## 2. SIGNIFICANT ACCOUNTING POLICIES

(a) **Investment Valuation** The Net Asset Value ( "NAV") of each Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding. Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Events occurring after the close of trading on non-U.S. exchanges may result in adjustments to the valuation of foreign securities to more accurately reflect their fair value as of the close regular trading on the New York Stock Exchange.

Notes to Schedule of Investments (unaudited)(continued)

The Fund may rely on an independent fair valuation service in adjusting the valuations of foreign securities. Unlisted equity securities are valued at the last quoted sale price or, if no sale price is available, at the mean between the most recently quoted bid and asked prices. Securities for which market quotations are not readily available are valued at fair value as determined by management and in accordance with procedures approved by the Board of Trustees. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates current market value.

Effective April 1, 2008, the Funds adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157 ( FAS 157 ), Fair Value Measurements. This standard defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles and expands disclosure about fair value measurements. The various inputs used in determining the value of the Funds' investments summarized in the three broad levels as well as the summary of the inputs used in valuing the Funds' investments as of June 30, 2008 can be found at the end of every Schedule of Investment preceding these notes.

The Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (*i.e.*, one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (*i.e.*, an event that occurs after the close of the markets on which the security is traded but before the time as of which the Fund's net assets are computed and that may materially affect the value of the Fund's investments). Examples of events that may be significant events are government actions, natural disasters, armed conflict, acts of terrorism, and significant market fluctuations.

Fair value pricing could result in a difference between the prices used to calculate a Fund's net assets and the prices used by the Fund's benchmark index, which, in turn, could result in a difference between the Fund's performance and the performance of the Fund's benchmark index. The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

(b) **Investment Transactions** Investment transactions are recorded as of the date that the securities are purchased or sold (trade date).

(c) **Foreign Currency Translation** The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies, are translated into U.S. dollars using exchange rates deemed appropriate by the investment adviser.

(d) **Security Lending** Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. The loans are collateralized at all times by cash and/or high grade debt obligations in an amount at least equal to 102% of the market value of domestic securities loaned (105% in the case of foreign securities loaned) as determined at the close of business on the preceding business day. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receives a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

(e) **Short-Term Investments** Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments in which a Fund may invest include short-term obligations issued by the U.S. Government, negotiable certificates of deposit ( CDs ), fixed time deposits and bankers' acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.
