledged deposit to ABN AMRO in respect of the guarantee provided for the second installment of the two newbuildings, counterbalanced by the closing of the retention accounts with Credit Suisse due to the end of the waiver period relating to covenant breaches as of December 31, 2008. For the year ended December 31, 2009, the cash used in financing activities mainly consisted of: (i) scheduled repayments of bank loans of \$21,700 and (ii) prepayment of \$6,691 in total. For 2009, the cash provided from financing activities consisted of: (i) \$16,244 proceeds from the follow-on equity offering and (ii) \$6,000 from the FBB facility. The significant reduction of scheduled bank loan repayments for the year ended December 31, 2010 is due to: (i) \$500 reduction in the repayment of the Credit Suisse facility, (ii) \$5,400 reduction in the repayment of the Deutsche Bank Nederland facility and (iii) \$1,000 reduction in the repayment of the FBB facility. These reductions are mainly due to the amended repayment schedules for the loans resulting from refinancing of existing loans with FBB and Deutsche Bank Nederland.

Long-Term Debt

All the Company's credit facilities bear interest at LIBOR plus a margin, ranging from 2.25% to 4.25%, and are secured by mortgages on the financed vessels and assignments of vessels' earnings and insurance coverage proceeds. They also include affirmative and negative financial covenants of the borrowers, including maintenance of operating accounts, minimum cash deposits, average cash balances to be maintained with the lending banks and minimum ratios for the fair values of the collateral vessels compared to the outstanding loan balances. Each borrower is restricted under its respective loan agreement from incurring additional indebtedness, changing the vessels' flag without the lender's consent or distributing earnings.

The weighted average interest rate for the year ended December 31, 2011 and 2010 was 2.9% and 3%, respectively. Interest expense incurred under the above loan agreements amounted to \$3,173 (net of capitalized interest \$282), \$3,932 and \$3,708 for the years ended December 31, 2011, 2010 and 2009, respectively, and is included in "Interest and Finance Costs" in the consolidated statements of operations.

Deutsche Bank Nederland Facility

On September 2, 2011 the Company instructed the Deutsche Bank Nederland in accordance with relevant provision of the facility agreement to postpone the repayment installment of \$750 due on September 18, 2011, which will be paid on the termination date in December 2015.

In October 2011, the Company following negotiations with Deutsche Bank Nederland deferred the payment of an additional success fee equal to \$360 due on November 1, 2011 to 2012.

In December 2011, the Company did not pay the \$750 repayment installment along with accrued interest with Deutsche Bank Nederland.

On February 15, 2012, the Company received notice from Deutsche Bank Nederland according to which, failure to (i) repay the installment due in December 2011, (ii) pay regular interest on the loan, (iii) pay default interest on the loan, (iv) pay the success fee due in November 2011 (v) set new financial covenants and (vi) complying with loan to value covenant, are considered an event of default and requested from the Company to fulfill its obligations by March 15, 2012. In March 2012, the Company did not paid the aforementioned amounts as well as the \$750 repayment installment along with accrued interest due in March 2012. The Company was advised on April 26, 2012 that Deutsche Bank Nederland would approve the request to permanently amend the amortization schedule including

refinancing of the balloon due in November 2012, subject to documentation and receiving approval from FBB for the restructuring of the facilities.

Credit Suisse Facility

On July 15, 2011 the Company entered into a Fourth Supplemental Agreement dated with Credit Suisse, which amends its existing credit facility to, among other things, defer its payments totaling \$2,000 originally due in July 2011 until September 2011. The Fourth Supplemental Agreement, as originally entered into, contemplated that the Company would complete a proposed debt financing with an unrelated party, and that if the debt financing did not occur by September 5, 2011, the Company would sell one or two of the four vessels collateralizing the credit facility. This debt financing did not occur. Therefore, the Company initiated the sale of either the *M/V Free Jupiter* or the *M/V Free Lady* not later than September 19, 2011, with delivery of and payment for the vessel within 28 days from the date of the sale agreement. On September 19, 2011, by a letter agreement the Company agreed with Credit Suisse to an extension of the deadline from September 19, 2011 to October 10, 2011. The proceeds of this sale, except for amounts used to satisfy trade debt and agreed brokers' commission, are to be applied to pay down the amount outstanding on this facility.

The Fourth Supplemental Agreement, as amended, also provides that if Credit Suisse, in its discretion, determines that the prevailing charter market conditions for the vessels remaining as collateral for this facility are below the rates necessary to service its obligations under the Credit Suisse loan documents, Credit Suisse may at its discretion require the sale of the second of these vessels. This additional sale, if required, must occur prior to December 10, 2011. In addition, under the Fourth Supplemental Agreement, as amended, the margin on this facility was increased to 3.25% from 1.25% during the period until the sale procedure has been completed. After this period, the margin will revert to 1.25%. The Company has incurred amendment fees of \$150 for the year ended December 31, 2011, relating to this facility, which are included in the consolidated statements of operations in "Interest and Finance Costs."

In light of the successful sale of the M/V *Free Lady* on November 8, 2011, the Company entered into a Fifth Supplemental Agreement dated November 7, 2011 with Credit Suisse, which amended the Fourth Supplemental Agreement to, among other things, reduces the next five loan repayment installments starting from the third quarter of 2011. Pursuant to this agreement, the Company has agreed to enter into a period time charter of at least twelve months for all mortgaged vessels not later than December 31, 2011, which charter would cover the vessels' debt service plus \$1.0 million. If the foregoing time charters are not entered into by the date required, the Company has agreed that will sell, not later than January 31, 2012, either the M/V *Free Jupiter* or both the M/V *Free Goddess* and the M/V *Free Hero*. In addition, under the Fifth Supplemental Agreement, the margin on this facility is increased to 3.25% during the period until either the period employment or the sale procedure has been completed, after which time the margin will be reduced to 2.75%. According to the terms of the agreement, failure to comply with the above would constitute an event of default.

The Company has not concluded any time charter agreement, nor has it entered into an agreement for the sale of the above-mentioned vessels. On February 2, 2012, the Company agreed with Credit Suisse to defer its payments totaling \$700 originally due on January 31, 2012 until the next repayment date April 30, 2012, which was further deferred to May 31, 2012 as per letter dated April 25, 2012. The interest payment of \$348 originally due on February 8, 2012, has been agreed to be paid in two installments as follows: \$147 paid on February 8, 2012 and \$201 to be paid on April 30, 2012, which was further deferred to May 31, 2012 as per letter dated April 25, 2012. In addition the interest payment of \$348 originally due on May 10, 2012, has been agreed to be paid in two installments as follows: \$147 to be paid on May 10, 2012 and \$201 on May 31, 2012. On February 15 2012, the Company received a proposal from Credit Suisse containing restructuring head terms for the full payment holiday of the principal and partial interest holiday payment until March 31, 2014, subject to approval from the Company's other lenders. We have been advised by Deutsche Bank that it will approve this proposal, and we are currently in discussions with FBB.

FBB Facility

On January 27, 2012, the Company entered into a First Supplemental Agreement with FBB, which amends its existing credit facility to defer the repayment installment of \$837.5 and the interest payment of \$197 both due on December 16, 2011 until the next repayment date March 16, 2012. In addition, the bank granted a waiver to the security value covenant and the financial covenants, whose testing has been waived until March 16, 2012. On March 23, 2012, the Company received a notice from FBB according to which the failure to (i) pay the \$1,675 repayment installment due in March 2012 (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. On April 12, 2012, the Company received notice from FBB according to which along with the previously mentioned events, the failure to make periodic monthly installments into the retention account since September 2011 and the violation of loan-to-value covenant constitute events of default and notifies the Company that if remedy of all of the above is not made up to April 20, 2012, FBB will take whatever action is open to them. The Company is in discussions to permanently amend the amortization schedule.

ABN AMRO Facility

On September 10, 2010, the Company signed an offer letter with ABN AMRO securing, subject to customary legal documentation and payment of an arrangement fee, commitments for pre-delivery and post-delivery debt financing up to an amount of \$32,400 for the purchase of two newbuilding Handysize vessels. The facility, which would have been available for drawdown until December 31, 2012, would have been repayable in 20 quarterly installments plus a balloon payment, commencing three months after the delivery of the vessels. The vessels would have been used as collateral for the facility, which would bear interest at LIBOR plus margin and would include customary financial covenants.

On October 4, 2010, ABN AMRO issued letters of guarantee in favor of the Chinese shipyard covering the second installment for the newbuilding vessels, amounting to \$2,440 for each vessel. On the same date, the Company entered into a bank guarantee facility agreement for the issuance of the letters of guarantee. The letters of guarantee mature on the earliest between the date of the payment of the second installment and November 30, 2011. In March 2011 and May 2011, the Company advanced the second installment amounting to \$2,440 and \$2,440 for Hull 1 and Hull 2, respectively, and the relevant letters of guarantee were cancelled.

By letter dated December 30, 2011, the Company received notice from ABN AMRO that the above-described commitment for pre-delivery and post-delivery debt financing had been canceled due to the Company's failure to pay commitment fees as prescribed in the offer letter, that were considered as events of default, and the occurrence of various material adverse changes as considered by ABN AMRO. The commitment fees that were paid by the Company were reimbursed by ABN AMRO in 2012.

Loan Covenants

As of December 31, 2011, our loan agreements contain various financial covenants as follows:

- Credit Suisse loan agreement: (i) the Company is required to maintain minimum cash balances of \$375 for each of its vessels covered by the loan agreement; and (ii) the aggregate fair market value of the financed vessels must not be less than 135% of the outstanding loan balance and the swap exposure.

- FBB loan agreement: (i) the Company is required to maintain an average corporate liquidity of at least \$3,000; (ii) the leverage ratio of the corporate guarantor shall not at any time exceed 55%; (iii) the ratio of EBITDA to net interest expense shall not be less than 3; and (iv) the fair market value of the financed vessels shall be at least (a) 115% for the period July 1, 2010 to June 30, 2011 and (b) 125% thereafter. The covenants described in clauses (i), (ii) and (iii) above are tested annually on December 31st and their testing has been waived by the bank until March 16, 2012.

Deutsche Bank Nederland loan agreement: (i) the interest coverage ratio to be recalculated and reset; (ii) the debt service coverage ratio to be recalculated and reset; (iii) the gearing ratio shall not exceed 2.5; (iv) the outstanding loan balance shall not be more than a ratio of the fair market value of the financed vessels as follows: (a) 100% from July 1, 2010 until and including June 30, 2011, (b) 110% from July 1, 2011 until and including June 30, 2012, (c) 120% from July 1, 2012 until and including December 30, 2012 and (d) 125% from December 31, 2012 and thereafter. The covenants described in clauses (i), (iii) and (iv) above are tested quarterly and the covenant in clause (ii) above is tested annually on December 31st.

Based on the loan agreements, the Company is required to meet the covenants described above. As of December 31, 2011, the Company was in breach of certain of its financial covenants for all of its loan agreements, including the loan-to-value ratios, interest cover ratios, minimum liquidity requirements and leverage ratios. Thus, in accordance with guidance related to classification of obligations that are callable by the creditor, the Company has classified all of the related long-term debt amounting to \$88,946 as current at December 31, 2011.

Off-Balance Sheet Arrangements

As of December 31, 2011, we did not have any off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of Regulation S-K promulgated by the SEC.

Summary of Contractual Obligations

The following table summarizes our contractual obligations and their maturity dates as of December 31, 2011:

(Dollars in thousands)	Payments Due by Period						
	Total	Less than 1 year	2- year	3- year	4- year	5- year	More than 5 years
	(U.S. dollars in thousands)						
Long-term debt	\$88,946	\$88,946	\$—	\$—	\$—	\$—	\$—
Interest on variable-rate debt	3,334	3,334	—	—	—	—	—
Yard construction installments	20,060	20,060	—	—	—	—	—
Services fees to the Manager	11,038	1,635	1,635	1,635	1,635	1,635	2,863

Management fees to the Manager	16,642	1,765	911	911	911	911	11,233
Total obligations	\$140,020	\$115,740	\$2,546	\$2,546	\$2,546	\$2,546	\$14,096

The above table does not include our share of the monthly rental expenses for our offices of approximately 8.7 Euro (in thousands).

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. Directors and Senior Management

The following sets forth the names of the members of our board of directors and our senior management. Generally, each member of the board of directors serves for a three-year term. Additionally, the directors are divided among three classes, so the term of office of a certain number of directors expires each year. Consequently, the number of directors who stand for re-election each year may vary. Our executive officers are appointed by, and serve at the pleasure of, the board of directors. The primary business address of each of our executive officers and directors is 10, Eleftheriou Venizelou Street (Panepistimiou Ave.), 106 71, Athens, Greece.

Name	Age	Position	Term Expires
Ion G. Varouxakis	41	Chairman of the Board of Directors, Chief Executive Officer and President	2014
Alexandros Mylonas	38	Chief Financial Officer and Treasurer	—
George Kalogeropoulos	51	Director	2012
Didier Salomon	66	Director	2012
Focko H. Nauta	54	Director	2013
Dimitrios Panagiotopoulos	51	Director	2014
Keith Bloomfield	41	Director	2013
Maria Badekas	40	Secretary	—

Ion G. Varouxakis is one of our founders and is the Chairman of our Board of Directors. He also serves as our President and Chief Executive Officer. In 2003, Mr. Varouxakis founded Free Bulkers, the beginning of a single-vessel, self-financed entrepreneurial venture that led to FreeSeas' founding and NASDAQ listing in 2005. Prior to founding Free Bulkers, Mr. Varouxakis held since 1997 management positions in private shipping companies operating in the drybulk sector. Mr. Varouxakis holds a candidature degree in law from the Catholic University of Saint Louis in Brussels and a Bachelor of Science degree in economics from the London School of Economics and Political Science. Mr. Varouxakis is a member of the Hellenic Committee of the Korean Register of Shipping, a member of the Hellenic and Black Sea Committee of Bureau Veritas and an officer of the reserves of the Hellenic Army.

Alexandros Mylonas is our Chief Financial Officer and joined us in October 2009. In addition, he has served as our Treasurer since December 2010. Prior to joining FreeSeas, Mr. Mylonas was the Banking Executive of Cardiff Marine Inc., a ship management company managing a fleet of tankers and drybulk carriers including the fleet of DryShips Inc. a company listed on the NASDAQ Global Select Market. From 2005 to 2008, Mr. Mylonas was an Account Manager with the Global Shipping Group of Fortis Bank, an international shipping bank. From 2002 to 2005, Mr. Mylonas was an Investment Associate with NBG Venture Capital, a private equity firm investing in Southeast Europe. Mr. Mylonas holds an MBA in Finance and Supply Chain Management from Michigan State University and a Bachelor of Business Administration from University of Macedonia in Thessaloniki.

George Kalogeropoulos joined our Board of Directors in December 2010. He has over 30 years of marine transportation experience, holding managerial positions in brokering, chartering, ship management, and operations for large shipping companies in London and Greece. Since 1999, Mr. Kalogeropoulos has served as the Commercial/Chartering Director of a number of affiliates of the Restis Group of Companies. Mr. Kalogeropoulos currently serves on the boards of several companies in the transportation industry, including Swissmarine Corporation Ltd., South African Marine Corp., Safore Pty, and Safbulk Pty Ltd. He is a member of the Hellenic Shipbrokers Association.

Didier Salomon joined our Board of Directors in 2008. He spent fifteen years as head of global shipping at BNP Paribas overseeing a \$10 billion shipping portfolio and managing an international team of approximately 65 professionals. Prior to that, he held similar positions at Banque Louis-Dreyfus, Banque Bruxelles Lambert and Credit Naval. In late 2009, he established Shipadvise, a French company focusing on advisory and consultancy in shipping. Mr. Salomon holds a diploma in political science from Sciences Po Paris, a Master degree in law from Paris Assas and a post graduate diploma in banking from Centre d'Etudes Superieures de Banque. For many years he has been a lecturer on the economy and capital markets at the Conservatoire des Arts et Metiers in Paris.

Focko H. Nauta joined our Board of Directors in 2005. Since September 2000, he has also been a director of FinShip SA, a ship financing company. From 1997 through 1999, Mr. Nauta served as a managing director of Van Ommere Shipbroking, a London-based ship brokering company. Prior to 1997, he was a general manager of a Fortis Bank branch. Mr. Nauta holds a degree in law from Leiden University in the Netherlands.

Dimitrios Panagiotopoulos joined our Board of Directors in 2007. He is the head of shipping and corporate banking of Proton Bank, a Greek private bank, where he has served since April 2004. From January 1997 to March 2004, he served as deputy head of the Greek shipping desk of BNP Paribas and before that for four years as senior officer of the shipping department of Credit Lyonnais Greece. From 1990 to 1993, he worked as chief accountant in Ionia Management, a Greek shipping company. He holds a degree in economics from Athens University and a masters of science in shipping, trade and finance from City University of London. He was an officer of the Greek Special Forces and today is a captain of the reserves of Hellenic Army.

Keith Bloomfield joined our Board of Directors in 2010. He has over 13 years of experience in mergers and acquisitions, corporate law, and wealth management. He is currently the President and Chief Executive Officer of Forbes Family Trust, a private wealth management firm which he founded in September 2009. From October 2006 to September 2009, he was a Senior Managing Director and Corporate Counsel at Third Avenue Management, a global asset management firm with approximately \$16 billion in assets under management. At Third Avenue, he was responsible for mergers and acquisitions, corporate transactions and business development. Prior to joining Third Avenue, he was a corporate attorney with Simpson Thacher & Bartlett LLP. Mr. Bloomfield earned an LL.M. (Master of Law) in Taxation from New York University School of Law and a J.D. with honors from Hofstra University School of Law, and graduated summa cum laude with a B.A. in History from Tulane University.

Maria Badekas holds a Master of Law from University of Cambridge (UK) and a Bachelor in English and European Laws from Essex University (UK). From 2001 to 2003 she was a political expert to the European Commission, DG Development. From 2003 to 2005, she was a special advisor to the Mayor of Athens and participated in the preparation of the Athens 2004 Olympic Games (international affairs and public relations). Between 2005 and 2006, she was a special advisor to the Minister of the Hellenic Ministry of Foreign Affairs, and from 2006 to 2009, she was a special advisor to the General Secretary for European Affairs of the Hellenic Ministry of Foreign Affairs.

B. Compensation

The total gross cash compensation paid for 2010 and for the six months ended June 30, 2011 to our directors was \$194 and \$102, respectively. We have agreed to pay each of our non-executive directors a fee of \$40 per year, except that if the U.S. Dollar/Euro exchange rate exceeds 1.35 on the last business day of each quarter, then the amount of the directors' fees payable for that quarter will be increased so that the amount payable in U.S. Dollars will be the equivalent in Euros based on a 1.35 U.S. Dollar/Euro exchange rate. Our directors were not paid any cash directors' fees for the last three quarters of 2011. At its April 2012 meeting, the Company's Board of Directors approved the issuance of an aggregate of 199,642 shares of the Company's common stock to the non-executive members of our Board of Directors in payment of \$31 per person in unpaid Board fees for the last three quarters of 2011. The aggregate number of shares to be issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the last three quarters of 2011, which are the dates that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

Our Manager receives a monthly management fee from us to provide overall executive and commercial management of our affairs. See "Principal Shareholders" and "Certain Relationships and Related Transactions."

There are no agreements between us and any director that provide for benefits upon termination or retirement.

Other than through stock options, pursuant to our Amended and Restated 2005 Stock Incentive Plan and as determined by our Board of Directors, our executive officers do not receive any compensation, including any cash compensation, from us.

C. Board Practices

The term of our Class A directors expires in 2012, the term of our Class B directors expires in 2013 and the term of our Class C directors expires in 2014. There are no agreements between us and any director that provide for benefits upon termination or retirement.

Board Committees

Our board of directors has an audit committee, a compensation committee, a nominating committee and a corporate governance committee. Our board of directors has adopted a charter for each of these committees.

Audit Committee

Our audit committee consists of Messrs. Nauta, Salomon and Panagiotopoulos, each of whom is an independent director. Mr. Nauta has been designated the “Audit Committee Financial Expert” under the SEC rules and the current listing standards of the NASDAQ Marketplace Rules.

The audit committee has powers and performs the functions customarily performed by such a committee (including those required of such a committee under the NASDAQ Marketplace Rules and the SEC). The audit committee is responsible for selecting and meeting with our independent registered public accounting firm regarding, among other matters, audits and the adequacy of our accounting and control systems.

Compensation Committee

Our compensation committee consists of Messrs. Bloomfield and Panagiotopoulos, each of whom is an independent director. The compensation committee reviews and approves the compensation of our executive officers.

Nominating Committee

Our nominating committee consists of Messrs. Bloomfield and Panagiotopoulos, each of whom is an independent director. The nominating committee is responsible for overseeing the selection of persons to be nominated to serve on our board of directors.

Corporate Governance Committee

Our corporate governance committee consists of Messrs. Salomon and Bloomfield, each of whom is an independent director. The corporate governance committee ensures that we have and follow appropriate governance standards.

Director Independence

Our securities are listed on the NASDAQ Stock Market and we are exempt from certain NASDAQ listing requirements including the requirement that our board be composed of a majority of independent directors. The Board of Directors has evaluated whether each of Messrs. Nauta, Salomon, Panagiotopoulos and Bloomfield is an “independent director” within the meaning of the listing requirements of NASDAQ. The NASDAQ independence definition includes a series of objective tests, such as that the director is not our employee and has not engaged in various types of business dealings with us. In addition, as further required by the NASDAQ requirements, the Board of Directors made a subjective determination as to each of Messrs. Nauta, Salomon, Panagiotopoulos and Bloomfield that no relationships exist which, in the opinion of the Board of Directors, would interfere with the exercise of his independent judgment in carrying out the responsibilities of a director. In making this determination, the Board of Directors reviewed and discussed information provided by each of Messrs. Nauta, Salomon, Panagiotopoulos and Bloomfield with regard to his business and personal activities as they may relate to us and our management. After reviewing the information presented to it, our Board of Directors has determined that each of Messrs. Nauta, Salomon, Panagiotopoulos and Bloomfield is “independent” within the meaning of such rules. Our independent directors will meet in executive session as often as necessary to fulfill their duties, but no less frequently than annually.

Code of Conduct and Ethics

We have adopted a code of conduct and ethics applicable to our directors, officers and employees in accordance with applicable federal securities laws and the NASDAQ Marketplace Rules.

D. Employees

We currently have no employees. Our Manager is responsible for employing all of the executive officers and staff to execute and supervise our operations based on the strategy devised by the Board of Directors and subject to the approval of our Board of Directors and for recruiting, and employing, either directly or through a crewing agent, the senior officers and all other crew members for our vessels.

Amended and Restated 2005 Stock Incentive Plan

Our Amended and Restated 2005 Stock Incentive Plan was implemented for the purpose of furthering our long-term stability, continuing growth and financial success by retaining and attracting key employees, officers and directors through the use of stock incentives. Our shareholders approved the plan on December 19, 2006. Awards may be granted under the plan in the form of incentive stock options, nonqualified stock options, stock appreciation rights,

dividend equivalent rights, restricted stock, unrestricted stock, restricted stock units and performance shares. Pursuant to the plan, we have reserved 300,000 shares of our common stock for awards, of which 216,000 remain available for grant as of the date of this annual report.

In December 2007, the Company's Board of Directors granted 9,000 options to directors and 25,000 options to executive officers, as adjusted to reflect the reverse stock split effective October 1, 2010, of which 28,000 would vest in one year, 3,000 would vest in two years and 3,000 in three years from the grant, all at an exercise price of \$41.25 per share. Effective December 18, 2009, certain of the Company's officers and directors have forfeited 22,000 of the stock options granted to them, leaving 12,000 stock options outstanding as of December 31, 2011 and 2010. All the outstanding stock options, which expire on December 24, 2012, are vested and remain unexercised as of December 31, 2011.

On December 31, 2009, the Company's Board of Directors awarded 255,000 restricted shares, as adjusted to reflect the reverse stock split effective October 1, 2010, to its non-executive directors, executive officers and certain of Manager's employees. Of the unvested restricted shares amounted to 134,000 as of December 31, 2010, 10,000 and 4,000 restricted shares with an original vesting date on December 31, 2012 have been forfeited in June 2011 and October 2011, respectively. Of the remaining unvested restricted shares amounted to 120,000 as of December 31, 2011, 70,000 restricted shares will vest on December 31 2012 and 50,000 restricted shares will vest on December 31, 2013.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. Major Shareholders

The following table sets out certain information regarding the beneficial ownership of our common stock as of April 30, 2012 by each of our officers and directors, all of our officers and directors as a group, and each person or group of affiliated persons who is currently known to us to be the beneficial owner of 5% or more of the shares of our common stock.

Unless otherwise indicated, we believe that all persons named in the table have sole voting and investment power with respect to all shares of beneficially owned by them. As beneficial owners of shares of common stock, the persons named in the table do not have different voting rights than any other holder of common stock.

Name	Number of Shares of Common Stock Beneficially Owned	Shares of Common Stock Beneficially Owned (1)	
Ion G. Varouxakis (2)	542,940	8.38	%
All directors and executive officers as a group (eight persons)(3)	608,340	9.39	%
FS Holdings Limited (4)	648,120	10.01	%
Broadbill Investment Partners LP	370,297	5.72	%

(1) For purposes of computing the percentage of outstanding shares of common stock held by each person named above, any shares that the named person has the right to acquire within 60 days under warrants or options are deemed to be outstanding for that person, but are not deemed to be outstanding when computing the percentage ownership of any other person. Based on 6,475,625 shares of common stock outstanding as of April 30, 2012. Reflects 502,940 shares owned by The Mida's Touch S.A., a Marshall Islands corporation wholly owned by Mr. Varouxakis and 40,000 shares held directly by Mr. Ion Varouxakis. Does not include 8,000 shares owned of record by V Estates S.A., which is controlled by his father, or 6,120 shares owned of record by his mother, as to (2) which shares he disclaims beneficial ownership. Does not include 1,660,694 shares to be issued to our Manager, which is controlled by Mr. Varouxakis, in payment of unpaid management and services fees due to the Manager for the first quarter of 2012. Upon issuance of these shares, Mr. Varouxakis will beneficially own 26% of the Company's outstanding common stock.

(3) Includes 50,000 restricted shares, which do not vest until December 31, 2013. Does not include an aggregate of (3) 199,642 shares to be issued to the non-executive directors of the Company in payment of unpaid directors' fees for the last three quarters of 2011.

- (4) Reflects 561,757 shares owned by FS Holdings Limited, a Marshall Islands corporation, and 86,363 shares owned by Benbay Limited, a Republic of Cyprus corporation, each of which is controlled by the Restis family.

B. Related Party Transactions

Manager

All vessels (except M/V *Free Fighter*, M/V *Free Destiny*, M/V *Free Envoy* and M/V *Free Lady*, which were sold in April 2007, August 2010, May 2011 and November 2011, respectively) receive management services from the Manager, pursuant to ship management agreements between each of the ship-owning companies and the Manager.

In June 2011, the Company entered into an amended and restated management and services agreement with the Manager pursuant to which the monthly technical management fee increased from \$16.5 to \$19.0 and the monthly services fee increased from \$118.5 to \$136.3, respectively, effective June 1, 2011.

Each of the Company's ship-owning subsidiaries pays, as per its management agreement with the Manager, monthly technical management fee of \$19.0 (on the basis that the \$/Euro exchange rate is 1.30 or lower; if on the first business day of each month the \$/Euro exchange rate exceeds 1.30 then the management fee payable will be increased for the month in question, so that the amount payable in \$ will be the equivalent in Euro based on 1.30 \$/Euro exchange rate) plus a fee of \$0.4 per day for superintendant attendance and other direct expenses.

FreeSeas also pays the Manager a fee equal to 1.25% of the gross freight or hire from the employment of FreeSeas' vessels. The Manager previously has subcontracted the charter and post charter management of FreeSeas' vessels and pays the 1.25% of the gross freight or hire from the employment of the vessels to Safbulk, an entity affiliated with one Company's major shareholder. Such sub-management agreement was terminated in March 2012 and the Manager has commenced the provision of the commercial management of our fleet leveraging on its in-house capabilities, systems and network of connections. In addition, FreeSeas pays a 1% commission on the gross purchase price of any new vessel acquired or the gross sale price of any vessel sold by FreeSeas with the assistance of the Manager. In this respect, the Company paid Free Bulklers \$261 relating to the sale of the M/V *Free Envoy* and M/V *Free Lady* in 2011 and \$32 relating to the sale of M/V *Free Destiny* and \$488 relating to the signing of shipbuilding contracts for the construction of two handysize vessels in 2010. In addition, the Company has incurred commission expense relating to its commercial agreement with the Manager amounting to \$371, \$728 and \$752 for the years ended December 31, 2011, 2010 and 2009 respectively, included in "Commissions" in the consolidated statements of operations.

FreeSeas pays, as per its services agreement with the Manager, a monthly fee of \$136.3, (on the basis that the \$/Euro exchange rate is 1.35 or lower; if on the last business day of each month the \$/Euro exchange rate exceeds 1.35 then the service fee payable will be adjusted for the following month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.35 \$/Euro exchange rate) as compensation for services related to accounting, financial reporting, implementation of Sarbanes-Oxley internal control over financial reporting procedures and general administrative and management services plus expenses. The Manager is also entitled to a termination fee if the agreement is terminated upon a "change of control" as defined in the services agreement. The termination fee as of December 31, 2011 would have been \$100,525. In connection with the shares to be issued to the Manager in payment of unpaid management and services fees, described below, the Manager has waived its right to terminate the services agreement and receive such termination fee.

Fees and expenses charged by the Manager are included in our consolidated financial statements in "Management fees to a related party," "General and administrative expenses," "Operating expenses," "Gain on sale of vessel," "Vessel impairment loss" and "Advances for vessels under construction." The total amounts charged for the year ended December 31, 2011, 2010 and 2009 amounted to \$4,451 (\$1,900 of management fees, \$1,609 of services fees, \$146 of superintendent fees, \$144 for compensation of relocation expenses, \$179 for other expenses and \$473 for management fees and supervision expenses for vessels under construction), \$3,826 (\$1,978 of management fees, \$1,439 of services fees, \$178 of superintendent fees, \$117 for other expenses and \$114 for management fees and supervision expenses for vessels under construction) and \$3,245 (\$1,874 of management fees, \$1,313 of services fees and \$58 of superintendent fees), respectively.

At its April 2012 meeting, the Company's Board of Directors approved the issuance of 1,660,694 shares of the Company's common stock to the Manager in payment of the \$926 in unpaid fees due to the Manager for the first quarter of 2012 under the management and services agreements with the Company. The number of shares to be issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws. Upon issuance of these restricted shares, Mr. Varouxakis, who is our Chairman, Chief Executive Officer and President and the owner of the Manager, will beneficially own 26% of the outstanding common stock of the Company.

On December 31, 2009, the Company granted 84,000 restricted shares to certain of the Manager's employees vesting in December 2012 pursuant to the Company's equity incentive plan.

The cost of these shares is amortized over their vesting period and is included in "General and administrative expenses" in the consolidated statements of operations.

The balance due from the Manager as of December 31, 2011 and December 31, 2010 was \$563 and \$1,285 respectively. The amount paid to the Manager for office space during the year ended December 31, 2011, 2010 and 2009 was \$178, \$204 and \$197, respectively and is included in "General and administrative expenses" in the consolidated statements of operations.

First Business Bank (FBB)

FreeSeas received from FBB, in which one of the Company's major shareholders holds a substantial interest, and in which the Company's Chairman, Chief Executive Officer and President owns a minority interest, a loan of \$27,750 in December 2009, to refinance its existing loan balance of \$21,750 with FBB and to receive additional liquidity of up to \$6,000 with a first priority mortgage over the M/V *Free Impala* and the M/V *Free Neptune*. The outstanding balance of the loan as of December 31, 2011 was \$23,237. Interest charged under the loan facility for the year ended December 31, 2011, 2010 and 2009 amounts to \$812, \$893 and \$629, respectively, and is included in the interest and finance cost in the consolidated statements of operations.

Other Related Parties

The Company, through Free Bulkers and previously Safbulk uses from time to time a ship-brokering firm associated with family members of the Company's Chairman, Chief Executive Officer and President for certain of the charters of the Company's fleet. During the year ended December 31, 2011, 2010 and 2009 such ship-brokering firm charged the Company commissions of \$56, \$175 and \$48, respectively, which are included in "Commissions" in the consolidated statements of operations. The balance due to the ship-brokering firm as of December 31, 2011 and December 31, 2010 was \$84 and \$98 respectively.

At its April 2012 meeting, the Company's Board of Directors approved the issuance of an aggregate of 199,642 shares of the Company's common stock to the non-executive members of our Board of Directors in payment of \$31 per person in unpaid Board fees for the last three quarters of 2011. The aggregate number of shares to be issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the last three quarters of 2011, which are the dates that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

C. Markets

Our common stock and Class Z warrants began trading on the NASDAQ Global Market on November 8, 2007 under the trading symbols FREE and FREEZ, respectively. Prior to that time our common stock and Class Z warrants were traded on the NASDAQ Capital Market under the symbols FREE and FREEZ, respectively. Our Class Z warrants expired on August 12, 2011.

The closing high and low sales prices of our common stock and Class Z warrants as reported by the NASDAQ Stock Market, for the quarters and months indicated, are as follows (adjusted to give effect of our one share for five share reverse stock split that was effective on October 1, 2010):

For the Years Ended:	Common Stock		Class Z Warrants	
	High	Low	High	Low
December 31, 2007	\$51.20	\$13.80	\$ 5.20	\$ 0.48
December 31, 2008	39.85	4.50	3.35	0.05
December 31, 2009	17.45	5.85	0.65	0.08
December 31, 2010	7.95	3.61	0.25	0.01
December 31, 2011	3.89	0.40	0.09	0.02

For Quarters Ended:	Common Stock		Class Z Warrants	
	High	Low	High	Low
March 31, 2010	\$ 6.70	\$ 6.40	\$ 0.20	\$ 0.20
June 30, 2010	7.45	5.85	0.20	0.10

ITEM 10. ADDITIONAL INFORMATION

A. Share Capital

Not applicable.

B. Memorandum and Articles of Incorporation

The information required herein was provided in the Registration Statement on Form F-1 (File No. 333-145203), the report on Form 6-K dated October 22, 2009, both previously filed by us with the Securities and Exchange Commission and incorporated herein by reference, and filed herewith as Exhibit 1.5.

One million shares of our preferred stock have been designated Series A Participating Preferred Stock in connection with our adoption of a shareholder rights plan as described below under “—Shareholder Rights Plan.”

Shareholder Rights Plan

General

Each share of our common stock includes a right that entitles the holder to purchase from us a unit consisting of one-thousandth of a share of our Series A participating preferred stock at a purchase price of \$90.00 per unit, subject to specified adjustments. The rights are issued pursuant to a rights agreement between us and American Stock Transfer & Trust Company, LLC, as rights agent. Until a right is exercised, the holder of a right will have no rights to vote or receive dividends or any other shareholder rights.

The rights may have anti-takeover effects. The rights will cause substantial dilution to any person or group that attempts to acquire us without the approval of our board of directors. As a result, the overall effect of the rights may be to render more difficult or discourage any attempt to acquire us. Because our board of directors can approve a redemption of the rights or a permitted offer, the rights should not interfere with a merger or other business combination approved by our board of directors.

We have summarized the material terms and conditions of the rights agreement and the rights below. For a complete description of the rights, we encourage you to read the rights agreement, which we have filed as an exhibit to this annual report.

Detachment of the Rights

The rights are attached to all certificates representing our outstanding common stock and will attach to all common stock certificates we issue prior to the rights distribution date that we describe below. The rights are not exercisable until after the rights distribution date and will expire at the close of business on the tenth anniversary date of the adoption of the rights plan, unless we redeem or exchange them earlier as described below. The rights will separate from the common stock and a rights distribution date will occur, subject to specified exceptions, on the earlier of the following two dates:

- 10 days following a public announcement that a person or group of affiliated or associated persons or an “acquiring person” has acquired or obtained the right to acquire beneficial ownership of 15% or more of our outstanding common stock; or
- 10 business days following the start of a tender or exchange offer that would result, if closed, in a person becoming an “acquiring person.”

Existing shareholders and their affiliates are excluded from the definition of “acquiring person” for purposes of the rights, and therefore their ownership or future share acquisitions cannot trigger the rights. Specified “inadvertent” owners that would otherwise become an acquiring person, including those who would have this designation as a result of repurchases of common stock by us, will not become acquiring persons as a result of those transactions.

Our board of directors may defer the rights distribution date in some circumstances, and some inadvertent acquisitions will not result in a person becoming an acquiring person if the person promptly divests itself of a sufficient number of shares of common stock.

Until the rights distribution date:

- our common stock certificates will evidence the rights, and the rights will be transferable only with those certificates; and

- any new shares of common stock will be issued with rights and new certificates will contain a notation incorporating the rights agreement by reference.

As soon as practicable after the rights distribution date, the rights agent will mail certificates representing the rights to holders of record of common stock at the close of business on that date. After the rights distribution date, only separate rights certificates will represent the rights.

We will not issue rights with any shares of common stock we issue after the rights distribution date, except as our board of directors may otherwise determine.

Flip-In Event

A “flip-in event” will occur under the rights agreement when a person becomes an acquiring person. If a flip-in event occurs and we do not redeem the rights as described under the heading “—Redemption of Rights” below, each right, other than any right that has become void, as described below, will become exercisable at the time it is no longer redeemable for the number of shares of common stock, or, in some cases, cash, property or other of our securities, having a current market price equal to two times the exercise price of such right.

If a flip-in event occurs, all rights that then are, or in some circumstances that were, beneficially owned by or transferred to an acquiring person or specified related parties will become void in the circumstances the rights agreement specifies.

Flip-Over Event

A “flip-over event” will occur under the rights agreement when, at any time after a person has become an acquiring person:

- we are acquired in a merger or other business combination transaction; or
- 50% or more of our assets, cash flows or earning power is sold or transferred.

If a flip-over event occurs, each holder of a right, other than any right that has become void as we describe under the heading “—Flip-In Event” above, will have the right to receive the number of shares of common stock of the acquiring company having a current market price equal to two times the exercise price of such right.

Antidilution

The number of outstanding rights associated with our common stock is subject to adjustment for any stock split, stock dividend or subdivision, combination or reclassification of our common stock occurring prior to the rights distribution date. With some exceptions, the rights agreement does not require us to adjust the exercise price of the rights until cumulative adjustments amount to at least 1% of the exercise price. It also does not require us to issue fractional shares of our preferred stock that are not integral multiples of one one-hundredth of a share, and, instead we may make a cash adjustment based on the market price of the common stock on the last trading date prior to the date of exercise. The rights agreement reserves us the right to require, prior to the occurrence of any flip-in event or flip-over event that, on any exercise of rights, that a number of rights must be exercised so that we will issue only whole shares of stock.

Redemption of Rights

At any time until 10 days after the date on which the occurrence of a flip-in event is first publicly announced, we may redeem the rights in whole, but not in part, at a redemption price of \$0.01 per right. The redemption price is subject to adjustment for any stock split, stock dividend or similar transaction occurring before the date of redemption. At our option, we may pay that redemption price in cash, shares of common stock or any other consideration our board of directors may select. The rights are not exercisable after a flip-in event until they are no longer redeemable. If our board of directors timely orders the redemption of the rights, the rights will terminate on the effectiveness of that action.

Exchange of Rights

We may, at our option, exchange the rights (other than rights owned by an acquiring person or an affiliate or an associate of an acquiring person, which have become void), in whole or in part. The exchange must be at an exchange ratio of one share of common stock per right, subject to specified adjustments at any time after the occurrence of a flip-in event and prior to:

- any person other than our existing shareholders becoming the beneficial owner of common stock with voting power
- equal to 50% or more of the total voting power of all shares of common stock entitled to vote in the election of directors; or
- the occurrence of a flip-over event.

Amendment of Terms of Rights

While the rights are outstanding, we may amend the provisions of the rights agreement only as follows:

- to cure any ambiguity, omission, defect or inconsistency;

- to make changes that do not adversely affect the interests of holders of rights, excluding the interests of any acquiring person; or

- to shorten or lengthen any time period under the rights agreement, except that we cannot change the time period when rights may be redeemed or lengthen any time period, unless such lengthening protects, enhances or clarifies the benefits of holders of rights other than an acquiring person.

At any time when no rights are outstanding, we may amend any of the provisions of the rights agreement, other than decreasing the redemption price.

C. Material Contracts

Except as described elsewhere in this document, we have no material contracts, other than contracts entered into in the ordinary course of business, to which the Company or any member of the group is a party.

D. Exchange Controls and Other Limitations Affecting Security Holders

Under Marshall Islands law, there are currently no restrictions on the export or import of capital, including foreign exchange controls or restrictions that affect the remittance of dividends, interest or other payments to non-resident holders of our shares.

E. Taxation

The following is a discussion of the material Marshall Islands and United States federal income tax consequences relevant to a U.S. Holder, as defined below, of our common stock. This discussion does not purport to deal with the tax consequences of owning common stock to all categories of investors, some of which, such as dealers in securities,

investors whose functional currency is not the United States dollar, and investors that own, actually or under applicable constructive ownership rules, 10% or more of the voting power of our stock, may be subject to special rules. This discussion deals only with U.S. Holders that hold the common stock as a capital asset. You are encouraged to consult your own tax advisors concerning the overall tax consequences arising in your own particular situation under United States federal, state, local or foreign law of the ownership of common stock.

Marshall Islands Tax Consequences

We are incorporated in the Marshall Islands. Under current Marshall Islands law, we are not subject to tax on income or capital gains, and no Marshall Islands withholding tax will be imposed upon payments of dividends by us to our stockholders provided such stockholders are not residents of the Marshall Islands. Holders of our common stock or warrants who are not residents of, domiciled in, or carrying on any commercial activity in the Marshall Islands will not be subject to Marshall Islands tax on the sale or other disposition of our common stock or warrants.

United States Federal Income Tax Consequences

The following are the material United States federal income tax consequences to us of our activities and to U.S. Holders and Non-U.S. Holders, each as defined below, of the ownership and disposition of our common stock. The following discussion of United States federal income tax matters is based on the United States Internal Revenue Code of 1986, as amended, or the Code, judicial decisions, administrative pronouncements, and existing and proposed regulations issued by the United States Department of the Treasury, all of which are subject to change, possibly with retroactive effect. This discussion below is based, in part, upon Treasury Regulations promulgated under Section 883 of the Code, and in part, on the description of our business as described in “About Our Company” above and assumes that we conduct our business as described in that section.

TO ENSURE COMPLIANCE WITH TREASURY DEPARTMENT CIRCULAR 230, HOLDERS OF OUR COMMON STOCK ARE HEREBY NOTIFIED THAT: (A) ANY DISCUSSION OF FEDERAL TAX ISSUES IN THIS OFFERING CIRCULAR IS NOT INTENDED OR WRITTEN TO BE RELIED UPON, AND CANNOT BE RELIED UPON, BY HOLDERS FOR THE PURPOSE OF AVOIDING PENALTIES THAT MAY BE IMPOSED ON HOLDERS UNDER THE INTERNAL REVENUE CODE; (B) SUCH DISCUSSION IS BEING USED IN CONNECTION WITH THE PROMOTION OR MARKETING (WITHIN THE MEANING OF CIRCULAR 230) BY THE ISSUERS OF THE TRANSACTIONS OR MATTERS ADDRESSED HEREIN; AND (C) HOLDERS SHOULD SEEK ADVICE BASED ON THEIR PARTICULAR CIRCUMSTANCES FROM AN INDEPENDENT TAX ADVISOR.

Taxation of Operating Income: In General

Unless exempt from United States federal income taxation under the rules discussed below, a foreign corporation is subject to United States federal income taxation in respect of any income that is derived from the use of vessels, from the hiring or leasing of vessels for use on a time, voyage or bareboat charter basis, from the participation in a shipping pool, partnership, strategic alliance, joint operating agreement, code sharing arrangements or other joint venture it directly or indirectly owns or participates in that generates such income, or from the performance of services directly

related to those uses, which we refer to as “shipping income,” to the extent that the shipping income is derived from sources within the United States. For these purposes, 50% of shipping income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States, exclusive of certain U.S. territories and possessions, constitutes income from sources within the United States, which we refer to as “U.S.-Source Gross Transportation Income” or “USSGTI.”

Shipping income attributable to transportation that both begins and ends in the United States is considered to be 100% from sources within the United States. U.S. law prohibits us from engaging in transportation that produces income considered to be 100% from sources within the United States.

Shipping income attributable to transportation exclusively between non-U.S. ports will be considered to be 100% derived from sources outside the United States. Shipping income derived from sources outside the United States will not be subject to any United States federal income tax.

In the absence of exemption from tax under Section 883, our USSGTI would be subject to a 4% tax imposed without allowance for deductions as described below.

Exemption of Operating Income from United States Federal Income Taxation

Under Section 883 of the Code, we will be exempt from United States federal income taxation on our U.S.-source shipping income if:

- we are organized in a foreign country (our “country of organization”) that grants an “equivalent exemption” to corporations organized in the United States;

we satisfy one of the following ownership tests (discussed in more detail below): (1) more than 50% of the value of our stock is owned, directly or indirectly, by “qualified shareholders,” which includes persons (i) who are “residents” of our country of organization or of another foreign country that grants an “equivalent exemption” to corporations organized in the United States, and (ii) who comply with certain documentation requirements, which we refer to as the “Qualified Shareholder Ownership Test,” or (2) our stock is primarily and regularly traded on one or more established securities markets in our country of organization, in another country that grants an “equivalent exemption” to United States corporations, or in the United States, which we refer to as the “Publicly-Traded Test;” and we are not considered “closely held,” which we refer to as the “Closely-Held Test;” and

- we meet certain substantiation, reporting and other requirements

The Republic of the Marshall Islands, the jurisdiction where we and our shipowning subsidiaries are incorporated, grants “equivalent exemptions” to United States corporations. Therefore, we should meet the first requirement for the Section 883 exemption. Additionally, we intend to comply with the substantiation, reporting and other requirements that are applicable under Section 883 of the Code. As a result, qualification for the Section 883 exemption will turn primarily on our ability to satisfy the second requirement enumerated above.

Since the 2007 tax year, we have claimed the benefits of the Section 883 tax exemption for our ship-owning subsidiaries on the basis of the Publicly-Traded Test. For 2011 and subsequent tax years, we anticipate that we will need to satisfy the Publicly-Traded Test in order to qualify for benefits under Section 883. While we expect to satisfy the Publicly-Traded Test for such years, there can be no assurance in this regard. Our ability to satisfy the Publicly-Traded Test is discussed below.

The regulations provide, in pertinent part, that the stock of a foreign corporation will be considered to be “primarily traded” on an established securities market in a country if the number of shares of each class of stock that are traded during the taxable year on all established securities markets in that country exceeds the number of shares in each such class that are traded during that year on established securities markets in any other single country. Our common stock, our sole class of our issued and outstanding stock, is “primarily traded” on the NASDAQ Global Market.

Under the regulations, our stock will be considered to be “regularly traded” if one or more classes of our stock representing 50% or more of our outstanding shares, by total combined voting power of all classes of stock entitled to vote and by total combined value of all classes of stock, are listed on one or more established securities markets, which we refer to as the “listing threshold.” Our common stock, our sole class of issued and outstanding stock, is listed on the NASDAQ Global Market, and accordingly, we will satisfy this listing requirement.

The regulations further require that with respect to each class of stock relied upon to meet the listing requirement: (i) such class of the stock is traded on the market, other than in minimal quantities, on at least 60 days during the taxable year or 1/6 of the days in a short taxable year; and (ii) the aggregate number of shares of such class of stock traded on such market is at least 10% of the average number of shares of such class of stock outstanding during such year or as appropriately adjusted in the case of a short taxable year. We believe we will satisfy the trading frequency and trading volume tests. Even if this were not the case, the regulations provide that the trading frequency and trading volume tests will be deemed satisfied by a class of stock if, as we expect to be the case with our common stock, such class of stock is traded on an established market in the United States, and such class of stock is regularly quoted by dealers making a market in such stock. While we anticipate that we will satisfy the trading frequency and trading volume tests, satisfaction of these requirements is outside of our control and hence, no assurances can be provided that we will satisfy the Publicly-Traded Test each year.

In addition, even if the “primarily traded” and “regularly traded” portions of the Publicly-Traded Test described above are satisfied, the Closely-Held Test provides, in pertinent part, that a class of stock will not be considered to be “regularly traded” on an established securities market for any taxable year in which 50% or more of the vote and value of the outstanding shares of such class of stock are owned, actually or constructively under specified stock attribution rules, on more than half the days during the taxable year by persons who each own directly or indirectly 5% or more of the vote and value of such class of stock, who we refer to as “5% Shareholders.” For purposes of being able to determine our 5% Shareholders under the Closely-Held Test, the regulations permit us to rely on Schedule 13G and Schedule 13D filings with the Securities and Exchange Commission. The regulations further provide that an investment company that is registered under the Investment Company Act of 1940, as amended, will not be treated as a 5% Shareholder for purposes of the Closely-Held Test.

In the event the Closely-Held Test is triggered, the regulations provide that the Closely-Held Test will nevertheless not apply if we can establish that among the closely-held group of 5% Shareholders, sufficient shares are owned by our 5% Shareholders that are considered to be “qualified shareholders,” to preclude non-qualified 5% Shareholders in the closely-held group from owning 50% or more of the value of such class of stock for more than half of the days during the tax year, which we refer to as the exception to the Closely-Held Test. Establishing such qualification and ownership by our direct and indirect 5% Shareholders will depend on their meeting the requirements of one of the qualified shareholder tests set out under the regulations applicable to 5% Shareholders and compliance with certain ownership certification procedures by each intermediary or other person in the chain of ownership between us and such qualified 5% Shareholders. Further, the regulations require, and we must certify, that no person in the chain of qualified ownership of shares relied on by us to qualify for exemption holds those shares in bearer form.

The ability to avoid application of the Closely-Held Test will be outside our control, and, as a result, there can be no assurance regarding whether we will satisfy the Publicly Traded Test for any year. For this and other reasons, there can be no assurance that we or any of our subsidiaries will qualify for the benefits of Section 883 of the Code for any year.

Taxation in Absence of Exemption

To the extent the benefits of Section 883 are unavailable, our USSGTI, to the extent not considered to be “effectively connected” with the conduct of a U.S. trade or business, as described below, would be subject to a 4% tax imposed by Section 887 of the Code on a gross basis, without the benefit of deductions, otherwise referred to as the “4% Tax.” Since under the sourcing rules described above, no more than 50% of our shipping income would be treated as being derived from U.S. sources, the maximum effective rate of U.S. federal income tax on our shipping income would never exceed 2% under the 4% gross basis tax regime.

To the extent the benefits of the Section 883 exemption are unavailable, and our USSGTI is considered to be “effectively connected” with the conduct of a U.S. trade or business, as described below, any such “effectively connected” U.S.-source shipping income, net of applicable deductions, would be subject to the U.S. federal corporate income tax currently imposed at rates of up to 35%. In addition, we may be subject to the 30% “branch profits” taxes on earnings effectively connected with the conduct of such trade or business, as determined after allowance for certain adjustments, and on certain interest paid or deemed paid attributable to the conduct of its U.S. trade or business.

Our U.S.-source shipping income would be considered “effectively connected” with the conduct of a U.S. trade or business only if:

- We have, or are considered to have, a fixed place of business in the United States involved in the earning of shipping income; and

- substantially all of our U.S.-source shipping income is attributable to regularly scheduled transportation, such as the operation of a vessel that follows a published schedule with repeated sailings at regular intervals between the same points for voyages that begin or end in the United States.

We do not intend to have, or permit circumstances that would result in having any vessel operating to the United States on a regularly scheduled basis. Based on the foregoing and on the expected mode of our shipping operations and other activities, we believe that none of our U.S.-source shipping income will be “effectively connected” with the conduct of a U.S. trade or business.

United States Taxation of Gain on Sale of Vessels

If we qualify for the Section 883 exemption, then gain from the sale of any vessel may be exempt from tax under Section 883. Even if such gain is not exempt from tax under Section 883, we will not be subject to United States federal income taxation with respect to gain realized on a sale of a vessel, assuming that we are not, and have never been, engaged in a U.S. trade or business. Under certain circumstances, if we are so engaged, gain on the sale of vessels could be subject to U.S. federal income tax.

United States Federal Income Taxation of U.S. Holders

As used herein, the term “U.S. Holder” means a beneficial owner of common stock that is a United States citizen or resident, United States corporation or other United States entity taxable as a corporation, an estate the income of which is subject to United States federal income taxation regardless of its source, or a trust if a court within the United States is able to exercise primary jurisdiction over the administration of the trust and one or more United States persons have the authority to control all substantial decisions of the trust.

If a partnership holds our common stock, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner in a partnership holding our common stock, you are encouraged to consult your tax advisor.

Distributions. Subject to the discussion of passive foreign investment companies (or “PFICs”) below, any distributions made by us with respect to our common stock will generally be taxable as dividend income to the extent of our current or accumulated earnings and profits, as determined under United States federal income tax principles. Distributions in excess of our earnings and profits will be treated first as a nontaxable return of capital to the extent of the U.S. Holder’s tax basis in his or her common stock on a dollar-for-dollar basis and thereafter as capital gain. Because we are not a United States corporation, U.S. Holders that are corporations will not be entitled to claim a dividends received deduction with respect to any distributions they receive from us. Dividends paid with respect to our common stock will generally be treated as passive category income or, in the case of certain types of U.S. Holders, general category income for purposes of computing allowable foreign tax credits for United States foreign tax credit purposes.

For taxable years beginning before January 1, 2013, dividends paid on our common stock to a U.S. Holder who is an individual, trust or estate, which we refer to as a “U.S. Individual Holder,” will generally be treated as “qualified dividend income” that is taxable to such a U.S. Individual Holder at preferential tax rates provided that (1) we are not a passive foreign investment company for the taxable year during which the dividend is paid or the immediately preceding taxable year (which we do not believe we are, have been or will be), (2) our common stock is readily tradable on an established securities market in the United States (such as the NASDAQ Global Market), and (3) the U.S. Individual Holder has owned the common stock for more than 60 days in the 121-day period beginning 60 days before the date on which the common stock becomes ex-dividend. There is no assurance that any dividends paid on our common stock will be eligible for these preferential rates in the hands of a U.S. Individual Holder. Any distributions treated as dividends paid by us that are not eligible for these preferential rates will be taxed as ordinary income to a U.S. Individual Holder.

Special rules may apply to any “extraordinary dividend” generally, a dividend in an amount which is equal to or exceeds ten percent of a stockholder’s adjusted basis (or fair market value in certain circumstances) in a share of our stock paid by us. If we pay an “extraordinary dividend” on our stock that is treated as “qualified dividend income,” then any loss derived by a U.S. Individual Holder from the sale or exchange of such stock will be treated as long-term capital loss to the extent of such dividend.

Sale, Exchange or Other Disposition of Common Stock. Assuming we do not constitute a passive foreign investment company for any taxable year, a U.S. Holder generally will recognize taxable gain or loss upon a sale, exchange or other disposition of our common stock in an amount equal to the difference between the amount realized by the U.S. Holder from such sale, exchange or other disposition and the U.S. Holder’s tax basis in such stock. Such gain or loss will be treated as long-term capital gain or loss if the U.S. Holder’s holding period is greater than one year at the time of the sale, exchange or other disposition. Such capital gain or loss will generally be treated as U.S.-source income or loss, as applicable, for U.S. foreign tax credit purposes. A U.S. Holder’s ability to deduct capital losses is subject to certain limitations.

Passive Foreign Investment Company Status and Significant Tax Consequences. Special United States federal income tax rules apply to a U.S. Holder that holds stock in a foreign corporation classified as a passive foreign investment company for United States federal income tax purposes. In general, we will be treated as a passive foreign investment company with respect to a U.S. Holder if, for any taxable year in which such holder held our common stock, either:

- at least 75% of our gross income for such taxable year consists of passive income (e.g., dividends, interest, capital gains and rents derived other than in the active conduct of a rental business); or
- at least 50% of the average value of the assets held by the corporation during such taxable year produce, or are held for the production of, passive income.

For purposes of determining whether we are a passive foreign investment company, we will be treated as earning and owning our proportionate share of the income and assets, respectively, of any of our subsidiary corporations in which we own at least 25% of the value of the subsidiary’s stock. Income earned, or deemed earned, by us in connection with the performance of services would not constitute passive income. By contrast, rental income would generally constitute “passive income” unless we were treated under specific rules as deriving our rental income in the active conduct of a U.S. trade or business. We may own, directly or indirectly, interests in other entities that are passive foreign investment companies, or subsidiary PFICs. If we are a passive foreign investment company, each U.S. Holder will be treated as owning its pro rata share by value of the stock of any such subsidiary PFICs.

Based on our current operations and future projections, we do not believe that we are, nor do we expect to become, a passive foreign investment company with respect to any taxable year. Although we are not relying upon an opinion of

counsel on this issue, our belief is based principally on the position that, for purposes of determining whether we are a passive foreign investment company, the gross income we derive or are deemed to derive from the time chartering and voyage chartering activities of our wholly owned subsidiaries should constitute services income, rather than rental income. Correspondingly, such income should not constitute passive income, and the assets that we or our wholly-owned subsidiaries own and operate in connection with the production of such income, in particular, the vessels, should not constitute passive assets for purposes of determining whether we are a passive foreign investment company. Internal Revenue Service pronouncements concerning the characterization of income derived from time charters and voyage charters as services income for other tax purposes support this position. However, a recent case reviewing the deductibility of commissions by a foreign sales corporation decided that time charter income constituted rental income under the law. While the IRS asserted in such case that the time charter income should be considered services income, in the absence of any legal authority specifically relating to the statutory provisions governing PFICs and time charter income, the IRS or a court could disagree with our position. In addition, although we intend to conduct our affairs in a manner to avoid being classified as a PFIC with respect to any taxable year, we cannot assure you that the nature of our operations will not change in the future.

If we are determined to be a PFIC for any taxable year (or portion thereof) that is included in the holding period of a U.S. Holder of our common stock, and the U.S. Holder did not make a timely qualified electing fund (“QEF”) election for our first taxable year as a PFIC in which the U.S. Holder held (or was deemed to hold) common stock, as described below, such holder generally will be subject to special rules with respect to:

- any gain recognized by the U.S. Holder on the sale or other disposition of its common stock; and

any “excess distribution” made to the U.S. Holder (generally, any distributions to such U.S. Holder during a taxable year of the U.S. Holder that are greater than 125% of the average annual distributions received by such U.S. Holder in respect of the common stock during the three preceding taxable years of such U.S. Holder or, if shorter, such U.S. Holder’s holding period for the common stock).

Under these rules,

- the U.S. Holder's gain or excess distribution will be allocated ratably over the U.S. Holder's holding period for the common stock;
- the amount allocated to the U.S. Holder's current taxable year and any taxable years in the U.S. Holder's holding period before the first day of our first taxable year in which we are a PFIC, will be taxable as ordinary income;
- the amount allocated to other taxable years (or portions thereof) of the U.S. Holder and included in its holding period will be taxed at the highest tax rate in effect for that year and applicable to the U.S. Holder; and
- the interest charge generally applicable to underpayments of tax will be imposed in respect of the tax attributable to each such other taxable year of the U.S. Holder.

In general, if we are determined to be a PFIC, a U.S. Holder will avoid the PFIC tax consequences described above in respect to our common stock by making a timely QEF election to include in income its pro rata share of our net capital gains (as long-term capital gain) and other earnings and profits (as ordinary income), on a current basis, in each case whether or not distributed, in the taxable year of the U.S. Holder in which or with which our taxable year ends. A U.S. Holder may make a separate election to defer the payment of taxes on undistributed income inclusions under the QEF rules, but if deferred, any such taxes will be subject to an interest charge.

Although a determination as to our PFIC status will be made annually, an initial determination that our company is a PFIC will generally apply for subsequent years to a U.S. Holder who held our common stock while we were a PFIC, whether or not we meet the test for PFIC status in those subsequent years. A U.S. Holder who makes the QEF election discussed above for our first taxable year as a PFIC in which the U.S. Holder owns (or is deemed to own) our common stock, however, will not be subject to the PFIC tax and interest charge rules discussed above in respect to such shares. In addition, such U.S. Holder will not be subject to the QEF inclusion regime with respect to such shares for any taxable year of ours that ends within or with a taxable year of the U.S. Holder and in which we are not a PFIC. On the other hand, if the QEF election is not effective for each of our taxable years in which we are a PFIC, and the U.S. Holder owns (or is deemed to hold) our common stock, the PFIC rules discussed below will continue to apply to such shares unless the holder makes a purging election, as described below, and pays the tax and interest charge with respect to the gain inherent in such shares attributable to the pre-QEF election period.

If a U.S. Holder has made a QEF election with respect to our common stock, and the special tax and interest charge rules do not apply to such shares (because of a timely QEF election for our first taxable year as a PFIC in which the U.S. Holder owns (or is deemed to own) such shares or a purge of the PFIC taint pursuant to a purging election, as described below), any gain recognized on the sale of our common stock generally will be taxable as capital gain, and

no interest charge will be imposed. As discussed above, U.S. Holders of a QEF are currently taxed on their pro rata shares of its earnings and profits, whether or not distributed. In such case, a subsequent distribution of such earnings and profits that were previously included in income generally should not be taxable as a dividend to such U.S. Holders. The tax basis of a U.S. Holder's shares in a QEF will be increased by amounts that are included in income, and decreased by amounts distributed but not taxed as dividends, under the above rules. Similar basis adjustments apply to property if by reason of holding such property the U.S. Holder is treated under the applicable attribution rules as owning shares in a QEF.

The QEF election is made on a shareholder-by-shareholder basis and, once made, can be revoked only with the consent of the IRS. A U.S. Holder generally makes a QEF election by attaching a completed IRS Form 8621 (Return by a Shareholder of a Passive Foreign Investment Company or Qualified Electing Fund), including the information provided in a PFIC annual information statement, to a timely filed U.S. federal income tax return for the tax year to which the election relates. Retroactive QEF elections generally may be made only by filing a protective statement with such return and if certain other conditions are met or with the consent of the IRS. U.S. Holders should consult with their tax advisors regarding the availability and tax consequences of a retroactive QEF election under their particular circumstances. In order to comply with the requirements of a QEF election, a U.S. Holder must receive a PFIC annual information statement from us. If we determine we are a PFIC for any taxable year, we will endeavor to provide to a U.S. Holder such information as the IRS may require, including a PFIC annual information statement, in order to enable the U.S. Holder to make and maintain a QEF election. However, there is no assurance that we will have timely knowledge of our status as a PFIC in the future or of the required information to be provided.

If a U.S. Holder, at the close of its taxable year, owns shares in a PFIC that are treated as "marketable stock", the U.S. Holder may make a mark-to-market election with respect to such shares for such taxable year. If the U.S. Holder makes a valid mark-to-market election for the first taxable year of the U.S. Holder in which the U.S. Holder owns (or is deemed to hold) common stock in us and for which we are determined to be a PFIC, such holder generally will not be subject to the PFIC rules described above in respect to its common stock. Instead, in general, the U.S. Holder will include as ordinary income each year the excess, if any, of the fair market value of its common stock at the end of its taxable year over the adjusted basis in its common stock. The U.S. Holder also will be allowed to take an ordinary loss in respect of the excess, if any, of the adjusted basis of its common stock over the fair market value of its common stock at the end of its taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). The U.S. Holder's basis in its common stock will be adjusted to reflect any such income or loss amounts, and any further gain recognized on a sale or other taxable disposition of the common stock will be treated as ordinary income. The mark-to-market election is available only if our common stock is treated as marketable stock. If our common stock is listed on the NASDAQ Global Market and is regularly traded on such market in accordance with applicable Treasury Regulations, our common stock will be treated as "marketable stock" for this purpose. U.S. Holders are advised to consult with their tax advisors regarding the availability and tax consequences of a mark-to-market election in respect to our common stock under their particular circumstances.

If we are a PFIC and, at any time, have a foreign subsidiary that is classified as a PFIC, U.S. Holders generally would be deemed to own a portion of the shares of such lower-tier PFIC, and generally could incur liability for the deferred tax and interest charge described above if we receive a distribution from, or dispose of all or part of our interest in, the lower-tier PFIC or the U.S. Holders otherwise were deemed to have disposed of an interest in the lower-tier PFIC. We will endeavor to cause any lower-tier PFIC to provide to a U.S. Holder the information that may be required to make or maintain a QEF election with respect to the lower-tier PFIC. However, there is no assurance that we will have timely knowledge of the status of any such lower-tier PFIC. In addition, we may not hold a controlling interest in any such lower-tier PFIC and thus there can be no assurance we will be able to cause the lower-tier PFIC to provide the required information. U.S. Holders are advised to consult with their tax advisors regarding the tax issues raised by lower-tier PFICs.

A U.S. Holder that owns (or is deemed to own) shares in a PFIC during any taxable year of the U.S. Holder, may have to file an IRS Form 8621 (whether or not a QEF or mark-to-market election is made) and such other information as may be required by the U.S. Treasury Department.

The rules dealing with PFICs and with the QEF and mark-to-market elections are very complex and are affected by various factors in addition to those described above. Accordingly, U.S. Holders are advised to consult with their tax advisors concerning the application of the PFIC rules (and the QEF and mark-to-market elections) to each of our common stock and warrants under their particular circumstances.

United States Federal Income Taxation of “Non-U.S. Holders”

A beneficial owner of common stock that is not a U.S. Holder is referred to herein as a “Non-U.S. Holder.”

Dividends on Common Stock. Non-U.S. Holders generally will not be subject to United States federal income tax or withholding tax on dividends received from us with respect to our common stock, unless that income is effectively connected with the Non-U.S. Holder’s conduct of a trade or business in the United States. If the Non-U.S. Holder is entitled to the benefits of a United States income tax treaty with respect to those dividends, that income is taxable only if it is attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States.

Sale, Exchange or Other Disposition of Common Stock. Non-U.S. Holders generally will not be subject to United States federal income tax or withholding tax on any gain realized upon the sale, exchange or other disposition of our common stock, unless:

- the gain is effectively connected with the Non-U.S. Holder's conduct of a trade or business in the United States. If
- the Non-U.S. Holder is entitled to the benefits of an income tax treaty with respect to that gain, that gain is taxable only if it is attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States; or
 - the Non-U.S. Holder is an individual who is present in the United States for 183 days or more during the taxable year of disposition and other conditions are met.

If the Non-U.S. Holder is engaged in a United States trade or business for United States federal income tax purposes, the income from the common stock, including dividends and the gain from the sale, exchange or other disposition of the stock that is effectively connected with the conduct of that trade or business will generally be subject to regular United States federal income tax in the same manner as discussed in the previous section relating to the taxation of U.S. Holders. In addition, if you are a corporate Non-U.S. Holder, your earnings and profits that are attributable to the effectively connected income, which are subject to certain adjustments, may be subject to an additional branch profits tax at a rate of 30%, or at a lower rate as may be specified by an applicable income tax treaty.

Backup Withholding and Information Reporting

In general, dividend payments, or other taxable distributions, made within the United States to you will be subject to information reporting requirements. Such payments will also be subject to backup withholding tax if you are a non-corporate U.S. Holder and you:

- fail to provide an accurate taxpayer identification number;
- are notified by the Internal Revenue Service that you have failed to report all interest or dividends required to be shown on your federal income tax returns; or

- in certain circumstances, fail to comply with applicable certification requirements.
- Non-U.S. Holders may be required to establish their exemption from information reporting and backup withholding by certifying their status on Internal Revenue Service Form W-8BEN, W-8ECI or W-8IMY, as applicable.

If you sell your stock to or through a United States office or broker, the payment of the proceeds is subject to both United States backup withholding and information reporting unless you certify that you are a non-U.S. person, under penalties of perjury, or you otherwise establish an exemption. If you sell your stock through a non-United States office of a non-United States broker and the sales proceeds are paid to you outside the United States, then information reporting and backup withholding generally will not apply to that payment. However, United States information reporting requirements, but not backup withholding, will apply to a payment of sales proceeds, even if that payment is made to you outside the United States, if you sell your stock through a non-United States office of a broker that is a United States person or has some other contacts with the United States.

Backup withholding tax is not an additional tax. Rather, you generally may obtain a refund of any amounts withheld under backup withholding rules that exceed your income tax liability by filing a refund claim with the Internal Revenue Service.

We encourage each stockholder to consult with his, her or its own tax advisor as to particular tax consequences to it of holding and disposing of our shares, including the applicability of any state, local or foreign tax laws and any proposed changes in applicable law.

F. Dividends and Paying Agents

Not applicable.

G. Statement by Experts

Not applicable.

H. Documents on Display

We file annual reports and other information with the SEC. You may read and copy any report or document we file, including the exhibits, at the SEC's public reference room located at 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. Such materials can also be obtained on the SEC's site on the internet at <http://www.sec.gov>

We will also provide without charge to each person, including any beneficial owner, upon written or oral request of that person, a copy of any and all of the information that has been incorporated by reference in this annual report. Please direct such requests to Alexandros Mylonas, Chief Financial Officer, FreeSeas Inc., 10, Eleftheriou Venizelou Street (Panepistimiou Ave.) 106 71, Athens, Greece, telephone number +30-210-4528770 or facsimile number +30-210-4291010.

I. Subsidiary Information

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Fluctuation

The international drybulk industry is a capital-intensive industry, requiring significant amounts of investment. Much of this investment is provided in the form of long-term debt. Our debt usually contains interest rates that fluctuate with LIBOR. Increasing interest rates could adversely impact future earnings. To mitigate this risk, we have entered into two interest rate swap contracts.

Our interest expense is affected by changes in the general level of interest rates. As an indication of the extent of our sensitivity to interest rate changes, an increase of 100 basis points would have decreased our net income and cash flows in the 2012 fiscal year by approximately \$843 based upon our debt level during the period in 2011 during which we had debt outstanding.

The following table sets forth for a period of five years the sensitivity of the loans on each of the vessels owned by us during fiscal 2011 in U.S. dollars to a 100-basis-point increase in LIBOR.

(In thousands of U.S. Dollars)

Vessel Name	2012	2013	2014	2015	2016
Free Hero / Free Goddess / Free Jupiter	\$ 349	\$ 296	\$ 237	\$ 152	\$ —
Free Impala / Free Neptune	\$ 224	\$ 196	\$ 162	\$ 128	\$ 91
Free Knight	\$ 133	\$ 99	\$ 69	\$ 37	\$ —
Free Maverick	\$ 136	\$ —	\$ —	\$ —	\$ —

Please see “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Long Term Debt” for a full description of each of these loans.

Interest Rate Risk

We are exposed to interest rate risk associated with its variable rate borrowings, and its objective is to manage the impact of such fluctuations on earnings and cash flows of its borrowings. In this respect, we use interest rate swaps to manage net exposure to interest rate fluctuations related to its borrowings and to lower its overall borrowing costs. We have two interest rate swaps outstanding with a total notional amount of \$9,201 as of December 31, 2011. These interest rate swap agreements do not qualify for hedge accounting, and changes in their fair values are reflected in our earnings.

Our derivative financial instruments are valued using pricing models that are used to value similar instruments by market participants. Where possible, we verify the values produced by our pricing models to market prices. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit spreads, measures of volatility and correlations of such inputs. Model inputs can generally be verified and do not involve significant management judgment. Such instruments are typically classified within Level 2 of the fair value hierarchy.

Foreign Exchange Rate Risk

We generate all of our revenues in U.S. dollars, but incur a portion of our expenses in currencies other than U.S. dollars. For accounting purposes, expenses incurred in Euros are converted into U.S. dollars at the exchange rate prevailing on the date of each transaction. At December 31, 2011, 2010 and 2009, approximately 32%, 55% and 21%, respectively, of our outstanding accounts payable was denominated in currencies other than the U.S. dollar (mainly in the Euro). As an indication of the extent of our sensitivity to foreign exchange rate changes, an increase of an

additional 10% in the value of other currencies against the dollar would have decreased our net income and cash flows in 2011 by approximately \$371 based upon the accounts payable we had denominated in currencies other than the U.S. dollar as of December 31, 2011.

Credit Risk

Financial instruments, which potentially subject us to significant concentrations of credit risk, consist principally of cash and cash equivalents, trade accounts receivable, insurance claims and derivative contracts (interest rate swaps). We place our cash and cash equivalents, consisting mostly of deposits, with high credit qualified financial institutions.

We monitor the credit risk regarding charterer's turnover in order to review its reliance on individual charterers. We do not obtain rights to collateral to reduce its credit risk. We are exposed to credit risk in the event of non-performance by counter parties to derivative instruments; however, we limit our exposure by diversifying among counter parties with high credit ratings. In addition, the counterparty to the derivative financial instrument is a major financial institution in order to manage exposure to non-performance counterparties.

Charter Market Risk

Our revenues, earnings and profitability are affected by the prevailing charter market rates. During 2011, the BDI remained volatile. On November 21, 2011, the BDI was 1,874, increasing from a low of 1,043 on February 4, 2011. Furthermore, charter rates have been particularly volatile during the first four months of 2012. On April 11, 2012, the BDI was 944, increasing from a low of 647 on February 3, 2012. Such chartering market volatility is expected to adversely impact our financial performance for the relevant quarter including its net income and cashflow.

The M/V *Free Jupiter* was on time charter with KLC, a South Korean company, from June 8, 2007 until she was re-delivered to us on February 22, 2011. KLC made several unilateral deductions from hire payments during the three-year course of the time charter, and no hire was received from KLC from February 8, 2011 until the actual redelivery of the vessel on February 22, 2011. The Company commenced arbitration proceedings against KLC, and has taken action to obtain security, including the arrest of KLC assets. As a result, the Company obtained third-party security in the amount of \$1.68 million (which includes provision for interest and legal costs) in the form of a letter of undertaking from KLC's P&I club covering KLC's unilateral deductions from the hire. The Company also obtained cash security held in escrow in the amount of \$159 from the execution of a lien on sub-hires. KLC has counterclaimed by way of set-off, alleging that KLC is entitled to retain the amount of hire that was deducted because of the Company's alleged breach of charterparty. The Company denies these allegations and continues to assert its claim to recover the full amount deducted by KLC. On January 25, 2011, KLC announced that it had filed a petition for the rehabilitation proceeding for court receivership in the Seoul Central District Court, and the court approved and confirmed a rehabilitation plan. Upon the issuance of the final award of the arbitration tribunal, and for any amount in excess of the third-party security and cash security, the Company may participate in the approved rehabilitation plan. As of December 31, 2011, the outstanding balance of the KLC time charter was \$1,372 after provisions of \$136, which is below the security obtained as described above. On January 17, 2012, the Company obtained an interim award under which it was awarded the part of the claim that KLC had admitted was undisputed, \$832, plus interest, legal costs, and the cost of the tribunal. Following the interim award, the Company received approximately \$321. The majority of the balance of \$511 that has been awarded is unsecured. The Company is considering its options if KLC does not pay the balance, including the possibility of pursuing this in the Korean rehabilitation proceedings, where the hearing of the Company's claim has been stayed pending the outcome of the London arbitration. The Company believes that, (if the Korean claim succeeds, the Company should make a recovery in accordance with the rehabilitation plan, which has been approved by the Korean court). There will be a further award (if this matter does not settle) for the disputed balance, which is adequately secured.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Please see “Item 5. Operating and Financial Review and Prospects - Recent Developments” and “- Long-Term Debt” for a full description of loan defaults.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Except as described elsewhere in this document, there have been no changes to the instruments defining the rights of the holders of any class of registered securities, and the rights of holders of the registered securities have not been altered by the issuance or modification of any other class of securities in 2011 (see “Item 10. Additional Information — B. Memorandum and Articles of Incorporation”) for a description of this plan). There are no restrictions on working capital and no removal or substitution of assets securing any class of our registered securities.

ITEM 15. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures .. Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) as of December 31, 2011. Disclosure controls and procedures are defined under SEC rules as controls and other procedures that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within required time periods. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention of overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Based on our evaluation, our chief executive officer and our chief financial officer have concluded that our disclosure controls and procedures were effective as of December 31, 2011.

(b) Management's Annual Report on Internal Control over Financial Reporting . Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. Our internal control over financial reporting is a process designed under the supervision of our chief executive officer and chief financial officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external purposes in accordance with generally accepted accounting principles in the United States.

Management has conducted an assessment of the effectiveness of our internal control over financial reporting as of December 31, 2011 based on the criteria described in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has concluded that the Company's internal control over financial reporting as of December 31, 2011 was effective.

(c) Attestation Report of the Registered Public Accounting Firm . This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to the rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

(d) Changes in Internal Control over Financial Reporting . There were no changes in internal control over financial reporting during the year ended December 31, 2011 that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our audit committee is made up of the three independent directors. We believe that Mr. Focko Nauta meets the definition of an audit committee financial expert, as defined for the purposes of Item 16A of Form 20-F, and accordingly serves as our financial expert. Mr. Nauta is independent, as such term is defined in 17 CFR 240.10A-3. We have determined that the number of directors that make up the audit committee reflects the appropriate level of governance for a company of this type and size. All of the audit committee members have experience with the financial management of a company and are familiar with the reports that are provided by management for the purpose of reporting the financial position of the business.

ITEM 16B. CODE OF ETHICS

We have adopted a Code of Business Conduct and Ethics that applies to our officers and directors. Our Code of Business Conduct and Ethics is available on the Corporate Governance section of our website at www.freeseas.gr. We will also provide a paper copy of our Code of Business Conduct and Ethics free of charge upon written request of a shareholder. Shareholders may direct their requests to the attention of Alexandros Mylonas, Chief Financial Officer.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The aggregate fees billed for the last two fiscal years for professional services rendered by our auditor are as follows:

	2011	2010
Audit fees (1)	\$550	\$464
Audit-related fees	—	—
Tax fees	—	—
Other fees	—	—
Total	\$550	\$464

Audit fees represent fees for professional services related to the audit of our financial statements for the years (1) ended December 31, 2011 and 2010, as well as fees for services related to the Company's additional filings relating to possible capital raises.

Our audit committee pre-approves all audit, audit-related and non-audit services not prohibited by law to be performed by our independent auditors and associated fees prior to the engagement of the independent auditor with respect to such services.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

Not applicable.

ITEM 16F. CHANGES IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable

ITEM 16G. CORPORATE GOVERNANCE

As a foreign private issuer, we can elect to be exempt from many of the corporate governance requirements of The NASDAQ Stock Market other than the requirements regarding the disclosure of a going concern audit opinion, notification of material non-compliance with NASDAQ corporate governance practices, the establishment and composition of an audit committee that complies with SEC Rule 10A-3 and a formal audit committee charter. The practices followed by us in lieu of NASDAQ's corporate governance rules are described below:

- Our board is composed of a majority of independent directors, consistent with NASDAQ corporate governance requirements; we are not required under Marshall Islands law, however, to maintain a majority independent directors and we cannot guarantee that we will always in the future maintain a board with a majority of independent members.
- In lieu of obtaining shareholder approval prior to the issuance of designated securities, we comply with provisions of Marshall Islands law, requiring that the board of directors approves share issuances.
- In lieu of holding regular meetings at which only independent directors are present, our entire board of directors, a majority of whom are independent, hold regular meetings as is consistent with Marshall Islands law.

- As a foreign private issuer, we are not required to solicit proxies or provide proxy statements to NASDAQ pursuant to NASDAQ corporate governance rules or Marshall Islands law. Consistent with Marshall Islands law and as provided in our bylaws, we will notify our shareholders of meetings between 15 and 60 days before the meeting. This notification will contain, among other things, information regarding business to be transacted at the meeting. In addition, our bylaws provide that shareholders must give us between 150 and 180 days advance notice to properly introduce any business at a meeting of shareholders.

Other than as noted above, we are in compliance with all other applicable NASDAQ corporate governance standards. Additionally, we believe that our established practices in the area of corporate governance are in line with the spirit of the NASDAQ standards and provide adequate protection to our stockholders.

ITEM 16H.MINE SAFETY DISCLOSURE

Not applicable

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of FreeSeas Inc.

We have audited the accompanying consolidated balance sheets of FreeSeas Inc. as of December 31, 2011 and 2010, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of FreeSeas Inc. at December 31, 2011 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As more fully described in Note 3 to the consolidated financial statements, the Company has incurred recurring operating losses and has a working capital deficiency. In addition, the Company has failed to meet scheduled payment obligations under its loan facilities and has not complied with certain covenants included in its loan agreements with banks. These conditions raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters also are described in Note 3. The 2011 consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

1. Basis of Presentation and General Information

The accompanying consolidated financial statements include the accounts of FreeSeas Inc. and its wholly owned subsidiaries (collectively, the “Company” or “FreeSeas”). FreeSeas, formerly known as Adventure Holdings S.A., was incorporated in the Marshall Islands on April 23, 2004 for the purpose of being the ultimate holding company of ship-owning companies. The management of FreeSeas’ vessels is performed by Free Bulkers S.A. (the “Manager”), a Marshall Islands company that is controlled by the Chief Executive Officer of FreeSeas (see Note 4).

Effective October 1, 2010, the Company effected a five-to-one reverse stock split on its issued and outstanding common stock (Note 13). All share and per share amounts disclosed in the Financial Statements give effect to this reverse stock split retroactively, for all periods presented.

During the year ended December 31, 2011, the Company owned and operated seven Handysize dry bulk carriers (one of which was sold on May 13, 2011), two Handymax dry bulk carriers (one of which was sold on November 8, 2011) and had an order for the construction of two Handysize dry bulk carriers (see Note 7). As of December 31, 2011, FreeSeas is the sole owner of all outstanding shares of the following subsidiaries:

Company	% Owned	M/V	Type	Dwt	Year Built/ Expected Year of Delivery	Date of Acquisition	Date of Disposal
Adventure Two S.A.	100	% Free Destiny	Handysize	25,240	1982	08/04/04	08/27/10
Adventure Three S.A.	100	% Free Envoy	Handysize	26,318	1984	09/29/04	05/13/11

Adventure Fifteen S.A.	100	% Hull 2	Handysize	33,600	2012	N/A	N/A

2. Significant Accounting Policies

a) Principles of Consolidation: The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (or “U.S. GAAP”) and include in each of the three years in the period ended December 31, 2011 the accounts and operating results of the Company and its wholly-owned subsidiaries referred to in Note 1 above. All inter-company balances and transactions have been eliminated upon consolidation. FreeSeas as the holding company determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity. Under ASC 810 “Consolidation” a voting interest entity is an entity in which the total equity investment at risk is sufficient to enable the entity to finance itself independently and provides the equity holders with the obligation to absorb losses, the right to receive residual returns and the right to make financial and operating decisions. The holding company consolidates voting interest entities in which it owns all, or at least a majority (generally, greater than 50%) of the voting interest. Variable interest entities (“VIE”) are entities as defined under ASC 810 that in general either do not have equity investors with voting rights or that have equity investors that do not provide sufficient financial resources for the entity to support its activities. The determination of whether a reporting entity is required to consolidate another entity is based on, among other things, the other entity’s design and purpose and the reporting entity’s power, through voting or similar rights, to direct the activities of the other entity that most significantly impact the other entity’s economic performance. A controlling financial interest in a VIE is present when a company has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE, or both. Only one reporting entity, known as the primary beneficiary, is expected to be identified as having a controlling financial interest and thus is required to consolidate the VIE. The Company evaluates all arrangements that may include a variable interest in an entity to determine if it may be the primary beneficiary, and would be required to include assets, liabilities and operations of a VIE in its consolidated financial statements. As of December 31, 2011 and 2010, no such interest existed.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

b) Use of Estimates: The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

c) Comprehensive Income: The Company follows the provisions of ASC 220, "Comprehensive Income," which requires separate presentation of certain transactions, which are recorded directly as components of stockholders' equity. For the years ended December 31, 2011, 2010 and 2009 comprehensive income was the same as net income.

d) Concentration of Credit Risk: Financial instruments, which potentially subject the Company to significant concentrations of credit risk, consist principally of cash and cash equivalents, trade accounts receivable, insurance claims, prepayments and advances, and derivative contracts (interest rate swaps). The Company places its cash and cash equivalents, consisting mostly of deposits, with high credit qualified financial institutions. The Company monitors the credit risk regarding charterer's turnover in order to review its reliance on individual charterers. The Company does not obtain rights to collateral to reduce its credit risk. The Company is exposed to credit risk in the event of non-performance by counter parties to derivative instruments; however, the Company limits its exposure by diversifying among counter parties with high credit ratings. Credit risk with respect to trade account receivable is considered high due to the fact that the Company's total income is derived from a few charterers. For the year ended December 31, 2011, one charterer individually accounted for more than 10% of the Company's voyage revenues, three charterers individually accounted for more than 10% of the Company's voyage revenues for the year ended December 31, 2010, and two charterers individually accounted for more than 10% of the Company's voyage revenues for the year ended December 31, 2009 as follows:

Charter	2011	2010	2009
A	33	% 12	% Less than 10%
B	Less than 10 %	14 %	18 %
C	Less than 10 %	16 %	37 %

e) Foreign Currency Translation: The functional currency of the Company is the U.S. Dollar because the Company's vessels operate in international shipping markets, and therefore primarily transact business in U.S. Dollars. The Company's accounting records are maintained in U.S. Dollars. Transactions involving other currencies during the year are converted into U.S. Dollars using the exchange rates in effect at the time of the transactions. At the balance sheet date, monetary assets and liabilities, which are denominated in other currencies, are translated into U.S. Dollars at the

year-end exchange rates. Resulting gains or losses are included in other income/loss in the accompanying consolidated statements of operations.

F-8

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

f) Cash and Cash Equivalents: The Company considers highly liquid investments such as time deposits and certificates of deposit with an original maturity of three months or less to be cash equivalents.

g) Restricted Cash: Restricted cash includes bank deposits that are required under the Company's borrowing arrangements to be kept as part of the security required under the respective loan agreements.

h) Trade Receivables, net: The amount shown as Trade Receivables at each balance sheet date includes receivables from charterers for hire, freight and demurrage billings, net of an allowance for doubtful debts. An estimate is made of the allowance for doubtful debts based on a review of all outstanding amounts at year end, and an allowance is made for any accounts which management believes are not recoverable.

i) Insurance Claims: Insurance claims comprise claims submitted and/or claims in the process of compilation for submission (claims pending) relating to hull and machinery or protection and indemnity insurance coverage. They are recorded as incurred on the accrual basis and represent the claimable expenses incurred, net of deductibles, the recovery of which is probable under the related insurance policies and the Company can make an estimate of the amount to be reimbursed. Any non-recoverable amounts are included in accrued liabilities and depending on their nature, are classified as operating expenses or voyage expenses in the statement of operations. The classification of insurance claims (if any) into current and non-current assets is based on management's expectations as to their collection dates.

j) Inventories: Inventories, which are comprised of bunkers and lubricants remaining on board of the vessels at year end, are valued at the lower of cost, as determined on a first-in, first-out basis, or market.

k) Advances for vessels under construction: This account includes milestone payments relating to the shipbuilding contracts with the shipyard, and various pre-purchase costs and expenses for which the recognition criteria are met.

l) Vessels' Cost: Vessels are stated at cost, which consists of the contract purchase price and any material expenses incurred upon acquisition (initial repairs, improvements, delivery expenses and other expenditures to prepare the

vessel for her initial voyage). Subsequent expenditures for conversions and major improvements are also capitalized when they appreciably extend the life, increase the earning capacity or improve the efficiency or safety of the vessels. Otherwise, these expenditures are charged to expense as incurred.

m) Vessels' Depreciation: The cost of the Company's vessels is depreciated on a straight-line basis over the vessels' remaining economic useful lives from the acquisition date, after considering the estimated residual value (vessel's residual value is equal to the product of its lightweight tonnage and estimated scrap rate). Effective April 1, 2009, and following management's reassessment of the useful lives of the Company's assets, the fleet useful life was increased from 27 to 28 years since the date of initial delivery from the shipyard. Management's estimate was based on the current vessels' operating condition, as well as the conditions prevailing in the market for the same type of vessels.

n) Vessels held for sale: It is the Company's policy to dispose of vessels when suitable opportunities arise and not necessarily to keep them until the end of their useful life. The Company classifies assets and disposal groups of assets as being held for sale in accordance with ASC 360, "Property, Plant and Equipment," when the following criteria are met: (i) management possessing the necessary authority has committed to a plan to sell the asset; (ii) the asset is immediately available for sale on an "as is" basis; (iii) an active program to find the buyer and other actions required to execute the plan to sell the asset have been initiated; (iv) the sale of the asset is probable, and transfer of the asset is expected to qualify for recognition as a completed sale within one year; (v) the asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn. Long-lived assets or disposal groups classified as held for sale are measured at the lower of their carrying amount or fair value less cost to sell. These assets are not depreciated once they meet the criteria to be held for sale and are classified in current assets on the consolidated balance sheet.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

o) Impairment of Long-lived Assets: The Company follows the guidance under ASC 360, “Property, Plant and Equipment,” which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. The standard requires that, long-lived assets and certain identifiable intangibles held and used or disposed of by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. When the estimate of undiscounted cash flows, excluding interest charges, expected to be generated by the use of the asset is less than its carrying amount, the Company should evaluate the asset for an impairment loss. Measurement of the impairment loss is based on the fair value of the asset which is determined based on management estimates and assumptions and by making use of available market data. The fair values are determined through Level 2 inputs of the fair value hierarchy as defined in ASC 820 “Fair value measurements and disclosures” and are derived principally from or by corroborated or observable market data. Inputs, considered by management in determining the fair value, include independent broker’s valuations, FFA indices, average charter hire rates and other market observable data that allow value to be determined. The Company evaluates the carrying amounts and periods over which long-lived assets are depreciated to determine if events have occurred which would require modification to their carrying values or useful lives. In evaluating useful lives and carrying values of long-lived assets, management reviews certain indicators of potential impairment, such as future undiscounted net operating cash flows, vessel sales and purchases, business plans and overall market conditions. In performing the recoverability tests the Company determines future undiscounted net operating cash flows for each vessel and compares it to the vessel’s carrying value. The future undiscounted net operating cash flows are determined by considering the Company’s alternative courses of action, estimated vessel’s utilization, its scrap value, the charter revenues from existing time charters for the fixed fleet days and an estimated daily time charter equivalent for the unfixed days over the remaining estimated useful life of the vessel, net of vessel operating expenses adjusted for inflation, and cost of scheduled major maintenance. When the Company’s estimate of future undiscounted net operating cash flows for any vessel is lower than the vessel’s carrying value, the carrying value is written down, by recording a charge to operations, to the vessel’s fair market value.

As of December 31, 2011, the Company performed an impairment assessment of its long-lived assets by comparing the undiscounted net operating cash flows for each vessel to its respective carrying value. The significant factors and assumptions the Company used in each future undiscounted net operating cash flow analysis included, among others, operating revenues, commissions, off-hire days, dry-docking costs, operating expenses and management fee estimates. Revenue assumptions were based on contracted time charter rates up to the end of life of the current contract of each vessel as well as Forward Freight Agreements (FFAs) and market historical average time charter rates for the remaining life of the vessel after the completion of the current contracts. In addition, the Company used an annual operating expenses escalation factor and an estimate of off hire days. All estimates used and assumptions made were in accordance with the Company’s internal budgets and historical experience of the shipping industry. The Company’s assessment concluded that for vessels that are intended to be held and used no impairment existed as of December 31, 2011, as the future undiscounted net operating cash flows per vessel exceeded the carrying value of each vessel. For the vessels for which alternative courses of action (including their sale) are under consideration, an impairment charge of \$69,998 was recognized in 2011 and reflected in the accompanying consolidated statement of operations.

p) Accounting for Special Survey and Dry-docking Costs: The Company follows the deferral method of accounting for special survey and dry-docking costs, whereby actual costs incurred are deferred and are amortized over periods of five and two and a half years, respectively. If special survey or dry-docking is performed prior to the scheduled date, the remaining un-amortized balances are immediately written-off. In the accompanying financial statements, costs deferred are presented on a consistent basis and are limited to actual costs incurred at the yard, paints, class renewal expenses, and parts used in the dry docking or special survey. Indirect costs and/or costs related to ordinary maintenance, carried out while at dry dock, are expensed when incurred as they do not provide any future economic benefit. Unamortized dry-docking and special survey costs of vessels that are sold are written off at the time of the respective vessels' sale and are included in the calculation of the resulting gain or loss from such sale.

F-10

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

q) Financing Costs: Fees incurred for obtaining new loans are deferred and amortized over the loans' respective repayment periods, using the effective interest rate method. These charges are included in the balance sheet line item Deferred Charges. Any unamortized balance of costs relating to loans repaid or refinanced is expensed in the period the repayment or refinancing is made, if the refinancing is deemed to be a debt extinguishment under the provision of ASC 470-50 "Debt: Modifications and Extinguishments."

r) Unearned Revenue: Unearned revenue includes cash received prior to the balance sheet date and is related to revenue earned after such date. These amounts are recognized as revenue over the voyage or charter period.

s) Interest Rate Swaps: The Company uses interest rate swaps to manage net exposure to interest rate changes related to its borrowings. Such swap agreements, designated as "economic hedges" are recorded at fair value with changes in the derivatives' fair value recognized in earnings unless specific hedge accounting criteria are met. During the years ended December 31, 2009, 2010 and 2011, there was no derivative transaction meeting such hedge accounting criteria; therefore the change in their fair value is recognized in earnings.

t) Financial Instruments: The principal financial assets of the Company consist of cash and cash equivalents and restricted cash, trade receivables (net of allowance), insurance claims, prepayments and advances. The principal financial liabilities of the Company consist of accounts payable, accrued liabilities, deferred revenue, long-term debt, and interest-rate swaps. The carrying amounts reflected in the accompanying consolidated balance sheets of financial assets and liabilities, approximate their respective fair values.

u) Fair Value Measurements: The Company follows the provisions of ASC 820, "Fair Value Measurements and Disclosures" which defines, and provides guidance as to the measurement of, fair value. ASC 820 creates a hierarchy of measurement and indicates that, when possible, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The fair value hierarchy gives the highest priority (Level 1) to quoted prices in active markets and the lowest priority (Level 3) to unobservable data, for example, the reporting entity's own data. Under the standard, fair value measurements are separately disclosed by level within the fair value hierarchy. ASC 820 applies when assets or liabilities in the financial statements are to be measured at fair value, but does not require additional use of fair value beyond the requirements in other accounting principles.

v) *Fair value option:* In February, 2007, the FASB issued ASC 825, "Financial Instruments," which permits companies to report certain financial assets and financial liabilities at fair value. ASC 825 was effective for the Company as of January 1, 2008 at which time the Company could elect to apply the standard prospectively and measure certain financial instruments at fair value. The Company evaluated the guidance contained in ASC 825 and elected not to report any existing financial assets or liabilities at fair value that are not already reported at fair value, therefore the adoption of the statement had no impact on its financial position and results of operations. The Company retains the ability to elect the fair value option for certain future assets and liabilities acquired under this new pronouncement.

w) *Accounting for Revenue and Expenses:* Revenue is recorded when services are rendered, the Company has a signed charter agreement or other evidence of an arrangement, the price is fixed or determinable, and collection is reasonably assured. A voyage charter involves the carriage of a specific amount and type of cargo from specific load port(s) to specific discharge port(s), subject to various cargo handling terms, in return for payment of an agreed upon freight rate per ton of cargo. A time charter involves placing a vessel at the charterers' disposal for a period of time during which the charterer uses the vessel in return for the payment of a specified daily hire rate. Short period charters for less than three months are referred to as spot charters. Time charters extending three months to a year are generally referred to as medium term charters. All other time charters are considered long term. Voyage revenues for the transportation of cargo are recognized ratably over the estimated relative transit time of each voyage. A voyage is deemed to commence when a vessel is available for loading of its next fixed cargo and is deemed to end upon the completion of the discharge of the current cargo. Revenues from time chartering of vessels are accounted for as operating leases and are thus recognized on a straight line basis as the average revenue over the rental periods of such charter agreements, as service is provided. Voyage expenses, primarily consisting of port, canal and bunker expenses that are unique to a particular charter, are paid for by the charterer under time charter arrangements or by the Company under voyage charter arrangements, except for commissions, which are always paid for by the Company, regardless of charter type. All voyage and vessel operating expenses are expensed as incurred, except for commissions. Commissions are deferred over the related voyage charter period to the extent revenue has been deferred since commissions are earned as the Company's revenues are earned. Probable losses on voyages in progress are provided for in full at the time such losses can be estimated.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

x) Profit Sharing Arrangements: From time to time, the Company has entered into profit sharing arrangements with its charterers, whereby the Company may have received additional income at an agreed percentage of net earnings earned by such charterer, where those earnings are over the base rate of hire and settled periodically during the term of the charter agreement. Revenues generated from the profit sharing arrangements are recorded in the period they are earned.

y) Repairs and Maintenance: All repair and maintenance expenses, including major overhauling and underwater inspection expenses, are charged against income as incurred and are included in vessel operating expenses in the accompanying consolidated statements of operations.

z) Stock-Based Compensation: Following the provisions of ASC 718, "Compensation- Stock Compensation" the Company recognizes all share-based payments to employees, including grants of employee stock options, in the consolidated statements of operations based on their fair values on the grant date. Compensation cost on stock based awards with graded vesting is recognized on an accelerated basis as though each separately vesting portion of the award was in substance, a separate award.

aa) Earnings/(Losses) per Share: Basic earnings/(losses) per share are computed by dividing net income (loss) by the weighted average number of common shares outstanding during the periods presented. Diluted earnings per share reflect the potential dilution that would occur if securities or other contracts to issue common stock were exercised. Dilution has been computed by the treasury stock method whereby all of the Company's dilutive securities (warrants, options and restricted shares) are assumed to be exercised and the proceeds used to repurchase common shares at the weighted average market price of the Company's common stock during the relevant periods. The incremental shares (the difference between the number of shares assumed issued and the number of shares assumed purchased) are included in the denominator of the diluted earnings/(losses) per share computation unless such inclusion would be anti-dilutive.

bb) Segment Reporting: The Company reports financial information and evaluates its operations by total charter revenues. The Company does not have discrete financial information to evaluate the operating results for each type of charter. Although revenue can be identified for these types of charters, management does not identify expenses, profitability or other financial information for these charters. As a result, management, including the chief operating decision makers, reviews operating results solely by revenue per day and operating results of the fleet and thus the Company has determined that it operates under one reportable segment. Furthermore, when the Company charters a

vessel to a charterer, the charterer is free to trade the vessel worldwide and, as a result, the disclosure of geographic information is impracticable.

cc) Subsequent Events: The Company evaluates subsequent events or transactions up to the date in which the financial statements are issued according to the requirements of ASC 855.

dd) Recent Accounting Standards Updates: ASU 2011-04: In May 2011, the FASB issued ASU 2011-04, Fair Value Measurement (Topic 820)-Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (IFRSs). ASU 2011-04 amends ASC 820 to clarify the Board's intent about the application of existing fair value measurement and disclosure requirements. It also changes particular principles or requirements for measuring fair value or for disclosing information about fair value measurement. The guidance in the ASU is effective for the first reporting period (including interim periods) beginning after December 15, 2011. The provisions of ASU 2011-04 are not expected to have a material impact on the Company's consolidated financial statements.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

ASU 2011-05: In June 2011, the FASB issued ASU 2011-05 Comprehensive Income (Topic 220): Presentation of Comprehensive Income. Under the amendments to Topic 220, Comprehensive Income, in this Update, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This update eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this update do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. ASU is effective for the fiscal years beginning after December 15, 2011. The Company follows the provisions of ASC 220, "Comprehensive Income," which requires separate presentation of certain transactions, which are recorded directly as components of stockholders' equity. The provisions of ASU 2011-05 are not expected to have an impact on the Company's consolidated financial statements. In December 2011, the FASB issued ASU 2011-11, "Balance Sheet (Topic 210): Disclosures about offsetting Assets and Liabilities". The objective of this update is to provide enhanced disclosures that will enable financial statements' users to evaluate the effect or potential effect of netting arrangements on an entity's financial position. This includes the effect or potential effect of rights of setoff associated with an entity's recognized assets and recognized liabilities within the scope of this ASU. The amendments require enhanced disclosures by requiring improved information about financial instruments and derivative instruments that are either (1) offset in accordance with either Section 210-20-45 or Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in accordance with either Section 210-20-45 or Section 815-10-45. The amendments in this update are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The provisions of ASU 2011-11 are not expected to have a material impact on the Company's consolidated financial statements.

In December 2011, the FASB issued ASU 2011-12, "Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items out of Accumulated Other Comprehensive Income in Accounting Standard Update No 2011-05". The amendments in this ASU supersede certain pending paragraphs in ASU 2011-05, to effectively defer the requirement that companies present reclassification adjustments for each component of accumulated other comprehensive income in both net income and other comprehensive income on the face of the financial statements. Companies are still required to present reclassifications out of accumulated other comprehensive income on the face of the financial statements or disclose those amounts in the notes to the financial statements.

3. Going Concern

As of December 31, 2011, the Company was in breach of financial covenants, including the loan-to-value ratios (also known as value maintenance clauses) contained in the Company's loan agreements, while it has not been able to meet certain of its scheduled payment obligations under its loan agreements which were due in November and December 2011. These breaches constituted events of default and could have resulted in the lenders requiring immediate payment of the loans.

Generally accepted accounting principles require that long-term debt be classified as a current liability when a covenant violation gives the lender the right to call the debt at the balance sheet date, absent a waiver. As a result of the cross default provisions in the Company's loan and interest rate swap agreements, actual breaches existing under its credit facilities, could result in defaults under all of the Company's affected debt and the acceleration of such debt by its lender. Accordingly, as of December 31, 2011, the Company is required to reclassify its long term debt and derivative financial instrument liability (interest rate swaps) as current liabilities in its consolidated balance sheet since the Company has not received waivers in respect of the breaches discussed above. As a result, the Company has a working capital deficit amounting to \$47,186.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

Furthermore, as of December 31, 2011, the Company was a party to two newbuilding contracts for which previously obtained financing was cancelled in 2011. As discussed in Note 17, subsequent to December 31, 2011, the Company failed to meet a scheduled payment obligation for the construction of these newbuildings.

As more fully discussed in Note 17, in 2012, the Company received notifications from the Banks that the Company is in breach of certain covenants and has not paid certain amounts as per its loan agreements. Management is currently seeking and will continue to seek to restructure the Company's indebtedness and obtain waivers on covenants violations. However, it is uncertain that it will be able to succeed as this is currently subject to the agreement of all banks involved. If the Company is not able to obtain the necessary waivers and/or restructure its debt, this could lead to the acceleration of the outstanding debt under its debt agreements. The Company's failure to satisfy its covenants and payment obligations under its debt agreements, and any consequent acceleration and cross acceleration of its outstanding indebtedness would have a material adverse effect on the Company's business operations, financial condition and liquidity.

Based on the Company's cash flow projections for 2012, cash on hand and cash provided by operating activities including the cash to be provided upon the sale of the vessels currently classified as held for sale will not be sufficient to cover scheduled debt repayments as of December 31, 2011, operating expenses and capital expenditure requirements for at least twelve months from the balance sheet date. All of the above raises doubt regarding the Company's ability to continue as a going concern.

The Company is currently exploring several alternatives aiming to manage its working capital requirements and other commitments if current market charter hire rates remain at today's low levels including negotiations for the restructuring of its loans, a share capital increase, disposition of certain vessels in its current fleet and taking steps to achieve additional reductions in operating and other costs.

The consolidated financial statements as of December 31, 2011, were prepared assuming that the Company would continue as a going concern. Accordingly, the financial statements did not include any adjustments relating to the recoverability and classification of recorded asset amounts, the amounts and classification of liabilities, or any other adjustments that might result in the event the Company is unable to continue as a going concern, except for the current classification of debt and the associated restricted cash, deferred financing fees and derivative financial instrument liability.

4. Related Party Transactions

Manager

All vessels owned by the Company receive management services from the Manager, pursuant to ship management agreements between each of the ship-owning companies and the Manager.

In June 2011, each of the ship-owning subsidiaries entered into an amended and restated management agreement and the Company entered into a services agreement with the Manager pursuant to which the monthly technical management fee increased from \$16.5 to \$18.975 and the monthly services fee increased from \$118.5 to \$136.275, respectively, effective June 1, 2011. In addition, in connection with the relocation of the Company's offices in June 2011, the Company entered into an agreement with the Manager pursuant to which the Company agreed to pay the Manager 65% of the rental due for the office space, commencing June 2011, and 65% of the apportioned common expenses and maintenance expenses.

In addition, based on the amended services agreement FreeSeas reimbursed the Manager with the lump sum of \$144 (equivalent of Euro 100) for the expenses incurred in relation to the relocation of the Manager's offices and early termination cost for previous lease agreement. This compensation is included in "General and Administrative Expenses" in the accompanying consolidated statement of operations.

Each of the Company's ship-owning subsidiaries pays, as per its management agreement with the Manager, monthly technical management fee of \$18.975 (on the basis that the \$/Euro exchange rate is 1.30 or lower; if on the first business day of each month the \$/Euro exchange rate exceeds 1.30 then the management fee payable will be increased for the month in question, so that the amount payable in \$ will be the equivalent in Euro based on 1.30 \$/Euro exchange rate) plus a fee of \$0.4 per day for superintendant attendance and other direct expenses.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

FreeSeas also pays the Manager a fee equal to 1.25% of the gross freight or hire from the employment of FreeSeas' vessels. The Manager has subcontracted the charter and post charter management of FreeSeas' vessels and pays the 1.25% of the gross freight or hire from the employment of the vessels to Safbulk Pty Ltd ("Safbulk"), an entity affiliated with one Company's major shareholder. Such sub-management agreement was terminated in March 2012 and the Manager has commenced the provision of the commercial management of the Company's fleet. In addition, FreeSeas pays a 1% commission on the gross purchase price of any new vessel acquired or the gross sale price of any vessel sold by FreeSeas with the assistance of the Manager. In this respect, the Company paid Free Bulklers \$261 relating to the sale of the M/V *Free Envoy* and M/V *Free Lady* (Note 5) in 2011 and \$32 relating to the sale of M/V *Free Destiny* (Note 5) and \$488 relating to the signing of shipbuilding contracts for the construction of two handysize vessels (Note 7) in 2010. In addition, the Company has incurred commission expense relating to its commercial agreement with the Manager amounting to \$371, \$728 and \$752 for the years ended December 31, 2011, 2010 and 2009 respectively, included in "Commissions" in the accompanying consolidated statements of operations.

FreeSeas pays, as per its services agreement with the Manager, a monthly fee of \$136,275, (on the basis that the \$/Euro exchange rate is 1.35 or lower; if on the last business day of each month the \$/Euro exchange rate exceeds 1.35 then the service fee payable will be adjusted for the following month in question, so that the amount payable in dollars will be the equivalent in Euro based on 1.35 \$/Euro exchange rate) as compensation for services related to accounting, financial reporting, implementation of Sarbanes-Oxley internal control over financial reporting procedures and general administrative and management services plus expenses. The Manager is entitled to a termination fee if the agreement is terminated upon a "change of control" as defined in its services agreement with the Manager. The termination fee as of December 31, 2011 would be approximately \$100,525.

Fees and expenses charged by the Manager are included in the accompanying consolidated financial statements in "Management fees to a related party," "General and administrative expenses," "Operating expenses," "Gain on sale of vessel", "Vessel impairment loss", "Advances for vessels under construction" and "Write-off of advances for vessels under construction". The total amounts charged for the year ended December 31, 2011, 2010 and 2009 amounted to \$4,451 (\$1,900 of management fees, \$1,609 of services fees, \$146 of superintendent fees, \$144 for compensation of relocation expenses, \$179 for other expenses and \$473 for management fees and supervision expenses for vessels under construction), \$3,826 (\$1,978 of management fees, \$1,439 of services fees, \$178 of superintendent fees, \$117 for other expenses and \$114 for management fees and supervision expenses for vessels under construction) and \$3,245 (\$1,874 of management fees, \$1,313 of services fees and \$58 of superintendent fees), respectively.

On December 31, 2009, the Company granted 84,000 restricted shares to certain of the Manager's employees vesting in December 2012 pursuant to the Company's equity incentive plan (Note 14). The cost of these shares is amortized

over their vesting period and is included in “General and administrative expenses” in the accompanying consolidated statements of operations.

The balance due from the Manager as of December 31, 2011 and December 31, 2010 was \$563 and \$1,285 respectively. The amount paid to the Manager for office space during the year ended December 31, 2011, 2010 and 2009 was \$178, \$204 and \$197, respectively and is included in “General and administrative expenses” in the accompanying consolidated statements of operations.

First Business Bank (FBB)

FreeSeas received from FBB, in which one of the Company’s major shareholders holds a substantial interest, and in which the Company’s Chairman, Chief Executive Officer and President owns a minority interest, a loan of \$27,750 (Note 10) in December 2009, to refinance its then existing loan balance of \$21,750 with FBB and to receive additional liquidity of up to \$6,000 with a first priority mortgage over the M/V *Free Impala* and the M/V *Free Neptune*. The outstanding balance of the loan as of December 31, 2011 was \$23,237. Interest charged under the loan facility for the year ended December 31, 2011, 2010 and 2009 amounts to \$812, \$893 and \$629, respectively, and is included in “Interest and finance costs” in the accompanying consolidated statements of operations. On December 23, 2011 the Company agreed by letter with FBB to defer the repayment installment of \$837.5 and the interest payment of \$197 both due on December 16, 2011 until the next repayment date March 16, 2012. In addition, the bank granted a waiver to the security value covenant and the financial covenants and their testing has been waived until March 16, 2012 (Note 17).

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

Other Related Parties

The Company, through Free Bulkers and Safbulk uses from time to time a ship-brokering firm associated with family members of the Company's Chairman, Chief Executive Officer and President for certain of the charters of the Company's fleet. During the years ended December 31, 2011, 2010 and 2009, such ship-brokering firm charged the Company commissions of \$56, \$175 and \$48, respectively, which are included in "Commissions" in the accompanying consolidated statements of operations. The balance due to the ship-brokering firm as of December 31, 2011 and December 31, 2010 was \$84 and \$98, respectively.

Vessel acquisition during the year ended December 31, 2009

In 2009, the Company agreed to purchase the M/V Free Neptune from an unaffiliated third party for \$11,000 plus costs directly related to the purchase amounting to \$302. The vessel was delivered to the Company on August 25, 2009. The Company financed the acquisition using cash on hand which was raised as part of the Company's follow on equity offering in July 2009 (Note 15).

Vessel disposed during the year ended December 31, 2010

On July 30, 2010, the Company agreed to sell the M/V Free Destiny. The vessel was delivered to the buyers on August 27, 2010 and the Company recognized a gain of \$807 as a result of the sale. From the proceeds of the sale, the Company paid on November 1, 2010 an amount of \$2,700 constituting prepayment towards the Deutsche Bank Nederland N.V. ("Deutsche Bank Nederland," formerly known as Hollandsche Bank Unie) loan facility B (Note 10).

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

Vessels disposed during the year ended December 31, 2011

On May 13, 2011, the Company sold the M/V *Free Envoy* for a sale price of \$4,200 and recognized a gain of \$1,561 as a result of the sale. From the net proceeds of the sale, the Company paid on May 13, 2011 an amount of \$3,700 constituting prepayment towards the Deutsche Bank Nederland loan facility B. According to the loan terms, all future installments have been reduced to nil until the balloon payment due in November 2012 (Note 10).

As a result of the fourth supplemental agreement, the Company entered into with Credit Suisse on July 15, 2011 (Note 10), the Company committed to a plan for sale of the vessels M/V *Free Jupiter* and M/V *Free Lady*.

Thus Company assessed for recoverability the carrying value of M/V *Free Jupiter* and M/V *Free Lady*, including unamortized deferred dry docking costs of \$177, due to their expected sale. In performing its assessment, the Company compared the carrying value of the vessels with their estimated fair value. As a result of this assessment, the Company has recognized an impairment loss of \$46,515 in the consolidated statements of operations of which \$15,048 relates to the M/V *Free Jupiter* and \$31,467 to the M/V *Free Lady*.

On November 8, 2011, the Company sold the M/V *Free Lady*, for a sale price of \$21,900. From the net proceeds of the sale, the Company paid on November 8, 2011 the amount of \$19,800 constituting prepayment towards the Credit Suisse loan facility (Note 10).

6. Vessels held for sale

	Net Book Value

December 31, 2011	\$ 45,272

The Company according to the provisions of ASC 360, has classified the M/V *Free Hero* , the M/V *Free Jupiter* , the M/V *Free Impala* and the M/V *Free Neptune* as “held for sale” in the accompanying consolidated balance sheet for the year ended December 31, 2011 at their estimated market values less costs to sell, as all criteria required for the classification as “Held for Sale” were met at the balance sheet date. On February 28, 2011, after obtaining the respective lenders consent (FBB), the Company’s Board of Directors, approved a plan of sale of the vessels M/V *Free Impala* and M/V *Free Neptune* within the context of its plans to fund its working capital requirements as discussed in Note 3. On July 15, 2011, the Company’s Board of Directors approved a plan of sale of the vessels M/V *Free Jupiter* and M/V *Free Lady* (which was sold on November 8, 2011) as a result of the fourth supplemental agreement the Company entered into with Credit Suisse (Note 10).

Drydocking costs consists of the unamortized dry docking and special survey costs of the M/V *Free Neptune* which were included in “Vessels held for sale” following the vessel’s classification as held for sale in February 2011 as well as \$373 relating to the cost of the drydocking and special survey performed on this vessel in November 2011.

As of December 31, 2011, the Company compared the carrying values of vessels classified as held for sale with their estimated market values less costs to sell and recognized an impairment loss of \$23,483 in the accompanying consolidated statements of operations. All four vessels classified as held for sale at December 31, 2011 are expected to be disposed off subsequent to June 1, 2012, but prior to December 31, 2012.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

Vessel classified as assets held for sale during the year ended December 31, 2010.

The Company according to the provisions of ASC 360, has classified the M/V *Free Hero* as “held for sale” in the accompanying consolidated balance sheet for the year ended December 31, 2010 at her estimated market value less costs to sell, as all criteria required for the classification as “Held for Sale” were met at the balance sheet date. The vessel’s carrying value was adjusted to \$13,606 at the date of its classification as held for sale. Furthermore subsequent to December 31, 2010, at the direction of the Company’s Board of Directors, and after obtaining the respective lenders consent (FBB), the Company initiated a plan of sale of the vessels M/V *Free Neptune* and M/ V *Free Impala* within the context of its plans to fund its working capital requirements.

The Company has individually assessed for recoverability the carrying values of each of the above vessels, including unamortized deferred dry docking costs of \$631. In performing its assessment, the Company compared the carrying values of these vessels with their estimated fair values at December 31, 2010. As a result of this assessment the Company has recognized an impairment loss of \$26,631 in the accompanying 2010 consolidated statement of operations, of which \$17,253 relates to the M/V *Free Impala* and \$9,378 to the M/V *Free Hero* . No impairment loss was recognized for the M/V *Free Neptune* as its fair value exceeded its carrying value.

7. Advances for Vessels under Construction

On August 17, 2010, two of the Company’s wholly owned subsidiaries entered into shipbuilding contracts with a Chinese yard for the construction of two drybulk vessels of approximately 33,600 dwt each for an aggregate purchase price of \$49,880 including extra costs of approximately \$1,080 in total. In March 2011 and May 2011, the Company advanced the second installment amounting to \$2,440 and \$2,440 for Hull 1 and Hull 2, respectively.

The amount shown in the accompanying consolidated balance sheet includes milestone payments relating to the shipbuilding contracts with the shipyard, supervision costs and any material related expenses incurred during the construction period, net of potential impairment.

As of December 31, 2011, the Company impaired the advances and the capitalized expenses relating to the shipbuilding contracts due to lack of financing after the cancelation of ABN AMRO financing commitment (Note 10) and delayed scheduled payment to the yard resulting in a default situation as per the construction contract (Note 17).

The movement of the advances for vessels under construction for each of the two years ended December 31, 2010 and 2011 has as follows:

	Contract payments	Capitalized expenses	Capitalized interest	Total
December 31, 2009	\$ —	—	—	\$ —
Additions	4,880	742	43	5,665
December 31, 2010	\$ 4,880	742	43	\$ 5,665
Additions	4,880	890	282	6,052
Impairment	(9,760)	(1,632)	(325)	(11,717)
December 31, 2011	\$ —	—	—	\$ —

Additions to deferred dry-docking and special survey costs in 2011 related to the dry docking and special survey of the M/V *Free Maverick* .

Unamortized dry docking and special survey costs of \$406 related to the M/V *Free Envoy* and M/V *Free Lady* were written off upon the vessels sale in 2011 as well as \$100 related to unamortized deferred financing fees of the Credit Suisse loan facility (Note 10) due to the prepayment made in 2011.

Unamortized dry docking and special survey costs of \$191 related to the M/V *Free Neptune* were included in “Vessels held for sale” following the vessel’s classification as held for sale in February 2011.

9. Financial Instruments and Fair Value Measurements

The Company is exposed to interest rate fluctuations associated with its variable rate borrowings and its objective is to manage the impact of such fluctuations on earnings and cash flows of its borrowings. In this respect, the Company partially uses interest rate swaps to manage net exposure to interest rate fluctuations related to its borrowings.

The Company is a party of two interest rate swap agreements which do not qualify for hedge accounting and as such, the changes in their fair values are recognized in the statement of operations. The Company makes quarterly payments to the counterparty based on decreasing notional amounts, standing at \$5,993 and \$3,208, respectively as of December 31, 2011 at fixed rates of 5.07% and 5.55% respectively, and the counterparty makes quarterly floating-rate payments at LIBOR to the Company based on the same decreasing notional amounts. The swaps mature in September 2015 and July 2015, respectively.

The change in the fair value of the Company’s two interest rate swaps for the year ended December 31, 2011, 2010 and 2009 resulted in unrealized gains of \$361, \$129 and \$560, respectively. The settlements on the interest rate swaps for the year ended December 31, 2011, 2010 and 2009 resulted in realized losses of \$539, \$594 and \$671, respectively. The total of the change in fair value and settlements for the year ended December 31, 2011, 2010 and 2009 aggregate to losses of \$178, \$465 and \$111, respectively, which is separately reflected in “Loss on derivative instruments” in the accompanying consolidated statements of operations.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

As of December 31, 2011 the Company was in breach of certain of its financial covenants relating to loan agreements (Note 10). Thus the cross default provisions of the swap agreements would be activated and as such and in accordance with the guidance related to classification of obligations that are callable by the creditor, the Company has classified the entire long-term amount of \$377 as current at December 31, 2011. In this respect the total fair value amounting to \$760 is reflected in “Derivative financial instruments-current portion” in the accompanying consolidated balance sheets.

Tabular Disclosure of Derivatives Location

Derivatives are recorded in the balance sheet on a net basis by counterparty when a legal right of setoff exists. The following tables present information with respect to the fair values of derivatives reflected in the balance sheet on a gross basis by transaction. The tables also present information with respect to gains and losses on derivative positions reflected in the Statement of income.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

	Total derivatives	\$ —	\$ —	\$ 760	\$ 1,121

The Effect of Derivative Instruments on the Statement of Operations for the Years Ended December 31, 2011, 2010 and 2009**Derivatives Not Designated as Hedging Instruments**

Derivative	Gain (Loss) Recognized on Derivative Location	Amount		
		2011	2010	2009
Interest rate swaps	Loss on derivative instruments	\$ 178	\$ 465	\$ 111
Total		\$ 178	\$ 465	\$ 111

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash and cash equivalents, restricted cash, accounts receivable and accounts payable: The carrying values reported in the consolidated balance sheets for those financial instruments are reasonable estimates of their fair values due to their short-term nature.

Long-term debt: The fair values of long-term bank loans approximate the recorded values due to the variable interest rates payable.

Derivative financial instruments: The fair values of the Company's derivative financial instruments equate to the amount that would be paid or received by the Company if the agreements were cancelled at the reporting date, taking into account current market data per instrument and the Company's or counterparty's creditworthiness, as appropriate.

The guidance for fair value measurements applies to all assets and liabilities that are being measured and reported on a fair value basis. This statement enables the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The statement requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

Level 3: Unobservable inputs that are not corroborated by market data and that are significant to the fair value of the assets or liabilities.

The Company's derivative financial instruments are valued using pricing models that are used to value similar instruments by market participants. Where possible, the Company verifies the values produced by its pricing models to market prices. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit spreads, measures of volatility and correlations of such inputs. The Company's derivatives trade in liquid markets, and as such, model inputs can generally be verified and do not involve significant management judgment. Such instruments are typically classified within Level 2 of the fair value hierarchy.

The following table summarizes the valuation of liabilities measured at fair value on a recurring basis as of the valuation date:

	December 31,	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Recurring measurements:	2011

F-22

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

In accordance with the provisions of relevant guidance, as of December 31, 2011, the Company compared the carrying values of the *M/V Free Hero*, the *M/V Free Jupiter*, the *M/V Free Impala* and the *M/V Free Neptune* which were classified as held for sale in the accompanying consolidated balance sheet for the year ended December 31, 2011 (Note 6), with their estimated fair market values less costs to sell and recognized an impairment loss of \$23,483 in the accompanying consolidated statements of operations.

The Company according to the provisions of ASC 360, has classified the *M/V Free Hero* as “held for sale” in the accompanying consolidated balance sheet for the year ended December 31, 2010 at her estimated market value less costs to sell, as all criteria required for the classification as “Held for Sale” were met at the balance sheet date. The vessel’s carrying value was adjusted to \$13,606 at the date of its classification as held for sale. Furthermore subsequent to December 31, 2010, at the direction of the Company’s Board of Directors, and after obtaining the respective lenders consent (FBB), the Company initiated a plan of sale of the vessels *M/V Free Neptune* and *M/V Free Impala* within the context of its plans to fund its working capital requirements. The Company has individually assessed for recoverability the carrying values of each of the above vessels, including unamortized deferred dry docking costs of \$631. In performing its assessment, the Company compared the carrying values of these vessels with their estimated fair values at December 31, 2010. As a result of this assessment the Company has recognized an impairment loss of \$26,631 in the accompanying 2010 consolidated statement of operations, of which \$17,253 relates to the *M/V Free Impala* and \$9,378 to the *M/V Free Hero*. No impairment loss was recognized for the *M/V Free Neptune* as its fair value exceeded its carrying value.

10. Long-Term Debt

Long-term debt as of December 31, 2011 and 2010 consists of the following bank loans:

Lender	(In thousands of U.S. Dollars)			December 31, 2010		
	December 31, 2011			December 31, 2010		
	Current Portion	Long-term portion	Total	Current portion	Long-term	Total
Deutsche Bank Nederland (a)	\$ 13,250	\$ —	\$ 13,250	\$ 3,000	\$ 11,750	\$ 14,750
Deutsche Bank Nederland (b)	\$ 16,009	\$ —	\$ 16,009	\$ 300	\$ 19,409	\$ 19,709
Credit Suisse (c)	\$ 19,099	\$ —	\$ 19,099	\$ 13,372	\$ 18,603	\$ 31,975
Credit Suisse (d)	\$ 17,351	\$ —	\$ 17,351	\$ 3,000	\$ 25,275	\$ 28,275

Edgar Filing: FREESEAS INC. - Form 20-F/A

First Business Bank (e)	\$ 23,237	\$ —	\$ 23,237	\$ 3,350	\$ 22,400	\$ 25,750
Total	\$ 88,946	\$ —	\$ 88,946	\$ 23,022	\$ 97,437	\$ 120,459

The remaining repayment terms of the loans outstanding as of December 31, 2011, as amended to reflect the agreements reached for deferral of certain payments in 2012, without considering the Company's non-compliance discussed in Note 3, are as follows:

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

Lender	Vessel	Remaining Repayment Terms
(a) Deutsche Bank Nederland	M/V <i>Free Knight</i>	Fifteen consecutive quarterly installments of \$750 followed by one installment of \$2,000.
(b) Deutsche Bank Nederland	M/V <i>Free Maverick</i>	One balloon payment of \$16,009.
	M/V <i>Free Hero</i>	
(c) Credit Suisse	M/V <i>Free Goddess</i>	Seven quarterly installments of \$875, eight quarterly installments of \$937.5 and a balloon payment of \$5,475 payable together with the last installment.
	M/V <i>Free Jupiter</i>	
(d) Credit Suisse		Seven quarterly installments of \$525, eight quarterly installments of \$562.5 and a balloon payment of \$9,175 payable together with the last installment.
	M/V <i>Free Impala</i>	
(e) First Business Bank	M/V <i>Free Neptune</i>	One quarterly installment of \$1,675, nineteen quarterly installments of \$837.5 and a balloon payment of \$5,650, payable together with the last installment.

The vessels indicated in the above table are pledged as collateral for the respective loans.

The Company and its subsidiaries have obtained financing from affiliated and unaffiliated lenders for its vessels (Note 4).

All the Company's credit facilities bear interest at LIBOR plus a margin, ranging from 2.25% to 4.25%, and are secured by mortgages on the financed vessels and assignments of vessels' earnings and insurance coverage proceeds. They also include affirmative and negative financial covenants of the borrowers, including maintenance of operating accounts, minimum cash deposits, average cash balances to be maintained with the lending banks and minimum ratios for the fair values of the collateral vessels compared to the outstanding loan balances. Each borrower is restricted under its respective loan agreement from incurring additional indebtedness, changing the vessels' flag without the

lender's consent or distributing earnings.

The weighted average interest rate for the year ended December 31, 2011 and 2010 was 2.9% and 3%, respectively. Interest expense incurred under the above loan agreements amounted to \$3,173 (net of capitalized interest \$282), \$3,932 and \$3,708 for the years ended December 31, 2011, 2010 and 2009, respectively, and is included in "Interest and Finance Costs" in the accompanying consolidated statements of operations.

Deutsche Bank Nederland Facility

On September 2, 2011, the Company instructed the Deutsche Bank Nederland in accordance with relevant provision of the facility agreement to postpone the repayment installment of \$750 due on September 18, 2011, which will be paid on the termination date in December 2015.

In October 2011, the Company following negotiations with Deutsche Bank Nederland deferred the payment of an additional fee equal to \$360, due on November 1, 2011, to January 2012 (Note 17).

In December 2011, the Company did not pay the \$750 repayment installment along with accrued interest with Deutsche Bank Nederland and is in discussions to permanently amend the amortization schedule including refinancing of the balloon due in November 2012.

Credit Suisse Facility

On July 15, 2011, the Company entered into a Fourth Supplemental Agreement with Credit Suisse which amended its existing credit facility to, among other things, defer its payments totaling \$2,000, originally due in July 2011 until September 2011. The Fourth Supplemental Agreement, as originally entered into, contemplated that the Company would complete a proposed debt financing with an unrelated party, and that if the debt financing did not occur by September 5, 2011, the Company would sell one or two of the four vessels collateralizing the credit facility. This debt financing did not occur. Therefore, the Company initiated the sale of the M/V *Free Jupiter* and the M/V *Free Lady*. On October 3, 2011, the Company entered an agreement to sell vessel *Free Lady* (Note 5). The net proceeds of this sale amounting to \$19,800 were applied to pay down the amount outstanding on this facility.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

The Company has incurred amendment fees of \$150 for the year ended December 31, 2011, relating to this facility, which are included in the accompanying consolidated statements of operations in "Interest and Finance Costs."

In light of the successful sale of the M/V *Free Lady* (Note 5), the Company entered into a Fifth Supplemental Agreement dated November 7, 2011 with Credit Suisse, which amended the Fourth Supplemental Agreement to, among other things, reduce the next five loan repayment installments starting from the third quarter of 2011. Pursuant to this agreement, the Company agreed to enter into a period time charter of at least twelve months for all mortgaged vessels not later than December 31, 2011, which charter would cover the vessels' debt service plus \$1.0 million. If the foregoing time charters were not entered into by the date required, the Company agreed that it will sell, not later than January 31, 2012, either the M/V *Free Jupiter* or both the M/V *Free Goddess* and the M/V *Free Hero* .. In addition, under the Fifth Supplemental Agreement, the margin on this facility increased to 3.25% during the period until either the period employment or the sale procedure has been completed, after which time the margin will be reduced to 2.75%. According to the terms of the agreement, failure to comply with the above would constitute an event of default. The Company had not entered into a period time charter as required by the Fifth Supplemental Agreement by December 31, 2011 (Note 17).

FBB Facility

On December 23, 2011, the Company agreed with FBB to defer the repayment installment of \$837.5 and the interest payment of \$197 both due on December 16, 2011 until the next repayment date March 16, 2012. In addition, the bank granted a waiver to the security value covenant and the financial covenants and their testing has been waived until March 16, 2012 (Note 17).

ABN AMRO Facility

On September 10, 2010, the Company signed an offer letter with ABN AMRO Bank securing, subject to customary legal documentation and payment of an arrangement fee, commitments for pre-delivery and post-delivery debt financing up to an amount of \$32,400 for the purchase of two newbuilding Handysize vessels. The facility, which would be available for drawdown until December 31, 2012, is repayable in 20 quarterly installments plus a balloon payment, commencing three months after the delivery of the vessels. The vessels will be used as collateral for the

facility. According to the agreed terms, the facility would bear interest at LIBOR plus margin and would include customary financial covenants.

On October 4, 2010, ABN AMRO Bank issued letters of guarantee in favor of the Chinese shipyard covering the second installment for the newbuilding vessels, amounting to \$2,440 for each vessel. On the same date, the Company entered into a bank guarantee facility agreement for the issuance of the letters of guarantee. The letters of guarantee mature on the earliest between the date of the payment of the second installment and November 30, 2011. In March 2011 and May 2011, the Company advanced the second installment amounting to \$2,440 and \$2,440 for Hull 1 and Hull 2, respectively, and the relevant letters of guarantee were cancelled.

By letter dated December 30, 2011, the Company received notice from ABN AMRO Bank that the Bank's commitment for pre-delivery and post delivery debt financing up to the amount of \$32,400 for the purchase of the two newbuilding Handysize vessels has been canceled due to the Company's failure to pay commitment fees as prescribed in the offer letter, that were considered as events of default, and the occurrence of various material adverse changes as considered by ABN AMRO Bank. The commitment fees paid by the Company were reimbursed by ABN AMRO in 2012 (Note 17).

Loan Covenants

As of December 31, 2011, its loan agreements contain various financial covenants as follows:

Credit Suisse loan agreement: (i) the Company is required to maintain minimum cash balances of \$375 for each of its vessels covered by the loan agreement; and (ii) the aggregate fair market value of the financed vessels must not be less than 135% of the outstanding loan balance and the swap exposure.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

FBB loan agreement: (i) the Company is required to maintain an average corporate liquidity of at least \$3,000; (ii) the leverage ratio of the corporate guarantor shall not at any time exceed 55%; (iii) the ratio of EBITDA to net interest expense shall not be less than 3; and (iv) the fair market value of the financed vessels shall be at least (a) 115% for the period July 1, 2010 to June 30, 2011 and (b) 125% thereafter. The covenants described in clauses (i), (ii) and (iii) above are tested annually on December 31 st and their testing has been waived by the bank until March 16, 2012.

Deutsche Bank Nederland loan agreement: (i) the interest coverage ratio to be recalculated and reset; (ii) the debt service coverage ratio to be recalculated and reset; (iii) the gearing ratio shall not exceed 2.5; (iv) the outstanding loan balance shall not be more than a ratio of the fair market value of the financed vessels as follows: (a) 100% from July 1, 2010 until and including June 30, 2011, (b) 110% from July 1, 2011 until and including June 30, 2012, (c) 120% from July 1, 2012 until and including December 30, 2012 and (d) 125% from December 31, 2012 and thereafter. The covenants described in clauses (i), (iii) and (iv) above are tested quarterly and the covenant in clause (ii) above is tested annually on December 31st.

Based on the loan agreements, the Company is required to meet the covenants described above. As of December 31, 2011, the Company was in breach of certain of its financial covenants for all of its loan agreements, including the loan-to-value ratios, interest cover ratios, minimum liquidity requirements and leverage ratios. Thus, in accordance with guidance related to classification of obligations that are callable by the creditor, the Company has classified all of the related long-term debt amounting to \$88,946 as current at December 31, 2011.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

11. Commitments and Contingencies

The following table summarizes our contractual obligations and their maturity dates as of December 31, 2011:

(Dollars in thousands)	Payments Due by Period						
	Total	Less than 1 year	2- year	3- year	4- year	5- year	More than 5 years
	(U.S. dollars in thousands)						
Long-term debt	\$88,946	\$88,946	\$—	\$—	\$—	\$—	\$—
Interest on variable-rate debt	3,334	3,334	—	—	—	—	—
Yard construction installments	20,060	20,060	—	—	—	—	—
Services fees to the Manager	11,038	1,635	1,635	1,635	1,635	1,635	2,863
Management fees to the Manager	16,642	1,765	911	911	911	911	11,233
Total obligations	\$140,020	\$115,740	\$2,546	\$2,546	\$2,546	\$2,546	\$14,096

The above table does not include our share of the monthly rental expenses for our offices of approximately 8.7 Euro (in thousands)

Claims

Various claims, suits, and complaints, including those involving government regulations and product liability, arise in the ordinary course of the shipping business. In addition, losses may arise from disputes with charterers, agents, insurance and other claims with suppliers relating to the operations of the Company's vessels. Currently, management is not aware of any such claims or contingent liabilities, which should be disclosed, or for which a provision should be established in the accompanying consolidated financial statements. The Company is a member of a protection and

indemnity association, or P&I Club that is a member of the International Group of P&I Clubs, which covers its third party liabilities in connection with its shipping activities. A member of a P&I Club that is a member of the International Group is typically subject to possible supplemental amounts or calls, payable to its P&I Club based on its claim records as well as the claim records of all other members of the individual associations, and members of the International Group. Although there is no cap on its liability exposure under this arrangement, historically supplemental calls have ranged from 25%-40% of the Company's annual insurance premiums, and in no year have exceeded \$1 million. The Company accrues for the cost of environmental liabilities when management becomes aware that a liability is probable and is able to reasonably estimate the probable exposure. Currently, management is not aware of any such claims or contingent liabilities, which should be disclosed, or for which a provision should be established in the accompanying consolidated financial statements. The Company's protection and indemnity (P&I) insurance coverage for pollution is \$1 billion per vessel.

F-27

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

The M/V *Free Jupiter* was on time charter with Korea Line Corp, or KLC, a South Korean company, from June 8, 2007 until she was re-delivered to us on February 22, 2011. KLC made several unilateral deductions from hire payments during the three-year course of the time charter, and no hire was received from KLC from February 8, 2011 until the actual redelivery of the vessel on February 22, 2011. The Company commenced arbitration proceedings against KLC, and has taken action to obtain security, including the arrest of KLC assets. As a result, the Company obtained third-party security in the amount of \$1.68 million (which includes provision for interest and legal costs) in the form of a letter of undertaking from KLC's P&I club covering KLC's unilateral deductions from the hire. The Company also obtained cash security held in escrow in the amount of \$159 from the execution of a lien on sub-hires. KLC has counterclaimed by way of set-off, alleging that KLC is entitled to retain the amount of hire that was deducted because of the Company's alleged breach of charterparty. The Company denies these allegations and continues to assert its claim to recover the full amount deducted by KLC. On January 25, 2011, KLC announced that it had filed a petition for the rehabilitation proceeding for court receivership in the Seoul Central District Court, and the court approved and confirmed a rehabilitation plan. Upon the issuance of the final award of the arbitration tribunal, and for any amount in excess of the third-party security and cash security, the Company may participate in the approved rehabilitation plan. As of December 31, 2011, the outstanding balance of the KLC time charter was \$1,372 after provisions of \$136, which is below the security obtained as described above. On January 17, 2012, the Company obtained an interim award under which it was awarded the part of the claim that KLC had admitted was undisputed, \$832, plus interest, legal costs, and the cost of the tribunal. Following the interim award, the Company received approximately \$321. The majority of the balance of \$511 that has been awarded is unsecured. The Company is considering its options if KLC does not pay the balance, including the possibility of pursuing this in the Korean rehabilitation proceedings, where the hearing of the Company's claim has been stayed pending the outcome of the London arbitration. The Company believes that, (if the Korean claim succeeds, the Company should make a recovery in accordance with the rehabilitation plan, which has been approved by the Korean court). There will be a further award (if this matter does not settle) for the disputed balance, which is adequately secured.

On October 11, 2011 the M/V *Free Jupiter* suffered from diesel generators shaft balancing system breakdown about 598 miles off Singapore. The costs incurred are claimable from hull and machinery underwriters. As at December 31, 2011, the balance of the specific claim receivable amounts to \$448. The Company believes that the amount of the claim will be recovered in full.

On November 11, 2011 the M/V *Free Impala* suffered from main engine drive chain and camshaft damage about 300 miles off Singapore. The costs incurred are claimable from hull and machinery underwriters. As at December 31, 2011, the balance of the specific claim receivable amounts to \$52. The Company believes that the amount of the claim will be recovered in full.

In addition to the above claims, the aggregate outstanding balance of the Company's other claims as of December 31, 2011 stands at \$127 related to Company's insurance claims for vessel incidents arising in the ordinary course of business.

12. Earnings/(Losses) per Share

On June 9, 2011, the Company extended the expiration date and reduced the exercise price for its 1,655,006 outstanding Class Z warrants. The expiration date of the Class Z warrants was extended to August 12, 2011 from July 26, 2011 and the exercise price per share was reduced to \$0.36 per one-fifth (1/5) of a share of common stock, or \$1.80 per whole share of common stock, from \$5.00 per one-fifth (1/5) of a share, or \$25.00 per whole share. As of August 12, 2011, 8,865 Class Z warrants had been exercised and 1,773 shares of Common Stock were issued; the remaining Class Z warrants expired unexercised. In addition, the 150,000 Class A warrants held by the founding shareholders, which had an exercise price of \$5.00 per 1/5 share or \$25.00 per whole share, were not exercised and expired on July 29, 2011.

The computation of basic earnings per share is based on the weighted average number of common shares outstanding during the period, as adjusted to reflect the reverse stock split effective October 1, 2010. The computation of the dilutive common shares outstanding at December 31, 2011 and 2010 does not include the 12,000 vested options (adjusted to reflect the reverse stock split) and non vested restricted shares discussed in Note 13, as the Company reported losses for the years ended December 31, 2011 and 2010.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

The components of the denominator for the calculation of basic earnings/(losses) per share and diluted earnings/(losses) per share for the years ended December 31, 2011, 2010 and 2009, respectively, adjusted to reflect the reverse stock split effective October 1, 2010 (Note 13), are as follows:

	For the year ended December 31, 2011	For the year ended December 31, 2010	For the year ended December 31, 2009

Diluted income/(loss) per common share			
Diluted income/(loss) per common share	\$ (13.60)	\$ (3.46)	\$ 1.35

13. Reverse stock split

In the Annual General Meeting of Shareholders held on September 30, 2010, the Company's shareholders approved a reverse stock split of the Company's issued and outstanding common stock at a ratio of one share for every five shares outstanding, effective on October 1, 2010. The reverse stock split consolidates five shares of common stock into one share of common stock at a par value of \$0.001 per share. As a result of the reverse stock split, the number of outstanding common shares has been reduced from 32,437,480 to 6,487,852, excluding outstanding and unexercised share options and warrants.

The reverse stock split did not affect any shareholder's ownership percentage of the Company's common shares or warrants, except to the limited extent that the reverse stock split resulted in any shareholder owning a fractional share. Fractional shares of common stock were rounded up to the nearest whole share.

At December 31, 2011, and following the reverse stock split discussed above, the Company had 5,000,000 shares of preferred stock authorized at \$0.001 par value of which none was issued, 250,000,000 shares of common stock authorized at \$0.001 par value, of which 6,475,625 shares were issued and outstanding, as well as the number of options and shares of restricted stock discussed in Note 14.

14. Stock Incentive Plan

In April 2005, FreeSeas' Board of Directors approved the issuance of Class A warrants to the executive officers of FreeSeas. The terms of the warrants provided that they expired on July 29, 2011 and are not callable. These warrants, the issuance of which was ratified, adopted and approved by the Board of Directors on December 16, 2005, entitle the holders to purchase an aggregate of 40,000 shares of the Company's common stock at an exercise price of \$25.00 per share. Such warrants were not exercised and expired by their terms on July 29, 2011.

In December 2007, the Company's Board of Directors granted 9,000 options to directors and 25,000 options to executive officers, as adjusted to reflect the reverse stock split effective October 1, 2010 (Note 13), of which 28,000 would vest in one year, 3,000 would vest in two years and 3,000 in three years from the grant, all at an exercise price of \$41.25 per share. Effective December 18, 2009, certain of the Company's officers and directors have forfeited 22,000 of the stock options granted to them, leaving 12,000 stock options outstanding as of December 31, 2011 and 2010. All the outstanding stock options, which expire on December 24, 2012, are vested and remain unexercised as of December 31, 2011.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

On December 31, 2009, the Company's Board of Directors awarded 255,000 restricted shares, as adjusted to reflect the reverse stock split effective October 1, 2010, to its non-executive directors, executive officers and certain of Manager's employees. Of the unvested restricted shares amounted to 134,000 as of December 31, 2010, 10,000 and 4,000 restricted shares with an original vesting date on December 31, 2012 have been forfeited in June 2011 and October 2011, respectively. Of the remaining unvested restricted shares amounted to 120,000 as of December 31, 2011, 70,000 restricted shares will vest on December 31 2012 and 50,000 restricted shares will vest on December 31, 2013.

For the year ended December 31, 2011, the recognized stock based compensation expense in relation to the restricted shares granted is \$122. The total unrecognized compensation cost of the non vested restricted shares granted under the Plan is \$263. The cost is expected to be recognized over a period of twenty-four months, representing a weighted average remaining life of approximately 17 months. No unrecognized compensation cost related to stock options exists as of December 31, 2011, as all options are vested.

FREESEAS INC.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(All amounts in thousands of United States Dollars, except for share and per share data)

The Company's total stock-based compensation expense for the year ended December 31, 2011, 2010 and 2009 was \$122, \$559 and \$494, respectively and is included in "General and administrative expenses" in the accompanying consolidated statements of operations.

The potential proceeds to the Company of all vested options as of December 31, 2011 would amount to \$495.

Presented below is a table reflecting the activity in the restricted shares, options, Class A warrants, Class W warrants and Class Z Warrants from January 1, 2009 through December 31, 2011:

	Restricted Shares	Options	Class A Warrants	Class W Warrants	Class Z Warrants	Total	Average Exercise Price	Options Exercisable	Class A Warrants Exercisable	Class W Warrants Exercisable

15. Shareholders' Equity

On April 27, 2005, the Company filed amended Articles of Incorporation in the Marshall Islands, whereby the name of the Company was changed from Adventure Holdings S.A. to FreeSeas Inc.

The authorized number of shares was increased to 45,000,000, of which 40,000,000 would be common stock with a par value of \$.001 per share and 5,000,000 blank check preferred stock with a par value of \$.001 per share. On September 17, 2009, the Company's shareholders approved at the Annual Meeting of Shareholders an amendment to the Company's Articles of Incorporation to increase the number of authorized shares of common stock from 40,000,000 to 250,000,000 shares, par value \$0.001 per share.

On July 28, 2009, the Company completed the registered offering of 2,008,230 shares of common stock (as adjusted to reflect the effect of reverse stock split), which includes 261,943 shares (as adjusted to reflect the effect of reverse stock split) issued pursuant to the underwriter's over-allotment option. The offering resulted in net proceeds of \$16,244, after deducting underwriting fees and offering expenses. Proceeds from the offering were used primarily for the acquisition of the drybulk vessel M/V *Free Neptune* as discussed in Note 5 above, for general working capital purposes, and an amount of \$1,691 was applied against the outstanding balance with Deutsche Bank Nederland. The shares were sold under the Company's previously filed shelf registration statement, which was declared effective by the Securities and Exchange Commission on May 14, 2008.

On December 9, 2011, the Company received a deficiency letter from NASDAQ stating that, because the Company's common stock has not maintained a minimum bid price of \$1.00 per a share for the last 30 consecutive business days, the Company was no longer in compliance with NASDAQ Listing Rule Section 5450(a)(1). In order to regain compliance, the Company has until June 4, 2012 for the closing bid price of its common stock to meet or exceed \$1.00 for a minimum of 10 consecutive business days. The Company regained compliance in February 2012 (Note 17).

Common Stock Dividends

During the year ended December 31, 2011, 2010 and 2009, the Company did not declare or pay any dividends.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

16. Taxes

Under the laws of the Countries of the Company and its subsidiaries incorporation and/or vessels' registration, the Company is not subject to tax on international shipping income; however, they are subject to registration and tonnage taxes, which have been included in Vessel operating expenses in the accompanying consolidated statement of operations. Pursuant to the Internal Revenue Code of the United States (the "Code"), U.S. source income from the international operations of ships is generally exempt from U.S. tax if the company operating the ships meets both of the following requirements, (a) the Company is organized in a foreign country that grants an equivalent exemption to corporations organized in the United States, and (b) either (i) more than 50% of the value of the Company's stock is owned, directly or indirectly, by individuals who are "residents" of the Company's country of organization or of another foreign country that grants an "equivalent exemption" to corporations organized in the United States (the "50% Ownership Test") or (ii) the Company's stock is "primarily and regularly traded on an established securities market" in its country of organization, in another country that grants an "equivalent exemption" to United States corporations, or in the United States (the "Publicly-Traded Test").

To complete the exemption process, the Company's shipowning subsidiaries must file a U.S. tax return, state the basis of their exemption and obtain and retain documentation attesting to the basis of their exemptions. The Company's subsidiaries completed the filing process for 2011 on or prior to the applicable tax filing deadline.

All the Company's ship-operating subsidiaries currently satisfy the Publicly-Traded Test based on the trading volume and the widely-held ownership of the Company's shares, but no assurance can be given that this will remain so in the future, since continued compliance with this rule is subject to factors outside the Company's control. Based on its U.S. source Shipping Income for 2009, 2010 and 2011, the Company would be subject to U.S. federal income tax of approximately \$159, \$34 and \$93, respectively, in the absence of an exemption under Section 883.

17. Subsequent Events

On January 6, 2012, the Company received a deficiency letter from NASDAQ stating that, because the Company has not maintained a minimum Market Value of Publicly Held Shares (the "MVPHS") of \$5,000 for the last 30 consecutive business days, the Company is no longer in compliance with NASDAQ Listing Rule Section 5450(b)(1)(C). In order to regain compliance, the Company had until July 2, 2012 for the Company's MVPHS to meet or exceed \$5,000 for a minimum of 10 consecutive business days. By letter dated February 29, 2012, the Company received notice from

NASDAQ that it has regained compliance with Listing Rules 5450(a)(1) and 5450(b)(1)(C), since for the last 10 consecutive business days, from February 14, 2012 to February 28, 2012, the closing bid price of the Company's common stock has been at \$1.00 per share or greater and the Company's minimum market value of publicly held shares has been \$5,000 or greater, respectively.

On January 27, 2012, the Company entered into a First Supplemental Agreement with FBB, which amends its existing credit facility to defer the repayment installment of \$837.5 and the interest payment of \$197 both due on December 16, 2011 until the next repayment date March 16, 2012. In addition, the bank granted a waiver to the security value covenant and the financial covenants (for more information please see Note 10 above), whose testing has been waived until March 16, 2012.

On March 23, 2012, the Company received a notice from FBB according to which failure to (i) pay the \$1,675 repayment installment due in March 2012 (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. On April 12, 2012, the Company received notice from FBB according to which along with the previously mentioned events, failure to make periodic monthly installments into the retention account since September 2011 and violation of loan to value covenant constitute events of default and notifies the Company that if remedy of all of the above is not made up to April 20, 2012, FBB will take whatever action is open to them. The Company is in discussions to permanently amend the amortization schedule.

According to the Credit Suisse Fifth Supplemental dated November 7, 2011, the Company had agreed to enter into a period time charter of at least twelve months for all of our mortgaged vessels not later than December 31, 2011, which charter would cover the vessels' debt service plus \$1.0 million. If the foregoing time charters would not have been entered into by the date required, the Company had agreed that would sell, not later than January 31, 2012, either the *M/ V Free Jupiter* or both the *M/V Free Goddess* and the *M/V Free Hero* . The Company has not concluded any time charter agreement and any agreement for the sale of the above mentioned vessels.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

On February 2, 2012, the Company agreed by letter with Credit Suisse to defer its payments totaling \$700 originally due on January 31, 2012 until the next repayment date April 30, 2012, which was further deferred to May 31, 2012 as per letter dated April 25, 2012. The interest payment of \$348 originally due on February 8, 2012, has been agreed to be paid in two installments as follows: \$147 paid on February 8, 2012 and \$201 to be paid on April 30, 2012, which was further deferred to May 31, 2012 as per letter dated April 25, 2012. In addition the interest payment of \$348 originally due on May 10, 2012, has been agreed to be paid in two installments as follows: \$147 to be paid on May 10, 2012 and \$201 on May 31, 2012.

On February 15, 2012, the Company received a proposal from Credit Suisse containing restructuring head terms for the full payment holiday of the principal and partial interest payment holiday until March 31, 2014, conditioned on approval from the Company's other lenders. The Company has been advised that the proposal has been approved by Deutsche Bank Nederland. The Company is continuing discussions with FBB.

M/V Free Goddess was hijacked by Somali pirates on February 7, 2012 while transiting the Indian Ocean eastbound. The vessel is held off the coast of Somalia and the Company is currently in communication with the pirates for the release of the vessel and her crew. The vessel was on a time charter trip at the time she was hijacked. Under the charter party agreement, the BIMCO Piracy clause was applied which provided, among other things, for the charterers to have the vessel covered with kidnap and ransom insurance and loss of hire insurance. The vessel was also covered by the war risk underwriters who were duly informed about the transit and had confirmed cover. Currently, an estimate of a possible loss or range of loss, if any, cannot be made.

On February 15, 2012, the Company received notice from Deutsche Bank Nederland according to which, failure to (i) repay the installment due in December 2011, (ii) pay regular interest on the loan, (iii) pay default interest on the loan, (iv) pay the success fee due in November 2011 (v) set new financial covenants and (vi) complying with loan to value covenant, are considered an event of default and requested from the Company to fulfill its obligations by March 15, 2012. In March 2012, the Company did not paid the aforementioned amounts or the \$750 repayment installment along with accrued interest due in March 2012. The Company was advised on April 26, 2012 that Deutsche Bank Nederland would approve the request to permanently amend the amortization schedule including refinancing of the balloon due in November 2012, subject to documentation and receiving approval from FBB for the restructuring of the facilities.

By letter dated February 25, 2012, the Company received notice from the shipyard pursuant to its newbuilding contracts that the Company had failed to pay the payment of \$3,660 due on February 11, 2012 under one of the contracts and was therefore in default under its obligations under this contract. The shipyard terminated this contract by notice dated April 28, 2012 to the Company.

Pursuant to a settlement agreement entered into on April 13, 2012, ABN AMRO has agreed to return to the Company all commitment fees paid to date less expenses and all further obligations of the parties have been terminated. The Company has received \$391 on April 17, 2012 as final and full settlement.

At its April 2012 meeting, the Company's Board of Directors approved the issuance of 1,660,694 shares of the Company's common stock to the Manager in payment of \$926 in unpaid fees due to the Manager for the first quarter of 2012 under the management and services agreements with the Company. The number of shares to be issued to the Manager was based on the closing prices of the Company's common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. Upon issuance of these shares, which will be restricted stock under applicable U.S. securities laws, Mr. Varouxakis will beneficially own 26% of the outstanding common stock of the Company. The Board also approved the issuance of an aggregate of 199,642 shares of the Company's common stock to the non-executive members of our Board of Directors in payment of \$31 per person in unpaid Board fees for the last three quarters of 2011. The aggregate number of shares to be issued to the directors was based on the closing prices of the Company's common stock on the last day of each of the last three quarters of 2011, which are the dates that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

FREESEAS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in thousands of United States Dollars, except for share and per share data)

On May 11, 2012, we entered into a Standby Equity Distribution Agreement, or SEDA, with YA Global Master SPV Ltd., or YA Global, a fund managed by Yorkville Advisors, LLC, pursuant to which, for a 24-month period, we have the right to sell up to \$3,200 of shares of the Company's common stock. The SEDA entitles us to sell and obligates YA Global to purchase, from time to time over a period of 24 months, shares of our common stock for cash consideration up to an aggregate of \$3,200, subject to conditions we must satisfy as set forth in the SEDA. For each share of common stock purchased under the SEDA, YA Global will pay 96% of the lowest daily volume weighted average price during the pricing period, which is the five consecutive trading days after we deliver an advance notice to YA Global. Each such advance may be for an amount not to exceed the greater of \$200 or 100% of the average daily trading volume of our common stock for the 10 consecutive trading days prior to the notice date. We registered the resale by YA Global of up to 1,839,721 shares of our common stock. As of the date of this report, we had sold 1,739,721 shares of our common stock under the SEDA for aggregate proceeds of \$432. Pursuant to the terms of the SEDA, we cannot deliver any further advance notices until such time as we file and have declared effective a new registration statement covering the resale of additional shares of our common stock by YA Global.

On May 31, 2012, FreeSeas entered a Sixth Supplemental Agreement with Credit Suisse AG, or Credit Suisse, which amends and restates the Facility Agreement dated December 24, 2007, as amended, between FreeSeas and Credit Suisse. The Sixth Supplemental Agreement, among other things, modifies the Facility Agreement to:

· Defer further principal repayments until March 31, 2014;

· Reduce the interest rate on the facility to LIBOR plus 1% until March 31, 2014 from a current interest margin of 3.25%;

· Release restricted cash of \$1,125;

· Waive compliance through March 31, 2014 with the requirement to maintain a minimum ratio of aggregate fair market value of the financed vessels to loan balance, after which date the required minimum ratio will be 115% beginning April 1, 2014, 120% beginning October 1, 2014, and 135% beginning April 1, 2015;

· Establish certain financial covenants, including an interest coverage ratio, which must be complied with starting January 1, 2013, a consolidated leverage ratio, which must be complied with starting January 1, 2014, and a minimum liquidity ratio, which must be complied with starting July 1, 2014; and

Require the amount of any “Excess Cash,” as determined in accordance with the Facility Agreement at each fiscal quarter end beginning June 30, 2012, to be applied to pay the amendment and restructuring fee described below and prepay the outstanding loan balance, depending on FreeSeas’ compliance at the time with the vessel market value to loan ratio and the outstanding balance of the loan.

As of the date of this report, the outstanding balance under the Facility Agreement totaled \$36,450. An amendment and restructuring fee equal to 5% of the current outstanding indebtedness, \$1,823, will be due and payable on the earlier of March 31, 2014, the date of a voluntary prepayment, or the date the loan facility becomes due or is repaid in full. FreeSeas is also no longer required to sell additional vessels, as it had been under the terms of the Facility Agreement as previously in effect.

F-34

On July 11, and August 22, 2012, the Company received notices from FBB according to which failure to (i) pay the \$2,513 repayment installment due in June 2012 (ii) pay accrued interest and (iii) failure to pay default interest constitute an event of default. The Company is in discussions to permanently amend the amortization schedule.

On August 21, 2012, the Company received the amount of \$250, following the Note Purchase Agreement dated May 11, 2012 between the Company and YA Global. The note is repaid in ten equal weekly installments and mature 90 days from the date of funding.

On September 7, 2012, the Company and certain of its subsidiaries entered into an amended and restated facility agreement with Deutsche Bank Nederland N.V. As amended and restated, the facility agreement:

1. Defers and reduces the balloon payment of \$16,009 due on Facility B from November 2012 to December 2015;
2. Provides for monthly repayments of \$20 for each of Facility A and Facility B commencing September 30, 2012 through April 30, 2013 and a monthly repayment of \$11.5 for each of Facility A and Facility B on May 31, 2013;
3. Suspends principal repayments from June 1, 2013 through June 30, 2014 on each of Facility A and Facility B;
4. Provides for quarterly repayments of \$337 for Facility A commencing June 30, 2014, which quarterly repayments have been reduced from \$750;
5. Provides for quarterly repayments of \$337 for Facility B commencing June 30, 2014;
6. Bears interest at the rate of LIBOR plus 1% through March 31, 2014 and LIBOR plus 3.25% from April 1, 2014 through maturity, which was amended from LIBOR plus 2.25% for Facility A and LIBOR plus 4.25% for Facility B;
7. Establishes certain financial covenants, including an interest coverage ratio, which must be complied with starting January 1, 2013, a consolidated leverage ratio, which must be complied with starting January 1, 2014, and a minimum liquidity ratio, which must be complied with starting July 1, 2014;
8. Removes permanently the loan to value ratio;
9. Requires the amount of any "Excess Cash," as determined in accordance with the amended and restated facility agreement at each fiscal quarter end beginning June 30, 2012, to be applied to pay the amendment and restructuring

fee described below and prepay the outstanding loan balance; and

Removes the success fee originally due under the previous agreement and sets an amendment and restructuring fee 10. of \$1,480 payable on the earlier of March 31, 2014, the date of a voluntary prepayment, or the date the loan facility becomes due or is repaid in full.

F-35

On September 11, 2012, the Company's Audit Committee approved the retention of Sherb & Co., LLP ("Sherb") as its independent registered public accounting firm for the fiscal year ending December 31, 2012, and dismissed Ernst & Young (Hellas) Certified Auditors Accountants S.A. ("E&Y").

As of October 10, 2012, the Company has sold an aggregate of 1,739,721 shares of its common stock to YA Global, under its Standby Equity Agreement for aggregate sales proceeds of \$432.

At its October 2012 meeting, Company's Board of Directors approved the issuance of 2,196,500 shares of FreeSeas' common stock to the Manager in payment of the \$807 in unpaid fees due to the Manager for the third quarter of 2012 under the management and services agreements with FreeSeas. The number of shares to be issued to the Manager was based on the closing prices of FreeSeas' common stock on the first day of each month during the quarter, which are the dates the management and services fees were due and payable. The Board also approved the issuance of an aggregate of 326,790 shares of FreeSeas' common stock to the non-executive members of its Board of Directors in payment of \$30 per person in unpaid Board fees for the first, second and third quarter of 2012. The aggregate number of shares to be issued to the directors was based on the closing prices of FreeSeas' common stock on the last day of each of the three quarters of 2012, which are the dates that the Board fees were due and payable. All of the foregoing shares will be restricted shares under applicable U.S. securities laws.

On October 11, 2012, the Company and Dutchess Opportunity Fund, II, LP, a Delaware limited partnership ("Dutchess Capital"), entered into an Equity Line Facility (the "Line"). Pursuant to the Line, the Company has the right but not the obligation, for a 36-month period, to sell up to 2,352,962 shares of its common stock to Dutchess Capital.

On October 11, 2012, the Company announced that all 21 crew members of the *M/V Free Goddess* are reported safe and well after the vessel's release by her hijackers.
