Agenda for Shareholders Meeting

I. Approval of the Financial Statement

1. Summary of Business

In 2005, we grew by 4.7% compared to 2004 in terms of the total sales (Won 10,160 billion). Wireless internet sector recorded a 35% growth compared to 2004 with total sales of Won 2,460 billion, accounting for 26.6 % of mobile service revenues (excluding interconnection revenues);

The total number of subscribers increased by 0.75 million subscribers to 19.53 million subscribers (50.9% of the aggregate number of subscribers in Korea). We were ranked first in 2005 National Customer Satisfaction Index (8<sup>th</sup> consecutive years) and in three other major customer satisfaction surveys;

We saw a continuous increase in the ARPU. The total number of subscribers for Melon passed 4 million subscribers to rank first out of all the internet music contents providers in Korea and the cumulative number of subscribers for the Mobile Cyworld service exceeded 1.25 million subscribers;

We initiated the mobile 3D game service with the launch of GXG service. Also, Moneta, which combines the smartchip technology with financial services via mobile communications technology, has further expanded its domains to credit cards, travel passes, mobile stock exchange, mobile banking and others;

In view of future competition with other service providers, we have introduced HSDPA network system to the major cities. Preparation for the 2.3GHz Wi-Bro business is also in progress;

With the view of developing and fortifying our next growth engine in the entertainment convergence market, we have acquired IHQ and Seoul Records and promoted film and music funds to further bolster profit growth of wireless internet services;

As for our global business initiatives, by combining our mobile communications and data services technology with EarthLink (U.S.A.)'s customer base, marketing infrastructure and brand value, we have incorporated a company named HELIO through which we will be providing music, games and messaging services targeted mainly at young customer group. Promotion for new subscribers will begin in the first

half of 2006. In Vietnam, the total number of subscribers for the S-Fone service soared through 0.37 million subscribers in December 2005. Also, we introduced Child Safety Service based on our GPS technology to the Netherlands GSM market.

## III. Business References

## 1. Summary of Business

## (1) Market Environment

## (a) Industry

As of December 31, 2005, the number of mobile phone service subscribers totaled to 38.34 million representing 79.4% of total Korean population. Considering the market situations in other Asian countries such as Taiwan or Hong Kong where penetration

rates of mobile phones are as high as 90%, we believe that there is the possibility of further growth in the Korean mobile communications market.

With the introduction of multi-functional handsets and the continued improvement in the network environment, convergence services providing multimedia contents and mobile commerce service paved the way for a qualitative market growth, shifting the center of demand from voice communications to data communications.

(b) Market Growth

(in thousands)

	<b>End of 2005</b>	<b>End of 2004</b>	<b>End of 2003</b>	<b>End of 2002</b>	<b>End of 2001</b>

<b>Total</b>	38,342	36,586	33,592	32,342	29,046

(Source: Ministry of Information and Communications)

(c) Competition

(i) Summary of Market Dynamics

The entry of Shinsegi Telecom and 3 PCS companies into the mobile communications market in 1997 signaled competition among five main service providers. However, SK Telecom's acquisition of Shinsegi Telecom in December 1999, followed by Korea Telecom's merger with Hansol M.com, subsequently renamed as KTF in May 2001, transformed the market dynamics into a three way competition with SK Telecom, KTF, and LG Telecom as the main service providers;

SK IMT and KT I-COM incorporated to provide 2GHz IMT-2000 service have been merged by their respective holding companies, SK Telecom and KTF, in the first half of 2003, solidifying the three way market dynamics for the second and third generation telecommunication services.

(ii) Market Entry: Approval by the Minister of Information and Communication required.

(iii) Competition

Brand power, product/service competitiveness, sales competitiveness are the three major factors of competition in the market;

Brand power can be defined as the loyalty or recognition of the services and values provided by the service provider to the customers;

Our product/service competitiveness includes communication quality and service coverage, broad range of subscription plans, broad range of wireless internet services and their connection quality, hand set functionality and price and CS quality;

Our sales competitiveness consists of the incorporation of new marketing strategies and the level of logistic competitiveness of the branch offices and agencies.

(2) Summary of Business

(a) Summary and Classification of Businesses

(i) Summary

In 2005, we grew by 4.7% compared to 2004 in terms of the total sales (Won 10,160 billion). Wireless internet sector recorded a 35% growth compared to 2004 with total sales of Won 2,460 billion, according for 26.6 % of mobile service revenues (excluding interconnection revenues);

The total number of subscribers increased by 0.75 million subscribers to 19.53 million subscribers (50.9% of the aggregate number of subscribers in Korea). We were ranked first in 2005 National Customer Satisfaction Index (8<sup>th</sup> consecutive years) and in three other major customer satisfaction surveys;

We saw a continuous increase in the ARPU. The total number of subscribers for Melon passed 4 million subscribers to rank first out of all the internet music contents providers in Korea and the cumulative number of subscribers for the Mobile Cyworld service exceeded 1.25 million subscribers;

We initiated the mobile 3D game service with the launch of GXG service. Also, Moneta, which combines the smartchip technology with financial services via mobile communications technology, has further expanded its domains to credit cards, travel passes, mobile stock exchange, mobile banking and others;

In view of future competition with other service providers, we have introduced HSDPA network system to the major cities. Preparation for the 2.3GHz Wi-Bro business is also in progress;

With the view of developing and fortifying our next growth engine in the entertainment convergence market, we have acquired IHQ and Seoul Records and promoted film and music funds to further bolster profit growth of wireless internet services;

As for our global business initiatives, by combining our mobile communications and data services technology with EarthLink (U.S.A.)'s customer base, marketing infrastructure and brand value, we have incorporated a company named HELIO through which we will be providing music, games and messaging services targeted mainly at young customer group. Promotion for new subscribers will begin in the first half of 2006. In Vietnam, the total number of subscribers for the S-Fone service soared through 0.37 million subscribers in December 2005. Also, we introduced Child Safety Service based on our GPS technology to the Netherlands GSM market.

(c) Market Characteristics

The mobile communications market in Korea is targeted at the citizens of the Republic of Korea. The coverage is country-wide and anyone can subscribe to the service regardless of gender, age, and level of income;

With the penetration rate for mobile phones reaching 79.4% (as of December 31, 2005), our customer base is rapidly expanding to include students and preschool children;

Although the domestic consumption has provided the dominant share of our revenues until now, we expect to see an increase in export and overseas sales rate in the near future due to the expansion of our overseas businesses;

(d) Details and Outlook for New Businesses

(i) Resolution for the investment in MVNO (new business operation of wireless communication in the U.S.) on January 26, 2005;

Investment amount: US\$220 million (from 2005 until 2007);

Investment method: Establishment of a joint venture with EarthLink (U.S.A.) which is one of the three major internet service providers in the U.S.;

Services to be Provided: Partial MVNO (Mobile Virtual Network Operator), we plan to attract subscribers and to provide services based on our additional services facilities and fee payment plans;

Combination of our mobile communications and data services technology with EarthLink(U.S.A.)'s customer base, marketing infrastructure and brand value;

Provision of music, game, and messaging services, for segmented target customer group;

Recent business events

- Launch of the new HELIO brand.
- Business to be initiated with full force from the first half of 2006 targeting mainly at young customer group.

(ii) Introduction of HSDPA service

With a view to develop and fortify our next growth engine, we will invest in the development of products with visual concepts such as video phones and will expand our global roaming services;

We plan to focus on the early adopter customer group and heavy users to secure market dominance and to improve our brand recognition as a premium service provider in order to increase customer preference toward HSDPA.
