Table of Contents**SABA SOFTWARE, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(unaudited)****1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements include the accounts of Saba Software, Inc. and its wholly owned subsidiaries (Saba or the Company) and, in the opinion of management, reflect all adjustments (consisting only of normal recurring adjustments) necessary to fairly state Saba's consolidated financial position, results of operations, and cash flows as of and for the dates and periods presented.

These unaudited condensed consolidated financial statements should be read in conjunction with Saba's audited consolidated financial statements included in Saba's Annual Report on Form 10-K filed with the Securities and Exchange Commission on August 29, 2005. The results of operations for the three and nine months ended February 28, 2006 are not necessarily indicative of results for the entire fiscal year ending May 31, 2006 or for any future period.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. The condensed consolidated balance sheet at May 31, 2005 has been derived from the audited financial statements at that date.

2. Basic and Diluted Net Loss Per Share

Basic and diluted net loss per share information for all periods is presented under the requirements of Statement of Financial Accounting Standards (SFAS) No. 128, Earnings per Share. Basic net loss per share has been computed using the weighted-average number of shares of common stock outstanding during the period, less the weighted-average number of shares that may be repurchased. Basic earnings per share excludes any dilutive effects of stock options as well as any contingently issuable shares. (Contingently issuable shares are shares that would be issuable if the end of the reporting period were the end of the contingency period.) For all periods presented, diluted net loss per share excludes shares of potential common stock since the effect is anti-dilutive.

The calculations of basic and diluted net loss per share are as follows (in thousands):

	Three months ended		Nine months ended	
	February 28,	February 28,	February 28,	February 28,
	2006	2005	2006	2005
Net loss	\$ (1,944)	\$ (485)	\$ (3,435)	\$ (2,844)
Weighted-average shares of common stock outstanding	20,674	16,146	18,490	15,421
Weighted-average shares of common stock subject to repurchase				(2)
Weighted-average shares of common stock used in computing basic and diluted net loss per share	20,674	16,146	18,490	15,419
Basic and diluted net loss per share	\$ (0.09)	\$ (0.03)	\$ (0.19)	\$ (0.18)

3. Comprehensive Loss

Saba reports comprehensive loss in accordance with SFAS No. 130, Reporting Comprehensive Income. The following table sets forth the calculation of comprehensive loss for all periods presented (in thousands):

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

	Three months ended		Nine months ended	
	February 28, 2006	February 28, 2005	February 28, 2006	February 28, 2005

Foreign currency translation gain (loss)	2	13	(163)	49
Comprehensive loss	\$ (1,942)	\$ (472)	\$ (3,598)	\$ (2,795)

4. Goodwill and Purchased Intangible Assets

Business Combinations

Fiscal 2006 Acquisition

On January 31, 2006, Saba acquired Centra Software, Inc. (Centra), a leading provider of software and services for online learning and training. As part of Saba's strategy to establish itself as the market leader in the enterprise learning software industry, Saba acquired Centra to leverage the Company's collaborative learning offering in order to provide the industry's first complete enterprise learning solution.

Table of Contents

The Centra acquisition has been accounted for as a business combination. Assets acquired and liabilities assumed were recorded at their fair values as of January 31, 2006. The results of operations for Centra are included in the statement of operations of the Company for the period February 1, 2006 through February 28, 2006. The total preliminary purchase price is \$62.3 million, including acquisition-related transaction costs, and is comprised of (in thousands):

Saba common stock (10.4 million shares valued at \$3.65)	\$ 37,820
Cash	19,403
Acquisition transaction costs	5,037
 Total preliminary purchase price	 \$ 62,260

Acquisition-related transaction costs include our estimate of legal and accounting fees and other external costs directly related to the Centra acquisition. The Saba common stock was valued based on the average closing sales price on the Nasdaq National Market from two days before and two days after the announcement date of the transaction, October 6, 2005.

Under business combination accounting, the total preliminary purchase price was allocated to Centra's net tangible and identifiable intangible assets based on their estimated fair values as of January 31, 2006. The excess of the purchase price over the net tangible and identifiable intangible assets will be recorded as goodwill. Based upon a preliminary valuation, the total preliminary purchase price was allocated as follows (in thousands):

		Estimated Useful Lives
Cash	27,731	
Accounts receivable	4,333	
Prepaid expenses	2,060	
Property and equipment	928	
Core technology	5,890	5 years
Customer relationships	10,170	6 years
Tradenames	820	5 years
Customer backlog	440	3 years
In-process research and development	760	
Goodwill	21,948	
Other assets	481	
Accounts payable	(1,545)	
Deferred revenue	(6,824)	
Accrued expenses	(3,667)	
Short and long-term debt	(702)	
Other long-term liabilities	(563)	
 Total preliminary purchase price	 \$ 62,260	

The preliminary allocation of the purchase price was based upon a preliminary estimated fair value of developed core technology, customer relationships, tradenames, customer backlog and in-process research and development, and was determined by management with the assistance of a third-party valuation. Our estimates and assumptions are subject to change upon the finalization of the valuation. In performing the preliminary purchase price allocation of acquired intangible assets, the Company considered its intention for future use of the assets, analyses of historical financial performance and estimates of future performance of Centra's products, among other factors. In addition to identifiable intangible assets, the Company also purchased certain technologies being developed by Centra at the time of the acquisition, which is commonly referred to as In-Process Research and Development (IPR&D). The IPR&D acquired primarily related to Centra's products designed specifically for online business communication, collaboration and learning. Because the IPR&D had not yet reached technological feasibility and had no alternative future use, the Company recorded a \$760,000 expense under the heading in-process research and development in the accompanying consolidated statements of operations during the third quarter of fiscal 2006.

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

The Company determined the fair values of identifiable intangible assets and the IPR&D using the income valuation approach with discount rates ranging from 18% to 23%. The discount rates selected were based in part on considerations of the rate of return implied by the purchase price and the risk associated with achieving forecasted cash flows for Centra. Further, the Company also considered risks associated with achieving anticipated levels of market penetration, the successful completion of its research and development efforts and risks related to the impact of potential changes in future target markets.

The primary areas of the purchase price allocation that are not yet finalized to certain legal matters. If information becomes available to the Company prior to the end of the purchase price allocation period that would indicate that a liability is probable and the amount can be reasonably estimated, such items will be included in the purchase price allocation.

Goodwill represents the excess of the purchase price over the fair value of tangible and identifiable intangible assets acquired. Goodwill amounts are not amortized, but rather are tested for impairment at least annually. In the event that Saba determines that the value of goodwill has become impaired, the Company will incur an accounting charge for the amount of impairment during the fiscal quarter in which such determination is made. Goodwill is not deductible for income tax purposes.

Net tangible assets were valued at their respective carrying amounts, except for deferred revenues that were written down to amounts that approximate their current fair values. Deferred revenues were reduced by \$8.1 million to adjust deferred revenue to an amount equivalent to our legal obligation representing the estimated cost plus an appropriate profit margin to perform the services related to Centra's software support and hosting contracts and performance of pre-paid professional services.

Table of Contents

The unaudited pro forma financial information combines the historical results for Saba with the historical results for Centra for the three and nine months ended February 28, 2006, and are as follows:

(in thousands, except per share data)	Three Months Ended February 28,		Nine Months Ended February 28,	
	2006	2005	2006	2005
Total revenues	\$ 26,707	\$ 22,700	\$ 76,099	\$ 62,737
Net income (loss)	\$ 891	\$ (5,388)	\$ (1,683)	\$ (22,078)
Basic and diluted net loss per share	\$ 0.03	\$ (0.20)	\$ (0.06)	\$ (0.91)

Fiscal 2005 Acquisition

On May 5, 2005, Saba acquired THINQ Learning Solutions, Inc. (THINQ), a provider of enterprise management solutions.

Under the terms of the merger agreement, the aggregate consideration paid by Saba was 1,700,000 shares of Saba common stock and cash of \$100,000. The 1,700,000 shares are subject to a post-closing balance sheet adjustment. As of May 31, 2005, approximately 635,000 Saba shares were held in escrow in connection with this transaction, consisting of approximately 360,000 shares for stockholders indemnification obligations for general liability and approximately 275,000 shares for post-closing balance sheet adjustments including certain accounts receivable. As of February 28, 2006, Saba has claimed 134,389 shares from escrow and expects such shares will be cancelled in the fourth quarter of fiscal 2006. During the quarter ended August 31, 2005, Saba released 220,000 shares from escrow related to cash received on certain accounts receivable. In addition, up to an additional 100,000 shares of Saba common stock may be issued in three equal installments over a three-year period pursuant to an earn-out provision that is based on the number of THINQ customers that migrate to the Saba platform. These shares, if issued, will be accounted for in the periods in which they are earned.

The THINQ acquisition was accounted for as a purchase business combination. Assets acquired and liabilities assumed were recorded at their fair values as of May 5, 2005. The total preliminary purchase price was \$9.3 million, including acquisition-related transaction costs.

The preliminary allocation of the purchase price was based upon a preliminary valuation, and our estimates and assumptions are subject to change upon the finalization of the valuation. We have identified certain pre-acquisition contingencies, but we have yet to conclude whether the fair values for such contingencies are determinable. The primary area of the purchase price allocation that is not yet finalized relates to income taxes related to certain of our acquired foreign subsidiaries. If information becomes available to Saba prior to the end of the purchase price allocation period that would indicate that a liability is probable and the amount can be reasonably estimated, such liability will be included in the final purchase price allocation and goodwill will be increased.

Summary of Purchased Intangible Assets and Goodwill

Purchased intangible assets and accumulated amortization consisted of the following (in thousands):

	February 28, 2006	May 31, 2005
Core technology	\$ 5,890	\$
Customer relationships	14,920	4,750
Tradenames	820	
Customer backlog	740	300
Total purchased intangible assets	\$ 22,370	\$ 5,050
Accumulated amortization	906	57
Purchased intangible assets, net	\$ 21,464	\$ 4,993

The change in the carrying amount of goodwill was as follows (in thousands):

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

	February 28, 2006	May 31, 2005
Balance, beginning of year	\$ 15,164	\$ 5,288
Goodwill acquired during the year	21,948	9,876
Goodwill adjustments relating to prior year acquisitions	(296)	
Balance at end of period	\$ 36,816	\$ 15,164

Purchased intangible assets consist of intellectual property, customer base and non-competition agreements acquired as part of a purchase business combination. During the three months ended February 28, 2006, \$18.1 million of intangible assets were added in connection with the acquisition of Centra. There were no additions to intangible assets during the nine months ended February 28, 2006 related to the acquisition of THINQ.

Table of Contents

The estimated future amortization expense of purchased intangible assets at February 28, 2006 is presented in thousands below.

Fourth quarter of fiscal year 2006	\$ 991
Fiscal year 2007	3,963
Fiscal year 2008	3,955
Fiscal year 2009	3,813
Fiscal year 2010	3,715
Thereafter	5,027
Total	\$ 21,464

5. Credit Facility

On January 31, 2006, the Company entered into a new credit facility with a bank. The credit facility replaces the Company's existing credit facility with the bank. The credit facility provides for (i) a term loan in a principal amount of \$6,500,000, and (ii) a receivables borrowing base revolving credit line in an aggregate principal amount of up to \$7,500,000 at any time outstanding, which includes a sub-limit of up to \$5,000,000 for letters of credit, cash management and foreign exchange services. The term loan will be repaid in 36 equal monthly installments of principal, plus interest. The maturity date of the term loan and the revolving credit line is January 31, 2009. The interest rate applicable to the loans under the credit facility is the bank's prime rate plus 0.50% for the term loan and the bank's prime rate plus 0.25% for borrowings under the revolving credit line. The Company is required to pay an early termination fee if the credit facility is terminated by the bank due to the occurrence of an event of default or is refinanced by another financial institution, in each case, prior to the second anniversary of the credit facility. As of February 28, 2006, the Company had borrowings on the credit facility of \$6.5 million.

The credit facility is secured by all of the Company's personal property other than its intellectual property. The credit facility includes certain negative covenants restricting or limiting the ability of the Company and its subsidiaries to, among other things: incur additional indebtedness; create liens on its property; make certain investments and acquisitions; merge or consolidate with any other entity; convey, sell, lease, transfer or otherwise dispose of assets; change its business; change of control; pay dividends, distributions or make other specified restricted payments; and enter into certain transactions with affiliates. Such restrictions and limitations are subject to usual and customary exceptions contained in credit agreements of this nature. In addition, the credit facility requires the Company to satisfy a minimum consolidated EBITDA covenant on a quarterly basis, and a minimum liquidity covenant on a monthly basis. As of February 28, 2006, the Company was in compliance with all covenants. If we violate any of these restrictive covenants or otherwise breach the credit facility agreement, the Company may be required to repay the obligations under the credit facility prior to their stated maturity date, the Company's ability to borrow under the revolving credit line may be terminated, and the bank may be able to foreclose on any collateral provided by the Company.

6. Restructuring

During fiscal 2004 and prior years, Saba implemented restructuring programs to reduce expenses to align its operations and cost structure with market conditions. The restructuring programs during fiscal 2004 were implemented under the provisions of SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, while the restructuring programs during fiscal 2003 and fiscal 2002 were implemented under EITF No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). The restructuring programs included worldwide workforce reductions across all functions and consolidation of excess facilities. Workforce reduction charges consisted primarily of severance and fringe benefits. A summary of the movements on the restructuring accrual during the nine months ended February 28, 2006 is outlined as follows:

Table of Contents

	Workforce Reduction Charges	Facilities Related Charges (in thousands)	Total
Accrual as of May 31, 2005	\$ 22	\$ 251	\$ 273
Deductions cash payments	(22)	(205)	(227)
Accrual as February 28, 2006	\$	\$ 46	\$ 46

Amounts related to the excess facility charge will be paid over the remaining lease periods through the end of fiscal 2006.

Fiscal 2006 Centra Restructuring Plan

As part of the acquisition of Centra, management approved and initiated a plan to restructure and eliminate duplicative pre-merger activities and reduce the Company's cost structure. Total restructuring costs associated with exiting activities of Centra at January 31, 2006 were approximately \$2.0 million. These costs were accrued as part of the Centra preliminary purchase price allocation. The following table reflects post-acquisition payments during the period ended February 28, 2006:

	Workforce Reduction Charges	Facilities Related Charges (in thousands)	Total
Accrual as of January 31, 2006	\$ 1,415	\$ 559	\$ 1,974
Deductions cash payments	(186)		(186)
Accrual as of February 28, 2006	\$ 1,229	\$ 559	\$ 1,788

7. Stock Options and Equity Instruments Exchanged for Services

Saba accounts for employee stock options using the intrinsic value method in accordance with APB Opinion No. 25, Accounting for Stock Issued to Employees while adhering to the disclosure requirements of SFAS No. 123, Accounting for Stock-Based Compensation and SFAS No. 148 Accounting for Stock-Based Compensation Transition and Disclosure. The fair value of options, warrants and restricted stock issued for services rendered by non-employees or assets acquired is determined using the Black-Scholes-Merton option-pricing model. To calculate the expense or asset value, Saba uses either the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measured. The following table illustrates the effect on net loss and net loss per share had compensation cost for Saba's stock compensation plans been determined using the fair value method required by SFAS No. 123 (in thousands, except per share amounts):

	Three months ended February 28,		Nine months ended February 28,	
	2006	2005	2006	2005
Net loss	\$ (1,944)	\$ (485)	\$ (3,435)	\$ (2,844)
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(1,052)	(1,724)	(2,992)	(6,390)
Pro forma net loss	\$ (2,996)	\$ (2,209)	\$ (6,427)	\$ (9,234)
Basic and diluted net loss per share	\$ (0.09)	\$ (0.03)	\$ (0.19)	\$ (0.18)
Pro forma basic and diluted net loss per share	\$ (0.14)	\$ (0.14)	\$ (0.35)	\$ (0.60)
Shares used in calculating basic and diluted net loss per share	20,674	16,146	18,490	15,419

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

The value of stock-based awards on the date of grant using the Black-Scholes-Merton option pricing model was calculated using the assumptions in the following table:

	Three months ended February 28,		Nine months ended February 28,	
	2006	2005	2006	2005
Employee Options				
Dividend yield	0%	0%	0%	0%
Volatility	1.25	1.31	1.27	1.31
Risk free rate of interest	4.69%	3.91%	4.32%	3.91%
Expected lives of options (in years)	2.45	2.24	2.38	2.24

	Three months ended February 28,		Nine months ended February 28,	
	2006	2005	2006	2005
Employee Stock Purchase Plan				
Dividend yield	0%	0%	0%	0%
Volatility	.94	.76	.94	.76
Risk free rate of interest	4.69%	2.13%	4.32%	2.13%
Expected lives of purchase option (in years)	.5	.5	.5	.5

8. Guarantees

Saba enters into license agreements that generally provide indemnification for its customers against intellectual property claims. To date, Saba has not incurred any costs as a result of such indemnifications and has not accrued any liabilities related to such obligations in its consolidated financial statements.

Saba's license agreements also generally include a warranty that its software products will substantially operate as described in the applicable program documentation for a period of generally 90 days after delivery. To date, Saba has not incurred or accrued any material costs associated with these warranties.

Table of Contents

9. Segment Information

Saba provides software and services that increase business performance through human capital development and management. Since management's primary form of internal reporting is aligned with the offering of these software products and services, we believe that we operate in one segment for financial reporting purposes.

During the third quarter of fiscal 2006, no customers accounted for more than 10% of our revenue. No customer had an account receivable balance of 10% or greater of our total accounts receivable balance as of February 28, 2006.

10. Legal Matters

In November 2001, a complaint was filed in the United States District Court for the Southern District of New York against us, certain of our officers and directors, and certain underwriters of our initial public offering. The complaint was purportedly filed on behalf of a class of certain persons who purchased our common stock between April 6, 2000 and December 6, 2000. The complaint alleges violations by us and our officers and directors of Section 11 of the Securities Act of 1933, Section 10(b) of the Exchange Act of 1934, and other related provisions in connection with certain alleged compensation arrangements entered into by the underwriters in connection with the offering. An amended complaint was filed in April 2002. Similar complaints have been filed against hundreds of other issuers that have had initial public offerings since 1998. The complaints allege that the prospectus and the registration statement for the offering failed to disclose that the underwriters allegedly solicited and received excessive commissions from investors and that some investors in the IPO offering agreed with the underwriters to buy additional shares in the aftermarket in order to inflate the price of our stock. The complaints were later consolidated into a single action. The complaint seeks unspecified damages, attorney and expert fees, and other unspecified litigation costs.

On July 1, 2002, the underwriter defendants in the consolidated actions moved to dismiss all of the actions, including the action involving us. On July 15, 2002, we, along with other non-underwriter defendants in the coordinated cases, also moved to dismiss the litigation. On February 19, 2003, the Court ruled on the motions. The Court granted our motion to dismiss the claims against us under Rule 10b-5, due to the insufficiency of the allegations against us. The Court also granted the motion of the individual defendants, Bobby Yazdani and Terry Carlitz, our Chief Executive Officer and Chairman of the Board and our former Chief Financial Officer and a member of our board of directors, to dismiss the claims against them under Rule 10b-5 and Section 20 of the Exchange Act. The motions to dismiss the claims under Section 11 of the Securities Act were denied as to virtually all of the defendants in the consolidated cases, including us.

On July 16, 2003, a committee of our board of directors conditionally approved a proposed partial settlement with the plaintiffs in this matter. The settlement would provide, among other things, a release of us and of the individual defendants for the conduct alleged in the action to be wrongful in the amended complaint. We would agree to undertake other responsibilities under the partial settlement, including agreeing to assign away, not assert, or release certain potential claims we may have against our underwriters. Any direct financial impact of the proposed settlement is expected to be borne by our insurers.

In June 2004, an agreement of settlement was submitted to the Court for preliminary approval. The Court granted the preliminary approval motion on February 15, 2005, subject to certain modifications. On August 31, 2005 the Court issued a preliminary order further approving the modifications to the settlement and certifying the settlement classes. The Court also appointed the notice administrator for the settlement and ordered that notice of the settlement be distributed to all settlement class members by January 15, 2006. The settlement fairness hearing has been set for April 24, 2006. Following the hearing, if the Court determines that the settlement is fair to the class members, the settlement will be approved. There can be no assurance that this proposed settlement will be approved and implemented in its current form, or at all.

If the settlement process fails, we intend to dispute these claims and defend the law suit vigorously. However, due to the inherent uncertainties of litigation, we cannot accurately predict the ultimate outcome of the litigation. An unfavorable outcome in litigation could materially and adversely affect our business, financial condition and results of operations.

Centra, certain of its former and current officers and directors and the managing underwriters of Centra's initial public offering were named as defendants in an action filed in the United States District Court for the Southern District of New York. The plaintiffs filed an initial complaint on December 6, 2001 and purported to serve the Centra defendants on or about March 18, 2002. The original complaint has been superseded by an amended complaint (complaint) filed in April 2002. The action, captioned in re Centra Software, Inc. Initial Public Offering Securities Litigation, No. 01 CV 10988, which is being coordinated with an action captioned in re Initial Public Offering Securities Litigation, No. 21 MC 92, is purportedly brought on behalf of the class of persons who purchased Centra's common stock between February 3, 2000 and December 6, 2000. The complaint asserts claims under Sections 11 and 15 of the Securities Act of 1933 and Sections 10(b) and 20(a) of the Securities Exchange Act of 1934. The complaint alleges that, in connection with Centra's initial public offering in February 2000, the underwriters received undisclosed commissions from certain investors in exchange for allocating shares to them and also agreed to allocate shares to certain customers

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

in exchange for the agreement of those customers to purchase additional shares in the after-market at pre-determined prices. The complaint asserts that Centra's registration statement and prospectus for the offering were materially false and misleading due to their failure to disclose these alleged arrangements. The complaint seeks damages in an unspecified amount against Centra and the named individuals. The underwriter defendants and the Centra defendants joined in motions to dismiss the above-reference action on July 3 and July 15, 2002, respectively. On October 9, 2002, the plaintiffs dismissed, without prejudice, the claims against the named Centra officers and directors in the above-referenced action. On February 19, 2003, the court issued an order denying the motion to dismiss as to Centra and other defendants. On June 7, 2003, the plaintiffs announced a proposed settlement with all issuers, including Centra. On June 25, 2004, the plaintiffs filed a motion with the United States District Court for the Southern District of New York requesting preliminary approval of the settlement. The court has given preliminary approval of the settlement. Saba plans to participate in this settlement, which has been negotiated, and will be fully funded directly to the plaintiffs, by Centra's insurers. No amount has been accrued related to this matter and legal costs incurred in the defense of the matter are being expensed as incurred.

On August 19, 2003, a complaint was filed against Centra and two other defendants by EdiSync Systems, LLC, in the United States District Court for the District of Colorado (No. 03-D-1587 (OES)). The complaint alleges infringement of two patents for a remote multiple user editing system and method and seeks permanent injunctive relief against continuing infringement, compensatory damages in an unspecified amount, and interest, costs and expenses associated with the litigation. The Company has filed an answer to the complaint denying all of the allegations. No amount has been accrued related to this matter and legal costs incurred in the defense of the matter are being expensed as incurred. Centra filed a request for reexamination of the patents at issue with the U.S. Patent and Trademark Office. Our patent counsel is of the opinion that claims of the patents involved in the suit are invalid. The re-examination request was accepted by the Patent Office and the District Court has approved the parties' motion to stay the court proceedings during the re-examination proceedings. The Patent Office has issued a non-final rejection of all claims in each of the patents. Saba believes that it has meritorious defenses and Saba intends to vigorously defend this action.

We are also party to various legal disputes and proceedings arising from the ordinary course of general business activities. While, in the opinion of management, resolution of these matters is not expected to have a material adverse effect on our consolidated financial position, results of operations or cash flows, the ultimate outcome of any litigation is uncertain. Were an unfavorable outcome to occur, the impact could be material to us.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and related notes contained herein and the information included in our annual report on Form 10-K for our fiscal year ended May 31, 2005 and in our other filings with the Securities and Exchange Commission. This discussion includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act) and Section 21E of the Securities and Exchange Act of 1934, as amended (the Exchange Act). All statements in this Quarterly Report on Form 10-Q other than statements of historical fact are forward-looking statements for purposes of these provisions, including any statements of the plans and objectives for future operations and any statement of assumptions underlying any of the foregoing. Statements that include the use of terminology such as may, will, expects, believes, plans, estimates, potential, or continue, or the negative thereof or other comparable terminology are forward-looking statements.

Forward-looking statements include:

(i) in Part I, Item 1,

statements regarding future amortization related to intangible assets,

statements regarding workforce reduction payments and payments related to the excess facility charge,

statements regarding the resolution and effect of pending litigation,

(ii) in Part I, Item 2,

statements regarding our acquisition of Centra continuing to strengthen our competitive position in the human capital management market and allowing us to broaden and deepen our product offerings,

statements regarding our customer base and our global reach and resources resulting from the acquisition of Centra,

statements regarding our expectation that the Centra product lines and our Saba Performance product will generate a larger percentage of our license sales,

statements regarding our expectation that the OnDemand line of revenue will become a larger percentage of our total revenue,

statements regarding our expectation that license updates and product support revenue will increase,

statements regarding the effects of the THINQ acquisition,

statements regarding our anticipation that we will continue to experience long sales cycles,

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

statements regarding our expectation that we will derive substantially all of our revenues for the foreseeable future from the licensing of Saba's Human Capital Management (HCM) software suite, including online learning and collaboration software acquired in connection with the acquisition of Centra,

statements regarding our expectation that we will increase our operating expenses to expand our sales and marketing operations, fund greater levels of research and development, develop new alliances, increase our services and support capabilities and improve our operational and financial systems,

statements regarding our intention to more tightly integrate Centra's products and intellectual property with our products and intellectual property,

statements regarding continued investment in areas that we believe accelerate growth,

statements regarding our intention to continue to expand our international presence,

statements regarding our expectation to continue to acquire complementary businesses or technologies,

statements regarding our expectation to continue to incur non-cash expenses relating to the amortization of purchased intangible assets along with any potential goodwill impairment,

statements regarding our belief that our existing capital resources will be sufficient to meet our capital requirements for the next twelve months,

statements regarding the adequacy of our tax provision,

statements regarding future restructuring changes,

statements regarding Saba's contractual obligations and commitments,
(iii) in Part I, Item 3,

statements regarding our belief that an unfavorable change of 10% in foreign currency rates would not have a material impact on our financial statements, and
(iv) in Part II, Item 1,

statements regarding the resolution and effect of pending litigation.

These forward-looking statements involve known and unknown risks and uncertainties. Our actual results may differ materially from those projected or assumed in such forward-looking statements. Among the factors that could cause actual results to differ materially are unanticipated difficulties and costs in integrating Centra with us, incorrect estimates or assumptions, unanticipated adverse results for pending litigation, contraction of the economy and world markets, lack of demand for information technologies from our customers, requirements for increased spending in research and development, unanticipated need for capital for operations, lack of demand for our products, inability to introduce new products and the factors detailed under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations - Factors That May Impact Future Operating Results." All forward-looking statements and risk factors included in this document

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

are made as of the date of this report, based on information available to us as of such date. We assume no obligation to update any forward-looking statement or risk factor.

Overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide readers with an understanding of the Company. The following are included in our MD&A:

Overview of our Business and Industry;

Critical Accounting Policies and Estimates;

Results of Operations;

Liquidity and Capital Resources; and

Risk Factors.

Table of Contents

OVERVIEW OF OUR BUSINESS AND INDUSTRY

Business, Principal Products, and Locations

We are a leading provider of human capital management solutions, which are designed to increase organizational performance through the implementation of a management system for aligning goals, developing and motivating people and measuring results. Our solutions can help large enterprises align their workforce around their business objectives, efficiently manage regulatory compliance, increase sales and channel readiness, accelerate time-to-competency of people across the extended enterprise, increase speed of customer acquisition, decrease time-to-market for new products and increase visibility into organizational performance.

We commenced operations in April 1997 and, through March 1998, focused substantially all of our efforts on research activities, developing our products and building our business infrastructure. In April 1998, we shipped our first Saba Learning products and began to generate revenues from software license fees, implementation and consulting services fees and support fees. In August 2003, we shipped our generally available version of Saba Performance products.

On May 5, 2005, we completed the acquisition of THINQ Learning Solutions, Inc. (THINQ), a provider of enterprise learning management solutions which allowed us to expand our customer base and provided greater scale to increase our investment in research and development to accelerate innovation and increase stockholder value.

On January 31, 2006, we completed the acquisition of Centra Software, Inc (Centra), a provider of online learning and training software and services. Under the terms of the merger agreement, each share of Centra common stock held by Centra stockholders was converted into the right to receive (a) 0.354 of a share of Saba common stock and (b) \$0.663 in cash. The aggregate consideration paid by us was approximately 10.4 million shares of common stock and approximately \$19.4 million of cash. Assets acquired and liabilities assumed in the acquisition were recorded at their fair values as of February 1, 2006. The total preliminary purchase price, including acquisition-related transaction costs, was \$62.3 million. We believe our acquisition of Centra continues to strengthen our competitive position in the human capital management market and allows us to broaden and deepen our product offerings. In addition, as a result of the acquisition our customer base is substantially larger and we have enhanced our global reach and resources, allowing us to better serve our customers.

Our revenues are derived from the sale of licenses of our software products, our OnDemand offerings, license updates and product support and professional services.

Software Licenses

We license our software solutions in multi-element arrangements that include a combination of our software, license updates and product support and/or professional services. A significant amount of our license sales are for perpetual licenses. To date, a substantial majority of our software license revenue has been derived from the Saba Learning product suite. Going forward, we expect the Centra product lines and our Saba Performance product to generate a larger percentage of our license sales. Our license revenue is affected by the strength of general economic and business conditions, as well as customers' budgetary cycles and the competitive position of our software products. In addition, the sales cycle for our products is long, typically six to 12 months. The timing of a few large software license transactions can substantially affect our quarterly license revenue.

On Demand

OnDemand revenue includes revenue derived from subscription-based managed application services. These services are generally provided pursuant to annual agreements and the associated revenue is recognized ratably over the term of the agreement. With the acquisition of Centra, we believe that this line of revenue will become a larger percentage of our total revenue.

License Updates and Product Support

License updates and product support includes the right to receive future unspecified updates for the applicable software product and technical support. We typically sell license updates and product support for an initial period of one year concurrently with the sale of the related software license. After the initial period, license updates and product support is renewable on an annual basis at the option of the customer. Accordingly, our license updates and product support revenue depends upon both on our sale of additional software licenses and annual renewals of existing license updates and product support agreements. In addition, we expect license updates and product support revenue to increase due to our expanded customer base resulting from the Centra acquisition. As a result of the Centra acquisition, we recorded adjustments totaling \$4.7 million to reduce the Centra's license updates and product support obligations to the estimated fair value at the date of acquisition. As former

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

Centra customers renew their license updates and product support contracts, we will recognize the full value of the license updates and product support contracts as deferred revenues and recognize the related revenue ratably over the contract period.

We believe that license updates and product support revenue will continue to grow as we anticipate that a substantial majority of our customers, as well as former Centra customers, will renew their annual contracts and the sale of new software licenses will increase the number of customers that purchase product support.

Professional Services

Our professional services business consists of consulting, education and learning services. Consulting and education services are typically initiated and provided to customers that license software directly from us over a period of time from three to nine months after licensing the software. Accordingly, our consulting and education services revenue varies directly with the levels of license revenue generated from our direct sales organization in the preceding three to nine-month period. In addition, our consulting and education services revenue varies following our commercial release of significant software updates as our customers generally engage our services to assist with the implementation of their software upgrade. Although we provide consulting services on a time and materials basis, a significant portion of these services is provided on a fixed fee basis. Learning services are less dependent than consulting and education services on the sale of our licenses. Learning services present additional opportunities that arise at different times throughout a customer life cycle.

Our corporate headquarters are located in Redwood Shores, California. We have an international presence in India, France, Japan, Germany, the United Kingdom, Canada and Australia through which we conduct various operating activities related to our business. In each of the non-U.S. jurisdictions in which we have subsidiaries, other than India, we have employees or consultants engaged in sales and services activities. In the case of our India subsidiary, our employees primarily engage in software development and quality assurance testing activities.

Significant Trends and Developments in Our Business

Beginning in the later part of fiscal 2004, many key indicators began to demonstrate signs of an economic recovery. Consistent with these indicators, our business began to improve during the fourth quarter of fiscal 2004 and throughout fiscal 2005 and the first three quarters of fiscal 2006. Despite these recent improvements in macro-economic trends, we believe many of our customers have not resumed previous levels of expenditures on information technologies, particularly enterprise software. We attribute this continued level of depressed spending on enterprise software to customers' concerns regarding the sustainability of the current economic recovery and the current geopolitical environment.

Table of Contents

In order to achieve profitability, we will need to generate significantly higher revenue and continue to manage our expenses. Our ability to generate higher revenues and achieve profitability depends on many factors, including the demand for our products and services, the level of product and price competition, market acceptance of our new products, general economic conditions and the successful integration of Centra. In this regard, we continue to invest in areas that we believe can accelerate revenue growth and to manage expenses to align our operations and cost structure with market conditions.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our discussion and analysis of financial condition and results of operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ materially from those estimates. We base our estimates and judgments on historical experience and on various other assumptions that we believe are reasonable under the circumstances. However, future events are subject to change and the best estimates and judgments routinely require adjustment. While there are a number of accounting policies, methods and estimates affecting our financial statements, areas that are particularly significant include revenue recognition policies, the allowance for doubtful accounts, the assessment of recoverability of goodwill and purchased intangible assets and restructuring costs. We have reviewed the critical accounting policies described in the following paragraphs with our Audit Committee.

Revenue Recognition. We recognize revenues in accordance with the provisions of American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended by SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions. Under SOP 97-2, as amended, we recognize revenues when all of the following conditions are met:

- persuasive evidence of an arrangement exists;
- delivery has occurred;
- the fee is fixed or determinable; and
- collection is probable.

SOP 97-2, as amended, requires revenue earned on software arrangements involving multiple elements to be allocated to each element based on the relative fair values of the elements. We have analyzed each element in our multiple-element arrangements and determined that we have sufficient vendor-specific objective evidence (VSOE) to allocate revenues to certain OnDemand offerings, license updates and product support and professional services. Accordingly, assuming all other revenue recognition criteria are met, revenues from perpetual licenses are recognized upon delivery using the residual method in accordance with SOP 98-9. We limit our assessment of VSOE for each element to either the price charged when the same element is sold separately or the price established by management, having the relevant authority to do so, for an element not yet sold separately.

License revenues from licenses with a term of three years or more are generally recognized on delivery if the other conditions of SOP 97-2 are satisfied. We do not grant our resellers the right of return and we do not recognize revenue from resellers until the end-user has been identified. License revenues from licenses with a term of less than three years are generally recognized ratably over the term of the arrangement. License updates and product support revenue is also recognized ratably over the term of the arrangement, typically 12 months, and revenue related to professional services is generally recognized as the services are performed. Although we provide professional services on a time and materials basis, a significant portion of these services is provided on a fixed-fee basis. For contracts that involve significant customization and implementation or consulting services that are essential to the functionality of the software, the license and services revenues are recognized over the service delivery period using the percentage-of-completion method. We use labor hours incurred as a percentage of total expected hours as the measure of progress towards completion.

Revenue from our OnDemand offerings is recognized as a service arrangement whereby the revenue is recognized ratably over the term of the arrangement or on an as-used basis if defined in the contract. Certain of our OnDemand offerings are integrated offerings pursuant to which the customers' ability to access our software is not separable from the services necessary to operate the software and customers are not allowed to take possession of our software, in which case revenue is recognized under SAB 104, Revenue Recognition. Our OnDemand offerings also include arrangements with customers that have separately licensed and taken possession of our software. When these OnDemand offerings are part of a multiple element arrangements involving licenses, we recognize revenue in accordance with SOP 97-2, Software Revenue Recognition.

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

Allowance for doubtful accounts. Accounts receivable are recorded net of allowance for doubtful accounts and totaled \$18.2 million at February 28, 2006. The allowance for doubtful accounts, which totaled \$324,000 at February 28, 2006, is based on our assessment of the collectibility of specific customer balances and the aging of the accounts receivable. If there is a deterioration of a significant customer's credit worthiness or actual defaults are higher than our historical experience, we may be required to increase the allowance for doubtful accounts.

Recoverability of goodwill and purchased intangible assets. We adopted SFAS No. 142, Goodwill and Other Intangible Assets, and accordingly, we do not amortize goodwill. We have evaluated our purchased intangible assets and determined that all such assets have determinable lives. Our goodwill balance at February 28, 2006 was \$31.5 million, including \$21.9 million and \$9.9 million, respectively, recorded as a result of our acquisitions of Centra and THINQ. Amortization of purchased intangible assets was \$1.1 million and \$1.4 million for the three and nine-month periods ended February 28, 2006 and zero amortization for the same periods in the prior fiscal year. As of February 28, 2006, our net purchased intangible assets balance was \$21.5 million of which \$17.1 million relates to the Centra acquisition and \$4.4 million which relates to the THINQ acquisition.

SFAS No. 142 prescribes a two-phase process for impairment testing of goodwill. The first phase screens for impairment; while the second phase, if necessary, measures the impairment. We consider Saba to be a single reporting unit. Accordingly, all of our goodwill is associated with the entire company. We perform the required impairment analysis of goodwill annually, or on an interim basis if circumstances dictate. Any reduction of enterprise fair value to an amount below the recorded amount of stockholders' equity could require us to write down the value of goodwill and record an expense for an impairment loss.

Restructuring costs. The total accrued restructuring balance as of February 28, 2006 was \$1.8 million, which was comprised of severance and facilities-related charges. The assumptions we have made related to the facilities charges are based on the current market conditions in the various areas where we have vacant space and necessarily entail a high level of management judgment. These market conditions can fluctuate greatly due to factors such as changes in property occupancy rates and rental prices charged for comparable properties. These changes could materially affect our accrual. If, in future periods, it is determined that we have over-accrued for restructuring charges for the consolidation of facilities, the reversal of such over-accrual would have a favorable impact on our results of operations in the period this was determined and would be recorded as a credit to restructuring costs. Conversely, if it is determined that our accrual is insufficient, an additional charge would have an unfavorable impact on our results of operations in the period this was determined.

Table of Contents**RESULTS OF OPERATIONS****THREE AND NINE MONTHS ENDED FEBRUARY 28, 2006 AND FEBRUARY 28, 2005****Revenues (\$ in thousands)**

	Three months			Three months	
	ended February 28, 2006	Percent of Total Revenue		ended February 28, 2005	Percent of Total Revenue

Professional services	5,547	30	2,976	28	
Total revenues	\$ 18,246	100	\$ 10,538	100	
	Nine months			Nine months	
	ended February 28, 2006	Percent of Total Revenue		ended February 28, 2005	Percent of Total Revenue
Revenues					
License	\$ 14,539	30	\$ 9,598	32	
License updates and product support	14,194	30	9,886	32	
OnDemand	3,046	6	1,158	4	
Professional services	16,328	34	9,546	32	
Total revenues	\$ 48,107	100	\$ 30,188	100	

Total Revenues. Total revenues increased by \$7.7 million or 73% during the three months ended February 28, 2006 compared to the three months ended February 28, 2005. Total revenues increased by \$17.9 million or 59% during the nine months ended February 28, 2006 compared to the nine months ended February 28, 2005.

As a percentage of total revenues, revenues from customers outside the United States represented 22% for the three months ended February 28, 2006 and 36% for the three months ended February 28, 2005. As a percentage of total revenues, revenues from customers outside the United States represented 26% for the nine months ended February 28, 2006 and 39% for the nine months ended February 28, 2005. During the three months and nine months ended February 28, 2006 and 2005, no customer represented more than 10% of our total revenues.

License Revenue. License revenue increased by \$2.2 million, or 60% during the three months ended February 28, 2006 compared to the three months ended February 28, 2005. License revenue increased by \$4.9 million, or 52%, during the nine months ended February 28, 2006 compared to the nine months ended February 28, 2005. The increases in license revenue during the three and nine month periods ended February 28, 2006 compared to the same periods in the prior fiscal year were the result of increased sales activity in Saba's Human Capital Management products and the inclusion of one month of sales of licenses of Centra's products.

License Updates and Product Support Revenue. License updates and product support revenue increased by 53%, or \$1.8 million, during the three months ended February 28, 2006 as compared to the three months ended February 28, 2005. License updates and product support revenue increased by 44%, or \$4.3, million during the nine months ended February 28, 2006 as compared to the nine months ended February 28, 2005. The increases in license updates and product support revenue during the three and nine month periods ending February 28, 2006 when compared to the same periods in the prior fiscal year were attributable primarily to continued growth in our installed customer base, both organically as well as from customers acquired in the THINQ acquisition that renewed license updates and product support in the periods, a slight increase in

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

the maintenance fees in fiscal 2006 when compared to that of fiscal 2005, and the inclusion of one month of Centra's operations.

OnDemand Revenue. OnDemand revenue increased by \$1.1 million or 257%, during the three months ended February 28, 2006 as compared to the three months ended February 28, 2005. OnDemand revenue increased by \$1.9 million or 163%, during the nine months ended February 28, 2006 as compared to the nine months ended February 28, 2005. The increases in OnDemand revenue during the three and nine months ended February 28, 2006 when compared to the same periods in the prior fiscal year were attributable to increased customer demand for these offerings from both existing and new customers, as well as the inclusion of one month of Centra's OnDemand business.

Professional Services Revenue. Professional services revenue increased by 86%, or \$2.6 million, during the three months ended February 28, 2006 as compared to the three months ended February 28, 2005. Professional services revenue increased by 71%, or \$6.8 million, during the nine months ended February 28, 2006 as compared to the nine months ended February 28, 2005. The increases in professional services revenue during the three and nine months ended February 28, 2006 over the same periods in the prior fiscal year were primarily attributable to an increase in consulting services related to increased license sales in prior periods, consulting services provided to an expanded customer base resulting from the THINQ acquisition, consulting services provided in connection with the migration of existing Saba and THINQ customers to Saba's most current release and the inclusion of one month of Centra's professional services business.

Table of Contents**Cost of Revenues**

(\$ in thousands)

	February 28, 2006		Three months ended February 28, 2005	
	Margin	Percent	Margin	Percent
Cost of revenues:				
Cost of license	\$ 240	96%	\$ 43	99%
Cost of license updates and product support	1,084	79%	472	86%
Cost of OnDemand	624	59%	168	60%
Cost of professional services	4,020	27%	2,255	24%
Amortization of acquired developed technology	98			
Total cost of revenues	\$ 6,066	67%	\$ 2,938	72%

	February 28, 2006		Nine months ended February 28, 2005	
	Margin	Percent	Margin	Percent
Cost of revenues:				
Cost of license	\$ 533	96%	\$ 219	98%
Cost of license updates and product support	2,971	79%	1,445	85%
Cost of OnDemand	1,441	53%	554	52%
Cost of professional services	11,863	27%	7,055	26%
Amortization of acquired developed technology	98		2	
Total cost of revenues	\$ 16,906	65%	\$ 9,275	69%

Total cost of revenues. Total cost of revenues increased by \$3.1 million or 106% for the three months ended February 28, 2006 compared to the same three month period in fiscal 2005. Total cost of revenues increased by \$7.6 million or 82% for the nine months ended February 28, 2006 compared to the same nine month period in fiscal 2005.

Cost of License Revenue. Our cost of license revenue includes the cost of manuals and product documentation, production media, shipping costs and royalties to third parties. Cost of license revenue increased \$0.2 million in the third quarter of fiscal 2006 compared to the same period in fiscal 2005. Cost of license revenue increased \$0.3 million in the first nine months of fiscal 2006 compared to the same period in fiscal 2005. The increase in dollars and the reduction in margin percent was due to an increase in third party royalty costs in the 2006 periods when compared to the third party royalty costs in the 2005 periods, primarily due to increased sales of a third party product to existing THINQ customers.

Cost of License Updates and Product Support Revenue. Our cost of license updates and product support revenue includes salaries and related expenses for our license update and product support organization. Cost of license updates and product support revenue increased \$0.6 million during the three months ended February 28, 2006 as compared to the three months ended February 28, 2005. Cost of license updates and product support revenue increased \$1.5 million in the first nine months of fiscal 2006 compared to the same period in fiscal 2005. The dollar increases and deterioration in the margin percents were primarily the result of license update and product support contracts assumed in the THINQ and Centra acquisitions for which we incurred costs to provide the contracted services without all of the accompanying revenue as a result of GAAP purchase accounting adjustments, as well as additional investment in our license update and product support organization to support our growing customer base.

Cost of OnDemand Revenue. Our cost of OnDemand revenue includes salaries and expenses related to the provision of the OnDemand offerings, as well as external hosting fees and depreciation charges on the necessary infrastructure. Cost of OnDemand revenue increased by \$0.5 million

during the three months ended February 28, 2006 as compared to the three months ended February 28, 2005. Cost of OnDemand revenue increased by \$0.9 million during the nine months ended February 28, 2006 as compared to the nine months ended February 28, 2005. The dollar increases in cost of OnDemand revenue during the three and nine month periods ended February 28, 2006 as compared to the same periods in the prior fiscal year relate primarily to the additional hosting fees and depreciation charges required to generate this revenue.

Cost of Professional Services Revenue. Our cost of professional services revenue includes salaries and related expenses for our professional services organizations, as well as third-party subcontractors and billed expenses. Cost of professional services revenue increased by \$1.8 million during the three months ended February 28, 2006 as compared to the three months ended February 28, 2005. Cost of professional services revenue increased by \$4.8 million during the nine months ended February 28, 2006 as compared to the nine months ended February 28, 2005. The dollar increase in the cost of professional services from 2005 to 2006 relates to the addition of headcount and third party contractors required to drive the increased revenue and to meet our customer demands.

Amortization of Acquired Developed Technology. The cost of revenues for the three and nine months ended February 28, 2006 included amortization of acquired developed technology of \$98,000. This amortization resulted from our January 31, 2006 acquisition of Centra.

Operating Expenses

We classify all operating expenses, except amortization of purchased intangible assets, to the research and development, sales and marketing and general and administrative expense categories based on the nature of the expenses. Each of these three categories includes commonly recurring expenses such as salaries, employee benefits, stock compensation, other stock charges, travel and entertainment costs, and allocated communication, rent and depreciation costs. We allocate these expenses to each of the functional areas that derive a benefit from such expenses based upon their respective headcounts. The sales and marketing category of operating expenses also includes sales commissions and expenses related to public relations and advertising, trade shows and marketing collateral materials. The general and administrative category of operating expenses also includes allowance for doubtful accounts and administrative and professional services fees.

Table of Contents

\$ in thousands	Three months ended			
	February 28, 2006	Percent of Total Revenue (dollars in thousands)	February 28, 2005	Percent of Total Revenue
Operating expenses:				
Research and development	\$ 3,488	19%	\$ 2,417	23%
Sales and marketing	7,252	40%	4,309	41%
General and administrative	2,093	11%	1,228	12%
Amortization of purchased intangible assets	1,085	6%		%
Total operating expenses	\$ 13,918	76%	\$ 7,954	76%

\$ in thousands	Nine months ended			
	February 28, 2006	Percent of Total Revenue (dollars in thousands)	February 28, 2005	Percent of Total Revenue
Operating expenses:				
Research and development	\$ 9,072	19%	\$ 7,197	24%
Sales and marketing	18,815	39%	12,775	42%
General and administrative	4,862	10%	3,544	12%
Amortization of purchased intangible assets	1,425	3%		%
Total operating expenses	\$ 34,174	71%	\$ 23,516	78%

Research and development. Research and development expenses increased \$1.1 million, or 44%, for the three months ended February 28, 2006 compared to the three months ended February 28, 2005. Research and development expenses increased \$1.9 million, or 26%, for the nine months ended February 28, 2006 compared to the nine months ended February 28, 2005. The increases were primarily due to increases in costs to translate our software into foreign locales and other engineering services provided by third party consultants (approximately \$290,000 in the three months ended February 28, 2006 and \$811,000 in the nine months ended February 28, 2006) and an increase in employee related salary and benefits expenses (approximately \$763,000 in the three months ended February 28, 2006 and \$1.1 million in the nine months ended February 28, 2006). The increase of employee related salary and benefits expenses reflects the cost of personnel added as a result of the THINQ and Centra acquisitions.

Sales and marketing. Sales and marketing expenses increased \$2.9 million, or 68%, for the three months ended February 28, 2006 compared to the three months ended February 28, 2005. Sales and marketing expenses increased \$6.0 million, or 47%, for the nine months ended February 28, 2006 compared to the nine months ended February 28, 2005. The increases were primarily attributable to increases in employee salary and benefits expenses (approximately \$2.3 million in the three months ended February 28, 2006 and \$4.4 million in the nine months ended February 28, 2006) and travel related expenses (approximately \$278,000 in the three months ended February 28, 2006 and \$418,000 in the nine months ended February 28, 2006). In addition, during the nine months ended February 28, 2006, sales and marketing expenses also included an increase in recruiting fees of \$485,000 and an increase in marketing related programs of \$285,000. The increase in salary and benefits expenses reflect the cost of personnel added as a result of the THINQ and Centra acquisitions as well as higher commissions and bonuses attributable to increased revenues.

General and administrative. General and administrative expenses increased \$865,000, or 70%, for the three months ended February 28, 2006 compared to the three months ended February 28, 2005. General and administrative expenses increased \$1,318,000, or 37%, for the nine months ended February 28, 2006, compared to the nine months ended February 28, 2005. The increases were due to increases in employee salary and benefits expenses (approximately \$552,000 in the three months ended February 28, 2006 and \$945,000 in the nine months ended February 28, 2006). In addition, outside service provider fees, which include accounting and legal, increased \$360,000 during the three months ended February 28, 2006 and \$620,000 during the nine months ended February 28, 2006 due primarily to post-acquisition services required as a result of the THINQ and Centra acquisitions, offset by a decrease in depreciation expense of \$72,000 during the three months ended February 28, 2006 and \$300,000 during the nine months ended February 28, 2006 as a result of certain depreciable assets reaching their full depreciable lives.

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

Amortization of purchased intangible assets. Amortization of purchased intangible assets for the three and nine months ended February 28, 2006 is attributable to the intangible assets acquired as a result of the acquisitions of THINQ in May 2005 and Centra in January 2006.

Interest income (expense) and other, net. Interest income (expense) and other, net consists of interest income, interest expense and other non-operating expenses. Interest income (expense) increased by \$67,000 in net expense for the three months ended February 28, 2006 compared to the three months ended February 28, 2005. Interest income (expense) increased by \$261,000 in net expense for the nine months ended February 28, 2006 compared to the nine months ended February 28, 2005. The increase in expense for both the three month and nine month periods is primarily attributable to an increase in foreign exchange losses, primarily in the UK and Australia, resulting from unfavorable fluctuations in foreign currency denominated payables as well as to an increase in interest expense as a result of the bank borrowings.

Provision for income taxes. From inception through February 28, 2006, we have incurred net losses for federal and state tax purposes. Income tax expense was \$66,000 during the three months ended February 28, 2006 compared to \$58,000 during the three months ended February 28, 2005. Income tax expense was \$100,000 during the nine months ended February 28, 2006 compared to \$140,000 during the nine months ended February 28, 2005. Income tax expense during all of these periods consists entirely of foreign tax expense incurred as a result of local country profits.

We are subject to routine income tax audit by certain foreign tax authorities. During fiscal year 2005, we received notices of assessment relating to transfer pricing matters which we are contesting. We believe that adequate tax provisions have been provided for the likely outcome of the ongoing examination. We will continually review our estimates related to our income tax obligations, including potential assessments of additional taxes, penalties and/or interest, and revise our estimates, if necessary. A revision in our estimates of our tax obligations will be reflected as an adjustment to our income tax provision at the time of the change in our estimates. Such a revision could materially impact our income tax provision and net income.

Saba has recorded a valuation allowance for the full amount of the net deferred tax assets, as it is more likely than not that the deferred tax assets will not be realized.

Table of Contents**FLUCTUATIONS OF QUARTERLY RESULTS**

Our results of operations could vary significantly from quarter to quarter. If revenues fall below our expectations, we will not be able to reduce our spending rapidly in response to the shortfall and operating losses will increase. Any such losses may also negatively impact our ability to generate operating cash. We anticipate that we will continue to experience long sales cycles. Therefore, the timing of future customer contracts could be difficult to predict, making it difficult to predict revenues between quarters.

Other factors that could affect our quarterly operating results include those described below and under the caption **Factors That May Impact Future Operating Results**:

dependence of our revenues on a small number of large orders and the average order value;

our ability to attract new customers;

any changes in revenue recognition rules and interpretations of these rules;

our ability to license additional products to current customers;

the announcement or introduction of new products or services by us or our competitors;

changes in the pricing of our products and services or those of our competitors;

variability in the mix of our revenues in any quarter;

the amount and timing of operating costs and capital expenditures relating to expansion or contraction of our business

foreign currency fluctuations; and

our ability to integrate operations from acquisitions successfully.

LIQUIDITY AND CAPITAL RESOURCES

\$ in thousands	Nine months ended	
	February 28, 2006	February 28, 2005
	(in thousands)	
Cash provided by (used in) operating activities	\$ 263	\$ (6,215)
Cash provide by (used in) investing activities	\$ 7,752	\$ (229)
Cash provided by financing activities	\$ 220	\$ 5,178

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

As of February 28, 2006, our principal source of liquidity included cash and cash equivalents of \$23.6 million. On January 31, 2006, Saba entered into a new credit facility with a bank. The credit facility replaces Saba's existing credit facility with the bank. The credit facility provides for (i) a term loan in a principal amount of \$6,500,000, and (ii) a receivables borrowing base revolving credit line in an aggregate principal amount of up to \$7,500,000 at any time outstanding, which includes a sub-limit of up to \$5,000,000 for letters of credit, cash management and foreign exchange services. The term loan will be repaid in 36 equal monthly installments of principal, plus interest. The maturity date of the term loan and the revolving credit line is January 31, 2009. The interest rate applicable to the loans under the credit facility is the bank's prime rate plus 0.50% for the term loan and the bank's prime rate plus 0.25% for borrowings under the revolving credit line. Saba is required to pay an early termination fee if the credit facility is terminated by the bank due to the occurrence of an event of default or is refinanced by another financial institution, in each case, prior to the second anniversary of the credit facility.

The credit facility is secured by all of Saba's personal property other than its intellectual property. The credit facility includes certain negative covenants restricting or limiting the ability of Saba and its subsidiaries to, among other things: incur additional indebtedness; create liens on its property; make certain investments and acquisitions; merge or consolidate with any other entity; convey, sell, lease, transfer or otherwise dispose of assets; change its business; change of control; pay dividends, distributions or make other specified restricted payments; and enter into certain transactions with affiliates. Such restrictions and limitations are subject to usual and customary exceptions contained in credit agreements of this nature. In addition, the credit facility requires Saba to satisfy a minimum consolidated EBITDA covenant on a quarterly basis, and a minimum liquidity covenant on a monthly basis.

If we violate any of these restrictive covenants or otherwise breach the credit facility agreement, the Company may be required to repay the obligations under the credit facility prior to their stated maturity date, the Company's ability to borrow under the revolving credit line may be terminated, and the bank may be able to foreclose on any collateral provided by the Company.

As of February 28, 2006, we had \$6.5 million outstanding under the term loan, no outstanding borrowings under the receivables borrowing base revolving credit line and were in compliance with all of the covenants related to this credit facility.

Table of Contents**Cash Used In Operating Activities**

Cash provided by operating activities was \$263,000 during the nine months ended February 28, 2006 compared to \$6.2 million used during the nine months ended February 28, 2005. Cash provided by operating activities during the nine months ended February 28, 2006 was attributable to decreases in accounts receivable of \$1.1 million due to better collection efforts and an increase in deferred revenues of \$4.0 million, offset by a net loss of \$3.4 million and a net decrease in accounts payable and accrued expenses of \$4.7 million. This compares to a net loss of \$2.8 million, an increase in receivables of \$2.4 million and a decrease in accounts payable and accrued expenses of \$1.8 million during the nine months ended February 28, 2005.

The decrease in accrued expenses for the nine months ended February 28, 2006 is due primarily to the payments made for accrued VAT taxes, professional services, acquisition related costs and other liabilities we assumed as a result of our acquisitions of THINQ and Centra. Deferred revenues increased due to increases in the number of deals and in our average selling price on new license deals, which drives the price of support agreements. The revenue on support agreements is initially deferred and then recognized ratably over the term of the support.

Cash Provided By Investing Activities

Cash provided by investing activities during the nine months ended February 28, 2006 was \$7.8 million compared to \$229,000 in cash used in investing activities for the nine months ended February 28, 2006. The increase in cash used from investing activities in fiscal 2006 was primarily attributable to net proceeds resulting from the acquisition of Centra.

Cash Provided By Financing Activities

Cash provided by financing activities was \$220,000 during the nine months ended February 28, 2006 and was primarily attributable to repayments on borrowings under our old credit facility of \$6.8 million offset by borrowings of \$6.5 million under the new credit facility. Cash provided by financing activities during the nine months ended February 28, 2005 was primarily attributable to the proceeds from issuance of common stock in private placement of \$8.7 million, which was offset by repayments on borrowings under our credit facility of \$3.5 million.

Contractual Obligations and Commitments

The following table summarizes our contractual obligations at February 28, 2006, and the effect these obligations are expected to have on our liquidity and cash flows in future periods. Other obligations include third-party software royalty commitments as a result of our acquisition of Centra.

\$ in thousands	Payments due by period			
	Total	Less than 1 year	1-3 years	3-5 years
Contractual obligations				
Debt obligations	\$ 6,743	\$ 776	\$ 5,945	\$ 22
Operating lease obligations	36,420	1,077	10,668	24,675
Other obligations	1,352	763	484	105
Total	\$ 44,515	\$ 2,616	\$ 17,097	\$ 24,802

We currently anticipate that our available cash resources and credit facilities, combined with cash flows generated from revenues, will be sufficient to meet our presently anticipated working capital, capital expense and business expansion requirements, for at least the next 12 months. However, we may be required, or could choose, to raise additional funds at any time. Our future liquidity and capital requirements will depend on numerous factors, including our future revenues, the timing and extent of spending to support product development efforts and expansion of sales and marketing and general and administrative activities, the success of our existing and new product and service offerings and competing technological and market developments. There can be no assurance that additional funding, if needed, will be available on terms acceptable to us, if at all.

Off-Balance Sheet Arrangements

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

As of February 28, 2006, we did not have any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Table of Contents

FACTORS THAT MAY IMPACT FUTURE OPERATING RESULTS

RISK FACTORS

We have a history of losses, expect future losses and cannot assure you that we will achieve profitability on a consistent basis.

We expect to derive substantially all of our revenues for the foreseeable future from the licensing of Saba's Human Capital Management (HCM) software suite, including online learning and collaboration software acquired in connection with the acquisition of Centra Software, Inc. in January 2006 (Centra's Software), and providing related services. We cannot be certain that we will realize sufficient revenues to achieve or sustain profitability. In the future, we expect to continue to incur non-cash expenses relating to the amortization of purchased intangible assets that will contribute to our net losses, along with any potential goodwill impairment. As of February 28, 2006, we had \$26.8 million of purchased intangible assets to be amortized as a result of our January 2006 acquisition of Centra and May 2005 acquisition of THINQ Learning Solutions, Inc., and our remaining goodwill balance was \$31.5 million. Further, starting with the first quarter of fiscal 2007, we will be required to record as an expense charges related to all current outstanding and future grants of stock options in our reported results from operations in accordance with Statement of Financial Accounting Standards (SFAS) No. 123R, *Share Based Payments*, which was issued by the Financial Accounting Standards Board (FASB) in December 2004. As a result, we expect to incur losses for the foreseeable future. We will need to generate significantly higher revenues and manage expenses in order to achieve profitability or control negative cash flows. If we achieve profitability, we may not be able to sustain it on a consistent basis.

Fluctuations in our results could cause our stock price to experience significant fluctuations or declines.

Our operating results have varied significantly in the past and will likely fluctuate significantly in the future. For instance, in fiscal 2006, 2005 and fiscal 2004, our quarterly revenues have fluctuated between approximately \$18.2 million and \$7.8 million and our quarterly net income (loss) fluctuated between approximately \$131,000 and \$(5.9) million. Our quarterly operating results are likely to be particularly affected by the number of customers licensing our products during any quarter and the size of such licensing transactions. As a result, we have limited visibility into our future revenue, especially license revenue, which often has been heavily concentrated in the third month of each quarter. Since we forecast our expenses based in part on future revenue projections, our operating results would be adversely affected if we cannot meet those revenue projections.

Other factors that could affect our quarterly operating results include:

the demand for our products and professional services and our efficiency in rendering our professional services;

the variability in the mix of our revenues in any quarter;

the variability in the mix of the type of services delivered in any quarter and the extent to which third party contractors are used to provide such services;

the size and complexity of our license transactions and potential delays in recognizing revenue from license transactions;

the amount and timing of our operating expenses and capital expenditures; the performance of our international business, which accounts for a substantial part of our consolidated revenues; and

fluctuations in foreign currency exchange rates.

Due to these and other factors, we believe that quarter-to-quarter comparisons of our revenues and operating results are not necessarily meaningful and should not be relied upon as indicators of future performance. It is possible that in some future quarter our operating results may be below the expectations of public market analysts or investors, which could cause the market price of our common stock to fall.

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

Our operating expenses are based on our expectations of future revenues and are relatively fixed in the short-term. During fiscal 2004 and fiscal 2003, we took actions to reduce our operating expenses and, while we may from time to time reduce operating expenses in response to variability in our revenues, including variability caused by downturns in the United States and/or international economies, over the long term, we generally expect to increase our operating expenses to expand our sales and marketing operations, fund greater levels of research and development, develop new alliances, increase our services and support capabilities and improve our operational and financial systems. If our revenues do not increase along with these expenses, our business would be seriously harmed and net losses in a given quarter would be even larger than expected. We may undertake future restructuring to align such expenses with revenues.

A decline in the price of, or demand for, our products or our related services offerings, would seriously harm our revenues and operating margins.

To date, Saba Enterprise Learning and related services have accounted for a substantial majority of our revenues. We anticipate that revenues from Saba Enterprise Learning and Centra s Software , as well as related services, will continue to constitute a substantial majority of our revenues for the foreseeable future. Consequently, a decline in the price of, or demand for, Saba Enterprise Learning or Centra s Software or failure to achieve broad market acceptance would seriously harm our business. If our new products, including Saba Enterprise Performance, fail to achieve market acceptance, our reliance on Saba Enterprise Learning and Centra s Software will deepen.

We experience seasonality in our sales, which could cause our quarterly operating results to fluctuate from quarter to quarter.

We experience quarterly seasonality in the licensing of our products and delivery of our services. For example, revenue has historically been lower in our first fiscal quarter than in the immediately preceding fourth fiscal quarter. Contributing to this seasonality is the timing of our first fiscal quarter that occurs during the summer months when general business activities slow down in a number of territories where we conduct our operations, particularly Europe. Our commission structure and other sales incentives also tend to result in fewer sales in the first fiscal quarter than in the fourth fiscal quarter. These seasonal variations in our revenue are likely to lead to fluctuations in our quarterly operating results.

Our products have a long sales cycle, which increases the cost of completing sales and renders completion of sales less predictable.

The period between our initial contact with a potential customer and the purchase of our products and services is often long. A customer s decision to purchase our products and services requires the commitment to increase performance through human capital management, involves a significant allocation of resources, and is influenced by a customer s budgetary cycles. To successfully sell our products and services, we generally must educate our potential customers regarding the use and benefits of our products and services. We may commit a substantial amount of time and resources to potential customers without assurance that any sales will be completed or revenues generated. Many of our potential customers are large enterprises that generally take longer to make significant business decisions. Our public sector customers, in particular, are subject to extensive procurement procedures that require many reviews and approvals. Our typical sales cycle has been approximately six to 12 months, making it difficult to predict the quarter in which we may recognize revenue. The delay or failure to complete sales in a particular quarter could reduce our revenues in that quarter. If our sales cycle were to unexpectedly lengthen in general or for one or more large orders, it would adversely affect the timing of our revenues. If we were to experience a delay on a large order, it could harm our ability to meet our forecasts for a given quarter.

Table of Contents

Our performance depends on a new market: human capital management.

The market for software solutions that automate human capital management is at an early stage of development and rapidly evolving. Substantially all of our revenues are attributable to the suite of products and services in this market. If this market fails to develop or develops more slowly than we expect our business would be harmed. If the market grows, the prices of our products may decline rapidly as alternative products are introduced into the market. In addition, our products may become obsolete if we fail to anticipate or adapt to evolving technology standards, or if we fail to identify the challenges and risks in this new market or successfully address these risks.

The Centra acquisition may result in dilution of future earnings per share to our stockholders.

The completion of the Centra acquisition may not result in improved earnings per share for us or a financial condition superior to that which would have been achieved by us on a stand-alone basis. The acquisition could fail to produce the benefits that we anticipate, or could have other adverse effects that we do not foresee. In addition, some of the assumptions that we have made, such as the achievement of operating synergies, may not be realized. In this event, the merger could result in a reduction of earnings per share for us as compared to the earnings per share that would have been achieved by us if the merger had not occurred.

Sales of substantial amounts of our common stock in the open market by Centra stockholders could depress our stock price.

Other than shares held by affiliates of Centra or us, shares of our common stock that were issued to stockholders of Centra as consideration for the acquisition will be freely tradable by the stockholders of Centra without restrictions or further registration under the Securities Act. If Centra's stockholders sell substantial amounts of our common stock in the public market following the acquisition, the market price of our common stock may decrease substantially.

If we are not successful in integrating Centra, the anticipated benefits of the acquisition may not be realized.

Achieving the anticipated benefits of the acquisition will depend, in part, on the integration of technology, operations and personnel of us and Centra. We cannot assure that the integration will be successful or that the anticipated benefits of the acquisition will be fully realized. The challenges involved in this integration include the following:

satisfying the needs of the combined company's customers in a timely and efficient manner;

persuading our and Centra's employees that Centra's business cultures are compatible and retaining the combined company's key personnel;

realizing anticipated cost synergies within the expected time period;

maintaining the dedication of our and Centra's management resources to integration activities without diverting attention from the day-to-day business of the combined company;

maintaining our and Centra's management's ability to focus on anticipating, responding to or utilizing changing technologies in our and Centra's industry;

maintaining our and Centra's key supplier relationships; and

competing with the introduction of new, disruptive technologies to the marketplace which could reduce our and Centra's market share prior to the successful integration of the two companies.

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

In addition, after the acquisition, we intend to more tightly integrate Centra's products and intellectual property with our products and intellectual property. This may result in longer product development cycles, which may cause the revenue and operating income of to fluctuate and fail to meet expectations.

It is not certain that we and Centra can be successfully integrated in a timely manner or at all or that any of the anticipated benefits will be realized. In addition, we cannot assure that there will not be substantial unanticipated costs associated with the integration process, that integration activities will not result in a decrease in revenues or a decrease in the value of our common stock, or that there will not be other material adverse effects from our integration efforts.

If we are unable to successfully integrate Centra, or if the benefits of the acquisition do not meet the expectations of financial or industry analysts, the market price of our common stock may decline.

Changes in accounting regulations and related interpretations and policies, particularly those related to revenue recognition, could cause us to defer recognition of revenue or recognize lower revenue or to report lower earnings per share.

While we believe that we are in compliance with Statement of Position 97-2, *Software Revenue Recognition*, as amended, the American Institute of Certified Public Accountants continues to issue implementation guidelines for these standards and the accounting profession continues to discuss a wide range of potential interpretations. Additional implementation guidelines, and changes in interpretations of such guidelines, could lead to unanticipated changes in our current revenue accounting practices that could cause us to defer the recognition of revenue to future periods or to recognize lower revenue.

The Financial Accounting Standards Board (FASB) has adopted Statement No. 123R, which requires us to recognize as an expense stock-based compensation to employees based on their fair values, and eliminates the ability to account for stock-based compensation using the intrinsic value method in accordance with APB Opinion No. 25. As a result, when we record an expense for our stock-based compensation plans using the fair value method beginning in fiscal year 2007, we may have significant compensation charges. For example, for the fiscal years 2005, 2004 and 2003, had we accounted for stock-based compensation plans under Statement No. 123R using the Black-Scholes option pricing model, we estimate that basic and diluted net loss per share, using the fair value method, would have been increased by \$0.50, \$0.89 and \$1.02 per share, respectively.

Failure to achieve and maintain effective internal controls could have a material adverse effect on our business, operating results and stock price.

We are in the process of documenting and testing our internal control procedures in order to satisfy the requirements of Section 404 of the Sarbanes-Oxley Act, which requires an annual management assessment of the design and effectiveness of our internal controls over financial reporting and a report by our Independent Auditors addressing this assessment. Depending on our market capitalization on November 30, 2006, we will be required to comply with Section 404 of the Sarbanes-Oxley Act for either the fiscal year ending May 31, 2007 or May 31, 2008. During the course of our testing we may identify significant deficiencies or material weaknesses which we may not be able to remediate prior to our fiscal year end. In addition, if we fail to achieve and maintain the adequacy of our internal controls, as such standards are modified, supplemented or amended from time to time, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. Moreover, effective internal controls are necessary for us to produce reliable financial reports and are important to helping prevent financial fraud. If we cannot provide reliable financial reports or prevent fraud, our business and operating results could be harmed, investors could lose confidence in our reported financial information, and the trading price of our stock could drop significantly.

Table of Contents

The loss of our senior executives and key personnel would likely cause our business to suffer.

Our ability to implement a successful long-term strategy, strengthen our competitive position, expand our customer base, and develop and support our products depends to a significant degree on the performance of the senior management team and other key employees, including Bobby Yazdani, our CEO. The loss of any of these individuals could harm our business. Our success will depend in part on our ability to attract and retain additional personnel with the highly specialized expertise necessary to generate revenue and to engineer, design and support our products and services. Like other software companies, we face intense competition for qualified personnel. We may not be able to attract or retain such personnel.

Intense competition in our target market could impair our ability to grow and achieve profitability on a consistent basis.

The market for our products and services is intensely competitive, dynamic, and subject to rapid technological change. The intensity of the competition and the pace of change are expected to increase in the future. Increased competition is likely to result in price reductions, reduced gross margins and loss of market share, any one of which could seriously harm our business. Competitors vary in size and in the scope and breadth of the products and services offered. We encounter competition with respect to different aspects of our solution from a variety of sources including:

companies that market and license training, learning, performance, content, resource, talent, and staffing management systems;

companies that offer conferencing and collaboration software or application services provider solutions;

enterprise software vendors that offer human resources information systems and employee relationship management systems with training and performance modules;

potential customers' internal development efforts;

companies that operate Internet-based marketplaces for the sale of on-line learning;

companies that operate Internet-based marketplaces for the sale of goods and services and could potentially decide to evolve their marketplaces to include content offerings; and

Internet portals that offer learning content, performance support tools or recruiting services.

We expect competition from a variety of companies.

Many of our competitors have longer operating histories, substantially greater financial, technical, marketing or other resources, or greater name recognition than we do, enabling them to respond more quickly than we can to new or emerging technologies and changes in customer requirements. Such resources also enable our competitors to withstand prolonged periods of negative cash flows and unfavorable economic, political, and market conditions. Competition could seriously impede our ability to sell additional products and services on terms favorable to us. Our current and potential competitors may develop and market new technologies that render our existing or future products and services obsolete, unmarketable or less competitive. Our current and potential competitors may make strategic acquisitions or establish cooperative relationships among themselves or with other partners, thereby increasing the availability of their services to address the needs of our current and prospective customers. We may not be able to compete successfully against our current and future competitors, and competitive pressures that we encounter may seriously harm our business.

If we are unable to manage the complexity of conducting business globally, our international revenues may suffer.

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

International revenues accounted for 26% of revenues for the nine months ended February 28, 2006, 42% of revenues in fiscal 2005 and 44% of revenues in fiscal 2004. Although we intend to continue to expand our international presence, in the future we may not be able to successfully market, sell or distribute our products and services in foreign markets. The reallocation of certain design, development and testing functions from the United States to our lower-cost development center in India intensifies our exposure to international uncertainties. Factors that could materially adversely affect our international operations, and our business and future growth include:

difficulties in staffing and managing foreign operations, including language barriers;

difficulties in maintaining control over product development and quality, and timing of product releases;

seasonal fluctuations in purchasing patterns in other countries, particularly declining sales during July and August in European markets;

difficulties in collecting accounts receivable in foreign countries, particularly European countries in which collections take considerably more time than the United States and collections are more difficult to effect;

currency exchange rate fluctuations, particularly in countries where we sell our products in denominations other than U.S. dollars, such as in the United Kingdom, the euro zone, Australia and Japan, or have exposures in inter-company accounts denominated in foreign currencies;

exposure to tax regimes of multiple countries and potential increased tax exposure relating to in-country profits as well as audits and assessments relating to transfer pricing matters.

costs attributable to development of internationalized versions of our products and marketing and sales materials;

the burdens of complying with a wide variety of foreign laws and reduced protection for intellectual property rights in some countries;

tariffs, export controls, and other trade barriers, and

exposure to geopolitical instability, natural disasters and acts of war or terrorism.

Future acquisitions may result in disruptions to our business if we fail to adequately integrate acquired businesses.

We acquired Centra Software, Inc. in January 2006 and THINQ Learning Solutions, Inc. in May 2005. As part of our overall business strategy, we expect to continue to acquire complementary businesses or technologies that will provide additional products or services offerings, additional industry expertise or an expanded geographic presence.

These acquisitions could result in the use of significant amounts of cash, the incurrence of debt, or potentially dilutive issuances of equity securities which may reduce earnings per share. In addition, any acquisition may increase the risk of future write-offs for acquired in-process research and development, write-offs for the impairment of goodwill or long-lived assets, or amortization of expenses related to intangible assets, any of which could materially adversely affect our business and our operating results. For example, as of February 28, 2006, our remaining goodwill balance was \$31.5 million. Acquisitions that we complete expose us to numerous risks, including:

difficulties in the assimilation of the operations, technologies, products and personnel of the acquired company;

Table of Contents

the diversion of management's attention from other business concerns;

risks of entering markets in which we have no or limited prior experience;

the potential loss of key employees, significant customers and strategic partners of the acquired company; and

exposure to claims by terminated employees, stockholders of the acquired company or other third parties related to the acquisition. Although we generally obtain indemnification and other contractual protection against such claims, we cannot assure that they will be enforceable or sufficient to protect us.

Delays in releasing new products or enhanced versions of our existing products could adversely affect our competitive position.

As part of our strategy, we expect to regularly release new products and new versions of our existing products. Even if our new products or new versions of our existing products contain the features and functionality our customers want, in the event we are unable to timely introduce these new products or product releases, our competitive position may be harmed. We cannot assure you that we will be able to successfully complete the development of currently planned or future products or product releases in a timely and efficient manner. Due to the complexity of our products, internal quality assurance testing and customer testing of pre-commercial releases may reveal product performance issues or desirable feature enhancements that could lead us to postpone the release of these products. In addition, the reallocation of resources associated with any postponement would likely cause delays in the development and release of other future products or enhancements to our currently available products. The reallocation of certain design, development and testing functions to our new lower-cost development center heightens risks relating to product design, development, testing, and introduction. Any delay in releasing future products or enhancements of our products could harm our business.

If we release products containing defects, we may need to halt further shipments and our business and reputation would be harmed.

Products as complex as ours often contain unknown and undetected errors or performance problems. Although our products are subject to rigorous testing and quality control processes, serious defects are frequently found during the period immediately following introduction and initial shipment of new products or enhancements to existing products. Although we attempt to resolve all errors that we believe would be considered serious by our customers before shipment to them, our products are not error-free. These errors or performance problems could result in lost revenues or delays in customer acceptance and would be detrimental to our business and reputation. As is typical in the software industry, with each release we have discovered errors in our products after introduction. We will not be able to detect and correct all errors before releasing our products commercially and these undetected errors could be significant. We cannot assure you that undetected errors or performance problems in our existing or future products will not be discovered in the future or that known errors considered minor by us will not be considered serious by our customers, resulting in cancellation of orders, loss of customers, difficulties in achieving our sales goals, increased demands on our support services, and a decrease in our revenues. To correct such errors, we may expend considerable time and resources to develop and release modifications to our software.

As a result of such errors, we may be subject to warranty and product liability claims that are costly or difficult to settle. Our products and services enable customers to manage critical business information. If product errors are alleged to cause or contribute to security and privacy breaches or misappropriation of confidential information, we may also be subject to significant liability. Although our license agreements contain provisions intended to limit our exposure to liability, we cannot assure that they will be enforceable or, if enforceable, interpreted favorably by a court.

Claims by third parties that we infringe their intellectual property rights may result in costly litigation.

In recent years, there has been significant litigation in the United States involving patents and other intellectual property rights, particularly in the software and Internet-related industries. We have in the past been and are presently subject to an intellectual property action. On August 19, 2003, EdiSync Systems, LLC filed a complaint against Centra in federal court in Denver, Colorado, alleging infringement of two patents for a remote multiple user editing system and method and seeking to enjoin us from continuing to sell our products, as well as unspecified compensatory damages. Although we believe that we have meritorious defenses and intend to vigorously defend this action, we can give no assurance that we will be able to achieve a satisfactory outcome. We could become subject to additional intellectual property infringement claims as the number of our competitors grows and our products and services overlap with competitive offerings. Any of these claims, even if not meritorious, could be expensive to defend and could divert management's attention from operating the company. If we become liable to third parties for infringing their intellectual property rights, we could be required to pay a substantial award of damages and to develop non-infringing

technology, obtain a license or cease selling the products that contain the infringing intellectual property. We may be unable to develop non-infringing technology or obtain a license on commercially reasonable terms, if at all. In addition, agreements with our customers typically include indemnity provisions requiring us to hold these customers harmless against specified losses arising from third party claims that our products infringe the intellectual property rights of such other third parties. It is not possible to determine the maximum potential amount of liability under any indemnification obligations, whether or not asserted, due to the unique facts and circumstances that are likely to be involved in each particular claim.

We may not be able to adequately protect our proprietary technology, and our competitors may be able to offer similar products and services that would harm our competitive position.

Our success depends upon our proprietary technology. We rely primarily on copyright, trademark and trade secret laws, confidentiality procedures and contractual provisions to establish and protect our proprietary rights. As part of our confidentiality procedures, we enter into non-disclosure agreements with our employees. Despite these precautions, third parties could copy or otherwise obtain and use our technology without authorization, which may represent potential sales and revenue losses that are difficult to quantify. Policing unauthorized use of our technology is difficult, time-consuming, and costly. Were we to discover instances of unauthorized use, there can be no assurance that we would be able to enforce our proprietary rights or obtain adequate recovery for our losses. In addition, we have four patents issued in the United States and five patent applications pending in the United States. We cannot assure you that any patents will be issued for any of the pending patent applications. Even for the issued patents, or any patent issued to us in the future, there can be no assurance that such patent will protect our intellectual property, or will not be challenged by third parties. Furthermore, effective protection of intellectual property rights is unavailable or limited in certain foreign countries. We cannot assure you that the protection of our proprietary rights will be adequate or that our competitors will not independently develop similar technology, duplicate our products and services or design around any patents or other intellectual property rights we hold.

Our disaster recovery plan does not include redundant systems, and a disaster could severely damage our operations.

Our disaster recovery plan does not include fully redundant systems for our services at an alternate site. A disaster could severely harm our business because our services could be interrupted for an indeterminate length of time. Our operations depend upon our ability to maintain and protect the computer systems needed for the day-to-day operation of portions of the Saba OnDemand business. A number of these computer systems are located on or near known earthquake fault zones. Although these systems are designed to be fault-tolerant, the systems are vulnerable to damage from fire, floods, earthquakes, power loss, telecommunications failures, and other events. Additionally, we do not carry sufficient business insurance to compensate us for all potential losses that could occur.

Table of Contents

We outsource the management and maintenance of portions of our OnDemand business to third parties and will depend upon them to provide adequate management and maintenance services.

We rely on third parties to provide key components of our networks and systems. For instance, we rely on third-party Internet service providers to host our products for our OnDemand customers. We also rely on third-party communications service providers for the high-speed connections that link our and our Internet service providers' Web servers and office systems to the Internet. Our reliance on third party providers limits our ability to control critical customer service functions and communications systems. Any Internet or communications systems failure or interruption could result in disruption of our service or loss or compromise of customer orders and data. These failures, especially if they are prolonged or repeated, would make our services less attractive to customers and tarnish our reputation.

We depend upon continuing relationships with third-party integrators who support our solutions.

Our success depends upon the acceptance and successful integration by customers of our products. We often rely on third-party systems integrators to assist with implementation of our products. We must continue to rely on these systems integrators even as we increase the size of our professional services group. If large systems integrators fail to continue to support our solution or commit resources to us, if any of our customers are not able to successfully integrate our solution or if we are unable to adequately train our existing systems integration partners, our business, operating results, and financial condition could suffer. Although we make reasonable efforts to ensure that our third party providers perform to our standards, we have only limited control over the level and quality of service provided by our current and future third-party integrators.

We may not be able to secure necessary funding in the future; additional funding may result in dilution to our stockholders.

We require substantial working capital to fund our business. Historically, we have had significant operating losses and negative cash flow from operations. We expect to use our available cash resources and credit facilities primarily to fund sales and marketing activities, research and development, and continued operations, and possibly make future acquisitions. We believe that our existing capital resources will be sufficient to meet our capital requirements for the next twelve months. However, if our capital requirements increase materially from those currently planned or if revenues fail to materialize, we may require additional financing sooner than anticipated. If additional funds are raised through the issuance of equity securities, the percentage ownership of our stockholders will be reduced, stockholders may experience dilution, or such equity securities may have rights, preferences or privileges senior to those of the holders of our common stock. Alternatively, or in addition to equity financing, we may incur additional debt to raise funds. Additional equity or debt financing may not be available when needed on terms favorable to us or at all. If adequate funds are not available or are not available on acceptable terms, we may be unable to develop or enhance our products and services, take advantage of future opportunities or respond to competitive pressures.

Our stock price may fluctuate substantially.

For example, from the beginning of fiscal 2004 through the end of fiscal 2005, the market price for our common stock fluctuated between \$6.62 per share and \$3.22 per share. The market price for our common stock may be affected by a number of factors, including those described above and the following:

the announcement of new products and services or product and service enhancements by us or our competitors;

actual or anticipated quarterly variations in our results of operations or those of our competitors;

changes in earnings estimates or recommendations by securities analysts that may follow our stock;

developments in our industry, including announcements of significant acquisitions or strategic partnerships; and

general market conditions and other factors, including factors unrelated to our operating performance or the operating performance of our competitors.

In addition, the stock market in general, and Nasdaq National Market technology companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of particular companies. Broad market and industry trends may also materially and adversely affect the market price of our common stock, regardless of our actual operating performance. Volatility in the market price and trading volume of our common stock may prevent our stockholders from selling their shares at a favorable price. In the past, following periods of volatility in the market price of a company's securities, securities class-action litigation has often been initiated against that company. Class-action litigation could result in substantial costs and a diversion of management's attention and resources.

The anti-takeover provisions in our charter documents could delay or prevent a change in control.

Our Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws contain provisions that could make it harder for a third party to acquire us without the consent of our board of directors.

For example, if a potential acquiror were to make a hostile bid for us, the acquiror would not be able to call a special meeting of stockholders to remove our board of directors or act by written consent without a meeting. In addition, our board of directors has staggered terms that make it difficult to remove all directors at once. The acquiror would also be required to provide advance notice of its proposal to remove directors at an annual meeting. The acquiror will not be able to cumulate votes at a meeting, which will require the acquiror to hold more shares to gain representation on the board of directors than if cumulative voting were permitted.

Our board of directors also has the ability to issue preferred stock that would significantly dilute the ownership of a hostile acquiror. In addition, Section 203 of the Delaware General Corporation Law limits business combination transactions with 15% stockholders that have not been approved by the board of directors. These provisions and other similar provisions make it more difficult for a third party to acquire us without negotiation. These provisions may apply even if the offer may be considered beneficial by some stockholders.

Our board of directors could choose not to negotiate with an acquiror that it did not feel was in our strategic interests. If the acquiror was discouraged from offering to acquire us or prevented from successfully completing a hostile acquisition by our anti-takeover measures, our stockholders could lose the opportunity to sell their shares at a favorable price.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our borrowings and investments. On January 31, 2006, the Company entered into a new credit facility with a bank. The credit facility provides for (i) a term loan in a principal amount of \$6,500,000, and (ii) a receivables borrowing base revolving credit line in an aggregate principal amount of up to \$7,500,000 at any time outstanding, which includes a sub-limit of up to \$5,000,000 for letters of credit, cash management and foreign exchange services. The term loan will be repaid in 36 equal monthly installments of principal, plus interest. The maturity date of the term loan and the revolving credit line is January 31, 2009. The interest rate applicable to the loans under the credit facility is the bank's prime rate plus 0.50% for the term loan and the bank's prime rate plus 0.25% for borrowings under the revolving credit line. The Company is required to pay an early termination fee if the credit facility is terminated by the bank due to the occurrence of an event of default or is refinanced by another financial institution, in each case, prior to the second anniversary of the credit facility.

Table of Contents

The credit facility is secured by all of the Company's personal property other than its intellectual property. The credit facility includes certain negative covenants restricting or limiting the ability of the Company and its subsidiaries to, among other things: incur additional indebtedness; create liens on its property; make certain investments and acquisitions; merge or consolidate with any other entity; convey, sell, lease, transfer or otherwise dispose of assets; change its business; change of control; pay dividends, distributions or make other specified restricted payments; and enter into certain transactions with affiliates. Such restrictions and limitations are subject to usual and customary exceptions contained in credit agreements of this nature. In addition, the credit facility requires the Company to satisfy a minimum consolidated EBITDA covenant on a quarterly basis, and a minimum liquidity covenant on a monthly basis.

The credit facility also contains usual and customary events of default (subject to certain threshold amounts and grace periods). If an event of default occurs and is continuing, the Company may be required to repay the obligations under the credit facility prior to their stated maturity date, the Company's ability to borrow under the revolving credit line may be terminated, and the bank may be able to foreclose on any collateral provided by the Company.

As of February 28, 2006, we had \$6.5 million outstanding under the term loan, no outstanding borrowings under the receivables borrowing base revolving credit line and were in compliance with all of the covenants related to this credit facility.

At February 28, 2006, we had cash and cash equivalents totaling \$23.6 million. Of this amount, approximately \$5.5 million was invested in money market accounts bearing variable interest rates of between .75% and 4.12%. The remainder of our cash and cash equivalents is held in non-interest bearing accounts at several banks. Variable interest rate securities may produce less income than expected if interest rates fall. A ¹/₂% change in interest rates would not be significant.

Foreign Currency Risk

We do not use derivative instruments to manage risks associated with foreign currency transactions in order to minimize the impact of changes in foreign currency exchange rates on earnings. We provide our products and services to customers in the United States, Europe and elsewhere throughout the world. Sales are primarily made in U.S. dollars, and to a lesser but increasing extent, British pounds and Euros; however, as we continue to expand our operations, more of our contracts may be denominated in Australian dollars, Canadian dollars and Japanese yen. A strengthening of the U.S. dollar could make our products less competitive in foreign markets.

Our exposure to foreign exchange rate fluctuations also arises in part from inter-company accounts with our foreign subsidiaries. These inter-company accounts are typically denominated in the functional currency of the foreign subsidiary, and, when re-measured and translated in U.S. dollars, have an impact on our operating results depending upon the movement in foreign currency rates. During the three and nine months ended February 28, 2006, our total realized and unrealized losses due to movements in foreign currencies, primarily British pounds and Australia dollars, was \$122,000 and \$272,000, respectively. As exchange rates vary, these foreign exchange results may vary and adversely or favorably impact operating results. An unfavorable change of 10% in foreign currency rates would not have a material impact on our financial statements.

ITEM 4. CONTROLS AND PROCEDURES

As of February 28, 2006, our management evaluated, under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective in timely alerting them to material information required to be included in this report. There has been no change in our internal control over financial reporting that occurred during the fiscal quarter ended February 28, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In November 2001, a complaint was filed in the United States District Court for the Southern District of New York against us, certain of our officers and directors, and certain underwriters of our initial public offering. The complaint was purportedly filed on behalf of a class of certain persons who purchased our common stock between April 6, 2000 and December 6, 2000. The complaint alleges violations by us and our officers and directors of Section 11 of the Securities Act of 1933, Section 10(b) of the Exchange Act of 1934, and other related provisions in connection with certain alleged compensation arrangements entered into by the underwriters in connection with the offering. An amended complaint was filed in April 2002. Similar complaints have been filed against hundreds of other issuers that have had initial public offerings since 1998. The complaints allege that the prospectus and the registration statement for the offering failed to disclose that the underwriters allegedly solicited and

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

received excessive commissions from investors and that some investors in the IPO offering agreed with the underwriters to buy additional shares in the aftermarket in order to inflate the price of our stock. The complaints were later consolidated into a single action. The complaint seeks unspecified damages, attorney and expert fees, and other unspecified litigation costs.

On July 1, 2002, the underwriter defendants in the consolidated actions moved to dismiss all of the actions, including the action involving us. On July 15, 2002, we, along with other non-underwriter defendants in the coordinated cases, also moved to dismiss the litigation. On February 19, 2003, the Court ruled on the motions. The Court granted our motion to dismiss the claims against us under Rule 10b-5, due to the insufficiency of the allegations against us. The Court also granted the motion of the individual defendants, Bobby Yazdani and Terry Carlitz, our Chief Executive Officer and Chairman of the Board and our former Chief Financial Officer and a member of our board of directors, to dismiss the claims against them under Rule 10b-5 and Section 20 of the Exchange Act. The motions to dismiss the claims under Section 11 of the Securities Act were denied as to virtually all of the defendants in the consolidated cases, including us.

On July 16, 2003, a committee of our board of directors conditionally approved a proposed partial settlement with the plaintiffs in this matter. The settlement would provide, among other things, a release of us and of the individual defendants for the conduct alleged in the action to be wrongful in the amended complaint. We would agree to undertake other responsibilities under the partial settlement, including agreeing to assign away, not assert, or release certain potential claims we may have against our underwriters. Any direct financial impact of the proposed settlement is expected to be borne by our insurers.

In June 2004, an agreement of settlement was submitted to the Court for preliminary approval. The Court granted the preliminary approval motion on February 15, 2005, subject to certain modifications. On August 31, 2005 the Court issued a preliminary order further approving the modifications to the settlement and certifying the settlement classes. The Court also appointed the notice administrator for the settlement and ordered that notice of the settlement be distributed to all settlement class members by January 15, 2006. The settlement fairness hearing has been set for April 24, 2006. Following the hearing, if the Court determines that the settlement is fair to the class members, the settlement will be approved. There can be no assurance that this proposed settlement will be approved and implemented in its current form, or at all.

If the settlement process fails, we intend to dispute these claims and defend the law suit vigorously. However, due to the inherent uncertainties of litigation, we cannot accurately predict the ultimate outcome of the litigation. An unfavorable outcome in litigation could materially and adversely affect our business, financial condition and results of operations.

Centra, certain of its former and current officers and directors and the managing underwriters of Centra's initial public offering were named as defendants in an action filed in the United States District Court for the Southern District of New York. The plaintiffs filed an initial complaint on December 6, 2001 and purported to serve

Table of Contents

the Centra defendants on or about March 18, 2002. The original complaint has been superseded by an amended complaint (complaint) filed in April 2002. The action, captioned in re Centra Software, Inc. Initial Public Offering Securities Litigation, No. 01 CV 10988, which is being coordinated with an action captioned in re Initial Public Offering Securities Litigation, No. 21 MC 92, is purportedly brought on behalf of the class of persons who purchased Centra's common stock between February 3, 2000 and December 6, 2000. The complaint asserts claims under Sections 11 and 15 of the Securities Act of 1933 and Sections 10(b) and 20(a) of the Securities Exchange Act of 1934. The complaint alleges that, in connection with Centra's initial public offering in February 2000, the underwriters received undisclosed commissions from certain investors in exchange for allocating shares to them and also agreed to allocate shares to certain customers in exchange for the agreement of those customers to purchase additional shares in the after-market at pre-determined prices. The complaint asserts that Centra's registration statement and prospectus for the offering were materially false and misleading due to their failure to disclose these alleged arrangements. The complaint seeks damages in an unspecified amount against Centra and the named individuals. The underwriter defendants and the Centra defendants joined in motions to dismiss the above-referenced action on July 3 and July 15, 2002, respectively. On October 9, 2002, the plaintiffs dismissed, without prejudice, the claims against the named Centra officers and directors in the above-referenced action. On February 19, 2003, the court issued an order denying the motion to dismiss as to Centra and other defendants. On June 7, 2003, the plaintiffs announced a proposed settlement with all issuers, including Centra. On June 25, 2004, the plaintiffs filed a motion with the United States District Court for the Southern District of New York requesting preliminary approval of the settlement. The court has given preliminary approval of the settlement. Centra plans to participate in this settlement, which has been negotiated, and will be fully funded directly to the plaintiffs, by Centra's insurers. No amount has been accrued related to this matter and legal costs incurred in the defense of the matter are being expensed as incurred.

On August 19, 2003, a complaint was filed against Centra and two other defendants by EdiSync Systems, LLC, in the United States District Court for the District of Colorado (No. 03-D-1587 (OES)). The complaint alleges infringement of two patents for a remote multiple user editing system and method and seeks permanent injunctive relief against continuing infringement, compensatory damages in an unspecified amount, and interest, costs and expenses associated with the litigation. Centra has filed an answer to the complaint denying all of the allegations. No amount has been accrued related to this matter and legal costs incurred in the defense of the matter are being expensed as incurred. Centra filed a request for reexamination of the patents at issue with the U.S. Patent and Trademark Office. Our patent counsel is of the opinion that claims of the patents involved in the suit are invalid. The re-examination request was accepted by the Patent Office and the District Court has approved the parties' motion to stay the court proceedings during the re-examination proceedings. The Patent Office has issued a non-final rejection of all claims in each of the patents. Saba believes that it has meritorious defenses and Saba intends to vigorously defend this action.

We are also party to various legal disputes and proceedings arising from the ordinary course of general business activities. While, in the opinion of management, resolution of these matters is not expected to have a material adverse effect on our consolidated financial position, results of operations or cash flows, the ultimate outcome of any litigation is uncertain. Were an unfavorable outcome to occur, the impact could be material to us.

ITEM 1A. The Risk Factors section may be found in the section titled "Factors that May Impact Future Operating Results" in Management's Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
