Dated: July 16, 2007

Dear Shareholders,

The year 2006 set a milestone for business growth for ChipMOS. Despite the cyclical industry environment in 2006, we generated the highest net revenue and net income in our history. Our net revenue was US\$625 million in 2006, a 34% increase from US\$467 million in 2005. Our net income under ROC GAAP was US\$65 million (US\$0.95 per basic common share) in 2006, compared to US\$28 million (US\$0.42 per basic common share) in 2005, and our gross margin was 30% in 2006, compared to 26% in 2005. We also achieved seven consecutive quarters of record net revenue.

Our DRAM business was our major growth driver in 2006. Despite the weak demand for personal computers in 2006, we benefited from the transition to DDR II SDRAM and generated a 21% net revenue growth for our DRAM testing and assembly services from 2005 to 2006. We also successfully grew our flash business in 2006 by further extending business relationships with leading NOR flash players in the United States and Taiwan. In 2006, net revenue derived from flash testing and assembly services accounted for approximately 15% of our net revenue, and we currently are expecting our flash business to account for approximately 20% of our total net revenue in 2007. Net revenue from our LCD and other flat-panel display driver semiconductor testing and assembly services business grew 43% from 2005 to 2006, primarily as a result of an increase in overall end market demand as well as the growth of our market share.

In 2006, we continued to benefit from our long-term agreements with our DRAM and LCD driver customers. In addition, we successfully entered into a long-term agreement with a new customer for mixed-signal semiconductor assembly services. This new customer, who is based in the United States, is a well-known global semiconductor solution supplier for PC peripheral applications. We believe this agreement can help utilize excess capacity that we expect to result from the expected decrease in demand for DDR I assembly services.

Looking ahead to 2007, we expect our flash business to continue to grow under the long-term agreements with our flash customers. The LCD driver business faced a quick down cycle in the first quarter of 2007, but started to rebound in April. Our driver IC business picked up very well in the second quarter. We currently expect tighter capacity in the second half of 2007.

Our DRAM business has been our most challenging business in 2007, primarily because of the drastic decline of DDR II SDRAM prices (more than 70%) in the market that occurred early this year. As a result of customer pressure, we reduced the prices of our DRAM assembly and testing services in April. Although our prices have declined, we have been able to maintain relatively

high levels of capacity utilization rates for DRAM testing and assembly services (both higher than 80%), primarily due to increased unit output from DRAM makers. However, if the market prices for DRAM products continue to fall, our DRAM testing and assembly capacity utilization rates will be adversely affected. In light of the potential risk of overcapacity, we have currently put on hold our planned investments for DRAM assembly and testing capacity. We understand that some DRAM makers have also started either to control their capacity expansion or to switch their DRAM capacity for flash production, and we hope that decreased DRAM supply may improve the pricing environment going forward. Until the market environment improves, however, we will continue to carefully and conservatively allocate our capital expenditures and rearrange our product mix to maximize our capacity utilization rates to the extent possible.

We are currently undertaking a number of initiatives to make ChipMOS more attractive to the investor community. The most important initiative has been to seek to acquire 100% of ChipMOS Taiwan, our primary operating subsidiary, and thereby significantly reduce the minority interest we need to account for before reporting net income. We completed the first stage of this process in March 2007 with the completion of the share purchase and subscription transaction with Siliconware Precision Industries Co., Ltd. (SPIL) through which we increased our shareholding in ChipMOS Taiwan to 99.14%. We hope to complete a share swap with the remaining shareholders of ChipMOS Taiwan in the coming months so that we will then own 100% of ChipMOS Taiwan. Second, now that we have significantly expanded our net revenue, we intend to focus more on improving our free cash flow. With cautious investment control, we are very happy to see, on an unaudited basis, US\$9 million of positive free cash flow generated in the first quarter of 2007 under ROC GAAP (US\$6 million under US GAAP). With the substantial reduction in our minority interest we are optimistic that our free cash flow will further increase in the following quarters. Third, we plan to use a portion of the cash generated from our operations to pay down our debt in order to decrease our debt ratio and increase our return on invested capital.

On behalf of the Board of Directors, we would like to extend our sincere appreciation to our shareholders, employees, customers and business associates for their continued support over the years.

Sincerely
Shih-Jye Cheng
Chairman
