J. C. PENNEY COMPANY, INC.
NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation and Consolidation

Basis of Presentation

J. C. Penney Company, Inc. is a holding company whose principal operating subsidiary is J. C. Penney Corporation, Inc. (JCP). JCP was incorporated in Delaware in 1924, and J. C. Penney Company, Inc. was incorporated in Delaware in 2002, when the holding company structure was implemented. The holding company has no independent assets or operations, and no direct subsidiaries other than JCP. The holding company and its consolidated subsidiaries, including JCP, are collectively referred to in this quarterly report as “we,” “us,” “our,” “ourselves” or the “Company,” unless otherwise indicated.

J. C. Penney Company, Inc. is a co-obligor (or guarantor, as appropriate) regarding the payment of principal and interest on JCP’s outstanding debt securities. The guarantee of certain of JCP’s outstanding debt securities by J. C. Penney Company, Inc. is full and unconditional.

These unaudited Interim Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) and in accordance with the rules and regulations of the Securities and Exchange Commission (SEC). The accompanying unaudited Interim Consolidated Financial Statements, in our opinion, include all material adjustments necessary for a fair presentation and should be read in conjunction with the audited Consolidated Financial Statements and notes thereto in our Annual Report on Form 10-K for the fiscal year ended February 2, 2013 (2012 Form 10-K). We follow substantially the same accounting policies to prepare quarterly financial statements as are followed in preparing annual financial statements. A description of such significant accounting policies is included in the 2012 Form 10-K. The February 2, 2013 financial information was derived from the audited Consolidated Financial Statements, with related footnotes, included in the 2012 Form 10-K. Because of the seasonal nature of the retail business, operating results for interim periods are not necessarily indicative of the results that may be expected for the full year.

Fiscal Year

Our fiscal year ends on the Saturday closest to January 31. As used herein, “three months ended November 2, 2013” and “three months ended October 27, 2012” refer to the 13-week periods ended November 2, 2013 and October 27, 2012, respectively. “Nine months ended November 2, 2013” and “nine months ended October 27, 2012,” refer to the 39-week periods ended November 2, 2013 and October 27, 2012, respectively. Fiscal year 2013 contains 52 weeks and fiscal year 2012 contained 53 weeks.

Basis of Consolidation

All significant intercompany transactions and balances have been eliminated in consolidation. Certain reclassifications were made to prior period amounts to conform to the current period presentation. None of the reclassifications affected our net income/(loss) in any period.

Use of Estimates and Assumptions

The preparation of unaudited Interim Consolidated Financial Statements, in conformity with GAAP, requires us to make assumptions and use estimates that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The most significant estimates relate to: inventory valuation under the retail method; valuation of long-lived assets and indefinite-lived intangible assets for impairments; estimation of reserves and valuation allowances specifically related to closed stores, insurance, income taxes, litigation and environmental contingencies and pension accounting. Such estimates and assumptions are subject to inherent uncertainties, which may result in actual amounts differing from reported amounts.

Table of Contents

2. Earnings/(Loss) per Share

Net income/(loss) and shares used to compute basic and diluted earnings/(loss) per share (EPS) are reconciled below:

(in millions, except per share data)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Earnings/(loss)				
Net income/(loss)	$(489)	$(123)	$(1,423)	$(433)
Shares				
Weighted average common shares outstanding (basic shares)	251.8 (1)	219.4	230.8 (1)	219.1
Adjustment for assumed dilution:				
Stock options, restricted stock awards and warrant	—	—	—	—
Weighted average shares assuming dilution (diluted shares)	251.8	219.4	230.8	219.1
EPS				
Basic	$(1.94)	$(0.56)	$(6.17)	$(1.98)
Diluted	$(1.94)	$(0.56)	$(6.17)	$(1.98)

(1) On October 1, 2013, we issued 84 million shares of common stock with a par value of $0.50 per share.

The following average potential shares of common stock were excluded from the diluted EPS calculation because their effect would have been anti-dilutive:

(Shares in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Stock options, restricted stock awards and warrant	23.9	25.0	24.6	25.3

3. Credit Facility

On February 8, 2013, J. C. Penney Company, Inc., JCP and J. C. Penney Purchasing Corporation (Purchasing) entered into an amended and restated revolving credit agreement in the amount up to $1,850 million (2013 Credit Facility), which replaced the Company's prior credit agreement entered into in January 2012, with largely the same syndicate of lenders under the previous agreement, with JPMorgan Chase Bank, N.A., as administrative agent. The 2013 Credit Facility matures on April 29, 2016, increases the letter of credit sublimit to $750 million and provides an accordion feature that could potentially increase the size of the facility by an additional amount not to exceed $400 million.

The 2013 Credit Facility is an asset-based revolving credit facility and is secured by a perfected first-priority security interest in substantially all of our eligible credit card receivables, accounts receivable and inventory. The 2013 Credit Facility is available for general corporate purposes, including the issuance of letters of credit. Pricing under the 2013 Credit Facility is tiered based on JCP's senior unsecured long-term credit ratings issued by Moody's Investors Service, Inc. and Standard & Poor's Ratings Services. JCP's obligations under the 2013 Credit Facility are guaranteed by J. C. Penney Company, Inc.

Availability under the 2013 Credit Facility is limited to a borrowing base which allows us to borrow up to 85% of eligible accounts receivable, plus 90% of eligible credit card receivables, plus 85% of the liquidation value of our inventory, net of certain reserves. Letters of credit reduce the amount available to borrow by their face value. In the event that availability under the 2013 Credit Facility is at any time less than the greater of (1) $125 million or (2) 10% of the lesser of the total facility or the borrowing base then in effect, for a period of at least 30 days, the Company will be subject to a fixed charge coverage ratio covenant of 1.0 to 1.0 which is calculated as of the last day of the quarter and measured on a trailing four-quarter basis.

Table of Contents

On April 12, 2013, we borrowed $850 million under the 2013 Credit Facility of which $200 million was repaid during the third quarter of 2013. As of the end of the third quarter of 2013, $650 million of the borrowing remains outstanding. The borrowing bears interest at a rate of LIBOR plus 3.0%. As of the end of the third quarter of 2013, we had $534 million in standby and import letters of credit outstanding under the 2013 Credit Facility, the majority of which are standby letters of credit that support our merchandise initiatives and workers' compensation. None of the standby or import letters of credit have been drawn on. The applicable rate for standby and import letters of credit was 3.00% and 1.50%, respectively, while the required commitment fee was 0.50% for the unused portion of the 2013 Credit Facility. As of the end of the third quarter of 2013, we had $666 million available for future borrowing, of which $481 million is currently accessible due to the limitation of the fixed charge coverage ratio.

4. Long-Term Debt

Tender Offer

On April 30, 2013 we announced the commencement of a cash tender offer (Tender Offer) and consent solicitation for our 7.125% Debentures Due 2023 (Notes) for total consideration consisting of an amount equal to $1,350 per $1,000 principal amount of Notes, including a consent payment in the amount equal to $50 per $1,000 principal amount of Notes. We solicited consents to effect certain proposed amendments to the indenture, as amended and supplemented, governing the Notes (the Indenture) that would eliminate most of the restrictive covenants and certain events of default and other provisions in the Indenture (Proposed Amendments).

On May 14, 2013, we announced that we had amended our previously announced Tender Offer (Amended Tender Offer) and related solicitation of consents to extend the expiration date of the consent solicitation and to increase the tender consideration. The Amended Tender Offer increased the total consideration from $1,350 to $1,450 per $1,000 principal amount of the Notes (Amended Tender Offer Consideration); extended the expiration date of the consent solicitation from May 13, 2013 to May 20, 2013 (Consent Expiration) and extended the expiration of the tender offer from May 28, 2013 to June 4, 2013 (Expiration Time).

Holders that validly tendered their Notes prior to the Consent Expiration, as extended, received the Amended Tender Offer Consideration. Holders that validly tendered their Notes after the Consent Expiration, as extended, but prior to the Expiration Time, as extended, received only the tender offer consideration of $1,400 per $1,000 principal amount of the Notes (Tender Offer Consideration). Holders whose Notes were accepted for purchase in the Amended Tender Offer also received accrued and unpaid interest to, but not including, the applicable payment date for the Notes. On May 22, 2013, we accepted for purchase $243 million in aggregate principal amount of the Notes, representing 95.41% of the outstanding principal amount, for aggregate Amended Tender Offer Consideration of $352 million. On June 5, 2013, we accepted for purchase an additional $2 million in aggregate principal amount of the Notes, for aggregate Tender Offer Consideration of $3 million. The Tender Offer resulted in a loss on the extinguishment of debt of $114 million which includes the premium paid over face value of the Notes of $110 million, reacquisition costs of $2 million and the write-off of unamortized debt issue costs of $2 million. As a result of receiving the requisite consent of the Holders of at least 66 2/3% of aggregate principal amount of Notes outstanding, the Proposed Amendments were approved and became operative.

Term Loan Facility

On May 22, 2013, we entered into a $2.25 billion five-year senior secured term loan facility (2013 Term Loan Facility). The 2013 Term Loan Facility is guaranteed by J. C. Penney Company, Inc. and certain subsidiaries of JCP, and is secured by mortgages on certain real estate of JCP and the guarantors, in addition to substantially all other assets of JCP and the guarantors. Proceeds of the 2013 Term Loan Facility were used to fund the Amended Tender Offer and will be used to fund ongoing working capital requirements and general corporate purposes. We are required to make quarterly repayments in a principal amount equal to $5.625 million during the five-year term of the 2013 Term Loan Facility, beginning September 30, 2013, subject to certain reductions for mandatory and optional prepayments. As of the end of the third quarter of 2013, the balance of the 2013 Term Loan Facility is $2.24 billion.

5. Fair Value Disclosures

In determining fair value, the accounting standards establish a three-level hierarchy for inputs used in measuring fair value, as follows:

- Level 1 — Quoted prices in active markets for identical assets or liabilities.

- Level 2 — Significant observable inputs other than quoted prices in active markets for similar assets and liabilities, such as quoted prices for identical or similar assets or liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Table of Contents

- Level 3 — Significant unobservable inputs reflecting our own assumptions, consistent with reasonably available assumptions made by other market participants.

REIT Assets Measured on a Recurring Basis

The market value of our investment in public REIT assets are accounted for as available-for-sale securities and are carried at fair value on an ongoing basis in Other assets in the unaudited Interim Consolidated Balance Sheets. We determined the fair value of our investments in REITs using quoted market prices. There were no transfers in or out of any levels during any period presented. Our REIT assets measured at fair value on a recurring basis are as follows:

($ in millions)	Cost Basis	REIT Assets at Fair Value		
		Quoted Prices in Active Markets of Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
November 2, 2013	$7	$32	$—	$—
October 27, 2012	9	32	—	—
February 2, 2013	7	33	—	—

Other Financial Instruments

Carrying values and fair values of financial instruments that are not carried at fair value in the unaudited Interim Consolidated Balance Sheets are as follows:

($ in millions)	November 2, 2013		October 27, 2012		February 2, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt, including current maturities	$4,868	$4,252	$2,868	$2,706	$2,868	$2,456
Cost investment (Note 9)	—	—	36	—	36	—

The fair value of long-term debt is estimated by obtaining quotes from brokers or is based on current rates offered for similar debt. The cost investment was for equity securities that were not registered and freely tradable shares and their fair values were not readily determinable; however, we believe the carrying value approximates or was less than the fair value as of October 27, 2012 and February 2, 2013.

As of November 2, 2013, October 27, 2012 and February 2, 2013, the fair values of cash and cash equivalents and accounts payable approximate their carrying values due to the short-term nature of these instruments. In addition, the fair values of short-term borrowings, capital lease commitments and the note payable approximate their carrying values. These items have been excluded from the table above.

Concentrations of Credit Risk

We have no significant concentrations of credit risk.

Table of Contents

6. Stockholders' Equity

The following table shows the change in the components of stockholders' equity for the nine months ended November 2, 2013:

(in millions)	Number of Common Shares	Common Stock	Additional Paid-in Capital	Reinvested Earnings/ (Accumulated Deficit)	Accumulated Other Comprehensive Income/(Loss)	Total Stockholders' Equity
February 2, 2013	219.3	$110	$3,799	$380	$(1,118)	$3,171
Net income/(loss)	—	—	—	$(1,423)	—	$(1,423)
Other comprehensive income/(loss)	—	—	—	—	80	$80
Common stock issued	84.0	42	744	—	—	786
Stock-based compensation	1.3	1	32	—	—	33
November 2, 2013	304.6	$153	$4,575	$(1,043)	$(1,038)	$2,647

Comprehensive Income

The tax effects allocated to each component of other comprehensive income/(loss) are as follows:

($ in millions)	Three Months Ended November 2, 2013			October 27, 2012		
	Gross Amount	Income Tax (Expense)/ Benefit	Net Amount	Gross Amount	Income Tax (Expense)/ Benefit	Net Amount
REITs						
Unrealized gain/(loss)	$(1)	$1	$—	$1	$—	$1
Reclassification adjustment for realized (gain)/loss	—	—	—	(15)	5	(10)
Retirement benefit plans						
Net actuarial gain/(loss) arising during the period	—	—	—	(125)	50	(75)
Reclassification of net prior service (credit)/cost from a curtailment	—	—	—	(5)	2	(3)
Reclassification for amortization of net actuarial loss/(gain)	43	(17)	26	61	(24)	37
Reclassification for amortization of prior service cost/(credit)	(1)	1	—	(4)	2	(2)
Total	$41	$(15)	$26	$(87)	$35	$(52)

Table of Contents

($ in millions)	Nine Months Ended November 2, 2013			October 27, 2012		
	Gross Amount	Income Tax (Expense)/ Benefit	Net Amount	Gross Amount	Income Tax (Expense)/ Benefit	Net Amount
REITs						
Unrealized gain/(loss)	$(1)	$1	$—	$52	$(18)	$34

Total	$128	$(48)	$80	$(186)	$66	$(120)

(1) During the second quarter of 2012, the reclassification adjustment for the Simon Property Group, L.P. (SPG) units of $270 million was calculated by using the closing fair market value per SPG unit of $158.13 on July 19, 2012 for the two million REIT units that were redeemed on July 20, 2012. The REIT units were redeemed at a price of $124.00 per unit (see Note 10).

The following table shows the changes in accumulated other comprehensive income/(loss) balances for the nine months ended November 2, 2013:

($ in millions)	Unrealized Gain/(Loss) on REITs	Net Actuarial Gain/(Loss)	Prior Service Credit/(Cost)	Accumulated Other Comprehensive Income/(Loss)

(1) These accumulated other comprehensive components are included in the computation of net periodic benefits expense/(income). See Note 8 for additional details.

Issuance of Common Stock

On October 1, 2013, we issued 84 million shares of common stock with a par value of $0.50 per share for $9.65 per share for total net proceeds of $786 million after $24 million of fees.

Stockholders' Rights Agreement

As authorized by our Company’s Board of Directors, the Company adopted a Rights Agreement, dated as of August 22, 2013 (Rights Agreement), by and between the Company and Computershare Inc., as Rights Agent. Pursuant to the terms of the Rights Agreement that expires on August 20, 2014, one preferred stock purchase right (a Right) was attached to each outstanding share of Common Stock of $0.50 par value of the Company (Common Stock) held by holders of record as of the close of business on September 3, 2013. Additionally, the Company will issue one Right with each new share of Common Stock issued. The Rights, registered on August 23, 2013, will initially trade with and be inseparable from our Common Stock and will not be evidenced by separate certificates unless they become exercisable.

Each Right entitles its holder to purchase from the Company 1/1000th of a share of a newly authorized series of participating preferred stock at an exercise price of $55.00, subject to adjustment in accordance with the terms of the Rights Agreement, once the Rights become exercisable. In general terms, under the Rights Agreement, the Rights become exercisable if any person or group acquires 10% or more of the Common Stock or, in the case of any person or group that owned 10% or more of the Common Stock as of August 22, 2013, upon the acquisition of any additional shares by such person or group. In addition, the Company, its subsidiaries, employee benefit plans of the Company or any of its subsidiaries, and any entity holding Common Stock for or pursuant to the terms of any such plan, are excepted. Upon exercise of the Right in accordance with the Rights Agreement, the holder would be able to purchase a number of shares of Common Stock from the Company having an aggregate market value (as defined in the Rights

Agreement) equal to twice the then-current exercise price for an amount in cash equal to the then-current exercise price. The Rights will not prevent a takeover of our Company, but may cause substantial dilution to a person that acquires 10% or more of our Common Stock.

Table of Contents

7. Stock-Based Compensation

We grant stock-based compensation awards to employees and non-employee directors under our equity compensation plan. On May 18, 2012, our stockholders approved the J. C. Penney Company, Inc. 2012 Long-Term Incentive Plan (2012 Plan), reserving 7 million shares for future grants (1.5 million newly authorized shares plus up to 5.5 million reserved but unissued shares from our prior 2009 Long-Term Incentive Plan (2009 Plan)). In addition, shares underlying any outstanding stock award or stock option grant canceled prior to vesting or exercise become available for use under the 2012 Plan. The 2009 Plan terminated on May 18, 2012, except for outstanding awards, and all subsequent awards have been granted under the 2012 Plan. As of November 2, 2013, there were approximately 4.6 million shares of stock available for future grant under the 2012 Plan.

On March 4, 2013, we granted awards to employees consisting of approximately 70,000 stock options at an option price of $16.74 and a fair value of $7.88 per option and approximately 94,000 time-based restricted stock units (RSU’s) with a fair value of $16.74 per RSU award.

On April 3, 2013, we made an annual grant to employees consisting of approximately 3.3 million stock options at an option price of $14.43 and a fair value of $7.07 per option, approximately 621,000 time-based RSU’s with a fair value of $14.43 per RSU award and approximately 998,000 performance-based restricted stock units (PBRSU’s) with a fair value of $14.43 per PBRSU award. The number of PBRSU’s that ultimately vest is dependent on the achievement of a 2013 internal profitability target (performance condition).

During the second quarter of 2013, we granted approximately 74,000 stock options to employees at an option price of $18.98 and a fair value of $9.35 per option. Additionally, we granted approximately 77,000 time-based RSU's to employees with a fair value of $18.98 per RSU award as well as approximately 64,000 time-based RSU's to directors with a fair value of $18.72 per RSU award.

During the third quarter of 2013, we granted approximately 65,000 time-based RSU's to employees with a fair value of $13.20 per RSU award and approximately 9,000 time-based RSUs to directors with a fair value of $13.83 per RSU award.

The following table presents total stock-based compensation costs by line item in the unaudited Interim Consolidated Statements of Operations:

($ in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012

Amortization of prior service cost/(credit)	1	—	4	—
Net periodic benefit expense/(income)	$34	$51	$102	$167
Postretirement Health and Welfare Plan				
Service cost	$—	$—	$—	$—
Interest cost	1	—	1	1
Amortization of actuarial loss/(gain)	(1)	—	(1)	—
Amortization of prior service cost/(credit)	(2)	(4)	(6)	(11)
Net periodic benefit expense/(income)	$(2)	$(4)	$(6)	$(10)
Retirement Benefit Plans Total				
Service cost	$20	$21	$59	$68
Interest cost	55	64	163	196
Expected return on plan assets	(85)	(95)	(255)	(284)
Amortization of actuarial loss/(gain)	43	61	131	188
Amortization of prior service cost/(credit)	(1)	(4)	(2)	(11)
Net periodic benefit expense/(income)	$32	$47	$96	$157

Net periodic benefit expense/(income) for our noncontributory postretirement health and welfare plan is predominantly included in SG&A expense in the unaudited Interim Consolidated Statements of Operations.

Table of Contents

Curtailments

During the first half of 2012, we took actions to reduce our work force. During the third quarter of 2012, when substantially all employee exits were completed, we recorded a net curtailment gain of $7 million due to the reduction in the expected years of future service related to our retirement benefit plans. The net curtailment gain is included in the line item Restructuring and management transition in the unaudited Interim Consolidated Statements of Operations (see Note 9).

Defined Contribution Plans

Our defined contribution plans include a qualified Savings, Profit-Sharing and Stock Ownership Plan (401(k) plan), which includes a non-contributory retirement account, and a non-qualified contributory unfunded mirror savings plan offered to certain members of management. Total expense for our defined contribution plans for the third quarters of 2013 and 2012 was $12 million and $13 million, respectively, and was predominantly included in SG&A expenses in the unaudited Interim Consolidated Statements of Operations. Total expense for the first nine months of 2013 and 2012 was $38 million and $43 million, respectively.

9. Restructuring and Management Transition

The composition of restructuring and management transition charges was as follows:

($ in millions)	Three Months Ended		Nine Months Ended		Cumulative Amount Through
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012	November 2, 2013
Supply chain	$—	$3	$—	$19	$60
Home office and stores	(6)	4	26	105	180
Software and systems	—	—	—	36	36
Store fixtures	10	18	55	60	133
Management transition	3	6	32	36	203
Other	39	3	52	13	100
Total	$46	$34	$165	$269	$712

Supply chain

As a result of consolidating and streamlining our supply chain organization as part of a restructuring program that began in 2011, during the three and nine months ended October 27, 2012 we recorded charges of $3 million and $19 million, respectively, related to increased depreciation, termination benefits and unit closing costs. This restructuring activity was completed during the third quarter of 2012.

Home office and stores

During the three months ended November 2, 2013 and October 27, 2012, we recorded a $6 million credit and $4 million of net charges, respectively, associated with employee termination benefits for actions to reduce our store and home office expenses. The $6 million credit for the third quarter of 2013 resulted from termination benefits paid that were lower than expected primarily because employees found other positions within the Company and revisions were made to the restructuring plan. During the third quarter of 2012, when substantially all employee exits were completed, we recorded a net curtailment gain of $7 million (see Note 8). The net curtailment gain was more than offset by charges associated with employee termination benefits of $11 million. During the nine months ended November 2, 2013 and October 27, 2012, we recorded net charges of $26 million and $105 million, respectively, related to store and home office employee termination benefits.

Software and systems

During the nine months ended October 27, 2012, we recorded a charge of $36 million related to the disposal of software and systems that based on our evaluation no longer supported our then current strategy. Included in this amount is $3 million of consulting fees related to that evaluation.

Store fixtures

During the three months ended November 2, 2013, we recorded $2 million for the impairment of certain store fixtures related to our former shops strategy that were used in our prototype department store and $8 million of increased depreciation as a result of shortening the useful lives of fixtures in our department stores that were replaced during the

first nine months of 2013. During the nine months ended November 2, 2013, we recorded $7 million of charges for the write-off of store fixtures related to the renovations in our home department and $37 million of increased depreciation as a result of shortening the useful lives of

Table of Contents

fixtures in our department stores that were replaced during the first nine months of 2013. In addition, during the nine months ended November 2, 2013, we recorded $11 million of charges for the impairment of certain store fixtures related to our former shops strategy that were used in our prototype department store.

During the three months ended October 27, 2012, we recorded $11 million of charges related to the removal of store fixtures in our department stores. In addition, we recorded $7 million of increased depreciation as a result of shortening the useful lives of fixtures in our department stores that were replaced throughout 2013 with the build out of additional attractions. During the nine months ended October 27, 2012, we recorded charges of $60 million related to the write-off and increased depreciation for store fixtures that were replaced with new store attraction fixtures.

Management transition

During the three months ended November 2, 2013 and October 27, 2012, we implemented several changes within our management leadership team that resulted in management transition costs of $3 million and $6 million, respectively, for both incoming and outgoing members of management. During the nine months ended November 2, 2013 and October 27, 2012, we recorded management transition charges of $32 million and $36 million, respectively.

Other

During the three months ended November 2, 2013 and October 27, 2012, we recorded $39 million and $3 million, respectively, of miscellaneous restructuring charges. During the nine months ended November 2, 2013 and October 27, 2012, we recorded $52 million and $13 million, respectively, of miscellaneous restructuring charges. The charges during 2013 were primarily related to contract termination costs and other costs associated with our previous marketing and shops strategy, including a non-cash charge of $36 million during the third quarter relating to the return of shares of Martha Stewart Living Omnimedia Inc. previously acquired by the Company, which was accounted for as a cost investment (Note 5). The charges in the first quarter of 2012 were primarily related to the exit of our specialty websites CLAD™ and Gifting Grace™, and the charges in the second quarter of 2012 were primarily related to costs associated with the closing of our Pittsburgh, Pennsylvania customer call center.

Activity for the restructuring and management transition liability for the nine months ended November 2, 2013 was as follows:

($ in millions)	Supply Chain	Home Office and Stores	Store Fixtures	Management Transition	Other	Total
February 2, 2013	$2	$4	$—	$—	$12	$18
Charges	—	26 [(1)]	55	32	52	165
Cash payments	(2)	(27)	—	(16)	(15)	(60)
Non-cash	—	(2)	(55)	(16)	(36)	(109)
November 2, 2013	$—	$1	$—	$—	$13	$14

(1) Includes the $6 million credit in the third quarter of 2013 resulting from termination benefits paid that were lower than expected primarily because employees found other positions within the Company and revisions were made to the restructuring plan.

Non-cash amounts represent charges that do not result in cash expenditures including increased depreciation, write-off of store fixtures and a cost investment and stock-based compensation expense for accelerated vesting related to terminations.

Table of Contents

10. Real Estate and Other, Net

Real estate and other consists of ongoing operating income from our real estate subsidiaries whose investments are in REITs, as well as investments in joint ventures that own regional mall properties. Real estate and other also includes net gains from the sale of facilities and equipment that are no longer used in operations, asset impairments and other non-operating charges and credits. The composition of real estate and other, net was as follows:

($ in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Gain on sale or redemption of non-operating assets, net:				
Redemption of SPG REIT units	$—	$—	$—	$(200)
Sale of CBL & Associates Properties, Inc. (CBL) REIT shares	—	(15)	—	(15)
Sale of leveraged leases	—	(28)	—	(28)
Sale of investment in joint ventures	(23)	(151)	(85)	(151)
Sale of other non-operating assets	(1)	(3)	(1)	(3)
Net gain on sale or redemption of non-operating assets	(24)	(197)	(86)	(397)
Dividend income from REITs	—	(1)	—	(6)
Investment income from joint ventures	(1)	(3)	(5)	(9)
Gain on sale of operating assets	—	—	(18)	—
Other	(2)	4	(8)	—
Real estate and other (income)/expense, net	$(27)	$(197)	$(117)	$(412)

REIT Assets

On July 20, 2012, SPG redeemed two million of our REIT units at a price of $124.00 per unit for a total redemption price of $246 million, net of fees. As of the market close on July 19, 2012, the SPG REIT units had a fair market value of $158.13 per unit. In connection with the redemption, we realized a net gain of $200 million determined using the first-in-first-out method for determining the cost of REIT units sold. Following the transaction, we continue to hold approximately 205,000 REIT units in SPG.

On October 23, 2012, we sold all of our CBL REIT shares at a price of $21.35 per share for a total price of $40 million, net of fees. In connection with the sale, we realized a net gain of $15 million.

Leveraged Leases

During the third quarter of 2012, we sold all of our leveraged lease assets for $146 million, net of fees. The investments in the leveraged lease assets as of the dates of the sales were $118 million and we recorded a net gain of $28 million.

Joint Venture

During the third quarter of 2013, we sold our investment in three joint ventures for $32 million, resulting in a net gain of $23 million. During the second quarter of 2013, we sold our investment in a joint venture for $55 million, resulting in a net gain of $62 million. The gain exceeded the cash proceeds as a result of distributions of cash related to refinancing transactions in prior periods that were recorded as net reductions in the carrying amount of the investment. The net book value of the joint venture investment was a negative $7 million and was included in Other liabilities in the unaudited Interim Consolidated Balance Sheets.

During the third quarter of 2012, we sold our investments in four joint ventures for $90 million, resulting in net gains totaling $151 million. The gain exceeded the cash proceeds as a result of distributions of cash related to refinancing transactions in prior periods that were recorded as net reductions in the carrying amount of the investments. The

cumulative net book value of the joint venture investments was a negative $61 million.

Table of Contents

Other Non-Operating Assets

During the third quarter of 2013, we sold approximately 10 acres of excess land for net proceeds and gain of $1 million. During the third quarter of 2012, we sold a building used in our former drugstore operations for net proceeds and a gain of $3 million.

Operating Assets

During the first quarter of 2013, we sold our leasehold interest of a former department store location with a net book value of $2 million for net proceeds of $18 million, realizing a gain of $16 million. During the second quarter of 2013, we sold two properties, realizing a gain of $2 million.

11. Income Taxes

The income tax benefit for the three months ended November 2, 2013 was $11 million as compared to $88 million for the three months ended October 27, 2012. The effective tax rate for the three months ended November 2, 2013 was (2.2)% as compared to (41.7)% for the three months ended October 27, 2012. The income tax benefit for the nine months ended November 2, 2013 was $228 million compared to $301 million for the nine months ended October 27, 2012. The effective tax rate for the nine months ended November 2, 2013 was (13.8)% compared to (41.0)% for the nine months ended October 27, 2012. Our effective tax rate for the three and nine months ended November 2, 2013 was negatively impacted by increases to the tax valuation allowance for deferred tax assets of $184 million and $416 million, respectively.

In assessing the need for the valuation allowance, we considered both positive and negative evidence related to the likelihood of realization of the deferred tax assets. As a result of our assessment, we concluded that, beginning in the second quarter of 2013, our estimate of the realization of deferred tax assets would be based solely on the future reversals of existing taxable temporary differences and tax planning strategies that we would make use of to accelerate taxable income to utilize expiring carryforwards. Accordingly, in the third quarter of 2013, the valuation allowance was increased to offset the net deferred tax assets created in the quarter relating primarily to the increase in net operating loss carryforwards. A valuation allowance of $482 million has been recorded against our deferred tax assets as of November 2, 2013. This resulted in an increase to the valuation allowance during the quarter ended November 2, 2013 of $184 million, of which $154 million relates to the increase in the deferred tax assets created for federal net operating loss carryforwards and $30 million relates to deferred tax assets created for state net operating loss carryforwards.

As a result of the valuation allowance, for the three months ended November 2, 2013, we recorded a net tax benefit of only $11 million. The net tax benefit consists of a $16 million non-cash benefit relating to other comprehensive income, offset by state and foreign tax expenses of $3 million and $2 million of tax expense on the amortization of certain indefinite-lived intangible assets that were not available to offset existing deferred taxes. In accordance with accounting standards, we are required to allocate a portion of our tax provision between operating losses and accumulated other comprehensive income. Application of this guidance required the recognition of a non-cash income tax benefit of $16 million in operating results, offset by a $16 million charge to other comprehensive income for the quarter.

As of November 2, 2013, we have approximately $2.5 billion of net operating losses available for U.S. federal income tax purposes which expire in 2032 and 2033 for which a net deferred tax asset of $527 million has been recorded, net of a valuation allowance of $337 million. A net deferred tax asset of $50 million, net of a valuation allowance of $145 million, has been recorded for state net operating losses that expire at various dates through 2033.

12. Litigation, Other Contingencies and Guarantees

Litigation

Macy’s Litigation

On August 16, 2012, Macy’s, Inc. and Macy’s Merchandising Group, Inc. (together the Plaintiffs) filed suit against J. C. Penney Corporation, Inc. in the Supreme Court of the State of New York, County of New York, alleging that the Company tortiously interfered with, and engaged in unfair competition relating to a 2006 agreement between Macy’s and Martha Stewart Living Omnimedia, Inc. (MSLO) by entering into a partnership agreement with MSLO in December 2011. The Plaintiffs seek primarily to prevent the Company from implementing our partnership agreement

with MSLO as it relates to products in the bedding, bath, kitchen and cookware categories. The suit was consolidated with an already-existing breach of contract lawsuit by the Plaintiffs against MSLO, and a bench trial commenced on February 20, 2013. On March 7, 2013, the judge adjourned the trial until April 8, 2013, and ordered the parties into mediation. The parties did not reach a settlement, and the trial continued on April 8, 2013. The parties concluded their presentations of evidence on April 26, 2013, and completed post-trial briefs in late May, 2013. The court held closing arguments on August 1, 2013. The court has not yet issued a final decision in the case. On October 21, 2013, the Company and MSLO entered into an amendment of the partnership agreement, providing in part that the Company will not sell MSLO-designed merchandise in the bedding, bath, kitchen and cookware categories. While

Table of Contents

no assurance can be given as to the ultimate outcome of this matter, we currently believe that the final resolution of this action will not have a material adverse effect on our results of operations, financial position, liquidity or capital resources.

Other Legal Proceedings

We are subject to various legal and governmental proceedings involving routine litigation incidental to our business. Reserves have been established based on our best estimates of our potential liability in certain of these matters. These estimates have been developed in consultation with in-house and outside counsel. While no assurance can be given as to the ultimate outcome of these matters, management currently believes that the final resolution of these actions, individually or in the aggregate, will not have a material adverse effect on our results of operations, financial position, liquidity or capital resources.

Contingencies

As of November 2, 2013, we estimated our total potential environmental liabilities to range from $17 million to $24 million and recorded our best estimate of $18 million in other liabilities in the unaudited Interim Consolidated Balance Sheet as of that date. This estimate covered potential liabilities primarily related to underground storage tanks, remediation of environmental conditions involving our former drugstore locations and asbestos removal in connection with approved plans to renovate or dispose of our facilities. We continue to assess required remediation and the adequacy of environmental reserves as new information becomes available and known conditions are further delineated. If we were to incur losses at the upper end of the estimated range, we do not believe that such losses would have a material adverse effect on our results of operations, financial position, liquidity or capital resources.

Guarantees

As of November 2, 2013, we had a guarantee totaling $20 million for the maximum exposure on insurance reserves established by a former subsidiary included in the sale of our Direct Marketing Services business. In connection with the sale of the operations of our outlet stores, we assigned leases on 7 outlet store locations to the purchaser. In the event that the purchaser fails to make the required lease payments, we continue for a period of time to be liable for lease payments to each landlord of the 7 assigned leases. The purchaser’s obligations under the leases are guaranteed to us by certain principals and affiliates of the purchaser. However, the purchaser has elected to exit the outlet business and is expected to terminate the leases with the landlords. Consequently, we expect that our continuing obligations under each lease will be extinguished in connection with each termination. As of November 2, 2013, our maximum liability in connection with the assigned leases is $9 million.

In connection with the redemption of two million of our SPG REIT units, we agreed to make future capital contributions to SPG under certain circumstances. Capital contributions would be required only if (i) one or more unsecured senior notes or term loans of SPG are in default and (ii) the aggregate amount received and/or realized by the lenders with respect to such notes or loans upon the exhaustion of all other remedies available to them is less than the maximum amount of all capital contribution commitments of the Company and other parties with similar commitments. Our contribution obligation is subject to a maximum aggregate amount of $360 million, and is proportionate to our share of all similar commitments provided by the Company and other parties. Under certain circumstances, including the disposition of its remaining SPG REIT units, the Company can terminate its obligation. On November 19, 2013, our SPG REIT units were converted to shares and, as a result, the capital contribution obligation will terminate 90 days from that date. The possibility that we would be required to make a contribution is considered remote, and as such, no amount has been recorded in the unaudited Interim Consolidated Financial Statements.

13. Recently Issued Accounting Pronouncement

In July 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2013-11, Income Taxes (Topic 740) - Presentation of an Unrecognized Tax Benefit when a Net Operating Loss Carryforward or Tax Credit Carryforward Exists. This update provides that an entity’s unrecognized tax benefit, or a portion of its unrecognized tax benefit, should be presented in its financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, with one exception. That exception states that, to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes

that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. This update applies prospectively to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. Retrospective application is also permitted. This update is effective for annual periods, and interim periods within those years, beginning after December 15, 2013. We do not anticipate the adoption to have a material impact on our consolidated results operations, cash flows or financial position.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

J. C. Penney Company, Inc. is a holding company whose principal operating subsidiary is J. C. Penney Corporation, Inc. (JCP). JCP was incorporated in Delaware in 1924, and J. C. Penney Company, Inc. was incorporated in Delaware in 2002, when the holding company structure was implemented. The holding company has no independent assets or operations and no direct subsidiaries other than JCP. The holding company and its consolidated subsidiaries, including JCP, are collectively referred to in this quarterly report as "we," "us," "our," "ourselves" or the "Company," unless otherwise indicated.

The holding company is a co-obligor (or guarantor, as appropriate) regarding the payment of principal and interest on JCP's outstanding debt securities. The guarantee of certain of JCP's outstanding debt securities by the holding company is full and unconditional.

This discussion is intended to provide information that will assist the reader in understanding our financial statements, the changes in certain key items in those financial statements from period to period, and the primary factors that accounted for those changes, how operating results affect the financial condition and results of operations of our Company as a whole, as well as how certain accounting principles affect the financial statements. It should be read in conjunction with our consolidated financial statements as of February 2, 2013, and for the year then ended, and related Notes and Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), all contained in the Annual Report on Form 10-K for the fiscal year ended February 2, 2013 (2012 Form 10-K). Unless otherwise indicated, all references to earnings/(loss) per share (EPS) are on a diluted basis and all references to years relate to fiscal years rather than to calendar years.

Third Quarter Summary and Key Developments

For the third quarter of 2013, sales were $2,779 million, a decrease of 5.1% as compared to the corresponding quarter in 2012. Comparable store sales decreased 4.8% for the third quarter of 2013. Sales through jcp.com increased 24.5%, to $266 million.

For the third quarter of 2013, gross margin as a percentage of sales was 29.5% compared to 32.5% in the same period last year. The decrease in gross margin as a percentage of sales was primarily due to a change in the merchandise sales mix, which includes the impact of higher levels of clearance units sold at lower margins, including additional markdowns taken to sell through inventory associated with our previous strategy, as well as our transition back to a promotional pricing strategy as compared to last year's strategy.

Selling, general and administrative (SG&A) expenses decreased $81 million, or 7.5%, for the third quarter of 2013 as compared to the corresponding quarter in 2012 as we continue to realize the benefits from our cost savings initiatives.

In the third quarter of 2013, we recognized a tax benefit of $11 million, reflecting a significant reduction in tax benefits typically recognized from federal and state loss carryforwards due to the recognition of a tax valuation allowance of $184 million during the quarter. This resulted in an effective tax rate of only (2.2)% for the third quarter compared to (41.7)% in the third quarter of 2012 and negatively impacted EPS by $0.73.

For the third quarter of 2013, our net loss was $489 million, or $1.94 per share, compared to a net loss of $123 million, or $0.56 per share, for the corresponding prior year quarter. Results for this quarter included $46 million, or $0.18 per share, of restructuring and management transition charges, $25 million, or $0.04 per share, for the impact of our qualified defined benefit pension plan (Primary Pension Plan) expense and $24 million, or $0.09 per share, for the net gain on the sale of non-operating assets.

On October 1, 2013, we issued 84 million shares of common stock with a par value of $0.50 per share for $9.65 per share for total net proceeds of $786 million.

(1) Comparable store sales include sales from all stores that have been opened for 12 consecutive full fiscal months and Internet sales through jcp.com. Stores closed for an extended period are not included in comparable store sales calculations, while stores remodeled and minor expansions not requiring store closures remain in the calculations.

(2) See “Non-GAAP Financial Measures” below for a discussion of this non-GAAP measure and reconciliation to its most directly comparable GAAP financial measure and further information on its uses and limitations.

Non-GAAP Financial Measures

We report our financial information in accordance with generally accepted accounting principles in the United States (GAAP). However, we present certain financial measures and ratios identified as non-GAAP under the rules of the Securities and Exchange Commission (SEC) to assess our results. We believe the presentation of these non-GAAP financial measures and ratios is useful in order to better understand our financial performance as well as to facilitate the comparison of our results to the results of our peer companies. In addition, management uses these non-GAAP financial measures and ratios to assess the results of our operations. It is important to view non-GAAP financial measures in addition to, rather than as a substitute for, those measures and ratios prepared in accordance with GAAP. We have provided reconciliations of the most directly comparable GAAP measures to our non-GAAP financial

measures presented.

Table of Contents

The following non-GAAP financial measures are adjusted to exclude the impact of markdowns related to the alignment of inventory with our 2012 strategy, restructuring and management transition charges, the impact of our Primary Pension Plan expense, the loss on extinguishment of debt and the net gain on the sale or redemption of non-operating assets. Unlike other operating expenses, markdowns related to the alignment of inventory with our 2012 strategy, restructuring and management transition charges, loss on extinguishment of debt and the net gain on the sale or redemption of non-operating assets are not directly related to our ongoing core business operations. Primary Pension Plan expense is determined using numerous complex assumptions about changes in pension assets and liabilities that are subject to factors beyond our control, such as market volatility. Accordingly, we eliminate our Primary Pension Plan expense in its entirety as we view all components of net periodic benefit expense as a single, net amount, consistent with its presentation in our unaudited Interim Consolidated Financial Statements. We believe it is useful for investors to understand the impact of markdowns related to the alignment of inventory with our 2012 strategy, restructuring and management transition charges, the impact of our Primary Pension Plan expense, the loss on extinguishment of debt and the net gain on the sale or redemption of non-operating assets on our financial results and therefore are presenting the following non-GAAP financial measures: (1) adjusted operating income/(loss); (2) adjusted net income/(loss); and (3) adjusted diluted EPS.

Adjusted Operating Income/(Loss). The following table reconciles operating income/(loss), the most directly comparable GAAP financial measure, to adjusted operating income/(loss), a non-GAAP financial measure:

($ in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Operating income/(loss) (GAAP)	$(401)	$(156)	$(1,282)	$(565)
As a percent of sales	(14.4)%	(5.3)%	(15.9)%	(6.2)%
Add: markdowns - inventory strategy alignment	—	—	—	155
Add: restructuring and management transition charges	46	34	165	269
Add: primary pension plan expense	25	42	75	139
Less: net gain on sale or redemption of non-operating assets	(24)	(197)	(86)	(397)
Adjusted operating income/(loss) (non-GAAP)	$(354)	$(277)	$(1,128)	$(399)
As a percent of sales	(12.7)%	(9.5)%	(14.0)%	(4.4)%

Adjusted Net Income/(Loss) and Adjusted Diluted EPS. The following table reconciles net income/(loss) and diluted EPS, the most directly comparable GAAP financial measures, to adjusted net income/(loss) and adjusted diluted EPS, non-GAAP financial measures:

($ in millions, except per share data)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Net income/(loss) (GAAP)	$(489)	$(123)	$(1,423)	$(433)
Diluted EPS (GAAP)	$(1.94)	$(0.56)	$(6.17)	$(1.98)
Add: markdowns - inventory strategy alignment, net of tax of $-, $-, $- and $60	—	—	—	95 (1)
Add: restructuring and management transition charges, net of tax of $-, $13, $28 and $104	46 (2)	21 (1)	137 (3)	165 (1)
Add: primary pension plan expense, net of tax of $15, $16, $41 and $54	10 (4)	26 (1)	34 (4)	85 (1)

Add: loss on extinguishment of debt, net of tax of $-, $-, $- and $-	—		—		114	[2]	—	
Less: net gain on sale or redemption of non-operating assets, net of tax of $-, $70, $1 and $146	(24	)[5]	(127	)[6]	(85	)[5]	(251	)[6]
Adjusted net income/(loss) (non-GAAP)	$(457	)	$(203	)	$(1,223	)	$(339	)
Adjusted diluted EPS (non-GAAP)	$(1.81	)	$(0.93	)	$(5.30	)	$(1.55	)

Table of Contents

(1) Tax effect was calculated using the Company's statutory rate of 38.82%.

(2) Reflects no tax effect due to the impact of the Company's tax valuation allowance. Tax effect for the three months ended May 4, 2013 was calculated using the Company's statutory rate of 38.82%.

(3) The six months ended November 2, 2013 reflects no tax effect due to the impact of the Company's tax valuation allowance.

(4) Tax benefit for the three and six months ended November 2, 2013 is in accordance with the requirement that the Company's net zero tax provision be allocated between its operating loss and accumulated other comprehensive income. For the three months ended May 4, 2013, tax effect was calculated using the Company's statutory rate of 38.82%.

(5) Tax effect represents state taxes payable in separately filing states related to the sale of the non-operating assets.

(6) Tax effect was calculated using the effective tax rate for the transactions.

Total Net Sales

($ in millions)	Three Months Ended November 2, 2013	Three Months Ended October 27, 2012	Nine Months Ended November 2, 2013	Nine Months Ended October 27, 2012
Total net sales	$2,779	$2,927	$8,077	$9,101
Sales percent increase/(decrease):				
Total net sales	(5.1)%	(26.6)%	(11.3)%	(23.1)%
Comparable store sales	(4.8)%	(26.1)%	(11.2)%	(22.3)%

Total net sales decreased $148 million in the third quarter of 2013 compared to the third quarter of 2012. For the first nine months of 2013, total net sales decreased $1,024 million from the same period last year. The following table provides the components of the net sales decrease:

($ in millions)	Three Months Ended November 2, 2013	Nine Months Ended November 2, 2013
Comparable store sales increase/(decrease)	$(139)	$(1,017)
New and closed stores, net	(9)	(7)
Total net sales increase/(decrease)	$(148)	$(1,024)

Store Count

The following table compares the number of stores and gross selling space for the three and nine months ended November 2, 2013 and October 27, 2012:

	Three Months Ended November 2, 2013	Three Months Ended October 27, 2012	Nine Months Ended November 2, 2013	Nine Months Ended October 27, 2012
jcpenney department stores				
Beginning of period	1,095	1,101	1,104	1,102
Stores opened	—	7	—	9
Closed stores	—	(3)	(9)	(6)
End of period[1]	1,095	1,105	1,095	1,105
The Foundry Big and Tall Supply Co.(2)	10	10	10	10

(1) Gross selling space was 111 million square feet as of November 2, 2013 and and 112 million square feet as of October 27, 2012.

(2) Gross selling space was 51 thousand square feet as of November 2, 2013 and October 27, 2012.

In the third quarter of 2013, comparable store sales decreased 4.8% and Internet sales increased 24.5% to $266 million, with comparable store sales improving sequentially. Total net sales decreased 5.1% to $2,779

million compared with $2,927 million in last year's third quarter. For the first nine months of 2013, comparable store sales decreased 11.2% while comparable stores sales in last year's first nine months decreased 22.3%. Internet sales decreased 1.0%, to $698 million. Total net sales decreased 11.3% to $8,077 million compared with $9,101 million last year. The decline in sales is primarily related to the change in our pricing strategy at the beginning of 2012 that focused on everyday low prices and substantially eliminated promotional

Table of Contents

activities. During the first quarter of 2013, we began the process of returning the majority of our business to a promotional model. Internet sales experienced an increase during the quarter as compared to our stores primarily as a result of better in-stock merchandise positions, improvements in site performance and a favorable response to our promotional activity.

Based on a sample of our mall and off-mall stores, our store traffic decreased and conversion rate increased in the quarter compared to the third quarter last year. The number of store transactions and the total number of units decreased while the average number of units per transaction increased in the quarter as compared to the prior year corresponding period. All geographic regions and merchandise divisions experienced sales declines for the third quarter of 2013 compared to the prior year corresponding period. During the third quarter, the best performing divisions were women's apparel, women's accessories, including Sephora, men's apparel and jewelry.

The 2012 strategy emphasized brands in a shops presentation and introduced new merchandise brands. This re-merchandising effort has not resonated well with our customers so we are editing our existing merchandise assortments and undertaking several merchandise initiatives to make assortments more compelling to customers and to reintroduce some of our private brands. The largest implementation of the prior strategy was in the home department. These changes also did not resonate with our customers. As a result, we are making adjustments to our home merchandise assortments to present a better balance between traditional and modern home furnishings, a more balanced selection of good, better and best price points across key items, and merchandise arranged by category rather than brand.

Gross Margin

Gross margin for the third quarter of 2013 was $819 million, a decrease of $133 million compared to $952 million in the third quarter of 2012. Gross margin as a percentage of sales in the third quarter of 2013 was 29.5% compared to 32.5% in the third quarter of 2012. The 300 basis point decrease resulted from the following:

- higher levels of clearance units sold at lower margins, including additional markdowns taken to sell through inventory associated with our previous strategy, as well as our transition back to a promotional pricing strategy as compared to last year’s strategy (-364 basis points);
- lower levels of markdown accruals and inventory reserves (+95 basis points);
- re-ticketing costs as a result of moving back to a promotional strategy on selected merchandise (-16 basis points);
- increased vendor cost concessions (+14 basis points); and
- net change in other miscellaneous items, including the impact of shrinkage (-29 basis points).

Gross margin for the nine months ended November 2, 2013 was $2,418 million, a decrease of $724 million compared to $3,142 million for the nine months ended October 27, 2012. Gross margin as a percentage of sales for the nine months ended November 2, 2013 was 29.9% compared to 34.5% for the nine months ended October 27, 2012. The 460 basis point decrease resulted from the following:

- higher levels of clearance units sold at lower margins, as well as our transition back to a promotional pricing strategy compared to last year’s strategy (-400 basis points);
- re-ticketing costs as a result of moving back to a promotional strategy on selected merchandise (-39 basis points);
- reduced vendor cost concessions (-10 basis points); and
- net change in other miscellaneous items, including the impact of shrinkage (-11 basis points).

SG&A Expenses

For the three months ended November 2, 2013, SG&A expenses were $81 million lower compared to the three months ended October 27, 2012. As a percent of sales, SG&A expenses decreased to 36.2% compared to 37.1% in the third quarter of 2012. The net $81 million decrease primarily resulted from the following:

- lower advertising expenses (-$22 million);
- savings from lower utilities (-$15 million);
- savings from salaries and related benefits (-$13 million);

higher income from the jcpenney private label credit card activities, which is recorded as a reduction of our SG&A expenses (-$7 million); and

net decrease in other miscellaneous items (-$23 million).

For the nine months ended November 2, 2013, SG&A expenses were $187 million lower compared to the nine months ended October 27, 2012. As a percent of sales, SG&A expenses increased to 38.5% compared to 36.2% in the third quarter of 2012, as

Table of Contents

we were not able to leverage our expense reductions against lower sales. The net $187 million decrease primarily resulted from the following:

- savings from salaries and related benefits (-$48 million);
- savings from lower utilities (-$45 million);
- higher income from the jcpenney private label credit card activities, which is recorded as a reduction of our SG&A expenses (-$44 million);
- lower advertising expenses (-$22 million);
- savings from general store expense, support costs and rent (-$10 million); and
- net decrease in other miscellaneous items (-$18 million).

Pension Expense

($ in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Primary Pension Plan	$25	$42	$75	$139
Supplemental pension plans	9	9	27	28
Total pension expense	$34	$51	$102	$167

Total pension expense, which consists of our Primary Pension Plan expense and our supplemental pension plans expense, is based on our 2012 year-end measurement of pension plan assets and benefit obligations. Primary Pension Plan expense for the period decreased $17 million, to $25 million compared with $42 million in the third quarter of 2012. The decrease in Primary Pension Plan expense for 2013 is a result of lower amortization of our actuarial loss due to certain lump-sum settlements in 2012, lower service cost due to a decrease in the number of participants accruing benefits and strong asset performance in 2012. These decreases were partially offset by an approximately 60 basis point decrease in our discount rate and a 50 basis point decrease in our assumed expected return on assets. During the three months ended November 2, 2013 and October 27, 2012, supplemental pension plans expense was $9 million and $9 million, respectively. For the first nine months of 2013, our Primary Pension Plan expense decreased $64 million to $75 million and our supplemental pension plans expense decreased $1 million to $27 million.

Depreciation and Amortization Expense

Depreciation and amortization expense in the third quarter of 2013 increased $28 million to $161 million from $133 million for the comparable 2012 period. For the first nine months of 2013, depreciation and amortization increased $54 million to $440 million from $386 million last year. This increase is a result of our investment and replacement of store fixtures in connection with the implementation of our 2012 shops strategy. Depreciation and amortization expense for the three and nine months ended November 2, 2013 excludes $8 million and $37 million, respectively, of increased depreciation as a result of shortening the useful lives of store fixtures in our department stores that were replaced during 2013 with the build out of our home department and other attractions. For the three months ended October 27, 2012, depreciation and amortization excludes $7 million of increased depreciation. These amounts are included in the line Restructuring and management transition in the interim unaudited Interim Consolidated Statements of Operations.

Table of Contents

Restructuring and Management Transition

The composition of restructuring and management transition charges was as follows:

($ in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Supply chain	$—	$3	$—	$19
Home office and stores	(6)	4	26	105
Software and systems	—	—	—	36
Store fixtures	10	18	55	60
Management transition	3	6	32	36
Other	39	3	52	13
Total	$46	$34	$165	$269

Supply chain

As a result of consolidating and streamlining our supply chain organization as part of a restructuring program that began in 2011, during the three and nine months ended October 27, 2012 we recorded charges of $3 million and $19 million, respectively, related to increased depreciation, termination benefits and unit closing costs. This restructuring activity was completed during the third quarter of 2012.

Home office and stores

During the three months ended November 2, 2013 and October 27, 2012, we recorded a $6 million credit and $4 million of net charges, respectively, associated with employee termination benefits for actions to reduce our store and home office expenses. The $6 million credit for the third quarter of 2013 resulted from termination benefits paid that were lower than expected primarily because employees found other positions within the Company and revisions were made to the restructuring plan. During the third quarter of 2012, when substantially all employee exits were completed, we recorded a net curtailment gain of $7 million (see Note 8). The net curtailment gain was more than offset by charges associated with employee termination benefits of $11 million. During the nine months ended November 2, 2013 and October 27, 2012, we recorded net charges of $26 million and $105 million, respectively, related to store and home office employee termination benefits.

Software and systems

During the nine months ended October 27, 2012, we recorded a charge of $36 million related to the disposal of software and systems that based on our evaluation no longer supported our then current strategy. Included in this amount is $3 million of consulting fees related to that evaluation.

Store fixtures

During the three months ended November 2, 2013, we recorded $2 million for the impairment of certain store fixtures related to our former shops strategy that were used in our prototype department store and $8 million of increased depreciation as a result of shortening the useful lives of fixtures in our department stores that were replaced during the first nine months of 2013. During the nine months ended November 2, 2013, we recorded $7 million of charges for the write-off of store fixtures related to the renovations in our home department and $37 million of increased depreciation as a result of shortening the useful lives of fixtures in our department stores that were replaced during the first nine months of 2013. In addition, during the nine months ended November 2, 2013, we recorded $11 million of charges for the impairment of certain store fixtures related to our former shops strategy that were used in our prototype department store.

During the three months ended October 27, 2012, we recorded $11 million of charges related to the removal of store fixtures in our department stores. In addition, we recorded $7 million of increased depreciation as a result of

shortening the useful lives of fixtures in our department stores that were replaced throughout 2013 with the build out of additional shops. During the nine months ended October 27, 2012, we recorded charges of $60 million related to the write-off and increased depreciation for store fixtures that were replaced with new store attraction fixtures.

Management transition

During the three months ended November 2, 2013 and October 27, 2012, we implemented several changes within our management leadership team that resulted in management transition costs of $3 million and $6 million, respectively, for both incoming and outgoing members of management. During the nine months ended November 2, 2013 and October 27, 2012, we recorded management transition charges of $32 million and $36 million, respectively.

Table of Contents

Other

During the three months ended November 2, 2013 and October 27, 2012, we recorded $39 million and $3 million, respectively, of miscellaneous restructuring charges. During the nine months ended November 2, 2013 and October 27, 2012, we recorded $52 million and $13 million, respectively, of miscellaneous restructuring charges. The charges during 2013 were primarily related to contract termination costs and other costs associated with our previous marketing and shops strategy, including a non-cash charge of $36 million during the third quarter relating to the return of shares of Martha Stewart Living Omnimedia Inc. previously acquired by the Company, which was accounted for as a cost investment (Note 5). The charges in the first quarter of 2012 were primarily related to the exit of our specialty websites CLAD™ and Gifting Grace™, and the charges in the second quarter of 2012 were primarily related to costs associated with the closing of our Pittsburgh, Pennsylvania customer call center.

Real Estate and Other, Net

Real estate and other consists of ongoing operating income from our real estate subsidiaries whose investments are in real estate investment trusts (REITs), as well as investments in joint ventures that own regional mall properties. Real estate and other also includes net gains from the sale of facilities and equipment that are no longer used in operations, asset impairments and other non-operating charges and credits. The composition of real estate and other, net was as follows:

($ in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012

REIT Assets

On July 20, 2012, SPG redeemed two million of our REIT units at a price of $124.00 per unit for a total redemption price of $246 million, net of fees. As of the market close on July 19, 2012, the SPG REIT units had a fair market value of $158.13 per unit. In connection with the redemption, we realized a net gain of $200 million determined using the first-in-first-out method for determining the cost of REIT units sold. Following the transaction, we continue to hold approximately 205,000 REIT units in SPG.

On October 23, 2012, we sold all of our CBL REIT shares at a price of $21.35 per share for a total price of $40 million, net of fees. In connection with the sale, we realized a net gain of $15 million.

Leveraged Leases

During the third quarter of 2012, we sold all of our leveraged lease assets for $146 million, net of fees. The investments in the leveraged lease assets as of the dates of the sales were $118 million and we recorded a net gain of

$28 million.

Joint Venture

During the third quarter of 2013, we sold our investment in three joint ventures for $32 million, resulting in a net gain of $23 million. During the second quarter of 2013, we sold our investment in a joint venture for $55 million, resulting in a net gain of $62 million. The gain exceeded the cash proceeds as a result of distributions of cash related to refinancing transactions in prior periods that were recorded as net reductions in the carrying amount of the investment. The net book value of the joint venture investment was a negative $7 million and was included in Other liabilities in the unaudited Interim Consolidated Balance Sheets.

Table of Contents

During the third quarter of 2012, we sold our investments in four joint ventures for $90 million, resulting in net gains totaling $151 million. The gain exceeded the cash proceeds as a result of distributions of cash related to refinancing transactions in prior periods that were recorded as net reductions in the carrying amount of the investments. The cumulative net book value of the joint venture investments was a negative $61 million.

Other Non-Operating Assets

During the third quarter of 2013, we sold approximately 10 acres of excess land for net proceeds and a gain of $1 million. During the third quarter of 2012, we sold a building used in our former drugstore operations for net proceeds and a gain of $3 million.

Operating Assets

During the first quarter of 2013, we sold our leasehold interest of a former department store location with a net book value of $2 million for net proceeds of $18 million, realizing a gain of $16 million. During the second quarter of 2013, we sold two properties, realizing a gain of $2 million.

Operating Income/(Loss)

For the third quarter of 2013, we reported an operating loss of $401 million compared to an operating loss of $156 million in the prior year corresponding period. Excluding restructuring and management transition charges, the impact of our Primary Pension Plan expense and the net gain on the sale or redemption of non-operating assets, adjusted operating income/(loss) (non-GAAP) decreased $77 million to an adjusted operating loss of $354 million for the third quarter compared to an adjusted operating loss of $277 million for the prior year corresponding period.

For the nine months ended November 2, 2013, we reported an operating loss of $1,282 million compared to an operating loss of $565 million in the prior year corresponding period. Excluding the impact of markdowns related the alignment of inventory with our 2012 strategy, restructuring and management transition charges, the impact of our Primary Pension Plan expense and the net gain on the sale or redemption of non-operating assets, adjusted operating income/(loss) (non-GAAP) decreased $729 million to an adjusted operating loss of $1,128 million for the nine months ended November 2, 2013 compared to an adjusted operating loss of $399 million for the prior year corresponding period.

Loss on Extinguishment of Debt

During the second quarter of 2013, we paid $355 million to complete a cash tender offer and consent solicitation with respect to substantially all of our outstanding 7.125% Debentures due 2023. In doing so, we also recognized a loss on extinguishment of debt of $114 million, which included the premium paid over face value of the debentures of $110 million, reacquisition costs of $2 million and the write-off of unamortized debt issuance costs of $2 million.

Net Interest Expense

Net interest expense for the third quarters of 2013 and 2012 was $99 million and $55 million, respectively. For the nine months ended November 2, 2013, net interest expense was $255 million compared to $169 million in the prior year corresponding period. The increase in net interest expense for the periods is primarily related to the increased interest expense associated with the borrowings under our revolving credit facility and the $2.25 billion five-year senior secured term loan that was entered into on May 22, 2013.

Income Taxes

The income tax benefit for the three months ended November 2, 2013 was $11 million as compared to $88 million for the three months ended October 27, 2012. The effective tax rate for the three months ended November 2, 2013 was (2.2)% as compared to (41.7)% for the three months ended October 27, 2012. The income tax benefit for the nine months ended November 2, 2013 was $228 million compared to $301 million for the nine months ended October 27, 2012. The effective tax rate for the nine months ended November 2, 2013 was (13.8)% compared to (41.0)% for the nine months ended October 27, 2012. Our effective tax rate for the three and nine months ended November 2, 2013 was negatively impacted by increases to the tax valuation allowance for deferred tax assets of $184 million and $416 million, respectively.

In assessing the need for the valuation allowance, we considered both positive and negative evidence related to the likelihood of realization of the deferred tax assets. As a result of our assessment, we concluded that, beginning in the

second quarter of 2013, our estimate of the realization of deferred tax assets would be based solely on the future reversals of existing taxable temporary differences and tax planning strategies that we would make use of to accelerate taxable income to utilize expiring carryforwards. Accordingly, in the third quarter of 2013, the valuation allowance was increased to offset the net deferred tax assets created in the quarter relating primarily to the increase in net operating loss carryforwards. A valuation allowance of $482 million has been recorded against our deferred tax assets as of November 2, 2013. This resulted in an increase to the valuation allowance during the quarter ended November, 2013 of $184 million, of which $154 million relates to the increase in

Table of Contents

the deferred tax assets created for federal net operating loss carryforwards and $30 million relates to deferred tax assets created for state net operating loss carryforwards.

As a result of the valuation allowance, for the three months ended November 2, 2013, we recorded a net tax benefit of only $11 million. The net tax benefit consists of a $16 million non-cash benefit relating to other comprehensive income, offset by state and foreign tax expenses of $3 million and $2 million of tax expense on the amortization of certain indefinite-lived intangible assets that were not available to offset existing deferred taxes. In accordance with accounting standards, we are required to allocate a portion of our tax provision between operating losses and accumulated other comprehensive income. Application of this guidance required the recognition of a non-cash income tax benefit of $16 million in operating results, offset by a $16 million charge to other comprehensive income for the quarter.

Table of Contents

Liquidity and Capital Resources

Overview

Our primary sources of liquidity are cash generated from operations, available cash and cash equivalents and access to our revolving credit facility and the capital markets. As of the end of the third quarter of 2013, we had $1,227 million of cash and cash equivalents. On February 8, 2013, we entered into an amended and restated revolving credit facility (2013 Credit Facility) in an amount up to $1,850 million. During the first quarter of 2013, we borrowed $850 million under our 2013 Credit Facility of which $200 million was repaid during the third quarter of 2013. As of the end of the third quarter of 2013, we had $666 million available for future borrowing, of which $481 million is currently accessible due to the limitation of the fixed charge coverage ratio. In order to further enhance our liquidity position, on May 22, 2013, we closed on a $2.25 billion five-year senior secured term loan that is guaranteed by J. C. Penney Company, Inc. and certain subsidiaries of JCP, and is secured by mortgages on certain real estate of JCP and the guarantors, in addition to substantially all other assets of JCP and the guarantors. In addition, on October 1, 2013, we issued 84 million shares of common stock with a par value of $0.50 per share for net proceeds of $786 million. As of the end of the third quarter of 2013, our total available liquidity was approximately$1.7 billion. The future success of our business will depend on our ability to generate positive free cash flow (non-GAAP).

The following table provides a summary of our key components and ratios of financial condition and liquidity:

($ in millions)	Nine Months Ended November 2, 2013		October 27, 2012	
Cash and cash equivalents	$1,227		$525	
Merchandise inventory	3,747		3,362	
Property and equipment, net	5,753		5,493	
Total debt[1]	5,612		2,965	
Stockholders' equity	2,647		3,502	
Total capital	8,259		6,467	
Maximum capacity under our credit agreement	1,850		1,500	
Short-term borrowings under credit agreement	650		—	
Cash flow from operating activities	(2,197	)	(655	)
Free cash flow (non-GAAP)[2]	(2,992	)	(1,321	)
Capital expenditures[3]	814		580	
Dividends paid	—		86	
Ratios:				
Total debt-to-total capital[4]	68	%	46	%
Cash-to-total debt[5]	22	%	18	%

(1) Total debt includes long-term debt, including current maturities, capital leases, note payable and our current borrowing under our 2013 Credit Facility.

(2) See "Free Cash Flow" below for a reconciliation of this non-GAAP financial measure to its most directly comparable GAAP financial measure and further information on its uses and limitations.

(3) As of the end of the third quarters of 2013 and 2012, we had accrued capital expenditures of $102 million and $181 million, respectively.

(4) Total debt divided by total capitalization.

(5) Cash and cash equivalents divided by total debt.

Table of Contents

Free Cash Flow (Non-GAAP)

Free cash flow is a key financial measure of our ability to generate additional cash from operating our business and in evaluating our financial performance. We define free cash flow as cash flow from operating activities, less capital expenditures and dividends paid, plus the proceeds from the sale of operating assets. Free cash flow is a relevant indicator of our ability to repay maturing debt, revise our dividend policy or fund other uses of capital that we believe will enhance stockholder value. Free cash flow is considered a non-GAAP financial measure under the rules of the SEC. Free cash flow is limited and does not represent remaining cash flow available for discretionary expenditures due to the fact that the measure does not deduct payments required for debt maturities, pay-down of off-balance sheet pension debt, and other obligations or payments made for business acquisitions. Therefore, it is important to view free cash flow in addition to, rather than as a substitute for, our entire statement of cash flows and those measures prepared in accordance with GAAP.

The following table reconciles net cash provided by/(used in) operating activities, the most directly comparable GAAP financial measure, to free cash flow, a non-GAAP financial measure:

($ in millions)	Three Months Ended		Nine Months Ended	
	November 2, 2013	October 27, 2012	November 2, 2013	October 27, 2012
Net cash provided by/(used in) operating activities (GAAP)	$(737)	$(48)	$(2,197)	$(655)
Add:				
Proceeds from sale of operating assets	—	—	19	—
Less:				
Capital expenditures[1]	(161)	(341)	(814)	(580)
Dividends paid, common	—	—	—	(86)
Free cash flow (non-GAAP)	$(898)	$(389)	$(2,992)	$(1,321)

(1) As of the end of the third quarters of 2013 and 2012, we had accrued capital expenditures of $102 million and $181 million, respectively.

Free cash flow for the three months ended November 2, 2013 decreased $509 million to an outflow of $898 million compared to an outflow of $389 million in the same period last year. Free cash flow for the nine months ended November 2, 2013 decreased $1,671 million to an outflow of $2,992 million compared to an outflow of $1,321 million in the same period last year. The decrease was primarily a result of the decline in sales and resulting use of cash from operating activities during the period, increase in our inventory levels in preparation for the holiday season, as well as an increase in capital expenditures compared to last year. These decreases were partially offset by the discontinuation of our quarterly dividend of $0.20 per share on May 15, 2012.

Operating Activities

While a significant portion of our sales, profit and operating cash flows have historically been realized in the fourth quarter, our quarterly results of operations may fluctuate significantly as a result of many factors, including seasonal fluctuations in customer demand, product offerings, inventory levels and promotional activity.

For the three months ended November 2, 2013, cash flow from operating activities was an outflow of $737 million, a decrease of $689 million compared to an outflow of $48 million during the same period last year. Cash flow from operating activities for the nine months ended November 2, 2013, decreased $1,542 million to an outflow of $2,197 million compared to an outflow of $655 million for the same period last year. Our net loss for the nine months ended November 2, 2013 of $1,423 million includes significant expenses and charges that do not impact operating cash flow including depreciation and amortization, restructuring and management transition charges, pension expense and the loss on extinguishment of debt. The overall increased cash outflow from operations for the nine months ended November 2, 2013 related to a larger net loss for the period and the increase in inventory slightly offset by an increase in the corresponding merchandise payable. In addition, during the three months ended November 2, 2013, we received a $36 million payment from a landlord to terminate an existing lease prior to its original expiration date.

Merchandise inventory increased $385 million to $3,747 million, or 11.5%, as of the end of the third quarter of 2013 compared to $3,362 million as of the end of the third quarter last year. Compared to the end of fiscal year 2012, merchandise inventory increased $1,406 million, reflecting re-stocking of basics and private branded categories during the quarter in anticipation of the holiday seasons, as well as to replenish low inventory levels.

Table of Contents

Investing Activities

Investing activities for the nine months ended November 2, 2013 was a cash outflow of $707 million compared to an outflow of $64 million for the same period in 2012. The increase in the cash outflow from investing activities was primarily a result of increased capital expenditures and a decrease in proceeds from the sale or redemption of non-operating and operating assets.

Cash capital expenditures were $161 million and $814 million for the three and nine months ended November 2, 2013, respectively. In addition, as of the end of the third quarter of 2013, we also had $102 million of accrued capital expenditures. The capital expenditures for the first nine months of 2013 related primarily to the opening of the women's and kid's Joe Fresh® attractions in nearly 700 of our department stores, the opening of Disney® and giggleBaby™ in approximately 560 stores and renovations in our home department in approximately 500 of our department stores. During the three and nine months ended November 2, 2013, we opened 30 and 60, respectively, Sephora inside jcpenney stores.

Cash capital expenditures were $341 million and $580 million for the three and nine months ended October 27, 2012, respectively. In addition, as of the end of the third quarter of 2012, we also had $181 million of accrued capital expenditures. Capital expenditures during the third quarter of 2012 included furniture and fixtures relating to men's and women's jcp™ shops, women's Liz Claiborne® shops and Men's Izod® shops that launched on September 1, 2012. Capital expenditures during the second quarter of 2012 included furniture and fixtures relating to men's and women's The Original Arizona Jean Co.® shops and Levi's® shops that launched on August 1, 2012. During the nine months ended October 27, 2012, we opened 78 Sephora inside jcpenney stores and seven new department stores.

During the first nine months of 2013, we sold our investments in four real estate joint ventures, a leasehold interest in a former department store location and three properties for a total of $107 million in net proceeds.

In the third quarter of 2012, we received net proceeds of $279 million from the sale of non-operating assets including REIT shares, leveraged lease assets, investments in real estate joint ventures and a building used in our former drugstore operations. In the second quarter of 2012, SPG redeemed two million of our SPG REIT units at a cash price of $124 per unit for a total price of $246 million, net of fees.

We anticipate full year 2013 capital expenditures to be approximately $1.0 billion. Capital expenditures for the remainder of 2013 include accrued expenditures of $102 million at the end of the third quarter. We anticipate full year 2014 capital expenditures to be approximately $300 million.

Financing Activities

Financing activities for the nine months ended November 2, 2013 were an inflow of $3,201 million compared to an outflow of $263 million for the same period last year. During the third quarter of 2013, we issued 84 million shares of common stock with a par value of $0.50 per share for net proceeds of $786 million. During the second quarter of 2013, we received net proceeds of $2.18 billion from our senior secured term loan facility and completed the cash tender offer and consent solicitation with respect to our outstanding 7.125% Debentures due 2023 for $355 million. During the first quarter of 2013, we borrowed $850 million under our revolving credit facility of which $200 million was repaid during the third quarter of 2013.

On August 1, 2012, we repaid at maturity $230 million principal amount of 9% Notes Due 2012. Additionally, we made capital lease and financing payments totaling $13 million. As authorized by the Board, we paid quarterly dividends of $0.20 per share during the first half of 2012. On May 15, 2012, we announced that we had discontinued the quarterly $0.20 per share dividend, resulting in approximately $175 million in annual cash savings.

Cash Flow Outlook

During the first nine months of 2013, we enhanced our liquidity through the following transactions:

- During the first quarter of 2013, we borrowed $850 million under our revolving credit facility of which $200 million was repaid during the third quarter of 2013;
- On May 22, 2013, we closed on a $2.25 billion five-year senior secured term loan; and
- During the third quarter of 2013, we issued 84 million shares of common stock with a par value of $0.50 per share for net proceeds of $786 million.

For the remainder of 2013, we believe that our existing cash and cash equivalents will be adequate to fund our capital expenditures and working capital needs.

Our cash flows may be impacted by many factors including the economic environment, consumer confidence, competitive conditions in the retail industry and the success of our strategies.

Table of Contents

2013 Revolving Credit Facility

On February 8, 2013, J. C. Penney Company, Inc., JCP and J. C. Penney Purchasing Corporation (Purchasing) entered into an amended and restated revolving credit agreement in the amount up to $1,850 million (2013 Credit Facility), which replaces the Company's prior credit agreement entered into in January 2012, with largely the same syndicate of lenders under the previous agreement, with JPMorgan Chase Bank, N.A., as administrative agent. The 2013 Credit Facility matures on April 29, 2016, increases the letter of credit sublimit to $750 million and provides an accordion feature that could potentially increase the size of the facility by an additional amount not to exceed $400 million.

The 2013 Credit Facility is an asset-based revolving credit facility and is secured by a perfected first-priority security interest in substantially all of our eligible credit card receivables, accounts receivable and inventory. The 2013 Credit Facility is available for general corporate purposes, including the issuance of letters of credit. Pricing under the 2013 Credit Facility is tiered based on JCP's senior unsecured long-term credit ratings issued by Moody's Investors Service, Inc. and Standard & Poor's Ratings Services. JCP's obligations under the 2013 Credit Facility are guaranteed by J. C. Penney Company, Inc.

Availability under the 2013 Credit Facility is limited to a borrowing base which allows us to borrow up to 85% of eligible accounts receivable, plus 90% of eligible credit card receivables, plus 85% of the liquidation value of our inventory, net of certain reserves. Letters of credit reduce the amount available to borrow by their face value. In the event that availability under the 2013 Credit Facility is at any time less than the greater of (1) $125 million or (2) 10% of the lesser of the total facility or the borrowing base then in effect, for a period of at least 30 days, the Company will be subject to a fixed charge coverage ratio covenant of 1.0 to 1.0 which is calculated as of the last day of the quarter and measured on a trailing four-quarter basis.

On April 12, 2013, we borrowed $850 million under the 2013 Credit Facility of which $200 million was repaid during the third quarter of 2013. As of the end of the third quarter of 2013, $650 million of the borrowing remains outstanding. The borrowing bears interest at a rate of LIBOR plus 3.0%. As of the end of the third quarter of 2013, we had $534 million in standby and import letters of credit outstanding under the 2013 Credit Facility, the majority of which are standby letters of credit that support our merchandise initiatives and workers' compensation. None of the standby or import letters of credit have been drawn on. As of the end of the third quarter of 2013, we had $666 million available for future borrowing, of which $481 million is currently accessible due to the limitation of the fixed charge coverage ratio.

Credit Ratings

Our credit ratings and outlook as of December 2, 2013 were as follows:

	Corporate	Long-Term Debt	Outlook
Fitch Ratings	CCC	CCC	Negative
Moody's Investors Service, Inc.	Caa1	Caa1	Negative
Standard & Poor's Ratings Services	CCC+	CCC+	Negative

Credit rating agencies periodically review our capital structure and the quality and stability of our earnings. Rating agencies consider, among other things, changes in operating performance, comparable store sales, the economic environment, conditions in the retail industry, financial leverage and changes in our business strategy in their rating decisions. Downgrades to our long-term credit ratings could result in reduced access to the credit and capital markets and higher interest costs on future financings.

Contractual Obligations and Commitments

Aggregate information about our obligations and commitments to make future payments under contractual or contingent arrangements was disclosed in the 2012 Form 10-K. Our unrecorded contractual obligations related to merchandise have decreased approximately 21% since year end primarily due to the seasonality of our business and updates to our supplier base in the ordinary course of business.

Inflation

Our business is affected by general economic conditions, including rising petroleum, energy and cotton prices. Over the past few years, the retail industry has experienced some inflationary cost increases. Inflation impacted our results of operations primarily during the first quarter of 2012. This increase was driven primarily by rising costs for cotton

and petroleum based textiles for 2011 holiday and early 2012 spring goods. Beginning in the second quarter of 2012 and continuing through the end of the fiscal year, these pressures eased. During the first nine months of 2013, we did not experience inflationary cost increases, and we expect this trend to continue through the end of the year.

Table of Contents

Critical Accounting Policies

Management's discussion and analysis of our financial condition and results of operations is based upon our unaudited Interim consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and use judgments that affect reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. We base our estimates on historical experience and on other assumptions that are believed to be reasonable under the circumstances. On an ongoing basis, we evaluate estimates used, including those related to inventory valuation under the retail method, valuation of long-lived assets, estimation of reserves and valuation allowances specifically related to closed stores, insurance, income taxes, litigation and environmental contingencies and pension accounting. While actual results could differ from these estimates, we do not expect the differences, if any, to have a material effect on the unaudited Interim Consolidated Financial Statements.

There were no changes to our critical accounting policies during the nine months ended November 2, 2013. For a further discussion of the judgments we make in applying our accounting policies, see Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2012 Form 10-K.

We are providing the following disclosures regarding critical accounting estimates.

Valuation of Deferred Tax Assets

We account for income taxes using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets unless it is more likely than not such assets will be realized.

In assessing the need for a valuation allowance, we consider both positive and negative evidence related to the likelihood of the realization of the deferred tax assets based on future events. Our accounting for deferred tax consequences represents our best estimate of those future events. If based on the weight of available evidence, it is more likely than not (defined as a likelihood of more than 50%) the deferred tax assets will not be realized, we record a valuation allowance. The weight given to both positive and negative evidence is commensurate with the extent to which the evidence may be objectively verified. As such, it is generally difficult for positive evidence regarding projected future taxable income, exclusive of reversing taxable temporary differences, to outweigh objective negative evidence of recent losses. Cumulative losses in recent years is a significant piece of negative evidence that is difficult to overcome in determining that a valuation allowance is not needed against deferred tax assets.

This assessment is completed on a taxing jurisdiction basis and takes into account several types of evidence, including the following:

Nature, frequency, and severity of current and cumulative financial reporting losses. A pattern of recent losses is heavily weighted as a source of negative evidence. In certain circumstances, historical information may not be as relevant due to a change in circumstances.

Sources of future taxable income. Future reversals of existing temporary differences are heavily weighted sources of objectively verifiable positive evidence. Projections of future taxable income, exclusive of reversing temporary differences, are a source of positive evidence only when the projections are combined with a history of recent profits and can be reasonably estimated. Otherwise, these projections are considered inherently subjective and generally will not be sufficient to overcome negative evidence that includes cumulative losses in recent years, particularly if the projected future taxable income is dependent on an anticipated turnaround to profitability that has not yet been achieved. In such cases, we generally give these projections of future taxable income no weight for the purposes of our valuation allowance assessment.

Tax planning strategies. If necessary and available, tax-planning strategies would be implemented to accelerate taxable amounts to utilize expiring net operating loss carryforwards. These strategies would be a source of additional positive evidence and, depending on their nature, could be heavily weighted.

Table of Contents

In the second quarter, our net deferred tax position, exclusive of any valuation allowance, changed from a net deferred tax liability to a net deferred tax asset. In our assessment of the need for a valuation allowance, we heavily weighted the negative evidence of cumulative losses in recent periods and the positive evidence of future reversals of existing temporary differences. Although a sizable portion of our losses in recent years were the result of charges incurred for restructuring and other special items, even without these charges we still would have incurred significant losses. Accordingly, we considered our pattern of recent losses to be relevant to our analysis. Considering this pattern of recent losses and the uncertainties associated with projected future taxable income exclusive of reversing temporary differences, we gave no weight to projections showing future U.S. taxable income for purposes of assessing the need for a valuation allowance. As a result of our assessment, we concluded that, beginning in the second quarter of 2013, our estimate of the realization of deferred tax assets would be based solely on future reversals of existing taxable temporary differences and tax planning strategies that we would make use of to accelerate taxable income to utilize expiring carryforwards. Accordingly, valuation allowances were recorded in the second and third quarters to offset most of the deferred tax assets created.
Future book pre-tax losses will require additional valuation allowances to offset the deferred tax assets created. A sustained period of profitability is required before we would change our need for a valuation allowance against our net deferred tax assets. Changes in our current estimates, due to unanticipated events or otherwise, could have a material impact on our financial condition and results of operations.

See Note 11 to the unaudited Interim Consolidated Financial Statements for more information regarding income taxes and also “Risk Factors-The Company’s ability to use net operating loss carry-forwards to offset future taxable income for U.S. federal income tax purposes may be limited.”

Valuation of Long-Lived and Indefinite-Lived Assets
In 2012, we introduced a transformational strategy to become America’s favorite store. We underwent tremendous change as we began shifting our business model from a promotional department store to a specialty department store. The 2012 strategy emphasized brands in a shops presentation and introduced new merchandise brands. This re-merchandising effort did not resonate with our customers and our 2012 and 2013 sales, operating profit and cash flows declined significantly. As a result, we are editing our existing merchandise assortments, undertaking several merchandise initiatives and reintroducing certain of our private brands to make our assortments more compelling to customers. In addition, during the first quarter of 2013, we began the process of returning the majority of our business to a promotional model. As we return the majority of our business to a promotional model and complete our merchandise initiatives, we expect our sales, operating profit and cash flows to improve in the future, where the fourth quarter typically generates a significant portion of our sales, profit and operating cash flows for the fiscal year. If, however, operating performance reflects an other than temporary decline, we may incur impairment charges in the future, which could be material to our results of operations.

Long-Lived Assets
We evaluate recoverability of long-lived assets, such as property and equipment, whenever events or changes in circumstances indicate that the carrying value may not be recoverable, such as historical operating losses or plans to close stores and dispose of or sell long-lived assets before the end of their previously estimated useful lives. Additionally, for store assets, in the fourth quarter of each fiscal year, we separately test the performance of individual stores, and underperforming stores are selected for further evaluation of the recoverability of the carrying amounts. If the evaluation, performed on an undiscounted cash flow basis, indicates that the carrying amount of the asset may not be recoverable, the potential impairment is measured as the excess of carrying value over the fair value of the impaired asset. The impairment calculation requires us to apply estimates for future cash flows and use judgments for qualitative factors such as local market conditions, operating environment, mall performance and other trends. We estimate fair value based on either a projected discounted cash flow method using a discount rate that is considered commensurate with the risk inherent in our current business model or appraised value, as appropriate.

Indefinite-Lived Assets

We assess the recoverability of indefinite-lived intangible assets at least annually during the fourth quarter of our fiscal year or whenever events or changes in circumstances indicate that the carrying amount of the indefinite-lived intangible asset may not be fully recoverable. Examples of events or changes in circumstances include, but are not limited to, a decrease in the market price of the asset, a history of cash flow losses related to the use of the asset or a significant adverse change in the extent or manner in which an asset is being used. Under GAAP, we have the option to first perform a qualitative assessment in our evaluation of our indefinite-lived intangible assets in order to determine whether the fair value of the indefinite-lived intangible asset is more likely than not impaired. If a qualitative analysis is performed, we test our indefinite lived intangible assets utilizing the relief from royalty method to determine the fair value of the asset. The relief from royalty method estimates our theoretical royalty savings from ownership of the intangible asset. Key assumptions used in this model include discount rates, royalty rates, growth rates, sales projections and terminal value rates. Discount rates, royalty rates, growth rates and sales projections are the assumptions most sensitive and susceptible to change as they require significant management

Table of Contents

judgment. Discount rates used are similar to the rates estimated by the weighted average cost of capital considering any differences in company-specific risk factors. Royalty rates are established by management based on comparable trademark licensing agreements in the market. Operational management, considering industry and company-specific historical and projected data, develops growth rates and sales projections associated with each indefinite-lived intangible asset. Terminal value rate determination follows common methodology of capturing the present value of perpetual sales estimates beyond the last projected period assuming a constant weighted average cost of capital and long-term growth rates.

Recently Issued Accounting Pronouncements

Recently issued accounting pronouncements are discussed in Note 13 to the unaudited Interim Consolidated Financial Statements.

Seasonality

While a significant portion of our sales, profit and operating cash flows have historically been realized in the fiscal fourth quarter, our quarterly results of operations may fluctuate significantly as a result of many factors, including seasonal fluctuations in customer demand, product offerings, inventory levels and the impact of our strategies. The results of operations and cash flows for the nine months ended November 2, 2013 are not necessarily indicative of the results for future quarters or the entire year.

Cautionary Statement Regarding Forward-Looking Statements

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, which reflect our current view of future events and financial performance. The words expect, plan, anticipate, believe, intend, should, will and similar expressions identify forward-looking statements. Any such forward-looking statements are subject to known and unknown risks and uncertainties that may cause our actual results to be materially different from planned or expected results.

These risks and uncertainties include, but are not limited to, general economic conditions, including inflation, recession, unemployment levels, consumer confidence and spending patterns, credit availability and debt levels, changes in store traffic trends, the cost of goods, more stringent or costly payment terms and/or the decision by a significant number of vendors not to sell us merchandise on a timely basis or at all, trade restrictions, the ability to monetize non-core assets on acceptable terms, the ability to implement our turnaround strategy, customer acceptance of our new strategies, our ability to attract, motivate and retain key executives and other associates, the impact of cost reduction initiatives, our ability to generate or maintain liquidity, implementation of new systems and platforms, changes in tariff, freight and shipping rates, changes in the cost of fuel and other energy and transportation costs, increases in wage and benefit costs, competition and retail industry consolidations, interest rate fluctuations, dollar and other currency valuations, the impact of weather conditions, risks associated with war, an act of terrorism or pandemic, the ability of the federal government to fund and conduct its operations, a systems failure and/or security breach that results in the theft, transfer or unauthorized disclosure of customer, employee or Company information and legal and regulatory proceedings. There can be no assurances that the Company will achieve expected results, and actual results may be materially less than expectations. Furthermore, the Company typically earns a disproportionate share of its operating income in the fourth quarter due to holiday buying patterns, and such buying patterns are difficult to forecast with certainty. While we believe that our assumptions are reasonable, we caution that it is impossible to predict the degree to which any such factors could cause actual results to differ materially from predicted results.

For additional discussion on risks and uncertainties, see Item 1A, Risk Factors, in this Quarterly Report on Form 10-Q. We intend the forward-looking statements in this Quarterly Report on Form 10-Q to speak only as of the date of this report and do not undertake to update or revise these projections as more information becomes available.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks in the normal course of business due to changes in interest rates. Our market risks related to interest rates at November 2, 2013 are similar to those disclosed in the 2012 Form 10-K.

Item 4. Controls and Procedures

Based on their evaluation of our disclosure controls and procedures (as defined in Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this Quarterly Report on

Form 10-Q, our

Table of Contents

principal executive officer and principal financial officer concluded our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. There were no changes in our internal control over financial reporting during the third quarter ended November 2, 2013, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Part II. Other Information

Item 1. Legal Proceedings

Macy's Litigation

On August 16, 2012, Macy's, Inc. and Macy's Merchandising Group, Inc. (together the Plaintiffs) filed suit against J. C. Penney Corporation, Inc. in the Supreme Court of the State of New York, County of New York, alleging that the Company tortiously interfered with, and engaged in unfair competition relating to a 2006 agreement between Macy's and Martha Stewart Living Omnimedia, Inc. (MSLO) by entering into a partnership agreement with MSLO in December 2011. The Plaintiffs seek primarily to prevent the Company from implementing our partnership agreement with MSLO as it relates to products in the bedding, bath, kitchen and cookware categories. The suit was consolidated with an already-existing breach of contract lawsuit by the Plaintiffs against MSLO, and a bench trial commenced on February 20, 2013. On March 7, 2013, the judge adjourned the trial until April 8, 2013, and ordered the parties into mediation. The parties did not reach a settlement, and the trial continued on April 8, 2013. The parties concluded their presentations of evidence on April 26, 2013, and completed post-trial briefs in late May, 2013. The court held closing arguments on August 1, 2013. The court has not yet issued a final decision in the case. On October 21, 2013, the Company and MSLO entered into an amendment of the partnership agreement, providing in part that the Company will not sell MSLO-designed merchandise in the bedding, bath, kitchen and cookware categories. While no assurance can be given as to the ultimate outcome of this matter, we currently believe that the final resolution of this action will not have a material adverse effect on our results of operations, financial position, liquidity or capital resources.

Ozenne Derivative Lawsuit

On January 19, 2012, a purported shareholder of the Company, Everett Ozenne, filed a shareholder derivative lawsuit in the 193rd District Court of Dallas County, Texas, against certain of the Company's Board of Directors and executives. The Company is a nominal defendant in the suit. The lawsuit alleges breaches of fiduciary duties, corporate waste and unjust enrichment involving decisions regarding executive compensation, specifically that compensation paid to certain executive officers from 2008 to 2011 was too high in light of the Company's financial performance. The suit seeks damages including unspecified compensatory damages, disgorgement by the former officers of allegedly excessive compensation, and equitable relief to reform the Company's compensation practices. The Company and the named individuals filed an Answer and Special Exceptions to the lawsuit, arguing primarily that the plaintiff could not proceed with his suit because he failed to make demand on the Company's Board of Directors, and that because demand on the Board would not be futile, demand is not excused. The trial court heard arguments on the Special Exceptions on June 25, 2012, and denied them. The Company and named individuals filed a mandamus proceeding in the Fifth District Court of Appeals challenging the trial court's decision. The parties have settled the litigation and the appellate court stayed the appeal so that the trial court could review the proposed settlement. On August 5, 2013, the trial court preliminarily approved the settlement, and notice was mailed to shareholders soon thereafter. The trial court finally approved the settlement at a hearing on October 28, 2013 and, despite objection, awarded the plaintiff $3.1 million in attorneys' fees and costs. The Company and named individuals have appealed the award of attorneys' fees and costs. While no assurance can be given as to the ultimate outcome of this matter, we currently believe that the final resolution of this action will not have a material adverse effect on our results of operations, financial position, liquidity or capital resources.

Class Action Securities Litigation

From October 1, 2013 through October 24, 2013, four purported class action complaints were filed naming the Company, Myron E. Ullman, III and Kenneth H. Hannah as defendants, by the following plaintiffs, individually and on behalf of all others similarly situated, in the U.S. District Court, Eastern District of Texas, Tyler Division: Marcus (filed October 1, 2013), Erdem (filed October 7, 2013), Murphy (filed October 21, 2013) and Gilbert (filed October 24, 2013). The Marcus, Erdem and Gilbert complaints are purportedly brought on behalf of persons who acquired our common stock during the period from August 20, 2013 through September 26, 2013. The complaint filed by Murphy is purportedly brought on behalf of persons who acquired our securities, including common stock, debt securities, and purchasers of call and sellers of put options, during the period from May 16, 2013 through September 26, 2013, and also names William A. Ackman, a former member of the Board of Directors, as a defendant. The complaints allege

claims for violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. Plaintiffs claim that the defendants made false and misleading statements and/or omissions regarding the Company's financial condition and business prospects that caused our common stock to trade at artificially inflated prices. The complaints seek class certification, unspecified compensatory damages, including interest, reasonable costs and expenses, and other relief as the court may deem just and proper. On December 2, 2013, various parties filed motions with the court seeking consolidation of the pending cases and appointment of lead plaintiff. We believe these class action complaints are without merit and we intend to vigorously defend these lawsuits. While no assurance can be given as to the ultimate outcome of this matter, we currently believe that the final resolution of these actions will not have a material adverse effect on our results of operations, financial position, liquidity or capital resources.

Table of Contents

Shareholder Derivative Litigation

In October 2013, two purported shareholder derivative actions were filed against certain present and former members of the Company's Board of Directors and executives by the following parties in the U.S. District Court, Eastern District of Texas, Sherman Division: Weitzman (filed October 2, 2013) and Zauderer (filed October 3, 2013). The Company is named as a nominal defendant in both suits. The lawsuits assert claims for breaches of fiduciary duties and unjust enrichment based upon alleged false and misleading statements and/or omissions regarding the Company's financial condition. The lawsuits seek unspecified compensatory damages, restitution, disgorgement by the defendants of all profits, benefits and other compensation, equitable relief to reform the Company's corporate governance and internal procedures, reasonable costs and expenses, and other relief as the court may deem just and proper. On October 28, 2013, the Court consolidated the two cases into the Weitzman lawsuit. While no assurance can be given as to the ultimate outcome of this matter, we currently believe that the final resolution of this action will not have a material adverse effect on our results of operations, financial position, liquidity or capital resources.

Other Legal Proceedings

On October 7, 2013, the Company received a letter of inquiry from the Securities and Exchange Commission requesting information regarding the Company's liquidity, cash position, and debt and equity financing, as well as the Company's underwritten public offering of common stock announced on September 26, 2013. The Company is cooperating with the Securities and Exchange Commission in regards to its inquiry, including providing material requested by the Securities and Exchange Commission.

On November 9, 2013, the Company received a shareholder demand from a purported shareholder of the Company, Troy M. J. Baker, to conduct an investigation regarding potential claims that certain present and former members of the Company's Board of Directors and executives breached their fiduciary duties to the Company under Texas and/or Delaware law based upon allegations similar to those in the class action securities litigation and shareholder derivative litigation filed in October 2013 and to commence a civil action to recover for the Company's benefit the amount of damages allegedly sustained by the Company as a result of any such potential misconduct.

Item 1A. Risk Factors

The risk factors listed below update and supersede the risk factors associated with our business previously disclosed in Part II, Item 1A of our Quarterly Report on Form 10-Q for the fiscal quarter ended August 3, 2013.

Our ability to return to profitable growth is subject to both the risks affecting our business generally and the inherent difficulties associated with shifting our strategic plan.

In fiscal 2012, we made changes to our strategies that resulted in a pronounced decline in sales and resulted in significant variability between our financial expectations and actual results. We began shifting our strategies in the first quarter of fiscal 2013, but it may take longer than expected or planned to recover from our negative sales trends and operating results, and actual results may be materially less than planned. Our ability to improve our operating results depends upon a significant number of factors, some of which are beyond our control, including:

- customer response to our marketing and merchandise strategies;
- our ability to respond to competitive pressures in our industry;
- our ability to achieve profitable sales and to make adjustments in response to changing conditions;
- our ability to benefit from capital improvements made to our store environment;
- our ability to effectively manage inventory;
- the success of our cost reduction initiatives;
- our ability to respond to any unanticipated changes in expected cash flows, liquidity, cash needs and cash expenditures, including our ability to obtain any additional financing or other liquidity enhancing transactions, if and when needed;
- our ability to achieve positive cash flow;
- our ability to access adequate and uninterrupted supply of merchandise from suppliers at expected levels and on acceptable terms; and

general economic conditions.

There is no assurance that our pricing, branding, store layout, marketing and merchandising strategies, or any future adjustments to our strategies, will improve our operating results.

Table of Contents

We operate in a highly competitive industry that includes significant promotional activity, which could adversely impact our sales and profitability.

The retail industry is highly competitive, with few barriers to entry. We compete with many other local, regional and national retailers for customers, employees, locations, merchandise, services and other important aspects of our business. Those competitors include other department stores, discounters, home furnishing stores, specialty retailers, wholesale clubs, direct-to-consumer businesses, including those on the Internet, and other forms of retail commerce. Some competitors are larger than jcpenney, and/or have greater financial resources available to them, and, as a result, may be able to devote greater resources to sourcing, promoting and selling their products. Competition is characterized by many factors, including merchandise assortment, advertising, price, quality, service, location, reputation and credit availability. During fiscal 2012, we discontinued our former promotional strategy and encountered difficulties in communicating our value proposition. We have shifted our strategy in fiscal 2013 and are re-introducing certain promotional activities. However, we have experienced, and anticipate that we will continue to experience for at least the foreseeable future, significant competition from promotional activities of our competitors. The performance of competitors as well as changes in their pricing and promotional policies, marketing activities, new store openings, launches of Internet websites, brand launches and other merchandise and operational strategies could cause us to have lower sales, lower gross margin and/or higher operating expenses such as marketing costs and other selling, general and administrative expenses, which in turn could have an adverse impact on our profitability.

Our sales and operating results depend on our ability to develop merchandise offerings that resonate with our existing customers and help to attract new customers.

Our sales and operating results depend in part on our ability to predict and respond to changes in fashion trends and customer preferences in a timely manner by consistently offering stylish, quality merchandise assortments at competitive prices. We continuously assess emerging styles and trends and focus on developing a merchandise assortment to meet customer preferences. Even with these efforts, we cannot be certain that we will be able to successfully meet constantly changing customer demands. To the extent our predictions regarding our merchandise differ from our customers' preferences, we may be faced with reduced sales and excess inventories for some products and/or missed opportunities for others. Any sustained failure to identify and respond to emerging trends in lifestyle and customer preferences and buying trends could have an adverse impact on our business. In addition, merchandise misjudgments may adversely impact the perception or reputation of our Company, which could result in declines in customer loyalty and vendor relationship issues, and ultimately have a material adverse effect on our business, financial condition and results of operations.

Our ability to increase sales and store productivity is largely dependent upon our ability to increase customer traffic and conversion.

Customer traffic depends upon our ability to successfully market compelling merchandise assortments as well as present an appealing shopping environment and experience to existing customers and new customers. In fiscal 2012, our store customer traffic significantly decreased compared to the prior year. We are making changes to our strategy to increase customer traffic and improve conversion in our stores and online. There can be no assurance that our efforts to increase customer traffic and conversion will be successful or will result in increased sales. We may need to respond to any declines in customer traffic or conversion rates by increasing markdowns or promotions to attract customers to our stores, which could adversely impact our gross margins, operating results and cash flows from operating activities.

If we are unable to manage our inventory effectively, our gross margins could be adversely affected.

Our profitability depends upon our ability to manage appropriate inventory levels and respond quickly to shifts in consumer demand patterns. We must properly execute our inventory management strategies by appropriately allocating merchandise among our stores, timely and efficiently distributing inventory to stores, maintaining an appropriate mix and level of inventory in stores, adjusting our merchandise mix between our private and exclusive brands and national brands, appropriately changing the allocation of floor space of stores among product categories to respond to customer demand and effectively managing pricing and markdowns. If we overestimate customer demand for our merchandise, we will likely need to record inventory markdowns and move the excess inventory to be sold at

clearance prices which would negatively impact our gross margins and operating results. If we underestimate customer demand for our merchandise, we may experience inventory shortages which may result in missed sales opportunities and have a negative impact on customer loyalty.

Table of Contents

Disruptions in our Internet website, or our inability to successfully execute our online strategy, could have an adverse impact on our sales and results of operations.

We sell merchandise over the Internet through our website, www.jcp.com. As a result of a significant decline in sales volume through our website in fiscal 2012, we reorganized our Internet operations in fiscal 2013. However, it may take longer than expected or planned to recover from our negative online sales trends. Our Internet operations are also subject to numerous risks, including rapid technological change and the implementation of new systems and platforms; liability for online content; violations of state or federal laws, including those relating to online privacy; credit card fraud; problems associated with the operation of our website and related support systems; computer viruses; telecommunications failures; electronic break-ins and similar disruptions; and the allocation of inventory between our website and department stores. The failure of our website to perform as expected could result in disruptions and costs to our operations and make it more difficult for customers to purchase merchandise online. In addition, our inability to successfully develop and maintain the necessary technological interfaces for our customers to purchase merchandise through our website, including user friendly software applications for smart phones and tablets, could result in the loss in Internet sales and have an adverse impact on our results of operations.

The failure to retain, attract and motivate our employees, including employees in key positions, could have an adverse impact on our results of operations.

Our results depend on the contributions of our employees, including our senior management team and other key employees. This depends to a great extent on our ability to retain, attract and motivate talented employees throughout the organization, many of whom, particularly in the stores, are in entry level or part-time positions with historically high rates of turnover. Our ability to meet our changing labor needs while controlling our costs is also subject to external factors such as unemployment levels, competing wages and potential union organizing efforts. Because of our lower than expected operating results during fiscal 2012, we have not generally paid bonuses, and salary increases and incentive compensation opportunities could be limited. Any prolonged inability to provide salary increases or incentive compensation opportunities or substantial changes to our business model could have an adverse impact on our ability to attract, retain and motivate our employees. If we are unable to retain, attract and motivate talented employees with the appropriate skill sets, we may not achieve our objectives and our results of operations could be adversely impacted. In addition, the loss of one or more of our key personnel or the inability to effectively identify a suitable successor to a key role in our senior management could have a material adverse effect on our business.

The reduction and restructuring of our workforce may adversely impact our operating performance and operating efficiency.

As part of our cost reduction initiatives in fiscal 2012, we significantly reduced our corporate and operations headcount, including management level employees, and distribution and field employees. These reductions, combined with our voluntary early retirement plan initiated in 2011 and voluntary departures of employees, have resulted in a substantial amount of turnover of officers and line managers with specific knowledge relating to us, our operations and our industry that could be difficult to replace. We now operate with significantly fewer individuals who have assumed additional duties and responsibilities, which could have an adverse impact on our operating performance and operating efficiency.

We must protect against security breaches or other disclosures of private data of our customers as well as of our employees and other third parties.

As part of our normal operations, we receive and maintain personal information about our customers, our employees and other third parties. The confidentiality of all of our internal private data must at all times be protected against security breaches or other disclosure. We have systems and processes in place that are designed to protect information and protect against security and data breaches as well as fraudulent transactions and other activities. Despite our safeguards and security processes and protections, we cannot be assured that all of our systems and processes are free from vulnerability to security breaches or inadvertent data disclosure by third parties or us. Any failure to protect the confidential data of our customers or of our employees or other third parties could materially damage our brand and reputation as well as result in significant damage claims, any of which could have a material adverse impact on our business and results of operations.

Our operations are dependent on information technology systems; disruptions in those systems or increased costs relating to their implementation could have an adverse impact on our results of operations.

Table of Contents

Our operations are dependent upon the integrity, security and consistent operation of various systems and data centers, including the point-of-sale systems in the stores, our Internet website, data centers that process transactions, communication systems and various software applications used throughout our Company to track inventory flow, process transactions and generate performance and financial reports.

In May 2013, we implemented the initial phase of an integrated suite of products from a third party vendor to simplify our processes and reduce our use of customized existing legacy systems and expect to place additional systems into operation in the future. Implementing new systems carries substantial risk, including implementation delays, cost overruns, disruption of operations, potential loss of data or information, lower customer satisfaction resulting in lost customers or sales, inability to deliver merchandise to our stores or our customers, and the potential inability to meet reporting requirements. There can be no assurances that we will successfully launch the new systems as planned, that the new systems will perform as expected or that the new systems will be implemented without disruptions to our operations, any of which may cause critical information upon which we rely to be delayed, unreliable, corrupted, insufficient or inaccessible.

We also outsource various information technology functions to third party service providers and may outsource other functions in the future. We rely on those third party service providers to provide services on a timely and effective basis and their failure to perform as expected or as required by contract could result in disruptions and costs to our operations.

We are also implementing mobile point-of-service and enhanced standard point-of-service technologies to enable our employees to provide high quality service to our customers and to provide our customers a better experience. We may not be able to effectively implement these technologies or be successful in marketing them to our customers. Our new or upgraded technology might not provide the anticipated benefits, it might take longer than expected to realize the anticipated benefits, may cost more than the expected costs to implement or the technology might fail altogether.

Changes in our credit ratings may limit our access to capital markets and adversely affect our liquidity.

The credit rating agencies periodically review our capital structure and the quality and stability of our earnings, as a result of which we have experienced multiple corporate credit ratings downgrades. These downgrades, and any future downgrades, to our long-term credit ratings could result in reduced access to the credit and capital markets and higher interest costs on future financings. The future availability of financing will depend on a variety of factors, such as economic and market conditions, the availability of credit and our credit ratings, as well as the possibility that lenders could develop a negative perception of us. If required, we may not be able to obtain additional financing, on favorable terms or at all.

Our profitability depends on our ability to source merchandise and deliver it to our customers in a timely and cost-effective manner.

Our merchandise is sourced from a wide variety of suppliers, and our business depends on being able to find qualified suppliers and access products in a timely and efficient manner. Inflationary pressures on commodity prices and other input costs could increase our cost of goods, and an inability to pass such cost increases on to our customers or a change in our merchandise mix as a result of such cost increases could have an adverse impact on our profitability. Additionally, the impact of current and future economic conditions on our suppliers cannot be predicted and may cause our suppliers to be unable to access financing or become insolvent and thus become unable to supply us with products.

Our arrangements with our suppliers and vendors may be impacted by our financial results or financial position.

Substantially all of our merchandise suppliers and vendors sell to us on open account purchase terms. There is a risk that our key suppliers and vendors could respond to any actual or apparent decrease in or any concern with our financial results or liquidity by requiring or conditioning their sale of merchandise to us on more stringent or more costly payment terms, such as by requiring standby letters of credit, earlier or advance payment of invoices, payment upon delivery or other assurances or credit support or by choosing not to sell merchandise to us on a timely basis or at all. Our arrangements with our suppliers and vendors may also be impacted by media reports regarding our financial position. Our need for additional liquidity could significantly increase and our supply of merchandise could be materially disrupted if a significant portion of our key suppliers and vendors took one or more of the actions described above, which could have a material adverse effect on our sales, customer satisfaction, cash flows, liquidity and

financial position.

Our senior secured term loan credit facility is secured by certain of our real property and substantially all of our personal property, and such property may be subject to foreclosure or other remedies in the event of our default. In addition, the term loan credit facility contains provisions that could restrict our operations and our ability to obtain additional financing.

Table of Contents

In May 2013, we entered into a $2.25 billion senior secured term loan credit facility that is secured by mortgages on certain real property of the Company, in addition to liens on substantially all personal property of the Company, subject to certain exclusions set forth in the credit and security agreement governing the term loan credit facility and related security documents. The real property subject to mortgages under the term loan credit facility includes our headquarters, distribution centers and certain of our stores.

The credit and guaranty agreement governing the term loan credit facility contains operating restrictions which may impact our future alternatives by limiting, without lender consent, our ability to borrow additional funds, execute certain equity financings or enter into dispositions or other liquidity enhancing or strategic transactions regarding certain of our assets, including our real property. Our ability to obtain additional or other financing or to dispose of certain assets could also be negatively impacted because a substantial portion of our owned assets have been pledged as collateral for repayment of our indebtedness under the term loan credit facility.

If an event of default occurs and is continuing, our outstanding obligations under the term loan credit facility could be declared immediately due and payable or the lenders could foreclose on or exercise other remedies with respect to the assets securing the term loan credit facility, including our headquarters, distribution centers and certain of our stores. If an event of default occurs, there is no assurance that we would have the cash resources available to repay such accelerated obligations or refinance such indebtedness on commercially reasonable terms, or at all. The occurrence of any one of these events could have a material adverse effect on our business, financial condition, results of operations and liquidity.

Our revolving credit facility limits our borrowing capacity to the value of certain of our assets. In addition, our revolving credit facility is secured by certain of our personal property, and lenders may exercise remedies against the collateral in the event of our default.

In February 2013, we amended and restated our existing revolving credit facility to increase the aggregate lending commitments to $1.85 billion. Our borrowing capacity under our revolving credit facility varies according to the Company’s inventory levels, accounts receivable and credit card receivables, net of certain reserves. In the event of any material decrease in the amount of or appraised value of these assets, our borrowing capacity would similarly decrease, which could adversely impact our business and liquidity. In April 2013, we borrowed $850 million under the revolving credit facility, of which $200 million was repaid in October 2013.

Our revolving credit facility contains customary affirmative and negative covenants and certain restrictions on operations become applicable if our availability falls below certain thresholds. These covenants could impose significant operating and financial limitations and restrictions on us, including restrictions on our ability to enter into particular transactions and to engage in other actions that we may believe are advisable or necessary for our business. In addition, the revolving credit facility provides for a springing fixed charge coverage ratio if our availability falls below a specified threshold.

Our obligations under the revolving credit facility are secured by liens with respect to inventory, accounts receivable, deposit accounts and certain related collateral. In the event of a default that is not cured or waived within any applicable cure periods, the lenders’ commitment to extend further credit under our revolving credit facility could be terminated, our outstanding obligations could become immediately due and payable, outstanding letters of credit may be required to be cash collateralized and remedies may be exercised against the collateral, which generally consists of the Company’s inventory, accounts receivable and deposit accounts and cash credited thereto. If we are unable to borrow under our revolving credit facility, we may not have the necessary cash resources for our operations and, if any event of default occurs, there is no assurance that we would have the cash resources available to repay such accelerated obligations, refinance such indebtedness on commercially reasonable terms, or at all, or cash collateralize our letters of credit, which would have a material adverse effect on our business, financial condition, results of operations and liquidity.

Our level of indebtedness may adversely affect our business and results of operations and may require the use of our available cash resources to meet repayment obligations, which could reduce the cash available for other purposes.

As of November 2, 2013, we have approximately $5.612 billion in total indebtedness and are highly leveraged. Our level of indebtedness may limit our ability to obtain additional financing, if needed, to fund additional projects, working capital requirements, capital expenditures, debt service, and other general corporate or other obligations, as

well as increase the risks to our business associated with general adverse economic and industry conditions. Our level of indebtedness may also place us at a competitive disadvantage to our competitors that are not as highly leveraged. We are required to make quarterly repayments in a principal amount equal to $5.625 million during the five-year term of the term loan credit facility, beginning September 30, 2013, subject to certain reductions for mandatory and optional prepayments.

Table of Contents

In addition, we are required to make prepayments of the term loan credit facility with the proceeds of certain asset sales, insurance proceeds and excess cash flow, which will reduce the cash available for other purposes and could impact our ability to reinvest in other areas of our business.

We cannot assure that our internal and external sources of liquidity will at all times be sufficient for our cash requirements.

We must have sufficient sources of liquidity to fund our working capital requirements, capital improvement plans, service our outstanding indebtedness and finance investment opportunities. The principal sources of our liquidity are funds generated from operating activities, available cash and cash equivalents, borrowings under our credit facilities, other debt financings and sales of non-operating assets. Our recent operating losses have limited our capital resources. Our ability to achieve our business and cash flow plans is based on a number of assumptions which involve significant judgments and estimates of future performance, borrowing capacity and credit availability, which cannot at all times be assured. Accordingly, we cannot assure that cash flows from operations and other internal and external sources of liquidity will at all times be sufficient for our cash requirements. If necessary, we may need to consider actions and steps to improve our cash position and mitigate any potential liquidity shortfall, such as modifying our business plan, pursuing additional financing to the extent available, reducing capital expenditures, pursuing and evaluating other alternatives and opportunities to obtain additional sources of liquidity and other potential actions to reduce costs. We cannot assure that any of these actions would be successful, sufficient or available or available on favorable terms. Any inability to generate or obtain sufficient levels of liquidity to meet our cash requirements at the level and times needed could have a material adverse impact on our business and financial position.

Our ability to obtain any additional financing or any refinancing of our debt, if needed at any time, depends upon many factors, including our existing level of indebtedness and restrictions in our debt facilities, historical business performance, financial projections, prospects and creditworthiness and external economic conditions and general liquidity in the credit and capital markets. Any additional debt, equity or equity-linked financing may require modification of our existing debt agreements, which we cannot assure would be obtainable. Any additional financing or refinancing could also be extended only at higher costs and require us to satisfy more restrictive covenants, which could further limit or restrict our business and results of operations, or be dilutive to our stockholders.

Operating results and cash flows may cause us to incur asset impairment charges.

Long-lived assets, primarily property and equipment, are reviewed at the store level at least annually for impairment, or whenever changes in circumstances indicate that a full recovery of net asset values through future cash flows is in question. We also assess the recoverability of indefinite-lived intangible assets at least annually or whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. Our impairment review requires us to make estimates and projections regarding, but not limited to, sales, operating profit and future cash flows. In fiscal 2012, we shifted our business model from a promotional department store to a specialty department store and our 2012 and 2013 sales, operating profit and cash flows have declined significantly. During the first quarter of 2013, we began the process of returning the majority of our business to a promotional model. In addition, we are undertaking several merchandise initiatives to make our assortments more compelling to customers. If, taking into account the results of our fiscal fourth quarter, our operating performance reflects a sustained decline, we may be exposed to significant asset impairment charges in the fourth quarter, which could be material to our results of operations.

We are subject to risks associated with importing merchandise from foreign countries.

A substantial portion of our merchandise is sourced by our vendors and by us outside of the United States. All of our suppliers must comply with our supplier legal compliance program and applicable laws, including consumer and product safety laws. Although we diversify our sourcing and production by country and supplier, the failure of a supplier to produce and deliver our goods on time, to meet our quality standards and adhere to our product safety requirements or to meet the requirements of our supplier compliance program or applicable laws, or our inability to flow merchandise to our stores or through the Internet channel in the right quantities at the right time could adversely affect our profitability and could result in damage to our reputation.

Although we have implemented policies and procedures designed to facilitate compliance with laws and regulations relating to doing business in foreign markets and importing merchandise from abroad, there can be no assurance that

suppliers and other third parties with whom we do business will not violate such laws and regulations or our policies, which could subject us to liability and could adversely affect our results of operations.

We are subject to the various risks of importing merchandise from abroad and purchasing product made in foreign countries, such as

Table of Contents

potential disruptions in manufacturing, logistics and supply;
changes in duties, tariffs, quotas and voluntary export restrictions on imported merchandise;
strikes and other events affecting delivery;
consumer perceptions of the safety of imported merchandise;
product compliance with laws and regulations of the destination country;
product liability claims from customers or penalties from government agencies relating to products that are recalled, defective or otherwise noncompliant or alleged to be harmful;
concerns about human rights, working conditions and other labor rights and conditions and environmental impact in foreign countries where merchandise is produced and raw materials or components are sourced, and changing labor, environmental and other laws in these countries;
local business practice and political issues that may result in adverse publicity or threatened or actual adverse consumer actions, including boycotts;
compliance with laws and regulations concerning ethical business practices, such as the U.S. Foreign Corrupt Practices Act; and
economic, political or other problems in countries from or through which merchandise is imported.

Political or financial instability, trade restrictions, tariffs, currency exchange rates, labor conditions, transport capacity and costs, systems issues, problems in third party distribution and warehousing and other interruptions of the supply chain, compliance with U.S. and foreign laws and regulations and other factors relating to international trade and imported merchandise beyond our control could affect the availability and the price of our inventory. A significant amount of merchandise we offer for sale is made in China and accordingly, a revaluation of the Chinese currency, or a lessening of Chinese governmental control of the exchange rate for that currency, in each case leading to an increase in its value relative to the U.S. dollar, could potentially result in a significant increase in the cost of inventory. These risks and other factors relating to foreign trade could subject us to liability or hinder our ability to access suitable merchandise on acceptable terms, which could adversely impact our results of operations.

Our Company’s growth and profitability depend on the levels of consumer confidence and spending.

Our results of operations are sensitive to changes in overall economic and political conditions that impact consumer spending, including discretionary spending. Many economic factors outside of our control, including the housing market, interest rates, recession, inflation and deflation, energy costs and availability, consumer credit availability and terms, consumer debt levels, tax rates and policy, and unemployment trends influence consumer confidence and spending. The domestic and international political situation and actions also affect consumer confidence and spending. Additional events that could impact our performance include pandemics, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, political instability and civil unrest. Declines in the level of consumer spending could adversely affect our growth and profitability.

Our business is seasonal, which impacts our results of operations.

Our annual earnings and cash flows depend to a great extent on the results of operations for the last quarter of our fiscal year, which includes the holiday season. Our fiscal fourth-quarter results may fluctuate significantly, based on many factors, including holiday spending patterns and weather conditions. This seasonality causes our operating results to vary considerably from quarter to quarter.

Our profitability may be impacted by weather conditions.

Our merchandise assortments reflect assumptions regarding expected weather patterns and our profitability depends on our ability to timely deliver seasonally appropriate inventory. Unseasonable or unexpected weather conditions such as warm temperatures during the winter season or prolonged or extreme periods of warm or cold temperatures could render a portion of our inventory incompatible with consumer needs. Extreme weather or natural disasters could also severely hinder our ability to timely deliver seasonally appropriate merchandise, delay capital improvements or cause us to close stores. A reduction in the demand for or supply of our seasonal merchandise could have an adverse effect on our inventory levels, gross margins and results of operations.

Changes in federal, state or local laws and regulations could increase our expenses and adversely affect our results of operations.

45

Table of Contents

Our business is subject to a wide array of laws and regulations. The current political environment, financial reform legislation, the current high level of government intervention and activism, regulatory reform and stockholder activism may result in substantial new regulations and disclosure obligations, which may lead to additional compliance costs as well as the diversion of our management's time and attention from strategic initiatives. If we fail to comply with applicable laws and regulations we could be subject to legal risk, including government enforcement action and class action civil litigation that could increase our cost of doing business. Changes in the regulatory environment regarding topics such as privacy and information security, product safety or environmental protection, including regulations in response to concerns regarding climate change, collective bargaining agreements and health care mandates, among others, could also cause our compliance costs to increase and adversely affect our results of operations.

Legal and regulatory proceedings could have an adverse impact on our results of operations.

Our Company is subject to various legal and regulatory proceedings relating to our business, certain of which may involve jurisdictions with reputations for aggressive application of laws and procedures against corporate defendants. We are impacted by trends in litigation, including class action litigation brought under various consumer protection, employment, and privacy and information security laws. In addition, litigation risks related to claims that technologies we use infringe intellectual property rights of third parties have been amplified by the increase in third parties whose primary business is to assert such claims. Reserves are established based on our best estimates of our potential liability. However, we cannot accurately predict the ultimate outcome of any such proceedings due to the inherent uncertainties of litigation. Regardless of the outcome or whether the claims are meritorious, legal and regulatory proceedings may require that we devote substantial time and expense to defend our Company. Unfavorable rulings could result in a material adverse impact on our business, financial condition or results of operations.

Significant changes in discount rates, actual investment return on pension assets, and other factors could affect our earnings, equity, and pension contributions in future periods.

Our earnings may be positively or negatively impacted by the amount of income or expense recorded for our qualified pension plan. Generally accepted accounting principles in the United States of America (GAAP) require that income or expense for the plan be calculated at the annual measurement date using actuarial assumptions and calculations. The most significant assumptions relate to the capital markets, interest rates and other economic conditions. Changes in key economic indicators can change the assumptions. Two critical assumptions used to estimate pension income or expense for the year are the expected long-term rate of return on plan assets and the discount rate. In addition, at the measurement date, we must also reflect the funded status of the plan (assets and liabilities) on the balance sheet, which may result in a significant change to equity through a reduction or increase to other comprehensive income. Although GAAP expense and pension contributions are not directly related, the key economic factors that affect GAAP expense would also likely affect the amount of cash we could be required to contribute to the pension plan. Potential pension contributions include both mandatory amounts required under federal law and discretionary contributions to improve a plan's funded status.

Provisions in our charter and bylaws, Delaware law, and our stockholder rights plan could delay and discourage takeover attempts that stockholders may consider favorable.

Certain provisions of our Restated Certificate of Incorporation, as amended, and Bylaws, as amended, and applicable provisions of Delaware corporate law, could make it more difficult for a third party to acquire control of us or have the effect of discouraging a third party from attempting to acquire control of us. Our Restated Certificate of Incorporation authorizes our Board of Directors to issue preferred stock, which could be issued as a defensive measure in response to a takeover proposal. In addition, our Bylaws provide that special meetings of our stockholders may only be called by the Board of Directors. We are also subject to Section 203 of the Delaware General Corporation Law, which prohibits a person who owns in excess of 15% of our outstanding voting stock from merging or combining with us for a period of three years after the date of the transaction in which the person acquired in excess of 15% of our outstanding voting stock, unless the merger or combination is approved in a prescribed manner. In addition, the fact that our ability to utilize our tax net operating losses could be adversely affected by a change in control could have an anti-takeover effect.

We adopted a stockholder rights plan in August 2013 that could make it more difficult for a third party to acquire, or could discourage a third party from acquiring, our Company or a large block of our common stock. A third party that acquires 10% or more of our common stock could suffer substantial dilution of its ownership interest under the terms of the stockholder rights plan through the issuance of common stock or common stock equivalents to all stockholders other than the acquiring person.

The foregoing provisions may adversely affect the marketability of the common stock by discouraging potential investors from acquiring our stock. In addition, these provisions could delay or frustrate the removal of incumbent directors and could make

Table of Contents

more difficult a merger, tender offer or proxy contest involving us, or impede an attempt to acquire a significant or controlling interest in us, even if such events might be beneficial to us and our stockholders.

Our stock price has been and may continue to be volatile.

The market price of our common stock has fluctuated substantially and may continue to fluctuate significantly. Future announcements or disclosures concerning us or any of our competitors, our strategic initiatives, our sales and profitability, our financial condition, any quarterly variations in actual or anticipated operating results or comparable sales, any failure to meet analysts' expectations and sales of large blocks of our common stock, among other factors, could cause the market price of our common stock to fluctuate substantially. In addition, the stock market has experienced price and volume fluctuations that have affected the market price of many retail and other stocks and that have often been unrelated or disproportionate to the operating performance of these companies. Securities class action litigation has often been instituted against companies following periods of volatility in the overall market and in the market price of a company's securities. During October 2013, four purported class action complaints and two shareholder derivative actions were filed against the Company and certain of our current and former Board of Directors and executives following our announcement of an issuance of common stock on September 26, 2013. Such litigation could result in substantial costs, divert our management's attention and resources and have an adverse effect on our business, results of operations and financial condition. This volatility could affect the price at which you could sell shares of our common stock.

The Company's ability to use net operating loss carry-forwards to offset future taxable income for U.S. federal income tax purposes may be limited.

As of the nine months ended November 2, 2013, the Company has a federal net operating loss ("NOL") of approximately $2.5 billion. This NOL carryforward (expiring in 2032 and 2033) is available to offset future taxable income.

Section 382 of the Internal Revenue Code of 1986, as amended (the "Code") imposes an annual limitation on the amount of taxable income that may be offset if a corporation experiences an "ownership change" as defined in Section 382 of the Code. An ownership change occurs when the Company's "five-percent shareholders" (as defined in Section 382 of the Code) collectively increase their ownership in the Company by more than 50 percentage points (by value) over a rolling three-year period. Additionally, various states have similar limitations on the use of state NOLs following an ownership change.

If an ownership change occurs, the amount of the taxable income for any post-change year which may be offset by a pre-change loss is subject to an annual limitation that is cumulative to the extent it is not all utilized in a year. This limitation is derived by multiplying the fair market value of the Company stock as of the ownership change by the applicable federal long-term tax-exempt rate which was 3.5% at November 2, 2013. To the extent that a company has a net unrealized built-in gain at the time of an ownership change, which is realized or deemed recognized during the five-year period following the ownership change, there is an increase in the annual limitation for each of the first five-years that is cumulative to the extent it is not all utilized in a year.

The Company has an ongoing study of the rolling three-year testing periods. Final conclusions of the study will depend on both (1) elections regarding a possible ownership change to be made post-year end in filing the Company's federal income tax return and (2) information that may not have yet been filed with the Securities and Exchange Commission ("SEC") by all five-percent shareholders. Based upon the elections the Company currently plans to make in filing its tax return and the information that has been filed with the SEC as of December 2, 2013, the Company has not had a Section 382 ownership change through November 2, 2013. Certain five-percent shareholders have as late as February 15, 2014 to make filings with the SEC that could change the conclusions of the study.

If the Company were to make certain alternative elections, an ownership change could be established as occurring on September 26, 2013 when the Company's trading value would have been approximately $2.3 billion before adjustment for the value of any control premium. Under section 382 of the Code, as of September 26, 2013 the annual NOL limitations and built-in gain adjustments that would apply through the respective NOL and credit carryforward periods would total approximately $2.3 billion, and would exceed the total of the tax loss carryforwards (including carryover

credits on a loss equated basis) recognizable as of September 26, 2013. Certain foreign tax credit carryforwards and unused charitable contribution tax benefits totaling $17 million would be written-off against the valuation allowance in a September 26, 2013 ownership change scenario due to their shorter carryforward periods.

Table of Contents

Effective October 22, 2013, the Internal Revenue Service made final certain proposed regulations under Section 382. These regulations are generally more taxpayer favorable as to measuring the impact of an ownership shift and allow a corporate taxpayer to apply the new regulations to prior testing dates as long as an ownership change had not occurred under the old regulations in any testing period ending on or before October 22, 2013. The Company plans to revise its ongoing study of the rolling three-year testing periods so that all ownership shifts are determined under the new regulations. There is no assurance that the revised analysis will produce a significantly lower ownership shift as compared to that computed under the old regulations.

Avoiding an initial ownership shift by staying under a cumulative 50 percentage point shift in the rolling three year testing periods is preferable to being subject to the Section 382 NOL limitations. If an ownership change is encountered at some point, it is generally preferable that it be at a time when the value of the company and built-in gains to be recognized are such that the Section 382 limitations are at their highest levels as compared to the loss and credit carryforwards. Losses incurred after an ownership change are not subject to limitation except where there is a new cumulative 50 percentage point change under the rolling three year testing periods. The Company plans to continue its analysis of the elections available to it in filing its federal income tax return and the impact of the new regulations.

If an ownership change should occur in the future, the Company’s ability to use the NOL to offset future taxable income will be subject to an annual limitation and will depend on the amount of taxable income generated by the Company in future periods. There is no assurance that the Company will be able to fully utilize the NOL and the Company could be required to record an additional valuation allowance related to the amount of the NOL that may not be realized, which could impact the Company’s result of operations.
