INDEPENDENT AUDITORS REPORT

The Board of Directors and Shareholders Taiwan Semiconductor Manufacturing Company Ltd.

We have audited the accompanying balance sheets of Taiwan Semiconductor Manufacturing Company Ltd. as of June 30, 2004 and 2003, and the related statements of income, changes in shareholders equity and cash flows for the periods then ended. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Regulations for Auditing of Financial Statement by Certified Public Accountants, and auditing standards generally accepted in the Republic of China. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Taiwan Semiconductor Manufacturing Company Ltd. as of June 30, 2004 and 2003, and the results of its operations and its cash flows for the periods then ended in conformity with the Guidelines for Securities Issuers Financial Reporting and accounting principles generally accepted in the Republic of China.

July 13, 2004

Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LTD.

NOTES TO FINANCIAL STATEMENTS (Amounts in Thousand New Taiwan Dollars, Unless Specified Otherwise)

1. GENERAL

Taiwan Semiconductor Manufacturing Company Ltd. (the Company or TSMC), a Republic of China corporation (R.O.C.), was incorporated as a venture among the Government of the R.O.C., acting through the Development Fund of the Executive Yuan; Philips Electronics N.V. and certain of its affiliates (Philips); and certain other private investors. In September 1994, its shares were listed on the Taiwan Stock Exchange (TSE). On October 8, 1997, TSMC listed its shares of stock on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs).

The Company is engaged mainly in the manufacturing, selling, packaging, testing and designing of integrated circuits and other semiconductor devices, and the manufacturing of masks.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements are presented in conformity with Guidelines Governing in Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the R.O.C. Significant accounting policies are summarized as follows:

Use of Estimates

The preparation of financial statements in conformity with the aforementioned guidelines and principles requires management to make reasonable assumptions and estimates of matters that are inherently uncertain. The actual results may differ from management s estimates.

Classification of Current and Non-current Assets and Liabilities

Current assets are those expected to be converted to cash, sold or consumed within one year from the balance sheet date. Current liabilities are obligations due on demand within one year from the balance sheet date. Assets and liabilities that are not classified as current are non-current assets and liabilities, respectively.

Cash Equivalents

Government bonds under repurchase agreements, notes, treasury bill and commercial papers acquired with maturities less than three months from the date of purchase are classified as cash equivalents.

Short-term Investments

Short-term investments consist of bond funds, corporate bonds, government bonds, agency bonds, asset-backed securities, government bonds acquired under repurchase agreements and listed stocks. Cost of short-term investments are recorded at historical cost. Cash dividends are recorded as investment income in the current period.

The investments are carried at the lower of cost or market value. An allowance for decline in value is provided and is charged to current period earnings when the aggregate carrying value of the investments exceeds the aggregate

market value. A reversal of the allowance is recorded for a subsequent recovery of the market value.

The cost of the asset-backed securities and the bonds sold is accounted for using the specific identification method, whereas the cost of bond funds and listed stocks sold is accounted for using the weighted-average method.

The market values of asset-backed securities and the bonds are determined using the average of bid and ask prices as of the balance sheet date. The market value of bond funds is determined using the net asset value of the funds at the end of the period, and the market value of listed stocks is determined using the average-closing price of the listed stocks for the last month of the period.

Allowance for Doubtful Receivables

Allowance for doubtful receivables are provided based on a review of the collectibility of accounts receivables. The Company determines the amount of allowance for doubtful accounts by examining the historical collection experience and current trends in the credit quality of it s customers as well as its internal credit policies.

Revenue Recognition and Allowance for Sales Returns and Others

The Company recognizes net sales when the earnings process is complete, as evidenced by an agreement with the customer, transfer of title and acceptance, if applicable, have occurred, as well as the price is fixed or determinable and the collectibility is reasonably assured. An allowance is provided for any sales return and pricing discounts. Allowance for sales returns and pricing discounts is estimated based on historical experience and any known factors that would affect the allowance. Such provisions are deducted from sales in the year the products are sold and the estimated related costs are deducted from cost of sales.

Sales are determined using the fair value taking into account related sales discounts agreed to by the Company and its customers. Sales agreements typically provide that payment is due 30 days from invoice date for majority of the customers and 30 to 45 days after the end of the month in which the sales occur for some customers. Since the receivables from sales are collectible within one year and such transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash received.

Inventories

Inventories are stated at the lower of cost or market value. Inventories are recorded at standard cost and adjusted to the approximate weighted-average cost at the end of each period. Market value represents net realizable value for finished goods and work in process. Replacement value represents net realizable value for raw materials, supplies and spare parts. The Company assesses the impact of changing technology on its inventory on-hand and writes off inventories that are considered obsolete. Ending inventories are evaluated for estimated excess quantities and obsolescence based on demand forecast within a specific time horizon, generally 180 days or less, and the estimated scrap and slow-moving items are recognized in the allowance for losses.

Long-term Investments

Investments in companies wherein the Company exercises significant influence on the operating and financial policy decisions are accounted for using the equity method of accounting. The Company s proportionate share in the net income or net loss of investee companies is recognized as components of the investment income/loss recognized by equity method net account. When equity investments are made, the difference, if any, between the cost of investment and the Company s proportionate share of investee s net book value is amortized using the straight-line method over five years and is recorded as a component of the investment income/loss recognized by equity method net account.

Table of Contents

When the Company subscribes to additional investee shares at a percentage different from its existing equity interest, the resulting carrying amount of the investment in the equity investee differs from the amount of Company s proportionate share in the investee s net equity. The Company records such difference as an adjustment to long-term investments with the corresponding amount charged to capital surplus. If investee s functional currency is a foreign currency, cumulative translation adjustments will result from the process of translating the investee s financial statements into the reporting currency of the Company.

Investments in companies wherein the Company does not exercise significant influence are recorded at historical cost. Cash dividends are recognized as income in the year received but are accounted for as reduction in the carrying values of the long-term investments if the dividends are received in the same year that the related investments are acquired. Stock dividends are recorded as an increase in the number of shares held and do not affect investment income or the carrying amount of the investment. An allowance is recognized for any decline in the market value of investments with readily ascertainable fair market value with the corresponding amount recorded as an unrealized loss, a component of shareholders equity. A reversal of the allowance will result from a subsequent recovery of the market value of such investments. The market value of such investment is determined using the average-closing price of the listed stocks for the last month of the period. The carrying values of investments whose fair market values are not readily ascertainable are reduced to reflect an other-than-temporary decline in their values, with the related impairment loss charged to income.

Investments in foreign mutual funds are stated at the lower of aggregate cost or net asset value. An allowance is recognized when the cost of the funds is lower than their net asset values, with the corresponding amount recorded as a reduction to shareholders equity. A reversal of the allowance will result from a subsequent recovery of the net asset value.

The costs of stocks and mutual funds sold are determined using the weighted-average method.

Investments in long-term bonds are stated at amortized cost. The discount or premium is amortized over the duration period using the interest method, and recorded as an adjustment to the interest income.

If an investee company recognizes an unrealized loss on its long-term investment using the lower-of-cost-or-market method, the Company also recognizes a corresponding unrealized loss in proportion to its equity interest in the investee company and records the amount as a component of its shareholders equity.

Gains or losses on sales from the Company to investee companies accounted for using the equity method are deferred in proportion to the Company s ownership percentage in the investee companies until realized through transactions with third parties. The entire amount of the gains or losses on sales to majority-owned subsidiaries is deferred until such gains or losses are realized through the subsequent sale of the related products to third parties.

Gains or losses on sales from investee companies to the Company are deferred in proportion to the Company s ownership percentages in the investee companies until realized through transactions with third parties.

Property, Plant and Equipment, Assets Leased to Others and Idle Assets

Property, plant and equipment and assets leased to others are stated at cost less accumulated depreciation. When an impairment is determined, the related assets are stated at the lower of fair value or book value. Idle assets are stated at the lower of net realizable value or book value. Significant additions, renewals, and betterments incurred during the construction period are capitalized. Maintenance and repairs are expensed in the period incurred. Interest expense incurred for the project during the purchase and construction period is also capitalized.

Depreciation is computed using the straight-line method over the following estimated service lives: buildings 10 to 20 years; machinery and equipment 5 years; and office equipment 3 to 5 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the corresponding accounts, with any gain or loss charged to income in the period of sale or disposal.

Goodwill

Goodwill represents the excess of the consideration paid for acquisitions over the fair market value of identifiable net assets acquired and acquisition costs. Goodwill is amortized using the straight-line method over the estimated life of 10 years.

Deferred Charges

Deferred charges consist of technology license fees and software and system design costs and other charges. The amounts are amortized as follows: technology license fees the shorter of the estimated life of the technology or the term of the technology transfer contract, software and system design costs 3 or 5 years.

Pension Costs

The Company records net periodic pension costs on the basis of actuarial calculations. Unrecognized net transition obligation and unrecognized net gains or losses are amortized over 25 years.

Deferred Gain on Sale and Leaseback

The gain on the sale of property that is simultaneously leased back is deferred by the Company and amortized as an adjustment of rental expenses over the term of the lease.

Income Tax

The Company uses an inter-period tax allocation method for income tax. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits, and net operating loss carry forwards. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or non-current in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or non-current based on the expected length of time before it is realized.

Any tax credit arising from the purchases of machinery, equipment and technology, research and development expenditures, personnel training, and investments in important technology-based enterprise are recognized using the current method.

Adjustments to prior years tax liabilities are added to or deducted from the current year s tax provision.

As of January 1, 1998, income taxes on unappropriated earnings (excluding earnings from foreign consolidating subsidiaries) of 10% are expensed in the year of shareholder approval which is usually the year subsequent to the year incurred.

Stock-Based Compensation

Table of Contents

Compensatory employee stock option plans that are amended or have options granted on or after January 1, 2004 must be accounted for following the interpretations issued by Accounting Research and Development Foundation. The Company adopted the intrinsic value method and any compensation cost is charged to expense over the employee vesting period as specified in the stock option plans.

Treasury Stock

When the Company purchases its outstanding common stock, the cost of the reacquired stock is recorded as treasury stock which is a reduction to shareholders equity. The Company s stock held by its subsidiaries is also treated as treasury stock and reclassified from long-term investments to treasury stock.

Foreign Currency Transactions

Foreign currency transactions are recorded in New Taiwan dollars at the current rate of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign currency transactions or monetary assets and liabilities denominated in a foreign currency are recognized in current operations. At the end of each period, assets and liabilities denominated in foreign currencies are revalued at the prevailing exchange rate with the resulting gains or losses recognized in current operations.

Derivative Financial Instruments

The Company enters into foreign currency forward contracts to manage its currency exposures in cash flow and in foreign currency-denominated assets and liabilities. The differences in the New Taiwan dollar amounts translated using the spot rate and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the end of each period, the receivables or payables arising from forward contracts are restated using the prevailing spot rate at the balance sheet date with the resulting differences charged to income. In addition, the receivables and payables related to forward contracts are netted with the resulting amount presented as either an asset or a liability. Any resulting gains or losses upon settlement are charged to income in the period of settlement.

The Company enters into interest rate swap transactions to manage its exposures to changes in interest rates on existing liabilities. These transactions are accounted for on an accrual basis, in which the cash settlement receivable or payable is recorded as an adjustment to interest income or expense.

The notional amount of foreign currency option contracts entered into for hedging purposes are not recognized as an asset or liability on the contract dates. The premiums paid or received for the call or put options are amortized and charged to income on a straight-line basis over the term of the related contract. Any resulting gains or losses upon settlement are charged to income in the period of settlement.

The Company entered into investment management agreements with two well-known financial institutions (fund managers) to manage investment portfolios for the Company. In accordance with the investment guidelines and terms in these agreements, the securities invested by fund managers should reach specific level of credit rating. As of June 30, 2004, the Company invested these investment portfolios in the aggregate amount of US\$800,000 thousand. The investment portfolios included securities such as notes, treasury bills, asset-backed securities, agency bonds, commercial papers, corporate bonds and government bonds. The securities acquired with maturities less than three months from the date of purchase had been reclassified to cash equivalents.

	4,395,303
Less: Current portion (under accrued expenses and other current liabilities)	1,757,476
	\$2,637,827

11. PENSION PLAN

The Company has a defined benefit pension plan for all regular employees that provides benefits based on length of service and average monthly salaries and wages for the six-month period prior to retirement.

The Company contributes at an amount equal to 2% of salaries paid every month to a Pension Fund (the Fund). The Fund is administered by a pension fund monitoring committee (the Committee) and the amounts in the Fund

are deposited in the Committee s name in the Central Trust of China.

Accrued pension costs based on actuarial calculation for the six months ended June 30, 2004 and 2003 were NT\$365,228 thousand and NT\$311,022 thousand, respectively. The balances of the Fund were NT\$1,324,108 thousand and NT\$1,101,623 thousand as of June 30, 2004 and 2003, respectively.

12. INCOME TAX

a. A reconciliation of income tax expense on income before income tax at the statutory rate and current income tax expense before income tax credits is as follows:

	Six Months Ended June 30	
	2004	2003
Income tax expense based on income before income tax at statutory rate (25%) Tax-exempt income Temporary and permanent differences	\$(10,388,989) 6,233,394 (294,984)	\$(4,188,111) 2,027,750 162,898

13. LABOR COST, DEPRECIATION AND AMORTIZATION EXPENSE

14. SHAREHOLDERS EQUITY

The Company has issued 668,395 thousand ADSs which are traded on the NYSE as of June 30, 2004. The number of common shares represented by the ADSs is 3,341,973 thousand shares (one ADS represents five common shares).

Capital surplus can only be used to offset a deficit under the ROC Company Law. However, the components of capital surplus generated from donated capital and the excess of the issue price over the par value of capital stock (including the stock issued for new capital, mergers, convertible bonds and the purchase of treasury stock) can be transferred to capital as stock dividends.

As of June 30, 2004 and 2003, the capital surplus consisted of the following:

	2004	2003
From merger	\$24,132,297	\$24,132,297
Additional paid-in capital	23,172,550	23,172,550
From long-term investments	115,665	81,746
From convertible bonds	9,410,632	9,410,632
Donation	55	55
Treasury stock	54,715	43,471
Total	\$56,885,914	\$56,840,751

The Company s Articles of Incorporation provide that the following shall be appropriated from annual earnings to the extent that the annual earnings exceed any accumulated deficit:

- a. 10% legal reserve; until the amount of total legal reserve equals to the Company s total paid-in capital;
- b. Special reserve in accordance with relevant laws or regulations;
- c. Remuneration to directors and supervisors and bonuses to employees equals to 0.3% and at least 1% of the remainder, respectively. Individuals eligible for the employee bonuses may include employees of affiliated companies as approved by the board of directors or a representative of the board of directors;
- d. Dividends to holders of preferred shares at a 3.5% annual rate are based on the period which the preferred shares have been outstanding. Following the redemption of all its issued and outstanding preferred shares on May 29, 2003, the Company amended its Article of Incorporation on June 3, 2003 to remove the provision for issuance of any future dividends to preferred shareholders as of that date; and

e. The appropriation of any remaining balance shall be approved by the shareholders.

Dividends may be distributed in shares of common stock or a combination of cash and common stock. Distributions of profits are preferably made in the form of stock dividend. The total of cash dividends paid in any given year may not exceed 50% of total dividends distributed in that year.

Any appropriations of net income are recorded in the financial statement in the year of shareholder approval.

The appropriation for legal reserve shall be made until the reserve equals the aggregate par value of the Company s outstanding capital stock. The reserve can only be used to offset an accumulated deficit or be distributed as a stock dividend up to 50% of the reserve balance when the reserve balance has reached 50% of the aggregate par value of the outstanding capital stock of the Company.

A special reserve equivalent to the debit balance of any account shown in the shareholder s equity section of the balance sheet (for example, unrealized loss on long-term investments and cumulative translation adjustments), shall be made from unappropriated retained earnings pursuant to existing regulations promulgated by the R.O.C Securities and Futures Commission (SFC). The special reserve is allowed to be appropriated to the extent that the debit balance of such accounts is reversed.

The appropriations of earnings for 2003 and 2002 were approved in the shareholders meeting on May 11, 2004 and June 3, 2003, respectively. The appropriations and dividend per share are as follows:

	Appropriation of Earnings			Per Share T\$)
	For Fiscal Year 2003	For Fiscal Year 2002	For Fiscal Year 2003	For Fiscal Year 2002
	·	
Legal reserve	\$ 4,725,870	\$ 2,161,029		
Special reserve	(68,945)	68,945		
Bonus paid to employees in cash	681,628			
Bonus paid to employees in stock	2,726,514	1,539,013		
Preferred stock dividend in cash	184,493	455,000	0.35	0.35
Common stock dividend in cash	12,159,971		0.60	
Common stock dividend in stock	28,373,267	14,898,309	1.41	0.80
Remuneration to directors and supervisors in cash	127,805	58,485		
	\$48,910,603	\$19,180,781		

The amount of above appropriation of earnings for 2003 and 2002 is consistent with the resolution of the meetings of board of directors on February 17, 2004 and March 4, 2003, respectively. However, the Company Law of R.O.C. states that treasury stock shall not participate in the appropriation of earnings. Therefore, the actual cash dividend per share and stock dividend per share are slightly more than those in the aforementioned resolution. If

the above employee bonus and remuneration to directors and supervisors had been paid in cash and charged against income for 2003 and 2002, the basic earnings per share for the years ended December 31, 2003 and 2002 would decrease from NT\$2.33 to NT\$2.15 and NT\$1.14 to NT\$1.05, respectively. The shares distributed as a bonus to employees represented 1.35 % and 0.83 % of the Company s total outstanding common shares as of December 31, 2003 and 2002, respectively.

The above information associated with the appropriations of bonus to employees and remuneration to directors and supervisors is available at Market Observation System website.

Under the Integrated Income Tax System that became effective on January 1, 1998, ROC resident shareholders are allowed a tax credit for their proportionate share of the income tax paid by the Company on earnings generated as of January 1, 1998. An imputation credit account is maintained by the Company for such income tax and the tax credit allocated to each shareholder.

Preferred Shareholders

The Company issued 1,300,000 thousand shares of unlisted Series A preferred stock to certain investors on November 29, 2000. All of the preferred stock was redeemed at par value and retired on May 29, 2003. Under the Company s Articles of Incorporation, as amended on June 3, 2003, the Company is no longer authorized to issue preferred stock.

The preferred shareholders had the following rights and related terms and conditions prior to redemption:

Preferred shareholders

- a. Are entitled to receive cumulative cash dividends at an annual rate of 3.5%.
- b. Are not entitled to receive any common stock dividends (whether declared out of unappropriated earnings or capital surplus).
- c. Have priority over the holders of common shares to the assets of TSMC available for distribution to shareholders upon liquidation or dissolution; however, the pre-emptive rights to the assets shall not exceed the issue value of the shares.
- d. Have voting rights similar to that of the holders of common shares.
- e. Have no right to convert their shares into common shares. The preferred shares are to be redeemed within thirty months from their issuance. The preferred shareholders have the aforementioned rights and the Company s related obligations remain the same until the preferred shares are redeemed by the Company.

15. STOCK-BASED COMPENSATION PLANS

On October 29, 2003 and June 25, 2002, the SFC approved The Company s Employee Stock Option Plans (the 2003 Plan and the 2002 Plan, respectively). The maximum number of units authorized to be granted under the 2003 Plan and the 2002 Plan was 120,000 thousand and 100,000 thousand, respectively, with each unit representing one common share of stock. The option rights may be granted to qualified employees of the Company, TSMC North America, and WaferTech, LLC, (WaferTech, an indirectly owned subsidiary of the Company). The option rights of both plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of both plans, stock option rights are granted at an exercise price equal to the closing price of the Company s common shares listed on the TSE on the date of grant. Under the 2002 Plan, there were 57,239 thousand option rights expired as of June 30, 2004.

Information of outstanding stock option rights for the six months ended June 30, 2004 and 2003 under the 2003 Plan and the 2002 Plan is as follows:

	2003 Plan		2002 Plan	
	Number of Outstanding Stock Option Rights (In Thousands)	Weighted- Average Exercise Price (NT\$)	Number of Outstanding Stock Option Rights (In Thousands)	Weighted- Average Exercise Prices (NT\$)
Six months ended June 30, 2004				
Beginning balance	842	57.8	48,515	42.7
Options granted	12,891	50.0	7,200	42.6
Options cancelled	(377)	51.5	(2,133)	44.0
Ending balance	13,356		53,582	
Six months ended June 30, 2003				
Beginning balance			19,369	52.9
Options granted			21,792	54.6
Options cancelled			(600)	52.8
Ending balance			40,561	

The number of outstanding option rights and exercise prices have been adjusted to reflect the appropriations of dividends in accordance with the plans.

As of June 30, 2004, there are no exercisable stock option rights. Information on outstanding option rights is as follows:

	Option Outstanding		
	Number		
	of W	eighted-Avera	ige
	Outstanding	Remaining	Weighted-Average
		Contractual	
	Options	Life	Exercise Price
Range of Exercise Prices (NT\$)	(In	(Years)	(NT\$)
	Thousands) -		

2003 Plan (49.9-57.8) 2002 Plan (32.8-46.2)		13,356 53,582	9.84 8.59	50.4 42.6
Total (32.8-57.8)		66,938	8.84	44.2
	22			

The compensation cost recognized for the six months ended June 30, 2004 was zero. If the Company uses fair-value based method to evaluate the options granted, the method, assumptions and pro forma results of the Company for the six months ended June 30, 2004 would be as follows:

Method:	Black-Scholes model
Assumptions:	
Expected dividend yield	1.00%
Expected volatility	43.19%-43.25%
Risk free interest rate	3.07%-3.85%
Expected life	5 years
Net income:	
Net income as reported	\$ 42,198,802
Pro forma net income	42,184,898
Earnings per share (EPS) (NT\$):	
Basic EPS as reported	1.81
Pro forma basic EPS	1.81
Diluted EPS as reported	1.81
Pro forma diluted EPS	1.81

The estimated weighted average fair value for the options granted under the 2003 Plan during the six-month period ended June 30, 2004 was NT\$19.75 per option.

16. TREASURY STOCK (COMMON STOCK)

	(Shares in Thousand)			
	Beginning Shares	Increase/ Dividend	Decrease	Ending Shares
Six months ended June 30, 2004 Reclassification of parent company stock held by subsidiaries				
from long-term investment Maintaining the shareholders equity	40,597	5,676 124,720	303	45,970 124,720
Wantaning the shareholders equity		124,720		124,720
	40,597	130,396	303	170,690
Six months ended June 30, 2003				
Reclassification of parent company stock held by subsidiaries from long-term investment	42,001		40	41,961

Proceeds from sale of treasury stock held by subsidiaries for the six months ended June 30, 2004 and 2003 were NT\$18,218 thousand and NT\$1,876 thousand, respectively. As of June 30, 2004 and 2003, the book value of the

stock held by subsidiaries was NT\$1,616,669 thousand and NT\$1,922,049 thousand, respectively; the market value was NT\$2,247,024 thousand and NT\$2,463,723 thousand, respectively. Capital stock held by subsidiaries as an investment is recorded as treasury stock with the holder having the same rights as other common shareholders.

In order to maintain the shareholders equity, the Company held a special meeting of the Board of Directors and approved a share buyback plan to purchase the Company s common shares listed on the TSE from its shareholders during the period from March 24, 2004 to May 23, 2004. The purchased shares will be cancelled and deducted from the Company s current outstanding common shares. The maximum number of shares of treasury stock that the Company can hold is 300,000 thousand shares while the prices of the range from NT\$38.5 to NT\$95 per share. As of June 30, 2004, the share buyback plan has ended and the Company has purchased 124,720 thousand common shares for a total of NT\$7,059,798 thousand. As of July 13, 2004, the treasury stock has not been retired.

17. EARNINGS PER SHARE

EPS is computed as follows:

			EPS (NT\$)		
Amounts	(Numerator)	Shares	Before	After	
Before	After	(Denominator)	Income	Income	
Income Tax	Income Tax	(Thousand)	Tax	Tax	

Six months ended June 30, 2004

The potential common shares issuable under the employee stock option plans (see Note 15) are included in the denominator of the diluted EPS computation by using the treasury stock method under the Statement of Financial Accounting Statement No. 24 Earning Per Share , however, such shares resulted in a non-dilutive per share amount for the six months ended June 30, 2003.

18. RELATED PARTY TRANSACTIONS

The Company engages in business transactions with the following related parties:

- a. Industrial Technology Research Institute (ITRI), the Chairman of the Company is one of its directors
- b. Philips, a major shareholder of the Company
- c. Subsidiaries

TSMC North America TSMC Europe TSMC Japan

d. Investees

VIS GUC SSMC

e. Indirect subsidiaries

WaferTech TSMC Technology Inc. (TSMC Technology)

The significant transactions with the aforementioned parties in addition to those disclosed in other Notes are summarized as follows:

	Six Months Ended June 30

The terms of sales to related parties and the terms of the sales of property, plant and equipment to related parties are not significantly different from those to third parties. For other related parties transactions, since no other similar transactions to follow, the prices are determined in accordance with the related contractual agreements.

19. SIGNIFICANT LONG-TERM OPERATING LEASES

The Company leases land from the Science-Based Industrial Park Administration. These agreements expire on various dates from March 2008 to December 2020. The agreements can be renewed upon their expiration.

As of June 30, 2004, future remaining lease payments are as follows:

Year	Amount
2004 (3rd to 4th quarter)	\$ 117,674
2005	235,348
2006	235,348
2007	235,348
2008	210,687
2009 and thereafter	1,617,858

\$2,652,263

20. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

The significant commitments and contingencies of the Company as of June 30, 2004 are as follows:

- a. On June 20, 2004, the Company and Philips revised the Technical Cooperation Agreement, which was originally signed on May 12, 1997, with effective date from January 1, 2004 for five years. Upon expiration, this amended Technical Cooperation Agreement will be terminated at the expiration date and will not be automatically renewed. Under this amended Technical Cooperation Agreement, the Company will pay Philips royalties based on fixed amounts mutually agreed-on, rather than under certain percentage of the Company s annual net sales. The Company and Philips also agree to cross license the patents owned by each party.
- b. Under a technical cooperation agreement with ITRI, the Company shall reserve and allocate up to 35% of certain of its production capacity for use by the Ministry of Economic Affairs (MOEA) or any other party designated by the MOEA.
- c. Under several foundry agreements, the Company shall reserve a portion of its production capacity for certain major customers that have guarantee deposits with the Company. As of June 30, 2004, the Company had a total of US\$17,616 thousand of guarantee deposits.
- d. Under a Shareholders Agreement entered into with Philips and EDB Investments Pte Ltd. On March 30, 1999, the parties formed a joint venture company, SSMC, for the purpose of constructing an integrated circuit foundry in Singapore. As of June 30, 2004, the Company s equity interest in SSMC was 32%. The Company and Philips committed to buy specific percentages of the production capacity of SSMC. If any party defaults on the commitment and the capacity utilization of SSMC falls below a specific percentage of its total capacity, the defaulting party is required to compensate SSMC for all related unavoidable costs.
- e. The Company provides technical services to SSMC under a Technical Cooperation Agreement (the Agreement) entered into on May 12, 1999. The Company receives compensation for such services computed at a specific percentage of net selling price of certain products sold by SSMC. The Agreement shall remain in force for ten years and may be automatically renewed for successive periods of five years unless pre-terminated by either party under certain conditions.
- f. The Company provided guarantees on loans amounting to US\$60,000 thousand, US\$40,000 thousand and US\$440,000 thousand for TSMC Development, Inc. (TSMC Development), TSMC North America and WaferTech, respectively.
- g. Under a Technology Transfer Agreement (TTA) with National Semiconductor Corporation (National) entered into on June 27, 2000, the Company shall receive payments for the licensing of certain technology to National. The agreement was to remain in force for ten years and could be automatically renewed for successive periods of two years thereafter unless either party gives notice for early termination under certain conditions. In January 2003, the Company and National entered into a Termination Agreement whereby the TTA was terminated for convenience. Under the termination agreement, the Company is relieved of further obligation to transfer additional technology. In addition, the Company granted National an option to request the transfer of certain technologies under the same terms and conditions as the terminated TTA. The option will expire in January 2008.
- h. Beginning in 2001, the Company entered into several licensing arrangements for certain semiconductor patents. The terms of the contracts range from five to ten years with payments to be made in the form of royalties over the term of the related contracts. The Company has recorded the related amounts as a liability

with the corresponding amounts recorded as deferred charges which are amortized and charged to cost of sales on a straight-line basis over the estimated life of the technology or the term of the contract, whichever is shorter.

- i. In November 2002, the Company entered into an Amended and Restated Joint Technology Cooperation Agreement with Philips, Motorola, Inc. and STMicroelectronics to jointly develop 90-nanometer to 65-nanometer advanced CMOS Logic and e-DRAM technologies. The Company also agreed to align 0.12 micron CMOS Logic technology to enhance its foundry business opportunities. The Company will contribute process technologies and share a portion of the costs associated with this joint development project.
- j. In December 2003, the Company entered into a Technology Development and License Agreement with Motorola Inc. to jointly develop 65nm SOI (silicon on insulator) technology. The Company will also license related 90nm SOI technology from Motorola. Any intellectual properties arising out of the co-development project shall be jointly owned by the parties. In accordance with the agreement, the Company will pay royalty to Motorola, Inc. and will share a portion of the costs associated with the joint development project.
- k. In December 2003, the Company filed a lawsuit in the US District Court for the Northern District of California against Semiconductor Manufacturing International Corporation (SMIC) and certain of its subsidiaries for patent infringement seeking injunctive relief and monetary damages. In May 2004, the Company filed a separate suit against SMIC and certain of its subsidiaries in Alameda County of California for trade secret misappropriation seeking injunctive relief and monetary damages. The probable outcome in either forum cannot be reasonably estimated.

1. Amounts available under unused letters of credit as of June 30, 2004 were NT\$6,480 thousand, US\$15 thousand and SG\$85 thousand.

21. ADDITIONAL DISCLOSURES

Following are the additional disclosures required by the SFC for the Company and its investees:

- a. Financing provided: Please see Table 1 attached;
- b. Endorsement/guarantee provided: Please see Table 2 attached;
- c. Marketable securities held: Please see Table 3 attached;
- d. Marketable securities acquired or disposed of at costs or prices of at least NT\$100 million or 20% of the paid-in capital: Please see Table 4 attached;
- e. Acquisition of individual real estate properties at costs of at least NT\$100 million or 20% of the paid-in capital: Please see Table 5 attached;
- f. Disposal of individual real estate properties at prices of at least NT\$100 million or 20% of the paid-in capital: None;
- g. Total purchases from or sales to related parties of at least NT\$100 million or 20% of the capital: Please see Table 6 attached;
- h. Receivable from related parties amounting to at least NT\$100 million or 20% of the capital: Please see Table 7 attached;
- i. Names, locations, and related information of investee on which the Company exercises significant influence: Please see Table 8 attached;

- j. Financial instrument transactions:
 - 1) Derivative financial instruments

The Company entered into derivative financial instrument transactions for the six-month period ended June 30, 2004 to manage exposures related to foreign-currency denominated receivables or payables, and interest rate fluctuations. Certain information on these contracts is as follows:

a) Outstanding forward exchange contracts as of June 30, 2004 are as follows:

Financial Instruments	Period	Contract Amount (Nominal) Amount) (In Thousand)
Sell	July 2004 to April 2005	US\$ 2,158,000 (US\$/NT\$)
Sell	August 2004	EUR 20,000 (EUR/US\$)

As of June 30, 2004, payables to forward exchange contracts (included in the other current liabilities account) aggregate approximately NT\$903,322 thousand. Net exchange losses for the six months ended June 30, 2004 was NT\$69,938 thousand.

b) Interest rate swaps

The Company entered into interest rate swap contracts to manage related interest rates on its long-term loans. Net interest income on these transactions for the six months ended June 30, 2004 was NT\$9,292 thousand. Outstanding contracts as of June 30, 2004 were as follows:

Contract Date	Period	Contract Amount (Nominal) (In Thousand)
September 19, 2003	September 22, 2003 to December 15, 2005	\$500,000
October 16, 2003	October 20, 2003 to December 15, 2005	500,000
October 16, 2003	October 20, 2003 to December 15, 2005	500,000
October 17, 2003	October 21, 2003 to December 15, 2005	500,000
October 17, 2003	October 20, 2003 to December 15, 2005	500,000
November 7, 2003	November 11, 2003 to December 15, 2005	500,000

c) Transaction risk

 i) Credit risk. Credit risk represents the positive net settlement amount of those contracts with positive fair values at the balance sheet date. The positive net settlement amount represents the loss incurred by the Company if the counter-parties breached the contracts. The banks, which are the counter-parties to the foregoing derivative financial instruments, are reputable financial institutions. Management believes its exposures related to the potential default by those counter-parties are low.

Market price risk. All derivative financial instruments are intended as hedges for fluctuations in currency exchange rates on the Company s foreign currency denominated receivables or payables and interest rate fluctuations on its floating rate long-term loans. Gains or losses from forward exchange contracts are likely to be offset by gains or losses from the hedged receivables and payables. Interest rate risks are also controlled as the expected cost of capital is fixed. Thus, market price risks are believed to be minimal.

iii) Liquidity and cash flow risk and uncertainty of amount and term of future cash demand.

As of June 30, 2004, the Company s future cash demand for outstanding forward exchange contracts, interest rate swaps and option contracts are as follows:

	Forward Excha	inge Contracts		
Term	Inflow (In Thousand)	owOutflowisand)(In Thousand)86,263US\$2,158,000		
Within one year	NT\$71,986,263 US\$24,132			

Forward Evolution of Contracts

The Company has sufficient operating capital to meet the above cash demand. The interest rate of the interest rate swaps has taken the Company s cost of capital into account. In addition, the exchange rates of forward foreign exchange contracts and interest swap contracts are fixed. Therefore, there is no material fund raising risk and cash flow risk.

2) The fair values of financial instruments were as follows:

	June 30					
	20	04	2003			
	Carrying Amount	Fair Value	Carrying Amount	Fair Value		
Non-derivative financial instruments Assets						
Short-term investments	\$41,199,013	\$41,491,242	\$ 3,054,050	\$ 3,057,705		
Long-term investments Liabilities	49,216,494	57,269,033	35,121,987	38,358,044		
Bonds payable (includes current portion) Derivative financial instruments	35,000,000	35,729,923	35,000,000	35,838,341		
Forward exchange contracts (buy)			(39,769)	(39,560)		
Forward exchange contracts (sell)	(903,322)	(538,407)	(104,205)	(65,798)		
Interest rate swaps		(26,956)	986	(22,130)		
Foreign currency options			772	(87,415)		

The above financial instruments do not include cash and cash equivalents, receivables, other financial assets, payables, and payable to contractors and equipment suppliers. The carrying amounts of aforementioned instruments reported in the balance sheet are approximate to their fair values.

The above financial instruments also exclude refundable deposits, guarantee deposits and other long-term payables. The future cash inflow and outflow of the deposits approximate to their fair values and fair value of other long-term payables approximates to the carrying value.

Fair values of financial instruments were determined as follows:

- a) Fair value of short-term and long-term investments is based on quoted market prices. If quoted market prices are unavailable, fair value is based on net asset value or book value of investment.
- b) The fair value of bonds payable is the quoted market value.

c) Fair value of derivative financial instruments is the estimated net receivable or (payable) if the contracts are terminated on the relevant balance sheet date.

The fair values of some financial and non-financial instruments are not included in the fair values disclosed above. Accordingly, the sum of the fair values of the financial instruments listed above does not represent the fair value of the Company as a whole.

- k. Information on investment in Mainland China
 - 1) The name of the investee company in Mainland China, the main businesses and products, its issued capital, method of investment, information on inflow or outflow of capital, ratio of ownership, equity in the net gain or net loss, ending balance, amount received as earnings distributions from the investment, and the limitation on investment: Please see Table 9 attached.
 - 2) Significant direct or indirect transactions with the investee company, its prices and terms of payment, unrealized gain or loss, and other related information which is helpful to understand the impact of investment in Mainland China on financial reports: None.
