Cautionary Notice Regarding Forward Looking Statements

Some of the statements in this Report, including, without limitation, matters discussed under the caption Management's Discussion and Analysis, of Buckhead Community Bancorp, Inc. are forward-looking statements within the meaning of the federal securities laws. Forward-looking statements include statements about the competitiveness of the banking industry, potential regulatory obligations, our entrance and expansion into other markets, integration of recently acquired banks, pending or proposed acquisitions, our other business strategies, our expectations with respect to our allowance for loan losses and impaired loans, anticipated capital expenditures for our operations center, and other statements that are not historical facts. When we use words like anticipate, believe, intend, expect, estimate, could, should, will, and similar expressions, you should consider them as identifying forward-looking statements, although we may use other phrasing. These forward-looking statements involve risks and uncertainties and are based on our beliefs and assumptions, and on the information available to us at the time that these disclosures were prepared. Factors that may cause actual results to differ materially from those expressed or implied by such forward-looking statements include, among others, the following possibilities: (1) competitive pressures among depository and other financial institutions may increase significantly; (2) changes in the interest rate environment may reduce margins; (3) general economic conditions may be less favorable than expected, resulting in, among other things, a deterioration in credit quality and/or a reduction in demand for credit; (4) legislative or regulatory changes, including changes in accounting standards, may adversely affect the businesses in which we are engaged; (5) costs or difficulties related to the integration of our businesses, may be greater than expected; (6) deposit attrition, customer loss or revenue loss following acquisitions may be greater than expected; (7) competitors may have greater financial resources and develop products that enable such competitors to compete more successfully than us; and (8) adverse changes may occur in the equity markets.

Many of such factors are beyond our ability to control or predict, and readers are cautioned not to put undue reliance on such forward-looking statements. We disclaim any obligation to update or revise any forward-looking statements contained in this Report, whether as a result of new information, future events or otherwise.

PART I

ITEM 1. BUSINESS

Information About Buckhead Community Bancorp, Inc.

Description of Business

Buckhead Community Bancorp, Inc. (Buckhead Community or the Company) is a Georgia corporation registered under the Bank Holding Company Act of 1956, as amended (the BHCA). Buckhead Community was formed on October 15, 1996 to serve as the holding company of its wholly-owned banking subsidiary, The Buckhead Community Bank (the Bank). On December 4, 2007, the Company completed its acquisition of Allied Bancshares, Inc. (Allied), a Georgia corporation based in Cumming, Forsyth County, Georgia, and the parent holding company of First National Bank of Forsyth County (FNB Forsyth).

Buckhead Community, through the Bank, provides a broad range of community banking services to commercial, small business and retail customers, offering a variety of transaction and savings deposit products, cash management services, secured and unsecured loan products, including revolving credit facilities, and letters of credit and similar financial guarantees. Buckhead Community and the Bank primarily serve customers in Fulton, Forsyth, Cobb and Hall counties within the greater Atlanta, Georgia banking market.

The Buckhead Community Bank

The Bank was incorporated as a federally-chartered commercial banking association in 1998, and converted its charter to become a Georgia state-chartered bank on July 1, 2005. The Bank is headquartered in Atlanta, Fulton County, Georgia and operates a total of seven full-service banking locations in Fulton, Forsyth, Cobb and Hall counties in the greater Atlanta, Georgia metropolitan area. The Bank's branches in Fulton County operate under the trade names The Buckhead Community Bank, The Sandy Springs Community Bank, The Midtown Community Bank, and The Alpharetta Community Bank. In late August, 2007, the Bank opened a full-service de-novo branch in Atlanta, Cobb County, Georgia operating under the trade name Cobb Community Bank. On December 4, 2007, in connection with the Company's acquisition of Allied, the Bank acquired FNB Forsyth and its two bank branches operating in Cumming, Forsyth County, Georgia, and Gainesville, Hall County, Georgia. These two branches are now operated by the Bank under the trade names Forsyth Community Bank and Hall Community Bank, respectively. The Bank also operates a loan production office in Suwanee, Georgia and rents additional office space for its lenders in three offices in Atlanta, Chamblee and Duluth, Georgia.

The Bank is a full service commercial bank focusing on meeting the banking needs of individuals and small- to medium-sized businesses. The Bank offers a broad line of banking and financial products and services customary for full service banks of similar size and character. These services include consumer loans, real estate loans, and commercial loans as well as maintaining deposit accounts such as checking accounts, money market accounts, and a variety of certificates of deposit. The Bank attracts most of its deposits and conducts most of its lending transactions from and within its primary service area encompassing Fulton, Forsyth, Cobb and Hall counties, Georgia.

Table of Contents

Business Activities of the Company and the Bank

Lending Services

Lending Policy. The Bank seeks creditworthy borrowers within a limited geographic area. Its primary lending function is to make real estate loans, particularly construction loans for new residential and commercial properties. The Bank also makes consumer loans to individuals and to small- and medium-sized businesses. The Bank's loan portfolio as of December 31, 2007, was as follows:

Loan Category	Ratio
Real estate lending	86%
Commercial lending	12%
Consumer lending	2%

Loan Approval and Review. The Bank's loan approval policies provide for various levels of officer lending authority. When the total amount of loans to a single borrower exceeds an individual officer's lending authority, an officer with a higher lending limit or the loan committee determines whether to approve the loan request.

Lending Limits. The Bank's lending activities are subject to a variety of lending limits imposed by law. Differing limits apply based on the type of loan or the nature of the borrower, including the borrower's relationship to the Bank. These limits increase or decrease as the Bank's capital increases or decreases as a result of its earnings or losses, among other reasons.

Credit Risks. The principal economic risk associated with each category of the loans that the Bank makes is the creditworthiness of the borrower. General economic conditions and the strength of the services and retail market segments affect borrower creditworthiness. General factors affecting a commercial borrower's ability to repay include interest, inflation and the demand for the commercial borrower's products and services, as well as other factors affecting a borrower's customers, suppliers and employees.

Risks associated with real estate loans also include fluctuations in the value of real estate, new job creation trends, tenant vacancy rates and, in the case of commercial borrowers, the quality of the borrower's management. Consumer loan repayments depend upon the borrower's financial stability and are more likely to be adversely affected by divorce, job loss, illness and personal hardships.

Other larger banks in our market area make proportionately more loans to medium- to large-sized businesses than we do. Many of the commercial loans that the Bank makes are to small- to medium-sized businesses that may be less able to withstand competitive, economic and financial pressures than larger borrowers.

Table of Contents

Real Estate Loans. The Bank's loan portfolio consists primarily of commercial real estate loans, construction and development loans and residential real estate loans primarily in and around Fulton, Forsyth, Cobb and Hall Counties. These loans include certain commercial loans where the Bank takes a supplemental interest in real estate, but not as principal collateral. Home equity loans and lines of credit are classified as consumer loans.

The Bank's residential real estate loans consist principally of single family acquisition and development and construction loans with maturities of one year or less. Term financing of residential single family property is a small portion of the total portfolio and is generally limited to one year maturities based on 20 year amortizations to begin repayment of construction debt on unsold houses. Traditional consumer permanent first mortgage financing is referred to outside mortgage specialty sources. Residential construction loans are made in accordance with the Bank's appraisal policy and with the ratio of the loan principal to the value of collateral as established by independent appraisal generally not exceeding the lesser of 80% of as built appraised value or 100% of cost to construct.

The following chart compares the Bank's internal Loan to Value policy standards to the Supervisory Loan to Value guidelines:

Supervisory	Buckhead Community Bank	Supervisory
Loan Category	Loan-to-Value Limit	Loan-to-Value Guidelines
Raw land	65%	65%
Land development	75%	75%
Construction		
One- to four-family residential	80%	85%
All other construction	80%	80%
Improved property	85%	85%
Owner-occupied one- to four-family	80%	80%

We believe that these loan-to-value ratios are sufficient to compensate for fluctuations in real estate market value and to minimize losses that could result from a downturn in the real estate market.

Table of Contents

Commercial real estate loan terms are generally limited to five years or less, although payments may be structured on a longer amortization basis. Interest rates may be fixed or adjustable, although rates typically are not fixed for a period exceeding 60 months. The Bank generally charges an origination fee. We attempt to reduce credit risk on our commercial real estate loans by emphasizing compliance to the loan to values limitations listed above for the respective product categories and by requiring commercial term out financings to be supported by net projected cash flow available for debt service to be greater than or equal to 115% of the debt service requirement. In addition, we generally require personal guarantees from the principal owners of the property supported by a review conducted by Bank management of the principal owners personal financial statements. Risks associated with commercial real estate loans include fluctuations in the value of real estate, new job creation trends, tenant vacancy rates and the quality of the borrower's management. We attempt to limit our risk by analyzing borrowers' and guarantors' unencumbered liquidity position, sustainable cash flow and collateral value on an ongoing basis.

The Bank makes construction and development loans on either a pre-sold or speculative basis. If the borrower has entered into an agreement to sell the property prior to beginning construction, then the loan is considered to be on a pre-sold basis. If the borrower has not entered into an agreement to sell the property prior to beginning construction, then the loan is considered to be on a speculative basis. If the Bank makes these loans, they generally have a term of nine to 12 months and interest is paid monthly or quarterly. The ratio of the loan principal to the value of the collateral as established by independent appraisal complies with the loan to value limitations outlined in the chart above. Any speculative loans are based on the borrower's and guarantor's unencumbered liquidity, financial strength and cash flow generating capacity. Loan proceeds are disbursed based on the percentage of completion and after the project has been inspected by an independent appraiser. Risks associated with construction loans include fluctuations in the value of real estate, interest rates, construction costs, availability of end-user permanent mortgage financing, and new job creation and household formation trends.

Commercial Loans. Loans for commercial purposes, made to a variety of businesses, are one of the components of our loan portfolio. The terms of these loans will vary by their purpose and by their underlying collateral, if any.

The Bank typically makes equipment loans for a term of seven years or less at fixed or variable rates, with the loan fully amortized over the term. Generally, the financed equipment secures equipment loans, and the ratio of the loan principal to the value of the financed equipment or other collateral is generally 80% or less of the purchase price. We believe that these loan-to-value ratios are sufficient to compensate for fluctuations in the market value of the equipment and will help minimize losses that could result from poor maintenance or the introduction of updated equipment models into the market.

Loans to support working capital typically have terms not exceeding one year and are usually secured by accounts receivable, inventory or personal guarantees of the principals of the business. For loans secured by accounts receivable or inventory, repayment is typically structured on a revolving basis with any owing balance due at maturity; and for loans secured with other types of collateral principal is typically due at maturity. The quality of the commercial borrower's management and its ability both to properly evaluate changes in the supply and demand characteristics affecting its markets for products and services

Table of Contents

and to effectively respond to such changes are significant factors in a commercial borrower's creditworthiness.

Consumer Loans. The Bank makes a variety of loans to individuals for personal, family and household purposes, including secured and unsecured installment and term loans, home equity loans and lines of credit.

Risks Associated with Lending Activities. The Bank's principal economic risk associated with each category of loans that the Bank makes is the creditworthiness of the borrower. Borrower creditworthiness is affected by general economic conditions and the strength of the relative business market segment. General economic factors affecting a borrower's ability to repay include interest, inflation and employment rates, as well as other factors affecting a borrower's customers, suppliers and employees.

Because consumer loans are often secured by rapidly depreciating assets such as automobiles or other personal property, repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss, or depreciation. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness, or personal bankruptcy.

Repayment of commercial loans and loans secured by commercial and multi-family real estate properties are often dependent on the successful operation of the business and management of the property. As a result, the quality of the commercial borrower's management and its ability both to properly evaluate changes in the supply and demand characteristics affecting its markets for products and services and to respond effectively to these changes are significant factors in a commercial borrower's creditworthiness. Risks associated with commercial real estate loans also include fluctuations in the value of the real estate, new job creation trends and tenant vacancy rates.

Risk of loss on a construction loan is dependent largely upon the accuracy of the initial estimate of the security property's value upon completion of construction as compared to the estimated costs of construction, including interest and fees. In addition, The Bank assumes certain risks associated with the borrower's ability to complete construction in a timely and workmanlike manner. If the estimate of the value of the project proves to be inaccurate or if construction is not performed timely or in a quality manner, the Bank may be confronted with a project which, when completed, has a value insufficient to assure full repayment. If that is the case, the Bank may be confronted with a decision as to whether to advance funds beyond the originally committed loan amount to permit completion of the project.

Deposit Services. Deposits are a key component of the Company's business, serving as a source of funding for lending as well as for increasing customer account relationships. The Bank seeks to establish core deposits, including checking accounts, money market accounts, and a variety of certificates of deposit and IRA accounts. The primary sources of core deposits are residents of, and businesses and their employees located in, the Bank's primary market area. The Bank also obtains deposits through personal solicitation by the Bank's officers and directors, direct mail solicitations, and advertisements published in the local media. The Bank makes deposit services accessible to customers by offering direct deposit, wire transfer, internet banking, night depository, and banking by mail.

Table of Contents

Private and Entrepreneurial Banking. The Bank operates a private and entrepreneurial banking department with the mission of providing high net worth individuals, entrepreneurs, organizations and small- and large-sized businesses with the competitive advantage and superior service that accompanies personal relationships with our private bankers. Our private bankers use a team approach to working with the investment bankers and other financial professionals involved in our client's financial lives. Through our alliances with professionals expert in investment and financial planning, estate and trust management, accounting, insurance, legal and other financial fields, we are able to provide our clients with access to a broad range of financial services.

Other Banking Services. Given client demand for increased convenience and account access, the Bank offers a range of products and services, including 24-hour telephone banking, direct deposit, traveler's checks, and automatic account transfers. The Bank also participates in a shared network of automated teller machines and a debit card system that the Bank's customers may use without per-transaction fees both throughout Georgia and nationwide.

Asset and Liability Management. The Bank manages its assets and liabilities to provide adequate liquidity, and at the same time, to achieve the maximum net interest rate margin. These management functions are conducted within the framework of written loan and investment policies. The Bank attempts to maintain a balanced position between rate sensitive assets and rate sensitive liabilities.

Market Area and Competition. The Company operates in a highly competitive environment. The Bank competes for deposits and loans with commercial banks, savings and loan associations, credit unions, finance companies, mutual funds, insurance companies and other financial entities operating locally and elsewhere. In addition, because the Gramm-Leach-Bliley Act now permits banks, securities firms, and insurance companies to affiliate, a number of larger financial institutions and other corporations offering a wider variety of financial services than the Bank currently offer could enter our area and aggressively compete in the markets that the Bank serve. Many of these competitors have substantially greater resources and lending limits than the Bank and may offer certain services that we do not or cannot provide.

We currently conduct business principally through the Bank's seven branches in their market areas of Fulton, Forsyth, Cobb and Hall counties, Georgia. Prior to the completion of our acquisition of Allied and FNB Forsyth in December, 2007 and the opening of our Cobb County branch in August, 2007, our deposit market area was restricted to Fulton County, Georgia. Based upon data available on the FDIC website as of June 30, 2007, the Bank's total deposits ranked 9 among financial institutions in the Fulton County market area, representing approximately 0.95% of the total deposits in this market. The table below shows our deposit market share in Fulton County, according to data from the FDIC website, as of June 30, 2007, as well as the size of the Cobb county market and our relative position in the larger, two-county market as of that date.

Table of Contents

Market	Number of Branches	Our Market Deposits (Dollar amounts in thousands)	Total Market Deposits (Dollar amounts in thousands)	Ranking	Market Share Percentage (%)
Buckhead Community					
Fulton County	4	\$ 528,270	\$ 55,732,698	9	0.95
Cobb County	0*	0	9,890,959	N/A	0.00
Total	4	528,270	\$ 65,623,657	13	0.80

* The Bank's Cobb County branch did not open until August, 2007.

As of June 30, 2007, there were a total of 56 commercial banks with 316 branches operating in the Fulton County market, and 70 commercial banks with 505 branches operating in the combined Fulton County and Cobb County market area.

With the acquisition of Allied and its banking subsidiary FNB Forsyth, the Bank assumed the deposit liabilities of FNB Forsyth as they existed immediately prior to the merger. The following table shows the deposit market share of FNB Forsyth, in its primary markets of Forsyth and Hall counties, as of June 30, 2007, as well as a pro forma combined presentation of the Bank together with FNB Forsyth in the combined four-county market area as of June 30, 2007.

Market	Number of Branches	Our Market Deposits (Dollar amounts in thousands)	Total Market Deposits (Dollar amounts in thousands)	Ranking	Market Share Percentage (%)
FNB Forsyth					
Forsyth County	1	\$ 157,560	\$ 4,752,376	6	3.32
Hall County	1	42,424	2,642,106	11	1.61

Hall County	1	42,424	2,642,106	11	1.61
Cobb County	0*	0	9,890,959	N/A	0.00
Total	6	\$ 728,254	\$ 73,018,139	12	1.00

* The Bank's Cobb County branch did not open until August, 2007.

Table of Contents

As of June 30, 2007, there were 33 commercial banks with 103 branches operating within the combined Forsyth County and Hall County market area, and 86 commercial banks with 608 branches operating within the combined four-county market area.

Employees. As of December 31, 2007, the Company and the Bank had a total of 124 full-time equivalent employees. Certain executive officers of the Bank also serve as officers of Buckhead Community Bancorp, Inc. We consider our employee relations to be good, and we have no collective bargaining agreements with any employees.

SUPERVISION AND REGULATION

Both the Company and the Bank are subject to extensive state and federal banking regulations that impose restrictions on and provide for general regulatory oversight of their operations. These laws are generally intended to protect depositors and not shareholders. Legislation and regulations authorized by legislation influence, among other things:

how, when and where we may expand geographically;

into what product or service market we may enter;

how we must manage our assets; and

under what circumstances money may or must flow between the parent bank holding company and the subsidiary bank.

Set forth below is an explanation of the major pieces of legislation affecting our industry and how that legislation affects our actions. The following summary is qualified by reference to the statutory and regulatory provisions discussed. Changes in applicable laws or regulations may have a material effect on our business and prospects, and legislative changes and the policies of various regulatory authorities may significantly affect our operations. We cannot predict the effect that fiscal or monetary policies, or new federal or state legislation may have on our business and earnings in the future.

Buckhead Community Bancorp, Inc.

Since the Company owns all of the capital stock of the Bank, it is a bank holding company under the federal BHCA. As a result, we are primarily subject to the supervision, examination and reporting requirements of the BHCA and the regulations of the Federal Reserve. As a bank holding company located in Georgia, the Georgia Department of Banking and Finance also regulates and monitors all significant aspects of our operations.

Acquisitions of Banks. The BHCA requires every bank holding company to obtain the Federal Reserve's prior approval before:

acquiring direct or indirect ownership or control of any voting shares of any bank if, after the acquisition, the bank holding company will directly or indirectly own or control more than 5% of the Bank's voting shares;

acquiring all or substantially all of the assets of any bank; or

merging or consolidating with any other bank holding company.

Table of Contents

Additionally, the BHCA provides that the Federal Reserve may not approve any of these transactions if it would result in or tend to create a monopoly, substantially lessen competition or otherwise function as a restraint of trade, unless the anticompetitive effects of the proposed transaction are clearly outweighed by the public interest in meeting the convenience and needs of the community to be served. The Federal Reserve is also required to consider the financial and managerial resources and future prospects of the bank holding companies and banks concerned. The Federal Reserve's consideration of financial resources generally focuses on capital adequacy, which is discussed below.

Under the BHCA, if we are adequately capitalized and adequately managed, we or any other bank holding company located in Georgia may purchase a bank located outside of Georgia. Conversely, an adequately capitalized and adequately managed bank holding company located outside of Georgia may purchase a bank located inside of Georgia. In each case, however, restrictions may be placed on the acquisition of a bank that has only been in existence for a limited amount of time or will result in specified concentrations of deposits. Currently, Georgia law prohibits acquisitions of banks that have been chartered for less than three years. Because the Bank has been chartered more than three years, this limitation under Georgia law would not affect Buckhead Community's ability to sell the Bank.

Change in Bank Control. Subject to various exceptions, the BHCA and the Change in Bank Control Act, together with related regulations, require Federal Reserve approval prior to any person or company acquiring control of a bank holding company. Control is conclusively presumed to exist if an individual or company acquires 25% or more of any class of voting securities of the bank holding company. Control is rebuttably presumed to exist if a person or company acquires 10% or more, but less than 25%, of any class of voting securities and either:

the bank holding company has registered securities under Section 12 of the Securities Act of 1934; or

no other person owns a greater percentage of that class of voting securities immediately after the transaction.

Our common stock is not currently registered under Section 12 of the Securities Exchange Act of 1934. The regulations also provide a procedure for challenging any rebuttable presumption of control.

Permitted Activities. The BHCA has generally prohibited a bank holding company from engaging in activities other than banking or managing or controlling banks or other permissible subsidiaries and from acquiring or retaining direct or indirect control of any company engaged in any activities other than those determined by the Federal Reserve to be closely related to banking or managing or controlling banks as to be a proper incident thereto. Provisions of the Gramm-Leach-Bliley Act have expended the permissible activities of a bank holding company that qualifies as a financial holding company. Under the regulations implementing the Gramm-Leach Bliley Act, a financial holding company may engage in additional activities that are financial in nature or incidental or complimentary to financial activity.

To qualify to become a financial holding company, the Bank and any other depository institution subsidiary of the Company must be well capitalized and well managed and must have a Community Reinvestment Act rating of at least satisfactory. Additionally, the Company must file an election with the Federal Reserve to become a financial holding company and must provide the Federal Reserve with 30 days' written notice prior to engaging in a permitted financial activity. While the Company meets the

Table of Contents

qualification standards applicable to financial holding companies, we have not elected to become a financial holding company at this time.

Support of Subsidiary Institutions. Under Federal Reserve policy, we are expected to act as a source of financial strength for the Bank and to commit resources to support the Bank. This support may be required at times when, without this Federal Reserve policy, we might not be inclined to provide it. In addition, any capital loans made by us to the Bank will be repaid only after its deposits and various other obligations are repaid in full. In the unlikely event of our bankruptcy, any commitment by it to a federal banking regulator to maintain the capital of the Bank will be assumed by the bankruptcy trustee and entitled to a priority of payment.

The Bank

General. The Bank is subject to extensive state and federal banking regulations that impose restrictions on and provide for general regulatory oversight of our operations. These laws are generally intended to protect depositors and not shareholders. The following discussion describes the material elements of the regulatory framework that applies to us.

Since the Bank is a commercial bank chartered under the laws of the State of Georgia, it is primarily subject to the supervision, examination and reporting requirements of the FDIC and the Georgia Department of Banking and Finance. The FDIC and Georgia Department of Banking and Finance regularly examine the Bank's operations and have the authority to approve or disapprove mergers, the establishment of branches and similar corporate actions. Both regulatory agencies have the power to prevent the continuance or development of unsafe or unsound banking practices or other violations of law.

Because the Bank's deposits are insured by the FDIC to the maximum extent provided by law, they are also subject to certain FDIC regulations. The Bank is also subject to numerous state and federal statutes and regulations that affect their business, activities and operations.

Branching. Under current Georgia law, the Bank may open branch offices throughout Georgia with the prior approval of the Georgia Department of Banking and Finance. In addition, with prior regulatory approval, the Bank may acquire branches of existing banks located in Georgia. The Bank and any other national or state-chartered bank generally may branch across state lines by merging with banks in other states if allowed by the applicable states' laws. Georgia law, with limited exceptions, currently permits branching across state lines through interstate mergers.

Under the Federal Deposit Insurance Act, states may "opt-in" and allow out-of-state banks to branch into their state by establishing a new start-up branch in the state. Currently, Georgia has not opted-in to this provision. Therefore, interstate merger is the only method through which a bank located outside of Georgia may branch into Georgia, respectively. This provides a limited barrier of entry into the Georgia banking market, which protects us from an important segment of potential competition. However, because Georgia has elected not to opt-in, our ability to establish a new start-up branch in another state may be limited. Many states that have elected to opt-in have done so on a reciprocal basis, meaning that an out-of-state bank may establish a new start-up branch only if their home state has also elected to opt-

Table of Contents

in. Consequently, until Georgia changes its election, the only way we will be able to branch into states that have elected to opt-in on a reciprocal basis will be through interstate merger.

Prompt Corrective Action. The Federal Deposit Insurance Corporation Improvement Act of 1991 establishes a system of prompt corrective action to resolve the problems of undercapitalized financial institutions. Under this system, the federal banking regulators have established five capital categories (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) in which all institutions are placed. The federal banking agencies have also specified by regulation the relevant capital levels for each of the other categories. At December 31, 2007, the Bank qualified for the well-capitalized category.

Federal banking regulators are required to take various mandatory supervisory actions and are authorized to take other discretionary actions with respect to institutions in the three undercapitalized categories. The severity of the action depends upon the capital category in which the institution is placed. Generally, subject to a narrow exception, the banking regulator must appoint a receiver or conservator for an institution that is critically undercapitalized.

FDIC Insurance Assessments. The FDIC has adopted a risk-based assessment system for insured depository institutions that takes into account the risks attributable to different categories and concentrations of assets and liabilities. The system assesses higher rates on those institutions that pose greater risks to the Deposit Insurance Fund. The FDIC places each institution in one of four risk categories using a two-step process based first on capital ratios (the capital group assignment) and then on other relevant information (the supervisory group assignment). Within the lower risk category, Risk Category I, rates will vary based on each institution's CAMELS component ratings, certain financial ratios, and long-term debt issuer ratings.

Capital group assignments are made quarterly and an institution is assigned to one of three capital categories: (1) well capitalized; (2) adequately capitalized; and (3) undercapitalized. These three categories are substantially similar to the prompt corrective action categories described above, with the undercapitalized category including institutions that are undercapitalized, significantly undercapitalized and critically undercapitalized for prompt corrective action purposes. The FDIC also assigns an institution to one of three supervisory subgroups based on a supervisory evaluation that the institution's primary federal banking regulator provides to the FDIC and information that the FDIC determines to be relevant to the institution's financial condition and the risk posed to the deposit insurance funds. Assessments range from 5 to 43 cents per \$100 of deposits, depending on the institution's capital group and supervisory subgroup. Institutions that are well capitalized will be charged a rate between 5 and 7 cents per \$100 of deposits.

The FDIC may terminate its insurance of deposits if it finds that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

Community Reinvestment Act. The Community Reinvestment Act requires that, in connection with examinations of financial institutions within their respective jurisdictions, the federal bank regulators shall evaluate the record of each financial institution in meeting the credit needs of its local community, including low and moderate-income neighborhoods. These facts are also considered in evaluating

Table of Contents

mergers, acquisitions and applications to open a branch or facility. Failure to adequately meet these criteria could impose additional requirements and limitations on the Bank. Additionally, the Bank must publicly disclose the terms of various Community Reinvestment Act-related agreements.

Allowance for Loan and Lease Losses. The Allowance for Loan and Lease Losses (the "ALLL") represents one of the most significant estimates in the Bank's financial statements and regulatory reports. Because of its significance, the Bank has developed systems by which it develops, maintains and documents comprehensive, systematic and consistently applied processes for determining the amounts of the ALLL and the provision for loan and lease losses. The Interagency Policy Statement on the Allowance for Loan and Lease Losses, issued on December 13, 2006, encourages all banks to ensure controls are in place to consistently determine the ALLL in accordance with GAAP, a bank's stated policies and procedures, management's best judgment and relevant supervisory guidance. Consistent with supervisory guidance, the Bank maintains a prudent and conservative, but not excessive, ALLL, that is at a level appropriate to cover estimated credit losses on individually evaluated loans determined to be impaired as well as estimated credit losses inherent in the remainder of the loan and lease portfolio. The Bank's estimates of credit losses reflect consideration of all significant factors that affect the collectability of the portfolio as of the evaluation date. See Management's Discussion and Analysis - Critical Accounting Estimates.

Commercial Real Estate Lending. The Bank's lending operations may be subject to enhanced scrutiny by federal banking regulators based on their concentrations of commercial real estate loans. On December 6, 2006, the federal banking regulators issued final guidance to remind financial institutions of the risk posed by commercial real estate ("CRE") lending concentrations. CRE loans generally include land development, construction loans and loans secured by multifamily property, and nonfarm, nonresidential real property where the primary source of repayment is derived from rental income associated with the property. The guidance prescribes the following guidelines for its examiners to help identify institutions that are potentially exposed to significant CRE risk and may warrant greater supervisory scrutiny.

Other Regulations. Interest and other charges collected or contracted for by the Bank are subject to state usury laws and federal laws concerning interest rates. The Bank's loan operations are also subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Home Mortgage Disclosure Act of 1975, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;

Fair Credit Reporting Act of 1978, as amended by the Fair and Accurate Credit Transactions Act, governing the use and provision of information to credit reporting agencies, certain identity theft protections, and certain credit and other disclosures;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies;

Table of Contents

Soldiers and Sailors Civil Relief Act of 1940, as amended by the Servicemembers Civil Relief Act, governing the repayment terms of, and property rights underlying, secured obligations of persons currently on active duty with the United States military;

Talent Amendment in the 2007 Defense Authorization Act, establishing a 36% annual percentage rate ceiling, which includes a variety of charges including late fees, for consumer loans to military service members and their dependents; and

rules and regulations of the various federal banking regulators charged with the responsibility of implementing these federal laws. The Bank's deposit operations are subject to federal laws applicable to depository accounts, such as the:

Truth-In-Savings Act, requiring certain disclosures for consumer deposit accounts;

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act and Regulation E issued by the Federal Reserve to implement that act, which govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services; and

rules and regulations of the various federal banking regulators charged with the responsibility of implementing these federal laws.

Capital Adequacy

The Company and the Bank are required to comply with the capital adequacy standards established by the Federal Reserve, in the case of the Company, and the FDIC, in the case of the Bank.

The Federal Reserve has established a risk-based and a leverage measure of capital adequacy for bank holding companies. The risk-based capital standards are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies, to account for off-balance-sheet exposure, and to minimize disincentives for holding liquid assets. Assets and off-balance-sheet items, such as letters of credit and unfunded loan commitments, are assigned to broad risk categories, each with appropriate risk weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance-sheet items.

Table of Contents

The minimum guideline for the ratio of total capital to risk-weighted assets is 8%. Total capital consists of two components, Tier 1 Capital and Tier 2 Capital. Tier 1 Capital generally consists of common stock, minority interests in the equity accounts of consolidated subsidiaries, noncumulative perpetual preferred stock and a limited amount of qualifying cumulative perpetual preferred stock, less goodwill and other specified intangible assets. Tier 1 Capital must equal at least 4% of risk-weighted assets. Tier 2 Capital generally consists of subordinated debt, other preferred stock and a limited amount of loan loss reserves. The total amount of Tier 2 Capital is limited to 100% of Tier 1 Capital. At December 31, 2007, the Company's ratio of total capital to risk-weighted assets was 10.50% and its ratio of Tier 1 Capital to risk-weighted assets was 9.25%.

In addition, the Federal Reserve has established minimum leverage ratio guidelines for bank holding companies. These guidelines provide for a minimum ratio of Tier 1 Capital to average assets, less goodwill and other specified intangible assets, of 3% for bank holding companies that meet specified criteria, including having the highest regulatory rating and implementing the Federal Reserve's risk-based capital measure for market risk. All other bank holding companies generally are required to maintain a leverage ratio of at least 4%. At December 31, 2007, the Company's Tier 1 leverage ratio was 10.53%. The guidelines also provide that bank holding companies experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels without reliance on intangible assets. The Federal Reserve considers the leverage ratio and other indicators of capital strength in evaluating proposals for expansion or new activities.

Failure to meet capital guidelines could subject a bank and a bank holding company to a variety of enforcement remedies, including issuance of a capital directive, the termination of deposit insurance by the FDIC, a prohibition on accepting brokered deposits and certain other restrictions on its business. As described above, significant additional restrictions can be imposed on FDIC-insured depository institutions that fail to meet applicable capital requirements. See, Prompt Corrective Action above.

See Note 17 in the Notes to Consolidated Financial Statements for the capital ratios of Buckhead Community and the Bank.

Payment of Dividends

The Company is a legal entity separate and distinct from the Bank. The principal sources of the Company's cash flow, including cash flow to pay dividends to its shareholders, are dividends that are received from the bank. Statutory and regulatory limitations apply to the payment of dividends by a subsidiary bank to its bank holding company. These same limitations apply to a bank holding company's payment of dividends to its shareholders. Our payment of dividends may also be affected by other factors, such as the requirement to maintain adequate capital above regulatory guidelines.

The Bank is required to obtain prior approval of the Georgia Department of Banking and Finance if the total of all dividends it declares any year exceeds 50% of its net income for the prior year. The payment of dividends by the Company and the Bank may also be affected by other factors, such as requirements to maintain adequate capital above regulatory guidelines.

If, in the opinion of its federal banking regulators, the Bank was engaged in or about to engage in unsafe or unsound practice, these federal banking regulator could require, after notice and a hearing, that the Bank stop or refrain from engaging in the practice it considers unsafe or unsound. The Bank's federal banking regulators have indicated that paying dividends that deplete a depository institution's capital base to an inadequate level would be an unsafe and unsound banking practice. Under the Federal Deposit

Table of Contents

Insurance Corporation Improvement Act of 1991, a depository institution may not pay any dividend if payment would cause it to become undercapitalized or if it already is undercapitalized. Moreover, the Bank's federal banking regulators have issued policy statements that provide that bank holding companies and insured banks should generally only pay dividends out of current operating earnings.

In 2007, the Company declared no dividends. The Company has not declared a dividend since its inception and does not expect to do so in the foreseeable future. Instead, the Company anticipates that all of its earnings, if any, will be used for working capital, to support its operations and to finance the growth and development of our business. Any future determination relating to dividend policy will be made at the discretion of the Company's board of directors and will depend on many of the statutory and regulatory factors mentioned above.

Restrictions on Transactions with Affiliates

The Company and the Bank are subject to the provisions of Section 23A of the Federal Reserve Act. Section 23A places limits on the amount of:

a bank's loans or extensions of credit to affiliates;

a bank's investment in affiliates;

assets a bank may purchase from affiliates, except for real and personal property exempted by the Federal Reserve;

loans or extensions of credit made by a bank to third parties collateralized by the securities or obligations of affiliates; and

a bank's guarantee, acceptance or letter of credit issued on behalf of an affiliate.

The total amount of the above transactions is limited in amount, as to any one affiliate, to 10% of a bank's capital and surplus and, as to all affiliates combined, to 20% of a bank's capital and surplus. In addition to the limitation on the amount of these transactions, each of the above transactions must also meet specified collateral requirements. The Bank must also comply with other provisions designed to avoid the taking of low-quality assets.

The Company and the Bank are also subject to the provisions of Section 23B of the Federal Reserve Act which, among other things, prohibit an institution from engaging in the above transactions with affiliates unless the transactions are on terms substantially the same, or at least as favorable to the institution or its subsidiaries, as those prevailing at the time for comparable transactions with nonaffiliated companies.

The Bank is also subject to restrictions on extensions of credit to its executive officers, directors, principal shareholders and their related interests. These extensions of credit (1) must be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third parties, and (2) must not involve more than the normal risk of repayment or present other unfavorable features.

Table of Contents

Proposed Legislation and Regulatory Action

New regulations and statutes are regularly proposed that contain wide-ranging changes to the structures, regulations and competitive relationships of financial institutions operating or doing business in the United States. We cannot predict whether or in what form any proposed regulation or statute will be adopted or the extent to which our business may be affected by any new regulation or statute.

Effect of Governmental Monetary Policies

Our earnings are affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies. The Federal Reserve's monetary policies have had, and are likely to continue to have, an important impact on the operating results of commercial banks through its power to implement national monetary policy in order, among other things, to curb inflation or combat a recession. The monetary policies of the Federal Reserve affect the levels of bank loans, investments and deposits through its control over the issuance of United States government securities, its regulation of the discount rate applicable to member banks and its influence over reserve requirements to which member banks are subject. We cannot predict the nature or impact of future changes in monetary and fiscal policies.

ITEM 1A. RISK FACTORS

An investment in our common stock involves risks. If any of the following risks or other risks, which have not been identified or which we may believe are immaterial or unlikely, actually occur, our business, financial condition and results of operations could be harmed. In such a case, the trading price of our common stock could decline, and you may lose all or part of your investment. The risks discussed below also include forward-looking statements, and our actual results may differ substantially from those discussed in these forward-looking statements.

Risks Related to Our Business.

We could suffer loan losses from a decline in credit quality.

We could sustain losses if borrowers, guarantors and related parties fail to perform in accordance with the terms of their loans. We have adopted underwriting and credit monitoring procedures and policies, including the establishment and review of the allowance for credit losses that we believe are appropriate to minimize this risk by assessing the likelihood of nonperformance, tracking loan performance and diversifying our credit portfolio. These policies and procedures, however, may not prevent unexpected losses that could materially adversely affect our results of operations.

If our allowance for loan losses is not sufficient to cover actual loan losses, our earnings could decrease.

Our success depends to a significant extent upon the quality of our assets, particularly loans. In originating loans, there is a substantial likelihood that credit losses will be experienced. The risk of loss will vary with, among other things, general economic conditions, the type of loan being made, the creditworthiness of the borrower over the term of the loan and, in the case of a collateralized loan, the quality of the collateral for the loan.

Table of Contents

Our loan customers may not repay their loans according to the terms of these loans, and the collateral securing the payment of these loans may be insufficient to assure repayment. As a result, we may experience significant loan losses, which could have a material adverse effect on our operating results. Management makes various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. We maintain an allowance for loan losses in an attempt to cover any loan losses that may occur. In determining the size of the allowance, we rely on an analysis of our loan portfolio based on historical loss experience, volume and types of loans, trends in classification, volume and trends in delinquencies and non-accruals, national and local economic conditions and other pertinent information.

If our assumptions are wrong, our current allowance may not be sufficient to cover future loan losses, and adjustments may be necessary to allow for different economic conditions or adverse developments in our loan portfolio. Material additions to our allowance would materially decrease our net income. As a result of a difficult real estate market, we have increased our allowance from \$4.5 million as of December 31, 2006 to \$9.8 million as of December 31, 2007. \$4.0 million of this increase was due to our acquisition of Allied in December 2007. The remaining \$1.3 million of the increase was made in recognition of the deterioration of the real estate market over that one-year period. We expect to continue to increase our allowance in 2008; however, we can make no assurance that our allowance will be adequate to cover future loan losses given current and future market conditions. As of December 31, 2007, management believes the allowance for loan losses is adequate.

In addition, federal and state regulators periodically review our allowance for loan losses and may require us to increase our provision for loan losses or recognize further loan charge-offs, based on judgments different than those of our management. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory agencies could have a negative effect on our operating results.

An economic downturn, especially one affecting our market areas, could adversely affect our financial condition, results of operations or cash flows.

Our success depends upon the growth in population, income levels, deposits and housing starts in our primary market areas. If the communities in which we operate do not grow, or if prevailing economic conditions locally or nationally are unfavorable, our business may not succeed. Unpredictable economic conditions may have an adverse effect on the quality of our loan portfolio and our financial performance. Economic recession over a prolonged period or other economic problems in our market areas could have a material adverse impact on the quality of the loan portfolio and the demand for our products and services. Future adverse changes in the economies in our market areas may have a material adverse effect on our financial condition, results of operations or cash flows. Further, the banking industry in Georgia is affected by general economic conditions such as inflation, recession, unemployment and other factors beyond our control. As a community bank, we are less able to spread the risk of unfavorable local economic conditions than larger or more regional banks. Moreover, we cannot give any assurance that we will benefit from any market growth or favorable economic conditions in our primary market areas even if they do occur.

The market value of the real estate securing our loans as collateral has been adversely affected by the slowing economy and unfavorable changes in economic conditions in our market areas and could be

Table of Contents

further adversely affected in the future. As of December 31, 2007, approximately 86.4% of our loans receivable were secured by real estate. Any sustained period of increased payment delinquencies, foreclosures or losses caused by the adverse market and economic conditions, including the downturn in the real estate market, in our markets will adversely affect the value of our assets, revenues, results of operations and financial condition. Currently, we are experiencing such an economic downturn, and if it continues, our operations could be further adversely affected.

Our net interest income could be negatively affected by the Federal Reserve's recent interest rate adjustments, as well as by competition in our market area.

As a financial institution, our earnings are significantly dependent upon our net interest income, which is the difference between the interest income that we earn on interest-earning assets, such as investment securities and loans, and the interest expense that we pay on interest-bearing liabilities, such as deposits and borrowings. Therefore, any change in general market interest rates, including changes resulting from changes in the Federal Reserve's fiscal and monetary policies, affects us more than non-financial institutions and can have a significant effect on our net interest income and total income. Our assets and liabilities may react differently to changes in overall market rates or conditions because there may be mismatches between the repricing or maturity characteristics of the assets and liabilities. As a result, an increase or decrease in market interest rates could have material adverse effects on our net interest margin and results of operations.

In response to the dramatic deterioration of the subprime, mortgage, credit and liquidity markets, the Federal Reserve recently has taken action on six occasions to reduce interest rates by a total of 300 basis points since September 2007, which likely will reduce our net interest income during the first half of 2008 and the foreseeable future. Any reduction in our net interest income will negatively affect our business, financial condition, liquidity, operating results, cash flows and/or the price of our securities. Additionally, in 2008, we expect to have continued margin pressure given these interest rate reductions, along with elevated levels of non-performing assets.

Our access to additional short term funding to meet our liquidity needs is limited.

We must maintain, on a daily basis, sufficient funds to cover withdrawals from depositors' accounts and to supply new borrowers with funds. We routinely monitor asset and liability maturities in an attempt to match maturities to meet liquidity needs. To meet our cash obligations, we rely on repayments as assets mature, keep cash on hand, maintain account balances with correspondent banks, purchase and sell federal funds, purchase brokered deposits and maintain a line of credit with the Federal Home Loan Bank. If we are unable to meet our liquidity needs through loan and other asset repayments and our cash on hand, we may need to borrow additional funds. Currently, our access to additional borrowed funds is limited and we may be required to pay above market rates for additional borrowed funds, which may adversely affect our results of operations.

If we fail to manage our past growth effectively, our financial condition and results of operations could be negatively affected.

Table of Contents

We experienced significant growth in 2007, with our total assets increasing \$357.7 million, or 66.1%, from December 31, 2006. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies that have experienced this type of growth. Failure to manage our past growth effectively could have a material adverse effect on our business, financial condition, results of operations, or future prospects, and could adversely affect our ability to successfully implement our business strategy.

Our recent results may not be indicative of our future results, and may not provide guidance to assess the risk of an investment in our common stock.

We may not be able to sustain our historical rate of growth or may not even be able to grow our business at all. In addition, our recent and rapid growth may distort some of our historical financial ratios and statistics. In the future, we may not have the benefit of several recently favorable factors, such as a generally increasing interest rate environment, a strong residential and commercial mortgage market or the ability to find suitable expansion opportunities. Various factors, such as economic conditions, regulatory and legislative considerations and competition, may also impede or prohibit our ability to expand our market presence. If we experience a significant decrease in our historical rate of growth, our results of operations and financial condition may be adversely affected due to a high percentage of our operating costs being fixed expenses.

Opening new offices may not result in increased assets or revenues for us.

The investment necessary for branch expansion may negatively impact our efficiency ratio. There is a risk that we will be unable to manage our growth, as the process of opening new branches may divert our time and resources. There is also risk that we may fail to open any additional branches, and a risk that, if we do open these branches, they may not be profitable which would negatively impact our results of operations.

Our plans for future expansion depend, in some instances, on factors beyond our control, and an unsuccessful attempt to achieve growth could have a material adverse effect on our business, financial condition, results of operations and future prospects.

We expect to continue to engage in new branch expansion in the future. We may also seek to acquire other financial institutions, or parts of those institutions. Expansion involves a number of risks, including:

the time and costs of evaluating new markets, hiring experienced local management and opening new offices;

the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;

we may not be able to finance an acquisition without diluting the interests of our existing shareholders;

Table of Contents

in the event of an acquisition, costs or difficulties related to the integration of our businesses may be greater than expected, and we may experience deposit attrition, customer loss or revenue loss that is greater than expected

the diversion of our management's attention to the negotiation of a transaction may detract from their business productivity;

we may enter into new markets where we lack experience; and

we may introduce new products and services with which we have no prior experience into our business.

If we fail to retain our key employees, our growth and profitability could be adversely affected.

Our success is, and is expected to remain, highly dependent on our President and CEO, Marvin Cosgray. This is particularly true because, as a community bank, we depend on our management team's ties to the community to generate business for us. Our growth will continue to place significant demands on our management, and the loss of any such person's services may have an adverse effect upon our growth and profitability.

Competition from other financial institutions may adversely affect our profitability.

The banking business is highly competitive, and we experience strong competition from many other financial institutions. We compete with commercial banks, credit unions, savings and loan associations, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market funds and other financial institutions, which operate in our primary market areas and elsewhere. Presently, approximately 86 banks serve our four-county market area with a total of approximately 608 branches.

We compete with these institutions both in attracting deposits and in making loans. In addition, we have to attract our customer base from other existing financial institutions and from new residents. Many of our competitors are well-established and much larger financial institutions. While we believe we can and do successfully compete with these other financial institutions in our markets, we may face a competitive disadvantage as a result of our smaller size and lack of geographic diversification.

Although we compete by concentrating our marketing efforts in our primary market area with local advertisements, personal contacts and greater flexibility in working with local customers, we can give no assurance that this strategy will be successful.

As a community bank, we have different lending risks than larger banks.

We provide services to our local communities. Our ability to diversify our economic risks is limited by our own local markets and economies. We lend primarily to small to medium-sized businesses, and, to a lesser extent, individuals which may expose us to greater lending risks than those of banks lending to larger, better-capitalized businesses with longer operating histories.

Table of Contents

We manage our credit exposure through careful monitoring of loan applicants and loan concentrations in particular industries, and through loan approval and review procedures. We have established an evaluation process designed to determine the adequacy of our allowance for loan losses. While this evaluation process uses historical and other objective information, the classification of loans and the establishment of loan losses is an estimate based on experience, judgment and expectations regarding our borrowers, the economies in which we and our borrowers operate, as well as the judgment of our regulators. We cannot assure you that our loan loss reserves will be sufficient to absorb future loan losses or prevent a material adverse effect on our business, financial condition, or results of operations.

Our directors and executive officers own a significant portion of our common stock and can influence stockholder decisions.

Our directors and executive officers, as a group, beneficially owned approximately 50% of our fully diluted outstanding common stock as of March 25, 2008. As a result of their ownership, the directors and executive officers have the ability, if they voted their shares in concert, to influence the outcome of all matters submitted to our stockholders for approval, including the election of directors.

If we fail to maintain an effective system of internal controls over financial reporting, we may not be able to accurately report our financial results or prevent fraud, which could adversely affect our business and the trading price of our stock.

We are currently in the process of evaluating our internal controls system to allow management to report on, and our independent auditors to audit, our internal controls over financial reporting. We will be performing the system and process evaluations and testing (and any necessary remediation) required to comply with the management certification and auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002. These systems are necessary to produce accurate financial reports and prevent fraudulent activity. In the process of our evaluation, we may identify control deficiencies of varying degrees of severity under applicable SEC and Public Company Accounting Oversight Board rules and regulations that remain unremediated. As a reporting company, we are required to report, among other things, control deficiencies that constitute a material weakness or changes in internal controls that, or are reasonably likely to, materially affect internal controls over financial reporting. A material weakness is a significant deficiency, or combination of significant deficiencies that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. If we fail to implement the requirements of Section 404 in a timely manner, we may be subject to sanctions or investigation by regulatory authorities such as the SEC. In addition, if any material weakness or deficiency is identified or is not remedied, investors may lose confidence in the accuracy of our reported financial information, and our stock price could be significantly adversely affected as a result.

Risks Related to our Industry

Declines in real estate values have adversely affected our credit quality and profitability.

During 2007, confidence in the credit market for residential housing finance eroded, which resulted in a reduction in financing available to buyers of new homes and borrowers wishing to refinance existing financing terms. The tightening of credit for residential housing led to lower demand for residential housing and more foreclosures, and has reduced the absorption rate for new and existing properties. In turn, this has caused market prices to fall as some property owners, including lenders who acquired

Table of Contents

property by foreclosure, have accepted lower prices to reduce their exposure to these real estate assets which has reduced the market values for comparable real estate. The declines in values and the increased level of marketing required to sell properties has reduced or eliminated the potential profits to many of the builders and developers of properties to whom we have extended loans. As a result, some of these borrowers have been unable to repay their loans in accordance with their terms, which has led to an increase in our past due and non-performing loans. If these housing trends continue or exacerbate, the Company expects that it will continue to experience increased delinquencies and credit losses. Moreover, if a recession occurs that negatively impacts economic conditions in the United States as a whole or in specific regions of the country, the Company would experience significantly higher delinquencies and credit losses. An increase in credit losses would reduce earnings and adversely affect the Company's financial condition. Furthermore, to the extent that real estate collateral is obtained through foreclosure, the costs of holding and marketing the real estate collateral, as well as the ultimate values obtained from disposition, could reduce the Company's earnings and adversely affect the Company's financial condition.

The Company's business volume and growth is affected by the rate of growth and demand for housing in specific geographic markets. Based on the activity discussed above, the Company expects that its level of historical growth could be significantly curtailed and its assets may in fact shrink, depending on the duration and extent of the current disruption in the housing and mortgage markets. The current disruption may expand and adversely impact the U.S. economy in general and the housing and mortgage markets in particular. In addition, a variety of legislative, regulatory and other proposals have been discussed or may be introduced in an effort to address the disruption. Depending on the scope and nature of legislative, regulatory or other initiatives, if any, that are adopted to respond to this disruption and applied to the Company, its financial condition, results of operations or liquidity could, directly or indirectly, benefit or be adversely affected in a manner that could be material to its business.

Our ability to pay dividends is limited and we may be unable to pay future dividends. As a result, capital appreciation, if any, of our common stock may be your sole opportunity for gains on your investment for the foreseeable future.

We cannot make assurances that we will have the ability to continuously pay dividends in the future. Any future determination relating to dividend policy will be made at the discretion of our Board of Directors and will depend on a number of factors, including our future earnings, capital requirements, financial condition, future prospects, regulatory restrictions and other factors that our Board of Directors may deem relevant. The holders of our common stock are entitled to receive dividends when, and if declared by our Board of Directors out of funds legally available for that purpose. As part of our consideration to pay cash dividends, we intend to retain adequate funds from future earnings to support the development and growth of our business. In addition, our ability to pay dividends is restricted by federal policies and regulations. It is the policy of the Federal Reserve that bank holding companies should pay cash dividends on common stock only out of net income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. Further, our principal source of funds to pay dividends is cash dividends that we receive from our subsidiary banks.

Table of Contents

Changes in monetary policies may have an adverse effect on our business, financial condition and results of operations.

Our financial condition and results of operations are affected by credit policies of monetary authorities, particularly the Federal Reserve. Actions by monetary and fiscal authorities, including the Federal Reserve, could have an adverse effect on our deposit levels, loan demand or business and earnings.

Environmental liability associated with lending activities could result in losses.

In the course of our business, we may foreclose on and take title to properties securing our loans. If hazardous substances are discovered on any of these properties, we may be liable to governmental entities or third parties for the costs of remediation of the hazard, as well as for personal injury and property damage. Many environmental laws can impose liability regardless of whether we knew of, or were responsible for, the contamination. In addition, if we arrange for the disposal of hazardous or toxic substances at another site, we may be liable for the costs of cleaning up and removing those substances from the site, even if we neither own nor operate the disposal site. Environmental laws may require us to incur substantial expenses and may materially limit the use of properties that we acquire through foreclosure, reduce their value or limit our ability to sell them in the event of a default on the loans they secure. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase our exposure to environmental liability.

We are subject to extensive regulation that could limit or restrict our activities and impose financial requirements or limitations on the conduct of our business, which limitations or restrictions could adversely affect our profitability.

As a bank holding company, we are primarily regulated by the Federal Reserve. Our subsidiary bank is regulated by the FDIC and the Georgia Department of Banking and Finance. Our compliance with these regulations is costly and may limit our growth and restrict certain of our activities, including payment of dividends, mergers and acquisitions, investments, loans, interest rates charged, interest rates paid on deposits and locations of offices. We are also subject to capital requirements of our regulators.

The laws and regulations applicable to the banking industry could change at any time, and we cannot predict the effects of these changes on our business and profitability. Because government regulation greatly affects the business and financial results of all commercial banks and bank holding companies, our cost of compliance could adversely affect our ability to operate profitably.

The Sarbanes-Oxley Act of 2002, the related rules and regulations promulgated by the SEC that currently apply to us and the related exchange rules and regulations, have increased the scope, complexity and cost of corporate governance, reporting and disclosure practices. As a result, we may experience greater compliance costs.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not Applicable.

Table of Contents**ITEM 2. PROPERTIES**

The main office of both the Company and the Bank is located at 415 East Paces Ferry Road, Atlanta, Georgia 30305. Prior to the acquisition of Allied and FNB Forsyth, the Bank operated three additional branches in Sandy Springs, Alpharetta and Atlanta, Georgia, which were opened in 2000, 2004 and 2005, respectively, as well as a loan production office in Suwanee, Georgia, which was opened in 2003, and also rented additional office space for its lenders in Atlanta, Chamblee and Duluth, Georgia. The Bank also opened a new branch location in Atlanta, Cobb County, Georgia, on August 28, 2007. With the closing of the acquisition of Allied and FNB Forsyth on December 4, 2007, the Bank added two branch locations in Cumming and Gainesville, Georgia, which were formerly branch locations of FNB Forsyth. The Bank owns the real estate associated with its Alpharetta and Cumming offices, and leases all other office space.

We believe that our banking offices are in good condition, are suitable to our needs and, for the most part, are relatively new. The following table summarizes pertinent details of our owned or leased branches, loan production and leased offices.

Office Address	Date Opened	Owned/ Leased	Square Footage	Use of Office
415 East Paces Ferry Road Atlanta, Fulton County, Georgia	February 6, 1998	Leased	16,538	Branch
600 Sandy Springs Circle Sandy Springs, Fulton County, Georgia	February 10, 2000	Leased	3,090	Branch
3325 Paddocks Parkway, Suite 140 Suwanee, Forsyth County, Georgia	April 1, 2003	Leased	3,021	Loan Production Office
2755 Old Milton Parkway Alpharetta, Fulton County, Georgia	February 1, 2004	Owned	5,326	Branch

Table of Contents

ITEM 3. LEGAL PROCEEDINGS

There are no material pending legal proceedings to which the Company is a party or of which any of its properties are subject, nor are there material proceedings known to the Company to be contemplated by any governmental authority. Additionally, the Company is unaware of any material proceedings, pending or contemplated, in which any existing or proposed director, officer or affiliate, or any principal security holder of the Company or any associate of any of the foregoing, is a party or has an interest adverse to the Company.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matter was submitted during the fourth quarter of the fiscal year ended December 31, 2007 to a vote of shareholders of Buckhead Community Bancorp, Inc., through the solicitation of proxies or otherwise.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

There is currently no established market for the Company's common stock, and an active trading market is not likely to develop. The Company does not have any plans to list its common stock on any stock exchange or on the over-the-counter market. As a result, investors who need or wish to dispose of all or any part of their common stock may be unable to do so except in private, directly negotiated sales.

As of March 25, 2008, the most recent practicable date prior to the filing of this Periodic Report, the Company had 6,313,813 shares issued and outstanding, held by approximately 800 shareholders of record.

The Company has paid no dividends on its common stock since its organization. The principal source of the Company's cash flow, including cash flow to pay dividends to its shareholders, is dividends that the Bank pays to the Company as its sole shareholder. Statutory and regulatory limitations apply to the Bank's payment of dividends to the Company, as well as to the Company's payment of dividends to its shareholders. For a complete discussion of restrictions on dividends, see Part I Item 1. Description of Business Supervision and Regulation Payment of Dividends.

Recent Sales of Unregistered Securities

On January 2, 2007, the Company issued 3,779 options to twelve employees of the Bank pursuant to the Company's 1999 Stock Incentive Plan, as amended, in exchange for their ongoing service as employees of the Bank. These options will vest annually, in three equal increments, beginning on the first anniversary of the grant date. Each option, upon vesting, will grant to its holder the right to purchase one share of the Company's common stock at an exercise price of \$22.50 per share. The options were issued without registration pursuant to the provisions of Rule 701 under the Act.

Table of Contents

On December 17, 2007, 19,200 options, which had previously been issued by Allied pursuant to its 2004 Stock Option Plan and had been converted to options to purchase shares of the Company's common stock as a result of the acquisition of Allied, were exercised by their respective holders, all of whom were former employees of FNB Forsyth. The exercise price of each such option was \$9.17. The options were exercised via cash payments of the exercise prices, resulting in a total of 19,200 shares of the Company's common stock being issued to the former option holders. The shares underlying the options were issued without registration pursuant to the provisions of Rule 701 under the Act.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS **General**

The following is management's discussion and analysis of certain significant factors which have affected the financial position and operating results of the Company and the Bank, during the period included in the accompanying consolidated financial statements. The purpose of this discussion is to focus on information about our financial condition and results of operations that are not otherwise apparent from our consolidated financial statements. Reference should be made to those statements and the selected financial data presented elsewhere in this report for an understanding of the following discussion and analysis.

Throughout this Item, the terms *we*, *us* and *our* refer to the Company and the Bank together on a consolidated basis.

The Company is a corporation which was organized under the laws of the state of Georgia to be a holding company for the Bank. Like most community bank holding companies, the Company derives substantially all of its income from the earnings of its subsidiary Bank. The Bank is a bank chartered under the laws of the State of Georgia that opened for business on February 16, 1998. The Bank is a full service commercial bank located in Atlanta, Georgia, with a primary service area consisting of the community of Atlanta and the surrounding areas within Fulton, Cobb, Forsyth and Hall Counties. The principal business of the Bank is to accept deposits from the public and to make loans and other investments.

Critical Accounting Estimates

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States in the preparation of our financial statements. Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting judgments and assumptions to be our critical accounting estimates. The judgments and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgments and assumptions we make, actual results could differ from these judgments and estimates which could have a material impact on our carrying values of assets and liabilities and our results of operations.

Allowance for Loan Losses

We believe the allowance for loan losses is a critical accounting estimate that requires the most significant judgments and assumptions used in preparation of our consolidated financial statements. Because the allowance for loan losses is replenished through a provision for loan losses that is charged against earnings, our subjective determinations regarding the allowance affect our earnings directly. Refer to the portion of this discussion that addresses our allowance for loan losses for a description of our processes and methodology for determining our allowance for loan losses.

Table of Contents

A loan is considered impaired, based on current information and events, if it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Uncollateralized loans are measured for impairment based on the present value of expected future cash flows discounted at the historical effective interest rate, while all collateral-dependent loans are measured for impairment based on the fair value of the collateral.

We use several factors in determining if a loan is impaired. The internal asset classification procedures include a thorough review of significant loans and lending relationships and include the accumulation of related data. This data includes loan payment status, borrowers' financial data, and borrowers' operating factors such as cash flows, operating income or loss, etc.

The allowance for loan losses is established through charges to earnings in the form of a provision for loan losses. Increases and decreases in the allowance due to changes in the measurement of the impaired loans are included in the provision for loan losses. Loans continue to be classified as impaired unless they are brought fully current and the collection of scheduled interest and principal is considered probable. When a loan or portion of a loan is determined to be uncollectible, the portion deemed uncollectible is charged against the allowance and subsequent recoveries, if any, are credited to the allowance.

Management's periodic evaluation of the adequacy of the allowance also considers impaired loans and takes into consideration our past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrowers' ability to repay, estimated value of any underlying collateral, and current economic conditions. While management believes that it has established the allowance in accordance with generally accepted accounting principles and has taken into account the views of its regulators and the current economic environment, there can be no assurance that in the future our regulators or the economic environment will not require further increases in the allowance.

Estimates of Fair Value

The estimation of fair value is significant to a number of the Company's assets, including, but not limited to, investment securities, other real estate owned, goodwill and other intangible assets. Investment securities are recorded at fair value while other real estate owned, goodwill and other intangible assets are recorded at either cost or fair value, whichever is lower. Fair values for investment securities are based on quoted market prices, and if not available, quoted prices on similar instruments. The fair values of other real estate owned are typically determined based on third-party appraisals less estimated costs to sell. Goodwill and other intangible assets are periodically evaluated to determine if any impairment might exist. The estimation of fair value and subsequent changes of fair value of investment securities, other real estate owned, goodwill and other intangible assets can have a significant impact on the value of the Company, as well as have an impact on the recorded values and subsequently reported net income.

Income taxes

The determination of our overall income tax provision is complex and requires careful analysis. As part of the overall business strategy, we may enter into business transactions that require management to consider tax laws and regulations that apply to the specific facts and circumstances under consideration. This

Table of Contents

analysis includes evaluating the amount and timing of the realization of income tax liabilities or benefits. Management continually monitors tax developments as they affect our overall tax position. Deferred tax assets and liabilities are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes.

Balance Sheet Review

At December 31, 2007, we had total assets of \$898.9 million as compared to \$541.2 million as of December 31, 2006. On December 4, 2007, we completed the acquisition of Allied, which added approximately \$273.8 in total assets to our balance sheet. Shareholder's equity totaled \$89.5 million at December 31, 2007, an increase of \$49.7 million, or 124.9% when compared to December 31, 2006. The increase was primarily driven by the acquisition of Allied. This transaction is more fully described in Note 2 to the Consolidated Financial Statements included in Item 8.

Investment Portfolio

The fair value of the investment securities portfolio as of December 31, 2007 and 2006 was \$109.6 million and \$97.8 million, respectively. The growth of the investment portfolio was related to the acquisition of Allied, which added approximately \$16.8 million to the portfolio. The remaining decrease of the portfolio was due to a number of securities called at the end of 2007. Our investment portfolio is managed with primary consideration of collateral requirements for our growing overnight sweep product and public deposit balances.

The carrying value of investment securities at December 31, 2007 and 2006, by contractual maturity, is shown below. All of our securities are classified as available-for-sale, which means that we carry them at estimated fair value with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders' equity until realized. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations without call or prepayment penalties.

Loan Portfolio

Our intent is to derive a substantial percentage of our earnings from loans. The Company's loan portfolio increased \$297.9 million, or 78.6% from December 31, 2006 to December 31, 2007. Allied contributed approximately \$209.8 million of the increase. The following table presents various categories of loans contained in the loan portfolio of the Company as of December 31, 2007, 2006, 2005, 2004 and 2003 are summarized as follows:

Table of Contents

The major components of the loan portfolio at December 31, 2007 were real estate construction and mortgage and represented 86.4% of the loan portfolio. In the context of this discussion, we define a real estate mortgage loan and a real estate construction loan as any loan, secured by real estate, regardless of the purpose of the loan. We follow the common practice of financial institutions in our market area of obtaining a security interest in real estate whenever possible, in addition to any other available collateral. We take this collateral to reinforce the likelihood of the ultimate repayment of the loan; however, this tends to increase the magnitude of our real estate loan portfolio component. Generally, we target our loan-to-value ratio to be consistent with the supervisory loan to value limit guidelines provided by the banking regulators. In order to reduce collateral risk, we attempt to maintain a relatively diversified portfolio.

Maturities and sensitivity of loans to changes in interest rates

The information in the following table is based on the contractual maturities of individual loans, including loans that may be subject to renewal at their contractual maturity. Renewal of such loans is subject to review and credit approval, as well as modification of terms upon their maturity. Actual repayments of loans may differ from maturities reflected below because borrowers have the right to prepay obligations with or without prepayment penalties.

The following table summarizes major classifications of portfolio loans by maturities as of December 31, 2007:

Table of Contents

	One Year or Less	After One, but within Five Years	After Five Years	Total

Total	\$ 451,887	\$ 225,062

Provision and Allowance for Loan Losses

We have developed policies and procedures for evaluating the overall quality of the credit portfolio and the timely identification of potential credit problems. Additions to the allowance for loan losses are made to maintain the allowance at an appropriate level based on our analysis of the potential risk in the loan portfolio. Our judgment about the adequacy of the allowance is based upon a number of assumptions about future events which we believe to be reasonable, but which may or may not be accurate. Because of the inherent uncertainty of assumptions made during the evaluation process, there can be no assurance that loan losses in future periods will not exceed the allowance for loan losses or that additional allocations will not be required. Our actual losses will undoubtedly vary from our estimates to some degree, and there is a possibility that charge-offs in future periods will exceed the allowance for loan losses as estimated at any point in time.

As of December 31, 2007 the allowance for loan losses was \$9.8 million or 1.45% of outstanding loans, as compared to \$4.5 million or 1.19% at December 31, 2006. The year-end allowance included approximately \$4.0 million associated with the Allied portfolio acquired in December 2007. The Company's current economic environment is turbulent, and the real estate values of our loan collateral are rapidly shifting. We continually monitor the adequacy of our allowance and we have employed independent external loan review consultants to complement management's evaluation of the allowance. The Company is committed to following generally accepted accounting principles, including the

Table of Contents

December 2006 Interagency Policy Statement on the Allowance for Loan and Lease Losses, as it determines the level of the allowance. As of December 31, 2007, management believes the allowance for loan losses is adequate.

Our judgment in determining the adequacy of the allowance is based on evaluations of the collectability of loans. These evaluations take into consideration such factors as changes in the nature and volume of the loan portfolio, current economic conditions that may affect the borrower's ability to pay, overall portfolio quality, and review of specific problem loans. In determining the adequacy of the allowance for loan losses, we use a loan grading system that rates loans in different categories. Certain grades representing criticized or classified loans are assigned allocations of loss based on management's estimate of potential loss that is generally based on historical losses and/or collateral deficiencies. Other loans are graded by type and allocated loss ranges based on management's perceived inherent loss for the loan type. The combination of these results is compared monthly to the recorded allowance for loan losses and material differences are adjusted by increasing or decreasing the provision for loan losses.

The following table shows an analysis of allowance for loan loss, including charge-off activity, for each of the past five years:

(Dollars in Thousands)	Twelve months ended December 31				
	2007	2006	2005	2004	2003
Balance at beginning of period	\$ 4,518	\$ 3,293	\$ 2,386	\$ 1,400	\$ 950
Loans charged off:

Net loans charged off (recovered), as a percent of average loans outstanding (annualized)	0.26%	0.25%	0.37%	-0.01%	0.32%

Table of Contents

Our provision for loan losses in 2007 was \$2.5 million, which was \$1.3 million higher than net charge-offs of \$1.2 million. The comparable provision and net charge-off amounts for 2006 were \$2.1 million and \$0.8 million, respectively. Provision increased from 2006 to 2007, primarily due to increases in non-performing loans and net charge-offs. Net charge-offs for 2007 represented 0.26% of average loans, compared to 0.25% of average loans for 2006.

The following tables show the allocation of the allowance and the percentage of the allowance allocated to each category of total loans:

	December 31 2007		December 31 2006		December 31 2005		December 31 2004		December 31 2003	
(Dollars in thousands)	Amount	Percent	Amount	Percent	Amount	Percent	Amount	Percent	Amount	Percent

Non-performing Assets

It is our policy to classify loans as non-accrual generally when they are past due in principal or interest payments for more than 90 days or if it is otherwise not reasonable to expect collection of principal and interest under the original terms. Exceptions are allowed for 90 days past due loans when such loans are secured by real estate or negotiable collateral and in the process of collection. Generally, payments received on non-accrual loans are applied directly to principal.

We have adopted the principles of Financial Accounting Standards Board (FASB) SFAS No. 114 and No. 118 relating to accounting for impaired loans and as of December 31, 2007, our impaired loans, consisting solely of loans on nonaccrual status, totaled \$8.3 million and had associated reserves of approximately \$760 thousand. This is compared to impaired loans and associated reserves of \$3.6 million and approximately \$382 thousand, respectively, as of December 31, 2006. A loan is considered impaired when it is probable, based on current information and events, the Company will be unable to collect all principal and interest payments due in accordance with the contractual terms of the loan agreement. Impaired loans are measured by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. The amount of impairment, if any, and any subsequent changes are included in the allowance for loan losses. Interest on accruing impaired loans is recognized as long as such loans do not meet the criteria for nonaccrual status.

Non-performing assets, comprised of non-accrual loans, other real estate owned, other repossessed assets and loans for which payments are more than 90 days past due totaled \$25.2 million at December 31, 2007, compared to \$8.3 million at December 31, 2006. Non-accrual loans were \$8.3 million at December

Table of Contents

31, 2007, an increase of \$4.7 million from non-accrual loans of \$3.6 million at December 31, 2006. The Company had loans ninety days past due and still accruing at December 31, 2007 of \$3.4 million as compared to \$3.0 million for the same period in 2006. As mentioned above, our policy allows for us to continue accruing interest on loans that are 90 days past due loans when such loans are secured by real estate or negotiable collateral and in the process of collection. Many of the loans classified as 90 days past due and still accruing are SBA loans, where we are contractually obligated to apply payments on such loans to interest first, rather than principal. Net other real estate owned totaled \$13.4 million as of December 31, 2007, compared to \$1.7 million at December 31, 2006.

The current credit deterioration has been driven by a real estate slowdown that accelerated in mid to late 2007, which has had a greater impact on community banks in the Company's trade area than previous downturns in the economic cycle.

At December 31, 2007, we had non-performing loans, defined as non-accrual and accruing loans past due more than 90 days, of \$11.7 million or 1.74% of total loans. Non-performing loans for December 31, 2006 were \$6.6 million or 1.74% of total loans. Interest that would have been recorded on non-accrual loans had they performed in accordance with their original terms, amounted to approximately \$723 thousand, \$305 thousand, and \$120 thousand for the twelve months ended December 31, 2007, 2006 and 2005 respectively. Interest income on non-accrual loans included in the results of operations for the years ended December 31, 2007, 2006 and 2005, totaled approximately \$69 thousand, \$118 thousand and \$52 thousand, respectively.

A summary of nonperforming assets as of December 31, 2007, 2006, 2005, 2004 and 2003 is presented below:

(Dollars in Thousands)	December 31				
	2007	2006	2005	2004	2003
Non-accrual loans	\$ 8,310	\$ 3,617	\$ 581	\$ 1,324	\$ -
Loans 90 days or more past due and still accruing	3,439	2,977	1,904	-	-
Total non-performing loans	11,749	6,594	2,485	1,324	-
All other real estate owned, net	13,437	1,702	-	-	107
All other repossessed assets	-	16	-	-	14
Total non-performing assets	\$ 25,186	\$ 8,312	\$ 2,485	\$ 1,324	\$ 121

As a percent of total loans at end of period:

Non-accrual loans	1.23%	0.95%	0.22%	0.72%	0.00%
Loans 90 days or more past due and still accruing	0.51%	0.78%	0.71%	0.00%	0.00%
Total non-performing assets	3.72%	2.19%	0.94%	0.72%	0.10%

The increase to our non-accrual loans during 2007 is the net result of the following changes:

Table of Contents

	December 31 2007
(Dollars in Thousands)	
Balance at December 31, 2006	\$ 3,617
Loans reclassified to non-accrual status in 2007	16,863
Payments received on non-accrual loans during 2007	(4,868)
Non-accrual loans charged-off during 2007	(1,173)
Non-accrual loans reclassified to other real estate	(6,129)
Non-accrual loans reclassified to accrual status in 2007	-
Balance at December 31, 2007	\$ 8,310

During 2007, additions to loans on nonaccrual status consisted of 17 real estate secured loans totaling \$16.9 million. At December 31, 2007, non-accrual loans consisted of eight loans for construction of 1-4 family residential housing, four commercial and industrial loans, and three SBA real estate loans, totaling approximately \$5.1 million, \$0.8 million, and \$2.4 million, respectively.

At December 31, 2007, the Company's Other Real Estate Owned (OREO) consisted of 15 properties totaling \$13.4 million, compared to two properties totaling \$1.7 million as of December 31, 2006. The increase in OREO during 2007 was the result of the foreclosure of 13 residential properties and two commercial properties. Two properties were sold during 2007.

At December 31, 2007, the Company's OREO consisted of the following:

	December 31 2007
(Dollars in Thousands)	
Construction and land development	\$ 10,502
1-4 family residential properties	1,500
Commercial properties	1,435
Total other real estate owned	\$ 13,437

Our OREO procedures currently determine disposition value, the valuation used to place the property into OREO, based upon the most recent appraisal of the property that we have at the time, less estimated costs to sell the property. Any difference between the disposition value and the loan balance is recommended for charge off. Once the property is in OREO, the property is listed with a realtor to begin sales efforts.

Management continually monitors the loan portfolio to ensure that all loans potentially having a material adverse impact on future operating results, liquidity or capital resources have been classified as non-performing. Should economic conditions deteriorate, the inability of distressed customers to service their existing debt could cause higher levels of non-performing loans.

It is our general policy to stop accruing interest income and place the recognition of interest on a cash basis when a loan is placed on non-accrual status and any interest previously accrued but not collected is reversed against current income. Generally, a loan is placed on non-accrual status when it is over 90 days past due and there is reasonable doubt that all principal will be collected.

Table of Contents

In addition to loans formally classified as non-accrual or non-performing, management maintains a watch list of loans which may eventually become so classified. Individual loan officers are responsible for assessing business and credit risk for each loan in their respective portfolios. The loan watch lists exist as a vehicle measuring and monitoring identified assets with heightened risk characteristics. Heightened risk characteristics would include a history of poor payment performance, poor financial performance, as well as the potential for adverse earnings impact from deteriorating collateral values. Management meets monthly to re-assess the ongoing status of credits on the watch list. As of December 31, 2007, there were loans totaling \$21.0 million on the watch list and \$8.3 million on nonaccrual status.

Deposits

Core deposits, which exclude time deposits of \$100,000 or more, CDARs deposits, and brokered time deposits, provide a relatively stable funding source for our loan portfolio and other earning assets. Core deposits were approximately \$345.1 million at December 31, 2007 compared to \$222.0 million at December 31, 2006. Although we view CDARs as core customers, by banking regulation, CDARs balances are not considered to be core deposits. CDARs balances were \$70.6 million at December 31, 2007 compared to \$56.9 million as of December 31, 2006.

The maturity distribution of time deposits of \$100,000 or more as of December 31, 2007 was as follows:

(Dollars in thousands)

Three months or less	\$ 64,553
Over three through six months	81,893
Over six through twelve months	90,233
Over twelve months	45,691
Total	\$ 282,370

Borrowed Funds

We have access to various short-term borrowings, including the purchase of federal funds and borrowing arrangements from the FHLB and other financial institutions. There were no FHLB borrowings as of December 31, 2007 and December 31, 2006. The Company had federal funds purchased of \$1.5 million as of December 31, 2007 and zero at December 31, 2006. The weighted average interest rate for federal funds purchased for the year ended December 31, 2007 was 5.51%.

Overnight customer sweep agreements totaled \$15.1 million as of December 31, 2007 compared to \$10.0 million at December 31, 2006. These short-term borrowings are collateralized by securities and generally mature within one day from the transaction date. The agreements are reflected at the amount of cash received in connection with the transaction. The Company may be required to provide additional collateral based on the fair value of the underlying securities. For the year ended December 31, 2007, the weighted average interest rate on overnight customer sweep agreements was 3.30%.

As of December 31, 2007, other borrowings totaled \$3.0 million compared to zero as of December 31, 2006. Other borrowings represent a revolving line of credit secured by the common stock of the Bank. The \$10 million line of credit matures in September 2008 and has a floating rate of 30 day LIBOR plus 1.70%.

Table of Contents

At December 31, 2007 and 2006, we had junior subordinated debt totaling \$15.5 million. These trust preferred securities and related debentures are described more fully in Note 10 to the Consolidated Financial Statements included in Item 8.

Income Statement Review

We reported net income of \$4.0 million for the twelve months ended December 31, 2007, a decrease of \$1.2 million, or 23.5%, compared to the same period of the prior year. Basic and diluted earnings per share amounted to \$0.86 and \$0.85, respectively, compared to \$1.24 basic and \$1.18 diluted earnings per share for the year ended December 31, 2006. Margin compression and increasing costs to carry nonperforming assets had a negative impact on earnings for the current year.

On December 4, 2007, the Company acquired Allied Bancshares, Inc. The acquisition was accounted for under the purchase method of accounting with the results of operations for Allied included in our consolidated financial results beginning December 4, 2007. This transaction is more fully described in Note 2 to the Consolidated Financial Statements included in Item 8.

Net Interest Income/Margin

Net interest income for 2007 was \$21.8 million, an increase of \$2.3 million or 11.7% over the same period of 2006. The increase in net interest income was primarily driven by loan growth.

Average loans for 2007 were \$445.5 million, compared to \$335.5 million for the same period in 2006. The average yield on loans decreased from 9.53% for the twelve months ended December 31, 2006 to 9.26% for the twelve months ended December 31, 2007. Interest reversals related to nonperforming loans contributed to the decline. For the year ended December 31, 2007, average securities available for sale were \$100.7 million compared to \$88.2 million for the same period of 2006.

The average cost of funds increased 48 basis points to 5.03% for the twelve months ended December 31, 2007 compared to the same period in 2006, primarily due to increases in volume and the interest rates paid on certificates of deposits. Average time deposits for 2007 were \$395.7 million, compared to \$288.7 million for the same period of 2006, an increase of 37.1%. The average rate paid on time deposits increased from 4.86% for 2006 to 5.39% for 2007. While the Federal Reserve reduced the federal funds target rate during 2007, average rates paid on these deposits typically lag these rate reductions due to the longer term of the accounts.

The banking industry uses two ratios to measure relative profitability of net interest income. The net interest rate spread measures the difference between the average yield on interest-earning assets and the average rate paid on interest-bearing liabilities. The interest rate spread eliminates the impact of non-interest-bearing deposits and gives a direct perspective on the effect of market interest rate movements. The net interest margin is defined as net interest income as a percent of average total interest-earning assets and takes into account the positive impact of investing non interest-bearing deposits.

For the twelve months ended December 31, 2007 and 2006, the net interest spread was 3.21% and 3.73%, respectively, while the net interest margin was 3.73% and 4.27%, respectively. A number of factors contributed to the net interest spread and net interest margin compression from a year ago. Competition

Table of Contents

for deposits, particularly time deposits, increased. Additionally, the higher level of nonperforming assets lowered loan yields.

The following tables show the relationship between interest income and expense and the average balances of interest earning assets and interest bearing liabilities for the three years ended December 31, 2007, 2006 and 2005:

Nonaccrual loans and the interest income which was recorded on these loans, if any, are included in the yield calculation for loans in all periods reported. Loan fees totaled \$2.2 million, \$2.4 million, and \$2.1

Table of Contents

million for the years ended December 31, 2007, 2006 and 2005, respectively, and are included with interest income on loans.

The following table shows the relative impact on net interest income of changes in the average outstanding balances (volume) of earning assets and interest bearing liabilities and the rates earned and paid by us on such assets and liabilities for the years ended December 31, 2007, 2006 and 2005. Variances resulting from a combination of changes in rate and volume are allocated in proportion to the absolute dollar amounts of the change in each category.

Other Income and Other Expense

For the twelve months ended December 31, 2007 and 2006, total noninterest income totaled \$1.6 million and \$1.8 million, respectively. There was a \$327 thousand, or 24.7% decrease in gains on the sale of SBA loans, while other noninterest income increased \$82 thousand, or 17.4% compared to the year ended December 31, 2006. Other noninterest income was comprised primarily of service charge and fee income.

Total noninterest expense for the twelve months ended December 31, 2007 increased \$3.7 million, or 32.8% from 2006. The primary component of total noninterest expense was salary and employee benefits, which totaled \$8.7 million and \$6.9 million for the years ended December 31, 2007 and 2006, respectively. The \$1.8 million, or 26.5% increase in salary and employee benefits primarily resulted from additional employees hired in late 2006. We had 124 full time equivalent employees at December 31, 2007, compared to 90 full time equivalent employees at December 31, 2006. The increase was primarily due to the acquisition of Allied employees in December 2007. Legal and other professional services

Table of Contents

totalled \$517 thousand and \$373 thousand for the years ended December 31, 2007 and 2006, respectively. The increase was primarily due to additional professional fees associated with our public registration in connection with the Allied acquisition. Other operating expenses increased \$1.4 million, or 74.5% from the twelve months ended December 31, 2006, primarily due to an \$882 thousand increase in provision for OREO losses and OREO expenses, as well as a \$187 thousand increase in FDIC premiums.

The following table shows the components of noninterest expense for the three years ended December 31, 2007, 2006 and 2005.

(Dollars in Thousands)	Twelve months ended December 31		
	2007	2006	2005
Salaries and employee benefits	\$ 8,725	\$ 6,897	\$ 4,904
Occupancy expenses	1,862	1,486	1,055
Advertising and marketing	635	661	401
Legal and other professional services	517	373	262
FDIC premiums	232	45	31
Provision for OREO losses	615	-	-
OREO expenses	270	3	-
Amortization of intangibles	24	-	-
Data processing and technology	782	645	460
Other expenses	1,257	1,129	840
Total noninterest expense	\$ 14,919	\$ 11,239	\$ 7,953

Income Taxes

The provision for income taxes was \$2.0 million and \$2.8 million for the years ended December 31, 2007 and 2006, respectively. Effective tax rates for the periods were 32.9% and 34.9%, respectively.

Liquidity

We must maintain, on a daily basis, sufficient funds to cover the withdrawals from depositors' accounts and to supply new borrowers with funds. To meet these obligations, we keep cash on hand, maintain account balances with our correspondent banks, and purchase and sell federal funds and other short-term investments. Asset and liability maturities are monitored in an attempt to match these to meet liquidity needs. We seek to monitor our liquidity to meet regulatory requirements and local funding requirements. We believe the current level of liquidity is adequate to meet current needs.

Our primary sources of liquidity are a stable base of deposits, scheduled repayments on loans, and interest and maturities of investments. All securities have been classified as available for sale, which means they are carried at fair value with unrealized gains and losses excluded from earnings and reported as a separate component of other comprehensive income. If necessary, we have the ability to sell a portion of our investment securities to manage interest sensitivity gap or liquidity. Cash and due from banks and federal funds sold may be utilized to meet liquidity needs.

Table of Contents

At December 31, 2006, we had arrangements with a correspondent and commercial banks for short term unsecured advances up to \$20.5 million. As of December 31, 2007, we had arrangements totaling \$38.0 million. In 2007, we also entered into a revolving credit line with additional available funds of \$7.0 million as of December 31, 2007.

Our cash flows are composed of three classifications: cash flows from operating activities, cash flows from investing activities, and cash flows from financing activities. Cash and due from banks increased \$11.3 million from December 31, 2006, to a total of \$19.2 million at December 31, 2007. Cash used in investing activities totaled \$72.7 million for 2007, primarily due to increases in loans. Cash provided by financing activities totaled \$74.6 million for the twelve months ended December 31, 2007, due to increases in deposits.

The table below contains a summary of our contractual obligations as of December 31, 2007:

(Dollars in Thousands)	1 year or less	1-3 years	3-5 years	After 5 years	Total
Deposits having no stated maturity	\$ 183,226	\$ -	\$ -	\$ -	\$ 183,226
Subordinated debentures	-	5,155	10,310	-	15,465
Certificates of deposit	492,035	63,184	17,303	-	572,522
Federal funds purchased and repurchase agreements	16,570	-	-	-	16,570
Other borrowings	3,000	-	-	-	3,000
Leases	858	1,496	1,384	1,291	5,029
	\$ 695,689	\$ 69,835	\$ 28,997	\$ 1,291	\$ 795,812

Capital Resources

We are subject to various regulatory capital requirements administered by our respective federal banking regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, both the Company and the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and the Bank's respective capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weighting, and other factors.

Quantitative measures established by regulations to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier I capital to risk-weighted assets, and of Tier I capital to average assets, as such terms are defined in the regulations. Management believes, as of December 31, 2007, that the Company and the Bank meet all capital adequacy requirements to which each is subject.

Table of Contents

As of December 31, 2007, the most recent regulatory notification categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized the Bank must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios. There are no conditions or events since that notification that management believes have changed the Bank's category.

At December 31, 2007, our capital ratios were adequate based on regulatory minimum capital requirements. The minimum capital requirements and the actual capital ratios on a consolidated and bank-only basis are as follows:

	Tier 1 Leverage	Tier 1 Risk-based	Total Risk-based
Minimum required	4.00%	4.00%	8.00%
Minimum required to be well capitalized	5.00%	6.00%	10.00%
Actual ratios at December 31, 2007			
The Buckhead Community Bank	10.62%	9.25%	10.50%
Consolidated	10.53%	9.25%	10.50%

Off-Balance-Sheet Items

Our financial statements do not reflect various commitments and contingent liabilities that arise in the normal course of business. These off-balance-sheet financial instruments include commitments to extend credit and standby letters of credit. These financial instruments are included in the financial statements when funds are distributed or the instruments become payable. We use the same credit policies in making commitments as we do for on-balance sheet instruments. Our exposure to credit loss in the event of nonperformance by the other party to the financial instruments for commitments to extend credit, standby letters of credit and credit card commitments is represented by the contractual amount of those instruments.

The table below contains a summary of our commitments as of December 31, 2007 and December 31, 2006.

	December 31	
(Dollars in Thousands)	2007	2006
Commitments to extend credit	\$ 158,997	\$ 100,120
Standby letters of credit	7,681	1,921
	\$ 166,678	\$ 102,041

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Sensitivity Management

The absolute level and volatility of interest rates can have a significant impact on the Company's profitability. The objective of interest rate risk management is to identify and manage the sensitivity of net interest income to changing interest rates, in order to achieve the Company's overall financial goals. Based on economic conditions, asset quality and various other considerations, management establishes tolerance ranges for interest rate sensitivity and manages within these ranges.

The Company's net interest income and the fair value of its financial instruments are influenced by changes in the level of interest rates. We manage our exposure to fluctuations in interest rates through policies established by the asset/liability committee of the board of directors. The asset/liability committee meets periodically and has responsibility for approving asset/liability management policies, formulating and implementing strategies to improve balance sheet positioning and/or earnings and reviewing the Company's interest rate sensitivity.

One of the tools management utilizes to estimate the sensitivity of net interest revenue to changes in interest rates is an interest rate simulation model. Such estimates are based upon a number of assumptions for each scenario, including the level of balance sheet growth, deposit repricing characteristics and the rate of prepayments. The simulation model measures the potential change in net interest revenue over a twelve-month period under six interest rate scenarios. The first scenario assumes rates remain flat over the next twelve months and is the scenario that all others are compared to in order to measure the change in net interest income. The second scenario is a most likely scenario that projects the most likely change in rates over the next twelve months based on the slope of the yield curve. The Company models ramp scenarios that assume gradual increases and decreases of 300 basis points each over the next twelve months. At December 31, 2007, our simulation model indicated that a 300 basis point increase in rates over the next twelve months would cause an approximate 16.43% increase in net interest income and a 300 basis point decrease in rates over the next twelve months would cause an approximate 12.63% decrease in net interest income. At December 31, 2006, our simulation model indicated that a 300 basis point increase in rates over the next twelve months would cause an approximate 17.05% increase in net interest income and a 300 basis point decrease in rates over the next twelve months would cause an approximate 15.02% decrease in net interest income.

Interest rate sensitivity is a function of the repricing characteristics of the portfolio of assets and liabilities. These repricing characteristics are the time frames within which the interest-earning assets and interest-bearing liabilities are subject to change in interest rates either at replacement, repricing or maturity during the life of the instruments. Interest rate sensitivity management focuses on the maturity structure of assets and liabilities and their repricing characteristics during periods of changes in market interest rates. Effective interest rate sensitivity management seeks to ensure that both assets and liabilities respond to changes in interest rates within an acceptable timeframe, thereby minimizing the impact of interest rate changes on net interest revenue. Interest rate sensitivity is measured as the difference between the volumes of assets and liabilities in the Company's current portfolio that are subject to repricing at various time horizons: immediate; one to three months; four to twelve months; one to five years; over five years, and on a cumulative basis. The differences are known as interest sensitivity gaps.

Table of Contents

The following table shows interest sensitivity gaps for these different intervals.

(Dollars in thousands)	Interest Sensitivity by Month As of December 31, 2007					
	Immediate	1 to 3	4 to 12	13 to 60	Over 60	Total
Interest-earning assets:						
Federal funds sold	\$ 23,428	-	-	-	-	23,428
Interest Bearing Due From accounts	2,264	-	-	-	-	2,264
Investment securities available for sale	-	26,892	13,343	40,233	30,940	111,408
Loans	-	555,638	61,672	46,146	12,663	676,119
Total earning assets	25,692	582,530	75,015	86,379	43,603	813,219
Interest-bearing liabilities						
Non-Interest Bearing Deposits	-	1,452	4,359	23,248	17,437	46,496
Interest bearing deposits	-	1,848	5,547	29,515	-	36,910
Savings Deposits (includes MMkt)	-	94,048	915	4,857	-	99,820
Time Deposits	-	135,763	356,591	80,168	-	572,522
Federal funds purchased and repurchase agreements	16,570	-	-	-	-	16,570
Other Borrowings	-	-	3,000	-	-	3,000
Junior subordinated debt	-	-	-	15,465	-	15,465
Interest-bearing liabilities	16,570	233,111	370,412	153,253	17,437	790,783
Interest Sensitivity Gap	9,122	349,419	(295,397)	(66,874)	26,166	
Cumulative interest-sensitivity gap	\$ 9,122	358,541	63,144	(3,730)	22,436	
Ratio of cumulative interest-sensitivity gap to total earning assets	1.12%	44.09%	7.76%	-0.46%	2.76%	

As demonstrated in the preceding table, 78.4% of interest-bearing liabilities will reprice within twelve months compared with 84.0% of interest-earning assets, however such changes may not be proportionate with changes in market rates within each balance sheet category. In addition, the Company may have some discretion in the extent and timing of deposit repricing depending upon the competitive pressures in the markets in which it operates. Changes in the mix of earning assets or supporting liabilities can either increase or decrease the net interest margin without affecting interest rate sensitivity. The interest rate spread between an asset and its supporting liability can vary significantly even when the timing of repricing for both the asset and the liability remains the same, due to the two instruments repricing according to different indices.

Varying interest rate environments can create unexpected changes in prepayment levels of assets and liabilities that are not reflected in the interest rate sensitivity gap analysis. These prepayments may have significant impact on the net interest margin. Because of these limitations, an interest sensitivity gap analysis alone generally does not provide an accurate assessment of exposure to changes in interest rates.

Table of Contents

Impact of Inflation and Changing Prices

The effect of relative purchasing power over time due to inflation has not been taken into effect in our financial statements. Rather, the statements have been prepared on a historical cost basis in accordance with generally accepted accounting principles in the United States.

Since most of the assets and liabilities of a financial institution are monetary in nature, the effect of changes in interest rates will have a more significant impact on our performance than will the effect of changing prices and inflation in general. Interest rates may generally increase as the rate of inflation increases, although not necessarily in the same magnitude.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA
Report of Independent Registered Public Accounting Firm

To the Board of Directors

Buckhead Community Bancorp, Inc.

Atlanta, Georgia

We have audited the consolidated balance sheets of **Buckhead Community Bancorp, Inc. and Subsidiary** as of December 31, 2007 and 2006, and the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Buckhead Community Bancorp, Inc. and subsidiary as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles.

Notes to Consolidated Financial Statements

Note 1 Accounting Policies and Recent Accounting Pronouncements

Nature of Operations

Buckhead Community Bancorp, Inc. (Buckhead or the Company) is a bank holding company whose principal activity is the ownership and management of its wholly-owned subsidiary, The Buckhead Community Bank (the Bank). The Bank is a commercial bank headquartered in Atlanta, Fulton County, Georgia. The Bank operates seven branch locations and one loan production office, all of which are located in metropolitan Atlanta, Georgia. The Bank provides a full range of banking services in its primary market areas.

Basis of Presentation and Accounting Estimates

The consolidated financial statements include the accounts of the Company and its subsidiary. Significant intercompany transactions and balances have been eliminated in consolidation. Results of operations of companies purchased are included from the date of acquisition. Assets and liabilities of purchased companies are stated at estimated fair values at the date of acquisition.

In preparing the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP), management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the balance sheet date and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation have been included. Certain reclassifications have been made to prior period amounts to conform to the current period presentation, with no impact to total assets or net income.

Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the valuation of foreclosed assets, deferred income taxes, goodwill, intangible assets, and contingent assets and liabilities. The determination of the adequacy of the allowance for loan losses is based on estimates that are susceptible to significant changes in the economic environment and market conditions. In connection with the determination of the estimated losses on loans and the valuation of foreclosed assets, management obtains independent appraisals for significant collateral.

Cash, Due From Banks and Cash Flows

For purposes of reporting cash flows, cash and due from banks include cash on hand, cash items in process of collection and amounts due from banks. Cash flows from restricted equity securities, loans, interest bearing deposits in banks, federal funds sold, other borrowings and deposits are reported on a net basis.

The Bank is required to maintain reserve balances in cash or on deposit with the Federal Reserve Bank, based on a percentage of deposits. The total of those reserve balances was approximately \$2,224,000 and \$1,339,000 at December 31, 2007 and 2006, respectively.

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

Securities

All debt securities are classified as available for sale and recorded at fair value with unrealized gains and losses excluded from earnings and reported in other comprehensive income, net of the related deferred tax effect. Restricted equity securities without a readily determinable fair value are reported at cost.

The amortization of premiums and accretion of discounts are recognized in interest income using methods approximating the interest method over the life of the securities. Realized gains and losses, determined on the basis of the cost of specific securities sold, are included in earnings on the trade date. Declines in the fair value of securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses.

Loans

Loans are reported at their outstanding principal balances less net deferred loan fees and the allowance for loan losses. Interest income is accrued on the outstanding principal balance. Loan origination fees, net of certain direct loan origination costs, are deferred and recognized as an adjustment of the related loan yield over the life of the loan.

The accrual of interest on loans is discontinued when, in management's opinion, the borrower may be unable to meet payments as they become due, unless the loan is well-secured. All interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income, unless management believes that the accrued interest is recoverable through the liquidation of collateral. Interest income on nonaccrual loans is recognized on the cost-recovery method, until the loans are returned to accrual status. Loans are returned to accrual status when all the principal and interest amounts are brought current and future payments are reasonably assured.

A loan is considered impaired when it is probable, based on current information and events, the Company will be unable to collect all principal and interest payments due in accordance with the contractual terms of the loan agreement. Impaired loans are measured by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. The amount of impairment, if any, and any subsequent changes are included in the allowance for loan losses. Interest on accruing impaired loans is recognized as long as such loans do not meet the criteria for nonaccrual status.

Loans Held for Sale

The Company originates and sells certain loans in established secondary markets. Loans held for sale are those loans the Company has the intent to sell in the foreseeable future. They are carried at the lower of aggregate cost or market value. Gains and losses on sales of loans are recognized at settlement dates and are determined by the difference between the sales proceeds and the carrying value of the loans less direct selling costs. As of December 31, 2007 and 2006, loans held for sale were comprised of Small Business Administration (SBA) loans in the process of being sold to investors.

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

Allowance for Loan Losses

The allowance for loan losses is established through a provision for loan losses charged to expense. Loan losses are charged against the allowance when management believes the collectability of the principal is unlikely. Subsequent recoveries, are credited to the allowance.

The allowance is an amount that management believes will be adequate to absorb estimated losses relating to specifically identified loans, as well as probable credit losses inherent in the balance of the loan portfolio, based on an evaluation of the collectability of existing loans and prior loss experience. This evaluation also takes into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, review of specific problem loans, concentrations and current economic conditions that may affect the borrower's ability to pay. This evaluation does not include the effects of expected losses on specific loans or groups of loans that are related to future events or expected changes in economic conditions. While management uses the best information available to make its evaluation, future adjustments to the allowance may be necessary if there are any significant changes in economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses, and may require the Company to make additions to the allowance based on their judgment about information available to them at the time of their examinations.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as doubtful, substandard or special mention. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation. Depreciation is computed principally by the straight-line method over the estimated useful lives of the assets or lease term. The range of estimated useful lives for land improvements is 10 to 35 years, for buildings and improvements, 10 to 40 years, and for furniture and equipment, 3 to 8 years. The estimated useful life for leasehold improvements is the remaining term of the lease, which is approximately 5 years.

Foreclosed Assets

Foreclosed assets acquired through or in lieu of loan foreclosure are held for sale and are initially recorded at fair value. Any write-down to fair value at the time of transfer to foreclosed assets is charged to the allowance for loan losses. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell. Costs of improvements are capitalized, whereas costs relating to holding foreclosed assets and any subsequent adjustments to the carrying value are expensed. Foreclosed assets totaled \$13,437,212 and \$1,702,579 at December 31, 2007 and 2006, respectively.

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements*****Goodwill and Other Intangible Assets***

Goodwill represents the excess of purchase price over the fair value of identifiable net assets of acquired companies. Goodwill is not amortized and instead is subject to impairment testing on an annual basis, or more often if events or circumstances indicate that there may be impairment.

Identified intangible assets that have a finite life are amortized over their useful lives and are evaluated for impairment whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable.

Income Taxes

Deferred income tax assets and liabilities are determined using the balance sheet method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws.

Stock-Based Compensation

At December 31, 2007, the Company had a stock-based compensation plan, which is described more fully in Note 12. Prior to January 1, 2006, the Company accounted for these plans under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by FASB Statement No. 123, *Accounting for Stock-Based Compensation*.

Effective January 1, 2006, the Company adopted the fair value recognition provisions of Statement of Financial Accounting Standard (SFAS) No. 123(R), *Share-Based Payment*, using the modified-prospective-transition method. Under the modified-prospective-method, compensation cost recognized for all share-based payments granted on or after January 1, 2006, is based on the grant-date fair value estimated in accordance with the provisions of Statement 123(R). Results for prior periods have not been restated.

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123(R) to stock-based compensation for the year ended December 31, 2005 (in thousands, except per share data):

Net income, as reported	\$ 3,278
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	98
Pro forma net income	\$ 3,180
Earnings per share:	
Basic - as reported	\$ 0.94
Basic - pro forma	\$ 0.91
Diluted - as reported	\$ 0.86
Diluted - pro forma	\$ 0.83

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

Prior to the adoption of Statement 123(R), the Company would have presented all tax benefits of deductions resulting from the exercise of stock options as operating cash flows in the statement of cash flows. Statement 123(R) requires the cash flows resulting from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows.

Earnings Per Share

Basic earnings per share are computed by dividing net income by the weighted average number of shares of common stock outstanding. Diluted earnings per share are computed by dividing net income by the sum of the weighted-average number of shares of common stock outstanding and potential common shares. Potential common shares consist of stock options and restricted stock.

Stock Split

The Company declared a 20% stock split effected in the form of a stock dividend during 2006. Earnings per share and all stock option disclosures for the years ended December 31, 2006 and 2005 have been retroactively adjusted for the increased number of shares of common stock as of the earliest period presented. In addition, the statement of changes in shareholders' equity has been retroactively adjusted as of the earliest period presented.

Comprehensive Income

Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available for sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

Recent Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that affect accounting, reporting, and disclosure of financial information by the Company:

In July 2006, the FASB issued FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in enterprises' financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition threshold and measurement attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transitions. The adoption of FIN 48 had no effect on the Company's financial statements.

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, *Fair Value Measurements*, which clarifies how companies should use fair value measurements in accordance with US GAAP for recognition and disclosure. SFAS No. 157 establishes a common definition of fair

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

value and a framework for measuring fair value under US GAAP, along with expanding disclosures about fair value measurements to eliminate differences in current practice that exist in measuring fair value under the existing accounting standards. SFAS No. 157 establishes a three-level fair value hierarchy to prioritize the inputs used in valuation techniques. SFAS No. 157 requires disclosures detailing the extent to which companies measure assets and liabilities at fair value, the methods and assumptions used to measure fair value, and the effect of fair value measurements on earnings. This statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted this standard beginning January 1, 2008. The financial statement impact of this adoption is not expected to be material to the Company's financial position or results of operations.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159 (SFAS No. 159), *The Fair Value for Financial Assets and Financial Liabilities including an amendment of FASB Statement No. 115*. This statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objective for accounting for financial instruments. This statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted this standard beginning January 1, 2008. The financial statement impact of this adoption is being evaluated; however, it is not expected to be material to the Company's financial position or results of operations.

In December 2007, the FASB issued SFAS No. 141(R) *Business Combinations*. This Statement replaces SFAS No. 141, *Business Combinations* and establishes standards for how the acquirer in a business combination transaction: (1) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree, (2) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase, and (3) determines what information to disclose to enable users of financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company is currently evaluating the impact the adoption of this statement will have on the accounting for future acquisitions and business combinations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of Accounting Research Bulletin (ARB) No. 51*. A noncontrolling interest, (formerly known as minority interest) is the portion of equity in a subsidiary not attributable to a parent. The standard requires an entity to identify separately the ownership interests in subsidiaries held by parties other than the parent, and to identify the amount of consolidated net income attributable to the parent and to the noncontrolling interest. Changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary must be accounted for consistently, and when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary should be initially measured at fair value. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The impact of this standard is not expected to be material to the Company's financial position or results of operations.

Notes to Consolidated Financial Statements

Note 2 Acquisitions

On December 4, 2007, the Company acquired 100 percent of the outstanding common shares of Allied Bancshares, Inc. (Allie) and its subsidiary, First National Bank of Forsyth County. The merger enhanced the Company s geographic position in counties with high growth potential. The acquisition was accounted for under the purchase method of accounting with the results of operations for Allie included in our consolidated financial results beginning December 4, 2007. Under the purchase method of accounting the assets and liabilities of Allie were recorded at their respective fair values as of December 4, 2007.

The consideration for the acquisition was a combination of cash and stock with a purchase price of approximately \$53.8 million. The total consideration consisted of approximately \$13.4 million in cash and approximately 1.5 million Buckhead Community Bancorp shares.

The calculation of the purchase price is as follows:

(Dollars in thousands, except per share data)

Total Buckhead Community Bancorp common stock issued	1,534,553
Purchase price per Buckhead Community Bancorp common share	\$ 25.00
Value of Buckhead Community Bancorp stock issued	38,364
Cash payable to shareholders	13,375
Estimated fair value of employee stock options assumed	2,108
Total purchase price	\$ 53,847

The following condensed balance sheet of Allie discloses amounts assigned to each major asset and liability caption at the acquisition date. The allocation of the final purchase price is still subject to refinement as the integration process continues and additional information becomes available.

Corporate bonds	250	1	-	251
State and municipal securities	24,561	31	(350)	24,242
Mortgage-backed securities	21,704	49	(306)	21,447
Total securities available for sale	\$ 110,071	\$ 569	\$ (993)	\$ 109,647

(Dollars in thousands)	December 31, 2006			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
U.S. Treasury and other U.S. government agencies and corporations	\$ 58,112	\$ 23	\$ (1,081)	\$ 57,054
Trust Preferred Securities	1,450	-	-	1,450
Corporate bonds	250	-	-	250
State and municipal securities	23,891	441	(245)	24,087
Mortgage-backed securities	15,417	4	(468)	14,953
Total securities available for sale	\$ 99,120	\$ 468	\$ (1,794)	\$ 97,794

Restricted equity securities consist of the following:

(Dollars in thousands)	December 31	
	2007	2006
Federal Home Loan Bank stock	\$ 1,296	\$ 782
Common trust securities	465	465
Total restricted securities	\$ 1,761	\$ 1,247

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

Securities with an approximate carrying value of \$67,224,000 and \$55,942,000 were pledged to secure public deposits, other borrowings and for other purposes required or permitted by law, as of December 31, 2007 and 2006, respectively.

The amortized cost and fair value of debt securities as of December 31, 2007 by contractual maturity are presented below. Actual maturities may differ from contractual maturities for mortgage-backed securities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. Therefore, these securities are not presented in the following table by maturity class.

(Dollars in thousands)	Amortized Cost	Fair Value
Due in less than one year	\$ 6,369	\$ 6,198
Due after one year through five years	3,652	3,676
Due after five years through ten years	30,410	30,524
Due after ten years	47,936	47,802
Mortgage-backed securities	21,704	21,447
	\$ 110,071	\$ 109,647

Gross gains and losses on sales of securities consisted of the following:

(Dollars in thousands)	Twelve months ended December 31		
	2007	2006	2005
Gross gain on sale	\$ 18	\$ 37	\$ 90
Gross loss on sale	(5)	-	(94)
	\$ 13	\$ 37	\$ (4)

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

The following table summarizes the gross unrealized losses and fair value of securities, aggregated by category and length of time that securities have been in a continuous unrealized loss position at December 31, 2007 and 2006.

	Less than twelve months		December 31, 2007 Twelve months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
(Dollars in thousands)						
U.S. Treasury and other U.S. government agencies and corporations	\$ 494	\$ 192	\$ 16,006	\$ 145	\$ 16,500	\$ 337
State and municipal securities	4,084	270	8,520	80	12,604	350
Mortgage-backed securities	14,564	46	6,425	260	20,989	306
	\$ 19,142	\$ 508	\$ 30,951	\$ 485	\$ 50,093	\$ 993

	Less than twelve months		December 31, 2006 Twelve months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury and other U.S. government agencies and corporations	\$ 21,781	\$ 137	\$ 30,250	\$ 944	\$ 52,031	\$ 1,081
State and municipal securities	969	87	6,582	158	7,551	245
Mortgage-backed securities	906	15	12,518	453	13,424	468
	\$ 23,656	\$ 239	\$ 49,350	\$ 1,555	\$ 73,006	\$ 1,794

In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and industry analysts' reports. As management has the ability to hold debt securities until maturity, or for the foreseeable future, no declines are deemed to be other than temporary.

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements****Note 4 Loans and Allowance for Loan Losses**

The composition of loans is summarized as follows:

(Dollars in Thousands)	December 31	
	2007	2006
Commercial	\$ 77,837	\$ 69,931
Real estate - mortgage	213,248	92,001
Real estate - construction	371,506	209,604
Consumer, installment and other	14,358	7,519
Total loans	676,949	379,055
Less: Allowance for loan losses	9,787	4,518
Less: Unearned Loan Fees	830	729
Net loans	\$ 666,332	\$ 373,808

Activity in the allowance for loan losses for the twelve months ended December 31 is summarized in the table below:

(Dollars in Thousands)	Twelve months ended December 31		
	2007	2006	2005
Balance at beginning of year	\$ 4,518	\$ 3,293	\$ 2,386
Allowance from acquisitions	3,967	-	-
Provision for loan losses	2,459	2,050	1,775
Loan charge-offs	(1,226)	(831)	(907)
Loan recoveries	69	6	39
Balance at end of year	\$ 9,787	\$ 4,518	\$ 3,293

Impaired loans, consisting solely of loans on nonaccrual status, totaled approximately \$8.3 million and \$3.6 million at December 31, 2007 and 2006, respectively. A valuation allowance on impaired loans is included in the allowance for loan losses and totaled approximately \$760 thousand and \$382 thousand at December 31, 2007 and 2006, respectively. The average investment in impaired loans for the years ended December 31, 2007, 2006 and 2005 was approximately \$5.2 million, \$2.1 million and \$1.0 million respectively. Interest income on impaired loans included in the results of operations for the years ended December 31, 2007, 2006 and 2005, totaled approximately \$69 thousand, \$118 thousand and \$52 thousand, respectively.

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

Loans past due ninety days or more and still accruing interest amounted to approximately \$3.4 million and \$1.9 million at December 31, 2007 and 2006, respectively.

In the ordinary course of business, the Company has granted loans to certain related parties, including directors, executive officers and their affiliates. The interest rates on these loans were substantially the same as rates prevailing at the time of the transaction and repayment terms are customary for the type of loan. Changes in related party loans for the year ended December 31, 2007 are as follows:

(Dollars in thousands)

Beginning Balance - December 31, 2006	\$ 5,449
Advances	6,317
Repayments	(5,217)
Ending Balance - December 31, 2007	\$ 6,549

Note 5 Premises and Equipment

Premises and equipment are summarized as follows:

(Dollars in Thousands)	December 31	
	2007	2006
Land and land improvements	\$ 2,270	\$ 1,035
Building	5,988	3,079
Leasehold improvements	1,840	1,118
Furniture and equipment	4,099	2,501
Construction in process	-	322
	14,197	8,055
Accumulated depreciation	(3,248)	(1,783)
	\$ 10,949	\$ 6,272

Depreciation expense for the years ended December 31, 2007, 2006 and 2005 totaled approximately \$711 thousand, \$537 thousand and \$376 thousand, respectively.

Note 6 Leases

The Company leases five of its banking offices under operating lease agreements. The terms of each lease agreement are as follows:

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

The Company leases its main office in Atlanta under three operating lease agreements from an entity controlled by a director. The lease term for two of the leases is 10 years and the lease term for the third lease is 95 months. All three leases are structured to expire on the same date and require monthly lease payments based upon the number of square feet under lease multiplied by a base rental factor. Annually, the base rental factor increases by 3%.

The Company leases its Sandy Springs branch office under an operating lease agreement from an unrelated entity. The lease term is 60 months and requires monthly lease payments based upon the number of square feet under lease multiplied by a base rental factor. Annually, the base rental factor increases by 3%. The Company is also responsible for utilities and its share of property taxes under the lease agreement. An additional lease for more office space was obtained in 2006 from an unrelated entity. The lease term is 24 months and requires a fixed payment for the designated square footage.

The Company leases its loan production office in the Johns Creek area under an operating lease agreement from an unrelated entity. The lease term is 69 months and requires monthly lease payments based upon the number of square feet under lease multiplied by a base rental factor. Annually, the base rental factor increases by 4%.

The Company leases its branch office in Midtown Atlanta under an operating lease agreement from an unrelated entity. The lease term is 10 years, with two five-year renewal options, and requires fixed monthly lease payments. The Company is also responsible for utilities, taxes, normal maintenance and its share of operating costs of common areas of the retail center in which the premises is located.

The Company leases its branch office in Cobb County under an operating lease agreement from an unrelated entity. The lease term is 10 years, with one five-year or ten-year renewal option.

The Company leases its branch office in Hall County under an operating lease agreement from an unrelated entity. The lease will expire at the end of February 2010.

In addition, the Company leases office space for two SBA Loan Originators. These lease payments are not significant and do not extend beyond August 2008.

Total rental expense for all leases totaled approximately \$708,000, \$568,000 and \$448,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

Future minimum lease payments on the leases, excluding any renewal options, described above are summarized as follows:

(Dollars in Thousands)

2008	\$	858
2009		804
2010		692
2011		684
2012		700
Thereafter		1,291
	\$	5,029

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements****Note 7 Goodwill and Other Intangible Assets**

Goodwill will be tested for impairment on an annual basis and as events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit (i.e. branch) below its carrying amount. No events or circumstances have occurred since the acquisition of Allied Bancshares, Inc., that would more than likely reduce its fair value below its carrying value.

The changes in the carrying amount of other intangible assets and goodwill for the twelve months ended December 31, 2007 are as follows:

(Dollars in Thousands)	Twelve months ended December 31, 2007		
	Core Deposit Intangible	Goodwill	Total
Balance at beginning of year	\$ -	\$ -	\$ -
Acquisition of Allied Bancshares, Inc.	2,391	32,655	35,046
Amortization	(24)	-	(24)
Balance at end of year	\$ 2,367	\$ 32,655	\$ 35,022

The estimated amortization expense for core deposit intangible assets, for the full year of 2008 and the subsequent years is as follows:

(Dollars in Thousands)	Core Deposit Intangible
2008	\$ 283
2009	283
2010	283
2011	283
2012	283
Thereafter	952
	\$ 2,367

Note 8 Deposits

The aggregate amount of time deposits in denominations of \$100,000 or more at December 31, 2007 and 2006 totaled approximately \$326.6 million and \$177.8 million, which included brokered certificates of deposits (not including CDARs) of approximately \$99.5 million and \$50.6 million as of December 31, 2007 and 2006, respectively. The scheduled maturities of time deposits (including CDARs) at December 31, 2007 are as follows:

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

(Dollars in Thousands)

Maturing in:

2008	\$ 492,035
2009	24,970
2010	38,214
2011	7,283
2012	10,020
	\$ 572,522

Note 9 Short-term Borrowings

Short-term borrowings consisted of the following:

	December 31	
	2007	2006
(Dollars in thousands)		
Federal funds purchased	\$ 1,466	\$ -
Overnight customer sweep agreements	15,104	10,035
Other borrowings	3,000	-
	\$ 19,570	\$ 10,035

Overnight customer sweep agreements, which are short-term borrowings collateralized by securities, generally mature within one day from the transaction date. The agreements are reflected at the amount of cash received in connection with the transaction. The Company may be required to provide additional collateral based on the fair value of the underlying securities. For the year ended December 31, 2007, the weighted average interest rate on overnight customer sweep agreements was 3.30%. The weighted average interest rate for federal funds purchased was 5.51%.

As of December 31, 2007, other borrowings consisted of a revolving line of credit secured by the common stock of The Buckhead Community Bank. The line of credit matures in September 2008 and has a floating rate of 30 day LIBOR plus 1.70%. The weighted average interest rate for other borrowings was 6.55% at December 31, 2007.

Note 10 Junior Subordinated Debt***Buckhead Community Bancorp Statutory Trust I***

The Company formed a wholly-owned grantor trust to issue cumulative trust preferred securities. The grantor trust has invested the proceeds of the trust preferred securities in junior subordinated debentures

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

of the Company. The junior subordinated debentures can be redeemed prior to maturity at the option of the Company on or after August 11, 2009. The sole assets of the guarantor trust are the Junior Subordinated Deferrable Interest Debentures of the Company (the debentures) held by the grantor trust. The debentures have the same interest rate (three month LIBOR plus 2.90%, floating) as the trust preferred securities. The Company has the right to defer interest payments on the debentures at any time or from time to time for a period not exceeding 20 consecutive quarters provided that no extension period may extend beyond the maturity of the related debentures. During any such extension period, distributions on the trust preferred certificates would also be deferred.

Payment of periodic cash distributions and payment upon liquidation or redemption with respect to the trust preferred securities are guaranteed by the Company to the extent of funds held by the grantor trust (the Preferred Securities Guarantee). The Preferred Securities Guarantee, when taken together with the Company's other obligations under the debentures, constitute a full and unconditional guarantee, on a subordinated basis, by the Company of payments due on the trust preferred securities.

The trust preferred securities and the related debentures were issued on August 11, 2004. Distributions on the trust preferred securities are paid quarterly on March 31, June 30, September 30 and December 31 of each year, beginning September 30, 2004. Interest on the debentures is paid on the corresponding dates. The aggregate principal amount of Trust I debentures outstanding at December 31, 2007 and 2006 was \$5,155,000. Certain issue costs are being amortized over the life of the debentures, and the outstanding balance of the unamortized issue costs at December 31, 2007 and 2006 was approximately \$92 thousand and \$94 thousand, respectively.

Buckhead Community Bancorp Statutory Trust II

During 2006, the Company formed a second wholly-owned grantor trust to issue cumulative trust preferred securities. The grantor trust has invested the proceeds of the trust preferred securities in junior subordinated debentures of the Company. The junior subordinated debentures can be redeemed prior to maturity at the option of the Company on or after July 7, 2011. The sole assets of the guarantor trust are the debentures held by the grantor trust. The debentures have the same interest rate (LIBOR plus 1.55%, floating) as the trust preferred securities. The Company has the right to defer interest payments on the debentures at any time or from time to time for a period not exceeding 20 consecutive quarters provided that no extension period may extend beyond the stated maturity of the related debentures. During any such extension period, distributions on the trust preferred certificates would also be deferred.

Payment of periodic cash distributions and payment upon liquidation or redemption with respect to the trust preferred securities are guaranteed by the Company to the extent of funds held by the grantor trust. The Preferred Securities Guarantee, when taken together with the Company's other obligations under the debentures, constitute a full and unconditional guarantee, on a subordinated basis, by the Company of payments due on the trust preferred securities.

The trust preferred securities and the related debentures were issued on May 24, 2006. Distributions on the trust preferred securities are paid quarterly on April 7, July 7, October 7 and January 7 of each year, beginning on July 7, 2006. Interest on the debentures is paid on the corresponding dates. The aggregate

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

principal amount of Trust II debentures outstanding at December 31, 2007 and 2006 was \$10,310,000. There were no issue costs associated with the issuance of the debentures.

Note 11 Employee Benefit Plan

The Company sponsors a 401(k) profit sharing plan covering substantially all employees. Contributions to the plan charged to expense totaled approximately \$103 thousand, \$99 thousand and \$59 thousand for the years ended December 31, 2007, 2006 and 2005, respectively.

Note 12 Stock-based Compensation

The Company has a stock incentive plan under which we may grant stock options or other stock awards to our employees, directors and other key persons to purchase shares of common stock. Awards are granted at prices equal to the fair market value of the shares at the date of grant and are exercisable as determined by the plan's administrative committee. Stock options expire ten years from the date of grant. The general terms of the plan also include a vesting period which is usually three to four years for awards granted since January of 2007. Options granted prior to that date generally vested immediately. Through December 31, 2007, incentive stock options, nonqualified stock options and restricted stock awards and units had been granted under the plan.

Effective January 1, 2006, the Company adopted SFAS No. 123 (revised), Share Based Payment (SFAS No. 123(R)) utilizing the modified prospective method of accounting. Grant date fair value is measured on the date of grant using an option pricing model with market assumptions. The grant date fair value is amortized into expense on a straight-line basis over the vesting period. Option pricing models require the use of highly subjective assumptions, including but not limited to, historical stock price volatility, forfeiture rates, term, annual dividends and interest rates, which if changed could materially affect our fair value estimates. Accordingly, the model does not necessarily provide a reliable single measure of the fair value of our stock options.

Stock Options

The following is a summary of the Company's weighted average assumptions used to estimate the weighted average per share fair value of options granted during the twelve months ended December 31, 2007, 2006 and 2005, on the date of grant using the Black-Scholes option pricing model. No stock options were granted during 2006. Prior to 2006, the fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model, excluding the effects of volatility. Under SFAS 123, this was a minimum value method.

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

	December 31		
	2007	2006	2005
Expected volatility	18%	N/A	0%
Expected dividend yield	2%	N/A	0%
Expected life (in years)	6.5	N/A	10.0
Risk-free rate	4.6%	N/A	4.3%
Annual forfeiture rate	3%	N/A	0%
Weighted average fair value of options	\$ 5.04	N/A	\$ 3.87

The Company expensed approximately \$7 thousand during the year ended December 31, 2007 and \$0 during 2006 and 2005, related to stock options. The total compensation cost related to nonvested awards not yet recognized was approximately \$12 thousand as of December 31, 2007 and the weighted average period over which it is to be recognized is 2 years.

The following table presents a summary of stock option activity:

	185,736	\$ 8.55	6.4	\$ 3,055	181,957	\$ 8.26	6.3	\$ 3,046

At the Company's annual shareholders' meeting in 2007, the stock option plan was replenished with an additional 800,000 shares. All 800,000 are available for future stock option grants to employees and directors under the existing plan at December 31, 2007. Total intrinsic value of options exercised was approximately \$304 thousand, \$9.19 million, and \$105 thousand for the twelve months ended December 31, 2007, 2006 and 2005, respectively. Total grant-date fair value of options vested during the year was \$0, \$0 and \$97.3 thousand for the twelve months ended December 31, 2007, 2006 and 2005, respectively.

Restricted Stock

On April 1, 2006, the Company's President and Chief Executive Officer was awarded 3,000 shares of restricted common stock, with an aggregate fair market value of \$16.67 per share. The restricted stock will vest in four equal increments on April 1, 2007, 2008, 2009, and 2010. The total expense associated with this grant of approximately \$49,000 will be recognized over the four year period on a straight-line basis.

On March 27, 2007 and April 25, 2007, employees were awarded 3,822 and 4,000 shares of restricted common stock, respectively, with an aggregate per share fair market values of \$22.50 and \$25.00, respectively. The restricted stock will vest annually in four equal increments, beginning on the first anniversary of its grant date. The total expense associated with this grant of approximately \$186,000 will be recognized over the vesting period on a straight-line basis.

The unamortized balance of the fair value of the restricted stock grant has been recorded as deferred compensation in the equity section of the consolidated balance sheets. As of December 31, 2007, there was approximately \$181 thousand of unrecognized stock-based compensation expense related to restricted stock, which is expected to be recognized over a weighted average period of 3.2 years.

The following tables present restricted stock activity:

Note 13 Earnings Per Share (EPS)

The following table reflects the reconciliation of the numerator and denominator of the basic EPS computation to the diluted EPS computation for the twelve months ended December 31, 2007, 2006 and 2005.

(In thousands, except per share data)	Twelve Months Ended December 31		
	2007	2006	2005
Basic			
Net income available to common shareholders	4,028	5,262	3,278
Average basic common shares	4,680	4,228	3,492
Earnings per average common share - basic	\$ 0.86	\$ 1.24	\$ 0.94
Diluted			
Net income available to common shareholders	\$ 4,028	\$ 5,262	\$ 3,278
Average basic common shares	4,680	4,228	3,492
Effect of dilutive securities:			
Stock options and restricted stock	49	220	332
Average diluted common shares	4,729	4,448	3,824
Earnings per average common share - diluted	\$ 0.85	\$ 1.18	\$ 0.86

Note 14 Income Taxes

For the years ended December 31, 2007, 2006 and 2005, the components of income tax expense were as follows:

(Dollars in Thousands)	Twelve months ended December 31		
	2007	2006	2005
Current	\$ 2,845	\$ 3,415	\$ 2,155
Deferred	(866)	(595)	(411)
Income tax expense	\$ 1,979	\$ 2,820	\$ 1,744

The Company's income tax expense differs from the amounts computed by applying the federal income tax statutory rates to income before income taxes. A reconciliation of the differences is as follows:

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

(Dollars in Thousands)	Twelve months ended December 31		
	2007	2006	2005
Income taxes at federal statutory rate	\$ 2,042	\$ 2,748	\$ 1,708
Tax free interest	(270)	(216)	(136)
State tax expense	186	286	146
Other items, net	21	2	26
Income tax expense	\$ 1,979	\$ 2,820	\$ 1,744

Deferred income tax assets and liabilities result from temporary differences between assets and liabilities measured for financial reporting purposes and for income tax return purposes. These assets and liabilities are measured using the enacted tax rates and laws that are currently in effect. The significant components of the net deferred tax asset at December 31, 2007 and 2006 were as follows:

(Dollars in Thousands)	December 31	
	2007	2006
Deferred tax assets:		
Allowance for loan losses	\$ 3,403	\$ 1,531
Loan fees	313	275
Non-accrual interest	133	68
Other real estate owned	188	-
Stock-based compensation	16	4
Securities available for sale	146	452
Other	197	12
	4,396	2,342
Deferred tax liabilities:		
Depreciation	29	70
Business combination purchase adjustments	1,464	-
	1,493	70
Net deferred income tax assets	\$ 2,903	\$ 2,272

Note 15 Commitments and Contingencies**Loan Commitments**

In the normal course of business, the Company is a party to financial instruments with off-balance sheet risk to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. They involve, to varying degrees, elements of credit risk and

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

interest rate risk in excess of the amount recognized in the balance sheets. The majority of all commitments to extend credit and standby letters of credit are variable rate instruments.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments as it does for on-balance sheet instruments. A summary of the Company's commitments to extend credit and letters of credit is as follows:

(Dollars in Thousands)	December 31	
	2007	2006
Commitments to extend credit	\$ 158,997	\$ 100,120
Standby letters of credit	7,681	1,921
	\$ 166,678	\$ 102,041

Commitments to extend credit are agreements to lend to a customer provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the party.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers. Collateral is required in instances the Company deems necessary.

At December 31, 2007 and 2006, the carrying amount of liabilities related to the Company's obligation to perform under financial standby letters of credit was insignificant. The Company has not been required to perform on any financial standby letters of credit, and the Company has not incurred any losses on financial standby letters of credit for the years ended December 31, 2007 and 2006.

The Company also guarantees credit cards as an accommodation for some of its customers. As of December 31, 2007, this guarantee amounted to approximately \$111 thousand.

Contingencies

In the normal course of business, the Company is involved in various legal proceedings. In the opinion of management, any liability resulting from such proceedings would not have a material adverse effect on the Company's financial statements.

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

Note 16 Concentrations of Credit

The Company originates primarily commercial, residential and consumer loans in its primary market areas. The ability of the majority of the Company's customers to honor their contractual loan obligations is dependent on the economy of these areas. Eighty six percent of the Company's loan portfolio is concentrated in real estate loans. The other significant concentrations of credit by type of loan are set forth in Note 4 to the Consolidated Financial Statements.

The Company, as a matter of policy, does not generally extend credit to any single borrower or group of related borrowers in excess of 25% of its defined statutory capital base, or approximately \$12.7 million as of December 31, 2007.

Note 17 Regulatory Matters

The Bank is subject to certain restrictions on the amount of dividends that may be declared without prior regulatory approval. At December 31, 2007, approximately \$2.2 million of dividends could be declared without regulatory approval.

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the consolidated financial statements. Under capital adequacy guidelines and the regulatory capital framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and Bank to maintain minimum amounts and ratios of Total and Tier I capital to risk-weighted assets, as defined, and of Tier I capital to average assets, as defined. Management believes, as of December 31, 2007 and 2006, the Company and the Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2007, the most recent notification from the Federal Deposit Insurance Corporation categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum Total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following table. There are no conditions or events since that notification that management believes have changed the Bank's category.

Table of Contents**Buckhead Community Bancorp, Inc. and Subsidiary****Notes to Consolidated Financial Statements**

Note 18 Fair Value of Financial Instruments

Fair value is the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. If observable market prices are not available, then fair value is estimated using modeling techniques such as discounted cash flow analyses. These modeling techniques utilize assumptions that market participants would use in pricing the asset or the liability, including assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset, and the risk of nonperformance. The techniques used in measuring the fair value of financial instruments are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument.

Table of Contents

Buckhead Community Bancorp, Inc. and Subsidiary

Notes to Consolidated Financial Statements

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

Cash, Due From Banks, Interest-bearing Deposits in Banks and Federal Funds Sold

The carrying amount of cash, due from banks, interest-bearing deposits in banks and federal funds sold approximates fair value.

Securities

Fair values for securities are based on available quoted market prices. The carrying amount of restricted equity securities with no readily determinable fair value approximates fair value.

Loans

The carrying amount of variable-rate loans that reprice frequently and have no significant changes in credit risk approximates fair value. The fair value of fixed rate loans is estimated based on discounted contractual cash flows using interest rates currently being offered for loans with similar terms to borrowers with similar credit quality. The fair value of impaired loans is estimated based on discounted cash flows or underlying collateral values, where applicable.

Deposits

The carrying amount of demand deposits, savings deposits and variable rate certificates of deposit approximates their fair value. The fair value of fixed-rate certificates of deposit is estimated based on discounted contractual cash flows using interest rates currently being offered for certificates of similar maturities.

Short-term Borrowings

The carrying amount of federal funds purchased and repurchased agreements approximates fair value. The carrying amount of variable rate, short-term borrowings approximates their fair value.

Junior Subordinated Debt

The carrying amount of variable rate junior subordinated debt approximates its fair value.

Accrued Interest

The carrying amount of accrued interest approximates its fair value.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not Applicable.

ITEM 9A(T). CONTROLS AND PROCEDURES

As of the end of the period covered by this Annual Report on Form 10-K, our principal executive officer and principal financial officer have evaluated the effectiveness of our disclosure controls and procedures (Disclosure Controls). Disclosure Controls, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act), are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this Annual Report, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure Controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Our management, including the CEO and CFO, does not expect that our Disclosure Controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based upon their controls evaluation, our CEO and CFO have concluded that our Disclosure Controls are effective at a reasonable assurance level.

This annual report does not include a report of management's assessment regarding internal control over financial reporting or an attestation report of the Company's registered public accounting firm due to a transition period established by the rules of the Securities and Exchange Commission for newly public companies.

There have been no changes in our internal controls over financial reporting during our fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

On March 25, 2008, the board of directors of the Company voted to assume the administration of the Allied 2004 Stock Option Plan, effective as of December 4, 2007, in connection with the acquisition of Allied by the Company. The Company's assumption of the 2004 Stock Option Plan is solely for the purpose of administering options issued under the 2004 Stock Option Plan that remain outstanding following the acquisition. No new options are to be granted using the 2004 Stock Option Plan.

On March 25, 2008, the Company adopted a code of ethics that applies to its principal executive, financial and accounting officers. A copy of the code of ethics may be obtained, without charge, upon written request addressed to Buckhead Community Bancorp, Inc., 415 East Paces Ferry Road N.E., Atlanta, Georgia 30305, Attention: Chief Financial Officer. The request may be delivered by letter to the address set forth above or by fax to the attention of the Company's Chief Financial Officer at (404) 389-0693.
