CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This discussion and analysis contains forward-looking statements. Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. These statements are often, but not should, always, made through the use of words or phrases such as anticipate, believes, can, would, could, may, predicts, estimate, plans, projects, continuing, ongoing, expects, intends and similar words or phrases. These statements are only predictions and estimates, known and unknown risks, assumptions and uncertainties. Our actual results could differ materially from those expressed in or contemplated by such forward-looking statements as a result of a variety of factors, some of which are more fully described in Part II under the caption Risk Factors.

Any or all of our forward-looking statements in this quarterly report may turn out to be inaccurate. The inclusion of such forward-looking statements should not be regarded as a representation by us that we will achieve the results expressed in or contemplated by such forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, liquidity, results of operations, business strategy and growth prospects. There are important factors that could cause our actual results, level of activity, performance or achievements to differ materially from the results, level of activity, performance or achievements expressed in or contemplated by the forward looking statements, including, but not limited to:

effects of any changes in trade and monetary and fiscal policies and laws, including the interest rate policies of the Federal Reserve;

the ability in certain states to amend the state constitution to impose restrictions on financial services by a simple majority of the people who actually vote;

governmental legislation and regulation, including changes in accounting regulation or standards;

failure of politicians to reach consensus on a bipartisan basis;

acts of war or terrorism, natural disasters such as tornadoes, flooding, hail storms and damaging winds, earthquakes, hurricanes or fires, or the effects of pandemic flu;

3

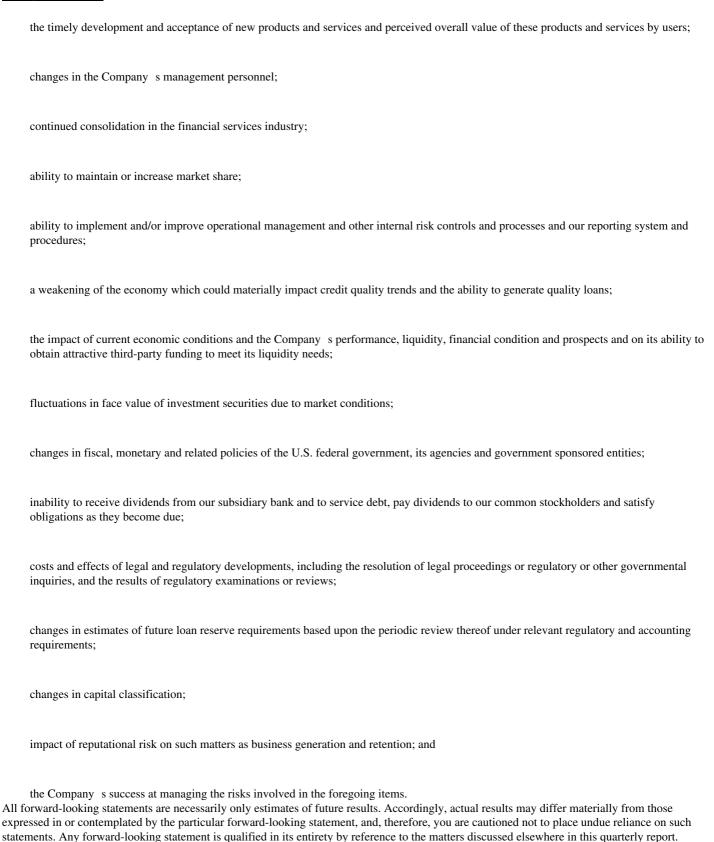

Table of Contents 6

Further, any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any

forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events or circumstances, except as required by applicable law.

NATIONAL BANK HOLDINGS CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

September 30, 2012

Note 1 Basis of Presentation

National Bank Holdings Corporation, formerly known as NBH Holdings Corp., (the Company) is a bank holding company that was incorporated in the State of Delaware in June 2009 with the intent to acquire and operate community banking franchises and other complementary businesses in targeted markets. The accompanying unaudited consolidated financial statements include the accounts of the Company, and its wholly owned subsidiary, NBH Bank, N.A. NBH Bank, N.A. is the resulting entity from the Company s acquisitions to date. The results of operations of each acquisition is included from the respective dates of the acquisition (October 22, 2010 for Hillcrest Bank, N.A., December 10, 2010 for Bank Midwest, N.A., July 22, 2011 for Bank of Choice, and October 21, 2011 for Community Banks of Colorado, collectively referred to herein as the Banks), and as such, the operating results for the three or nine months ended September 30, 2011 do not reflect any operations for Community Banks of Colorado and only include a partial quarter of operations of Bank of Choice for the three months ended September 30, 2011.

The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) and where applicable, with general practices in the banking industry or guidelines prescribed by bank regulatory agencies. The unaudited consolidated interim financial statements reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the results presented. All such adjustments are of a normal recurring nature. All significant intercompany balances and transactions have been eliminated in consolidation. The unaudited consolidated financial statements should be read in conjunction with the Company s audited consolidated financial statements for the year ending December 31, 2011. Certain reclassifications of prior years amounts are made whenever necessary to conform to current period presentation. Operating results for the three and nine months ended September 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012.

The Company s significant accounting policies followed in the preparation of the consolidated financial statements are disclosed in Note 2 of the Company s audited consolidated financial statements and related notes for the year ended December 31, 2011. GAAP requires management to make estimates that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosures of contingent assets and liabilities. By their nature, estimates are based on judgment and available information. Management has made significant estimates in certain areas, such as the amount and timing of expected cash flows from covered assets, the valuation of the FDIC indemnification asset and clawback liability, the valuation of other real estate owned, the fair value adjustments on assets acquired and liabilities assumed, the valuation of core deposit intangible assets, the deferred tax assets, the evaluation of investment securities for other-than-temporary impairment (OTTI), the fair values of financial instruments, the allowance for loan losses (ALL), and contingent liabilities. Because of the inherent uncertainties associated with any estimation process and future changes in market and economic conditions, it is possible that actual results could differ significantly from those estimates.

Pursuant to the Jumpstart Our Business Startups Act (the JOBS Act), the Company qualifies as an emerging growth company and can elect to opt out of the extended transition period for any new or revised accounting standards that may be issued by the Financial Accounting Standards Board or the SEC. The Company has elected to opt out of such extended transition period, which election is irrevocable.

10

The Company is still evaluating the JOBS Act and may take advantage of some or all of the reduced regulatory and reporting requirements that will be available so long as the Company qualifies as an emerging growth company, including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved.

Note 2 Investment Securities

During the nine months ended September 30, 2012, the Company re-evaluated the securities classified as available-for-sale and identified securities that the Company intends to hold until maturity. As a result, during the first quarter of 2012, the Company transferred residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises with a collective fair value of \$754.1 million from an available-for-sale classification to the held-to-maturity classification. The \$754.1 million of securities transferred to held-to-maturity included \$38.9 million of unrealized gains, net. As a result of the change in intent, the transferred securities were transferred to held-to-maturity at their fair value on the date of the transfer. The unrealized net gain continues to reside in Accumulated other comprehensive income, net of tax in the Company s unaudited consolidated statement of financial condition and will be accreted into interest income over the remaining life of the securities. This accretion is simultaneously offset by the amortization of the discount that was recorded to the investment securities balance at the time of the transfer, which represents the fair value adjustment, resulting in no impact to earnings.

Available-for-sale

Available-for-sale investment securities are summarized as follows as of the dates indicated (in thousands):

			Septe	mber 30, 20)12

Total	\$ 1,786,031	\$ 76,669	\$ (1)	\$ 1,862,699

At September 30, 2012 and December 31, 2011, mortgage-backed securities represented 94.6% and 99.6%, respectively, of the Company s available-for-sale investment portfolio and all mortgage-backed securities were backed by government sponsored enterprises (GSE) collateral such as Federal Home Loan Mortgage Corporation (FHLMC) and Federal National Mortgage Association (FNMA), and the government sponsored agency Government National Mortgage Association (GNMA).

The table below summarizes the unrealized losses as of the dates shown, along with the length of the impairment period (in thousands):

	September 30, 2012

Total	\$	20	\$	(1)	\$	\$	\$	20	\$	(1)

Management evaluated all of the securities in an unrealized loss position and concluded that no other-than-temporary-impairment existed at September 30, 2012 or December 31, 2011. The Company had no intention to sell these securities before recovery of their amortized cost and believes it will not be required to sell the securities before the recovery of their amortized cost.

The Company pledges certain securities as collateral for public deposits, securities sold under agreements to repurchase and to secure borrowing capacity at the Federal Reserve Bank, if needed. The fair value of available-for-sale investment securities pledged as collateral totaled \$76.5 million at September 30, 2012 and \$198.6 million December 31, 2011. The decrease of pledged available-for-sale investment securities was primarily attributable to the transfer of a significant amount of pledged securities from available-for-sale to held-to-maturity. Investment securities may also be pledged as collateral should the Company utilize its line of credit at the FHLB of Des Moines; however, no investment securities were pledged for this purpose at September 30, 2012 or December 31, 2011.

The table below summarizes the contractual maturities of our available-for-sale investment portfolio as of September 30, 2012 (in thousands):

		ortized Cost	Fair	Value
Due in one year or less	\$	300	\$	300
Due after one year through five years		92,694		92,872
Due after five years through ten years	2	275,890	2	80,611
Due after ten years	1,	326,508	1,3	65,430
Other securities		419		419
Total investment securities available-for-sale	\$ 1,0	695,811	\$ 1,7	39,632

Actual maturities of mortgage-backed securities may differ from contractual maturities depending on the repayment characteristics and experience of the underlying financial instruments. The estimated weighted average life of the available-for-sale mortgage-backed securities portfolio was 3.4 years as of September 30, 2012 and December 31, 2011. This estimate is based on assumptions and actual results may differ.

The Company s U.S. Treasury securities have contractual maturities of less than one year. Other securities of \$0.4 million have no stated contractual maturity date.

Held-to-maturity

At September 30, 2012 and December 31, 2011 the Company held \$643.7 million and \$6.8 million of held-to-maturity investment securities, respectively. The increase was attributable to the transfer of securities with a fair value of \$754.1 million from an available-for-sale classification to the held-to-maturity classification during the first quarter of 2012. Held-to-maturity investment securities are summarized as follows as of the dates indicated (in thousands):

	September 30, 2012							
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value				
Mortgage-backed securities (MBS):								
Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises	\$ 643,661	\$ 10,099	\$	\$ 653,760				
Total investment securities held-to-maturity	\$ 643,661	\$ 10,099	\$	\$ 653,760				

	December 31, 2011							
	Amortized Cost	Unre	ross ealized ains	Gross Unrealized Losses	Fair Value			
Mortgage-backed securities (MBS):								
Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises	\$ 6,801	\$	28	\$	\$ 6,829			
Total investment securities held-to-maturity	\$ 6,801	\$	28	\$	\$ 6,829			

The table below summarizes the contractual maturities of our held-to-maturity investment portfolio at September 30, 2012 (in thousands):

	Amortized Cost	Fair Value
Due in one year or less	\$	\$
Due after one year through five years		
Due after five years through ten years		
Due after ten years	643,661	653,760
Other securities		
Total investment securities held-to-maturity	\$ 643,661	\$ 653,760

The carrying value of held-to-maturity investment securities pledged as collateral totaled \$135.6 million at September 30, 2012. At December 31, 2011, none of the \$6.8 million of held-to-maturity investment securities were pledged as collateral. Actual maturities of mortgage-backed securities may differ from scheduled maturities depending on the repayment characteristics and experience of the underlying financial instruments. The estimated weighted average expected life of the held-to-maturity mortgage-backed securities portfolio as of September 30, 2012 was 3.9 years and 6.4 years as of December 31, 2011. This estimate is based on assumptions and actual results may differ.

Note 3 Non-marketable Securities

Non-marketable securities include Federal Reserve Bank stock and FHLB stock. At September 30, 2012, the Company held \$25.0 million of Federal Reserve Bank stock, \$7.5 million of FHLB Des Moines stock, and \$0.5 million of FHLB San Francisco stock, for regulatory or debt facility purposes. At December 31, 2011 the Company held \$25.0 million of Federal Reserve Bank stock, \$3.5 million of FHLB Des Moines stock, and \$0.6 million of FHLB San Francisco stock.

This stock is restricted and is carried at cost, less any other than temporary impairment. There have been no identified events or changes in circumstances that may have an adverse effect on the investments carried at cost.

Note 4 Loans

The loan portfolio is comprised of loans that were acquired in connection with the Company s acquisitions of Bank of Choice and Community Banks of Colorado in 2011, Hillcrest Bank and Bank Midwest in 2010, and new loans originated by the Company. The majority of the loans acquired in the Hillcrest Bank and Community Banks of Colorado transactions are covered by loss sharing agreements with the FDIC, and covered loans are presented separately from non-covered loans due to the FDIC loss sharing agreements associated with these loans.

Covered loans comprised 36.7% of the total loan portfolio at September 30, 2012, compared to 41.9% of the total loan portfolio at December 31, 2011. The table below shows the loan portfolio composition and the amounts of loans that are accounted for in accordance with ASC Topic 310-30 (in thousands):

	September 30, 2012

Loans are considered past due or delinquent when the contractual principal or interest due in accordance with the terms of the loan agreement remains unpaid after the due date of the scheduled payment. Loans accounted for under ASC Topic 310-30 were not classified as non-performing assets at the respective acquisition dates, at September 30, 2012 or at December 31, 2011 as the carrying value of the respective

loans or pools of loans cash flows were considered estimable and probable of collection. Therefore, interest income, through accretion of the difference between the carrying value of the loans and the expected cash flows, was recognized on all acquired loans accounted for under ASC Topic 310-30.

16

Pooled loans accounted for under ASC Topic 310-30 that are 90 days or more past due and still accreting are considered to be performing and are included in loans 90 days or more past due and still accruing. At September 30, 2012 and December 31, 2011, \$5.4 million and \$13.1 million, respectively, of covered loans accounted for outside the scope of ASC Topic 310-30 were on non-accrual. Loan delinquency for covered loans is shown in the following tables at September 30, 2012 and December 31, 2011, respectively, (in thousands):

Impaired loans

Edgar Filing: National Bank Holdings Corp - Form 10-Q

Loans are considered to be impaired when it is probable that the Company will not be able to collect all amounts due in accordance with the contractual terms of the loan agreement. Included in impaired loans are loans on non-accrual status and troubled debt restructurings (TDR s) described below. If a specific allowance is warranted based on the borrower s overall financial condition, the specific allowance is calculated based on discounted cash flows using the loan s initial contractual effective interest rate or the fair value of the collateral less selling costs for collateral dependent loans. Inclusive of TDR s, the Company s unpaid principal balance of impaired loans was \$56.0 million and \$74.7 million at September 30, 2012 and December 31, 2011, respectively.

At September 30, 2012, the Company s unpaid principal balance and recorded investment of impaired loans was \$56.0 million and \$37.6 million, respectively. Of these impaired loans, 35 were within the commercial real estate segment, with an unpaid principal balance of \$25.7 million and a recorded investment of \$18.1 million. Twenty-five of these commercial real estate loans, with a recorded investment of \$15.9 million and an unpaid principal balance of \$17.3 million were not covered by the FDIC loss sharing agreement, compared to ten loans with a recorded investment of \$2.2 million and an unpaid principal balance of \$8.4 million that were covered by the FDIC loss sharing agreement. The commercial loan segment had a total of 52 loans, 35 of which were not covered by the FDIC loss sharing agreement with an unpaid principal balance and a recorded investment of \$10.4 million and \$7.9 million, respectively. The 17 commercial loans that were covered by the FDIC loss sharing agreement had an unpaid principal balance and recorded investment of \$11.2 million and \$3.7 million, respectively. The residential real estate loan segment held 93 impaired loans, with an unpaid principal balance of \$8.3 million and a recorded investment of \$7.5 million. Of these 93 loans, two were covered by the FDIC loss sharing agreement with an unpaid principal balance and recorded investment of \$1.6 million and \$1.5 million, respectively, leaving 91 loans not covered by the FDIC loss sharing agreement with an unpaid principal balance of \$6.8 million and a recorded investment of \$6.0 million. These loans had a collective related allowance for loan losses allocated to them of \$2.0 million at September 30, 2012. The table below shows additional information regarding impaired loans at September 30, 2012 (in thousands):

At December 31, 2011, the Company s unpaid principal balance and recorded investment of impaired loans was \$74.7 million and \$50.1 million, respectively. Of these impaired loans, 26 were within the commercial real estate segment, with an unpaid principal balance of \$58.2 million and a recorded investment of \$41.1 million. Of the 26 impaired commercial real estate loans, the FDIC loss sharing agreements covered five of those loans with a recorded investment of \$8.2 million and an unpaid principal balance of \$23.3 million and 21 commercial real estate loans, with a recorded investment of \$32.9 million and an unpaid principal balance of \$34.9 million, were not covered by FDIC loss sharing agreements. The commercial loan segment had a total of 20 loans; ten of these were not covered by the FDIC loss sharing agreements and carried an unpaid principal balance and recorded investment of \$0.8 million, respectively. The 10 commercial loans that were covered by the FDIC loss sharing agreements had an unpaid principal balance and recorded investment of \$11.9 million and \$4.6 million, respectively. The residential real estate loan segment held 43 impaired loans, with an unpaid principal balance of \$3.9 million and a recorded investment of \$3.6 million. Of these 43 loans, three were covered by the FDIC loss sharing agreement with an unpaid principal balance and recorded investment of \$1.7 million, respectively, leaving 40 loans not covered by the FDIC loss sharing agreement with an unpaid principal balance of \$2.2 million and a recorded investment of \$1.9 million. These loans had a collective related allowance for loan losses allocated to them of \$0.8 million at December 31, 2011. The table below shows additional information regarding impaired loans at December 31, 2011 (in thousands):

Troubled debt restructurings

It is the Company s policy to review each prospective credit in order to determine the appropriateness and the adequacy of security or collateral prior to making a loan. In the event of borrower default, the Company seeks recovery in compliance with state lending laws, the respective loan agreements, and credit monitoring and remediation procedures that may include restructuring a loan to provide a concession by the Company to the borrower from their original terms due to borrower financial difficulties in order to facilitate repayment. Additionally, if a borrower s repayment obligation has been discharged by a court, and that debt has not been reaffirmed by the borrower, regardless of past due status, the loan is considered to be a troubled debt restructuring (TDR). At September 30, 2012 and December 31, 2011, the Company had \$15.6 million and \$12.3 million, respectively, of accruing TDR s that had been restructured from the original terms in order to facilitate repayment. Of these, \$3.6 million and \$1.4 million, respectively, were covered by FDIC loss sharing agreements. Accruing TDR s in the commercial loan segment were primarily comprised of nineteen loans with a recorded investment of \$6.9 million that were not covered by loss sharing agreements at September 30, 2012. Commercial real estate TDR s totaled \$5.2 million, of which seven were non-covered with a recorded investment of \$4.2

Edgar Filing: National Bank Holdings Corp - Form 10-Q

million and two were covered with a recorded investment of \$1.0 million. The remaining accruing TDR s were primarily made up of 23 loans from the single family residential segment, with a recorded investment of \$2.9 million. Of these loans, 22 were non-covered and had a recorded investment of \$1.8 million and one was covered, with a recorded investment of \$1.1 million.

29

Non-accruing TDR s at September 30, 2012 and December 31, 2011 totaled \$9.3 million and \$16.3 million, respectively. Of these, \$1.5 million were covered as of September 30, 2012 and none were covered as of December 31, 2011. At September 30, 2012 the non-accruing commercial real estate segment was primarily comprised of four non-covered loans with a recorded investment of \$6.8 million. The commercial loan segment held non-accruing TDR s, which included three covered loans with a recorded investment of \$0.9 million and three non-covered loans with a recorded investment of \$0.6 million. The remaining non-accruing TDR balance was from the single family residential segment, which included four non-covered loans and one covered loan, with a recorded investment of \$0.5 million and \$0.4 million, respectively.

During the three and nine months ended September 30, 2012, the Company restructured 30 loans with a recorded investment of \$7.3 million and 65 loans with a recorded investment of \$14.7 million, respectively, to facilitate repayment. Loan modifications to loans accounted for under ASC Topic 310-30 are not considered troubled debt restructurings. The table below provides additional information related to accruing TDR s at September 30, 2012 and December 31, 2011 (in thousands):

	Recorded investment	Septemb Average year-to- date recorded investment	er 30, 2012 Unpaid principal balance	Unfunded commitments to fund TDR s

30

The following table summarizes the Company s carrying value of non-accrual TDR s as of September 30, 2012 and December 31, 2011 (in thousands):

	Non - Accruing TDR s							
	Septeml	ber 30, 2012	Decen	nber 31, 2011				
	Covered Non-covered		Covered Non-covered Covered		Covered	Non-covered		
Commercial	\$ 933	\$ 643	\$	\$ 119				
Commercial real estate	112	6,765		16,108				
Agriculture								
Residential real estate	421	437		61				
Consumer								
Total	\$ 1,466	\$ 7,845	\$	\$ 16,288				

Accrual of interest is resumed on loans that were on non-accrual at the time of restructuring, only after the loan has performed sufficiently. The Company had two TDR s that had been modified within the past 12 months that defaulted on its restructured terms during the nine months ended September 30, 2012. For purposes of this disclosure, the Company considers default to mean 90 days or more past due on principal or interest. The defaulted TDRs were comprised of a non-owner occupied commercial real estate loan with a balance of \$0.6 million and a C&I loan with a balance of \$0.9 at September 30, 2012 and the maximum amount defaulted during the period was \$1.5 million.

Loans accounted for under ASC Topic 310-30

Loan pools accounted for under ASC Topic 310-30 are periodically remeasured to determine expected future cash flows. In determining the expected cash flows, the timing of cash flows and prepayment assumptions for smaller homogeneous loans are based on statistical models that take into account factors such as the loan interest rate, credit profile of the borrowers, the years in which the loans were originated, and whether the loans are fixed or variable rate loans. Prepayments may be assumed on large loans if circumstances specific to that loan warrant a prepayment assumption. No prepayments were presumed for small homogeneous commercial loans; however, prepayment assumptions are made that consider similar prepayment factors listed above for smaller homogeneous loans. The re-measurement of loans accounted for under ASC Topic 310-30 resulted in the following changes in the carrying amount of accretable yield during the nine months ended September 30, 2012 (in thousands):

Accretable yield balance at December 31, 2011	\$ 186,494
Reclassification from non-accretable difference	46,974
Reclassification to non-accretable difference	(8,348)
Accretion	(76,252)
Accretable yield balance at September 30, 2012	\$ 148,868

Below is the composition of the net book value for loans accounted for under ASC Topic 310-30 at September 30, 2012 and December 31, 2011 (in thousands):

	September 30, 2012	December 31, 2011
Contractual cash flows	\$ 1,617,451	\$ 2,030,374
Non-accretable difference	(497,547)	(536,171)
Accretable yield	(148,868)	(186,494)
Loans accounted for under ASC Topic 310-30	\$ 971,036	\$ 1,307,709

Note 5 Allowance for Loan Losses

During the nine months ended September 30, 2012, the Company re-estimated the expected cash flows of the loan pools accounted for under ASC Topic 310-30 utilizing the same cash flow methodology used at the time of acquisition. The re-measurement resulted in impairment of \$17.4 million, which was primarily driven by impairments of \$7.8 million in the land and development pools, \$4.9 million of which was in the acquired Community Banks of Colorado portfolio and \$2.9 million of which was in the acquired Hillcrest Bank portfolio, and impairments of \$7.4 million in the commercial real estate portfolio, which included impairments of \$6.7 million in the acquired Hillcrest Bank portfolio, a \$0.4 million impairment in the acquired Bank of Choice portfolio, and \$0.3

32

million impairment in the acquired Community Banks of Colorado portfolio. The commercial construction pool experienced an impairment of \$2.6 million resulting from a \$2.1 million impairment in the acquired Bank of Choice portfolio and a \$0.5 million impairment in the acquired Community Banks of Colorado portfolio. Other notable impairments included a \$0.2 million impairment in the agriculture pools and a \$0.2 million impairment in the residential real estate pools. The commercial and industrial pool experienced a reversal of impairment of \$1.1 million which was primarily the result of gross cash flow improvements.

In evaluating the loan portfolio for an appropriate ALL level, non-impaired loans were grouped into segments based on broad characteristics such as primary use and underlying collateral. Within the segments, the portfolio was further disaggregated into classes of loans with similar attributes and risk characteristics for purposes of applying loss ratios and determining applicable subjective adjustments to the ALL. The application of subjective adjustments was based upon qualitative risk factors, including economic trends and conditions, industry conditions, asset quality, loss trends, lending management, portfolio growth and loan review/internal audit results. During the nine months ended September 30, 2012, the Company recorded \$7.9 million of provision for loan losses for loans not accounted for under ASC Topic 310-30 primarily to provide for changes in credit risk inherent in the portfolio and in new loan originations.

The Company charged off \$6.9 million, net of recoveries, of non-ASC Topic 310-30 loans during the nine months ended September 30, 2012, \$2.4 million of which was the result of a large commercial and industrial loan that is not considered indicative of future charge-offs in the commercial and industrial loan category. The Company also charged off \$2.4 million of commercial real estate loans, primarily the result of three commercial real estate loans outside of our core market areas totaling \$2.1 million. Consumer charge-offs, net of recoveries, totaled \$0.9 million which is primarily the result of overdrafts on consumer accounts.

Note 6 FDIC Indemnification Asset

Under the terms of the purchase and assumption agreement with the FDIC with regard to the Hillcrest Bank and Community Banks of Colorado acquisitions, the Company is reimbursed for a portion of the losses incurred on covered assets. As covered assets are resolved, whether it be through repayment, short sale of the underlying collateral, the foreclosure on and sale of collateral, or the sale or charge-off of loans or OREO, any differences between the carrying value of the covered assets versus the payments received during the resolution process, that are reimbursable by the FDIC, are recognized in the consolidated statements of operations as FDIC loss sharing income. Any gains or losses realized from the resolution of covered assets reduce or increase, respectively, the amount recoverable from the FDIC.

Below is a summary of the activity related to the FDIC indemnification asset during the nine months ended September 30, 2012 and 2011 (in thousands):

	For the nine r	For the nine months ended			
	September 30,	Sep	tember 30,		
	2012		2011		
Balance at beginning of period	\$ 223,402	\$	161,395		
Accretion	(9,165)		(2,237)		
Reduction for claims filed	(101,042)		(85,777)		
Balance at end of period	\$ 113,195	\$	73,381		

During the nine months ended September 30, 2012, the Company recognized \$9.2 million of negative accretion on the FDIC indemnification asset, and reduced the carrying value of the FDIC indemnification asset by \$101.0 million as a result of claims filed with the FDIC as discussed below. The negative accretion resulted from an overall increase in actual and expected cash flows on the underlying covered assets, resulting in lower expected reimbursements from the FDIC. The increase in overall expected cash flows from these underlying assets is

reflected in increased accretion rates on covered loans and is being recognized over the expected remaining lives of the underlying covered loans as an adjustment to yield. During the nine months ended September 30, 2012, the Company submitted \$109.1 million of loss share claims to the FDIC for the reimbursable portion of losses related to the Hillcrest Bank and Community Banks of Colorado covered assets incurred during the fourth quarter of 2011 through the second quarter of 2012. Included in the \$109.1 million were \$8.1 million of claims related to additional losses incurred during the period that were not previously considered in the carrying amount of the indemnification asset. The loss claims filed are subject to review and approval, including extensive audits, by the FDIC or its assigned agents for compliance with the terms in the loss sharing agreements. During the nine months ended September 30, 2012, the FDIC paid \$75.9 million, \$33.1 million of which was related to losses incurred during the fourth quarter of 2011 and \$42.8 million of which was related to losses incurred during the six months ended June 30, 2012 and submitted to the FDIC during the three months ended September 30, 2012. The remaining claimed amounts are anticipated to be received during the fourth quarter of 2012 and are included in other assets.

Note 7 Premises and Equipment

Premises and equipment consisted of the following at September 30, 2012 and December 31, 2011 (in thousands):

	September 30, 2012		Dec	ember 31, 2011
Land	\$	29,699	\$	25,186
Buildings and improvements		70,560		48,933
Equipment		25,689		15,960
Total		125,948		90,079
Less: accumulated depreciation and amortization		(7,563)		(2,764)
Premises and equipment, net	\$	118,385	\$	87,315

Premises and equipment increased \$31.1 million from December 31, 2011 to September 30, 2012, primarily because the Company purchased 26 banking center premises from the FDIC in connection with the Community Banks of Colorado acquisition. The Company incurred \$1.9 million and \$0.9 million of depreciation expense during the three months ended September 30, 2012 and 2011 and \$4.9 million and \$1.6 million of depreciation expense during the nine months ended September 30, 2012 and 2011, respectively, which is included in occupancy and equipment expense.

Note 8 Other Real Estate Owned

A summary of the activity in the OREO balances during the nine months ended September 30, 2012 and 2011 is as follows (in thousands):

	For the nine n Septem	
	2012	2011
Balance at December 31	\$ 120,636	\$ 54,078
Purchases through acquisition, at fair value		34,335
Transfers from loan portfolio, at fair value	67,741	39,736
Impairments	(8,638)	(2,848)
Sales, net of gains and losses	(50,394)	(30,397)
Balance at September 30	\$ 129,345	\$ 94,904

The OREO balance of \$129.3 million at September 30, 2012 includes the interests of several outside participating banks totaling \$17.1 million, for which an offsetting liability is recorded in other liabilities and excludes \$12.2 million of the Company s minority interests in OREO which are held by outside banks where the Company was not the lead bank and does not have a controlling interest, for which the Company maintains a receivable in other assets. Of the \$129.3 million of OREO at September 30, 2012, \$64.5 million, or 49.9%, was covered by loss sharing agreements with the FDIC. Any losses on these assets are substantially offset by a corresponding change in the FDIC indemnification asset. During the nine months ended September 30, 2012, the Company sold \$57.2 million of OREO and realized net gains on these sales of \$6.8 million, and during the nine months ended September 30, 2011, the Company sold \$31.4 million of OREO and realized net gains of \$1.0 million.

Note 9 Deposits

As of September 30, 2012 and December 31, 2011, deposits totaled \$4.3 billion and \$5.1 billion, respectively. Time deposits decreased from \$2.8 billion at December 31, 2011 to \$1.9 billion at September 30, 2012. The following table summarizes the Company s time deposits, based upon contractual maturity, at September 30, 2012 and December 31, 2011, by remaining maturity (in thousands):

	September 3	00, 2012 Weighted Average	December 3	31, 2011 Weighted Average
	Balance	Rate	Balance	Rate
Three months or less	\$ 522,725	0.89%	\$ 746,835	1.30%
Over 3 months through 6 months	355,530	0.79%	554,740	1.15%
Over 6 months through 12 months	477,321	0.75%	1,014,949	1.23%
Over 12 months through 24 months	399,187	0.96%	309,848	1.58%
Over 24 months through 36 months	105,769	1.69%	52,879	2.01%
Over 36 months through 48 months	50,630	2.10%	54,678	2.65%
Over 48 months through 60 months	27,120	1.58%	43,550	1.89%
Thereafter	6,936	2.28%	7,117	2.77%
Total time deposits	\$ 1,945,218	0.94%	\$ 2,784,596	1.33%

In connection with the Company s FDIC-assisted transactions, the FDIC provided Hillcrest Bank, Bank of Choice, and Community Banks of Colorado depositors with the right to redeem their time deposits at any time during the life of the time deposit, without penalty, unless the depositor accepts new terms. At September 30, 2012 and December 31, 2011, the Company had approximately \$232.0 million and \$1.1 billion, respectively, of time deposits that were subject to penalty-free withdrawals.

35

The Company incurred interest expense on deposits as follows during the periods indicated (in thousands):

		onths ended nber 30,		nths ended aber 30,
	2012	2011	2012	2011
Interest bearing demand deposits	\$ 271	\$ 387	\$ 1,007	\$ 609
Money market accounts	1,005	1,048	3,076	3,476
Savings accounts	65	66	226	277
Time deposits	5,178	8,263	19,713	26,295
-				
Total	\$ 6,519	\$ 9,764	\$ 24,022	\$ 30,657

Note 10 Regulatory Capital

NBH Bank, N.A. is subject to the regulatory capital adequacy requirements of the Federal Reserve Board, the FDIC, and the OCC, as applicable. Failure to meet the minimum capital requirements can initiate certain mandatory and possibly further discretionary actions by regulators that could have a material adverse effect on the Company s consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, banks must meet specific capital requirements that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Typically, mature banks are required to maintain a Tier I risk-based capital ratio of 4.00%, a total risk-based capital ratio of 8.00% and a Tier I leverage ratio of 4.00% in order to meet minimum, adequately capitalized regulatory requirements. To be considered well-capitalized (under prompt corrective action provisions), banks must maintain minimum capital ratios of 6.00% for Tier I risk-based capital, 10.00% for total risk-based capital and 5.00% for the Tier 1 leverage ratio. However, in connection with the approval of the de novo charter for NBH Bank, N.A., the Company has agreed with its regulators to maintain capital levels of at least 10% Tier 1 leverage ratio, 11% Tier 1 risk-based capital ratio and 12% total risk-based capital ratio through the fourth quarter of 2013.

At September 30, 2012 and December 31, 2011, as applicable, NBH Bank, N.A. and the consolidated holding company exceeded all capital ratio requirements under prompt corrective action or other regulatory requirements, as is detailed in the table below (dollars in thousands):

			September	r 30, 2012			
	Ac	Actual		red to be ered well llized (1)	co ad	quired to be onsidered dequately apitalized	
	Ratio	Amount	Ratio	Amount	Ratio	Amount

NBH Bank, N.A. (2)	15.9%	865,172	10%	542,508	4%	217,003	
Tier 1 risk-based capital ratio (3)							
Consolidated	51.6%	\$ 980,654	6%	\$ 114,220	4%	\$ 76,147	
NBH Bank, N.A. (2)	46.0%	865,172	11%	206,697	4%	75,162	
Total risk-based capital ratio (3)							
Consolidated	52.4%	\$ 998,461	10%	\$ 190,367	8%	\$ 152,293	
NBH Bank, N.A. (2)	47.0%	882,979	12%	225,487	8%	150,325	

Table of Contents

56

			December 31, 2011				
	A	ctual	Required to be considered well capitalized ⁽¹⁾			uired to be nsidered equately pitalized	
	Ratio	Amount	Ratio	Amount	Ratio	Amount	
Tier 1 leverage ratio							
Consolidated	15.1%	\$ 949,154	N/A	N/A	4%	\$ 251,514	
NBH Bank, N.A. (2)	13.4%	828,321	10%	\$ 616,919	4%	246,768	
Tier 1 risk-based capital ratio (3)							
Consolidated	49.4%	\$ 949,154	6%	\$ 114,077	4%	\$ 76,051	
NBH Bank, N.A. (2)	44.2%	828,321	11%	206,258	4%	75,003	
Total risk-based capital ratio (3)							
Consolidated	50.5%	\$ 960,681	10%	\$ 190,129	8%	\$ 152,103	
NBH Bank, N.A. (2)	44.8%	839,848	12%	225,009	8%	150,006	

- (1) These ratio requirements are reflective of the agreements the Company has made with its various regulators in connection with the approval of the de novo charter for NBH Bank, N.A., as described above.
- (2) In November 2011, Hillcrest Bank, N.A. was merged into NBH Bank, N.A. The capital ratios shown are reflective of the merger.
- (3) Due to the conditional guarantee represented by the loss sharing agreements, the FDIC indemnification asset and covered assets are risk-weighted at 20% for purposes of risk-based capital computations.

Note 11 FDIC Loss Sharing Income

In connection with the loss sharing agreements that the Company has with the FDIC in regard to the Hillcrest Bank and Community Banks of Colorado transactions, the Company recognizes the changes in the FDIC indemnification asset and the clawback liability, in addition to the actual reimbursement of costs of resolution of covered assets from the FDIC, in FDIC loss sharing income in the consolidated statements of operations. The table below provides additional details of the Company s FDIC loss sharing income during the three and nine months ended September 30, 2012 and 2011 (in thousands):

	For the three i Septem		For the nine n Septem	
	2012	2011	2012	2011
FDIC indemnification asset accretion	\$ (2,832)	\$ (5,976)	\$ (9,165)	\$ (2,237)
Clawback liability amortization	(355)	(180)	(1,066)	(507)
Clawback liability remeasurement	(820)		247	(1,152)
Reimbursement to FDIC for gain on sale	(1,842)	(535)	(1,408)	(652)
Reimbursement to FDIC for recoveries	(2)	(1,181)	(3)	(1,204)
FDIC reimbursement of costs of resolution of covered assets	4,522	1,646	11,508	5,925
Total	\$ (1,329)	\$ (6,226)	\$ 113	\$ 173

Note 12 Stock-Based Compensation and Employee Benefits

The Company provides stock-based compensation in accordance with the NBH Holdings Corp. 2009 Equity Incentive Plan (the Plan). The Plan provides the compensation committee of the board of directors of the Company the authority to grant, from time to time, awards of options, stock appreciation rights, restricted stock, restricted stock units, stock awards, or stock bonuses to eligible persons. The aggregate number of shares of stock which may be granted under the Plan was 5,750,000 and the maximum number of restricted shares and restricted share units that may be granted was 1,725,000 at September 30, 2012.

To date, the Company has issued stock options and restricted stock under the Plan. The compensation committee sets the option exercise price at the time of grant but in no case is the exercise price less than the fair market value of a share of stock at the date of grant. The Company used information provided by third parties, including independent valuation specialists, as required by the Plan, to assist in the determination of estimates regarding fair values associated with the Company s stock-based compensation issued prior to the Company s initial public offering and listing on a national exchange, including contemporaneous valuations of grant date fair values. The Company is responsible for the assumptions used therein and the resulting values.

The Company issued stock options and restricted stock during the nine months ended September 30, 2012. The expense associated with the awarded stock options was measured at fair value using a Black-Scholes option-pricing model. The time vesting component of the restricted stock was valued at the same price as the common shares since they are assumed to be held beyond the vesting period. The market vesting component of the restricted stock was valued using a Monte Carlo Simulation with 100,000 simulation paths to assess the expected percentage of vested shares. A Geometric Brownian Motion was used for simulating the equity prices for a period of 10 years and if the restricted stock were not vested during the 10-year period it was assumed they were forfeited.

Below are the weighted average assumptions used in the Black-Scholes option pricing model and the Monte Carlo Simulation to determine fair value of the Company s stock options and the market-vesting portion of the Company s restricted stock granted during the nine months ended September 30, 2012:

	Black-Scholes	Monte Carlo
Risk-free interest rate	1.06%	1.10%
Expected volatility	38.00%	38.00%
Expected term (years)	6	10
Dividend yield	0.00%	0.00%

At the time of issuance, the Company s shares were not yet publicly traded and had limited private trading; therefore, expected volatility was estimated based on the median historical volatility, for a period commensurate with the expected term of the options, of 13 comparable companies with publicly traded shares. The risk-free rate for the expected term of the options was based on the U.S. Treasury yield curve at the date of grant and based on the expected term. The expected term was estimated to be the average of the contractual vesting term and time to expiration and the dividend yield was assumed to be zero.

The following table summarizes the material vesting terms of the stock options granted in 2012:

	Number of Options Granted in 2012
Options are time-vested with 1/3 vesting on each of the first, second and third anniversary of the date of grant, and further subject to the	
Company s shares becoming publicly listed	240,000
Total options granted in 2012	240,000

38

The following table summarizes option activity for the year ended December 31, 2011 and for the three months ended March 31, 2012, June 30, 2012 and September 30, 2012:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term in Years	Aggregate Intrinsic Value
Outstanding at December 31, 2010	2,357,332	\$ 20.00		\$
Granted during the three months ended March 31, 2011	203,500	20.00		
Granted during the three months ended June 30, 2011	63,500	20.00		
Granted during the three months ended September 30, 2011	26,500	20.00		
Granted during the three months ended December 31, 2011	993,000	20.00		
Forfeited	(402,500)	20.00		
Surrendered		20.00		
Exercised		20.00		
Outstanding at December 31, 2011	3,241,332	\$ 20.00	9.7	\$
Granted during the three months ended March 31, 2012	215,000	20.00		
Granted during the three months ended June 30, 2012	25,000	20.00		
Granted during the three months ended September 30, 2012		20.00		
Forfeited	(38,000)	20.00		
Outstanding at September 30, 2012	3,443,332	\$ 20.00	7.1	\$
Options fully vested and exercisable at September 30, 2012	1,070,416	\$ 20.00	7.2	
Options expected to vest	2,302,520	\$ 20.00	7.0	

Options granted during the nine months ended September 30, 2012 had weighted average grant date fair values of \$8.77.

Stock option expense is included in salaries and employee benefits in the accompanying consolidated statements of operations and totaled \$3.9 million and \$3.0 million, respectively, for the three months ended September 30, 2012 and 2011, respectively. The options to acquire 240,000 shares of common stock granted during the nine months ended September 30, 2012 and the options to acquire 993,000 shares of common stock granted during the fourth quarter of 2011 are subject to an additional vesting requirement of the Company s shares being publicly listed on a national exchange. In accordance with ASC Topic 718, the Company deferred recognition of the compensation expense on the grants that have vesting requirements tied to the Company s shares becoming listed on a national exchange subsequent to that vesting requirement being fulfilled, with an expense recognition catch-up for the portion of the expense that was deferred until that vesting criteria was met. As a result, no expense was recorded on these particular grants during the six months ended June 30, 2012 or during 2011. Upon listing on a national exchange in September 2012, the Company immediately recognized an expense catch-up for the portion of the expense that had been deferred until that vesting criterion was met. The deferred portion of expense related to stock option awards that have a public listing vesting requirement that was recognized during the three months ended September 30, 2012 was \$2.8 million. At September 30, 2012, there was \$3.7 million of total unrecognized compensation cost related to non-vested stock options granted under the Plan. The cost is expected to be recognized over a weighted average period of 0.8 years.

Restricted stock may also be issued under the Plan as described above. Compensation expense for the portion of the restricted stock that contains a market vesting condition is recognized over the derived service period based on the fair value of the awards on the grant date. Compensation expense for the portion of the restricted stock that contains performance and service vesting conditions is recognized over the requisite service period based on fair value of the awards on the grant date. The Company did not recognize any expense related to the restricted stock awards that have vesting requirements tied to the Company s shares becoming listed on a national exchange, but has recognized this expense subsequent to that vesting requirement being fulfilled, as described above.

39

The following table summarizes restricted stock activity for the nine months ended September 30, 2012:

	Restricted Stock	Weighted Average Grant Date Fair Value
Unvested at December 31, 2011	1,108,334	\$ 15.58
Vested	(33,542)	20.00
Granted	100,000	19.94
Forfeited	(5,000)	14.19
Surrendered		
Unvested at September 30, 2012	1,169,792	\$ 15.83

As of September 30, 2012, there was \$3.3 million of total unrecognized compensation cost related to non-vested restricted shares granted under the Plan. The cost is expected to be recognized over a weighted average period of 0.8 years. Expense related to restricted stock totaled \$2.7 million and \$2.9 million during the three months ended September 30, 2012 and 2011, respectively, and \$5.0 million and \$7.1 million during the nine months ended September 30, 2012 and 2011, respectively, and is included in salaries and employee benefits in the Company s unaudited consolidated statements of operations. The deferred portion of expense related to restricted stock awards that have a public listing vesting requirement that was recognized during the three months ended September 30, 2012 was \$2.1 million.

Note 13 Warrants

At September 30, 2012 and December 31, 2011, the Company had 830,750 outstanding warrants to purchase Company stock. The warrants were granted to certain lead stockholders of the Company, all with an exercise price of \$20.00 per share. The term of the warrants is for ten years from the date of grant and the expiration dates of the warrants range from October 20, 2019 to September 30, 2020. The fair value of the warrants was estimated to be \$5.8 million and \$6.9 million at September 30, 2012 and December 31, 2011, respectively. The fair value of the warrants was estimated using a Black-Scholes option pricing model utilizing the following assumptions at the indicated dates:

	September 30, 2012	December 31, 2011
Risk-free interest rate	1.13%	1.56%
Expected volatility	38.00%	34.93%
Expected term (years)	7-8	8-9
Dividend yield	1.03%	0.00%

The Company s shares became publicly traded on September 20, 2012 and prior to that, had limited private trading; therefore, expected volatility was estimated based on the median historical volatility, for a period commensurate with the expected term of the warrants, of 18 comparable companies with publicly traded shares. The risk-free rate for the expected term of the warrants was based on the U.S. Treasury yield curve at the date of grant and based on the expected term. The expected term was estimated based on the contractual term of the warrants. The dividend yield was assumed to be 1.027%.

The Company recorded a benefit of \$1.2 million and \$0.0 during the three months ended September 30, 2012 and 2011, respectively. During the nine months ended September 30, 2012 and 2011, the Company recorded a benefit of \$1.0 million and an expense of \$0.8 million, respectively, in the unaudited consolidated statements of operations resulting from the change in fair value on the revaluation of the warrant liability.

Note 14 Common Stock

The Company had 46,232,050 shares of Class A common stock and 5,959,189 shares of Class B common stock outstanding as of September 30, 2012 and 44,612,344 shares of Class A common stock and 7,545,353 shares of Class B common stock outstanding as of December 31, 2011. Additionally, as of September 30, 2012 and December 31, 2011, respectively, the Company had 1,169,792 and 1,108,334 shares of restricted Class A common stock issued but not yet vested under the NBH Holdings Corp. 2009 Equity Incentive Plan. Class A common stock possesses all of the voting power for all matters requiring action by holders of common stock, with certain limited exceptions. The Company s certificate of incorporation provides that, except with respect to voting rights and conversion rights, the Class A common stock and Class B non-voting common stock are treated equally and identically.

Note 15 Income (Loss) Per Share

The Company had 52,191,239 and 51,936,280 shares issued and outstanding (inclusive of Class A & B) as of September 30, 2012 and 2011, respectively, inclusive of 250,000 shares of founders—shares that were issued in 2009 at par value. Stock options, certain restricted shares and warrants are potentially dilutive securities, but are not included in the calculation of diluted earnings per share because to do so would have been anti-dilutive for the three and nine months ended September 30, 2012 and 2011. The Company also has Value Appreciation Rights (VAR s) issued to the FDIC in conjunction with the acquisition of Bank of Choice and Community Banks of Colorado that are potentially dilutive should the FDIC choose to settle this right in the Company s stock. The exercisability of the VAR s is contingent upon the Company having a triggering event 30 trading days following the public listing of its stock or a sale event, and as a result, the VAR s are not included in the calculations of diluted earnings per share.

The following table illustrates the computation of basic and diluted income per share for the three and nine months ended September 30, 2012 and 2011 (in thousands except earnings (loss) per share):

	For the three n Septemb	per 30,	For the nine months ended September 30,		
	2012	2011	2012	2011	
Basic earnings (loss) per share:					
Income (loss) available to common stockholders (numerator)	(\$ 7,891)	\$ 33,752	(\$ 3,546)	\$ 39,510

The Company had 3,443,332 and 2,620,832 outstanding stock options to purchase common stock at \$20.00 per share at September 30, 2012 and 2011, respectively, which were not included in the computations of diluted income per share because the options—exercise price was greater than the average market price of the common shares during those periods. Additionally, the Company had 830,750 outstanding warrants to purchase the Company—s common

stock as of September 30, 2012 and 2011. The warrants have an exercise price of \$20.00, which was out-of-the-money for purposes of dilution calculations. The Company had 1,174,792 and 1,299,168 restricted shares outstanding as of September 30, 2012 and 2011, respectively, which have performance, market and time-vesting criteria, and as such, any dilution is derived only for the timeframe in which the vesting criteria had been met and where the inclusion of those restricted shares is dilutive.

Note 16 Commitments and Contingencies

Financial instrument commitments and contingencies

In the normal course of business, the Company enters into various off-balance sheet commitments to help meet the financing needs of clients. These financial instruments include commitments to extend credit, commercial and consumer lines of credit and standby letters of credit. The same credit policies are applied to these commitments as the loans on the consolidated statements of financial condition; however, these commitments involve varying degrees of credit risk in excess of the amount recognized in the consolidated statements of financial condition. At September 30, 2012 and December 31, 2011, the Company had loan commitments totaling \$352.8 million and \$341.1 million, respectively, and standby letters of credit that totaled \$11.3 million and \$20.0 million, respectively. The total amounts of unused commitments do not necessarily represent future credit exposure or cash requirements, as commitments often expire without being drawn upon. However, the contractual amount of these commitments represents the Company s potential credit loss exposure. Amounts funded at Hillcrest Bank and Community Banks of Colorado under non-cancelable commitments in effect at the date of acquisition are covered under the respective loss sharing agreements if certain conditions are met.

Total unfunded commitments at September 30, 2012 and December 31, 2011 were as follows (in thousands):

	September 30, 2012 Non			December 31, 2011 Non			
	Covered	Covered	Total	Covered	Covered	Total	
Commitments to fund loans							
Residential	\$	\$ 75,679	\$ 75,679	\$ 1,517	\$ 30,194	\$ 31,711	
Commercial and commercial real estate	1,966	45,120	47,086	2,437	38,937	41,374

Consumer		1,503	1,503		39,690	39,690	
Credit card lines of credit		17,135	17,135		20,738	20,738	
Unfunded commitments under lines of credit	25,922	179,672	205,594	68,223	135,001	203,224	
Commercial and standby letters of credit	4,114	7,228	11,342	3,051	16,986	20,037	
·							
Total	\$ 32,428	\$ 331,707	\$ 364,135	\$ 78,793	\$ 282,322	\$ 361,115	

Commitments to fund loans Commitments to fund loans are legally binding agreements to lend to clients in accordance with predetermined contractual provisions providing there have been no violations of any conditions specified in the contract. These commitments are generally at variable interest rates and are for specific periods or contain termination clauses and may require the payment of a fee. The total amounts of unused commitments are not necessarily representative of future credit exposure or cash requirements, as commitments often expire without being drawn upon.

Credit card lines of credit The Company extends lines of credit to clients through the use of credit cards issued by the banks. These lines of credit represent the maximum amounts allowed to be funded, many of which will not exhaust the established limits, and as such, these amounts are not necessarily representations of future cash requirements or credit exposure.

Unfunded commitments under lines of credit In the ordinary course of business, the Company extends revolving credit to its clients through the use of bank-issued credit cards. These arrangements may require the payment of a fee.

Commercial and standby letters of credit As a provider of financial services, the Company routinely issues commercial and standby letters of credit, which may be financial standby letters of credit or performance standby letters of credit. These are various forms of back-up commitments to guarantee the performance of a client to a third party. While these arrangements represent a potential cash outlay for the Company, the majority of these letters of credit will expire without being drawn upon. Letters of credit are subject to the same underwriting and credit approval process as traditional loans, and as such, many of them have various forms of collateral securing the commitment, which may include real estate, personal property, receivables or marketable securities.

Contingencies

In the ordinary course of business, the Company and its banks may be subject to litigation. Based upon the available information and advice from the Company s legal counsel, management does not believe that any potential, threatened or pending litigation to which it is a party will have a material adverse effect on the Company s liquidity, financial condition or results of operations.

Note 17 Fair Value Measurements

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to disclose the fair value of its financial instruments. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. For disclosure purposes, the Company groups its financial and non-financial assets and liabilities into three different levels based on the nature of the instrument and the availability and reliability of the information that is used to determine fair value. The three levels are defined as follows:

Level 1 Includes assets or liabilities in which the inputs to the valuation methodologies are based on unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Includes assets or liabilities in which the inputs to the valuation methodologies are based on similar assets or liabilities in inactive markets, quoted prices for identical or similar assets or liabilities in inactive markets, and inputs other than quoted prices that are observable, such as interest rates, yield curves, volatilities, prepayment speeds, and other inputs obtained from observable market input.

Level 3 Includes assets or liabilities in which the inputs to the valuation methodology are based on at least one significant assumption that is not observable in the marketplace. These valuations may rely on management s judgment and may include internally-developed model-based valuation techniques.

Level 1 inputs are considered to be the most transparent and reliable and level 3 inputs are considered to be the least transparent and reliable. The Company assumes the use of the principal market to conduct a transaction of each particular asset or liability being measured and then considers the assumptions that market participants would use when pricing the asset or liability. Whenever possible, the Company first looks for quoted prices for identical assets or liabilities in active markets (level 1 inputs) to value each asset or liability. However, when inputs from identical assets or liabilities on active markets are not available, the Company utilizes market observable data for similar assets and liabilities. The Company maximizes the use of observable inputs and limits the use of unobservable inputs to occasions when observable inputs are not available. The need to use unobservable inputs generally results from the lack of market liquidity of the actual financial instrument or of the underlying collateral. Although, in some instances, third party price indications may be available, limited trading activity can challenge the observability of these quotations.

The following is a description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of each instrument under the valuation hierarchy:

Fair Value of Financial Instruments Measured on a Recurring Basis

Investment securities available-for-sale Investment securities available-for-sale are carried at fair value on a recurring basis. To the extent possible, observable quoted prices in an active market are used to determine fair value and, as such, these securities are classified as level 1. The Company classified its U.S. Treasury securities as level 1 in the fair value hierarchy as of September 30, 2012 and December 31, 2011. When quoted market prices in active markets for identical assets or liabilities are not available, quoted prices of securities with similar characteristics, discounted cash flows or other pricing characteristics are used to estimate fair values and the securities are then classified as level 2. At September 30, 2012 and December 31, 2011, the Company s level 2 securities included asset backed securities, mortgage-backed securities comprised of residential mortgage pass-through securities, other residential mortgage-backed securities, and at December 31, 2011 also included other mortgage-backed securities, all of which were issued or guaranteed by U.S. Government agencies or sponsored enterprises. All other investment securities are classified as level 3. There were no transfers between levels 1 or 2 during the nine months ended September 30, 2012 or 2011.

Value appreciation rights issued to the FDIC The Company measures the fair value of the VAR on a recurring basis and is based on the spread between the strike price of the VAR and the average multiple of price to tangible book value indicated by national and regional bank indices, multiplied by the maximum number of applicable units.

Warrant liability The Company measures the fair value of the warrant liability on a recurring basis using a Black-Scholes option pricing model. The Company s shares became publicly traded on September 20, 2012 and prior to that, had limited private trading; therefore, expected volatility was estimated based on the median historical volatility, for a period commensurate with the expected term of the warrants, of 18 comparable companies with publicly traded shares, and is deemed a significant unobservable input to the valuation model.

Clawback liability The Company measures the net present value of expected future cash payments to be made by the Company to the FDIC that must be made within 45 days of the conclusion of the loss sharing agreements on a recurring basis. The expected cash flows are calculated in accordance with the loss sharing agreements and are based primarily on the expected losses on the covered assets, which involve significant inputs that are not market observable.

44

The tables below present the financial instruments measured at fair value on a recurring basis as of September 30, 2012 (unaudited) and December 31, 2011 on the consolidated statements of financial condition utilizing the hierarchy structure described above (in thousands):

Fair Value of Instruments Measured on a Non-recurring Basis

The Company records collateral dependent loans that are considered to be impaired at their estimated fair value. A loan is considered impaired when it is probable that the Company will be unable to collect all contractual amounts due in accordance with the terms of the loan agreement. Collateral dependent impaired loans are measured based on the fair value of the collateral. The Company relies on third-party appraisals and internal assessments in determining the estimated fair values of these loans. The inputs used to determine the fair values of loans are considered level 3 inputs in the fair value hierarchy. During the nine months ended September 30, 2012, the Company measured 14 loans not accounted for under ASC Topic 310-30 at fair value on a non-recurring basis. These loans carried specific reserves totaling \$2.0 million. During the nine months ended September 30, 2012 the Company added specific reserves of \$1.1 million for 4 loans within the commercial segment with carrying balances of \$2.1 million and \$0.3 million for 3 loans within the residential real estate segment with carrying balances of \$0.7 million. In addition, specific reserves totaling \$91 thousand were eliminated in the commercial real estate segment primarily due to two loans charged off totaling \$0.6 million offset by a specific reserve totaling \$0.5 million added for one loan.

OREO is recorded at the lower of the loan balance or the fair value of the collateral less estimated selling costs. The estimated fair values of OREO are updated periodically and further write-downs may be taken to reflect a new basis. The Company recognized \$8.6 million of OREO impairments during the nine months ended September 30, 2012, of which \$7.5 million, or 86.3%, were on OREO that was covered by loss sharing agreements with the FDIC. The fair values of OREO are derived from third party price opinions or appraisals that generally use an income approach or a market value approach. If reasonable comparable appraisals are not available, then the Company may use internally developed models to determine fair values. The inputs used to determine the fair values of OREO are considered level 3 inputs in the fair value hierarchy

The table below provides information regarding the assets recorded at fair value on a non-recurring basis during the nine months ended September 30, 2012 (in thousands):

Nine months ended September 50, 2012	
	Losses

					From
					Fair
					Value
	Level 1	Level 2	Level 3	Total	Changes
Other real estate owned	\$	\$	\$ 129,345	\$ 129,345	\$ (8,638)
Impaired loans			\$ 37,556	\$ 37,556	\$ (14,169)

The Company did not record any liabilities for which the fair value was made on a non-recurring basis during the nine months ended September 30, 2012.

46

The following table provides information about the valuation techniques and unobservable inputs used in the valuation of financial instruments falling within level 3 of the fair value hierarchy as of September 30, 2012 (in thousands):

	Sept	ir Value at ember 30, 2012	Valuation Technique	Unobservable Input	Quantitative measures

Note 18 Fair Value of Financial Inc	ctrumo	ntc		-	

Note 18 Fair Value of Financial Instruments

The fair value of a financial instrument is the amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is determined based upon quoted market prices to the extent possible; however, in many instances, there are no quoted market prices for the Company s various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques that may be significantly impacted by the assumptions used, including the discount rate and estimates of future cash flows. Changes in any of these assumptions could significantly affect the fair value estimates. The fair value of the financial instruments listed below does not reflect a premium or discount that could result from offering all of the Company s holdings of financial instruments at one time, nor does it reflect the underlying value of the Company, as ASC Topic 825 excludes certain financial instruments and all non-financial instruments from its disclosure requirements.

In connection with the Hillcrest Bank, Bank Midwest, Bank of Choice and Community Banks of Colorado acquisitions, the Company recorded all of the acquired assets and assumed liabilities at fair value at the respective dates of acquisition. The fair value of financial instruments at September 30, 2012 and December 31, 2011, including methods and assumptions utilized for determining fair value of financial instruments, are set forth below (in thousands):

	Level in Fair Value	Septembe	r 30, 2012	December 31, 2011		
	Measurement Hierarchy	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value

Accrued interest payable	Level 2	4,699	4,699	11,017	11,017	
Cash and cash equivalents						

Cash and cash equivalents have a short-term nature and the estimated fair value is equal to the carrying value.

Investment securities

The estimated fair value of investment securities is based on quoted market prices or bid quotations received from securities dealers. Other investment securities, including securities that are held for regulatory purposes are carried at cost, less any other than temporary impairment.

Loans and covered loans

Edgar Filing: National Bank Holdings Corp - Form 10-Q

The estimated fair value of the loan portfolio is estimated using a discounted cash flow analysis using a discount rate based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The allowance for loan losses is considered a reasonable estimate of any required adjustment to fair value to reflect the impact of credit risk.

48

Accrued interest receivable

Accrued interest receivable has a short-term nature and the estimated fair value is equal to the carrying value.

Deposits

The estimated fair value of deposits with no stated maturity, such as non-interest bearing demand deposits, savings, NOW accounts, and money market accounts, is equal to the amount payable on demand. The fair value of interest-bearing time deposits is based on the discounted value of contractual cash flows of such deposits, taking into account the option for early withdrawal. The discount rate is estimated using the rates offered by the Company, at the respective measurement date, for deposits of similar remaining maturities.

Securities sold under agreements to repurchase

The vast majority of the Company s repurchase agreements are overnight transactions that mature the day after the transaction, and as a result of this short-term nature, the estimated fair value is equal to the carrying value.

Due to FDIC

The amount due to FDIC is specified in the purchase agreements and, as it relates to the clawback liability, is discounted to reflect the uncertainty in the timing and payment of the amount due by the Company. The amounts due to the FDIC in connection with the value appreciation rights is fully described in note 4 of the Company s December 31, 2011 audited consolidated financial statements.

Warrant liability

The warrant liability is estimated using a Black-Scholes model, the assumptions of which are detailed in note 17.

Accrued interest payable

Accrued interest payable has a short-term nature and the estimated fair value is equal to the carrying value.

49

Item 2: MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS

The following management discussion and analysis of our financial condition and results of operations should be read in conjunction with our unaudited consolidated financial statements and related notes for the three and nine months ended September 30, 2012 and 2011, with our audited consolidated financial statements and related notes as of and for the years ended December 31, 2011 and 2010, and for the period from June 16, 2009 (date of inception) through December 31, 2009, as well as the statements of assets acquired and liabilities assumed for each of our acquisitions and with the other financial and statistical data previously filed in our prospectus included in Form S-1 filed with the Securities and Exchange Commission on September 19, 2012 (file number 333-177971). This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions that may cause actual results to differ materially from management s expectations. Factors that could cause such differences are discussed in the sections entitled Cautionary Note Regarding Forward-Looking Statements and Risk Factors in the registration statement on Form S-1, referenced above, and should be read herewith.

Readers are cautioned that meaningful comparability of current period financial information to prior periods is limited. Prior to the completion of the Hillcrest Bank acquisition on October 22, 2010, we had no banking operations and our activities were limited to corporate organization matters and due diligence. Following our Hillcrest Bank acquisition, we completed three additional acquisitions: Bank Midwest on December 10, 2010, Bank of Choice on July 22, 2011 and Community Banks of Colorado on October 21, 2011. As a result, our operating results are limited to the periods since these acquisitions, and the comparability of periods is compromised due to the timing of these acquisitions. Additionally, the comparability of data related to our acquisitions prior to the respective dates of acquisition is limited because, in accordance with Accounting Standards Codification (ASC) Topic 805, Business Combinations, the assets acquired and liabilities assumed were recorded at fair value at their respective dates of acquisition and do not have a significant resemblance to the assets and liabilities of the predecessor banking franchises. The comparability of pre-acquisition data is compromised not only by the fair value accounting applied, but also by the FDIC loss sharing agreements in place that cover a portion of losses incurred on certain assets acquired in the Hillcrest Bank and the Community Banks of Colorado acquisitions. In the Bank Midwest acquisition, only specific, performing loans were chosen for acquisition. Additionally, we acquired the assets of Bank of Choice at a substantial discount from the FDIC. We received a considerable amount of cash during the settlement of these acquisitions, we paid off certain borrowings, and we contributed significant capital to each banking franchise we acquired. All of these actions materially changed the balance sheet composition, liquidity, and capital structure of the acquired banking franchises.

In May 2012, we changed the name of Bank Midwest, N.A. to NBH Bank, N.A. (NBH Bank or the Bank) and all references to NBH Bank, N.A. should be considered synonymous with references to Bank Midwest, N.A. prior to the name change.

50

Overview

National Bank Holdings Corporation is a bank holding company that was incorporated in the State of Delaware in June 2009. In October 2009, we raised net proceeds of approximately \$974 million through a private offering of our common stock. We completed the initial public offering of our Class A common stock in September 2012. We are executing a strategy to create long-term stockholder value through the acquisition and operation of community banking franchises and other complementary businesses in our targeted markets. We believe these markets exhibit attractive demographic attributes, are home to a substantial number of financial institutions, including troubled financial institutions, and present favorable competitive dynamics, thereby offering long-term opportunities for growth. Our emphasis is on creating meaningful market share with strong revenues complemented by operational efficiencies that we believe will produce attractive risk-adjusted returns.

We believe we have a disciplined approach to acquisitions, both in terms of the selection of targets and the structuring of transactions, which has been exhibited by our four acquisitions to date. As of September 30, 2012, we had approximately \$5.5 billion in assets, \$4.3 billion in deposits and \$1.1 billion in equity. We currently operate a network of 101 full-service banking centers, with the majority of those banking centers located in the greater Kansas City region and Colorado. We believe that our established presence positions us well for growth opportunities in our current and complementary markets.

Our strategic plan is to become a leading regional bank holding company through selective acquisitions of financial institutions, including troubled financial institutions that have stable core franchises and significant local market share, as well as other complementary businesses, while structuring the transactions to limit risk. We plan to achieve this through the acquisition of banking franchises from the FDIC and through conservatively structured unassisted transactions. We seek acquisitions that offer opportunities for clear financial benefits through add-on transactions, long-term organic growth opportunities and expense reductions. Additionally, our acquisition strategy is to identify markets that are relatively unconsolidated, establish a meaningful presence within those markets, and take advantage of operational efficiencies and enhanced market position. Our focus is on building strong banking relationships with small- and mid-sized businesses and consumers, while maintaining a low risk profile designed to generate reliable income streams and attractive risk-adjusted returns. Through our acquisitions, we have established a solid core banking franchise with operations in the greater Kansas City region and in Colorado, with a sizable presence for deposit gathering and client relationship building necessary for growth.

Operating Highlights and Key Challenges

Prior to completion of the Hillcrest Bank acquisition on October 22, 2010, we had no banking operations and our activities were limited to corporate organization matters and acquisition due diligence. Our first full year with banking operations was 2011 and includes the results of operations of Hillcrest Bank and NBH Bank for the entire year, Bank of Choice from July 22, 2011 and Community Banks of Colorado from October 21, 2011. The nine months ended September 30, 2012 marked our first three full quarters with the operations of all four of our acquisitions. These operations resulted in the following highlights as of and for the nine months ended September 30, 2012:

Attractive risk profile.

As of September 30, 2012, 80.8%, or \$1.6 billion, of our total loans (by dollar amount) were acquired loans and all of those loans were recorded at their estimated fair value at the time of acquisition.

51

As of September 30, 2012, 36.7%, or \$711.0 million, of our total loans (by dollar amount) were covered by loss sharing agreements with the FDIC.

As of September 30, 2012, 49.9%, or \$64.5 million, of our total other real estate owned (by dollar amount) was covered by loss sharing agreements with the FDIC. *Strong capital position.*

As of September 30, 2012, our tier 1 leverage ratio was 17.7% and our tier 1 risk-based capital ratio was 51.6%.

As of September 30, 2012, we had approximately \$375 million of capital available to deploy while maintaining a 10% tier 1 leverage ratio, and we had approximately \$475 million of available capital to deploy at an 8% tier 1 leverage ratio.

Tangible book value per share increased from \$17.60 at December 31, 2010 to \$19.10 at December 31, 2011 and to \$19.30 at September 30, 2012.

The after-tax accretable yield on ASC 310-30 loans plus the after-tax yield on the FDIC Indemnification asset, net, in excess of 4.5%, an approximate yield on new loan originations, and discounted at 5%, adds \$0.56 per share to our tangible book value per share as of September 30, 2012.

Foundation for loan growth.

As of September 30, 2012, we have over \$1.0 billion of loans outstanding that are associated with a strategic client relationship.

Loans associated with our strategic client relationships had strong credit quality with less than 0.2% 90 days or more past due as of September 30, 2012.

For the nine months ended September 30, 2012, organic loan originations totaled \$295 million, representing an increase of over three times from \$85 million in the first nine months of 2011.

100% of the decrease in loans during the nine months ended September 30, 2012 was from the non-strategic portfolio. *Client deposit funded balance sheet.*

As of September 30, 2012, total deposits made up 96.7% of our total liabilities.

Transaction deposit accounts increased from 45.0% of total deposits at December 31, 2011 to 54.6% as of September 30, 2012.

As of September 30, 2012, we did not have any brokered deposits.

52

Attractive risk-adjusted returns and revenue streams.

For the nine months ended September 30, 2012, our adjusted pre-tax pre-provision net revenue was 3.08% of total risk weighted assets (for reconciliation, see About Non-GAAP Financial Measures).

Our average annual yield on our loan portfolio was 8.37% during the nine months ended September 30, 2012.

Cost of deposits declined 25 basis points during the nine months ended September 30, 2012 and has decreased 35 basis points from the third quarter of 2011 to the third quarter of 2012 due to the continued emphasis on our consumer banking strategy and lower cost transaction accounts.

Non-interest expense to average assets was 3.58% for the nine months ended September 30, 2012. *Integrated operating platform.*

We have successfully integrated all of our acquired banks onto a common operating platform across our franchise. During 2011 and early 2012, we completed the deployment of much of the cash received in our acquisitions into our investment securities portfolio. We also actively worked to resolve the troubled loans and OREO that we acquired through our acquisition of three failed banks. Accordingly, our continued steady resolution of troubled assets, coupled with loan payoffs, may offset loan originations in the near-term. As a result, we expect that our investment securities portfolio will continue to be one of the largest components of our balance sheet.

We have worked to actively grow our banking franchise and implement consistent lending policies and a technology infrastructure designed to support our acquisition strategy, provide for future growth and achieve operational efficiencies. This included the implementation of a scalable data processing and operating platform and hiring key personnel to execute our relationship banking strategy. In May and July 2012, we completed the integration of Community Banks of Colorado and Bank of Choice, respectively, onto our operating platform and we now have all of our operations on a common operating platform. We expect that the integration of these operations will provide additional efficiencies and enable us to support growth.

Key Challenges

There are a number of significant challenges confronting us and our industry. Economic conditions remain guarded and increasing bank regulation is adding costs and uncertainty to all U.S. banks. We face a variety of challenges in implementing our business strategy, including being a new entity, hiring talented people, the challenges of acquiring distressed franchises and rebuilding them, deploying our remaining capital on quality targets, low interest rates and low demand from high quality borrowers.

53

Broad economic conditions, including those in our core markets, remain strained and both commercial and residential real estate values remain under pressure, which may lead to continued deterioration in credit quality and further elevated levels of non-performing assets, ultimately having a negative impact on the quality of our loan portfolio. Excluding the new loan balances contributed by our two 2011 acquisitions, loan balances declined during the first nine months of 2012 and during 2011 due to the repayment and resolution of existing loans that have been outpacing organic loan growth resulting from curtailed real estate activities and constrained economic activity. Additionally, the historically low interest rate environment limits the yields we are able to obtain on interest earning assets, including both new assets acquired as we grow and assets that replace existing, higher yielding assets as they are paid down or mature. For example, our acquired loans generally have produced higher yields than our originated loans due to the recognition of accretion of fair value adjustments and accretable yield. As a result, we expect the yields on our loans to decline as our acquired loan portfolio pays down or matures and we expect downward pressure on our interest income to the extent that the runoff on our acquired loan portfolio is not replaced with comparable high-yielding loans.

Increased regulation, such as the passage of the Dodd-Frank Act or potential higher required capital ratios, could reduce our competitiveness as compared to other banks or lead to industry-wide decreases in profitability. While certain external factors are out of our control and may provide obstacles during the implementation of our business strategy, we believe we are prepared to deal with these challenges. We intend to remain flexible, yet methodical, in our strategic decision making so that we can quickly respond to market changes and the inherent challenges and opportunities that accompany such changes.

Performance Overview

As a financial institution, we routinely evaluate and review our consolidated statements of financial condition and results of operations. We evaluate the levels, trends and mix of the statements of financial condition and statements of operations line items and compare those levels to our budgeted expectations, our peers, industry averages and trends. Due to our short operating history, comparisons to our prior historical performance are limited, but are used to the extent practical.

Within our statements of financial condition, we specifically evaluate and manage the following:

Loan balances We monitor our loan portfolio to evaluate loan originations, payoffs, and profitability. We forecast loan originations and payoffs within the overall loan portfolio, and we work to resolve problem loans in an expeditious manner. We track the runoff of our covered assets as well as the loan relationships that we have identified as non-strategic and put particular emphasis on the buildup of strategic relationships.

Asset quality We monitor the asset quality of our loans and OREO through a variety of metrics, and we work to resolve problem assets in an efficient manner. Specifically, we monitor the resolution of problem loans through payoffs, pay downs and foreclosure activity. We marked all of our acquired assets to fair value at the date of their respective acquisitions, taking into account our estimation of credit quality. Additionally, the majority of the loans and all of the OREO acquired in the Hillcrest Bank acquisition are covered by loss sharing agreements with the FDIC, and, as of the date of acquisition, approximately 61.8% of loans and 83.5% of OREO acquired in the Community Banks of Colorado acquisition were covered by a loss sharing agreement. As of September 30, 2012, 36.7% of our total loans and 49.9% of our OREO was covered by loss sharing agreements with the FDIC.

54

Many of the loans that we acquired in the Hillcrest Bank, Bank of Choice and Community Banks of Colorado acquisitions had deteriorated credit quality at the respective dates of acquisition. These loans are accounted for under ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*. As of September 30, 2012 and December 31, 2011, 50.1% and 57.5% of our loans were accounted for under this guidance. Loans accounted for under ASC Topic 310-30 may be considered performing upon and subsequent to acquisition, regardless of whether the client is contractually delinquent, if the timing and expected cash flows on such loans can be reasonably estimated and if collection of the new carrying value of such loans is expected.

Our evaluation of traditional credit quality metrics and the allowance for loan losses (ALL) levels takes into account that any credit quality deterioration that existed at the date of acquisition was considered in the original valuation of those assets on our balance sheet, and may not be comparable to industry averages or to other financial institutions. Additionally, many of these assets are covered by the loss sharing agreements. All of these factors limit the comparability of our credit quality and ALL levels to peers or other financial institutions.

Deposit balances We monitor our deposit levels by type, market and rate. Our loans are funded primarily through our deposit base, and we seek to optimize our deposit mix in order to provide reliable, low-cost funding sources.

Liquidity We monitor liquidity based on policy limits and through projections of sources and uses of cash. In order to test the adequacy of our liquidity, we routinely perform various liquidity stress test scenarios that incorporate wholesale funding maturities, if any, certain deposit run-off rates and committed line of credit draws. We manage our liquidity primarily through our balance sheet mix, including our cash and our investment security portfolio, and the interest rates that we offer on our loan and deposit products, coupled with contingency funding plans as necessary.

Capital We monitor our capital levels, including evaluating the effects of potential acquisitions, to ensure continued compliance with regulatory requirements and with the OCC Operating Agreement and FDIC Order that we entered into with our regulators in connection with our Bank Midwest acquisition. We review our tier 1 leverage capital ratios, our tier 1 risk-based capital ratios and our total risk-based capital ratios on a quarterly basis.

Within our consolidated results of operations, we specifically evaluate the following:

Net interest income Net interest income represents the amount by which interest income on interest-earning assets exceeds interest expense incurred on interest-bearing liabilities. We generate interest income through interest and dividends on investment securities, interest-bearing bank deposits and loans. Our acquired loans have generally produced higher yields than our originated loans due to the recognition of accretion of fair value adjustments and accretable yield. As a result, we expect downward pressure on our interest income to the extent that the runoff of our acquired loan portfolio is not replaced with comparable high-yielding loans. We incur interest expense on our interest-bearing deposits and

55

repurchase agreements and would also incur interest expense on any future borrowings, including any debt assumed in acquisitions. We strive to maximize our interest income by acquiring and originating high-yielding loans and investing excess cash in investment securities. Furthermore, we seek to minimize our interest expense through low-cost funding sources, thereby maximizing our net interest income.

Provision for loan losses The provision for loan losses includes the amount of expense that is required to maintain the ALL at an adequate level to absorb probable losses inherent in the loan portfolio at the balance sheet date. Additionally, we incur a provision for loan losses on loans accounted for under ASC Topic 310-30 as a result of a decrease in the net present value of the expected future cash flows during the periodic re-measurement of the cash flows associated with these pools of loans. The determination of the amount of the provision for loan losses and the related ALL is complex and involves a high degree of judgment and subjectivity to maintain a level of ALL that is considered by management to be appropriate under GAAP.

Non-interest income Non-interest income consists primarily of service charges, bank card fees, gains on sales of investment securities, and other non-interest income. Also included in non-interest income is FDIC loss sharing income (expense), which consists of accretion of our FDIC indemnification asset and reimbursement of costs related to the resolution of covered assets, and amortization of our clawback liability. For additional information on our clawback liability, see Application of Critical Accounting Policies Acquisition Accounting Application and the Valuation of Assets Acquired and Liabilities Assumed and Note 2 in our audited consolidated financial statements. Due to fluctuations in the accretion rates on the FDIC indemnification asset and the amortization of clawback liability and due to varying levels of expenses related to the resolution of covered assets, the FDIC loss sharing income (expense) is not consistent on a period-to-period basis and, absent additional acquisitions with FDIC loss sharing agreements, is expected to decline over time as covered assets are resolved.

Non-interest expense The primary components of our non-interest expense are salaries and employee benefits, occupancy and equipment, professional fees and data processing and telecommunications, and during the three months ended September 30, 2012, also included initial public offering expenses. Any expenses related to the resolution of covered assets are also included in non-interest expense. These expenses are dependent on individual resolution circumstances and, as a result, are not consistent from period to period. We seek to manage our non-interest expense in order to maximize efficiencies.

Net income We utilize traditional industry return ratios such as return on average assets, return on average equity and return on risk-weighted assets to measure and assess our returns in relation to our balance sheet profile.

56

In evaluating the financial statement line items described above, we evaluate and manage our performance based on key earnings indicators, balance sheet ratios, asset quality metrics and regulatory capital ratios, among others. The table below presents some of the primary performance indicators that we use to analyze our business on a regular basis for periods indicated:

Key Ratios (1)	For the three months ended September 30, 2012	For the three months ended June 30, 2012	For the three months ended September 30, 2011	For the nine months ended September 30, 2012	For the nine months ended September 30, 2011

Tangible common equity to tangible assets					
(2) (11)	18.54%	17.67%	19.21%	18.54%	19.21%
Tier 1 leverage	17.70%	17.02%	18.30%	17.70%	18.30%

Edgar Filing: National Bank Holdings Corp - Form 10-Q

Tier 1 risk-based capital	51.51%	49.32%	59.82%	51.51%	59.82%
Total risk-based capital	17.70%	50.21%	60.31%	52.45%	60.31%

- (1) Ratio is annualized.
- (2) Ratio represents non-GAAP financial measure.
- (3) Adjusted calculations exclude bargain purchase gains, initial public offering related expenses, stock based compensation expense (related to the initial public offering and those not related to the initial public offering), acquisition costs, and loss (gain) on sale of investment securities. Tax adjustments are calculated at a rate equal to the effective tax rate for each period, with the exception of the three and nine months ended September 30, 2012. These periods were calculated at a tax rate of 38.24%, which is adjusted for the effects of the non-deductibility of the expenses related to our initial public offering.
- (4) Interest earning assets include assets that earn interest/accretion or dividends, except for the FDIC indemnification asset that earns accretion but is not part of interest earning assets. Any market value adjustments on investment securities are excluded from interest-earning assets. Interest bearing liabilities include liabilities that much be paid interest.
- (5) Interest rate spread represents the difference between the weighted average yield on interest earning assets and the weighted average costs of interest bearing
- (6) Net interest margin represents net interest income, including accretion income, as a percentage of average interest-earning assets.
- (7) The efficiency ratio represents non-interest expense, less intangible asset amortization, as a percentage of net interest income plus non-interest income.
- (8) Non-performing loans consists of non-accruing loans, loans 90 days or more past due and still accruing interest and restructured loans, but exclude any loans accounted for under ASC 310-30 in which the pool is still performing. These ratios may therefore not be comparable to similar ratios of our peers.
- (9) Non-performing assets include non-performing loans, OREO and other repossessed assets.
- (10) Total loans are net of unearned discounts and fees.
- (11) Tangible common equity to tangible assets is a non-GAAP financial measure. For purposes of computing tangible common equity to tangible common assets, tangible common equity is calculated as common stockholders—equity less goodwill and other intangible assets, net, and tangible assets is calculated as total assets less goodwill and other intangible assets, net. We believe that the most directly comparable GAAP financial measure is total stockholders—equity to total assets. See the reconciliation under—About Non-GAAP Financial Measures.

About Non-GAAP Financial Measures

Certain of the financial measures and ratios we present, including tangible common equity, tangible book value, tangible book value per share, and pre-tax, pre-provision net revenue to risk weighted assets are supplemental measures that are not required by, or are not presented in accordance with, accounting principles generally accepted in the United States, or non-GAAP financial measures. We consider the use of select non-GAAP financial measures and ratios to be useful for financial and

operational decision making and useful in evaluating period-to-period comparisons. We believe that these non-GAAP financial measures provide meaningful supplemental information regarding our performance by excluding certain expenditures or assets that we believe are not indicative of our primary business operating results. We believe that management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning, forecasting, analyzing and comparing past, present and future periods.

We believe that these measures provide useful information to management and investors that is supplementary to our financial condition, results of operations and cash flows computed in accordance with GAAP; however we acknowledge that our non-GAAP financial measures have a number of limitations relative to GAAP financial measures. First, certain non-GAAP financial measures exclude provisions for loan losses and income taxes, and both of these expenses significantly impact our financial statements. Additionally, the items that we exclude in our adjustments are not necessarily consistent with the items that our peers may exclude from their results of operations and key financial measures and therefore may limit the comparability of similarly named financial measures and ratios. We compensate for these limitations by providing the equivalent GAAP measures whenever we present the non-GAAP financial measures and by including the following reconciliation of the impact of the components adjusted for in the non-GAAP financial measures so that both measures and the individual components may be considered when analyzing our performance.

Below is a reconciliation of our non-GAAP financial measures to the comparable GAAP financial measures:

Application of Critical Accounting Policies

We use accounting principles and methods that conform to GAAP and general banking practices. We are required to apply significant judgment and make material estimates in the preparation of our financial statements and with regard to various accounting, reporting and disclosure matters. Assumptions and estimates are required to apply these principles where actual measurement is not possible or practical. The most significant of these estimates relate to the fair value determination of assets acquired and liabilities assumed in business combinations and the application of acquisition accounting, the accounting for acquired loans and the related FDIC indemnification asset, the determination of the ALL, and the valuation of stock-based compensation. These critical accounting policies and estimates are summarized in our registration statement on Form S-1, and are further analyzed with other significant accounting policies in Note 2 to the Summary of Significant Accounting Policies in the notes to the audited consolidated financial statements for the year ended December 31, 2011.

Implications of and Elections Under the JOBS Act

National Bank Holdings Corporation qualifies as an emerging growth company under the Jumpstart Our Business Act (JOBS Act.) Pursuant to the JOBS Act, an emerging growth company can elect to opt out of the extended transition period for any new or revised accounting standards that may be issued by the Financial Accounting Standards Board or the SEC. We have elected to opt out of such extended transition period, which election is irrevocable.

Although we are still evaluating the JOBS Act, we may take advantage of some or all of the reduced regulatory and reporting requirements that will be available to us so long as we qualify as an emerging growth company, including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved.

Financial Condition

Total assets at September 30, 2012 were \$5.5 billion compared to \$6.4 billion at December 31, 2011, a decrease of \$0.9 billion. The decrease in total assets was largely driven by a decrease in non-strategic loan balances of \$337.1 million, which was a reflection of our workout progress on troubled loans (many of which were covered) that we acquired with our various acquisitions. We also originated \$295 million of loans during the nine months ended September 30, 2012, which offset normal client payments and sustained the loan balances in our strategic portfolio. We coupled the overall loan balance decrease with a \$781.3 million decrease in total deposits, as we rolled off high-priced time deposits that we assumed in our FDIC-assisted acquisitions and continued our focus on migrating toward a client-based deposit mix with higher concentrations of lower cost demand, savings and money market (transaction) deposits. We also utilized available cash and purchased \$1.0 billion of investment securities during the nine months ended September 30, 2012. Our FDIC indemnification asset decreased \$110.2 million during the nine months ended September 30, 2012 as a result of continued progress on our acquired problem loan resolutions and an increase in actual and expected cash flows on our covered assets. These increases in cash flows also contributed to a net reclassification of \$38.6 million of non-accretable difference to accretable yield during the period, which will be accreted to income over the remaining life of those loans.

61

Investment Securities

Available-for-sale

Total investment securities available-for-sale were \$1.7 billion at September 30, 2012, compared to \$1.9 billion at December 31, 2011, a decrease of \$0.2 billion, or 6.61%. During the first quarter of 2012, we re-evaluated the securities in our available-for-sale investment portfolio and identified securities that we now intend to hold until maturity. The securities that were transferred included residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises with a collective amortized cost of approximately \$715.2 million and net unrealized gains of approximately \$39 million on the date of transfer. These securities were classified as available-for-sale at December 31, 2011. During the nine months ended September 30, 2012, we also purchased \$1.0 billion of available-for-sale securities, which was partially offset by \$466.6 million of maturities and paydowns. The purchases included mortgage backed securities and asset backed securities. Our available-for-sale investment securities portfolio is summarized as follows for the periods indicated (in thousands):

		September 3	0, 2012		December 31, 2011

As of September 30, 2012, approximately 94.6% of the available-for-sale investment portfolio is backed by mortgages. The residential mortgage pass through securities portfolio is comprised of both fixed rate and adjustable rate Federal Home Loan Mortgage Corporation (FHLMC), Federal National Mortgage Association (FNMA) and Government National Mortgage Association (GNMA) securities. The other mortgage-backed securities are comprised of securities backed by FHLMC, FNMA and GNMA securities.

62

At September 30, 2012, adjustable rate securities comprised 12.3% of the available-for-sale MBS portfolio and the remainder of the portfolio was comprised of fixed rate securities with 10 to 30 year maturities, with a weighted average coupon of 3.0% per annum.

During the nine months ended September 30, 2012, we sold approximately \$20.8 million of available-for-sale investment securities, all of which occurred during the first quarter. The sale was comprised of one fixed-rate collateralized mortgage obligation backed by commercial property. We realized a gross gain of \$674 thousand on the sale of the security, which is included in gain on sale of securities, net in the accompanying consolidated statements of operations.

During the three and nine months ended September 30, 2011, we sold approximately \$122.2 million and \$238.2 million, respectively, of available-for-sale investment securities. We realized losses on the sale of these securities of \$0.8 million and \$0.6 million during the three and nine months ended September 30, 2011, respectively, which is included in gain (loss) on sale of securities in the accompanying consolidated statements of operations.

The available-for-sale investment portfolio included \$43.8 million and \$76.7 million of net unrealized gains, inclusive of \$243 thousand and \$1 thousand of unrealized losses, at September 30, 2012 and December 31, 2011, respectively. We do not believe that any of the securities with unrealized losses were other-than-temporarily-impaired. The table below summarizes the contractual maturities of our available-for-sale investment portfolio as of September 30, 2012 (in thousands):

The estimated weighted average life of the available-for-sale MBS portfolio as of September 30, 2012 and December 31, 2011 was 3.4 years and 3.4 years, respectively. This estimate is based on various assumptions, including repayment characteristics, and actual results may differ. The U.S. Treasury securities have contractual maturities of less than one year. As of September 30, 2012, the duration of the total available-for-sale investment portfolio was 3.1 years and the asset backed securities portfolio within the available-for-sale investment portfolio had a duration of 0.7 years.

Held-to-maturity

At September 30, 2012, we held \$643.7 million of held-to-maturity investment securities. As previously discussed, during the first quarter of 2012, we re-evaluated the securities in our available-for-sale investment portfolio and identified securities that we now intend to hold until maturity. We transferred residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises with a collective amortized cost of approximately \$715.2 million and unrealized gains of approximately \$39 million on the date of transfer. These securities were classified as available-for-sale at December 31, 2011. During the nine months ended September 30, 2012, we also purchased \$2.2 million of held-to-maturity securities.

At December 31, 2011 the Company held \$6.8 million of held-to-maturity investment securities, of which \$3.2 million were purchased by the Company under the classification of available-for-sale and transferred to the held-to-maturity classification and \$3.6 million were purchased under the classification of held-to-maturity. Held-to-maturity investment securities are summarized as follows as of the dates indicated (in thousands):

	September 30, 2012							
	A	Amortized Cost		Fair Value	Percent of Portfolio	Weighted Average Yield		
Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises	\$	643,661	\$	653,760	100.00%	3.60%		
Total investment securities held-to-maturity	\$	643,661	\$	653,760	100.00%	3.60%		

	December 31, 2011							
		nortized Cost		Fair Value	Percent of Portfolio	Weighted Average Yield		
Residential mortgage pass-through securities issued or guaranteed by U.S. Government agencies or sponsored enterprises	\$	6,801	\$	6,829	100.00%	2.44%		
Total investment securities held-to-maturity	\$	6,801	\$	6,829	100.00%	2.44%		

The residential mortgage pass through held-to-maturity investment portfolio is comprised only of fixed rate FNMA and GNMA securities.

At September 30, 2012, the fair value of the held-to-maturity investment portfolio was \$653.8 million with \$10.1 million of unrealized gains. The table below summarizes the contractual maturities of our held-to-maturity investment portfolio as of September 30, 2012 (in thousands):

	Amortized Cost	Weighted Average Yield
Due in one year or less	\$	
Due after one year through five year		
Due after five years through ten years		
Due after ten years	643,661	3.60%
Other Securities		
Total	\$ 643,661	3.60%

The estimated weighted average life of the held-to-maturity investment portfolio as of September 30, 2012 was 3.9 years. As of September 30, 2012, the duration of the total held-to-maturity investment portfolio was 3.7 years and the duration of the entire investment securities portfolio was 3.2 years.

Non-marketable securities

Non-marketable securities include Federal Reserve Bank stock and Federal Home Loan Bank (FHLB) stock. At September 30, 2012 and December 31, 2011, we held \$25.0 million of Federal Reserve Bank stock and at September 30, 2012 and December 31, 2011 we also held \$8.0 million and \$4.1 million of FHLB stock, respectively. We hold these securities in accordance with debt and regulatory requirements. These are restricted securities which lack a market and are therefore carried at cost.

Loans- Overview

Our loan portfolio at September 30, 2012 was comprised of loans that were acquired in connection with the acquisitions of Hillcrest Bank and Bank Midwest in the fourth quarter of 2010, our acquisition of Bank of Choice during the third quarter of 2011, and our acquisition of Community Banks of Colorado during the fourth quarter of 2011, in addition to new loans that we have originated. The majority of the loans acquired in the Hillcrest Bank and Community Banks of Colorado transaction are covered by loss sharing agreements with the FDIC, and we present covered loans separately from non-covered loans due to the FDIC loss sharing agreements associated with these loans.

As discussed in Note 2 to our audited consolidated financial statements, in accordance with applicable accounting guidance, all acquired loans are recorded at fair value at the date of acquisition, and an allowance for loan losses is not carried over with the loans but, rather, the fair value of the loans encompasses both credit quality and market considerations. Loans that exhibit signs of credit deterioration at the date of acquisition are accounted for in accordance with the provisions of ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (ASC 310-30). Management accounted for all loans acquired in the Hillcrest Bank, Bank of Choice, and Community Banks of Colorado acquisitions loans under ASC Topic 310-30, with the exception of loans with revolving privileges which were outside the scope of ASC Topic 310-30. In our Bank Midwest transaction, we did not acquire all of the loans of the former Bank Midwest but, rather, selected certain loans based upon specific criteria of performance, adequacy of collateral, and loan type that were performing at the time of acquisition. As a result, none of the loans acquired in the Bank Midwest transaction are accounted for under ASC Topic 310-30.

Consistent with differences in the risk elements and accounting, the loan portfolio is presented in two categories: (i) loans covered by FDIC loss sharing agreements, or covered loans, and (ii) loans that are not covered by FDIC loss sharing agreements, or non-covered loans. The portfolio is further stratified based on (i) ASC 310-30 loans and (ii) Non ASC 310-30 loans. Additionally, to evaluate the progress of working out the troubled loans acquired in our FDIC-assisted acquisitions coupled with the progress of organic loan growth, we stratify the loan portfolio into (i) non-strategic loans and (ii) strategic loans.

Covered loans comprised 36.7% of the total loan portfolio at September 30, 2012, compared to 41.9% at December 31, 2011. The table below shows the loan portfolio composition and the breakdown of the portfolio between covered ASC 310-30 loans, covered Non ASC 310-30 loans, non-covered ASC 310-30 loans and Non-covered Non ASC 310-30 loans at September 30, 2012 and December 31, 2011 (dollars in thousands):

Inherent in the nature of acquiring troubled banks, only certain of our acquired clients conform to our long-term business model of in-market, relationship-oriented banking. During the nine months ended September 30, 2012, we developed a management tool whereby we have designated loans as strategic that include loans inside our operating markets and meet our credit risk profile. Criteria utilized in the designation of a loan as strategic include (a) geography, (b) total relationship with borrower and (c) credit metrics commensurate with our current underwriting standards. At September 30, 2012, strategic loans totaled \$1.1 billion and had very good credit quality as represented by a 90 days or more past due ratio of 0.2%. We believe this secondary presentation of our loan portfolio provides a meaningful basis to understand the underlying drivers of changes in our loan portfolio balances.

66

Strategic loans comprised 56.1% of the total loan portfolio at September 30, 2012, compared to 47.7% at December 31, 2011. The table below shows the loan portfolio composition categorized between strategic and non-strategic at the respective dates (dollars in thousands):

	Strategic	September 30, 20 Non-Strategic	12 Total	Strategic	December 31, 2011 Non-Strategic	Total
Commercial	\$ 143,255	\$ 122,972	\$ 266,227	\$ 191,512	\$ 181,419	\$ 372,931
Commercial real estate	287,583	625,041	912,624	291,051	861,427	1,152,478
Agriculture	145,295	15,961	161,256	131,823	19,580	151,403

	4.006.504	.	* * * * * * * *	* * * * * * * * * * * * * * * * * * *		
Total	\$ 1,086,281	\$ 851,518	\$ 1,937,799	\$ 1,085,450	\$ 1,188,601	\$ 2,274,051

Strategic loans remained relatively flat at September 30, 2012 compared to December 31, 2011 as originations of \$295 million offset routine paydowns of existing loans. Strategic residential real estate loans increased \$47.3 million driven by strong originations primarily due to low interest rates and high refinance activity. The increase in strategic residential real estate loans was offset with a \$48.3 million decrease in commercial loans.

Commercial loans consist of loans made to finance business operations and secured by inventory or other business-related collateral such as accounts receivable or equipment. Commercial real estate loans include loans on 1-4 family construction properties, commercial properties such as office buildings, shopping centers, or free standing commercial properties, multi-family properties and raw land development loans. Agriculture loans include loans on farm equipment and farmland loans. Residential real estate loans include 1-4 family closed and open end loans, in both senior and junior collateral positions (both owner occupied and non-owner occupied). Consumer loans include both secured and unsecured loans to retail clients and overdrafts.

Our loan origination strategy involves lending primarily to clients within our markets; however, our acquired loans are to clients in various geographies. The table below shows the geographic breakout of our loan portfolio at September 30, 2012, based on the domicile of the borrower or, in the case of collateral-dependent loans, the geographic location of the collateral (in thousands):

	Loan balance	Percent of loan portfolio
Colorado	\$ 733,892	37.9%
Missouri	558,583	28.8%
Texas	195,209	10.1%
Kansas	119,129	6.1%
Florida	72,431	3.7%
California	67,693	3.5%
Other	190,862	9.9%
Total	\$ 1,937,799	100.0%

The decline in total loans from \$2.3 billion at December 31, 2011 to \$1.9 billion at September 30, 2012 was primarily driven by decreases in our non-strategic loan portfolios as the problem credits acquired in our FDIC-assisted transactions migrated to resolution, as well as the repayment of many loans that do not conform to our business model of in-market, relationship-oriented loans with credit metrics commensurate with our current underwriting standards. We have an enterprise-level, dedicated special

asset resolution team that is working to resolve problem loans in an expeditious manner and through the third quarter of 2012, our resolution of the troubled assets acquired with our acquisitions of three failed banks outpaced our originations. Acquired loans were marked to fair value at the time of acquisition and, as a result, we have been able to resolve these assets without significant losses.

New loan origination is a direct result of our ability to recruit and retain top banking talent. New loan originations continued to increase as our Midwest markets stabilized during the period. We expect that our Colorado markets will continue to contribute to loan growth as bankers are further deployed and our presence in those markets increases. The widespread economic uncertainty has limited organic loan growth and we anticipate this will continue to be a challenge in the near future. The following table represents new loan originations for the last seven quarters (in thousands):

			Co	mmercial							
	Co	mmercial	re	al estate	Ag	griculture	Re	esidential	Co	nsumer	Total

Covered loans

The Company has loss sharing agreements with the FDIC for the assets related to the Hillcrest Bank acquisition and the Community Banks of Colorado acquisition, whereby the FDIC will reimburse us for a portion of the losses incurred as a result of the resolution and disposition of the covered assets of these banks.

The Hillcrest Bank loss sharing agreements with the FDIC cover substantially all of the loans acquired in the Hillcrest Bank transaction, including single family residential mortgage loans, commercial real estate, commercial and industrial loans, unfunded commitments, and OREO. For purposes of the Hillcrest Bank loss sharing agreements, the anticipated losses on the covered assets are grouped into two categories, commercial assets and single family assets, and each category has its own specific loss sharing agreement. The term for loss sharing on single family residential real estate loans is ten years, and the Company will share in losses and recoveries with the FDIC for the entire term. The term for the loss sharing agreement on commercial loans is eight years. Under the commercial loss sharing agreement, the Company will share in losses and recoveries with the FDIC for the first five years. After the first five years, the FDIC will not share in losses but only in recoveries for the remaining term of the agreement. The loss sharing agreements cover losses on loans (and any acquired or resultant OREO) in the respective categories and have provisions through which we are required to be reimbursed for up to 90 days of accrued interest and direct expenses related to the resolution of these assets. Within the categories, there are three tranches of losses, each with a specified loss-coverage percentage. The categories, and the respective loss thresholds and coverage amounts are as follows (in thousands):

	Commercial			Single family	
		Loss-			Loss-
	Loss	Coverage		Loss	Coverage
Tranche	Threshold	Percentage	Tranche	Threshold	Percentage
1	Up to \$295,592	60%	1	Up to \$4,618	60%
2	\$295,593-405,293	0%	2	\$4,618-8,191	30%
3	>\$405,293	80%	3	>\$8,191	80%

68

With the purchase and assumption agreement of Community Banks of Colorado with the FDIC, we entered into a loss sharing agreement with the FDIC whereby the FDIC will reimburse us for a portion of the losses incurred as a result of the resolution and disposition of certain covered assets of Community Banks of Colorado. Covered assets include certain single family residential mortgage loans, commercial real estate loans, commercial and industrial loans, agriculture loans, consumer loans, unfunded commitments, and OREO. As of the date of acquisition, covered loans of Community Banks of Colorado totaled approximately 61.8% of the total outstanding loan principal balances of Community Banks of Colorado. For purposes of the Community Banks of Colorado loss sharing agreement, the anticipated losses on the covered assets are grouped into one category, commercial assets, and are subject to one loss share agreement lasting eight years. Under the agreement, the Company will share in losses and recoveries with the FDIC for the first five years and thereafter, the FDIC will not share in losses but only in recoveries for the remaining term of the agreement. The loss sharing agreement covers losses on covered loans (and any acquired or resultant OREO) and has provisions under which we will be reimbursed for up to 90 days of accrued interest and direct expenses related to the resolution of these assets. There are three tranches of losses, each with a specified loss-coverage percentage. The respective loss thresholds and coverage amounts are as follows (in thousands):

		Loss-
		Coverage
Tranche	Loss Threshold	Percentage
1	Up to \$204,194	80%
2	\$204,195-308,020	30%
3	>\$308,020	80%

Under the Hillcrest Bank and Community Banks of Colorado loss sharing agreements, the reimbursable losses from the FDIC are based on the book value of the related covered assets as determined by the FDIC at the date of acquisition, and the FDIC s book value does not necessarily correlate with our book value of the same assets. This difference is primarily because we recorded the loans at fair value at the date of acquisition in accordance with applicable accounting guidance.

As of September 30, 2012 and December 31, 2011, respectively, we had incurred \$195.1 million and \$159.5 million of losses on our Hillcrest Bank covered assets since the beginning of the loss sharing agreement as measured by the FDIC s book value, substantially all of which was related to the commercial assets. Additionally, as of September 30, 2012 and December 31, 2011, respectively, we had incurred approximately \$134.1 million and \$43.1 million of losses related to our Community Banks of Colorado loss sharing agreement. The fair value adjustments assigned to the related covered loans at the time of acquisition encompassed anticipated losses such as these, and as a result, our financial statement losses are mitigated and do not correspond to the losses reported for loss sharing purposes. Subsequent to

69

September 30, 2012, we submitted a request for \$6.1 million of loss sharing reimbursements from the FDIC for \$10.2 million of losses related to Hillcrest Bank and an additional request for \$20.0 million of reimbursement related to \$25.0 million in losses for Community Banks of Colorado, all incurred (as measured by the FDIC s book value) during the three months ended September 30, 2012.

The status of covered assets and any incurred losses require extensive recordkeeping and documentation and are submitted to the FDIC on a monthly and quarterly basis. The loss claims filed are subject to review and approval, including extensive audits, by the FDIC or its assigned agents for compliance with the terms in our loss sharing agreements.

Our loss sharing agreements cover losses for finite terms ten years for the assets covered by the single family loss sharing agreement and five years for all assets covered by the commercial loss sharing agreements. We have focused on resolving the covered loans in an expeditious manner in an effort to utilize the benefits offered by the loss sharing agreements, and often times, loans pay down prior to the scheduled maturity date.

The table below shows the contractual maturities of our covered loans for the dates indicated (in thousands):

	Due within 1 Year	but within 5 Years	Due after 5 Years	Total

Accretable Yield

The fair value adjustments assigned to loans that are accounted for under ASC Topic 310-30 are comprised of both accretable yield and a non-accretable difference that are based on expected cash flows from the loans. Accretable yield is the excess of a pool s cash flows expected to be collected over the recorded balance of the related pool of loans. The non-accretable difference represents the expected shortfall in future cash flows from the contractual amount due in respect of each pool of such loans. Similar to the entire fair value adjustment for loans outside the scope of ASC Topic 310-30, the accretable yield is accreted into income over the estimated remaining life of the loans in the applicable pool.

Below is the composition of the net book value for loans accounted for under ASC Topic 310-30 at September 30, 2012 and December 31, 2011 (in thousands):

	Septe	ember 30, 2012	December 31, 2011		
Contractual cash flows	\$	1,617,451	\$	2,030,374	
Nonaccretable difference		(497,547)		(536,171)	
Accretable yield		(148,868)		(186,494)	
Total loans accounted for under ASC Topic 310-30	\$	971,036	\$	1,307,709	

Loan pools accounted for under ASC Topic 310-30 are periodically remeasured to determine expected future cash flows. In determining the expected cash flows, prepayment assumptions on smaller homogeneous loans are based on statistical models that take into account factors such as the loan interest rate, credit profile of the borrowers, the years in which the loans were originated, and whether the loans were fixed or variable rate loans. Prepayments may be assumed on large loans if circumstances specific to that loan warrant a prepayment assumption. No prepayments are presumed for small homogeneous commercial loans; however, prepayment assumptions are made that consider similar prepayment factors listed above for smaller homogeneous loans. Decreases to the expected future cash flows in the applicable pool generally result in an immediate provision for loan losses charged to the consolidated statements of operations. Conversely, increases in the expected future cash flows in the applicable pool result in a transfer from the non-accretable difference to the accretable yield, and have a positive impact on accretion income prospectively. This re-measurement process resulted in the following changes to the accretable yield during the nine months ended September 30, 2012 (in thousands):

Balance at December 31, 2011	\$ 186,494
•	. ,
Reclassification from non-accretable difference	46,974
Reclassification to non-accretable difference	(8,348)
Accretion income	(76,252)
D. I	ф 1.40.0 <i>C</i> 0
Balance at September 30, 2012	\$ 148,868

During the nine months ended September 30, 2012, we re-measured the expected cash flows of all 30 of the loan pools accounted for under ASC Topic 310-30 utilizing the same cash flow methodology used at the time of acquisition. Increases in expected cash flows are reflected as an increase in the accretion rates as well as an increased amount of accretable yield that will be recognized over the expected remaining lives of the underlying loan pools. During the nine months ended September 30, 2012, we reclassified \$38.6 million, net, from non-accretable difference to accretable yield. The re-measurements also resulted in a \$17.4 million impairment during the nine months ended September 30, 2012, primarily driven by our commercial and industrial, commercial real estate and land pools. One commercial real estate pool contributed \$6.7 million, or 38.4% of the total impairment and one land pool contributed \$4.9 million, or 28.3%, of the total impairment for the nine months ended September 30, 2012. These impairments are reflected in provision for loan loss in the consolidated statement of operations.

In addition to the accretable yield on loans accounted for under ASC Topic 310-30, the fair value adjustments on loans outside the scope of 310-30 are also accreted to interest income over the life of the loans. At September 30, 2012, our total remaining accretable yield and fair value mark was as follows (in thousands):

Remaining accretable yield on loans accounted for under ASC Topic 310-30	\$ 148,868
Remaining accretable fair value mark on loans not accounted for under ASC Topic 310-30	23,144
Total remaining accretable yield and fair value mark at September 30, 2012	\$ 172,012

Asset Quality

All of the assets acquired in our acquisitions were marked to fair value at the date of acquisition, and the adjustments on loans included a credit quality component. We utilize traditional credit quality metrics to evaluate the overall credit quality of our loan portfolio; however our credit quality ratios are limited in their comparability to industry averages or to other financial institutions because:

- 1. Any asset quality deterioration that existed at the date of acquisition was considered in the original fair value adjustments; and
- 2. 43.1% of our non-performing assets (by dollar amount) at September 30, 2012 are covered by loss sharing agreements with the FDIC

Asset quality, particularly on our originated loans, is fundamental to our success. Accordingly, for the origination of loans, we have established a credit policy that allows for responsive, yet controlled lending with credit approval requirements that are scaled to loan size. Within the scope of the credit policy, each prospective loan is reviewed in order to determine the appropriateness and the adequacy of the loan characteristics and the security or collateral prior to making a loan. We have established underwriting standards and loan origination procedures that require appropriate documentation, including financial data and credit reports. For loans secured by real property, we require property appraisals, title insurance or a title opinion, hazard insurance and flood insurance, in each case where appropriate.

Additionally, we have implemented procedures to timely identify loans that may become problematic in order to ensure the most beneficial resolution to the Company. Asset quality is monitored by our credit risk management department and evaluated based on quantitative and subjective factors such as the timeliness of contractual payments received. Additional factors that are considered, particularly with commercial loans over \$250,000, include the financial condition and liquidity of individual borrowers and guarantors, if any, and the value of our collateral. To facilitate the oversight of asset quality, loans are categorized based on the number of days past due and on an internal risk rating system, and both are discussed in more detail below.

Our internal risk rating system uses a series of grades which reflect our assessment of the credit quality of covered and non-covered loans based on an analysis of the borrower s financial condition, liquidity and ability to meet contractual debt service requirements. Loans that are perceived to have acceptable risk are categorized as pass loans. Special mention loans represent loans that have potential credit weaknesses

that deserve close attention. Special mention loans include borrowers that have potential weaknesses or unwarranted risks that, unless corrected, may threaten the borrower s ability to meet debt service requirements. However, these borrowers are still believed to have the ability to respond to and resolve the financial issues that threaten their financial situation. Loans classified as substandard have a well-defined credit weakness and are inadequately protected by the current paying capacity of the obligor or of the collateral pledged, if any. Although these loans are identified as potential problem loans, they may never become non-performing. Substandard loans have a distinct possibility of loss if the deficiencies are not corrected. Doubtful loans are loans that management believes that collection of payments in accordance with the terms of the loan agreement are highly questionable and improbable. Doubtful loans that are not accounted for under ASC Topic 310-30 are deemed impaired and put on non-accrual status.

In the event of borrower default, we may seek recovery in compliance with state lending laws, the respective loan agreements, and credit monitoring and remediation procedures that may include modifying or restructuring a loan from its original terms, for economic or legal reasons, to provide a concession to the borrower from their original terms due to borrower financial difficulties in order to facilitate repayment. Additionally, if a borrower s repayment obligation has been discharged by a court, and that debt has not been reaffirmed by the borrower, regardless of past due status, the terms of the loan are considered to have been conceded. Such restructured loans are considered troubled debt restructurings in accordance with ASC Topic 310-40 *Troubled Debt Restructurings by Creditors*. Under this guidance, modifications to loans that fall within the scope of ASC Topic 310-30 are not considered troubled debt restructurings, regardless of otherwise meeting the definition of a troubled debt restructuring. Assets that have been foreclosed on or acquired through deed-in-lieu of foreclosure are classified as OREO until sold, and are carried at the lower of the related loan balance or the fair value of the collateral less estimated costs to sell, with any initial valuation adjustments charged to the ALL and any subsequent declines in carrying value charged to impairments on OREO.

Non-performing Assets

Non-performing assets consist of covered and non-covered non-accrual loans, accruing loans 90 days or more past due, troubled debt restructurings, OREO (49.9% of which was covered by FDIC loss sharing agreements at September 30, 2012) and other repossessed assets. However, loans accounted for under ASC Topic 310-30, as described below, are excluded from our non-performing assets. Our non-performing assets include \$7.5 million and \$14.8 million of covered loans not accounted for under ASC Topic 310-30 and \$64.5 million and \$77.1 million of covered OREO at September 30, 2012 and December 31, 2011, respectively. In addition to being covered by loss sharing agreements, these assets were marked to fair value at the time of acquisition, mitigating much of our loss potential on these non-performing assets. As a result, the levels of our non-performing assets are not fully comparable to those of our peers or to industry benchmarks.

As of September 30, 2012 and December 31, 2011, 64.4% and 63.3%, respectively, of loans accounted for under ASC Topic 310-30 were covered by the FDIC loss sharing agreements. Loans accounted for under ASC Topic 310-30 were recorded at fair value based on cash flow projections that considered any deteriorated credit quality and expected losses. These loans are accounted for on a pool basis and any non-payment of contractual principal or interest is considered in our periodic re-estimation of the expected future cash flows. To the extent that we decrease our cash flow projections, we record an

75

immediate impairment expense through the provision for loan losses. We recognize any increases to our cash flow projections on a prospective basis through an increase to the pool syield over its remaining life once any previously recorded impairment expense has been recouped. As a result of this accounting treatment, these pools may be considered to be performing, even though some or all of the individual loans within the pools may be contractually past due. Loans accounted for under ASC Topic 310-30 were classified as performing assets at September 30, 2012 and December 31, 2011, as the carrying value of the respective loan or pool of loans cash flows were considered estimatable and probable of collection. Therefore, interest income, through accretion of the difference between the carrying value of the loans in the pool and the pool s expected future cash flows, is being recognized on all acquired loans accounted for under ASC Topic 310-30.

The following table sets forth the non-performing assets as of the dates presented (in thousands):

	September 30, 2012)11 Track	
Non-accrual loans:	Non-Covered	Covered	Total	Non-Covered	Covered	Total

Allowance for loan losses to non-performing loans			46.52%			22.71%

⁽¹⁾ Includes restructured loans less than 90 days past due and still accruing.

Total non-performing assets decreased \$4.7 million at September 30, 2012 compared to December 31, 2011. The decrease was primarily a result of a \$15.8 million decrease in non-accrual loans, most notably through a \$17.1 decrease in commercial real estate loans on non-accrual status, offset, in part, by a \$8.7 million increase in OREO.

At September 30, 2012, the largest category of non-performing loans was commercial real estate loans with balances of \$12.9 million, consisting of \$11.6 million of non-covered loans and \$1.3 million of covered loans. The non-performing non-covered commercial real estate loans include 16 loans on non-accrual

status totaling \$11.6 million, primarily due to vacancies of commercial properties. We also had five covered commercial real estate loans on non-accrual status totaling \$1.3 million. Non-performing commercial loans consisted primarily of eleven covered loans totaling \$3.6 million and 11 non-covered loans totaling \$1.0 million. Additionally, our residential real estate category had 61 non-covered loans totaling \$3.8 million and one non-covered loan totaling \$0.4 million.

Our OREO of \$129.3 million at September 30, 2012 includes \$17.1 million of participant interests in OREO in connection with our repossession of collateral on loans for which we were the lead bank and we have a controlling interest. We have recorded a corresponding payable to those participant banks in other liabilities. Additionally, the \$129.3 million of OREO at September 30, 2012 excludes \$12.2 million of minority interest in participated OREO in connection with the repossession of collateral on loans for which we were not the lead bank and we do not have a controlling interest. These properties have been repossessed by the lead banks and we have recorded our receivable due from the lead banks in other assets as minority interest in participated OREO.

During the nine months ended September 30, 2012, \$67.7 million of OREO was foreclosed on or otherwise repossessed and \$50.4 million of OREO was sold, including \$3.0 million of non-covered gains and \$3.8 million of covered gains that are subject to reimbursement to the FDIC at the applicable loss share coverage percentage. OREO write-downs of \$8.6 million were recorded during the nine months ended September 30, 2012, of which \$7.5 million, or 86.3%, were covered by FDIC loss sharing agreements. OREO balances increased \$8.7 million during the nine months ended September 30, 2012 to \$129.3 million, 49.9% of which was covered by FDIC loss sharing agreements, compared to OREO balances of \$120.6 million at December 31, 2011, \$77.1 million, or 63.9%, of which was covered by the FDIC loss sharing agreement.

The following table presents the carrying value of our accruing and non-accrual loans compared to the unpaid principal balance (UPB) as of September 30, 2012 (in thousands):

		Accruing		Nonaccrual		Total			
	Unpaid principal balance	Carrying value	Carrying value/ UPB	Unpaid principal balance	Carrying value	Carrying value/ UPB	Unpaid principal balance	Carrying value	Carrying value/ UPB
Covered loans:

77

Past Due Loans

Past due status is monitored as an indicator of credit deterioration. Covered and non-covered loans are considered past due or delinquent when the contractual principal or interest due in accordance with the terms of the loan agreement remains unpaid after the due date of the scheduled payment. Loans that are 90 days or more past due and not accounted for under ASC Topic 310-30 are put on non-accrual status unless the loan is well secured and in the process of collection. Pooled loans accounted for under ASC Topic 310-30 that are 90 days or more past due and still accreting are included in loans 90 days or more past due and still accruing interest and are considered to be performing as is further described above under *Non-Performing Assets*. The table below shows the past due status of covered and non-covered loans, based on contractual terms of the loans as of September 30, 2012 and December 31, 2011 (in thousands):
