STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2010

Unaudited

1. CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The condensed consolidated financial statements included herein have been prepared by Stepan Company (Company), without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations, although management believes that the disclosures are adequate and make the information presented not misleading. In the opinion of management, all normal recurring adjustments necessary to present fairly the Company's financial position as of March 31, 2010 and its results of operations and cash flows for the three months ended March 31, 2010 and 2009, have been included. These financial statements and related footnotes should be read in conjunction with the financial statements and related footnotes included in the Company's 2009 Form 10-K.

2. RECONCILIATIONS OF EQUITY

Below are reconciliations of total equity, Company equity and equity attributable to the noncontrolling interest for the three months ended March 31, 2010 and 2009:

<i>(In thousands)</i>	Total Equity	Stepan Company Equity	Noncontrolling Interest Equity

Other ⁽²⁾	1,979	1,979	
Balance at March 31, 2009	\$ 217,646	\$ 216,555	\$ 1,091

⁽¹⁾ Includes the value of Company shares purchased in the open market and the value of Company common shares tendered by employees to settle minimum statutory withholding taxes related to the receipt of performance awards.

⁽²⁾ Primarily comprised of stock-based compensation, deferred compensation and excess tax benefit activities.

3. FAIR VALUE DISCLOSURES

The following are the financial instruments held by the Company at March 31, 2010 and December 31, 2009, and descriptions of the methods and assumptions used to estimate the instruments' fair values:

Cash and cash equivalents

Carrying value approximates fair value because of the short maturity of the instruments.

Derivative assets and liabilities

Derivative assets and liabilities relate to the foreign currency exchange and forward electric contracts discussed in Note 4. Fair value and carrying value are the same because the contracts are recorded at fair value. The fair value of the foreign currency contracts was calculated as the difference between the present value of the forward foreign exchange rate at the reporting date and the contracted foreign exchange rate multiplied by the contracted notional amount. The fair value of the electric contracts was calculated by applying market rates at the reporting dates for contracts of similar terms to the open electric quantities. See the table that follows these financial instrument descriptions for the reported fair values of derivative assets and liabilities.

STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

Unaudited

Long-term investments

Long-term investments are the mutual fund assets the Company holds to fund a portion of its deferred compensation liabilities. Fair value and carrying value are the same because the mutual fund assets are recorded at fair value. Fair values for the mutual funds were calculated using the published market price per unit at the reporting date multiplied by the number of units held at the reporting date. See the table that follows these financial instrument descriptions for the reported fair value of long-term investments.

Debt obligations

The Company's primary source of long-term debt financing is unsecured private placement notes with fixed interest rates and maturities. The fair value of fixed interest rate debt comprises the combined present values of scheduled principal and interest payments for each of the various loans, individually discounted at rates equivalent to those which could be obtained by the Company for new debt issues with durations equal to the average life to maturity of each loan. The discount rates are based on applicable duration U.S. Treasury rates plus market interest rate spreads to borrowers with credit ratings equivalent to those of the Company. The fair values of the Company's fixed-rate debt at March 31, 2010 and December 31, 2009, including current maturities, was estimated to be \$78,739,000 and \$78,545,000, respectively. The carrying value of the Company's fixed-rate debt was \$73,896,000 at both March 31, 2010 and December 31, 2009.

Debt also includes \$28,500,000 for an unsecured term loan that carries a variable interest rate of LIBOR plus a spread of 100 basis points as of March 31, 2010. The current market spread over LIBOR for entities with credit ratings similar to the Company's is approximately 250 basis points. Using the current market spread to discount the scheduled principal and interest payment outflows calculated under the contractual spread, the Company estimates the fair value of the variable interest unsecured term loan at March 31, 2010, at approximately \$26,841,000 compared to a carrying value of \$28,500,000. At December 31, 2009, the fair value of the variable interest unsecured term loan was \$26,929,000 compared to a carrying value of \$28,500,000.

Because of the short-term nature of the remaining Company debt, the fair values for such debt approximate the carrying values.

STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

Unaudited

The following tables present assets and liabilities measured at fair value as of March 31, 2010 and December 31, 2009 and the level within the fair value hierarchy in which the fair value measurements fall:

<i>(Dollars in thousands)</i>	March 2010	Level 1	Level 2	Level 3
Mutual fund assets	\$ 10,712	\$ 10,712	\$	\$
Derivative assets: ⁽¹⁾				
Foreign currency contracts	25		25	
Total assets at fair value	\$ 10,737	\$ 10,712	\$ 25	\$

Total liabilities at fair value	\$ 1,177	\$	\$ 1,177	\$

<i>(Dollars in thousands)</i>	December 2009	Level 1	Level 2	Level 3
Mutual fund assets	\$ 10,539	\$ 10,539	\$	\$
Derivative assets: ⁽¹⁾				
Foreign currency contracts	3		3	
Total assets at fair value	\$ 10,542	\$ 10,539	\$ 3	\$
Derivative liabilities: ⁽²⁾				
Foreign currency contracts	\$ 244	\$	\$ 244	\$
Forward electric contracts	893		893	
Total liabilities at fair value	\$ 1,137	\$	\$ 1,137	\$

⁽¹⁾ Included in the receivables, net line in the condensed consolidated balance sheets.

⁽²⁾ Included in the accounts payable line in the condensed consolidated balance sheets.

4. DERIVATIVE INSTRUMENTS

The Company is exposed to certain risks relating to its ongoing business operations. The primary risk managed by the use of derivative instruments is foreign exchange risk. Specifically, the Company currently holds forward foreign currency exchange contracts that are not designated as any type of accounting hedge, as defined by generally accepted accounting principles. The Company uses these contracts to

Edgar Filing: STEPAN CO - Form 10-Q

manage its exposure to exchange rate fluctuations on certain accounts payable and accounts receivable balances recorded on the books of Company subsidiaries that are denominated in currencies other than the entities' functional currencies. The forward foreign exchange contracts are recognized on the balance sheet as either an asset or a liability measured at fair value. Gains and losses arising from recording the foreign exchange contracts at fair value are

STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

Unaudited

reported in earnings as offsets to the losses and gains reported in earnings arising from the remeasurement of the accounts payable and accounts receivable balances into the applicable functional currencies. At March 31, 2010, and December 31, 2009, the Company had open forward foreign currency exchange contracts, all with expiration dates of three months or less, to buy or sell foreign currencies with a U.S. dollar equivalent of \$33,552,000 and \$30,332,000, respectively.

At March 31, 2010, and December 31, 2009, the Company also held open forward electric contracts to purchase 79,000 megawatts and 107,000 megawatts, respectively, of electricity at fixed prices in 2010. The Company entered into the contracts to help manage the volatile cost of electricity. The electric contracts were not designated as accounting hedges and did not qualify for the normal purchase exception.

See Note 3 for the fair values and line item presentations of derivative instruments reported in the March 31, 2010, and December 31, 2009, consolidated balance sheets.

Derivative instrument gains and losses reported in the consolidated statements of income for the three month periods ending March 31, 2010 and 2009 are displayed below:

Derivative Instrument	Income Statement Line Item	Gain (Loss)	
		Three Months Ended	
		March 31 2010	2009
Foreign currency contracts	Other, net	\$ 780	\$ (895)
Forward electric contracts	Other, net	\$ (247)	

5. STOCK-BASED COMPENSATION

On March 31, 2010, the Company had stock options outstanding under its 1992 Stock Option Plan and 2000 Stock Option Plan and stock options and stock awards outstanding under its 2006 Incentive Compensation Plan. Compensation expense charged against income for all stock options and awards was \$872,000 and \$1,220,000 for the three months ended March 31, 2010 and 2009. Unrecognized compensation cost for stock options and stock awards was \$2,118,000 and \$3,981,000, respectively, at March 31, 2010, compared to \$913,000 and \$2,485,000, respectively, at December 31, 2009. The increase in unrecognized compensation cost was due to 2010 grants of 92,556 stock options and 43,583 stock awards. The unrecognized compensation cost at March 31, 2010, is expected to be recognized over weighted average periods of 1.5 years and 2.2 years for stock options and stock awards, respectively.

STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

Unaudited

6. INVENTORIES

The composition of inventories was as follows:

<i>(Dollars in thousands)</i>	March 31, 2010	December 31, 2009
Finished products	\$ 52,342	\$ 45,842
Raw materials	33,278	28,851
Total inventories	\$ 85,620	\$ 74,693

Inventories are primarily priced using the last-in, first-out inventory valuation method. If the first-in, first-out inventory valuation method had been used for all inventories, inventory balances would have been approximately \$25,228,000 and \$24,182,000 higher than reported at March 31, 2010, and December 31, 2009, respectively.

7. CONTINGENCIES

There are a variety of legal proceedings pending or threatened against the Company. Some of these proceedings may result in fines, penalties, judgments or costs being assessed against the Company at some future time. The Company's operations are subject to extensive local, state and federal regulations, including the U.S. Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) and the Superfund amendments of 1986 (Superfund). Over the years, the Company has received requests for information related to or has been named by the government as a PRP at a number of waste disposal sites where clean up costs have been or may be incurred under CERCLA and similar state statutes. In addition, damages are being claimed against the Company in general liability actions for alleged personal injury or property damage in the case of some disposal and plant sites. The Company believes that it has made adequate provisions for the costs it may incur with respect to these sites.

The Company has estimated a range of possible environmental and legal losses from \$7.3 million to \$31.5 million at March 31, 2010. At March 31, 2010, the Company's accrued liability for such losses, which represents the Company's best estimate within the estimated range of possible environmental and legal losses, was \$16.8 million compared to \$17.1 million at December 31, 2009. During the first three months of 2010 cash outlays related to legal and environmental matters approximated \$0.6 million compared to \$0.4 million in the first three months of 2009.

For certain sites, estimates cannot be made of the total costs of compliance or the Company's share of such costs; consequently, the Company is unable to predict the effect thereof on the Company's financial position, cash flows and results of operations. Management believes that in the event of one or more adverse determinations in any annual or interim period, the impact on the Company's cash flows and results of operations for those periods could be material. However, based upon the Company's present belief as to its relative involvement at these sites, other viable entities' responsibilities for cleanup, and the extended period over which any costs would be incurred, the Company believes that these matters, individually and in the aggregate, will not have a material effect on the Company's financial position.

STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

Unaudited

Following are summaries of the material contingencies at March 31, 2010:

Maywood, New Jersey Site

The Company's property in Maywood, New Jersey and property formerly owned by the Company adjacent to its current site and other nearby properties (Maywood site) were listed on the National Priorities List in September 1993 pursuant to the provisions of CERCLA because of certain alleged chemical contamination. Pursuant to an Administrative Order on Consent entered into between USEPA and the Company for property formerly owned by the Company, and the issuance of an order by USEPA to the Company for property currently owned by the Company, the Company completed a Remedial Investigation Feasibility Study (RI/FS) in 1994. The Company submitted the Draft Feasibility Study for Soil and Source Areas (Operable Unit 1) in September 2002. In addition, the Company has submitted other documentation and information as requested by USEPA, including a Draft Final FS for Groundwater (Operable Unit 2) in June 2003, additional information regarding groundwater in May 2007, submission of a Draft Feasibility Study for Soil and Groundwater (Operable Units 1 and 2) in March 2009, and additional requested information regarding soil and groundwater in February 2010. The Company is awaiting the issuance of a Record of Decision from USEPA.

The Company believes it has adequate reserves for claims associated with the Maywood site, and has recorded a liability for the estimated probable costs it expects to incur at the Maywood site related to remediation of chemical contamination. However, depending on the results of the ongoing discussions with USEPA, the final cost of such remediation could differ from the current estimates.

In addition, under the terms of a settlement agreement reached on November 12, 2004, the United States Department of Justice and the Company agreed to fulfill the terms of a Cooperative Agreement reached in 1985 under which the United States will take title to and responsibility for radioactive waste removal at the Maywood site, including past and future remediation costs incurred by the United States.

D Imperio Property Site

During the mid-1970's, Jerome Lightman and the Lightman Drum Company disposed of hazardous substances at several sites in New Jersey. The Company was named as a potentially responsible party (PRP) in the case *United States v. Lightman* (1:92-cv-4710 D.N.J.), which involved the D Imperio Property Site located in New Jersey. In the second quarter of 2007, the Company reached an agreement with respect to the past costs and future allocation percentage in said litigation for costs related to the D Imperio site, including costs to comply with USEPA's Unilateral Administrative Orders. The Company paid the settlement amount in the third quarter of 2007. The resolution of the Company's liability for this litigation did not have a material impact on the financial position, results of operations or cash flows of the Company. In December 2007, the Company received updated remediation cost estimates, which were considered in the Company's determination of its range of estimated possible losses and reserve balance.

STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

Unaudited

Remediation work is continuing at this site. Based on current information, the Company believes that it has adequate reserves for claims associated with the D Imperio site. However, actual costs could differ from current estimates.

Ewan Property Site

The case *United States v. Lightman* (1:92-cv-4710 D.N.J.), described above for the D Imperio site, also involved the Ewan Property Site located in New Jersey. The agreement described above also included a settlement with respect to the past costs and future allocation percentage in said litigation for costs related to the past costs and allocation percentage at the Ewan site. The Company paid the settlement amount in the third quarter of 2007. The resolution of the Company's liability for this litigation did not have a material impact on the financial position, results of operations or cash flows of the Company.

In addition, the NJDEP filed a natural resource damages complaint in June 2007 against the Company and other entities regarding the Ewan site. The Company was served with the complaint in May 2008. The parties, including the Company, are engaged in discussions with NJDEP to resolve this litigation.

There is some monitoring and operational work continuing at the Ewan site. Based on current information, the Company believes that it has adequate reserves for claims associated with the Ewan site. However, actual costs could differ from current estimates.

Lightman Drum Company Superfund Site

The Company received a Section 104(e) Request for Information from USEPA dated March 21, 2000, regarding the Lightman Drum Company Superfund Site located in Winslow Township, New Jersey. The Company responded to this request on May 18, 2000. In addition, the Company received a Notice of Potential Liability and Request to Perform RI/FS dated June 30, 2000, from USEPA. The Company participated in the performance of the RI/FS as a member of the Lightman Yard PRP Group. The RI/FS was performed under an interim allocation. The allocation has not yet been finalized by the Lightman Yard PRP Group. The Company believes that it is unlikely that an allocation change would have a material effect on Company financial position, results of operations or cash flows.

In the fourth quarter of 2007, the PRPs who agreed to conduct the interim remedial action entered into an Administrative Settlement Agreement and Order on Consent for Removal Action with USEPA, and these PRPs also entered into a Supplemental Lightman Yard Participation and Interim Funding Agreement to fund the agreed-upon removal action. The Company paid a soil removal assessment upon execution of the agreements which did not have a material impact on the financial position, results of operations or cash flows of the Company. The soil removal action was completed and USEPA approved it in October 2009. A final Feasibility Study was

STEPAN COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

Unaudited

submitted to USEPA in February 2009 and was approved in March 2009. In June 2009, USEPA issued a Proposed Plan for Remediation. In the second quarter of 2009, after considering the Feasibility Study and Proposed Plan for Remediation, the Company revised its estimated range of possible losses for the site and increased its recorded liability. Recording the additional liability did not have a material effect on the Company's financial position, results of operations or cash flows. In September 2009, USEPA signed the Record of Decision. After considering the signed Record of Decision, the Company determined that no further adjustments to its liability or range of losses for the site were necessary.

The Company believes that based on current information it has adequate reserves for claims associated with the Lightman site. However, actual costs could differ from current estimates.

Wilmington Site

The Company is currently contractually obligated to contribute to the response costs associated with the Company's formerly-owned site at 51 Eames Street, Wilmington, Massachusetts. Remediation at this site is being managed by its current owner to whom the Company sold the property in 1980. Under the agreement, once total site remediation costs exceed certain levels, the Company is obligated to contribute up to five percent of future response costs associated with this site with no limitation on the ultimate amount of contributions. To date, the Company has paid the current owner \$1.8 million for the Company's portion of environmental response costs through the fourth quarter of 2009 (the current owner of the site bills the Company one calendar quarter in arrears). The Company has recorded a liability for its portion of the estimated remediation costs for the site. Depending on the ultimate cost of the remediation at this site, the amount for which the Company is liable could differ from the current estimates.

In addition, in response to the special notice letter received by the PRPs in June 2006 from USEPA seeking performance of an RI/FS at the site, certain PRPs, including the Company, signed an Administrative Settlement Agreement and Order on Consent for the RI/FS effective July 2007, which sets forth the obligations of the PRPs to perform the RI/FS.

The Company and other prior owners also entered into an agreement in April 2004 waiving certain statute of limitations defenses for claims which may be filed by the Town of Wilmington, Massachusetts, in connection with this site. While the Company has denied any liability for any such claims, the Company agreed to this waiver while the parties continue to discuss the resolution of any potential claim which may be filed.

The Company believes that based on current information it has adequate reserves for the claims related to this site.

8. POSTRETIREMENT BENEFIT PLANS*Defined Benefit Pension Plans*

The Company sponsors various funded qualified and unfunded non-qualified defined benefit pension plans, the most significant of which cover employees in the U.S. and U.K. locations. The U.S. and U.K. defined benefit pension plans are frozen and service benefits are no longer being accrued.

*Components of Net Periodic Benefit Cost**(Dollars in thousands)*

	UNITED STATES		UNITED KINGDOM	
	Three Months Ended		Three Months Ended	
	March 31		March 31	
	2010	2009	2010	2009
Interest cost	\$ 1,767	\$ 1,775	\$ 262	\$ 199
Expected return on plan assets	(1,962)	(1,856)	(218)	(132)
Amortization of net loss	535	366	69	19
Net periodic benefit cost	\$ 340	\$ 285	\$ 113	\$ 86

*Employer Contributions**U.S. Plans*

The Company expects to contribute approximately \$2,757,000 to its U.S. qualified defined benefit pension plans in 2010 and to pay \$350,000 in 2010 related to its unfunded non-qualified plans. As of March 31, 2010, \$188,000 had been contributed to the qualified plans and \$131,000 had been paid related to the non-qualified plans.

U.K. Plan

The Company's United Kingdom subsidiary expects to contribute approximately \$921,000 to its defined benefit pension plan in 2010. As of March 31, 2010, \$222,000 had been contributed to the plan.

Defined Contribution Plans

Defined contribution plan expenses for the Company's retirement savings plan were \$1,124,000 for the three months ended March 31, 2010, compared to \$1,207,000 for three months ended March 31, 2009.

Expenses related to the Company's profit sharing plan were \$1,376,000 and \$884,000, for the three months ended March 31, 2010 and 2009, respectively.

9. EARNINGS PER SHARE

Below are the computations of basic and diluted earnings per share for the three months ended March 31, 2010 and 2009.

<i>(In thousands, except per share amounts)</i>	Three Months Ended March 31	
	2010	2009
<u>Computation of Basic Earnings per Share</u>		
Net income attributable to Stepan Company	\$ 20,660	\$ 15,153
Deduct dividends on preferred stock	188	189
Income applicable to common stock	\$ 20,472	\$ 14,964
Weighted-average number of common shares outstanding	10,099	9,776
Basic earnings per share	\$ 2.03	\$ 1.53
<u>Computation of Diluted Earnings per Share</u>		
Net income attributable to Stepan Company	\$ 20,660	\$ 15,153
Weighted-average number of common shares outstanding	10,099	9,776
Add net shares issuable from assumed exercise of options (under treasury stock method) ⁽¹⁾	261	165
Add weighted-average shares issuable from assumed conversion of convertible preferred stock	624	628
Shares applicable to diluted earnings	10,984	10,569
Diluted earnings per share	\$ 1.88	\$ 1.43

⁽¹⁾ Options to purchase 147,445 shares of common stock were not included in the computation of diluted earnings per share for the three months ended March 31, 2009. The options' exercise prices were greater than the average market price for the common stock and their effect would have been antidilutive. There were no antidilutive stock options for the three months ended March 31, 2010.

14. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the Financial Accounting Standards Board issued amendments to the accounting rules for variable interest entities (VIEs) accounting, which are intended to improve financial reporting by providing additional guidance to companies involved with VIEs and by requiring additional disclosures about a company's involvement in VIEs. These amendments were effective for interim and annual periods beginning after November 15, 2009. After considering the provisions of the VIE amendments, the Company concluded that none of the unconsolidated entities in which the Company holds an ownership interest were required to be treated as VIEs. Therefore, adoption of these amendments did not have an effect on the Company's financial position, results of operations or cash flows.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's discussion and analysis of certain significant factors that have affected the Company's financial condition and results of operations during the interim period included in the accompanying condensed consolidated financial statements.

Overview

The Company produces and sells intermediate chemicals that are used in a wide variety of applications worldwide. The overall business comprises three reportable segments:

Surfactants Surfactants, which accounted for 78 percent of consolidated net sales for the first three months of 2010, are principal ingredients in consumer and industrial cleaning products such as detergents for washing clothes, dishes, carpets, floors and walls, as well as shampoos, body washes, toothpastes and fabric softeners. Other applications include germicidal quaternary compounds, lubricating ingredients, emulsifiers (for spreading agricultural products), plastics and composites and biodiesel. Surfactants are manufactured at six North American sites (five in the U.S. and one in Canada), three European sites (United Kingdom, France and Germany) and three Latin American sites (Mexico, Brazil and Colombia). The Company holds a 50 percent ownership interest in two joint ventures, Stepan Philippines and TIORCO, LLC, that are excluded from surfactant segment operating results. The joint ventures are accounted for under the equity method.

Polymers Polymers, which accounted for 19 percent of consolidated net sales for the first three months of 2010, include two primary product lines: polyols and phthalic anhydride. Polyols are used in the manufacture of laminate insulation board for the construction industry and are also sold to the appliance, flexible foam and coatings, adhesives, sealants and elastomers (C.A.S.E.) industries. Phthalic anhydride is used in unsaturated polyester resins, alkyd resins and plasticizers for applications in construction materials and components of automotive, boating and other consumer products. In the U.S., polymer product lines are manufactured at the Company's Millsdale, Illinois, site. Polyols are also manufactured at the Company's Wesseling (Cologne), Germany facility, as well as at its 80-percent owned joint venture in Nanjing, China (which is included in consolidated results).

Specialty Products Specialty products, which accounted for three percent of consolidated net sales for the first three months of 2010, include flavors, emulsifiers and solubilizers used in the food and pharmaceutical industries. Specialty products are manufactured primarily at the Company's Maywood, New Jersey, site.

The Company continued its trend of strong profit performance, reporting record first quarter net income of \$20.7 million, which was a 36 percent increase from the prior year's first quarter. The global economy appears to be slowly recovering from the recent recession, and the improved conditions contributed to the Company's quarter-over-quarter net income growth.

Sales volumes for the first quarter of 2010 improved eight percent over the year ago quarter. The Company's largest segment, surfactants, reported six percent quarter-over-quarter volume growth. The economic downturn had less of an impact on surfactant sales volume due to their use in laundry and personal care products, which are relatively recession-resistant. Polymers, which was the segment most severely affected by the economic downturn (polymer products are used in roofing insulation, construction materials, automotive and recreational vehicle applications), posted first quarter 2010 sales volume that exceeded first quarter 2009 volume by 25 percent. First quarter 2010 raw material costs remained lower than costs for last year's first quarter, reflecting cost declines precipitated by the recession. The lower costs benefited operating results for all reportable segments. However, as the economy slowly strengthens, costs of crude and natural oils and their derivative products have risen, prompting management to increase selling prices for many of the Company's surfactant and polymer products.

Deferred Compensation Plans

The accounting for the Company's deferred compensation plans can cause period-to-period fluctuations in Company expenses and profits. For the first quarter of 2010, the Company recorded \$1.8 million in compensation income related to the Company's deferred compensation plans compared to \$5.5 of income for the same period of 2009. The value of Company common stock, to which a large portion of the deferred compensation obligation is tied, declined from \$64.81 per share at December 31, 2009, to \$55.89 per share at March 31, 2010, a decrease of \$8.92 per share. For last year's first quarter, the Company's common stock price declined \$19.69 per share from \$46.99 per share at December 31, 2008, to \$27.30 per share at March 31, 2009. The pretax effect of all deferred compensation-related activities (which includes realized and unrealized gains and losses on the mutual fund assets held to fund the deferred compensation obligations) and the income statement line items in which the effects were recorded are displayed below (see the Corporate Expenses section of this management discussion and analysis for further details):

<i>(Dollars in millions)</i>	(Income) Expense For the Three Months Ended March 31	
	2010	2009
Deferred Compensation (Administrative expense)	(\$ 1.8)	(\$ 5.5)
Investment Income (Other, net)		(0.1)
Realized/Unrealized Losses on Investments (Other, net)	(0.4)	0.4
Net Pretax Income Effect	(\$ 2.2)	(\$ 5.2)

Effects of Foreign Currency Translation

The Company's foreign subsidiaries transact business and report financial results in their respective local currencies. As a result, foreign subsidiary income statements are translated into U.S. dollars at average foreign exchange rates appropriate for the reporting period. Because foreign exchange rates fluctuate against the U.S. dollar over time, foreign currency translation affects period-to-period comparisons of financial statement items (i.e. because foreign exchange rates fluctuate, similar period-to-period local currency results for a foreign subsidiary may translate into different U.S. dollar results). For the quarter ended March 31, 2010, the U.S. dollar weakened against nearly all the foreign currencies in the locations where the Company does business, when compared to the exchange rates for quarter ended March 31, 2009. Consequently, reported net sales, expense and income amounts for 2010 were higher than they would have been had the foreign currency exchange rates remained constant with the rates for 2009. Below is a table that presents the effect that foreign currency translation had on the quarter-over-quarter changes in consolidated net sales and various income line items for the quarter ending March 31, 2010:

<i>(In millions)</i>	Three Months Ended March 31		Increase	Increase Due to Foreign Translation
	2010	2009		
Net Sales	\$ 337.0	\$ 318.1	\$ 18.9	\$ 12.5
Gross Profit	63.6	48.7	14.9	1.9
Operating Income	33.7	26.2	7.5	1.2
Pretax Income	31.6	23.3	8.3	1.0

RESULTS OF OPERATIONS*Three Months Ended March 31, 2010 and 2009**Summary*

Net income for the first quarter of 2010 improved 36 percent to \$20.7 million, or \$1.88 per diluted share, compared to \$15.2 million, or \$1.43 per diluted share, for the first quarter of 2009. All three reportable segments contributed to the favorable results. Below is a summary discussion of the major factors leading to the quarter-over-quarter changes in net sales, profits and expenses. A detailed discussion of segment operating performance for the first quarter of 2010 follows the summary.

Consolidated net sales increased \$18.9 million, or six percent, from quarter to quarter. Higher sales volume and the effects of foreign currency translation accounted for approximately \$25.7 million and \$12.5 million, respectively, of the quarter-over-quarter increase in net sales. Average selling prices declined from quarter to quarter, which reduced the net sales improvement by \$19.3 million. Sales volumes increased eight percent, reflecting improvements in the economy and successful execution of specific opportunities in core markets that led to volume increases for all three segments. The decline in average selling prices resulted primarily from selling price decreases made subsequent to the first quarter of 2009 reflecting lower raw material costs.

Operating income for the first quarter of 2010 was \$7.5 million, or 29 percent, greater than operating income for the same period of 2009. Gross profit improved \$14.9 million, or 31 percent. All three segments contributed to the improvement in gross profit. Surfactants segment gross profit was up \$7.9 million, or 19 percent; polymers segment gross profit increased \$4.5 million, or 67 percent; and gross profit for the specialty products segment was up \$2.5 million, or 100 percent. Lower quarter-over-quarter raw material costs and increased sales volume benefited all segments. The effects of foreign currency translation contributed \$1.9 million to the quarter-to-quarter consolidated gross profit improvement.

Operating expenses increased \$7.4 million, or 33 percent, between quarters. Major items accounting for the expense increase were as follows:

<i>(Dollars in millions)</i>	Increase
Deferred Compensation Expense	\$ 3.7
Incentive-based Compensation	0.8
Foreign Currency Translation	0.7
European Product Registration	0.5
Salary Expense	0.4
Other	1.3
Total	\$ 7.4

The Company reported \$1.8 million of income from its deferred compensation plans in the first quarter of 2010 compared to \$5.5 million of income for the same period last year, an unfavorable change of \$3.7 million. See the Overview and Corporate Expenses sections of this management discussion and analysis for further details. Improved operating results caused the rise in incentive-based compensation, which includes stock-based pay, bonuses and profit sharing. European product registration reflected higher expenses for registering the Company's products under Europe's Registration, Evaluation, Authorisation and Restriction of Chemical Substances (REACH) regulation.

Interest expense for the first quarter of 2010 was \$0.6 million, or 32 percent, less than interest expense for the first quarter of 2009. Lower average debt levels led to the decline.

The loss from equity joint ventures, which includes results for the 50-percent owned SPI and TIORCO joint ventures, declined \$0.2 million, or 29 percent, from quarter to quarter. SPI reported income of \$0.2 million for the first quarter of 2010 compared to expense of \$0.2 million for last year's first quarter. TIORCO reported \$0.8 million of expense in the current quarter compared to \$0.6 million of expense in the year ago quarter. The Company also sells surfactant products to TIORCO customers. The sales and resulting income from the sales are included in the Company's surfactants segment operating results.

Other, net expense was \$0.2 million for the first quarter of 2010 compared to \$0.3 million for the same period of 2009. A \$0.7 million favorable swing in investment related income, partially offset by a \$0.6 million decline in foreign exchange gains, accounted for the \$0.1 million quarter-over-quarter favorable other, net change.

The effective tax rate was 34.6 percent for the first quarter of 2010 compared to 34.8 percent for the first quarter of 2009. The recently passed U.S. health care legislation and related tax law changes had no effect on the Company's current provision for income taxes.

Segment Results

<i>(Dollars in thousands)</i>	Surfactants	Polymers	Specialty Products	Segment Results	Corporate	Total
For the three months ended March 31, 2010						
Net sales	\$ 262,313	\$ 63,110	\$ 11,607	\$ 337,030		\$ 337,030
Operating income	29,253	6,652	4,223	40,128	(6,473)	33,655
For the three months ended March 31, 2009						
Net sales	\$ 259,634	\$ 48,713	\$ 9,796	\$ 318,143		\$ 318,143
Operating income	24,186	2,603	1,663	28,452	(2,283)	26,169

Surfactants

Surfactants net sales for the first quarter of 2010 increased \$2.7 million, or one percent, from net sales for the first quarter of 2009. A six percent increase in sales volume and the effects of foreign currency translation accounted for approximately \$14.7 million and \$11.4 million, respectively, of the net sales change. The effect of lower raw material costs on average selling prices reduced the quarter-over-quarter change by \$23.4 million. A quarter-to-quarter comparison of net sales by region follows:

<i>(Dollars in thousands)</i>	For the Three Months Ended			
	March 31, 2010	March 31, 2009	Increase (Decrease)	Percent Change
North America	\$ 178,620	\$ 175,436	\$ 3,184	+2
Europe	59,580	59,036	544	+1
Latin America	24,113	25,162	(1,049)	-4
Total Surfactants Segment	\$ 262,313	\$ 259,634	\$ 2,679	+1

The two percent increase in net sales for North American operations was attributable to a seven percent increase in sales volume and the effects of foreign currency translation, which accounted for \$12.5 million and \$3.7 million, respectively, of the net sales change. A seven percent decline in average selling prices reduced the quarter-over-quarter change by \$13.0 million. Sales into all major market segments were up between quarters, reflecting some recovery from the economic recession and successful execution of specific opportunities in core markets. Sales volume for consumer products, the region's largest market segment, continued strong and increased four percent from the year ago quarter. The foreign currency translation effect resulted from the strengthening of the Canadian dollar against the U.S. dollar. Price reductions made subsequent to the first quarter of 2009, reflecting lower raw material costs, led to the lower quarter-over-quarter average selling prices.

Net sales for European operations increased one percent due to the favorable effects of foreign currency translation (\$3.9 million) partially offset by the unfavorable effects of a four percent decline in average selling prices (\$2.1 million) and a two percent decrease in sales volume (\$1.2 million). The foreign currency impact was caused by the strengthening of the European euro and the U.K. pound sterling against the U.S. dollar. Selling price decreases made throughout 2009, reflecting lower raw material costs, accounted for the quarter-to-quarter drop in average selling prices. Prices have also been reduced in some instances due to competitive situations, particularly within the U.K.

The four percent decline in net sales for Latin American operations resulted from the impact of lower average selling prices (\$7.7 million), partially offset by the effects of foreign currency translation (\$3.8 million) and higher sales volume (\$2.9 million). First quarter 2010 average selling prices were 28 percent lower than average prices for the same quarter of last year. A different product sales mix and price decreases made subsequent to the first quarter of 2009 to reflect falling raw material costs drove the decline in average selling prices. The favorable currency translation impact resulted from the strengthening of the currencies for all three Latin American locations against the U.S. dollar. Sales volume was up 12 percent from quarter to quarter due to higher sales volume for the Company's Brazil subsidiary.

Surfactants operating income for the first quarter of 2010 was \$5.1 million greater than operating income for the first quarter of 2009. Gross profit increased \$7.9 million due principally to lower quarter-over-quarter raw material costs and higher sales volume. The effects of foreign currency translation contributed \$1.7 million of the favorable gross profit change. Operating expenses increased \$2.8 million, or 17 percent. Quarter-to-quarter comparisons of gross profit by region and total segment operating expenses and operating income follow:

<i>(Dollars in thousands)</i>	For the Three Months Ended		Increase (Decrease)	Percent Change
	March 31, 2010	March 31, 2009		
Gross Profit				
North America	\$ 37,238	\$ 27,197	\$ 10,041	+37
Europe	7,067	8,880	(1,813)	-20
Latin America	4,036	4,404	(368)	-8
Total Surfactants Segment	\$ 48,341	\$ 40,481	\$ 7,860	+19
Operating Expenses	19,088	16,295	2,793	+17
Operating Income	\$ 29,253	\$ 24,186	\$ 5,067	+21

The quarter-to-quarter improvement in gross profit for North American operations was largely attributable to the effects of lower quarter-over-quarter raw material costs and the previously noted seven percent increase in sales volume. A more favorable sales mix also contributed. Although raw material costs have been rising as the economy recovers, the impact of the economic recession moved raw material costs lower through most of 2009. As a result, material costs for the first quarter of 2010 remained lower than material costs for the same quarter of 2009. Second quarter 2010 selling price increases have been announced to mitigate the effects of a recent rise in raw material costs on profit margins.

Gross profit for European operations declined as a result of lower selling prices and sales volumes along with higher raw material costs in the UK subsidiary. The effects of foreign currency translation had a \$0.4 million positive effect on the quarter-over-quarter change in Europe's gross profit.

Gross profit for Latin American operations declined largely due to lower unit margins for the region's Mexico subsidiary. The impact of the lower margins more than offset the region's 12 percent increase in sales volume and a \$0.7 million favorable effect of foreign currency translation. The lower margins resulted from selling prices that lagged behind recent raw material increases. Increased gross profit for the Brazil and Colombia subsidiaries, principally attributable to higher sales volume, partially offset the results for Mexico.

Operating expenses for the surfactants segment were up \$2.8 million, or 17 percent, from quarter to quarter. The increase was primarily due to increases of \$1.5 million and \$0.7 million for North American and European operations, respectively, and a \$0.7 million foreign currency translation effect. Approximately \$1.2 million of the North American operations expense increase was attributable to planned higher marketing expenses. The major contributors to the increase in North American marketing expenses were higher salaries (\$0.4 million), fringe benefits (\$0.3 million) and travel-related expenses (\$0.2 million). The increase in operating expenses for European operations reflected higher expenses related to registering the Company's products under Europe's REACH regulation.

Polymers

Polymers net sales for the first quarter of 2010 increased \$14.4 million, or 30 percent, from net sales for the same quarter of 2009. A 25 percent increase in sales volume, higher average selling prices and the effects of foreign currency translation accounted for \$11.9 million, \$1.4 million and \$1.1 million, respectively, of the increase in net sales. A quarter-to-quarter comparison of net sales by region is displayed below:

	For the Three Months Ended			
	March 31, 2010	March 31, 2009	Increase	Percent Change
North America	\$ 41,973	\$ 32,593	\$ 9,380	+29
Europe	18,440	14,681	3,759	+26
Asia and Other	2,697	1,439	1,258	+87
Total Polymers Segment	\$ 63,110	\$ 48,713	\$ 14,397	+30

Net sales for North American operations increased 29 percent due to a 22 percent increase in sales volume and a six percent increase in average selling prices. The increase in sales volume and average selling prices led to \$7.2 million and \$2.2 million, respectively, of the increase in net sales. Sales volume for phthalic anhydride and polyols increased 25 percent and 19 percent, respectively. First quarter 2009 volumes were unusually low as the global economic recession negatively affected the industries to which the polymer segment sells. The improved first quarter 2010 sales volume reflected the effects of a recovering economy, as companies began to restore inventories that were reduced to low levels during the recession. The increase in average selling prices reflected rising raw material costs, particularly for phthalic anhydride.

Net sales for European operations grew 26 percent due to a 25 percent increase in sales volume and the effects of foreign currency translation, which accounted for \$3.6 million and \$1.1 million, respectively, of the improvement in net sales. Average selling prices declined five percent, which offset the effects of sales volume and currency translation by \$0.9 million. The higher quarter-over-quarter sales volume reflected improvement in the economy.

Asia and Other operations net sales were up 87 percent from quarter to quarter due principally to increased sales volume for the China joint venture.

Polymer operating income for the first quarter of 2010 increased \$4.0 million from operating income reported for the first quarter of 2009. Gross profit increased \$4.5 million, or 67 percent, due principally to higher unit margins for North American operations and sales volume increases for all regions. Operating expenses increased \$0.4 million, or 10 percent, quarter over quarter. Below are quarter-to-quarter comparisons of gross profit by region and total segment operating expenses and operating income:

(Dollars in thousands)	For the Three Months Ended		Increase (Decrease)	Percent Change
	March 31, 2010	March 31, 2009		
Gross Profit				
North America	\$ 7,442	\$ 2,815	\$ 4,627	+164
Europe	3,419	3,735	(316)	-8
Asia and Other	280	131	149	+114
Total Polymers Segment	\$ 11,141	\$ 6,681	\$ 4,460	+67
Operating Expenses	4,489	4,078	411	+10
Operating Income	\$ 6,652	\$ 2,603	\$ 4,049	+156

Gross profit for North American operations increased 164 percent, which accounted for the polymer segment's overall improved profit. Higher quarter-over-quarter unit margins and sales volume led to the increase. Margins for the first quarter of 2009 were unusually low due to high priced material in inventory that was accumulated near the end of 2008 (and carried over into 2009) prior to the significant recession-driven decline in commodity costs. Quarter-over-quarter margins were also favorably affected by manufacturing costs that increased just three percent despite a 22 percent increase in sales volume. As the economy has begun to recover from the recession, raw material costs have been on the rise, placing downward pressure on margins. The Company announced a price increase to recover those costs.

Gross profit for European operations declined eight percent despite the 25 percent increase in sales volume. The effects of rising raw material costs coupled with the decline in average selling prices more than offset the impact of higher sales volume.

The increase in gross profit for Asia and Other operations reflected higher sales volume.

The \$0.4 million increase in operating expenses was attributable to higher marketing expenses for North American operations (\$0.3 million). Operating expenses for foreign operations was up due to the effects of foreign currency translation.

Specialty Products

Net sales for the first quarter of 2010 were \$1.8 million, or 18 percent, higher than net sales for the first quarter of 2009. Higher sales volumes and a more favorable mix of sales led to the improvement. Operating income was up \$2.6 million, or 154 percent, from quarter to quarter due to higher sales volumes, lower raw material costs and an improved sales mix resulting from increased sales of higher margin pharmaceutical products.

Corporate Expenses

Corporate expenses, which comprise expenses that are not allocated to the reportable segments, increased \$4.2 million to \$6.5 million for the first quarter of 2010 from \$2.3 million for the first quarter of 2009. Deferred compensation expense accounted for \$3.7 million of the increase, as the Company recorded \$1.8 million of deferred compensation income for the first quarter of 2010 compared to \$5.5 million of income for the same period of 2009. The value of Company common stock, to which a large portion of the deferred compensation obligation is tied, declined from \$64.81 per share at December 31, 2009, to \$55.89 per share at March 31, 2010, a decrease of \$8.92 per share. For last year's first quarter, the Company's common stock price declined \$19.69 per share from \$46.99 per share at December 31, 2008, to \$27.30 per share at March 31, 2009. The smaller decline in Company common share price led to the recording of less compensation income. Increases in the values of the mutual fund assets held to partially fund the deferred compensation obligation also contributed to the quarter-over-quarter decrease in deferred compensation income. The remainder of the increase in corporate expenses resulted primarily from higher salary and fringe benefit expenses.

LIQUIDITY AND CAPITAL RESOURCES

Cash flow from operating activities for the first three months of 2010 was a net use of \$3.3 million compared to a source of \$15.3 million for the same period in 2009. Net income for the current year quarter increased by \$5.5 million versus the comparable year-ago period while current year working capital changes were unfavorable by \$22.5 million compared to the year-ago period.

For the first quarter of 2010, accounts receivable were a cash use of \$38.4 million versus a cash source of \$11.8 million for the first quarter of 2009. Inventories were a cash use of \$11.2 million for the first three months of 2010 versus a cash source of \$10.8 million for the same period in 2009. Accounts payable and accrued liabilities were a source of \$16.6 million for the first quarter of 2010 compared to a use of \$33.6 million for the comparable period last year.

The working capital increase for the first quarter of 2010 was driven primarily by higher sales volumes compared to the fourth quarter of 2009 and, to a lesser extent, by higher raw material costs and selling prices to customers during 2010. During the first quarter of 2009, the Company had experienced lower raw material costs as well as lower sales versus the preceding quarter, which produced decreases in both accounts receivable and inventories. The Company's raw material costs are heavily influenced by the costs of crude oil-derived commodity chemicals, which are used by the Company as raw materials. Raw materials are a primary driver to the Company's working capital, with a direct impact on inventory carrying costs as well as an

indirect impact on accounts receivable via selling prices, both of which have had increases during the first quarter of 2010. The Company has not experienced a significant change in the payment timing of its receivables and has not changed its own payment practices related to its payables. It is management's opinion that the Company's liquidity is sufficient to provide for potential increases in working capital during 2010.

Investing activities for the first three months of 2010 were a net cash use of \$12.9 million compared to \$2.8 million for the comparable year-ago quarter. For the first quarter of 2010, capital expenditures totaled \$13.0 million versus \$15.7 million for the same period in 2009. During the first quarter of 2010, the Company liquidated \$0.7 million of investments for participant payouts compared to \$4.4 million for the first quarter of 2009. During the first quarter last year, the Company also recovered \$8.5 million of restricted cash relating to a 2008 Internal Revenue like-kind exchange, a singular cash inflow accountable for most of the quarter-to-quarter difference in net investing cash flows. For 2010, the Company estimates that full-year capital expenditures will be in a range of \$65 million to \$75 million, including capacity expansions in Germany and Brazil.

The Company has purchased treasury shares in the open market from time to time in order to fund its own benefit plans and also to mitigate the dilutive effect of new shares issued under its benefit plans. The Company may also make open market repurchases as cash flows permit when, in management's opinion, the Company's shares are undervalued in the market. During the first quarter of 2010, the Company purchased 72,845 common shares for the treasury in the open market at a total cost of \$3.7 million. As of March 31, 2010, there were 306,468 shares remaining under the current share repurchase authorization.

As of March 31, 2010, the Company's cash and cash equivalents totaled \$75.4 million, including \$31.3 million in two separate U.S. money market funds, each of which was rated AAA by Standard and Poor's and Aaa by Moody's. Cash in U.S. demand deposit accounts, totaled \$24.4 million and cash of the Company's non-U.S. subsidiaries held outside the U.S. totaled \$19.7 million as of March 31, 2010.

Total Company debt decreased by \$1.0 million during the first quarter of 2010, from \$104.1 million to \$103.1 million, reflecting a foreign debt decrease of \$1.0 million. Over the same period, net debt, total debt minus cash, increased by \$22.1 million, from \$5.6 million to \$27.7 million, driven mainly by a \$23.1 million cash decrease. During the first quarter of 2010, the Company used cash on hand to fund investing outflows of \$12.9 million and financing outflows of \$7.8 million as well as the \$3.3 million shortfall in cash flows from operating activities. As of March 31, 2010, the ratio of total debt to total debt plus shareholders' equity was 25.3 percent, compared to 26.4 percent as of December 31, 2009. The ratio of net debt to net debt plus shareholders' equity was 8.3 percent at March 31, 2010, compared to 1.9 percent at December 31, 2009.

As of March 31, 2010, the Company's debt included \$73.9 million of unsecured private placement loans with maturities extending from 2010 through 2018. These loans are the Company's primary source of long-term debt financing, and are supplemented by bank credit facilities to meet short and medium term needs. The Company's debt also included a \$28.5 million term loan with its U.S. banks, which has maturities from 2010 through 2013.

The Company is in discussions to borrow \$40.0 million during the second quarter of 2010 under a new long-term debt agreement with loan proceeds to be used for capital expenditures and other corporate purposes, as well as potential acquisitions. Terms and conditions would be substantially the same as those in the Company's 5.69 percent Notes issued in 2005.

The Company currently has \$58.3 million of credit available under its committed \$60.0 million U.S. revolving credit agreement, which will require renewal on or before April 20, 2011. The Company has begun negotiations with its U.S. banks to replace this agreement during the second quarter of 2010 with a new, committed \$60 million revolving agreement. The new agreement is expected to have current market pricing with other terms and conditions substantially the same as those in the present agreement. The Company anticipates that cash from operations and cash on hand, as well as committed credit facilities, will be sufficient to fund anticipated capital expenditures, working capital, dividends and other planned financial commitments for the foreseeable future.

Certain foreign subsidiaries of the Company maintain term loans and short-term bank lines of credit in their respective local currencies to meet working capital requirements as well as to fund capital expenditure programs and acquisitions. As of March 31, 2010, the Company's European subsidiaries had no short-term bank debt with available borrowing capacity of approximately \$30.1 million. As of that date, Company's Latin American subsidiaries had short-term debt of \$0.7 million with \$5.9 million in available borrowing capacity. The Company's 80 percent owned China joint venture had no bank debt with \$7.8 million in available borrowing capacity.

The Company has material debt agreements that require the maintenance of minimum interest coverage and minimum net worth. These agreements also limit the incurrence of additional debt as well as the payment of dividends and repurchase of treasury shares. Testing for these agreements is based on the combined financial statements of the U.S. operations of Stepan Company and Stepan Canada Inc. (the "Restricted Group"). Under the most restrictive of these debt covenants:

1. The Restricted Group must maintain a minimum interest coverage ratio, as defined within the agreements, of 2.0 to 1.0, for the preceding four calendar quarters.
2. The Restricted Group must maintain net worth of at least \$113.7 million.
3. The Restricted Group must maintain a ratio of long-term debt to total capitalization, as defined in the agreements, not to exceed 55 percent.
4. The Restricted Group may pay dividends and purchase treasury shares in amounts of up to \$30.0 million plus 100 percent of net income and cash proceeds of stock option exercises, measured cumulatively beginning December 31, 2001. The maximum amount of dividends that could have been paid within this limitation is disclosed as unrestricted retained earnings on the Company's balance sheet.

The Company was in compliance with all of its loan agreements as of March 31, 2010. Based on current projections, the Company believes it will be in compliance with its loan agreements throughout 2010.

ENVIRONMENTAL AND LEGAL MATTERS

The Company is subject to extensive federal, state and local environmental laws and regulations. Although the Company's environmental policies and practices are designed to ensure compliance with these laws and regulations, future developments and increasingly stringent environmental regulation could require the Company to make additional unforeseen environmental expenditures. The Company will continue to invest in the equipment and facilities necessary to comply with existing and future regulations. During the first three months of 2010, the Company's expenditures for capital projects related to the environment were \$0.2 million. These projects are capitalized and depreciated over their estimated useful lives, which is typically 10 years. Recurring costs associated with the operation and maintenance of facilities for waste treatment and disposal and managing environmental compliance in ongoing operations at the Company's manufacturing locations were \$3.8 million and \$3.7 million for the three months ended March 31, 2010 and 2009, respectively. While difficult to project, it is not anticipated that these recurring expenses will increase significantly in the future.

Over the years, the Company has received requests for information related to or has been named by the government as a potentially responsible party at a number of waste disposal sites where cleanup costs have been or may be incurred under CERCLA and similar state statutes. In addition, damages are being claimed against the Company in general liability actions for alleged personal injury or property damage in the case of some disposal and plant sites. The Company believes that it has made adequate provisions for the costs it may incur with respect to the sites. It is the Company's accounting policy to record liabilities when environmental assessments and/or remedial efforts are probable and the cost or range of possible costs can be reasonably estimated. When no amount within the range is a better estimate than any other amount, the minimum is accrued. Some of the factors on which the Company bases its estimates include information provided by feasibility studies, potentially responsible party negotiations and the development of remedial action plans. Because reported liabilities are recorded based on estimates, actual amounts could differ from those estimates. After partial remediation payments at certain sites, the Company has estimated a range of possible environmental and legal losses from \$7.3 million to \$31.5 million at March 31, 2010, compared to \$7.8 million to \$31.9 million at December 31, 2009. At March 31, 2010, the Company's accrued liability for such losses, which represents the Company's best estimate within the estimated range of possible environmental and legal losses, was \$16.8 million compared to \$17.1 million at December 31, 2009. During the first three months of 2010, cash outlays related to legal and environmental matters approximated \$0.6 million compared to \$0.4 million for the first three months of 2009.

For certain sites, estimates cannot be made of the total costs of compliance or the Company's share of such costs; consequently, the Company is unable to predict the effect thereof on the Company's financial position, cash flows and results of operations. Management believes that in the event of one or more adverse determinations in any annual or interim period, the impact on the Company's cash flows and results of operations for those periods could be material. However, based upon the Company's present belief as to its relative involvement at these sites, other viable entities' responsibilities for cleanup and the extended period over which any costs would be incurred, the Company believes that these matters will not have a material effect on the Company's financial position. Certain of these matters are discussed in Item 1, Part 2, Legal Proceedings, in this report and in other filings of the Company with the Securities and Exchange Commission,

which are available upon request from the Company. See also Note 7 to the condensed consolidated financial statements for a summary of the environmental proceedings related to certain environmental sites.

OUTLOOK

The Company's record first quarter earnings were the result of sustained margins and improved volumes across all three business segments. The Company believes its core markets provide opportunities for additional profit growth. The Company is presently adding new capabilities to its surfactant plant in Brazil and expanding its polyol plant in Germany. These and other investments should create the opportunity for the Company to sustain its earnings momentum.

CRITICAL ACCOUNTING POLICIES

There have been no changes to the critical accounting policies disclosed in the Company's 2009 Annual Report on Form 10-K.

OTHER

Except for the historical information contained herein, the matters discussed in this document are forward looking statements that involve risks and uncertainties. The results achieved this quarter are not necessarily an indication of future prospects for the Company. Actual results in future quarters may differ materially. Potential risks and uncertainties include, among others, fluctuations in the volume and timing of product orders, changes in demand for the Company's products, the ability to pass on raw material price increases, changes in technology, continued competitive pressures in the marketplace, outcome of environmental contingencies, availability of raw materials, foreign currency fluctuations and the general economic conditions.

Item 3 Quantitative and Qualitative Disclosures about Market Risk

There have been no material changes in the Company's market risks since December 31, 2009.

Item 4 Controls and Procedures

a. Evaluation of Disclosure Controls and Procedures

Based on their evaluation of our disclosure controls and procedures as of the end of the most recent fiscal quarter covered by this Form 10-Q, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934) were effective as of March 31, 2010.

b. Changes in Internal Control Over Financial Reporting

There were no changes in internal controls that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II OTHER INFORMATION

Item 1 Legal Proceedings

Maywood, New Jersey Site

The Company's property in Maywood, New Jersey and property formerly owned by the Company adjacent to its current site and other nearby properties (Maywood site) were listed on the National Priorities List in September 1993 pursuant to the provisions of CERCLA because of certain alleged chemical contamination. Pursuant to an Administrative Order on Consent entered into between USEPA and the Company for property formerly owned by the Company, and the issuance of an order by USEPA to the Company for property currently owned by the Company, the Company completed a Remedial Investigation Feasibility Study (RI/FS) in 1994. The Company submitted the Draft Feasibility Study for Soil and Source Areas (Operable Unit 1) in September 2002. In addition, the Company has submitted other documentation and information as requested by USEPA, including a Draft Final FS for Groundwater (Operable Unit 2) in June 2003, additional information regarding groundwater in May 2007, submission of a Draft Feasibility Study for Soil and Groundwater (Operable Units 1 and 2) in March 2009, and additional requested information regarding soil and groundwater in February 2010. The Company is awaiting the issuance of a Record of Decision from USEPA.

The Company believes it has adequate reserves for claims associated with the Maywood site, and has recorded a liability for the estimated probable costs it expects to incur at the Maywood site related to remediation of chemical contamination. However, depending on the results of the ongoing discussions with USEPA, the final cost of such remediation could differ from the current estimates.

In addition, under the terms of a settlement agreement reached on November 12, 2004, the United States Department of Justice and the Company agreed to fulfill the terms of a Cooperative Agreement reached in 1985 under which the United States will take title to and responsibility for radioactive waste removal at the Maywood site, including past and future remediation costs incurred by the United States.

D Imperio Property Site

During the mid-1970's, Jerome Lightman and the Lightman Drum Company disposed of hazardous substances at several sites in New Jersey. The Company was named as a potentially responsible party (PRP) in the case *United States v. Lightman* (1:92-cv-4710 D.N.J.), which involved the D Imperio Property Site located in New Jersey. In the second quarter of 2007, the Company reached an agreement with respect to the past costs and future allocation percentage in said litigation for costs related to the D Imperio site, including costs to comply with USEPA's Unilateral Administrative Orders. The Company paid the settlement amount in the third quarter of 2007. The resolution of the Company's liability for this litigation did not have a material impact on the financial position, results of operations or cash flows of the Company. In December 2007, the Company received updated remediation cost estimates, which were considered in the Company's determination of its range of estimated possible losses and reserve balance.

Remediation work is continuing at this site. Based on current information, the Company believes that it has adequate reserves for claims associated with the D Imperio site. However, actual costs could differ from current estimates.

Ewan Property Site

The case *United States v. Lightman* (1:92-cv-4710 D.N.J.), described above for the D Imperio site, also involved the Ewan Property Site located in New Jersey. The agreement described above also included a settlement with respect to the past costs and future allocation percentage in said litigation for costs related to the past costs and allocation percentage at the Ewan site. The Company paid the settlement amount in the third quarter of 2007. The resolution of the Company's liability for this litigation did not have a material impact on the financial position, results of operations or cash flows of the Company.

In addition, the NJDEP filed a natural resource damages complaint in June 2007 against the Company and other entities regarding the Ewan site. The Company was served with the complaint in May 2008. The parties, including the Company, are engaged in discussions with NJDEP to resolve this litigation.

There is some monitoring and operational work continuing at the Ewan site. Based on current information, the Company believes that it has adequate reserves for claims associated with the Ewan site. However, actual costs could differ from current estimates.

Lightman Drum Company Superfund Site

The Company received a Section 104(e) Request for Information from USEPA dated March 21, 2000, regarding the Lightman Drum Company Superfund Site located in Winslow Township, New Jersey. The Company responded to this request on May 18, 2000. In addition, the Company received a Notice of Potential Liability and Request to Perform RI/FS dated June 30, 2000, from USEPA. The Company participated in the performance of the RI/FS as a member of the Lightman Yard PRP Group. The RI/FS was performed under an interim allocation. The allocation has not yet been finalized by the Lightman Yard PRP Group.

In the fourth quarter of 2007, the PRPs who agreed to conduct the interim remedial action entered into an Administrative Settlement Agreement and Order on Consent for Removal Action with USEPA, and these PRPs also entered into a Supplemental Lightman Yard Participation and Interim Funding Agreement to fund the agreed-upon removal action. The Company paid a soil removal assessment upon execution of the agreements which did not have a material impact on the financial position, results of operations or cash flows of the Company. The soil removal action was completed and USEPA approved it in October 2009. A final Feasibility Study was submitted to USEPA in February 2009 and was approved in March 2009. In June 2009, USEPA issued a Proposed Plan for Remediation. In September 2009, USEPA signed the Record of Decision.

The Company believes that based on current information it has adequate reserves for claims associated with the Lightman site. However, actual costs could differ from current estimates.

Wilmington Site

The Company is currently contractually obligated to contribute to the response costs associated with the Company's formerly-owned site at 51 Eames Street, Wilmington, Massachusetts. Remediation at this site is being managed by its current owner to whom the Company sold the property in 1980. Under the agreement, once total site remediation costs exceed certain levels, the Company is obligated to contribute up to five percent of future response costs associated with this site with no limitation on the ultimate amount of contributions. To date, the Company has paid the current owner \$1.8 million for the Company's portion of environmental response costs through the fourth quarter of 2009 (the current owner of the site bills the Company one calendar quarter in arrears). The Company has recorded a liability for its portion of the estimated remediation costs for the site. Depending on the ultimate cost of the remediation at this site, the amount for which the Company is liable could differ from the current estimates.

In addition, in response to the special notice letter received by the PRPs in June 2006 from USEPA seeking performance of an RI/FS at the site, certain PRPs, including the Company, signed an Administrative Settlement Agreement and Order on Consent for the RI/FS effective July 2007, which sets forth the obligations of the PRPs to perform the RI/FS.

The Company and other prior owners also entered into an agreement in April 2004 waiving certain statute of limitations defenses for claims which may be filed by the Town of Wilmington, Massachusetts, in connection with this site. While the Company has denied any liability for any such claims, the Company agreed to this waiver while the parties continue to discuss the resolution of any potential claim which may be filed.

The Company believes that based on current information it has adequate reserves for the claims related to this site.

Other Sites

The Company has been named as a de minimis PRP at other sites, and as such the Company believes that a resolution of its liability will not have a material impact on the financial position, results of operations or cash flows of the Company.

Item 1A Risk Factors

There have been no material changes from the risk factors disclosed in the Company's 2009 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Below is a summary by month of share purchases by the Company during the first quarter of 2010:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January				
February	87,543 ^(a)	\$ 51.29		
March	6,428 ^(b)	\$ 49.45		

(a) Includes 66,417 shares purchased on the open market. Also, includes 21,126 shares of Company common stock tendered by employees to settle minimum statutory withholding taxes related to receipt of performance stock awards.

(b) Includes 6,428 shares purchased on the open market.

Item 3 Defaults Upon Senior Securities

None

Item 4 (Removed and Reserved)**Item 5 Other Information**
