PART I

Item 1. BUSINESS

American Woodmark Corporation (American Woodmark or the Company) manufactures and distributes kitchen cabinets and vanities for the remodeling and new home construction markets. American Woodmark was incorporated in 1980 by the four principal managers of the Boise Cascade Cabinet Division through a leveraged buyout of that division. American Woodmark was operated privately until 1986 when it became a public company through a registered public offering of its common stock.

American Woodmark currently offers framed stock cabinets in approximately 435 different cabinet lines, ranging in price from relatively inexpensive to medium-priced styles. Styles vary by design and color from natural wood finishes to low-pressure laminate surfaces. The product offering of stock cabinets includes 82 door designs in 15 colors. Stock cabinets consist of a common box with standard interior components and a maple, oak, cherry, or hickory front frame, door and/or drawer front.

Products are primarily sold under the brand names of American Woodmark®, Timberlake®, Shenandoah Cabinetry®, and Potomac®.

American Woodmark's products are sold on a national basis across the United States to the remodeling and new home construction markets. The Company services these markets through three primary channels: home centers, builders, and independent dealers and distributors. The Company provides complete turnkey installation services to its direct builder customers via its network of nine service centers that are strategically located throughout the United States. The Company distributes its products to each market channel directly from four assembly plants through a third party logistics network.

The primary raw materials used include hard maple, oak, cherry, soft maple, and hickory lumber and plywood. Additional raw materials include paint, particleboard, manufactured components, and hardware. The Company currently purchases paint from one supplier; however, other sources are available. Other raw materials are purchased from more than one source and are readily available.

American Woodmark operates in a highly fragmented industry that is composed of several thousand local, regional, and national manufacturers. The Company's principal means for competition is its breadth and variety of product offering, expanded service capabilities, geographic reach and affordable quality. The Company believes it is one of the three largest manufacturers of kitchen cabinets in the United States.

The Company's business has historically been subject to seasonal influences, with higher sales typically realized in the second and fourth fiscal quarters. General economic forces and changes in the Company's customer mix have reduced seasonal fluctuations in revenue over the past few years. The Company does not consider its level of order backlog to be material.

In recognition of the cyclicity of the housing industry, the Company's policy is to operate with a minimal amount of financial leverage. The Company regularly maintains a debt to capital ratio below 15%, and working capital exclusive of cash of less than 6% of net sales. At April 30, 2010, debt to capital was 12.7%, and working capital net of cash was 5.0% of net sales.

During the last fiscal year, American Woodmark had two primary customers, The Home Depot and Lowe's Companies, Inc., which together accounted for approximately 71 percent of the Company's sales in its fiscal year ended April 30, 2010 (fiscal 2010). The loss of either customer would have a material adverse effect on the Company.

As of May 31, 2010, the Company had 3,401 employees. Approximately 10 percent of the Company's employees are represented by labor unions. The Company believes that its employee relations are good.

American Woodmark's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements, and all amendments to those reports are available free of charge on the Company's web site at www.americanwoodmark.com as soon as reasonably practicable after such material is electronically filed with the Securities and Exchange Commission. The contents of the Company's web site are not, however, part of this report.

The SEC allows the Company to incorporate by reference information it files with the SEC in response to many of the Items in this report. This means that the Company can disclose important information to you by referring you to those documents. The information incorporated by reference is an important part of this report. Several Items in Parts I and II of this report incorporate information from the 2010 Annual Report to Shareholders in response to those Items. The 2010 Annual Report to Shareholders is filed as Exhibit 13 to this report.

Item 1A. RISK FACTORS

There are a number of business risks and uncertainties that may affect the Company's business, results of operations and financial condition. These risks and uncertainties could cause future results to differ from past performance or expected results, including results described in statements elsewhere in this report that constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. Additional risks and uncertainties not presently known to the Company or it currently believes to be immaterial also may adversely impact the business. Should any risks or uncertainties develop into actual events, these developments could have material adverse effects on the Company's business, financial condition, and results of operations. These risks and uncertainties, which the Company considers to be most relevant to specific business activities, include, but are not limited to, the following, as well as additional risk factors included in Item 7A, Quantitative and Qualitative Disclosures about Market Risk. Additional risks and uncertainties that may affect the Company's business, results of operations and financial condition are discussed in the 2010 Annual Report, including under the headings Forward-Looking Statements, Market Risks, and Outlook for Fiscal 2011 in Management's Discussion and Analysis, which are incorporated herein by reference.

Our business relies on remodeling activity and residential construction. The Company's results of operations are affected by levels of home improvement and residential construction activity, including repair and remodeling and new construction. Interest rates, availability of credit, energy costs, consumer confidence, national and regional economic conditions, and weather conditions and natural disasters can significantly impact levels of home improvement and residential construction activity.

Our future financial performance depends in part on the success of our new product development and other growth strategies. The Company has increased its emphasis on new product development in recent years and continues to focus solely on organic growth. Consequently, the Company's financial performance will, in part, reflect its success in implementing its growth strategies in its existing markets and in introducing new products.

The loss of, or a reduction in business from, either of our key customers would have a material adverse effect on our business. The size and importance to the Company of its two largest customers is significant. These customers could make significant changes in their volume of purchases and could otherwise significantly affect the terms and conditions on which the Company does business. Sales to The Home Depot and Lowe's Companies, Inc. were approximately 71 percent of total company sales for fiscal 2010. Although builders, dealers, and other retailers represent other channels of distribution for the Company's products, an unplanned loss of a substantial portion of sales to The Home Depot or Lowe's Companies, Inc. would have a material adverse impact on the Company.

Our operating results are affected by the cost and availability of raw materials. Because the Company is dependent on outside suppliers for raw material needs, it must obtain sufficient quantities of quality raw materials from its suppliers at acceptable prices and in a timely manner. The Company has no long-term supply contracts with its key suppliers. A substantial decrease in the availability of products from the Company's suppliers, the loss of key supplier arrangements, or a substantial increase in the cost of its raw materials could adversely impact the Company's results of operations.

We may not be able to maintain or raise the prices of our products in response to inflation and increasing costs. Short-term market and competitive pressures may prohibit the Company from raising prices to offset inflationary raw material and freight costs, which would adversely impact profit margins.

The economic recession is adversely impacting demand for the housing industry. Through fiscal year 2010, the Company's sales levels have fallen by 51% from their peak levels in 2006. If market conditions continue to decline, the Company's sales, earnings, and cash flow would continue to be adversely impacted.

Item 1B. UNRESOLVED STAFF COMMENTS
