Management Comments

2008, though difficult, was a year of important accomplishments and positioning for the future, said Gabi Seligsohn, President and CEO of Nova. In addition to weak industry conditions and the influence of the global economic crisis, our results reflect the impact of negative foreign currency trends. During the year, we addressed these challenges by taking decisive actions to reduce operating expenses and conserve cash. Some of the important accomplishments not reflected in our financial results include excellent success in penetrating the Stand Alone Optical CD market while doubling our customer presence during the year, as well as continued R&D focus leading to introduction of new solutions such

as the Nova T500, which delivers record breaking throughput and leading edge accuracy. Despite the challenging environment, we maintained the pace of our product development program and look forward to introducing additional new products during 2009. While near term visibility remains low, our position within the industry has improved and we will continue to take necessary steps to ensure we have adequate financial flexibility to support our operations .

The Company will host a conference call today, February 18, 2009, at 9:00am ET. To participate, please dial in the US: 1 866 345 5855; or internationally: +972 3 918 0650. A recording of the call will be available on Nova's website, within 24 hours following the end of the call.

This press release provides financial measures that exclude non-cash charges for inventory write-off, stock-based compensation, impairment charges and amortization of intangible assets and are therefore not calculated in accordance with generally accepted accounting principles (GAAP). Management believes that these non-GAAP financial measures provide meaningful supplemental information regarding Nova's performance because they reflect our operational results and enhances management's and investors' ability to evaluate Nova's performance before charges considered by management to be outside Nova's ongoing operating results.

The presentation of this non-GAAP financial information is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. Management believes that it is in the best interest of its investors to provide financial information that will facilitate comparison of both historical and future results and allows greater transparency to supplemental information used by management in its financial and operational decision making. A reconciliation of each GAAP to non-GAAP financial measure discussed in this press release is contained in the accompanying financial tables.
