0.71	0.78	0.72	- per ADS (dollars)	3.35	2.33	

- BP's fourth quarter pro forma result, adjusted for special items, was \$2,667 million, compared with \$2,635 million a year ago, an increase of 1%. For the year, the result was a record \$12,379 million compared with \$8,715 million, up 42%. Replacement cost profit, before exceptional items, for the fourth quarter and year was \$1,819 million and a record \$9,543 million respectively, compared with \$1,697 million and \$4,698 million a year ago.
- The fourth quarter overall trading environment was more favourable than a year ago.
- In Exploration and Production, the impact of higher prices and volumes in the fourth quarter was offset by higher depreciation, foreign exchange effects, one-time charges and an increase in the provision for Unrealized Profit in Stock.
- Reserve replacement in 2003 was 122%. Including equity-accounted entities and the effect of acquisitions (notably our interest in TNK-BP) and disposals, additions to year end reserves were 158% of 2003 production.
- On 16 January 2004, we completed the deal to include AAR's 50% interest in Slavneft into TNK-BP, at a cost of \$1.4 billion in cash. On 13 January 2004, we sold our investment in PetroChina for \$1.65 billion.
- Net cash outflow for the quarter was \$1,837 million and net cash inflow for the year was \$1,342 million, compared with an inflow of \$711 million and an outflow of \$344 million a year ago.
- The pro forma ratio of net debt to net debt plus equity was 24% at the end of the quarter.
- Return on average capital employed for the quarter and year respectively, on a pro forma basis adjusted for special items, was 13% and 16%, compared with 15% and 13% a year ago.

Edgar Filing: BP PLC - Form 6-K

- The quarterly dividend was 6.75 cents per share (\$0.405 per ADS). This compares with 6.25 cents a year ago. For the year the dividend showed an increase of 8.3%. In sterling terms, the quarterly dividend is 3.674 pence per share compared with 3.815 pence a year ago; for the year the decrease was 0.8%.

BP Group Chief Executive, Lord Browne, said:

"Our results in 2003 have set a new record. We have delivered a good result from our existing assets and operations, while building a strong platform for the future. Our focus is now on delivering the growth in free cash flow of which we believe our portfolio is capable. We intend to restart our share buyback programme this quarter, subject to market conditions."

The pro forma result is replacement cost profit before exceptional items excluding acquisition amortization. The pro forma result, adjusted for special items, has been derived from the group's reported UK GAAP accounting information but is not in itself a recognized UK or US GAAP measure. This financial performance information and measures derived therefrom, shown above and elsewhere in the document, are provided in order to enable investors to evaluate better BP's current performance against that of its competitors.

- (a) The special items refer to non-recurring charges and credits. The special items for the fourth quarter comprise impairment charges and restructuring costs in Exploration and Production, Veba integration costs in Refining and Marketing and a provision to cover future rental payments on surplus property in Other businesses and corporate and tax restructuring benefits.
- (b) Acquisition amortization is depreciation and amortization relating to the fixed asset revaluation adjustments and goodwill consequent upon the ARCO and Burmah Castrol acquisitions. The fourth quarter 2003 includes accelerated depreciation of the revaluation adjustment in respect of the impairment of former ARCO assets.

Summary Fourth Quarter Results

Exploration and Production's fourth quarter result was broadly in line with a year ago, after reflecting the effects of higher oil and gas prices and a full quarter of TNK-BP, offset by higher depreciation, foreign exchange effects, one-time charges and an increase in the provision for Unrealized Profit in Stock.

In Gas, Power and Renewables, the result reflects improvement in marketing and trading, including LNG, partly offset by a lower result for the natural gas liquids business.

The Refining and Marketing result increased 23% compared with a year ago due to improved refining margins and marketing margins, particularly retail margins in the USA and Europe, with some offset from higher gas fuel costs.

The Petrochemicals result reflects operational difficulties in the nitriles business, the strength of the euro on our European cost base and non-routine charges, partly offset by a slight improvement in margins.

Interest expense for the quarter was \$227 million compared with \$213 million for the prior quarter. The increase reflects the inclusion of TNK-BP for a full quarter, partly offset by lower debt buy-back costs and an increase in capitalized interest.

Edgar Filing: BP PLC - Form 6-K

The pro forma effective tax rate on replacement cost profit, before exceptional items, and adjusted for special items, was 33.5% for the quarter compared with 34.0% a year ago. The special items in the quarter include tax restructuring benefits of \$150 million.

Capital expenditure was \$4.7 billion for the quarter; there were no acquisitions. Disposal proceeds for the quarter were \$1.4 billion.

Net cash outflow was \$1,837 million compared with an inflow of \$711 million a year ago, due to lower cash flow from operating activities and higher tax payments, partly offset by higher disposal proceeds. The reduced cash flow from operating activities reflects the payments of \$1.6 billion to group pension schemes.

Net debt at the end of the quarter was \$20.2 billion. The pro forma ratio of net debt to net debt plus equity was 24%.

 The commentaries above and following are based on the pro forma replacement cost operating results, before exceptional items, adjusted for special items.

To reflect BP's increased focus on chemical products derived from oil and gas, the Chemicals segment has been renamed Petrochemicals.

BP's share of the result of the TNK-BP joint venture has been included within Exploration and Production with effect from 29 August. TNK-BP operational and financial information has been estimated.

Exploration and Production

The pro forma result for the fourth quarter was \$3,687 million, slightly ahead of the result for the fourth quarter of 2002 when adjusted for special charges of \$323 million. Acquisition amortization of \$426 million includes accelerated amortization of \$121 million. The special items and the accelerated acquisition amortization relate to impairment of the Miller field (\$133 million) in the UK following a decision not to proceed with waterflood and gas import options and four assets in the Gulf of Mexico Shelf (\$296 million) following technical reassessments and re-evaluation of future investment options, and special restructuring charges of \$15 million in respect of ongoing restructuring in the UK and North America.

The quarter saw increased production and higher oil and gas prices. Liquids realizations increased by \$2.52/bbl, and natural gas realizations by \$0.31/mcf compared with a year ago. Higher depreciation, foreign exchange effects, one-time charges in the USA and an increase in the provision for Unrealized Profit in Stock (UPIS) offset the impact of higher volumes and prices in the

Edgar Filing: BP PLC - Form 6-K

quarter. The charge of \$57 million in the quarter for UPIS, which removes the upstream margin from downstream inventories, compares with a credit of \$49 million in the equivalent quarter of last year.

The full year result at \$15,977 million, up \$3,972 million on a year ago, reflects the impact of increased production, higher oil and gas prices and a reduction in exploration expense partly offset by an increase in the depreciation charge.

During the quarter we had further exploration success in Angola on Block 31 with the Marte discovery and in Block 15 with the Tchichumba discovery and in Deepwater Gulf of Mexico with the Tubular Bells and the Puma discoveries.

Progress continues in our new profit centres. During the fourth quarter, the deepwater developments of Jasmim and Xikomba in Angola and Na Kika in the Gulf of Mexico started production. Other deepwater developments in the Gulf of Mexico are progressing well with the Holstein and Mad Dog spars now on the Gulf Coast for final construction and installation. Hull construction on Atlantis has commenced in South Korea. In Azerbaijan, construction is well advanced on the Azeri project and the BTC pipeline is on track for start-up in the first half of 2005. The Cannonball gas development in Trinidad has been approved and in Angola we have commenced the awarding of major contracts on the Greater Plutonio deepwater project.

Production for the quarter was up by more than 9% at 3,936 mboe/d compared with the fourth quarter of 2002. This reflects a full quarter's production volumes from our interest in TNK-BP partly offset by a reduction from divestments. Total production for the year was 3,606 mboe/d, an increase of over 2% on last year and reflects the offsetting impacts of divestments and the inclusion of TNK-BP volumes from 29 August.

The reserve replacement ratio for the year was 122% with 1,342 billion barrels of oil equivalent booked through discoveries, extensions, revisions and improved recovery. Reserve replacement has exceeded production for the eleventh consecutive year. Including equity-accounted entities and the effect of acquisitions and disposals, additions to year end reserves were 158% of 2003 production.

During the fourth quarter we completed our 2003 programme of portfolio upgrading with the sale of our 50% interest in the In Salah gas project in Algeria with proceeds received on 23 December. This brought divestment proceeds for the year to \$4.9 billion.

On 16 January, we announced the completion of the transaction in which Alfa Group and Access-Renova's 50% interest in Slavneft was transferred into TNK-BP.

Gas, Power and Renewables

The pro forma result for the fourth quarter was \$77 million compared with \$72 million a year ago. The year's result, after adjusting for special items, was \$472 million compared to \$384 million for 2002.

The fourth quarter result is up due to an improved marketing and trading result, including LNG, which more than offset a lower result in the natural gas liquids business. The full year result reflects a strong performance from marketing and trading, including LNG, partly offset by a lower result for the natural gas liquids business, restructuring charges in Solar and the absence of a contribution from Ruhrgas following the sale of our interest last year.

The increased marketing and trading results for the quarter and the year were driven by higher gas sales volumes in North America and a strong performance from the global LNG business. Fourth quarter gas sales volumes were up 15% and equity LNG sales were up 36%. During the quarter BP and Sonatrach announced a joint venture that has secured long term capacity rights to the Isle of Grain import regasification terminal in the South East of England, which will enable the two companies to source and then supply 500 mmscfd of LNG into the UK market from 2005. BP announced that it proposes to build an LNG terminal in New Jersey, USA, which is scheduled to come into service around 2008. BP and BPMIGAS of Indonesia have signed a Heads of Agreement with Semptra LNG Corporation for a 20-year supply of LNG from Indonesia to markets in the USA and Mexico. BP has acquired a 35% interest in SK Power (previously a subsidiary of SK Corporation of South Korea), which has begun construction of a power station in Gwangyang, South Korea. The Tangguh LNG project was selected earlier as the supplier to the power station.

The result for the natural gas liquids business for the fourth quarter and year is down due to high gas prices relative to liquids prices in North America, which has led to lower sales volumes.

=====					

(a) Refining availability is the weighted average percentage of the period that refinery units are available for processing, after accounting for downtime such as turnarounds.

(b) The Global Indicator Refining Margin (GIM) is the average of six regional indicator margins weighted for BP's crude refining capacity in each region. Each regional indicator margin is based on a single representative crude with product yields characteristic of the typical level of upgrading complexity. The regional indicator margins may not be representative of the margins achieved by BP in any period because of BP's particular refinery configurations and crude and product slate.

Refining and Marketing

The pro forma result for the fourth quarter, adjusted for special items, was \$722 million. This compares with \$587 million a year ago, an increase of \$135 million. The net special items of \$146 million for the quarter consisted of Veba integration costs of \$156 million and a credit of \$10 million arising from the reversal of restructuring provisions. This represents the final charge in respect of the Veba integration.

The result for the year of \$3,689 million is up \$1,608 million compared to last year, an increase of 77%. The net special items for the year of \$523 million comprised a \$246 million charge resulting from a reassessment of our environmental remediation provisions, Veba integration costs of \$287 million and a credit of \$10 million arising from the reversal of restructuring provisions.

The results for the fourth quarter and year reflect improved refining margins despite higher gas fuel costs, and higher marketing margins, particularly retail

Edgar Filing: BP PLC - Form 6-K

margins in the USA and Europe. Improved operating performance in the marketing businesses also contributed to the results.

Refining throughputs for the quarter were 4.5% lower than the same period last year due to disposals, with refining availability at 94.9% compared with 96.1% a year ago. Full year refining throughputs were flat compared with 2002, while availability for the year was 95.5% compared with 96.1%. Marketing volumes for the quarter were 6% lower than the same period last year and 4% lower for the year, as expected, due to divestments.

The roll-out of our new premium retail fuels, Ultimate gasoline and diesel, continued this quarter. Ultimate is now available in the UK, the USA, Greece, Spain, Portugal and Australia.

During the quarter we reached agreement in principle for H&R WASAG to purchase BP's European Special Products business, including the Neuhof base oil refinery in Hamburg, Germany.

=====			=====		

(a) The Chemicals Indicator Margin (CIM) is a weighted average of externally-based product margins. It is based on market data collected by Nexant (formerly Chem Systems) in their quarterly market analyses, then weighted based on BP's product portfolio. It does not cover our entire portfolio of products, and consequently is only indicative rather than representative of the margins achieved by BP in any particular period. Amongst the products and businesses covered in the CIM are olefins and derivatives, the aromatics and derivatives, linear alpha-olefins (LAOs), acetic acid, vinyl acetate monomers and nitriles. Not included are fabrics and fibres, plastic fabrications, poly alpha-olefins (PAOs), anhydrides, speciality intermediates, and the remaining parts of the solvents and acetyls businesses.

(b) Provisional. The data for the fourth quarter is based on two months' actuals and one month of provisional data.

Petrochemicals

Petrochemicals' pro forma result for the fourth quarter was \$35 million, down

Edgar Filing: BP PLC - Form 6-K

from \$124 million in the third quarter. A slight improvement in margins was more than offset by several factors including operational difficulties in the nitriles business, the strength of the euro on our European cost base and a number of non-routine charges.

There were no special items in the fourth quarter. Special items for the year were \$38 million.

The year's result of \$606 million was down \$159 million. In addition to the factors affecting the fourth quarter, the decrease reflected prolonged margin weakness, primarily in our European polymers businesses, and a lower result from SARS affected businesses in Asia during the first half year.

Petrochemicals production of 7,153 thousand tonnes in the fourth quarter was up 113 thousand tonnes on the previous quarter. Production for the year was 27,943 thousand tonnes, up 3.5% on 2002, establishing a new record for the business. The increase was due to improved asset utilization across the business as well as new production capacity and increased ownership in our Asian associated undertakings.

During the fourth quarter, our portfolio management actions continued. We sold our interest in AG International Chemical Company, a purified isophthalic acid associated undertaking in Japan. Engineering contracts were awarded for a new 300 thousand-tonne acetic acid plant to be built in Taiwan as part of the Formosa BP Chemicals Corporation joint venture.

Other Businesses and Corporate

=====				=====	

Other businesses and corporate comprises Finance, the group's coal asset and aluminium asset, its investments in PetroChina and Sinopec, interest income and costs relating to corporate activities. BP sold its interest in PetroChina for \$1.65 billion on 13 January 2004. The special item for the quarter is a provision for future rental payments on surplus leasehold property. Although not classified as special items, the result also includes charges of \$59 million in respect of additional provisions for litigation and \$41 million for BP Foundation funding and a foreign exchange credit of \$42 million.

37.5	39.0	40.5	Dividends per ADS (cents)	156.0 144.0
-----			-----	

BP today announced a fourth quarterly dividend for 2003 of 6.75 cents per ordinary share. Holders of ordinary shares will receive 3.674 pence per share and holders of American Depositary Receipts (ADRs) \$0.405 per ADS share. The dividend is payable on 15 March to shareholders on the register on 20 February. Participants in the Dividend Reinvestment Plan (DRIP) or the DRIP facility in the US Direct Access Plan will receive the dividend in the form of shares, also on 15 March. The first quarter 2004 results and dividend will be announced on 27 April 2004.

Outlook

BP Group Chief Executive, Lord Browne, concluded:

"The world economy recovered in the fourth quarter. Growth was robust in the USA and in Asia, particularly China, but Europe continued to lag. The USA and Asia are expected to continue growing above trend in 2004 but European growth is expected to remain below trend, with the exception of the UK.

"Crude oil prices continued to strengthen in the fourth quarter, adding around \$1 per barrel compared with the third quarter to average \$29.43 per barrel (Dated Brent). Prices remained strong in January, averaging \$31.32 (Dated Brent) in the face of low US crude oil inventories and cold weather in the eastern USA. Underlying oil demand appears to be strong on the back of global economic recovery and the ongoing economic boom in China, and has been growing faster than oil supply outside OPEC. OPEC fourth quarter production is thought to have increased modestly, despite the 900,000 barrels per day quota cut that became effective on 1 November. We expect that future oil prices will largely depend on OPEC's ability to realign production in line with seasonal requirements.

"US natural gas prices continued to trade between residual fuel oil and distillate parity in the fourth quarter, with the Henry Hub First of the Month Index averaging \$4.58/mmbtu, 39 cents per mmbtu below the third quarter. Cold January weather raised prices to above \$6/mmbtu on average, but they have since eased. Working gas inventories are above last year's and 5-year average levels. We expect the path of gas prices will depend on weather during the balance of winter and movements in oil prices.

"Refining margins in the fourth quarter weakened relative to the third quarter in the face of crude market tightness and recovering product inventories, but remained above historic average levels. Margins have been mostly firm so far in 2004 on the back of strong global oil demand growth and cold US weather. Demand strength should continue to be a constructive factor for refining margins. Retail margins were lower in the fourth quarter relative to the third quarter.

"Petrochemical margins in the fourth quarter remained under pressure from

Edgar Filing: BP PLC - Form 6-K

high feedstock costs and this has carried over into the first quarter of 2004. However, margins and sales are expected to improve in 2004, reflecting modest increases in industry utilization rates.

"Capital expenditure for 2003 was \$14.0 billion, excluding acquisitions, and is projected to be approximately \$13.5 billion in 2004. Production capacity is expected to grow to more than 4 mmb/d in 2004, an increase of more than 10% from actual 2003 output. After adjusting for the impact of portfolio changes, this is consistent with the lower end of the guidance range for 2004 capacity of 3.6 to 3.7 mmb/d given in February 2003. The company intends to restart its share buyback programme this quarter, subject to market conditions. Purchases may be increased, decreased or discontinued at any time without prior notice."

The foregoing discussion, in particular the statements under "Outlook", contains forward looking statements particularly those regarding BP's asset portfolio and changes in it, capital expenditure, costs, demand, future performance, gearing, growth and other trend projections, margins, prices, production, sales, share repurchases and the timing of pending transactions. Forward looking statements by their nature involve risks and uncertainties and actual results may differ from those expressed in such statements depending on a variety of factors including the following: the timing of bringing new fields on stream; industry product supply; demand and pricing; currency exchange rates; operational problems; general economic conditions; political stability and economic growth in relevant areas of the world; changes in governmental regulations; exchange rate fluctuations; development and use of new technology and successful commercial relationships; the actions of competitors; natural disasters and other changes in business conditions; prolonged adverse weather conditions; and wars and acts of terrorism or sabotage. For more information you should refer to our Annual Report and Accounts 2002 and our Annual Report on Form 20-F filed with the US Securities and Exchange Commission.

2. Replacement cost profit

Replacement cost profits reflect the current cost of supplies. The replacement cost profit for the period is arrived at by excluding from the historical cost profit stock holding gains and losses.

Notes

3. Operating profits are after charging:

(b) Excludes shares held by the Employee Share Ownership Plans.

12. Statutory accounts

The above financial information for the year 2003 does not constitute statutory accounts. It is an extract from the 2003 Annual Accounts (except Notes 9 and 10), approved by a duly appointed and authorized committee of the Board of Directors at the Results Committee meeting held on 9 February 2004, but not yet delivered to the UK Registrar of Companies; the report of the auditors on those accounts was unqualified.
