SPRINT NEXTEL CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X for interim financial information. All normal recurring adjustments considered necessary for a fair presentation have been included, except as otherwise noted (if applicable). Certain disclosures normally included in annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes contained in our annual report on Form 10-K for the year ended December 31, 2008. Unless the context otherwise requires, references to Sprint, we, us, our and the Company mean Sprint Nextel Corporation and its consolidated subsidiaries.

The preparation of the unaudited interim consolidated financial statements requires management of the Company to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses and the disclosure of contingent assets and liabilities at the date of the unaudited interim consolidated financial statements. These estimates are inherently subject to judgment and actual results could differ.

Certain prior period amounts have been reclassified to conform to the current period presentation.

Note 2. Significant New Accounting Pronouncements

Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 141R, *Business Combinations*; SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*; and SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, are effective for the quarter ended March 31, 2009. These pronouncements did not have a material effect on these consolidated financial statements.

In November 2008, the FASB approved Emerging Issues Task Force (EITF) Issue No. 08-6, *Equity Method Investment Accounting Considerations*, to clarify the application of equity method accounting as affected by SFAS No. 141R and SFAS No. 160. Among other things, this EITF consensus requires equity method investors to account for equity investee share issuances as if the investor had sold a proportionate share of its investment, with the recognition of any resulting gain or loss in earnings. EITF 08-6 is applicable for the Company beginning January 1, 2009. As a result, we recognized a pre-tax loss of \$154 million (\$96 million after tax or \$.03 per share) related to the dilution of our investment in Clearwire Corporation and Clearwire Communications LLC resulting from their first quarter share issuance (see Note 3, Investments).

In April 2009, the FASB issued FASB Staff Position (FSP) No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies. The FASB also issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*, which amends the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. In addition, the FASB issued FSP No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. This FSP provides additional guidance on determining fair value when the volume and level of trading activity for an asset or liability have significantly decreased when compared with normal market activity.

FSPs No. FAS 107-1 and APB 28-1; No. FAS 115-2 and FAS 124-2; and No. FAS 157-4 will be effective beginning in the second quarter 2009. We are in the process of evaluating the impact of these staff positions and believe the effect of implementation will be immaterial.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****Note 3. Investments**

Investments in debt and equity securities are summarized as follows:

	March 31, 2009	December 31, 2008
	<i>(in millions)</i>	
Current investments		
Marketable debt securities	\$ 20	\$ 28
Non-current investments		
Marketable equity securities	36	37
Equity method and other investments	3,748	4,027
Total non-current investments	3,784	4,064
	\$ 3,804	\$ 4,092

Investments in Marketable Debt and Equity Securities

Marketable debt and equity securities of \$56 million are measured at fair value on a recurring basis with changes in fair value recognized in the consolidated financial statements each period. No assets were measured at fair value on a non-recurring basis in the first quarter 2009.

Equity Method Investments**Clearwire**

In November 2008, we closed a transaction with Clearwire Corporation and its subsidiary Clearwire Communications LLC, (collectively Clearwire) to combine our next-generation wireless broadband businesses. At closing, Sprint contributed assets with a carrying value of \$3.3 billion, including our 2.5 gigahertz (GHz) spectrum and Worldwide Interoperability for Microwave Access (WiMAX) related assets which, together with Clearwire's existing business and cash contributions from other investors, will be used to build and operate a next-generation wireless broadband network that will provide entire communities with high-speed residential and mobile internet access services and residential voice services. As a result of the transaction, including the adjustment referred to below, Sprint owns a 51% non-controlling interest in Clearwire, in the form of 370 million shares of Class B common stock in Clearwire Corporation and 370 million Class B common interests in Clearwire Communications LLC, for which the carrying value as of March 31, 2009 totaled \$3.7 billion.

In connection with our contribution, Clearwire agreed to reimburse Sprint for certain cash expenditures incurred prior to the closing of the transaction in the amount of \$388 million. Approximately \$213 million was paid by Clearwire during 2008 and the remaining \$175 million was provided through an interest bearing note, maturing in May 2011. This reimbursement was accounted for as a reduction to the initial investment in Clearwire. Also, during the quarter ended December 31, 2008, we recognized a pre-tax gain within equity of \$684 million (\$424 million after tax) related to the difference between our share of Clearwire's net assets upon close and the carrying value of the net assets we contributed to Clearwire.

In addition to our proportionate share of Clearwire's net loss, during the quarter ended March 31, 2009, a pre-tax loss of \$154 million (\$96 million after tax) was recognized in equity in earnings of unconsolidated investments and other, net, representing the finalization of ownership percentages, which was subject to change based on the trading price of Clearwire stock during the 90 days subsequent to close.

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

Each share of Clearwire Class B common stock, together with one Clearwire Communications Class B common interest, is exchangeable for one share of Clearwire Corporation's Class A common stock, a publicly traded security. Sprint's investment in Clearwire represents \$9.89 per share based on the assumed exchange of our Class B ownership interests for Class A common shares. The market price of Clearwire publicly traded stock was \$5.15 per share as of March 31, 2009. Management does not intend to sell this investment for the foreseeable future, continues to believe this decline is temporary and expects the stock price to eventually recover to at least a level equivalent to Sprint's investment and to recover fully the carrying value of the investment.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****Virgin Mobile USA (VMU)**

VMU continues to use Sprint's network under a mobile virtual network operator (MVNO) agreement. At March 31, 2009, the Company held an approximate 14% ownership interest in VMU. Our share of VMU losses is not recognized in these consolidated financial statements because our investment balance in VMU is zero. In addition, a deferred credit of \$94 million related to this investment is reflected in Other liabilities on our consolidated balance sheet as of March 31, 2009 and will be proportionately recognized in income if we dispose of any of our interests.

Note 4. Property, Plant and Equipment

The components of property, plant and equipment, and the related accumulated depreciation were as follows:

	March 31, 2009	December 31, 2008
	<i>(in millions)</i>	
Land	\$ 328	\$ 328
Network equipment, site costs and related software	38,643	38,273
Buildings and improvements	4,765	4,757
Non-network internal use software, office equipment and other	3,206	3,268
Construction in progress	1,652	1,840
Less accumulated depreciation	(27,324)	(26,093)
Property, plant and equipment, net	\$ 21,270	\$ 22,373

Note 5. Intangible Assets**Indefinite Lived Intangible Assets**

	December 31, 2008	Additions	Retirements and Sales	March 31, 2009
	<i>(in millions)</i>			
FCC licenses	\$ 18,911	\$ 205	\$ (1)	\$ 19,115
Trademarks	409			409
	\$ 19,320	\$ 205	\$ (1)	\$ 19,524

We hold FCC licenses authorizing the use of radio frequency spectrum to deploy our wireless services: 1.9 GHz personal communications services licenses utilized in the CDMA network, and 800 megahertz (MHz) and 900 MHz licenses utilized in the iDEN network. We also hold 1.9 GHz and other FCC licenses that are not currently being utilized in the networks or operations. As long as the Company acts within the requirements and constraints of the regulatory authorities, the renewal and extension of these licenses is reasonably certain at minimal cost. We are not aware of any technology being developed that would render this spectrum obsolete and have concluded that these licenses are indefinite lived intangible assets. We also believe that Sprint and Boost Mobile trademarks are indefinite lived intangible assets. There are no legal, regulatory or contractual limitations associated with these trademarks.

					21,601	21,610
Less current portion					(1,225)	(618)
Long-term debt, financing and capital lease obligations					\$ 20,376	\$ 20,992

(1) Includes \$113 million in outstanding principal related to a consolidated variable interest entity.

As of March 31, 2009, Sprint Nextel Corporation, the parent corporation, had \$4.7 billion in principal of debt outstanding, including the credit facilities. In addition \$15.8 billion in principal of our long-term debt issued by wholly-owned subsidiaries is guaranteed by the parent, of which approximately \$10.5 billion issued by our finance subsidiary, Sprint Capital Corporation, is fully and unconditionally guaranteed. The indentures and financing arrangements of certain subsidiaries' debt contain provisions that limit cash dividend payments on subsidiary common stock. The transfer of cash in the form of advances from the subsidiaries to the parent corporation generally is not restricted. Cash interest payments were \$411 million and \$371 million during the three-month periods ended March 31, 2009 and 2008, respectively.

Notes

Notes consist of senior, convertible senior and serial redeemable senior notes that are unsecured. Cash interest on these notes is generally payable semiannually in arrears. Approximately \$17.8 billion of the notes are redeemable at the Company's discretion plus accrued interest. The \$607 million in aggregate principal amount of 5.25% notes due 2010 are convertible at any time prior to redemption, repurchase or maturity at the option of the holders into shares of Series 1 common stock at an effective conversion price of \$53.65 per share, plus \$11.37 in cash for each \$1,000 principal amount.

Credit Facilities

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

As of March 31, 2009, \$2.1 billion in letters of credit, including a \$2 billion letter of credit required by the FCC's Report and Order to reconfigure the 800 MHz band, are outstanding under our \$4.5 billion revolving bank credit facility. As a result of the \$1 billion in outstanding borrowings and the outstanding letters of credit, each of which directly impacts the availability under the revolving bank credit facility, the Company had \$1.4 billion of borrowing capacity available under this revolving bank credit facility as of March 31, 2009. The terms of this loan provide for an interest rate equal to the London Interbank Offered Rate (LIBOR) plus a spread that varies depending on the Company's credit ratings.

The unsecured loan agreement with Export Development Canada will mature in March 2012 and carries an interest rate equal to LIBOR plus a spread that varies depending on our credit ratings. This loan may be prepaid, in whole or in part, at any time.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****Financing, Capital Lease and Other Obligations**

In 2008, we closed a transaction with TowerCo Acquisition LLC under which we sold approximately 3,000 cell sites owned by us and subsequently leased space on those cell sites over a period of ten years with renewal options for an additional 20 years. Due to our continued involvement with the property sold, we accounted for this transaction as a financing transaction and recognized the total proceeds received as a financing obligation. The cell sites continue to be reported as part of our property, plant and equipment. Additional cash proceeds of \$22 million were received in the first quarter 2009 for adjustments necessary to finalize the transaction. Our capital lease and other obligations are primarily for the use of communication switches.

Covenants

As of March 31, 2009, the Company is in compliance with all restrictive and financial covenants associated with all of its borrowings. The maturity dates of the loans under the credit facilities may accelerate if we do not comply with these covenants. The Company also is obligated to repay the loans if certain change-of-control events occur.

The indentures that govern our outstanding senior notes also require compliance with various covenants, including limitations on the incurrence of indebtedness and liens by the Company and its subsidiaries. A default under our credit facilities could trigger defaults under other debt obligations, including the senior notes, which in turn could result in the maturities of certain debt obligations being accelerated. These credit facilities also restrict us from paying any cash dividends unless our ratio of total indebtedness to trailing four quarters earnings before interest, taxes, depreciation and amortization and certain other non-recurring charges, as defined in the credit facility (adjusted EBITDA) is less than 2.5 to 1.0.

Note 7. Severance and Exit Costs

For the three-month period ended March 31, 2009, we recognized \$327 million of severance and exit costs primarily related to the reduction in workforce announced in January 2009. Of these costs, \$254 million and \$73 million were related to the Wireless and Wireline segments, respectively. For the three-month period ended March 31, 2008, we recognized \$219 million in severance and exit costs related to the separation of employees and continued organizational realignment initiatives. Of these costs, \$171 million and \$48 million were related to the Wireless and Wireline segments, respectively.

The following provides the activity in the severance and exit costs liability:

	December 31, 2008	2009 Activity Cash Expense	Payments and Other	March 31, 2009
		<i>(in millions)</i>		
Lease terminations	\$ 101	\$ 4	\$ (10)	\$ 95
Severance	90	323	(57)	356
	\$ 191	\$ 327	\$ (67)	\$ 451

Note 8. Income Taxes**Effective Income Tax Rate**

Factors that caused our effective income tax rates to vary from the 35% U.S. federal statutory rate were as follows:

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

	Quarter Ended March 31,	
	2009	2008
	<i>(in millions)</i>	
Income tax benefit at the federal statutory rate	\$ 393	\$ 285
Effect of:		
State income taxes, net of federal income tax effect	23	27
Reduction in liability for unrecognized tax benefits	82	
Valuation allowance reduction	31	
Other, net	1	(2)
Income tax benefit	\$ 530	\$ 310
Effective income tax rate	47.2%	38.0%

SPRINT NEXTEL CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As of March 31, 2009 and December 31, 2008, a total valuation allowance of \$677 million and \$711 million, respectively, was maintained related to deferred tax assets for loss and tax credit carryforwards, with the reduction principally due to income tax settlements. For the three-month period ended March 31, 2009, our liability for unrecognized tax benefits was reduced by \$82 million principally due to income tax settlements. Cash was received for income tax refunds, net, of \$7 million and \$5 million during the three-month periods ended March 31, 2009 and 2008, respectively.

Note 9. Commitments and Contingencies

Litigation, Claims and Assessments

A number of cases that allege Sprint Communications Company L.P. failed to obtain easements from property owners during the installation of its fiber optic network in the 1980 s have been filed in various courts. Several of these cases sought certification of nationwide classes, and in one case, a nationwide class was certified. In 2003, a nationwide settlement of these claims was approved by the U.S. District Court for the Northern District of Illinois, but objectors appealed the preliminary approval order to the Seventh Circuit Court of Appeals, which overturned the settlement and remanded the case to the trial court for further proceedings. The parties proceeded with litigation and/or settlement negotiations on a state by state basis, and settlement negotiations have been coordinated in all cases but those pending in Louisiana and Tennessee. The Louisiana claims have been separately settled for an amount not material to the Company, and that settlement was given final approval by the Court, and the time to appeal that approval has expired. We have reached an agreement in principle to settle the claims in all the other states, excluding Tennessee, for an amount not material to us. The Court issued its preliminary approval of the settlement on July 17, 2008, and the Court is in the process of considering objections to the settlement.

In September 2004, the U.S. District Court for the District of Kansas denied a motion to dismiss a shareholder lawsuit alleging that our 2001 and 2002 proxy statements were false and misleading in violation of federal securities laws to the extent they described new employment agreements with certain senior executives without disclosing that, according to the allegations, replacement of those executives was inevitable. These allegations, made in an amended complaint in a lawsuit originally filed in 2003, are asserted against us and certain current and former officers and directors, and seek to recover any decline in the value of our tracking stocks during the class period. The parties have stipulated that the case can proceed as a class action. All defendants have denied plaintiffs' allegations and intend to defend this matter vigorously. Allegations in the original complaint, which asserted claims against the same defendants and our former independent auditor, were dismissed by the Court in April 2004. Our motion to dismiss the amended complaint was denied, and the parties are engaged in discovery.

In connection with the Sprint-Nextel merger in 2005, we disclosed that several third party providers of CDMA services (PCS Affiliates) had filed lawsuits in various courts, alleging that the Sprint-Nextel merger would result in breaches of exclusivity provisions in their commercial affiliation agreements with our subsidiaries. With the exception of iPCS Wireless, Inc. (iPCS), all such suits have been disposed of. On September 24, 2008, the Illinois Supreme Court denied our petition for appeal in a contract dispute with iPCS. As a result, the Illinois Circuit Court decision from August 2006 holding that Sprint's merger with Nextel breached Sprint's agreement with iPCS was upheld. The judge in that case entered an order requiring Sprint to cease owning, operating or managing the iDEN network in parts of certain Midwestern states (Illinois, Iowa, Michigan, Missouri, Nebraska, Wisconsin and a small portion of Indiana) that make up the iPCS territory. On October 15, 2008, we filed a motion asking the Illinois Supreme Court to reconsider its decision not to hear the appeal, on grounds that the Circuit Court decision infringed upon the FCC's authority to determine the ownership and use of telecommunications licenses, and on grounds that the injunction entered by the Circuit Court violates Illinois public policy. The Illinois Supreme Court declined to hear the appeal but increased the time for compliance with the order to 360 days, which began to run on January 30, 2009. We have also filed a motion asking the Circuit Court to reconsider its decision in light of newly-discovered evidence that was not produced by iPCS in the earlier Circuit Court proceeding. The Circuit Court denied that motion, and we have appealed that denial. We continue to believe the Circuit Court injunction is erroneous and contrary to public policy, and will continue to oppose it vigorously. We do not expect the resolution of this matter to have a material effect on our financial position or results of operations.

Various other suits, proceedings and claims, including purported class actions typical for a large business enterprise, are pending against us or our subsidiaries. While it is not possible to determine the ultimate disposition of each of these proceedings and whether they will be resolved consistent with our beliefs, we expect that the outcome of such proceedings, individually or in the aggregate, will not have a material adverse effect on our financial condition or results of operations.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****Spectrum Reconfiguration Obligations**

In 2004, the FCC adopted a Report and Order that included new rules regarding interference in the 800 MHz band and a comprehensive plan to reconfigure the 800 MHz band. The Report and Order provides for the exchange of a portion of our 800 MHz FCC spectrum licenses, and requires us to fund the cost incurred by public safety systems and other incumbent licensees to reconfigure the 800 MHz spectrum band. In addition, we received licenses for 10 MHz of nationwide spectrum in the 1.9 GHz band; however, we are required to relocate and reimburse the incumbent licensees in this band for their costs of relocation to another band designated by the FCC.

The minimum cash obligation is approximately \$2.8 billion under the Report and Order. We are, however, obligated to pay the full amount of the costs relating to the reconfiguration plan, even if those costs exceed \$2.8 billion. As required under the terms of the Report and Order, a \$2.0 billion letter of credit has been secured to provide assurance that funds will be available to pay the relocation costs of the incumbent users of the 800 MHz spectrum.

The following table represents payments directly attributable to our performance under the Report and Order from the inception of the program:

	Through December 31, 2008	2009 Net Additions and Adjustments <i>(in millions)</i>	Through March 31, 2009
FCC licenses	\$ 1,377	\$ 204	\$ 1,581
Property, plant and equipment ⁽¹⁾	150	1	151
Costs not benefiting our infrastructure or spectrum positions	238	7	245
	\$ 1,765	\$ 212	\$ 1,977

(1) Excluded from the table above are reconfiguration costs incurred to date which are based on allocations between reconfiguration activities and our normal network improvements. The methodology with which we have calculated these costs has not been approved by the independent Transition Administrator designated by the FCC to review our expenditures. As a result, the amount allocated to reconfiguration activity is subject to change based on additional assessments made over the course of the reconfiguration program.

When expended, these costs are generally accounted for either as property, plant and equipment or as additions to the FCC licenses intangible asset. Total direct costs attributable to the spectrum reconfigurations are expected to range between \$3.2 and \$3.6 billion based on the experience to date. This estimate is dependent on significant assumptions including the final licensee costs and costs associated with relocating licensees in the Canadian border region under the border plan that was adopted by the FCC and the Mexican border region for which there is currently no approved border plan. In addition, we are entitled to receive reimbursement from the mobile-satellite service licensees for their pro rata portion of our costs of clearing a portion of the 1.9 GHz spectrum. Those licensees may be unable or unwilling to reimburse us for their share of the costs, which are estimated to be approximately \$200 million.

Completion of the 800 MHz band reconfiguration was initially required by June 26, 2008; however, the FCC has issued a significant number of waivers to 800 MHz licensees giving them additional time to complete their band reconfigurations, which has delayed access to all of our 800 MHz replacement spectrum. Based on progress to date, a significant number of additional extension requests are expected by July 2009. Under an October 2008 FCC Order, we may be required to relinquish some of our 800 MHz spectrum on a region-by-region basis prior to receiving 800 MHz replacement spectrum in March 2010. The Report and Order also contained an exception with respect to markets that border Mexico and Canada. The exception with respect to markets that border Canada was clarified on May 9, 2008 when the FCC issued the Canadian border plans to include a 30-month deadline for completion.

Note 10. Share-Based Compensation

Share-Based Payment Plans

As of March 31, 2009, Sprint sponsored four equity incentive plans: the 2007 Omnibus Incentive Plan (2007 Plan); the 1997 Long-Term Incentive Program (1997 Program); the Nextel Incentive Equity Plan (Nextel Plan); and the Management Incentive Stock Option Plan (MISOP); as well as the Employees Stock Purchase Plan (ESPP). On May 8, 2007, our shareholders

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

approved the 2007 Plan, under which we may grant stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units and other equity-based and cash awards to employees, outside directors and certain other service providers. In 2008, certain amendments were made to the 2007 Plan to comply with new tax regulations, including new regulations under Section 409A of the Internal Revenue Code. No new grants can be made under the 1997 Program, the Nextel Plan or the MISOP.

For the three-month period ended March 31, 2009, the number of shares available under the 2007 Plan increased by about 18 million, as the number of shares available under the 2007 Plan is increased by any shares originally granted under the 1997 Program, the Nextel Plan, or the MISOP that are forfeited, expired, or otherwise terminated. As of March 31, 2009, about 156 million common shares were available under the 2007 Plan. As of March 31, 2009, awards to acquire about 58 million common shares were outstanding under the 1997 Program, awards to acquire about 29 million common shares were outstanding under the Nextel Plan, options to buy about 19 million common shares were outstanding under the MISOP, and the ESPP authorized about 9 million common shares for future purchases. Currently, we use treasury shares to satisfy share-based awards or new shares if no treasury shares are available. Refer to Note 12 of the Notes to Consolidated Financial Statements in our annual report on Form 10-K for the year ended December 31, 2008 for additional information regarding these plans.

Share-Based Compensation

Pre-tax share-based compensation charges included in net loss from our share-based award plans was \$26 million for the three-month period ended March 31, 2009 and \$75 million for the same period in 2008. The total income tax benefit recognized in the consolidated financial statements for share-based award compensation was \$10 million and \$28 million for the three-month periods ended March 31, 2009 and 2008, respectively.

As of March 31, 2009, there was \$158 million of total unrecognized compensation cost related to our share-based award plans that is expected to be recognized over a weighted average period of 2.36 years. Cash received from exercise under all share-based payment arrangements, net of shares surrendered for employee tax obligations, was \$2 million for the three-month period ended March 31, 2009 and \$9 million for the three-month period ended March 31, 2008.

Under our share-based payment plans, we had options and restricted stock units outstanding as of March 31, 2009. Forfeitures were estimated for share-based awards using a 6.5% weighted average annual rate.

Options

The fair value of each option award is estimated on the grant date using the Black-Scholes option valuation model, based on several assumptions including the risk-free interest rate, volatility, expected dividend yield and expected term. The risk-free interest rate used is based on the zero-coupon U.S. Treasury bond, with a term equal to the expected term of the options. The volatility used is the implied volatility from traded options on our common shares. The expected dividend yield used is estimated based on our historical dividend yield and other factors. The expected term of options granted is estimated using the simplified method, defined as the average of the vesting term and the contractual term. Options outstanding as of March 31, 2009 include options granted under the 2007 Plan, the 1997 Program, the Nextel Plan, and the MISOP, as discussed above.

The following table provides the estimated fair value and assumptions used in determining the fair value of option awards granted during the three months ended March 31, 2009:

Weighted average grant date fair value	\$	3.07
Risk-free interest rate	2.05	2.24%
Volatility	113.8	126.2%
Weighted average expected volatility		113.9%
Expected and weighted average expected dividend yield		0.00%

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

Expected term (years)	6.3	6.5
Options granted (millions)	27	

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

A summary of the status of the options under our option plans as of March 31, 2009 and changes during the quarter then ended is presented below:

	Shares Under Option <i>(in millions)</i>	Weighted Average per Share Exercise Price	Weighted Average Remaining Contractual Term <i>(in years)</i>	Aggregate Intrinsic Value <i>(in millions)</i>
Outstanding at January 1, 2009	130	\$ 23.05		
Granted ⁽¹⁾	27	3.59		
Exercised				
Forfeited/expired	(17)	30.42		
Outstanding at March 31, 2009	140	\$ 18.33	5.55	\$
Vested or expected to vest at March 31, 2009	133	\$ 19.06	5.32	\$
Exercisable at March 31, 2009	101	\$ 22.95	4.03	\$

(1) Options vest ratably over three or four years.

Restricted Stock Units

The fair value of each restricted stock unit award is calculated using the share price at the date of grant. Restricted stock units consist of those units granted under the 2007 Plan and the 1997 Program, as discussed above. A summary of the status of the restricted stock units as of March 31, 2009 and changes during the quarter then ended is presented below:

	Restricted Stock Units		Weighted Average Grant Date Fair Value of Restricted Stock Units	
	Future Performance and Service Required <i>(in thousands)</i>	Future Service Required	Performance and Service Required	Future Service Required
Outstanding at January 1, 2009	5,220	13,948	\$ 18.81	\$ 6.97
Granted		4,511		2.71
Vested		(7,288)		5.36
Forfeited	(261)	(186)	18.78	6.58
Performance met				
Performance not met				
Outstanding at March 31, 2009	4,959	10,985	\$ 18.81	\$ 6.43

The total fair value of restricted stock units which vested during each of the three-month periods ended March 31, 2009 and 2008 was \$26 million. The weighted-average grant date fair value of restricted stock units granted during the three-month period ended March 31, 2009 was \$2.71 per unit, compared with \$6.52 per unit for the same prior year period.

Most restricted stock units outstanding as of March 31, 2009 are entitled to dividend equivalents paid in cash, but performance-based restricted stock units are not entitled to dividend equivalent payments until the applicable performance period has been completed. Dividend equivalents paid on restricted stock units are charged to accumulated deficit when paid.

Note 11. Per Share Data

Basic loss per common share is calculated by dividing net loss by the weighted average number of common shares outstanding during the period. Potentially dilutive common shares include 16 million shares issuable under our equity-based compensation plans and 11 million shares issuable upon the conversion of our convertible senior notes. All such potentially dilutive shares were antidilutive for the three-month periods ended March 31, 2009 and 2008 and, therefore, have no effect on our determination of dilutive weighted average number of shares outstanding.

Table of Contents**SPRINT NEXTEL CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****Note 12. Segment Information**

Sprint operates in two business segments: Wireless and Wireline.

Wireless primarily includes revenue from a wide array of wireless mobile telephone and wireless data transmission services and the sale of wireless equipment. Through the Wireless segment, Sprint, together with the remaining third-party PCS Affiliates, offer digital wireless service in all 50 states, Puerto Rico and the U.S. Virgin Islands.

Wireline primarily includes revenue from domestic and international wireline voice and data communication services including services to the cable multiple systems operators that resell our local and long distance service and use our back office systems and network assets in support of their telephone services provided over cable facilities.

Transactions between segments are generally accounted for based on market rates which we believe approximate fair value. Segment financial information is as follows:

Statement of Operations Information	Wireless	Wireline	Corporate, Other and Eliminations <i>(in millions)</i>	Consolidated
Quarter Ended March 31, 2009				
Net operating revenues	\$ 7,035	\$ 1,174	\$	\$ 8,209

Table of Contents

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

OVERVIEW

Sprint Nextel Corporation (Sprint, we, us, our or the Company) is a communications company offering a comprehensive range of wireless and wireline communications products and services that are designed to meet the needs of individual consumers, businesses and government subscribers. The communications industry has been and will continue to be highly competitive on the basis of price, the types of services and devices offered and the quality of service. As discussed below, the Company has experienced significant losses of subscribers in the critical post-paid wireless market in recent periods, and currently is focused on specific steps to reduce such losses.

Description of the Company

We are the third largest wireless communications company in the United States based on the number of wireless subscribers. We also are one of the largest providers of wireline long distance services and one of the largest carriers of Internet traffic in the nation. We own extensive wireless networks and a global long distance, Tier 1 Internet backbone. We offer wireless and wireline voice and data transmission services on state-of-the-art networks that utilize CDMA, iDEN and IP technologies. We utilize these networks to offer our wireless and wireline customers differentiated products and services whether through the use of a single network or a combination of these networks. We have established key priorities for our Wireless business which include improving the customer experience, rebuilding our brand and increasing profitability. We plan to achieve these priorities by providing customers with value and simplicity and by helping them to be more productive.

We believe that our value-driven wireless price plans are very attractive. Our family of Simply Everything post-paid price plans bundle together popular data applications with traditional mobile voice calling at price points that can save customers hundreds of dollars annually compared with our largest competitors. Our Boost Mobile brand prepaid price plans include unique nationwide monthly unlimited, pay as you go, and \$1 per day chat plan options.

To simplify the customer experience, we have introduced tools such as One Click that allows customers to access various software applications through a single click on their mobile devices. Our Ready Now program trains our subscribers before they leave the store in how to use their mobile devices to ensure subscribers are well informed and comfortable with the features and functions of their new devices.

We provide certain wireless services on the fastest guaranteed national push-to-talk network, as well as the nation's most dependable 3G network and offer new dual mode 3G/4G services in the Baltimore market. Additionally, Sprint's 4G WiMAX service is expected to be available in Portland this summer. We also support the open development of applications and content on our network platforms. We offer multi-functional devices, such as the Samsung Instinct and the iDEN BlackBerry Curve. In addition to our traditional wholesale customers, we also enable a variety of third-party providers, location-based services, and consumer product providers through our bandwidth built-in open device initiative. The bandwidth built-in open device initiative incorporates selling, marketing, product development, and operations resources to address the growing need for non-traditional data needs. It covers a wide variety of products and services including telematics, in-vehicle, e-readers, Original Equipment Manufacturer, and specialized medical devices.

In addition to our customer oriented goals, we have also taken measures to reduce our cost structure to align with the reduced revenues expected from fewer subscribers. Our actions include our January 2009 workforce reduction announcement through which we plan to reduce our labor and related costs by approximately \$1.2 billion through actions that include a workforce reduction of about 8,000 positions of which approximately 90% was completed as of March 31, 2009. We believe these actions, as well as our continued efforts to reduce our other operating expenses and capital spending, will allow us to maintain a strong cash position, although we do not expect that these measures will fully offset the reduced cash expected from our service revenue declines discussed below in Effects on our Business of Subscriber Losses. We believe that given the recent deterioration in the U.S. economy coupled with short-term market illiquidity, consumer and business spending will continue to be negatively impacted. We will continue to take actions designed to manage the impact of these market conditions on our ability to collect from our subscribers and on other areas of our business. Consistent with the changing economic environment, the Company's prepaid plans, primarily through the National Boost Monthly Unlimited offering, is experiencing strong demand as our simple, no contractual obligation solution provides great service and value to sub-prime subscribers.

We are subject to substantial regulation including from the FCC, which regulates the licensing, operation, acquisition and sale of the licensed radio spectrum that is essential to our business. The FCC and state public utility commissions also regulate, in whole or in part, the provision of communications services. Future changes in regulations or legislation related to spectrum licensing or other matters related to our business could impose significant additional costs either in the form of direct out-of-pocket costs or additional compliance obligations.

Table of Contents***Effects on our Business of Subscriber Losses***

As shown by the table below under Results of Operations, Wireless segment earnings represents over 80% of Sprint's total segment earnings. Within the Wireless segment, post-paid wireless voice and data services represent the most significant contributor to earnings, and are driven by the number of subscribers to our services and the average revenue per subscriber, or user (ARPU).

Beginning in mid-2006, we began to experience net losses of post-paid subscribers on the Nextel iDEN wireless network, which we acquired in 2005 in the Sprint-Nextel merger. Such net losses for the year ended December 31, 2007 exceeded the net additions of post-paid subscribers on Sprint's CDMA wireless network. Beginning in 2008 and continuing through the first quarter 2009, we have been experiencing net losses of post-paid subscribers on each of the iDEN and CDMA wireless networks.

We believe that these increasing net subscriber losses resulted from a number of historical factors, in addition to the competitive nature of the industry, including: 1) uncertainty in the marketplace as to our intentions for and commitment to the iDEN network 2) a high level of involuntary churn due to a relatively high mix of sub-prime credit subscribers 3) adverse perceptions among some of our subscribers about our customer care services 4) adverse perceptions among some of our subscribers about the quality of and our commitment to development of our networks 5) highly successful competitor devices 6) perception in the marketplace that the portfolio of Sprint handset offerings was not as desirable as those of some competitors 7) uncertainty about the financial strength and future reliability of Sprint and 8) perceptions in the marketplace, in part as a result of the subscriber losses themselves, as well as the other factors above, that the Sprint brand might not be the most desirable for wireless services.

Beginning in 2008, in conjunction with changes in senior management, Sprint undertook steps to address each of these factors. Before directly addressing brand perception, steps were taken to improve the quality of Sprint's customer care services and the Sprint networks, as confirmed by recent independent comparisons with competitors. Steps were also taken to improve our financial stability, including vigorous cost control actions, which have resulted in our continuing strong cash flow from operations. We also improved financial flexibility through renegotiation in 2008 of Sprint's revolving bank credit facility. The credit quality mix of our subscriber base was significantly improved. In addition, near the end of 2008, Sprint undertook increased marketing initiatives, including media advertising, to increase market awareness of the improvements that had been achieved in the customer experience, including the speed and reliability of our network. Also, several new competitive handsets were introduced during 2008, and in 2009, Sprint will introduce one of the most anticipated new handsets with the rollout of the Palm Pre.

We expect these actions will ultimately have a favorable impact on net subscriber losses. Net post-paid subscriber losses have not improved as expected through the first quarter 2009, in part due to circumstances in the general economy, including higher deactivations of business customer accounts as companies reduce wireless service lines resulting from their own workforce reductions. Specifically, during the first quarter 2009, wireless industry trends included a significant industry-wide shift for new accounts from post-paid wireless accounts to prepaid accounts. As a result, although Sprint's market share of post-paid gross subscriber additions increased during the first quarter 2009, the absolute number of net post-paid subscriber losses of 1,250,000 was slightly greater than those in the fourth quarter 2008. Conversely, Sprint's prepaid wireless brand Boost Mobile experienced higher than expected growth in net subscriber additions in the first quarter 2009, with net additions of 674,000 subscribers. The Company's National Boost Monthly Unlimited prepaid offering continues to experience favorable acceptance in the marketplace.

When considered in total, including Sprint's wholesale business for which monthly recurring revenues per subscriber are lower, total net subscriber losses in the first quarter 2009 fell to 182,000, compared to 1,273,000 in the fourth quarter 2008. However, as noted above, post-paid wireless subscribers, for which net subscriber losses remained high, have the greatest impact on wireless revenues. As discussed below under Results of Operations Segment Earnings Wireless Business Service Revenue, this net loss of post-paid subscribers in the first quarter 2009 can be expected to cause wireless service revenue in each of the remaining quarters in 2009 to be approximately \$200 million lower than it would have been had those subscribers not been lost. If the net losses of post-paid subscribers continued at the rate experienced in the first quarter 2009 indefinitely into the future, it would have a significant negative impact on Sprint's financial condition, results of operations and liquidity in 2010 and beyond. The successful prepaid wireless offerings, as well as the successful wholesale offerings, will partially offset these effects, but are unlikely to be sufficient to sustain the Company's level of profitability and cash flows unless we are successful in reducing the decline in post-paid subscribers. The Company believes that the actions that have been taken, as described above, and that continue to be taken in marketing, customer service, and network quality, should reduce the number of net post-paid subscriber losses during 2009 as compared to 2008.

Income tax benefit	530	310
Net loss	\$ (594)	\$ (505)

Consolidated segment earnings decreased \$286 million, or 14%, in the three-month period ended March 31, 2009 as compared to the three-month period ended March 31, 2008. Consolidated segment earnings consist of our Wireless and Wireline segments (see Segment Earnings - Wireless Business and Segment Earnings - Wireline Business below), and corporate and other earnings. Corporate and other earnings increased \$67 million, or 85%, in the three-month period ended March 31, 2009 as compared to the same period in 2008 primarily as a result of a decrease in selling, general and administrative expenses relating to the labor and cost reduction initiatives.

Depreciation and Amortization Expense

Depreciation expense decreased \$88 million, or 6%, in the three-month period ended March 31, 2009 from the same period in 2008, primarily due to assets becoming fully depreciated as the Company has reduced capital expenditures. Amortization expense declined \$231 million, or 33%, in the three-month period ended March 31, 2009 from the three-month period March 31, 2008, primarily due to the amortization of the customer relationships acquired as part of the Sprint-Nextel merger, which are amortized using the sum of the years' digits method, resulting in higher amortization rates in early periods that decline over time. See Note 5 in Notes to the Consolidated Financial Statements for additional information regarding intangible assets.

Severance and Exit Costs

On January 26, 2009, we announced a workforce reduction to reduce internal and external labor costs by \$1.2 billion on an annualized basis in an effort to reduce our cost structure and align costs with our reduced level of revenues. As a result, severance and exit costs increased by \$108 million, or 49%, in the three-month period ended March 31, 2009 compared to the three-month period ended March 31, 2008 related to the separation of employees and continued organizational realignment initiatives.

Interest Expense, Net

Interest expense increased \$22 million, or 6%, in the three-month period ended March 31, 2009 as compared to the same period in 2008, due to a decrease of \$45 million in capitalized interest which was partially offset by a decrease of \$20 million in interest expense related to the \$1.4 billion decline in the average long-term debt balance between the comparative periods. The effective interest rate on the average long-term debt balance of \$21.6 billion in the first quarter 2009 was 6.8%. The effective interest rate on the average long-term debt balance of \$23.0 billion in the first quarter 2008 was 6.6%. See Liquidity and Capital Resources for more information on the Company's financing activities. In the first quarter 2009, interest income decreased \$17 million, or 65%, as compared to the first quarter 2008, primarily due to lower interest rates.

Table of Contents**Equity in Earnings of Unconsolidated Investments and Other, Net**

This item consists mainly of losses from our equity method investments (see Note 3 in Notes to the Consolidated Financial Statements) and other miscellaneous income/(expense). Equity losses associated with the investment in Clearwire represent the Company's proportionate share of Clearwire's net loss and a pre-tax loss of \$154 million (\$96 million after-tax) related to the dilution of our investment in Clearwire during the first quarter 2009. Clearwire is expected to continue to generate a net loss at least through 2009 during the build out phase of their next-generation wireless network.

Income Tax Benefit

As a result of our pre-tax losses, the consolidated effective tax rate was a benefit of approximately 47% and 38% for the three-month periods ended March 31, 2009 and 2008, respectively. The effective tax rate for the three-month period ended March 31, 2009 was 12% higher than the U.S. federal statutory rate of 35%. Information regarding the items that caused the effective income tax rate to vary from the U.S. federal statutory rate can be found in Note 8 in Notes to the Consolidated Financial Statements.

Net Loss

We recognized a net loss of \$594 million and \$505 million for the three-month periods ended March 31, 2009 and 2008, respectively. Our first quarter 2009 and 2008 net losses reflect the decreases in Wireless segment revenue due to net losses of subscribers, together with our severance and exit costs and costs incurred to offset the net losses of subscribers. See Segment Earnings - Wireless Business below.

Segment Earnings - Wireless Business

Wireless segment earnings are primarily a function of wireless service revenue, costs to acquire subscribers, network and interconnection costs to serve those subscribers and other Wireless segment operating expenses. The costs to acquire our subscribers include the net cost at which we sell our handsets, referred to as handset subsidies, as well as the marketing and sales costs incurred to attract those subscribers. Network costs primarily represent switch and cell site costs and interconnection costs which generally consist of per-minute usage fees and roaming fees paid to other carriers. The remaining costs associated with operating the Wireless segment include the costs to operate our customer care organization, and administrative support. Wireless service revenue, costs to acquire subscribers, and variable network and interconnection costs fluctuate with the changes in our subscriber base and their related usage, but some cost elements do not fluctuate in the short term with the changes in our subscriber usage. The following table provides an overview of the results of operations of our Wireless segment for the three-month periods ended March 31, 2009 and 2008, respectively.

Wireless Earnings	Quarter Ended March 31,	
	2009	2008
	(dollars in millions)	
Service	\$ 6,420	\$ 7,123
Wholesale, affiliate and other	162	253
Total service revenue	6,582	7,376
Cost of services (exclusive of depreciation and amortization)	(2,072)	(2,114)
Service gross margin	\$ 4,510	\$ 5,262
Service gross margin percentage	69%	71%
Equipment revenue	\$ 453	\$ 587
Cost of products	(1,291)	(1,265)
Equipment net subsidy	\$ (838)	\$ (678)
Equipment net subsidy percentage	(185)%	(116)%
Selling, general and administrative expense	\$ (2,223)	\$ (2,783)

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

Wireless segment earnings ⁽¹⁾	1,449	1,801
--	-------	-------

(1) Excluded from Wireless segment earnings for 2008 are \$66 million of merger and integration expenses, which are classified as selling, general and administrative expense and cost of products as appropriate in the consolidated statement of operations.

Table of Contents**Service Revenue**

Our Wireless segment generates revenues from the sale of wireless services, the sale of wireless equipment and the sale of wholesale and other services. Service revenue consists of fixed monthly recurring charges, variable usage charges and miscellaneous fees such as activation fees, directory assistance, operator-assisted calling, equipment protection, late payment and early termination charges and certain regulatory related fees, net of service credits. The ability of our Wireless segment to generate service revenues is primarily a function of:

revenue generated from each subscriber, which in turn is a function of the types and amount of services utilized by each subscriber and the rates charged for those services (see *Service Revenue - Average Monthly Service Revenue per Subscriber* below); and

number of subscribers that we serve, which in turn is a function of our ability to acquire new and retain existing subscribers (see *Service Revenue - Net Additions to (Losses of) Subscribers* below).

The summary below provides information related to average subscribers and average revenue per subscriber for the quarters ended March 31, 2009 and 2008. A summary of changes in net additions to subscribers and average rates of monthly post-paid and prepaid customer churn since the first quarter 2008 may be found in the table on page 22.

	Quarter Ended March 31,	
	2009	2008
Average post-paid subscribers ⁽¹⁾	36,051	40,167
Average prepaid subscribers	3,791	4,452
Average monthly service revenue per subscriber:		
Direct post-paid	\$ 56	\$ 56
Direct prepaid	31	29
Average direct post-paid and prepaid	54	53

(1) *Average subscribers represent the average number of direct subscribers included in our customer base during the period, net of deactivated subscribers.*

Service revenue decreased \$703 million, or 10%, for the three-month period ended March 31, 2009 as compared to the three-month period ended March 31, 2008. The majority of the decline is due to a decrease in post-paid service revenue driven by a reduction of approximately 4.1 million, or 10%, in the Company's average number of direct post-paid subscribers. Our net post-paid subscriber losses have principally been caused by our attracting fewer new subscribers on both the iDEN and CDMA networks in recent periods. See subscriber and related earnings effects discussed in *Service Revenue - Net Additions to (Losses of) Subscribers*, *Wireless Segment Earnings*, and *Future Outlook* below for the expected impact on future periods.

Wholesale, affiliate and other revenues consist primarily of revenues from the sale of wireless services to companies that resell those services to their subscribers, net revenues retained from wireless subscribers residing in PCS Affiliate territories and revenues from bandwidth built-in services predominately marketed through devices enabled to interact on our network. Wholesale, affiliate and other revenues decreased \$91 million, or 36%, for the three-month period ended March 31, 2009 as compared to the three-month period ended March 31, 2008 due to rate declines, as well as the decreased usage primarily from one of our large carrier customers.

Service Revenue - Average Monthly Service Revenue per Subscriber

Below is a table showing average revenue per direct post-paid and prepaid subscriber for each quarter beginning with the first quarter 2008.

March 31, 2008	June 30, 2008	September 30, 2008	December 31, 2008	March 31, 2009
-------------------	------------------	-----------------------	----------------------	-------------------

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

Average monthly service revenue per subscriber

Direct post-paid	\$ 56	\$ 56	\$ 56	\$ 56	\$ 56
Direct prepaid	\$ 29	\$ 30	\$ 31	\$ 30	\$ 31

Average monthly direct post-paid service revenue per subscriber for the three-month period ended March 31, 2009 was flat as compared to the same period of 2008 as we improved the retention of our higher revenue subscribers and lessened the impact of rate plan migrations. These improvements have been primarily offset by the decline in average monthly direct post-paid

Table of Contents

service revenue per iDEN subscriber. Our retention efforts have been focused on improving the customer experience, including, but not limited to, our Simply Everything bundled plans that provide unlimited voice, data, text and Direct Connect services; improved service levels from our customer care centers; and our Ready Now program. Average monthly prepaid service revenue per subscriber for the three-month period ended March 31, 2009 increased compared to the same period in 2008 due to higher access fees from our National Boost Monthly Unlimited users.

Service Revenue Net Additions to (Losses of) Subscribers

The wireless industry is subject to intense competition to acquire and retain subscribers of wireless services. Most markets in which we operate have high rates of penetration for wireless services. Wireless carriers accordingly must attract a greater proportion of new subscribers from competitors rather than from first time subscribers. As a result, wireless carriers have focused on retaining valued subscribers through various means including considerable efforts in customer care.

As discussed above in Overview, we have endeavored to retain and attract subscribers by taking actions to improve our customer care, sales and distribution functions, and brand awareness. In addition, we took other actions in an effort to improve our subscribers' experience including improving our network performance by adding capacity to our networks, broadening our handset portfolio, and providing subscribers an excellent value proposition with our Simply Everything pricing plans. While certain indicators suggest that we are making progress with respect to these actions, we have continued to lose post-paid wireless subscribers.

The following table shows (a) net additions (losses) of subscribers for each quarter beginning with the first quarter 2008 excluding existing subscribers who have migrated between networks, (b) our total subscribers as of the end of each quarterly period, and (c) our average rates of monthly post-paid and prepaid customer churn.

	March 31, 2008	June 30, 2008	September 30, 2008	December 31, 2008	March 31, 2009
Net additions (losses) (in thousands)

Direct prepaid	9.93%	7.36%	8.16%	8.20%	6.86%

(1) Includes subscribers with PowerSource devices, which operate seamlessly between our CDMA and iDEN networks.

Table of Contents

- (2) *We calculate churn by dividing net subscriber deactivations for the quarter by the sum of the average number of subscribers for each month in the quarter. For accounts comprising multiple subscribers, such as family plans and enterprise accounts, net deactivations are defined as deactivations in excess of customer activations in a particular account within 30 days. Post-paid churn consists of both voluntary churn, where the subscriber makes his or her own determination to cease being a customer, and involuntary churn, where we terminate the customer's service due to a lack of payment or other reasons.*

Post-Paid Subscribers

We lost 1.25 million net post-paid subscribers during the first quarter 2009 as compared to losing 1.1 million net post-paid subscribers during the first quarter 2008. During the first quarter 2009, losses of post-paid subscribers on our iDEN network of 625,000 are exclusive of 94,000 that transferred from our iDEN network to our CDMA network, which results in a total loss of 719,000 iDEN post-paid subscribers. During the same quarter, our loss of 625,000 post-paid subscribers from our CDMA network was partially offset by the 94,000 that transferred from the iDEN network, for a net reduction of 531,000 post-paid subscribers on the CDMA network.

Our net subscriber losses have been caused principally by attracting fewer new subscribers on both networks in recent periods as compared to the number of subscriber deactivations experienced. We believe this reduction in new subscribers is primarily due to our competitors gaining a larger share of new wireless decisions and the relative success that certain of our competitors are enjoying with respect to retaining subscribers. The current economic conditions have also contributed to an increase in deactivations in recent periods from our business customer accounts as companies reduce wireless service lines resulting from their own workforce reductions. We further believe this reduction in new subscribers is due to measures taken by us to increase the credit quality of our subscribers, as well as lingering consumer perceptions regarding our networks, particularly the iDEN network, and customer care as discussed above in Overview. Our post-paid subscriber loss rates (or rates of customer churn) remain high relative to our competitors; however, our post-paid subscriber churn rates improved during the first quarter 2009 as compared to the first quarter 2008, as we have experienced improvement in involuntary deactivations due to our improving the credit quality of our subscriber base, offset by relatively high voluntary subscriber deactivations.

As described in Future Outlook, the Company continues to expect that not only prepaid, but also post-paid and total subscriber full-year net losses should improve in 2009 as compared to 2008. However, our actual loss of direct post-paid subscribers of 1.25 million in the first quarter 2009 can be expected to cause wireless service revenue in each of the remaining quarters of 2009 to be approximately \$200 million lower than it would have been had those subscribers not been lost. If we were to experience the same level of direct post-paid subscriber losses in each remaining quarter of 2009 as we did in the first quarter, such subscriber losses would further reduce 2009 total revenue by approximately 5%, while revenue for the year 2010 would be approximately \$3.2 billion lower than it would have been if we had not lost such direct post-paid subscribers in 2009.

Prepaid Subscribers

We added approximately 674,000 net prepaid subscribers during the first quarter 2009 as compared to losing 200,000 net prepaid subscribers in the first quarter 2008. The first quarter 2009 subscriber additions included approximately 764,000 net subscribers on our iDEN network, which was partially offset by 90,000 net subscriber losses on our CDMA network. During the first quarter 2008, we had 543,000 net prepaid subscriber losses and 343,000 net additions on our iDEN and CDMA networks, respectively.

Our net prepaid subscriber additions in the first quarter 2009 were principally driven by the Company's National Boost Monthly Unlimited offering on the iDEN network which was launched at the end of January 2009. We are encouraged by the initial success achieved by the National Boost Monthly Unlimited offering which has driven a significant prepaid market share gain during the first quarter 2009. In conjunction with the changing economic environment, the Company's National Boost Monthly Unlimited offering is experiencing strong demand as sub-prime decisions are becoming a larger portion of overall decisions in the marketplace.

Wholesale and Affiliate Subscribers

Wholesale and affiliate subscribers represent customers that are served on our networks through companies that resell our services to their subscribers and customers residing in PCS Affiliate territories. During the first quarter 2009, wholesale and affiliate subscriber additions were 394,000, resulting in about 9.4 million wholesale and affiliate subscribers at March 31, 2009, compared to about 8.7 million wholesale and affiliate subscribers at March 31, 2008. We experienced growth in the wholesale

Table of Contents

subscriber base driven primarily by additions from our bandwidth built-in open device initiative, partially offset by subscriber losses primarily from one of our large carrier customers. Although the Company experienced strong growth in the total wholesale subscriber base, most of the growth relates to services generating lower revenue per subscriber, with minimal acquisition costs and no subsidy expenses.

Cost of Services

Cost of services consists primarily of:

costs to operate and maintain our CDMA and iDEN networks, including direct switch and cell site costs, such as rent, utilities, maintenance, payroll costs associated with network employees and spectrum frequency leasing costs;

fixed and variable interconnection costs, the fixed component of which consists of monthly flat-rate fees for facilities leased from local exchange carriers based on the number of cell sites and switches in service in a particular period and the related equipment installed at each site, and the variable component of which generally consists of per-minute use fees charged by wireline providers for calls terminating on their networks, which fluctuates in relation to the level and duration of those terminating calls;

long distance costs paid to the Wireline segment;

costs to service and repair handsets;

roaming fees paid to other carriers; and

variable costs relating to payments to third parties for the use of their proprietary data applications, such as e-mail, music, TV and navigation services by our subscribers.

Cost of services decreased \$42 million, or 2%, for the three-month period ended March 31, 2009 compared to the first quarter 2008, primarily reflecting a decline in labor, outside services and maintenance costs consistent with the Company's cost cutting efforts as well as a decline in network costs associated with fewer subscribers. These costs have been slightly offset by an increase in service and repair expenses and data usage driven partially from more smartphones and data centric handsets.

Service gross margin declined 2% in the first quarter 2009 to 69% as cost of services declined 2% offset by a decline of 10% in service revenue as discussed above.

Subsidy

We recognize equipment revenue and corresponding costs of handsets when title of the handset passes to the dealer or end-user customer. Our marketing plans assume that handsets typically will be sold at prices below cost, which is consistent with industry practice, as subscriber retention efforts often include providing incentives to subscribers such as offering new handsets at discounted prices. We reduce equipment revenue for these discounts offered directly to the customer, or for certain payments to third-party dealers to reimburse the dealer for point of sale discounts that are offered to the end-user subscriber. Additionally, the cost of handsets is reduced by any rebates that are earned from the supplier. Cost of handsets and accessories also includes order fulfillment related expenses and write-downs of handset and related accessory inventory for shrinkage and obsolescence. Equipment costs in excess of the revenues generated from equipment sales (referred to in the industry as subsidy) as a percentage of equipment revenues increased to 185% in the three-month period ended March 31, 2009 from 116% in the three-month period ended March 31, 2008, primarily due to:

a 23% decline in equipment revenue, primarily due to a decrease in the number of handsets sold, as well as,

a 2% increase in the cost of handsets, primarily due to our mix of handsets sold increasing towards smartphones and higher-end devices, partially offset by a decrease in the number of handsets sold.

Selling, General and Administrative Expense

Sales and marketing costs primarily consist of customer acquisition costs, including commissions paid to our indirect dealers, third-party distributors and direct sales force for new handset activations and upgrades, residual payments to our indirect dealers, payroll and facilities costs associated with our direct sales force, retail stores and marketing employees, advertising, media programs and sponsorships, including costs related to branding. General and administrative expenses primarily consist of costs for billing, customer care and information technology operations, bad debt expense and administrative support activities, including collections, legal, finance, human resources, strategic planning and technology and product development.

Table of Contents

Sales and marketing expense decreased \$155 million, or 12%, in the first quarter 2009 from the first quarter 2008, primarily due to the decline in gross subscriber additions and a decline in labor related costs due to our workforce and cost reduction activities.

General and administrative costs decreased \$405 million, or 27%, in the first quarter 2009 from the first quarter 2008, primarily due to the decrease in bad debt expense, customer care costs and lower employee related costs. Bad debt expense was \$72 million for the quarter ended March 31, 2009 representing a \$174 million decline as compared to the first quarter 2008. Customer care costs decreased \$104 million in the first quarter 2009 as compared to the same period in 2008. Our improvement in bad debt and customer care expenses is largely attributable to credit policies for new customers and customer care quality initiatives that were launched in 2008. We also have several customer care and collection activities designed to proactively contact subscribers to ensure they are on appropriate service plans based on their usage and to negotiate payment arrangements designed to help the customers through difficult financial times. As a result, we have experienced fewer calls into customer care, a decrease in involuntary churn, as well as a decrease in the number of accounts and average balances written off during the first quarter 2009 compared to the first quarter 2008. Employee related costs have also decreased approximately \$53 million as compared to the first quarter 2008 due to the planned headcount reductions announced in January 2009.

Wireless Segment Earnings

Wireless segment earnings decreased \$352 million, or 20%, in the first quarter 2009 from the first quarter 2008, primarily due to declines in service revenue as discussed above in *Service Revenue*.

We expect to reduce the number of net post-paid subscriber losses during 2009, as compared to 2008, through the actions highlighted previously. We also have taken actions to control costs and to align our costs with our reduced level of revenues. However, the impact of the past net post-paid subscriber losses on future revenues discussed above under *Service Revenue* *Net Additions to (Losses of) Subscribers* will adversely affect 2009 and 2010 wireless segment earnings, and will be only partially offset by our reductions in costs.

We have also recently lowered the prices of certain handset devices and continue to make targeted investments to improve subscriber results, which may cause an increase in our equipment net subsidy, which could increase the overall cost to acquire and retain subscribers. Management is implementing a cost reduction program designed to decrease our cost structure by reducing our labor and other costs; however, it is not expected that the reduction in cash costs will fully offset the reduced cash expected from the service revenue declines for the rest of 2009. See *Forward-Looking Statements*.

Segment Earnings - Wireline Business

Through our Wireline segment, we provide a broad suite of wireline voice and data communications services to our Wireless segment, other communications companies and targeted business customers. These services include domestic and international data communications using various protocols, such as multiprotocol label switching technologies (MPLS), internet protocol (IP), asynchronous transfer mode (ATM), frame relay, managed network services and voice services. Our IP services can also be combined with wireless services. In addition, we provide IP and other services to cable Multiple System Operators (MSOs) that resell our local and long distance service and use our back office systems and network assets in support of their telephone service provided over cable facilities primarily to residential end-user customers. We are one of the nation's largest providers of long distance services and operate all-digital long distance and Tier 1 IP networks.

For several years, our long distance voice services have experienced an industry-wide trend of lower revenue from lower prices and competition from other wireline and wireless communications companies, as well as cable MSOs and Internet service providers. Growth in voice services provided by cable MSOs is accelerating as consumers use cable MSOs as alternatives to local and long distance voice communications providers. We continue to assess the portfolio of services provided by our Wireline segment and are focusing our efforts on IP-based services and de-emphasizing stand-alone voice services and non-IP-based data services. For example, in addition to increased emphasis on selling IP and managed services, we have converted our existing subscribers from ATM and frame relay to more advanced IP technologies, such as MPLS, Sprintlink Frame Relay and Sprintlink ATM, which allows us to provide converged services. Over time, this conversion is expected to result in decreases in revenue from frame relay and ATM service offset by increases in IP and MPLS services. We are also taking advantage of the growth in voice services provided by cable MSOs, by providing large cable MSOs with wholesale voice local and long distance services, which they offer as part of their bundled service offerings, as well as traditional voice and data services for their enterprise use.

Table of Contents

Wireline	Quarter Ended March 31,	
	2009	2008
	<i>(dollars in millions)</i>	
Voice	\$ 660	\$ 824
Data	199	267
Internet	577	496
Other	29	43
Total net services revenue	1,465	1,630
Cost of services and products	(953)	(1,084)
Service gross margin	\$ 512	\$ 546
Service gross margin percentage	35%	33%
Selling, general and administrative expense	\$ (226)	\$ (259)
Wireline segment earnings	286	287

Wireline Revenue*Voice Revenues*

Voice revenue decreased \$164 million, or 20%, in the first quarter 2009 as compared to the first quarter 2008 primarily as a result of volume declines due to customer churn as well as overall price declines. Voice revenues generated from the sale of services to our Wireless segment represented 29% of total voice revenues for the first quarter 2009 as compared to 25% for the first quarter 2008.

Data Revenues

Data revenues reflect sales of legacy data services, including ATM, frame relay and managed network services. Data revenues decreased \$68 million, or 25%, for the first quarter 2009 as compared to the first quarter 2008 primarily due to declines in frame relay and ATM services as subscribers migrated to IP-based technologies. These declines were partially offset by growth in IP revenues. Data revenues generated from the provision of services to the Wireless segment represented 16% of total data revenue for the first quarter 2009 as compared to 9% for the first quarter 2008.

Internet Revenues

Internet revenues reflect sales of IP-based data services, including MPLS. Internet revenues increased \$81 million, or 16%, in the first quarter 2009 as compared to the first quarter 2008. The increases were due to higher IP revenues as business subscribers increasingly migrate to MPLS services, as well as revenue growth in our cable voice over internet protocol business, which experienced a 24% increase in the first quarter 2009 as compared to the first quarter 2008. Internet revenues generated from the sale of services to our Wireless segment represented 11% of total Internet revenues in the first quarter 2009 as compared to 6% in the first quarter 2008.

Other Revenues

Other revenues, which primarily consist of sales of customer premises equipment, decreased \$14 million, or 33%, in the first quarter 2009 as compared to the first quarter 2008, as a result of fewer projects.

Costs of Services and Products

Costs of services and products include access costs paid to local phone companies, other domestic service providers and foreign phone companies to complete calls made by our domestic subscribers, costs to operate and maintain our networks and costs of equipment. Costs of services and products decreased \$131 million, or 12%, in the first quarter 2009 from the first quarter 2008 due to declining voice volumes. Service gross margin percentage increased from 33% in the first quarter 2008 to 35% in the first quarter 2009, primarily as a result of revenue growth in our cable VoIP business.

Selling, General and Administrative Expense

Selling, general and administrative expense decreased \$33 million, or 13%, in the first quarter 2009 as compared to the first quarter 2008. The decrease was primarily due to a reduction in employee headcount and a decline in the use of outside services and maintenance as part of our cost cutting initiatives. Total selling, general and administrative expense as a percentage of net services revenues was 15% in the first quarter 2009, as compared to 16% in the first quarter 2008.

Table of Contents**Wireline Segment Earnings**

Wireline segment earnings decreased \$1 million, or less than 1%, in the first quarter 2009 from the first quarter 2008, primarily due to an increase in Internet revenue, and a decrease in cost of services and products, partially offset by decreases in voice and data revenue.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company applies those accounting policies that management believes best reflect the underlying business and economic events, consistent with accounting principles generally accepted in the U.S. Inherent in such policies are certain key assumptions and estimates made by management. Management periodically updates its estimates used in the preparation of the consolidated financial statements based on its latest assessment of the current and projected business and general economic environment. Information regarding the Company's Critical Accounting Policies is included in Item 7 of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

FINANCIAL POSITION

Our consolidated assets were \$57.2 billion as of March 31, 2009 and \$58.3 billion as of December 31, 2008. The decrease in our consolidated assets was primarily attributable to the reduction in property, plant and equipment, net, resulting from depreciation of \$1.4 billion, the reduction in intangible assets related to amortization of \$466 million, and a decrease of \$280 million in investments due primarily to net losses from equity method investments, partially offset by an \$825 million increase of cash due to cost cutting initiatives. Our consolidated liabilities were \$38.2 billion as of March 31, 2009 and \$38.6 billion as of December 31, 2008. The decrease in our consolidated liabilities was primarily due to a \$426 million decrease in deferred tax liabilities, primarily as a result of a reduction in temporary differences related to property, plant and equipment and intangibles noted above. See "Liquidity and Capital Resources" for additional information on the change in cash and cash equivalents.

LIQUIDITY AND CAPITAL RESOURCES**Cash Flow**

	Quarter Ended March 31,	
	2009	2008
	<i>(in millions)</i>	
Cash provided by operating activities	\$ 1,363	\$ 2,107
Cash used in investing activities	(560)	(1,852)
Cash provided by financing activities	22	2,177

At March 31, 2009, cash and cash equivalents were \$4.5 billion as compared to \$4.7 billion as of March 31, 2008.

Operating Activities

Net cash provided by operating activities of \$1.4 billion in the first quarter 2009 decreased \$744 million from the first quarter 2008 primarily due to a \$1.1 billion decrease in cash received from our subscribers as a result of declining service revenues from our post-paid subscribers. This was partially offset by a decrease of \$333 million in cash paid to our suppliers and employees. Subscriber revenue earned but not billed represented about 13% and 12% of our accounts receivable balance as of March 31, 2009 and March 31, 2008, respectively.

Investing Activities

Net cash used in investing activities for the first quarter 2009 decreased by \$1.3 billion from the first quarter 2008, due to the decrease in capital expenditures of \$1.3 billion in the first quarter 2009 as compared to 2008 mainly due to fewer cell sites being built in 2009, reduced capacity needs, and fewer IT and network development projects.

Financing Activities

Net cash provided by financing activities was \$22 million during the first quarter 2009 compared to net cash provided by financing activities of \$2.2 billion in the first quarter 2008, primarily due to the draw down of \$2.5 billion under the revolving bank credit facility and net maturities of

commercial paper of \$329 million in the first quarter 2008.

Table of Contents

Capital Requirements

We currently anticipate that future funding needs in the near term will principally relate to:

operating expenses relating to our segment operations;

capital expenditures, particularly with respect to the capacity and upgrading of our networks and the deployment of new technologies in our networks;

scheduled debt service requirements;

amounts required to be expended in connection with the Report and Order;

certain costs of compliance with regulatory mandates; and

other general corporate expenditures.

Liquidity

As of March 31, 2009, our cash and cash equivalents totaled \$4.5 billion. In addition, we have \$1.4 billion available under our existing revolving bank credit facility, which expires in December 2010. On May 1, 2009, we repaid the \$600 million Sprint Capital Corporation notes that were due on that date. We have no other material debt service payments due in 2009. Even if our expectation that we will reduce the number of net post-paid subscriber losses in 2009 is not achieved, Sprint's current liquidity position makes it likely that we will be able to meet our debt service requirements and other funding needs at least through 2010. Nevertheless, if we are unable to reduce the rate of losses of post-paid subscribers in 2009 or 2010, it would have a significant negative impact on cash provided by operating activities and our liquidity in future years.

On November 3, 2008, we entered into an agreement to amend the terms and conditions of our revolving bank credit facility giving us greater flexibility regarding our financial covenants. Pursuant to the amendment, the ratio of total indebtedness to trailing four quarters earnings before interest, taxes, depreciation and amortization and certain other non-recurring charges (adjusted EBITDA) increased from no more than 3.5 to 1.0 to no more than 4.25 to 1.0. As of March 31, 2009, the ratio was 3.1 to 1.0 as compared to 3.0 to 1.0 as of December 31, 2008. Under this revolving bank credit facility, we are currently restricted from paying cash dividends unless our ratio of total indebtedness to adjusted EBITDA is less than 2.5 to 1.0. The new terms of the revolving bank credit facility provide for an interest rate equal to LIBOR, plus a margin of between 2.50% and 3.00%, depending on our debt ratings. Certain of our domestic subsidiaries have guaranteed the revolving bank credit facility. In addition, the amendment reduced the revolving bank credit facility from \$6.0 billion to \$4.5 billion. As of March 31, 2009, we had \$2.1 billion in letters of credit, including a \$2.0 billion letter of credit required by the Report and Order to reconfigure the 800 MHz band, outstanding under our \$4.5 billion revolving bank credit facility. As a result of the outstanding borrowings under the revolving bank credit facility and the outstanding letters of credit, each of which directly impacts the availability of the revolving bank credit facility, we had \$1.4 billion of borrowing capacity available under our revolving bank credit facility as of March 31, 2009.

A default under our credit facilities could trigger defaults under our other debt obligations, including our senior notes, which in turn could result in the maturities of certain debt obligations being accelerated. The indentures that govern our outstanding senior notes also require that we comply with various covenants, including limitations on the incurrence of indebtedness and liens by us and our subsidiaries.

All three rating agencies rate our senior unsecured debt below investment grade. On May 1, 2008, Standard & Poor's lowered our rating to BB. On April 3, 2009, they changed our outlook to negative from stable. On December 10, 2008, Moody's Investors Service lowered our rating to Ba2. At the same time, they raised our amended bank credit facility rating to Baa2. They rate our outlook as negative. On February 19, 2009, Fitch Ratings lowered our rating to BB. They rate our outlook as negative. Downgrades of our current ratings do not accelerate scheduled principal payments of our existing debt. However, downgrades may cause us to incur higher interest costs on our credit facilities and future

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

borrowings, if any, and could negatively impact our access to the public capital markets.

As of March 31, 2009, we had working capital of \$1.9 billion compared to \$2.1 billion as of December 31, 2008, with the change primarily due to the increase in our current liabilities.

Table of Contents

FUTURE OUTLOOK

We endeavor to both add new and retain our existing wireless subscribers in order to reverse the negative post-paid wireless subscriber trends that we have experienced in recent periods. We expect to improve our subscriber results by consistently improving the customer experience by focusing on value, simplicity and productivity.

Given the current economic environment, the difficulties the economic uncertainties create in forecasting as well as the inherent uncertainties in predicting future customer behavior, we are unable to say with assurance the net direct post-paid subscriber losses we will experience during the remaining quarters of 2009 or thereafter. However, the Company continues to expect that not only prepaid, but also post-paid and total subscriber full-year net losses should improve in 2009 as compared to 2008. We believe this improvement will principally be driven by strengthening our brand through improving the customer experience as well as by our prepaid nationwide unlimited plan on our iDEN network.

Our net subscriber losses have significantly reduced our revenue and cash flow. These effects will continue if we do not attract new subscribers and/or reduce our rate of churn. See *Wireless Segment Earnings* above for a discussion of how our subscriber trends will impact our segment earnings trends.

Also, these subscriber losses have decreased and will further decrease our adjusted EBITDA, as defined by our revolving bank credit facility. Management is implementing cost reduction programs designed to decrease our cost structure by reducing our labor and other costs; however, we do not expect that the reduction in cash costs will fully offset the reduced cash expected from our service revenue declines described above.

Our decline in adjusted EBITDA has caused the ratio of total indebtedness to trailing four quarters adjusted EBITDA to increase. We expect to remain in compliance with our covenants and expect to be able to meet our debt service requirements through at least the end of 2010, although there can be no assurance that we will do so. Although we expect to improve our subscriber results, if we do not meet our plan, depending on the severity of the actual subscriber results versus what we currently anticipate, it is possible that we would not remain in compliance with our covenants or be able to meet our debt service obligations, which could result in acceleration of our indebtedness. If such unforeseen events occur, we may engage with our lenders to obtain appropriate waivers or amendments of our credit facilities or refinance borrowings, although there is no assurance we would be successful in any of these actions.

Specifically, we expect to be able to meet our currently identified funding needs for at least the next 12 months by using our anticipated cash flows from operating activities as well as our cash, cash equivalents and marketable securities on hand. In addition, we also have available the remaining borrowing capacity under our revolving bank credit facility.

In making this assessment, we have considered:

anticipated levels of capital expenditures and FCC license acquisitions;

anticipated payments under the Report and Order, as supplemented;

any contributions we may make to our pension plan, which has been negatively impacted by the high degree of volatility in the global financial markets;

scheduled debt service requirements; and

other future contractual obligations.

If there are material changes in our business plans, or currently prevailing or anticipated economic conditions in any of our markets or competitive practices in the mobile wireless communications industry, or if other presently unexpected circumstances arise that have a material effect on our cash flow or profitability, anticipated cash needs could change significantly.

Edgar Filing: SPRINT NEXTEL CORP - Form 10-Q

The conclusion that we expect to meet our funding needs for at least the next 12 months as described above does not take into account:

any significant acquisition transactions or the pursuit of any significant new business opportunities or spectrum acquisition strategies;

potential material purchases or redemptions of our outstanding debt securities for cash; and

potential material increases in the cost of compliance with regulatory mandates.

Table of Contents

Any of these events or circumstances could involve significant additional funding needs in excess of anticipated cash flows from operating activities and the identified currently available funding sources, including existing cash and cash equivalents on hand and borrowings available under our existing revolving credit facility. If existing capital resources are not sufficient to meet these funding needs, it would be necessary to raise additional capital to meet those needs.

Our ability to fund our capital needs from outside sources is ultimately affected by the overall capacity and terms of the banking and securities markets. Given our recent financial performance as well as the volatility in these markets, we continue to monitor them closely and to take steps to maintain financial flexibility and a reasonable cost of capital.

We have in the past and may in the future have discussions with third parties regarding potential sources of new capital to satisfy actual or anticipated financing needs. At present, we have no legally binding commitments or understandings with any third parties to obtain any material amount of additional capital. The above discussion is subject to the risks and other cautionary and qualifying factors set forth under

Forward-Looking Statements and Part I, Item 1A Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2008.

Future Contractual Obligations

There have been no significant changes to our future contractual obligations as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2008.

Off-Balance Sheet Financing

We do not participate in, or secure, financings for any unconsolidated, special purpose entities.

Financial Strategies

General Risk Management Policies

We primarily use derivative instruments for hedging and risk management purposes. Hedging activities may be done for various purposes, including, but not limited to, mitigating the risks associated with an asset, liability, committed transaction or probable forecasted transaction. We seek to minimize counterparty credit risk through stringent credit approval and review processes, credit support agreements, continual review and monitoring of all counterparties, and thorough legal review of contracts. We also control exposure to market risk by regularly monitoring changes in hedge positions under normal and stress conditions to ensure they do not exceed established limits.

Our board of directors has adopted a financial risk management policy that authorizes us to enter into derivative transactions, and all transactions comply with the policy. We do not purchase or hold any derivative financial instruments for speculative purposes with the exception of equity rights obtained in connection with commercial agreements or strategic investments, usually in the form of warrants to purchase common shares.

Other Information

We routinely post important information on our website at www.sprint.com. Information contained on our website is not part of this quarterly report.

Forward-Looking Statements

We include certain estimates, projections and other forward-looking statements in our annual, quarterly and current reports, and in other publicly available material. Statements regarding expectations, including performance assumptions and estimates relating to capital requirements, as well as other statements that are not historical facts, are forward-looking statements.

These statements reflect management's judgments based on currently available information and involve a number of risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. With respect to these forward-looking statements, management has made assumptions regarding, among other things, customer and network usage, customer growth and retention, pricing, operating costs, the timing of various events and the economic and regulatory environment.

Table of Contents

Future performance cannot be assured. Actual results may differ materially from those in the forward-looking statements. Some factors that could cause actual results to differ include:

our ability to attract and retain subscribers;

the effects of vigorous competition on a highly penetrated market, including the impact of competition on the price we are able to charge subscribers for services and equipment we provide and our ability to attract new subscribers and retain existing subscribers; the overall demand for our service offerings, including the impact of decisions of new subscribers between our post-paid and prepaid services offerings and between our two network platforms; and the impact of new, emerging and competing technologies on our business;

the effect of limiting capital and operating expenditures on our ability to improve and enhance our networks and service offerings, implement our business strategies and provide competitive new technologies;

volatility in the trading price of our common stock, current economic conditions and our ability to access capital;

the impact of third parties not meeting our business requirements, including a significant adverse change in the ability or willingness of such parties to provide handset devices or infrastructure equipment for our CDMA network, or Motorola, Inc.'s ability or willingness to provide related handset devices, infrastructure equipment and software applications, or to develop new technologies or features, for our iDEN network;

the costs and business risks associated with providing new services and entering new geographic markets;

the financial performance of Clearwire and its deployment of a WiMAX network;

the effects of mergers and consolidations and new entrants in the communications industry and unexpected announcements or developments from others in the communications industry;

unexpected results of litigation filed against us or our suppliers or vendors;

the impact of adverse network performance;

the costs and/or potential customer impacts of compliance with regulatory mandates;

equipment failure, natural disasters, terrorist acts or other breaches of network or information technology security;

one or more of the markets in which we compete being impacted by changes in political, economic or other factors such as monetary policy, legal and regulatory changes or other external factors over which we have no control; and

other risks referenced from time to time in this report and other filings of ours with the Securities and Exchange Commission (SEC), including in Part I, Item 1A Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2008. The words may, could, estimate, project, forecast, intend, expect, believe, target, plan, providing guidance and similar expressions are used to identify forward-looking statements. Forward-looking statements are found throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this report. The reader should not place undue reliance on forward-looking statements, which speak only as of the date of this report. We are not obligated to publicly release any revisions to forward-looking statements to reflect events after the date of this report, including unforeseen events.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

We are primarily exposed to the market risk associated with unfavorable movements in interest rates, foreign currencies, and equity prices. The risk inherent in our market risk sensitive instruments and positions is the potential loss arising from adverse changes in those factors. There have been no material changes to our market risk policies or our market risk sensitive instruments and positions as described in our Annual Report on Form 10-K for the year ended December 31, 2008.

Item 4. *Controls and Procedures*
Evaluation of Disclosure Controls and Procedures

Disclosure controls are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports under the Securities Exchange Act of 1934, such as this Form 10-Q, is reported in accordance with the SEC's rules. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Table of Contents

In connection with the preparation of this Form 10-Q as of March 31, 2009, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of our disclosure controls and procedures were effective as of March 31, 2009, in providing reasonable assurance that information required to be disclosed in reports we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure and in providing reasonable assurance that the information is recognized, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Internal controls over our financial reporting continue to be updated as necessary to accommodate modifications to our business processes and accounting procedures. During the quarter ended March 31, 2009, the Company appointed a new Principal Accounting Officer and transitioned responsibility for the financial reporting consolidation processes to our corporate headquarters. As a result, the Company replaced the external reporting staff performing controls over the preparation of the consolidated financial statements. There have been no other changes in our internal controls over financial reporting that have occurred during the quarter ended March 31, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On March 10, 2009, a complaint was filed in federal court in Kansas City, Kansas, against the Company and three of our former executive officers in their capacities as such. The lawsuit, entitled *Bennett, et al. v. Sprint Nextel Corp., et al.*, and purportedly brought on behalf of a class of Sprint shareholders, alleges that, between October 2006 and February 2008, the defendants violated federal securities laws and rules by failing to disclose certain operating challenges in connection with the Sprint-Nextel merger, and by failing to adequately reserve for goodwill impairment and bad debt. The plaintiff seeks damages, reasonable costs and attorneys' fees as well as equitable or injunctive relief. The Company believes the lawsuit is without merit and intends to defend the matter vigorously.

We are involved in certain other legal proceedings that are described in Note 9 of Notes to the Consolidated Financial Statements included in this report. During the quarter ended March 31, 2009, there were no material developments in the status of these legal proceedings.

Various other suits, proceedings and claims, including purported class actions typical for a large business enterprise, are pending against us or our subsidiaries. While it is not possible to determine the ultimate disposition of each of these proceedings and whether they will be resolved consistent with our beliefs, we expect that the outcome of such proceedings, individually or in the aggregate, will not have a material adverse effect on our financial condition or results of operations.

Item 1A. Risk Factors

The only material changes to our risk factors as described in our Annual Report on Form 10-K for the year ended December 31, 2008 are the following:

The trading price of our common stock has been and may continue to be volatile, notwithstanding our actual operations and performance.

The stock market, in general, and the market for communications and technology companies in particular, have experienced price and volume fluctuations over the past year. These broad market and industry factors may seriously harm the market price of our common stock, regardless of our actual operations and performance. The trading price of our common stock has fallen by approximately 75% since January 1, 2008. Stock price volatility and continued and sustained decreases in our share price could subject our shareholders to losses and us to takeover bids or lead to action by the NYSE. The trading price of our common stock has been, and may continue to be, subject to fluctuations in price in response to various factors, some of which are beyond our control, including, but not limited to:

quarterly announcements and variations in our results of operations or those of our competitors, either alone or in comparison to analysts' expectations, including announcements of continued subscriber losses and rates of churn that would result in downward pressure on our stock price;

the availability or perceived availability of additional capital and market perceptions relating to our access to this capital;

seasonality or other variations in our subscriber base, including our rate of churn;

announcements by us or our competitors of acquisitions, new products, significant contracts, commercial relationships or capital commitments;

the performance of Clearwire and Clearwire's Class A common stock or speculation about the possibility of future actions we or other significant shareholders may take in connection with Clearwire holdings;

disruption to our operations or those of other companies critical to our network operations;

announcements by us regarding the entering into, or termination of, material transactions;

our ability to develop and market new and enhanced products and services on a timely basis;

recommendations by securities analysts or changes in earnings estimates concerning us;

the incurrence of additional debt, dilutive issuances of our stock, short sales, hedging and other derivative transactions of our common stock;

any major change in our board of directors or management;

litigation;

changes in governmental regulations or approvals; and

perceptions of general market conditions in the technology and communications industries, the U.S. economy and global market conditions.

Table of Contents

The intellectual property rights utilized by us and our suppliers and service providers may infringe on intellectual property rights owned by others.

Some of our products and services use intellectual property that we own. We also purchase products from suppliers, including handset device suppliers, and outsource services to service providers, including billing and customer care functions, that incorporate or utilize intellectual property. We and some of our suppliers and service providers have received, and may receive in the future, assertions and claims from third parties that the products or software utilized by us or our suppliers and service providers infringe on the patents or other intellectual property rights of these third parties. These claims could require us or an infringing supplier or service provider to cease certain activities or to cease selling the relevant products and services. These claims and assertions also could subject us to costly litigation and significant liabilities for damages or royalty payments, or require us to cease certain activities or to cease selling certain products and services.
