ANNUAL REPORT

FEBRUARY 28, 2009

### A Letter to Shareholders

### **Dear Shareholder**

The present time may well be remembered as one of the most tumultuous periods in financial market history. Over the past year, the housing market collapse and the ensuing credit crisis swelled into an all-out global financial market meltdown, featuring the collapse of storied financial firms, volatile swings in the world s financial markets and monumental government actions, including the recent passage of the nearly \$800 billion American Recovery and Reinvestment Act of 2009.

The US economy appeared somewhat resilient through the first few months of 2008 before becoming mired in the worst recession in decades. The economic data was dire across the board, but worse was the intensifying pace of deterioration in consumer spending, employment, manufacturing and other key indicators. US gross domestic product (GDP) contracted at an annual rate of 6.3% in the 2008 fourth quarter substantially below forecast and the worst reading since 1982. The Federal Reserve Board (the Fed ) took forceful action to revive the global economy and financial system. In addition to slashing the federal funds target rate from 3% to a record low range of 0% to 0.25%, the central bank provided enormous cash injections and significantly expanded its balance sheet via various lending and acquisition programs.

Against this backdrop, US equities contended with relentless market volatility, and the sentiment turned decisively negative toward period end. Declines were significant and broad based, with little divergence among the returns for large and small cap stocks. Non-US stocks were not spared either, as the credit crisis revealed itself to be global in nature and economic activity slowed dramatically.

Risk aversion remained the dominant theme in fixed income markets, leading the Treasury sector to top all other asset classes. The high yield market was particularly hard hit in this environment, as economic turmoil, combined with frozen credit markets and substantial technical pressures, took a heavy toll. Meanwhile, tax-exempt issues posted positive returns for the period, but the sector was not without significant challenges, including a shortage of market participants, lack of liquidity, difficult funding environment and backlog of new-issue supply.

In all, investors continued to gravitate toward relative safety, as evidenced in the six- and 12-month returns of the major benchmark indexes:

Total Returns as of February 28, 2009	6-month	12-month
US equities (S&P 500 Index)	(41.82)%	(43.32)%
Small cap US equities (Russell 2000 Index)	(46.91)	(42.38)
International equities (MSCI Europe, Australasia, Far East Index)	(44.58)	(50.22)
US Treasury securities (Merrill Lynch 10-Year US Treasury Index)	8.52	8.09
Taxable fixed income (Barclays Capital US Aggregate Bond Index*)	1.88	2.06
Tax-exempt fixed income (Barclays Capital Municipal Bond Index*)	0.05	5.18
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index*)	(21.50)	(20.92)

\* Formerly a Lehman Brothers index.

Fund Summary as of February 28, 2009

BlackRock Corporate High Yield Fund, Inc.

#### **Investment Objective**

**BlackRock Corporate High Yield Fund, Inc. (COY) (the Fund**) seeks to provide shareholders with current income with a secondary objective of providing shareholders with capital appreciation. The Fund seeks to achieve its objective by investing primarily in a diversified portfolio of fixed-income securities that are rated below investment grade by the established rating services (Ba or lower by Moody s Investors Service, Inc. (Moody s) or BB or lower by Standard & Poor s Corporation (S&P s)) or are unrated securities of comparable quality.

The Fund s fiscal year-end was changed to February 28.

#### Performance

For the nine months ended February 28, 2009, the Fund returned (39.46)% based on market price and (38.98)% based on net asset value (NAV). For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of (43.59)% on a market price basis and (40.44)% on a NAV basis. The Fund's discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. This period was one of the worst in high yield market history. In this environment, the Fund was positioned conservatively, with an emphasis on defensive sectors, an allocation to bank loans and higher-than-normal cash balances. For most of the period, the Fund also had lower leverage than the majority of its Lipper peers. All of this aided relative performance in a difficult market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT

FEBRUARY 28, 2009

Fund Summary as of February 28, 2009

### BlackRock Corporate High Yield Fund III, Inc.

#### **Investment Objective**

**BlackRock Corporate High Yield Fund III, Inc. (CYE) (the Fund**) seeks to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities that are rated in the lower rating categories of the established rating services (Ba or lower by Moody s or BB or lower by S&P s) or are unrated securities of comparable quality.

The Fund s fiscal year-end was changed to February 28.

#### Performance

For the nine months ended February 28, 2009, the Fund returned (42.38)% based on market price and (39.69)% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of (43.59)% on a market price basis and (40.44)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. This period was one of the worst in high yield market history. In this environment, the Fund was positioned conservatively, with an emphasis on defensive sectors, an allocation to bank loans and higher-than-normal cash balances. For most of the period, the Fund also had lower leverage than the majority of its Lipper peers. All of this aided relative performance in a difficult market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT

FEBRUARY 28, 2009

5

Fund Summary as of February 28, 2009

BlackRock Debt Strategies Fund, Inc.

#### **Investment Objective**

**BlackRock Debt Strategies Fund, Inc. (DSU) (the Fund**) seeks to provide current income by investing primarily in a diversified portfolio of US companies debt instruments, including corporate loans, that are rated in the lower rating categories of the established rating services (Ba or lower by Moody s or BB or lower by S&P s) or unrated debt instruments of comparable quality.

#### Performance

For the 12 months ended February 28, 2009, the Fund returned (54.99)% based on market price and (50.19)% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of (40.21)% on a market price basis and (39.49)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. During the 12 months, high yield loans, which made up 43% of the Fund s portfolio as of February 28, 2009, outperformed high yield bonds. This aided the Fund s relative performance, as most of the funds within the Lipper category comprise high yield bonds. Conversely, the Fund was 26% leveraged as of February 28, 2009, amplifying its negative return during one of the most difficult periods in market history. The Fund s allocation to lower credit quality issues also detracted from performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT

FEBRUARY 28, 2009

Fund Summary as of February 28, 2009

BlackRock Floating Rate Income Strategies Fund II, Inc.

#### **Investment Objective**

BlackRock Floating Rate Income Strategies Fund II, Inc. (FRB) (the Fund ) seeks a high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments.

#### Performance

For the 12 months ended February 28, 2009, the Fund returned (35.78)% based on market price and (36.46)% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of (41.71)% on a market price basis and (34.50)% on a NAV basis. The performance of the Lipper category does not necessarily correlate to that of the Fund, as the Lipper group comprises both closed-end funds and unleveraged continuously offered closed-end funds. The other closed-end funds in the category posted an average return of (39.32)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. This annual period was one of the most difficult in market history. Accordingly, the Fund was invested fairly conservatively with an emphasis on more liquid credits and defensive market sectors, which aided relative performance. Additionally, the Fund ran low levels of leverage compared with its Lipper peers, which helped relative performance in a difficult market. Any leverage hurt absolute performance, however, as the market was down. The Fund ran relatively modest cash balances during the period, which did not significantly impact performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

### Fund Summary as of February 28, 2009

BlackRock Senior High Income Fund, Inc.

#### **Investment Objective**

**BlackRock Senior High Income Fund, Inc. (ARK) (the Fund**) seeks to provide shareholders with as high a level of current income as is consistent with its investment policies and prudent investment management by investing principally in senior debt obligations of companies, including corporate loans made by banks and other financial institutions and both privately placed and publicly offered corporate bonds and notes.

#### Performance

For the 12 months ended February 28, 2009, the Fund returned (48.33)% based on market price and (42.15)% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of (40.21)% on a market price basis and (39.49)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. During the period, high yield loans, which made up 44% of the Fund s portfolio as of February 28, 2009, outperformed high yield bonds. This aided the Fund s relative performance, as most of the funds within the Lipper category comprise high yield bonds. Conversely, the Fund was 25% leveraged as of February 28, 2009, amplifying its negative return during one of the most difficult periods in market history. The Fund s allocation to lower credit quality issues also detracted from performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT

FEBRUARY 28, 2009

### The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage through borrowings and the issuance of short-term securities. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s Common Shareholders will benefit from the incremental yield.

The interest earned on securities purchased with the proceeds from leverage is paid to Common Shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV of each Fund s Common Shares. However, in order to benefit Common Shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, returns to Common Shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s Common Shares capitalization is \$100 million and it issues debt securities for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays interest expense on the \$30 million of debt securities based on the lower short-term interest rates. At the same time, the Fund s total portfolio of \$130 million earns the income based on long-term interest rates. In this case, the interest expense of the debt securities is significantly lower than the income earned on the Fund s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield.

Conversely, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays interest expense on the higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates. If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares will be reduced or eliminated completely.

Furthermore, the value of the Fund s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Fund s debt securities do not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Fund s NAV positively or negatively in addition to the impact on Fund performance from leverage from debt securities.

The use of leverage may enhance opportunities for increased returns to the Funds and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in each Fund s NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Fund s net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund s net income will be reduced. A Fund may be required to sell portfolio securities at inopportune times or below fair market values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause a Fund to incur losses. The use of leverage may limit a Fund s ability to invest in certain types of securities or use certain types of hedging strategies. A Fund will incur expenses in connection with the use of leverage, all of which are borne by Fund Shareholders and may reduce investment returns.

Under the Investment Company Act of 1940, the Funds are permitted to borrow through a credit facility and the issuance of short-term debt securities up to  $33^{1}/_{3}\%$  of total managed assets. As of February 28, 2009, the Funds had outstanding leverage from credit facility borrowings as a percentage of total managed assets as follows:

	Percent of Leverage
BlackRock Corporate High Yield Fund, Inc.	21%
BlackRock Corporate High Yield Fund III, Inc.	23%
BlackRock Debt Strategies Fund, Inc.	26%

#### **Derivative Instruments**

The Funds may invest in various derivative instruments, including swap agreements, forward currency contracts and other instruments specified in the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the other party to the transaction and illiquidity of the derivative instrument. A Fund sability to successfully use a derivative instrument depends on the investment advisor s ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Funds to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Funds can realize on an investment or may cause the Funds to hold a security that they might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

### Total

7,044

\$

Credit default swaps on single-name issues sold protection outstanding as of February 28, 2009 were as follows:

Issuer <sup>1</sup>	Receive Fixed Rate	Counterparty	Expiration	Notional Amount (000) <sup>2</sup>		Unrealized Depreciation	
Ford Motor Co.	3.80%	UBS AG	March 2010	USD	930	\$	(651,722)
Ford Motor Co.	5.00%	Goldman Sachs International	June 2010	USD	3,750		(2,654,861)
Total						\$	(3,306,583)

<sup>1</sup> Credit rating is CCC using Standard & Poor s ratings.

<sup>2</sup> The maximum potential amount the Fund may be required to pay should a negative credit event take place as defined under the terms of the agreement. See Note 1 of the Notes to Financial Statements.

Currency Abbreviations:

CAD Canadian Dollar EUR Euro USD US Dollar

Effective June 1,2008,the Fund has adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund s own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Fund s investments:

Valuation Inputs	Iı	Investments in Securities		Other Financial Instruments*			
		Assets		Assets		Liabilities	
Level 1	\$	1,356,866					
Level 2 Level 3		161,976,059 16,371,171	\$	321,425	\$	(3,306,583)	
Total	\$	179,704,096	\$	321,425	\$	(3,306,583)	

\* Other financial instruments are swaps, foreign currency exchange and option contracts. Swaps and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at market value.

The following is a reconciliation of investments for unobservable inputs (Level 3) used in determining fair value:

	Investments in Securities
	Assets
Balance as of May 31, 2008	\$ 3,582
Accrued discounts/premiums	111,311
Realized gain	188
Change in unrealized appreciation/depreciation <sup>1</sup>	(19,674,329)
Net purchases	92,784
Net transfers in of Level 3	35,837,635
Balance as of February 28, 2009	\$ 16,371,171

<sup>1</sup>Included in the related net change in unrealized appreciation/depreciation on the Statements of Operations.

See Notes to Financial Statements.
