For the nine-month periods beginning on July 1, 2006 and 2005

and ended March 31, 2007 and 2006

NOTE 1: BASIS OF PRESENTATION OF THE FINANCIAL STATEMENTS

As a consequence of the application of the unifying accounting standards approved by the Comisión Nacional de Valores (C.N.V.), which require that consolidated Financial Statements be presented as established by Technical Resolution No. 21 of the Federación Argentina de Consejos Profesionales de Ciencias Económicas (F.A.C.P.C.E.), the Balance Sheet as of March 31, 2007 and 2006 and the Statements of Income and the Statements of Cash Flows for the nine-month periods then ended were consolidated on a line by line basis with the financial statements of such companies in which it holds a majority of the voting shares. Additionally, proportional consolidation has been applied for investments in which it has joint control (see Notes 1.b and 1.c to the basic financial statements).

The Company also applied Technical Resolution No. 21 as concerns the proportional consolidation with Cactus Argentina S.A. on a 50% basis on account of the joint control held, and applied the same percentage for elimination of balances existing between them.

The financial statements of the subsidiary companies Inversiones Ganaderas S.A., Futuros y Opciones.Com S.A., Agropecuaria Cervera S.A. and Cactus Argentina S.A. as of March 31, 2007 and 2006 have been used in order to determine the investment at its equity value, line by line consolidation and proportional consolidation.

For purposes of comparability, certain reclassifications have been made on the information as of June 30, 2006 and March 31, 2006.

These Financial Statements and the corresponding notes and schedules are presented in Argentine Pesos.

Notes to the Financial Statements

For the nine-month periods ended March 31, 2007 and 2006

and the year ended June 30, 2006

NOTE 1: ACCOUNTING STANDARDS

Below is a description of the most relevant accounting standards used by the Company in the preparation of these Financial Statements, which have been applied on a consistent basis from the previous period.

a. <u>Presentation standards</u>

These financial statements are stated in Argentine Pesos (Ps.), and have been prepared in accordance with the disclosure and valuation accounting standards contained in the Technical Resolutions issued by the Argentine Federation of Professional Councils in Economic Sciences (F.A.C.P.C.E.), as approved, with resolutions issued by the Consejo Professional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires (C.P.C.E.C.A.B.A.) and the Comisión Nacional de Valores (C.N.V.).

b. <u>Unifying of accounting standards</u>

On July 8, 2004, the F.A.C.P.C.E. and the C.P.C.E.C.A.B.A. entered into an agreement with the purpose of unifying technical standards. The latter council issued Resolution CD 93/05 on August 10, 2005 adopting the accounting standards approved by the former including the changes up to April 1, 2005.

The standards referred to above became effective for annual or interim periods financial statements of years started on January 1, 2006. On the other hand, the C.N.V. has adopted the same standards including certain modifications, and has also established their applicability for the years started as from January 1, 2006 as well.

The changes introduced due to the unifying of accounting standards that have generated significant effects on the Company's financial statements are:

In accordance with the new accounting standards, the Company has decided not to recognize the deferred liabilities generated by the adjustment for inflation on fixed assets and other non-monetary assets. Consequently, additional information on this issue is stated in Note 6.

The balance of the Transitory Convertion Differences account has to be shown in the statement of changes in stockholders' equity as from the time the unifying accounting standards became effective.

The financial statements for the nine-month periods ended March 31, 2007 and 2006 have not been audited. The Company's management estimates that such statements include all adjustments necessary to fairly present the income accounts of each period, which do not necessarily show the proportion of the Company's profits and losses for the entire periods.

c. The effects of inflation

The financial statements have been prepared in constant currency units by recognizing the effects of inflation up to August 31, 1995. As from this date and up to December 31, 2001 the restatement of the financial statements has been discontinued due to that period of monetary stability. As from January 1, 2002 and up to March 2003 the effects of inflation were recognized as it was an inflationary period. As from such date, in accordance with Resolution 441

Inmobiliaria, Financiera y Agropecuaria

Notes to the Financial Statements (Continued)

NOTE 1: (Continued)

issued on April 8, 2003 by the National Securities Commission, the Company discontinued the restatement of its financial statements. This criterion does not agree with the terms of Resolution MD 041/2003 of the Professional Council in Economic Sciences of the City of Buenos Aires (CPCECABA), by which the restatement of financial statements was discontinued as from October 1, 2003. As of March 31, 2007, this change has not generated any significant effect on the Company's financial statements.

d. Comparative Information

For comparison purposes, certain reclassifications have been made as of June 30, 2006 and March 31, 2006.

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES

a. <u>Use of estimates</u>

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the fiscal year. Estimates are used when accounting for the allowance for conversion of Convertible Notes into shares of stock, doubtful accounts, investments, depreciation, income taxes, deferred liabilities, transitory conversion differences and provisions for contingencies, accrual for expenses, donations and assets recoverable value and classification of the current and non-current assets. Actual results could differ from those estimates.

b. <u>Local currency assets and liabilities</u>

The local currency assets and liabilities are stated at period-end nominal currency.

c. Foreign currency assets and liabilities

Assets and liabilities denominated in foreign currency have been valued at the amount of such currency as of the date of the financial statements, converted at the buying and selling exchange rate, respectively, prevailing at period-end or year-end.

d. <u>Temporary investments</u>

The units of ownership of common investment funds, the mortgage certificates, nobacs and bonds were valued at quotation value at period-end or year-end net of sales expenses. Temporary investments do not exceed their recoverable value at the date of the financial statements.

e. <u>Trade accounts receivable and payable</u>

Trade accounts receivable and payable have been valued at their cash price estimated at the time of the transaction, plus interest and implied financial components accrued on the basis of the internal rate of return determined at such time, provided they are significant.

Inmobiliaria, Financiera y Agropecuaria

NOTE 2: (Continued)

f. Credits and loans

Amortization is calculated in accordance with the estimated useful life, which is 20 years and has been classified under Gain from controlled companies and related companies in the statement of income.

Current valuations and economic conditions tend to make less risky any permanent investment opportunity and also help increasing the possibility to obtain significant long-term profits through IRSA shares.

Business Highlight

Buenos Aires, May 14, 2007 Cresud S.A.C.I.F. y A. (Nasdaq: CRESY BCBA: CRES), one of the leading agricultural companies in Argentina, announced today its results for the nine-month period of fiscal year 2007, ended March 31, 2007.

The results for the nine-month period of 2007 showed a net profit of Ps. 36.7 million compared to the Ps. 23.4 million profit for the same period the previous fiscal year. The increase in the net result is mainly due to a 251% increase in results from our ownership interests in related companies.

Consolidated net sales for the period were Ps. 54.4 million, 21% lower than consolidated net sales for the same period the previous fiscal year, mainly due to a reduction in sales of crops resulting from harvest delays caused by weather conditions.

Gross profit for the nine-month period of fiscal year 2007 was Ps. 23.5 million compared to Ps. 15.7 million gross profit for the same period the previous year.

This rise in gross profit is due to higher crop yields, in addition to an increase in average prices per ton, compared to the same period the previous fiscal year.

Operating results for the period ended March 31, 2007 were a Ps. 12.7 million profit, compared to the Ps. 18.7 million profit for the same period the previous fiscal year. The reduction is explained by the fact that the profit for fiscal year 2006 reflects a Ps. 9.9 million gain from the sale of farms.

Results from related companies were a Ps. 40.2 million profit compared to a Ps. 11.5 million profit in the same period of fiscal year 2006, mainly due to the result of our ownership share in IRSA Inversiones y Representaciones S.A. as of March 31, 2007.

Summary of operations

Crops

Crop sales totaled Ps. 16.9 million for the period, compared to Ps. 31.6 million crop sales for the previous period. Crops sales amounted to 40,352 tons at an average price per ton of Ps. 418.7 compared to 94,993 tons sold at an average price of Ps. 333.2 during the same period the previous fiscal year. The reduction in sales volumes resulted from harvest delays caused by weather conditions and lower opening stock levels compared to the same period of the previous fiscal year.

At March 31, 2007, wheat harvests had finished with yields of 16,902 tons. At that date, we had harvested 31% of the area sown with sunflower, whilst corn amounts to 21% and soybean to 18%.

Our crop stock as of the end of the nine-month period totaled 55,664 tons, of which 9,857 correspond to wheat, 22,329 correspond to corn, 4,637 correspond to sunflower and 15,411 to soybean. The remaining stock comprises a variety of other crops.

In the period ended March 31, 2007 gross profit in this segment was Ps. 8.5 million compared to a profit of Ps. 6.3 million for the same period the previous fiscal year. Gross profit in this segment rose mainly as a result of an increase of approximately 27% in the price of crops.

In the current campaign, our agricultural activities extend over a surface area of 48,015 hectares, 25,307 of which are leased from third parties. The total number of hectares devoted to agricultural activities has risen by 30% compared to the previous year.

Beef Cattle

At March 31, 2007, the Company had a 100,605-head cattle stock, slightly higher than for the same period the previous year, with a total surface area devoted to beef cattle activities of 119,361 hectares.

Livestock sales decreased by 18% compared to the previous fiscal year, from Ps. 25.0 million at March 31, 2006 to Ps. 20.6 million at March 31, 2007. During the nine-month period of the current fiscal year, sales totaled 8,680 tons, whereas for the same period of fiscal year 2006 the tons sold had amounted to 10,839.

Gross profit in the cattle beef segment was Ps. 7.9 million, compared to Ps. 4.2 million for the same period of the previous fiscal year. This increase in the business unit s gross profit is mainly due to the lower production and sales costs.

Cattle beef production was 8,112 tons, a 4.6% increase compared to the previous fiscal year.

During the first nine months of 2007, upward trends in the international prices of beef cattle intensified as a result of sustained demand (caused by the increase in the purchasing power of developing economies and higher consumption of red meat to the detriment of white meat) and of limited supply (derived from the restrictions arising from the requirements imposed by the health authorities on the main suppliers). These pressures fed local inflationary expectations, as a result of which the Argentine Government had to take the measures necessary to increase production in the area, such as a ban on exports and restrictions upon the minimum weight of cattle to be slaughtered. However, an agreement has been recently entered into between the government and farming institutions aimed at maintaining the fixed price of certain cuts whilst freeing the rest of the cuts to trade at market prices.

Milk

Milk production increased by 15.7% in the nine-month period, from 10.9 million liters at March 31, 2006, to 12.6 million liters at March 31, 2007

Gross profit in this segment at March 31, 2007 was Ps. 2.5 million, remaining unchanged from the levels recorded in the previous period.

At present, the Company s dairy establishments are: El Tigre, equipped with state-of-the-art technology, and La Juanita, where the feeding system is mainly pasture-based (implying lower costs).

The Company recently opened a second dairy farm at La Juanita. This second dairy farm has a capacity to milk 1,200 cows per day. Productive capacity of this farm is expected to rise by approximately 24,000 liters per day, thereby generating more than 40,000 liters of milk per day.

Feed Lot

During this quarter the Company s interest in Cactus Argentina S.A. changed from 50% to 24% due to its recent association with Tyson foods Inc. Therefore, for purposes of the results as of December 31, 2006 and the comparative information the 50% proportional consolidation with Cactus Argentina S.A. has been included.

Furthermore, the recent association with Tyson foods Inc. constitutes the first Argentine livestock vertically integrated project, which shall produce beef cattle cuts for the Argentine consumer and shall have access to the European market and other international markets.

Purchase and sale of farms

On March 30, 2007, we signed the preliminary agreement for the sale of 20,834 hectares of the Tapenagá farm. The sales price was agreed at US\$ 7,292,000, of which US\$ 1,000,000 was paid upon execution of the preliminary sales agreement, while the balance is to be financed. Delivery of possession will take place on May 29, 2007.

In addition, on January 19, 2007, Inversiones ganaderas S.A. (IGSA), a subsidiary of Cresud, executed a preliminary agreement with Arcor Sociedad Anónima Industrial y Comercial for the sale of 50 hectares of the El Recreo establishment owned by IGSA, for the sum of Ps. 433,700. As of March 31, this sum had been fully paid and possession of the land had been delivered.

In September 2005, we signed the title deed for the acquisition of San Pedro , a 6,022-hectare farm located in the Department of Concepción del Uruguay, province of Entre Ríos. The purchase price was agreed at US\$ 16.0 million, of which US\$ 9.5 million were paid upon execution of the title deed, US\$ 4.0 million were paid on December 14, 2005, and US\$ 1.05 were paid on September 1, 2006. The remaining US\$ 1.4 million matures in September 2007.

Development of marginal lands

We believe that the potential of the segment lies on the development of marginal land, as has been the case in various countries worldwide. With the help of state-of-the-art technology we can obtain yields similar to, and returns better than, those in the core areas.

During the first nine months of fiscal year 2007, development efforts continued at our Los Pozos farm located in the province of Salta, where 32,000 hectares have already been prepared for agricultural and/or livestock activities. A further 32,000 hectares continue to be developed.

Furthermore, 5,700 hectares of Cervera Agropecuaria have been prepared for production activities, and a further 30,000 hectares continue to be developed.

At March 31, 2007, Cresud s land reserves amounted in the aggregate to 250,722 hectares, which had been acquired at very low prices. In our opinion, the development of these areas, accompanied by technological breakthroughs will contribute to appreciate the value of land which will in turn imply significant gains for the Company.

Expansion to Brazil

The Company continues to add properties for the production of crops, cotton and sugar cane.

<u>Jatobá Fa</u>rm

Brasil Agro purchased the Jatobá farm in association with the Maeda group (which holds a 10% interest). This farm has an area of 31,500 hectares and is located in the district of Jaborandi, in the State of Bahia. In this farm, the Company plans to start large-scale production of crops and cotton. The farm was purchased at a price of R\$35.4 million (US\$ 17.2 million)¹.

Araucária Farm

In April, the Company executed an irrevocable agreement for the purchase of a property known as Araucária, a farm of 15,543 rural hectares located in the district of Mineiros (State of Goias), intended for the production of sugar cane. The purchase price was R\$ 80.0 million (US\$ 38.9 million) and the transaction was made in association with Brenco (which holds a 25% interest)¹.

Alto Taquari Farm

In April, the Company executed an agreement for the purchase of Alto Taquari farm. The farm has 5,266 hectares and is located in the district of Taquari (Mato Grosso). The purchase price was R\$35.0 million (US\$ 17.0 million). In this property, the Company plans to produce sugar cane. If any of the conditions in the Agreement is not met, the Company may, at its exclusive discretion, terminate the Agreement free of any liens or penalty.

BrasilAgro will continue to focus its activities on agricultural Real Estate and on the development of its four main business lines: sugar cane; crops and cotton; forestry and livestock.

Prospects for the coming quarter

Prospects for the coming quarter are quite encouraging, as the prices of commodities continue to be strong. Definition of this pricing trend will be determined by the confirmation of actual sowings in the United States.

As concerns the livestock market, upward trends in the international prices of beef cattle continue to intensify, and in the light of the agreement recently entered into between the Argentine Government and farming institutions, we expect a positive price restatement.

As concerns the milk market, the low Argentine production caused by the weather conditions and higher demand from the domestic market have led to an increase in prices in the last months, and this positive trend is expected to continue.
