(3) The section captioned "Opinion of Financial Advisor - Discounted Cash Flow Analysis" in Item 4 of the Statement is hereby amended by replacing the fourth full paragraph on page 15 with:

Discounted Cash Flow Analysis. Goldman Sachs performed a discounted cash flow analysis on the Company using the Company's management projections. The per share discounted cash flow values were calculated by aggregating (1) the discounted unlevered free cash flows of the Company in the years 2006E- 2010E, and (2) the discounted values of the terminal enterprise value in the year 2010 based on multiples ranging from 6.0x EBITDA to 7.0x EBITDA. The EBITDA multiples ranging from 6.0x to 7.0x were chosen based on historical public market enterprise value to EBITDA multiples for the Company and selected comparable companies. The unlevered free cash flows and the terminal values were discounted using discount rates ranging from 8.0% to 10.0%. The discount rate range was chosen based on estimates of the weighted average cost of capital for the Company, which was derived by calculating the Company's: (1) cost of equity, using the capital asset pricing model, (2) cost of debt and (3) estimating a targeted capital structure for the Company. The following table presents the results of this analysis:

(4) The section captioned "Opinion of Financial Advisor - Additional Premium Analysis" in Item 4 of the Statement is hereby amended by deleting the first full paragraph on page 17 and replacing it with the following:
