West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared by West Bancorporation, Inc. (the Company) pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements have been condensed or omitted pursuant to such rules and regulations. Although management believes that the disclosures are adequate to make the information presented understandable, it is suggested that these interim consolidated financial statements be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2012. In the opinion of management, the accompanying consolidated financial statements contain all adjustments necessary to present fairly the financial position as of March 31, 2013 and December 31, 2012, and the net income, comprehensive income and cash flows for the three months ended March 31, 2013 and 2012. The results for these interim periods may not be indicative of results for the entire year or for any other period.

The consolidated financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB). References to GAAP issued by the FASB in these footnotes are to the FASB Accounting Standards Codification™, sometimes referred to as the Codification or ASC. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses for the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term are the fair value of financial instruments and other than temporary impairment (OTTI), the valuation of other real estate owned and the allowance for loan losses.

The accompanying unaudited consolidated financial statements include the accounts of the Company, West Bank, West Bank's wholly-owned subsidiary WB Funding Corporation (which owns an interest in a partnership) and West Bank's 99.99 percent owned subsidiary ICD IV, LLC (a community development entity). All significant intercompany transactions and balances have been eliminated in consolidation. In accordance with GAAP, West Bancorporation Capital Trust I is recorded on the books of the Company using the equity method of accounting and is not consolidated.

Recent accounting developments: In February 2013, the FASB issued Accounting Standards Update No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. The amendments in the Update do not change the current requirements for reporting net income or other comprehensive income in financial statements. The new amendments require an organization to present (either on the face of the statement where net income is presented or in the notes) the effects on the line items of net income of significant amounts reclassified out of accumulated other comprehensive income if the item reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. Additionally, for other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP to provide additional detail about those amounts. For public companies, the amendments were effective for reporting periods beginning after December 15, 2012. The adoption of this guidance did not have a material impact on the Company's consolidated

financial statements.

(dollars in thousands, except per share information)

2. Critical Accounting Policies

Management has identified its most critical accounting policies to be those related to asset impairment judgments, including fair value and OTTI of available for sale investment securities, the valuation of other real estate owned and the allowance for loan losses.

Securities available for sale are reported at fair value, with unrealized gains and losses reported as a separate component of accumulated other comprehensive income, net of deferred income taxes. The Company evaluates each of its investment securities whose value has declined below amortized cost to determine whether the decline in fair value is OTTI. The investment portfolio is evaluated for OTTI by segregating the portfolio into two segments and applying the appropriate OTTI model. Investment securities classified as available for sale are generally evaluated for OTTI under FASB ASC 320, Investments - Debt and Equity Securities. However, certain purchased beneficial interests in securitized financial assets, including asset-backed securities and collateralized debt obligations that had credit ratings below AA at the time of purchase, are evaluated using the model outlined in FASB ASC 325, Beneficial Interests in Securitized Financial Assets.

In determining OTTI under the FASB ASC 320 model, the review takes into consideration the severity and duration of the decline in fair value, the length of time expected for recovery, the financial condition of the issuer and other qualitative factors, as well as whether the Company intends to sell the security or whether it is more likely than not the Company will be required to sell the debt security before its anticipated recovery.

Under the FASB ASC 325 model for the second segment of the portfolio, the Company compares the present value of the remaining cash flows as estimated at the preceding evaluation date to the current expected remaining cash flows. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

When OTTI occurs under either model, the amount of the OTTI recognized in earnings depends on whether the Company intends to sell the security or whether it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis. If the Company intends to sell or it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis, the OTTI is recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. If the Company does not intend to sell the security and it is not more likely than not that the entity will be required to sell before recovery of its amortized cost basis, the OTTI is separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected, using the original yield as the discount rate, and is recognized in earnings. The amount of the total OTTI related to other factors is recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the OTTI recognized in earnings becomes the new amortized cost basis of the investment. The assessment of whether an OTTI exists involves a high degree of subjectivity and judgment and is based on the information available to management at the time.

Other real estate owned includes real estate properties acquired through or in lieu of foreclosure. Properties are initially recorded at fair value less estimated selling costs at the date of foreclosure thus establishing a new cost basis. Fair value is determined by management by obtaining appraisals or other market value information at least annually. Any write-downs in value at the date of acquisition are charged to the allowance for loan losses. After

foreclosure, valuations are periodically performed by management by obtaining updated appraisals or other market information. Any subsequent write-downs are recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the updated fair value less estimated selling cost. Net costs related to the holding of properties are included in noninterest expense.

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that collectability of the principal is unlikely. The Company has policies and procedures for evaluating the overall credit quality of its loan portfolio, including timely identification of potential problem loans. On a quarterly basis, management reviews the appropriate level for the allowance for loan losses, incorporating a variety of risk considerations, both quantitative and qualitative. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, known information about individual loans and other factors. Qualitative factors include the general economic environment in the Company's market areas and the expected trend of those economic conditions. While management uses the best information available to make its evaluations, future adjustments to the allowance may be necessary if there are significant changes in economic conditions or the other factors relied upon. To the extent actual results differ from forecasts and management's judgment, the allowance for loan losses may be greater or less than future charge-offs.

3. Securities Available for Sale

For securities available for sale, the following tables show the amortized cost, unrealized gains and losses (pre-tax) included in accumulated other comprehensive income and estimated fair value by security type as of March 31, 2013 and December 31, 2012.

	March 31, 2013			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
U.S. government agencies and corporations	$12,609	$443	$—	$13,052
State and political subdivisions	71,492	2,483	(698)	73,277
Collateralized mortgage obligations (1)	213,114	3,060	(93)	216,081
Mortgage-backed securities (1)	69,297	1,286	(116)	70,467
Trust preferred securities	5,915	—	(3,600)	2,315
Corporate notes and other investments	10,342	96	(8)	10,430
	$382,769	$7,368	$(4,515)	$385,622

	December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
U.S. government agencies and corporations	$12,614	$420	$—	$13,034
State and political subdivisions	54,075	2,754	(68)	56,761
Collateralized mortgage obligations (1)	170,557	3,140	(103)	173,594
Mortgage-backed securities (1)	36,965	1,459	—	38,424
Trust preferred securities	5,913	—	(3,818)	2,095
Corporate notes and other investments	8,341	69	(4)	8,406
	$288,465	$7,842	$(3,993)	$292,314

(1) All collateralized mortgage obligations and mortgage-backed securities consist of residential mortgage pass-through securities guaranteed by GNMA or issued by FNMA, and real estate mortgage investment conduits guaranteed by FHLMC or GNMA.

Securities with an amortized cost of $65,392 and $72,367 as of March 31, 2013 and December 31, 2012, respectively, were pledged as collateral on securities sold under agreements to repurchase, interest rate swaps and for other purposes as required or permitted by law or regulation. Securities sold under agreements to repurchase are held in safekeeping at a correspondent bank on behalf of the Company.

The amortized cost and fair value of securities available for sale as of March 31, 2013, by contractual maturity, are shown in the following table. Certain securities have call features that allow the issuer to call the securities prior to maturity. Expected maturities may differ from contractual maturities in collateralized mortgage obligations and mortgage-backed securities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Therefore, collateralized mortgage obligations and mortgage-backed securities are not included

in the maturity categories within the summary.

	March 31, 2013	
	Amortized Cost	Fair Value
Due in one year or less	$405	$406
Due after one year through five years	24,954	25,655
Due after five years through ten years	20,420	21,407
Due after ten years	53,095	50,101
	98,874	97,569
Collateralized mortgage obligations and mortgage-backed securities	282,411	286,548
Equity securities	1,484	1,505
	$382,769	$385,622

	Fair Value	Gross Unrealized (Losses)	Fair Value	Gross Unrealized (Losses)	Fair Value	Gross Unrealized (Losses)
State and political subdivisions	$5,617	$(62)	$305	$(6)	$5,922	$(68)
Collateralized mortgage obligations	19,477	(103)	—	—	19,477	(103)
Trust preferred securities	—	—	2,095	(3,818)	2,095	(3,818)
Corporate notes and other investments	1,032	(4)	—	—	1,032	(4)
	$26,126	$(169)	$2,400	$(3,824)	$28,526	$(3,993)

See Note 2 for a discussion of financial reporting for securities with unrealized losses. As of March 31, 2013, the available for sale investment portfolio included one municipal security, one collateralized mortgage obligation and two trust preferred securities (TPS) with unrealized losses that have existed for longer than one year.

The Company believes the unrealized losses on investments in municipal obligations, collateralized mortgage obligations, mortgage-backed securities and corporate notes as of March 31, 2013, are due to market conditions, not reduced estimated cash flows. The Company does not intend to sell these securities, does not anticipate that these

securities will be required to be sold before anticipated recovery, and expects full principal and interest to be collected. Therefore, the Company did not consider these investments to have OTTI at March 31, 2013.

The Company believes the unrealized loss of $860 on an investment in one single-issuer TPS issued by Heartland Financial, USA, Inc. as of March 31, 2013, was due to market conditions, not reduced estimated cash flows. The Company does not intend to sell this security, does not anticipate that this security will be required to be sold before anticipated recovery and expects full principal and interest will be collected. Therefore, the Company did not consider this investment to have OTTI at March 31, 2013.

As of March 31, 2013, the Company had one pooled TPS, ALESCO Preferred Funding X, Ltd., it has considered to have OTTI since 2009. The Company engaged an independent consulting firm to assist in the valuation of this security. In accordance with ASC 325, a discounted cash flow model was used to determine the estimated fair value of this security. Based on that valuation, management determined the security had an estimated fair value of $1,431 at March 31, 2013. Based on the valuation work performed, no additional credit loss was recognized in the first three months of 2013. A credit loss of $46 was recognized during the first three months of 2012. The remaining unrealized loss of $2,740 is reflected in accumulated other comprehensive income, net of taxes of $1,041. The Company will continue to periodically estimate the present value of cash flows expected to be collected over the life of the security.

The following table provides a roll forward of the cumulative amount of credit-related losses recognized in earnings for the three months ended March 31, 2013 and 2012.

	Three Months Ended March 31,	
	2013	2012
Balance at beginning of period	$729	$526
Current period credit loss recognized in earnings	—	46
Reductions for securities sold during the period	—	—
Reductions for securities where there is an intent to sell or requirement to sell	—	—
Reductions for increases in cash flows expected to be collected	—	—
Balance at end of period	$729	$572

4. Loans and Allowance for Loan Losses

Loans consist of the following segments as of March 31, 2013 and December 31, 2012.

	March 31, 2013	December 31, 2012
Commercial	$255,491	$282,124
Real estate:		
Construction, land and land development	107,782	121,911
1-4 family residential first mortgages	46,957	49,280
Home equity	26,012	25,536
Commercial	495,364	441,857
Consumer and other loans	5,882	7,099
	937,488	927,807
Net unamortized fees and costs	457	406
	$937,031	$927,401

Real estate loans of approximately $430,000 and $397,000 were pledged as security for Federal Home Loan Bank (FHLB) advances as of March 31, 2013 and December 31, 2012, respectively.

Loans are stated at the principal amounts outstanding, net of unamortized loan fees and costs, with interest income recognized on the interest method based upon those outstanding loan balances. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method. Loans are reported by the portfolio segments identified above and are analyzed by management on this basis. All loan policies identified below apply to all segments of the loan portfolio.

Delinquencies are determined based on the payment terms of the individual loan agreements. The accrual of interest on past due and other impaired loans is generally discontinued at 90 days or when, in the opinion of management, the borrower may be unable to make all payments pursuant to contractual terms. Unless considered collectible, all interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income, if accrued in the current year, or charged to the allowance for loan losses, if accrued in the prior year. Generally, all payments received while a loan is on nonaccrual status are applied to the principal balance of the loan. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Table of Contents

A loan is classified as troubled debt restructured (TDR) when the Company concludes that a borrower is experiencing financial difficulties and a concession was granted that would not otherwise be considered. Concessions may include a restructuring of the terms of a loan to alleviate the burden on the borrower's cash requirements, such as an extension of the payment terms beyond the original maturity date or a change in the interest rate charged. TDR loans with extended payment terms are accounted for as impaired until performance is established. A change to the interest rate would change the classification of a loan to a TDR loan if the restructured loan yields a rate that is below a market rate for that of a new loan with comparable risk. TDR loans with below market rates are considered impaired until fully collected. TDR loans may be reported as nonaccrual or past due 90 days, rather than as a TDR, if they are not performing per the restructured terms.

Based upon its ongoing assessment of credit quality within the loan portfolio, the Company maintains a Watch List, which includes classified loans. These loans involve anticipated potential payment defaults or collateral inadequacies. A loan on the Watch List is considered impaired when management believes it is probable the Company will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. The amount of impairment, if any, and any subsequent changes are included in the allowance for loan losses.

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

The following table sets forth the recorded investment in nonperforming loans, disaggregated by segment, held by the Company as of March 31, 2013 and December 31, 2012. The recorded investment represents principal balances net of any partial charge-offs. Related accrued interest and net unamortized fees and costs are immaterial and are excluded from the table.

	March 31, 2013	December 31, 2012
Nonaccrual loans:		
Commercial	$636	$655
Real estate:		
Construction, land and land development	3,356	3,356
1-4 family residential first mortgages	548	406
Home equity	—	—
Commercial	1,917	1,983
Consumer and other loans	—	—
Total nonaccrual loans	6,457	6,400
Loans past due 90 days and still accruing interest:		
Commercial	—	—
Real estate:		
Construction, land and land development	—	—
1-4 family residential first mortgages	—	—
Home equity	—	—
Commercial	—	—
Consumer and other loans	—	—
Total loans past due 90 days and still accruing interest	—	—
Troubled debt restructured loans[(1)]:		
Commercial	—	20
Real estate:		
Construction, land and land development	458	470
1-4 family residential first mortgages	105	273
Home equity	—	—
Commercial	93	93
Consumer and other loans	—	—
Total troubled debt restructured loans	656	856
Total nonperforming loans	$7,113	$7,256

(1) While TDR loans are commonly reported by the industry as nonperforming, those not classified in the nonaccrual category are accruing interest due to payment performance. TDR loans on nonaccrual status, if any, are included in the nonaccrual category. As of March 31, 2013 and December 31, 2012, there was one TDR loan with a balance of $744 and $810, respectively, included in the nonaccrual category.

On April 5, 2013, a $3,356 nonaccrual construction loan was paid off in full, thus reducing total nonaccrual loans to $3,101 and total nonperforming loans to $3,757.

There were no loan modifications considered to be TDR during the three months ended March 31, 2013. There was one loan in the commercial segment with a pre- and post-modification recorded investment of $28, that was modified using lengthened amortization during the three months ended March 31, 2012. During the three months ended March 31, 2013 and 2012, there was no financial impact for specific reserves or charge-offs for the TDR loan that was modified during the three months ended March 31, 2012.

There were no TDR loans that have been modified within the twelve months preceding March 31, 2013 and 2012 that have subsequently had a payment default during the three months ended March 31, 2013 and 2012, respectively. A TDR loan is considered to have a payment default when it is past due 30 days or more.

All loans are subject to the assessment of a credit quality indicator. Risk ratings are assigned for each loan at the time of approval, and they change as circumstances dictate during the term of the loan. The Company utilizes a 9-point risk rating scale as shown below, with ratings 1 - 5 included in the Pass column, rating 6 included in the Watch column, ratings 7 - 8 included in the Substandard column and rating 9 included in the Doubtful column. The Substandard column includes all loans classified as impaired, which are included in the specific evaluation of the allowance for loan losses.

Risk rating 1: The loan is secured by cash equivalent collateral.

Risk rating 2: The loan is secured by properly margined marketable securities, bonds or cash surrender value of life insurance.

Risk rating 3: The borrower is in strong financial condition and has strong debt service capacity. The loan is performing as agreed and the financial characteristics and trends of the borrower exceed industry statistics.

Risk rating 4: The borrower is in satisfactory financial condition and has satisfactory debt service capacity. The loan is performing as agreed and the financial characteristics and trends of the borrower fall in line with industry statistics.

Risk rating 5: The borrower's financial condition is less than satisfactory. The loan is still generally paying as agreed, but strained cash flow may cause some slowness in payments. The collateral values adequately preclude loss on the loan. Financial characteristics and trends lag industry statistics. There may be noncompliance with loan covenants.

Risk rating 6: The borrower's financial condition is deficient. Payment delinquencies may be more common. Collateral values still protect from loss, but margins are narrow. The loan may be reliant on secondary sources of repayment, including liquidation of collateral and guarantor support.

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

Risk rating 7: The loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Well-defined weaknesses exist that jeopardize the liquidation of the debt. The Company is inadequately protected by the valuation or paying capacity of the collateral pledged. If deficiencies are not corrected, there is a distinct possibility that a loss will be sustained.

Risk rating 8: All of the characteristics of rating 7 exist with the added condition that the loan is past due more than 90 days or there is reason to believe the Company will not receive its principal and interest according to the terms of the loan agreement.

Risk rating 9: All of the weaknesses inherent in risk ratings 7 and 8 exist with the added condition that collection or liquidation, on the basis of currently known facts, conditions and values, is highly questionable and improbable. A loan reaching this category would most likely be charged off.

Credit quality indicators for all loans and the Company's risk rating process are dynamic and updated on a continuous basis. Risk ratings are updated as circumstances that could affect the repayment of an individual loan are brought to management's attention through an established monitoring process. Individual lenders initiate changes as appropriate for ratings 1 through 5, and changes for ratings 6 through 9 are initiated via communications with management. The likelihood of loss increases as the risk rating increases and is generally preceded by a loan appearing on the Watch List, which consists of all loans with a risk rating of 6 or worse. Written action plans with firm target dates for resolution of identified problems are maintained and reviewed on a quarterly basis for all segments of criticized loans.

In addition to the Company's internal credit monitoring practices and procedures, an outsourced independent credit review function is in place to further assess assigned internal risk classifications and monitor compliance with internal lending policies and procedures.

In all portfolio segments, the primary risks are that a borrower's income stream diminishes to the point that it is not able to make scheduled principal and interest payments and any collateral securing the loan has declined in value. The risk of declining collateral values is present for most types of loans.

Commercial loans consist primarily of loans to businesses for various purposes, including revolving lines to finance current operations, inventory and accounts receivable, and capital expenditure loans to finance equipment and other fixed assets. These loans generally have short maturities, have either adjustable or fixed interest rates, and are either unsecured or secured by inventory, accounts receivable and/or fixed assets. For commercial loans the primary source of repayment is from the operation of the business.

Real estate loans include various types of loans for which the Company holds real property as collateral and consist of loans on commercial properties and single and multifamily residences. Real estate loans are typically structured to mature or reprice every 5 years with payments based on up to 30-year amortization periods. The majority of construction loans are to contractors and developers for construction of commercial buildings or residential real estate. These loans typically have maturities of up to 24 months. The Company's loan policy includes minimum appraisal and other credit guidelines.

Consumer loans include loans extended to individuals for household, family and other personal expenditures not secured by real estate. The majority of the Company's consumer lending is for vehicles, consolidation of personal debts and household improvements. For consumer loans, including 1-4 family residential and home equity loans, the source of repayment typically consists of wages.

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans in each of the Company's segments are charged against the allowance for loan losses when management believes that collectability of the principal is unlikely. The allowance is an amount that management believes will be adequate to absorb probable losses on existing loans, based on an evaluation of the collectability of loans and prior loss experience. This evaluation also takes into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, the review of specific problem loans, and current economic conditions that may affect the borrower's ability to pay. While management uses the best information available to make its evaluation, future adjustments to the allowance may be necessary if there are significant changes in economic conditions or the other factors relied upon.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

The allowance for loan losses consists of specific and general components. The specific component relates to loans that meet the definition of impaired. The general component covers the remaining loans and is based on historical loss experience adjusted for qualitative factors such as delinquency trends, loan growth, economic elements and local market conditions. These same policies are applied to all segments of loans. In addition, regulatory agencies, as an integral part of their examination processes, periodically review the Company's allowance for loan losses, and may require the Company to make additions to the allowance based on their judgment about information available to them at the time of their examinations.

The following tables detail changes in the allowance for loan losses by segment for the three months ended March 31, 2013 and 2012.

	Three Months Ended March 31, 2013						
		Real Estate					
	Commercial	Construction and Land	1-4 Family Residential	Home Equity	Commercial	Consumer and Other	Total
Beginning balance	$4,116	$4,616	$ 637	$568	$ 5,564	$ 28	$ 15,529
Charge-offs	(199)	—	—	(5)	—	—	(204)
Recoveries	23	—	94	23	2	15	157
Provision [(1)]	37	(188)	(128)	(48)	504	(27)	150
Ending balance	$3,977	$4,428	$ 603	$538	$ 6,070	$ 16	$ 15,632

	Three Months Ended March 31, 2012						
		Real Estate					
	Commercial	Construction and Land	1-4 Family Residential	Home Equity	Commercial	Consumer and Other	Total
Beginning balance	$4,409	$3,572	$ 1,215	$832	$ 6,667	$ 83	$ 16,778
Charge-offs	—	(42)	(39)	(95)	—	(12)	(188)
Recoveries	47	—	7	5	—	2	61
Provision [(1)]	(540)	604	51	(141)	30	(4)	—
Ending balance	$3,916	$4,134	$ 1,234	$601	$ 6,697	$ 69	$ 16,651

(1) The negative provisions for the various segments are primarily related to the decline in each of those portfolio segments during the time periods disclosed or improvement in the credit quality factors related to those portfolio segments.

The following tables show a breakdown of the allowance for loan losses disaggregated on the basis of impairment analysis method by segment as of March 31, 2013 and December 31, 2012.

5. Derivatives

The Company uses interest rate swap agreements to assist in its interest rate risk management. The notional amount of the interest rate swaps does not represent amounts exchanged by the counterparties. The notional amount of a derivative is used to determine, along with other terms of the derivative, the amounts to be exchanged between the counterparties.

The Company has variable rate funding, which creates exposure to variability in interest payments due to changes in interest rates. In December 2012, to manage the interest rate risk related to the variability of interest payments, the Company entered into three forward-starting interest rate swap transactions, with a total notional amount of $80,000, to effectively convert $80,000 of its variable rate FHLB advances to fixed interest rate debt as of the forward-starting date of the swap transactions. The three swap transactions were designated as cash flow hedges of the changes in cash flows attributable to changes in LIBOR, the benchmark interest rate being hedged, associated with the interest payments made on $80,000 of the Company's FHLB advances with quarterly interest rate reset dates. At inception, the Company asserted that the underlying principal balance would remain outstanding throughout the hedge transaction making it probable that sufficient LIBOR-based interest payments would exist through the maturity date of the swaps. The cash flow hedges were determined to be fully effective during the remaining terms of the swaps. Therefore, the aggregate fair value of the swaps is recorded in other assets or other liabilities with changes in market value recorded

in other comprehensive income, net of deferred taxes. See Note 6 for additional fair value information and disclosures. The amounts included in accumulated other comprehensive income will be reclassified to interest expense should the hedge no longer be considered effective. No amount of ineffectiveness was included in net income for the three months ended March 31, 2013, and the Company expects there will be no reclassification from accumulated other comprehensive income to interest expense for the next twelve months through March 31, 2014. The Company will continue to assess the effectiveness of the hedges on a quarterly basis.

The Company is exposed to credit risk in the event of nonperformance by the interest rate swap counterparty. The Company minimizes this risk by entering into derivative contracts with only large, stable financial institutions, and the Company has not experienced, and does not expect, any losses from counterparty nonperformance on the interest rate swaps. The Company monitors counterparty risk in accordance with the provisions of ASC 815. In addition, the interest rate swap agreements contain language outlining collateral-pledging requirements for each counterparty. Collateral must be posted when the market value exceeds certain threshold limits. The Company was required to pledge investment securities totaling $281 at March 31, 2013. There was no collateral pledged from the counterparty to the Company as of March 31, 2013. There is the possibility that the Company may need to pledge additional collateral in the future.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

The effective dates on the interest rate swaps executed on December 21, 2012, range from December 2014 to December 2015 and the interest rate swaps have maturity dates ranging from December 2019 to September 2020. Under these interest rate swap contracts, the Company will pay a fixed rate of 2.10 to 2.52 percent and receive a variable rate equal to three-month LIBOR plus 0.29 to 0.31 percent.

The tables below identify the balance sheet category and fair values of the Company's derivative instruments designated as cash flow hedges as of March 31, 2013 and December 31, 2012.

March 31, 2013	Notional Amount	Fair Value	Balance Sheet Category	Receive Rate	Pay Rate	Maturity	
Interest rate swap	$25,000	$(135)	Other Liabilities	0.57%	2.10%	12/23/2019	(1)
Interest rate swap	25,000	(103)	Other Liabilities	0.59%	2.34%	6/22/2020	(2)
Interest rate swap	30,000	(98)	Other Liabilities	0.59%	2.52%	9/21/2020	(3)

December 31, 2012	Notional Amount	Fair Value	Balance Sheet Category	Receive Rate	Pay Rate	Maturity
Interest rate swap	$25,000	$(239)	Other Liabilities	0.60%	2.10%	12/23/2019
Interest rate swap	25,000	(238)	Other Liabilities	0.62%	2.34%	6/22/2020
Interest rate swap	30,000	(267)	Other Liabilities	0.62%	2.52%	9/21/2020

The table below identifies the pre-tax gains recognized on the Company's derivative instruments designated as cash flow hedges for the three months ended March 31, 2013.

	Effective Portion			Ineffective Portion	
	Amount of Pre-tax Gain Recognized in OCI	Reclassified from AOCI into Income		Recognized in Income on Derivatives

6. Fair Value Measurements

Accounting guidance on fair value measurements and disclosures defines fair value, establishes a framework for measuring the fair value of assets and liabilities using a hierarchy system, and defines required disclosures. It clarifies that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts business.

The Company's balance sheet contains securities available for sale that are recorded at fair value on a recurring basis. The three-level valuation hierarchy for disclosure of fair value is as follows:

Level 1 uses quoted market prices in active markets for identical assets or liabilities.

Level 2 uses observable market-based inputs or unobservable inputs that are corroborated by market data.

Level 3 uses unobservable inputs that are not corroborated by market data.

Securities available for sale: When available, quoted market prices are used to determine the fair value of investment securities, and such items so valued are classified within Level 1 of the fair value hierarchy. Examples include U.S. Treasury securities, certain corporate bonds and preferred stocks. For other securities, the Company determines fair value based on various sources and may apply matrix pricing with observable prices for similar bonds where a price for the identical bond is not observable. Securities measured at fair value by such methods are classified as Level 2. The fair values of Level 2 securities are determined by pricing models that consider observable market data such as interest rate volatilities, LIBOR yield curve, credit spreads, prices from market makers and live trading systems. Certain securities are not valued based on observable inputs and are, therefore, classified as Level 3. The fair value of these securities is based on management's best estimates.

Derivative instruments: The Company's derivative instruments consist of interest rate swaps, which are accounted for as cash flow hedges. The Company's derivative position is classified within Level 2 of the fair value hierarchy and is valued using models generally accepted in the financial services industry that use actively quoted or observable market input values from external market data providers and/or non-binding broker-dealer quotations. The fair value of the derivative is determined using discounted cash flow models. These models’ key assumptions include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, yield curves, nonperformance risk and volatility. Derivative contracts are executed with a Credit Support Annex, which is a bilateral ratings-sensitive agreement that requires collateral postings at established credit threshold levels. These agreements protect the interests of the Company and its counterparties, should either party suffer a credit rating deterioration.

The Company's policy is to recognize transfers between Levels at the end of each reporting period, if applicable. There were no transfers between Levels of the fair value hierarchy during the three months ended March 31, 2013.

Corporate notes and other investments	10,430	9,843	587	—
Total assets measured at fair value on a recurring basis	$385,622	$9,843	$374,348	$1,431
Derivative instruments:				
Interest rate swaps	$336	$—	$336	$—
Total liabilities measured at fair value on a recurring basis	$336	$—	$336	$—

	December 31, 2012			
Description	Total	Level 1	Level 2	Level 3
Securities available for sale:				
U.S. government agencies and corporations	$13,034	$—	$13,034	$—
State and political subdivisions	56,761	—	56,761	—
Collateralized mortgage obligations	173,594	—	173,594	—
Mortgage-backed securities	38,424	—	38,424	—
Trust preferred securities	2,095	—	761	1,334
Corporate notes and other investments	8,406	7,780	626	—
Total assets measured at fair value on a recurring basis	$292,314	$7,780	$283,200	$1,334
Derivative instruments:				
Interest rate swaps	$744	$—	$744	$—
Total liabilities measured at fair value on a recurring basis	$744	$—	$744	$—

The following table presents changes in securities available for sale with significant unobservable inputs (Level 3) for the three months ended March 31, 2013 and 2012.

	Three Months Ended March 31,	
	2013	2012
Beginning balance	$1,334	$1,245
Transfer into level 3	—	—
Total gains or (losses):		
Included in earnings	—	(46)
Included in other comprehensive income	97	(10)
Sale of security	—	—

Principal payments	—	—
Ending balance	$1,431	$1,189

The activity in the previous table consisted of one pooled TPS (ALESCO Preferred Funding X, Ltd.).

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

Certain assets are measured at fair value on a nonrecurring basis. That is, they are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following tables present those assets carried on the balance sheet by caption and by level within the valuation hierarchy as of March 31, 2013 and December 31, 2012.

	March 31, 2013			
Description	Total	Level 1	Level 2	Level 3
Assets:				
Impaired loans	$5,333	$—	$—	$5,333
Other real estate owned	8,232	—	—	8,232
Total	$13,565	$—	$—	$13,565

	December 31, 2012			
Description	Total	Level 1	Level 2	Level 3
Assets:				
Impaired loans	$5,182	$—	$—	$5,182
Other real estate owned	8,304	—	—	8,304
Total	$13,486	$—	$—	$13,486

Loans in the previous tables consist of impaired loans for which a fair value adjustment has been recorded. Impaired loans are evaluated and valued at the lower of cost or fair value when the loan is identified as impaired. Fair value is measured based on the value of the collateral securing these loans and is classified as Level 3 in the fair value hierarchy. Collateral may be real estate or business assets such as equipment, inventory or accounts receivable. Fair value is determined by appraisals. Appraised or reported values may be discounted based on management's opinions concerning market developments or the client's business. Other real estate owned in the tables above consists of property acquired through foreclosures and settlements of loans. Property acquired is carried at fair value of the property less estimated disposal costs, and is classified as Level 3 in the fair value hierarchy.

GAAP requires disclosure of the fair value of financial assets and financial liabilities, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or nonrecurring basis are discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

Cash and due from banks: The carrying amount approximates fair value.

Federal funds sold and other short-term investments: The carrying amount approximates fair value.

FHLB stock: The fair value of this restricted stock is estimated at its carrying value and redemption price of $100 per share.

Loans held for sale: The fair values of loans held for sale are based on estimated selling prices.

Loans: The fair values of loans are estimated using discounted cash flow analysis based on observable market interest rates currently being offered for loans with similar terms to borrowers with similar credit quality.

Deposits: The carrying amounts for demand and savings deposits, which represent the amounts payable on demand, approximate their fair values. The fair values for fixed-rate and variable-rate certificates of deposit are estimated using discounted cash flow analysis, based on observable market interest rates currently being offered on certificates with similar terms.

Accrued interest receivable and payable: The fair values of both accrued interest receivable and payable approximate their carrying amounts.

Short-term and other borrowings: The carrying amounts of federal funds purchased and securities sold under agreements to repurchase approximates their fair values. Fair values of FHLB advances and subordinated notes are estimated using discounted cash flow analysis, based on observable market interest rates currently being offered with similar terms.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

Commitments to extend credit and standby letters of credit: The approximate fair values of commitments and standby letters of credit are based on the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and creditworthiness of the counterparties.

The following table includes the carrying amounts and approximate fair values of financial assets and liabilities as of March 31, 2013 and December 31, 2012.

		March 31, 2013		December 31, 2012

Interest rate swaps	See previous table	336	336	744	744
Off-balance-sheet financial instruments:					
Commitments to extend credit	Level 3	—	—	—	—
Standby letters of credit	Level 3	—	—	—	—

7. Stock Compensation Plans

At the Company's annual meeting of shareholders on April 26, 2012, the West Bancorporation, Inc. 2012 Equity Incentive Plan (the 2012 Plan) was approved by the shareholders. The 2012 Plan is administered by the Compensation Committee of the Board of Directors. All employees and directors of, and service providers to, the Company and its subsidiary are eligible to become participants in the 2012 Plan, except that nonemployees may not be granted incentive stock options. The Compensation Committee will determine the specific individuals who will be granted awards under the 2012 Plan and the type and amount of any such awards. Under the terms of the 2012 Plan, the Company may grant a total of 800,000 shares of the Company's common stock as nonqualified and incentive stock options, stock appreciation rights and stock awards. As of March 31, 2013 and December 31, 2012, 668,707 and 733,207 shares, respectively, of the Company's common stock remained available for future awards under the 2012 Plan.

Under the 2012 Plan, the Company may grant restricted stock unit (RSU) awards, as determined by the Compensation Committee, that vest upon the completion of future service requirements or specified performance criteria. On March 25, 2013, 64,500 RSUs that vest 20 percent annually beginning on the first anniversary of the grant date were granted to certain executive officers and other employees. All RSUs were granted at no cost to the participants and the participants will not be entitled to dividends until the RSUs have vested. Each outstanding RSU entitles the participant to receive one share of common stock within 30 days of the vesting date, the participant's termination due to death or disability, or a change in control of the Company if the RSUs are not fully assumed or if the RSUs are assumed and the participant's employment is terminated by the Company without cause or by the participant for good reason. If a participant terminates employment prior to the end of the continuous service period other than due to death, disability or retirement, the award is forfeited. If a participant terminates service due to retirement, the outstanding RSUs will continue to vest, subject to provisions of the 2012 Plan.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

The following is a summary of nonvested RSU activity for the three months ended March 31, 2013:

	Three Months Ended March 31, 2013	
	Shares	Weighted-Average Grant-Date Fair Value Per Share
Nonvested shares, beginning of period	66,793	$9.74
Granted	64,500	11.06
Vested	—	—
Forfeited	—	—
Nonvested shares, end of period	131.293	$10.39

The Company recognizes compensation expense for stock-based awards based on the fair value of the award at the grant date and based upon the number of awards ultimately expected to vest. The fair value of nonvested RSUs granted is equal to the fair market value of the underlying common stock at the grant date. Because the RSU participants do not have dividend rights prior to vesting, the initial unamortized expense amount is the discounted value of future cash flows omitting projected dividends during the vesting period. Compensation expense is recognized on the straight-line method over the vesting period. The Company currently assumes no projected forfeitures on its stock-based compensation as all RSUs are expected to vest.

Total compensation expense recorded for the RSUs was $63 for the three months ended March 31, 2013. As of March 31, 2013, there was $1,030 of unrecognized compensation expense related to nonvested RSUs, and the weighted average period over which these remaining costs are expected to be recognized is approximately 3.9 years.

8. Earnings per Common Share

Basic earnings per common share are computed by dividing net income to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per common share for the three months ended March 31, 2013 reflect the potential dilution that could occur if the Company's outstanding RSUs were vested. There were no outstanding RSUs at March 31, 2012. The dilutive effect was computed using the treasury stock method, which assumes all stock-based awards were exercised during the time period they were outstanding and the hypothetical proceeds from exercise were used by the Company to purchase common stock at the average market price during the period. The incremental shares, to the extent they would have been dilutive, were included in the denominator of the diluted earnings per common share calculation. The calculation of earnings per common share and diluted earnings per common share for the three months ended March 31, 2013 and 2012 is presented in the following table.

	Three Months Ended March 31,	
(in thousands, except per share information)	2013	2012
Net income	$3,948	$3,977
Weighted average common shares outstanding	17,404	17,404
Restricted stock units outstanding	79	—
Diluted weighted average common shares outstanding	17,483	17,404
Basic earnings per common share	$0.23	$0.23

Diluted earnings per common share	$0.23	$0.23

9. Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income consists of the net change in unrealized gains and losses on the Company's securities available for sale, including the noncredit-related portion of unrealized losses of any OTTI securities, and the effective portion of the change in value of derivative instruments.

The following tables summarize the changes in the balances of each component of accumulated other comprehensive income (loss), net of tax, for the three months ended March 31, 2013 and 2012.

	Noncredit-related Unrealized Gains (Losses) on Securities with OTTI	Unrealized Gains (Losses) on Securities without OTTI	Unrealized Gains (Losses) on Derivatives	Accumulated Other Comprehensive Income (Loss)
Balance, December 31, 2012	$(1,759)	$4,146	$(461)	$1,926
Other comprehensive income (loss) before reclassifications	60	(679)	253	(366)
Amounts reclassified from accumulated other comprehensive income	—	—	—	—
Net current period other comprehensive income (loss)	60	(679)	253	(366)
Balance, March 31, 2013	$(1,699)	$3,467	$(208)	$1,560
Balance, December 31, 2011	$(1,940)	$2,594	$—	$654
Net current period other comprehensive income (loss)	(6)	238	—	232
Balance, March 31, 2012	$(1,946)	$2,832	$—	$886

The following tables show the tax effects allocated to each component of other comprehensive income (loss) for the three months ended March 31, 2013 and 2012.

	Three Months Ended March 31, 2013		
	Before Tax Amount	Tax (Expense) Benefit	Net of Tax Amount
Unrealized noncredit-related gains on securities with OTTI:			
Unrealized holding gains arising during period	$97	$(37)	$60
Less: reclassification adjustment for net losses realized in net income	—	—	—
Net unrealized holding gains for securities with OTTI	97	(37)	60
Unrealized losses on securities without OTTI:			
Unrealized holding losses arising during the period	(1,094)	415	(679)
Less: reclassification adjustment for net gains realized in net income	—	—	—
Net unrealized losses on securities without OTTI	(1,094)	415	(679)
Unrealized gains on derivatives	408	(155)	253

Other comprehensive (loss)	$(589)	$223	$(366)

Other comprehensive income	$375	$(143)	$232

10. Deferred Income Taxes

Net deferred tax assets consist of the following as of March 31, 2013 and December 31, 2012.

	March 31, 2013	December 31, 2012
Allowance for loan losses	$5,940	$5,901
Investment security impairment	106	106
Net unrealized losses on interest rate swaps	128	283
Intangibles	1,619	1,695
Other real estate owned	1,474	1,475
Accrued expenses	587	766
Other deferred tax assets	301	288
State net operating loss carryforward	550	529
Capital loss carryforward	4,065	4,065
Net deferred loan fees and costs	(254)	(272)
Net unrealized gains on securities available for sale	(1,085)	(1,463)
Premises and equipment	(607)	(513)
Loans	(918)	(878)
Other deferred tax liabilities	(280)	(291)
Net deferred tax assets before valuation allowance	11,626	11,691
Valuation allowance	(4,721)	(4,700)
Net deferred tax assets	$6,905	$6,991

The Company has recorded a valuation allowance against the tax effect of the state net operating loss carryforwards, federal and state capital loss carryforwards and investment security impairment as management believes it is more likely than not that such carryforwards will expire without being utilized.

11. Commitments and Contingencies

The Company is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations that it uses for on-balance-sheet instruments. The Company's commitments as of March 31, 2013 and December 31, 2012 consisted of the following approximate amounts.

	March 31, 2013	December 31, 2012
Commitments to extend credit	$429,534	$360,879
Standby letters of credit	3,787	10,488
	$433,321	$371,367

West Bank has executed Mortgage Partnership Finance (MPF) Master Commitments (the Commitments) with the FHLB of Des Moines to deliver mortgage loans and to guarantee the payment of any realized losses that exceed the FHLB's first loss account for mortgages delivered under the Commitments. West Bank receives credit enhancement fees from the FHLB for providing this guarantee and continuing to assist with managing the credit risk of the MPF Program mortgage loans. The term of the current Commitment is through January 16, 2014. At March 31, 2013, the liability represented by the present value of the credit enhancement fees less any expected losses in the mortgages delivered under the Commitments was approximately $412.

On September 29, 2010, West Bank was sued in a purported class action lawsuit that, as amended, asserts that nonsufficient funds fees charged by West Bank to Iowa resident noncommercial customers on bank debit card transactions, but not checks or Automated Clearing House items, are usurious under Iowa law, rather than allowable fees, and that the sequence in which West Bank formerly posted items for payment in consumer demand accounts violated various alleged duties of good faith. West Bank believes the allegations in the lawsuit are factually and legally incorrect in multiple material ways. West Bank is vigorously defending the action. The amount of potential loss, if any, cannot be reasonably estimated now because there are substantial and different defenses concerning the various claims of potential liability, class certification and damages.

In the normal course of business, the Company and West Bank are involved in various other legal proceedings. In the opinion of management, any liability resulting from such proceedings would not have a material adverse effect on the consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

"SAFE HARBOR" STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT

Certain statements in this report, other than purely historical information, including estimates, projections, statements relating to our business plans, objectives and expected operating results and the assumptions upon which those statements are based, are “forward-looking statements” within the meanings of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may appear throughout this report. These forward-looking statements are generally identified by the words “believes,” “expects,” “intends,” “should,” “anticipates,” “projects,” “future,” “may,” “will,” “strategy,” “opportunity,” “will be,” “will likely result,” “will continue” or similar references, or references to estimates, predictions or future events. Such forward-looking statements are based upon certain underlying assumptions, risks and uncertainties. Because of the possibility that the underlying assumptions are incorrect or do not materialize as expected in the future, actual results could differ materially from these forward-looking statements. Risks and uncertainties that may affect future results include: interest rate risk; competitive pressures; pricing pressures on loans and deposits; changes in credit and other risks posed by the Company's loan and investment portfolios, including declines in commercial or residential real estate values, or changes in the allowance for loan losses dictated by new market conditions or regulatory requirements; actions of bank and non-bank competitors; changes in local and national economic conditions; changes in regulatory requirements, limitations and costs; changes in customers' acceptance of the Company's products and services; and any other risks described in the “Risk Factors” sections of this and other reports filed by the Company with the Securities and Exchange Commission. The Company undertakes no obligation to revise or update such forward-looking statements to reflect current or future events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

THREE MONTHS ENDED MARCH 31, 2013

OVERVIEW

The following discussion describes the consolidated operations of the Company, including West Bank, West Bank's wholly-owned subsidiary WB Funding Corporation (which owns an interest in SmartyPig, LLC), West Bank's 99.99 percent owned subsidiary ICD IV, LLC (a community development entity), and the Company's consolidated financial condition as of the end of the first quarter 2013. Results of operations for the quarter ended March 31, 2013 are compared to the results for the same period in 2012, and the consolidated financial condition of the Company as of March 31, 2013 is compared to balances as of December 31, 2012.

Net income for the quarter ended March 31, 2013 was $3,948 compared to $3,977 for the quarter ended March 31, 2012. Basic and diluted earnings per common share were $0.23 for both of these quarters. The Company's annualized return on average equity and return on average assets for the quarter ended March 31, 2013 were 11.84 and 1.12 percent, respectively, compared to 12.82 and 1.23 percent, respectively, for the quarter ended March 31, 2012.

For the quarter ended March 31, 2013, net interest income increased $646 compared to the first quarter of 2012. The increase was primarily due to the combination of lower market interest rates on deposits and the December 2012 modification of $80,000 of FHLB advances, in conjunction with a higher level of earning assets. On a year-to-date basis, the provision for loan losses was $150 while no provision was recorded in the quarter ended March 31, 2012. Nonperforming loans continued to decline in the first quarter of 2013 compared to the total as of December 31, 2012.

Offsetting the increase in net interest income for the first quarter of 2013 compared to the prior year was a $236 reduction in gains and fees on sales of residential mortgages and an increase of $333 in salaries and employee benefits.

During the first quarter of 2013, total loans outstanding increased $9,630, and they grew $87,990 compared to March 31, 2012. Management believes the loan portfolio will continue to grow during 2013 as the pipeline for new loans remains strong. Contributing to the expected growth will be the March 18, 2013 opening of a loan production office in Rochester, Minnesota. As of March 31, 2013, the allowance for loan losses was 1.67 percent of loans outstanding and was deemed by management to be adequate to absorb any losses inherent in the loan portfolio.

First quarter 2013 investment securities purchases of approximately $114,100 caused the investment portfolio to grow by $93,308 compared to December 31, 2012. The purchases were made in a planned effort to reduce the level of federal funds sold and to enhance the net interest margin.

The Board of Directors declared a quarterly dividend of $0.10 per common share at its meeting on April 24, 2013. The dividend is payable on May 28, 2013, to shareholders of record as of May 8, 2013.

RESULTS OF OPERATIONS

The following table shows selected financial results and measures for the three months ended March 31, 2013 compared with the same period in 2012.

	Three Months Ended March 31,			
	2013	2012	Change	Change %
Net income	$3,948	$3,977	$(29)	(0.7)%
Average assets	1,424,118	1,296,711	127,407	9.8%
Average stockholders' equity	135,232	124,800	10,432	8.4%
Return on average assets	1.12%	1.23%	(0.11)%	
Return on average equity	11.84%	12.82%	(0.98)%	
Efficiency ratio	53.87%	51.82%	2.05%	
Dividend payout ratio	44.07%	34.98%	9.09%	
Average equity to average assets ratio	9.50%	9.62%	(0.12)%	

	As of March 31,		
	2013	2012	Change
Texas ratio	11.03%	15.28%	(4.25)%
Equity to assets ratio	9.50%	9.56%	(0.06)%
Tangible common equity ratio	9.50%	9.56%	(0.06)%

Definitions of ratios:

- Return on average assets - annualized net income divided by average assets.
- Return on average equity - annualized net income divided by average stockholders' equity.
- Efficiency ratio - noninterest expense (excluding other real estate owned expense) divided by noninterest income (excluding net securities gains and net impairment losses) plus tax-equivalent net interest income.
- Dividend payout ratio - dividends paid to common stockholders divided by net income.
- Texas ratio - total nonperforming assets divided by tangible common equity plus the allowance for loan losses.
- Equity to assets ratio - equity divided by assets.
- Tangible common equity ratio - common equity less intangible assets divided by tangible assets.

Net Interest Income

The following table shows average balances and related interest income or interest expense, with the resulting average yield or rate by category of interest-earning assets or interest-bearing liabilities. Interest income and the resulting net interest income are shown on a fully taxable basis.
Data for the three months ended March 31:

Average Balance				Interest Income/Expense				Yield/Rate
2013	2012	Change	Change-%	2013	2012	Change	Change-%	2013
