Form 10-Q
May 09, 2011

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2011

Commission File Number 1-7850

SOUTHWEST GAS CORPORATION

(Exact name of registrant as specified in its charter)

California
(State or other jurisdiction of
incorporation or organization)

88-0085720
(I.R.S. Employer
Identification No.)

5241 Spring Mountain Road
Post Office Box 98510

Las Vegas, Nevada
(Address of principal executive offices)

89193-8510
(Zip Code)

Registrant's telephone number, including area code: (702) 876-7237

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, non-accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Edgar Filing: SOUTHWEST GAS CORP - Form 10-Q

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

Common Stock, \$1 Par Value, 45,848,692 shares as of April 29, 2011.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Note 1 Nature of Operations and Basis of Presentation

Nature of Operations. Southwest Gas Corporation and its subsidiaries (the Company) are composed of two segments: natural gas operations (Southwest or the natural gas operations segment) and construction services. Southwest is engaged in the business of purchasing, distributing, and transporting natural gas in portions of Arizona, Nevada, and California. The public utility rates, practices, facilities, and service territories of Southwest are subject to regulatory oversight. The timing and amount of rate relief can materially impact results of operations. Natural gas sales are seasonal, peaking during the winter months; therefore, results of operations for interim periods are not necessarily indicative of the results for a full year. Variability in weather from normal temperatures, primarily in Arizona, can materially impact results of operations. Natural gas purchases and the timing of related recoveries can materially impact liquidity. NPL Construction Co. (NPL or the construction services segment), a wholly owned subsidiary, is a full-service underground piping contractor that provides utility companies with trenching and installation, replacement, and maintenance services for energy distribution systems.

Basis of Presentation. The condensed consolidated financial statements included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles (GAAP) have been condensed or omitted pursuant to such rules and regulations. The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates. In the opinion of management, all adjustments, consisting of normal recurring items and estimates necessary for a fair presentation of the results for the interim periods, have been made. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the 2010 Annual Report to Shareholders, which is incorporated by reference into the 2010 Form 10-K.

Intercompany Transactions. NPL recognizes revenues generated from contracts with Southwest (see Note 3 below). Accounts receivable for these services are presented in the table below (thousands of dollars):

	March 31, 2011	December 31, 2010
Accounts receivable for NPL services	\$ 6,956	\$ 8,111

The accounts receivable balance, revenues, and associated profits are included in the condensed consolidated financial statements of the Company and were not eliminated during consolidation in accordance with accounting treatment for rate-regulated entities.

Other Income (Deductions). The following table provides the composition of significant items included in Other income (deductions) on the consolidated statements of income (thousands of dollars):

	Three Months Ended March 31		Twelve Months Ended March 31	
	2011	2010	2011	2010
Change in COLI policies	\$ 2,200	\$ 1,490	\$ 10,480	\$ 11,630
Interest income	92	21	265	148
Pipe replacement costs	(886)	(1,570)	(4,339)	(3,881)
Miscellaneous income and (expense)	(1,684)	(464)	(2,311)	(71)
Total other income (deductions)	\$ (278)	\$ (523)	\$ 4,095	\$ 7,826

Reflected in the table above is the change in cash surrender values of company-owned life insurance (COLI) policies (including net death benefits recognized). These life insurance policies on members of management and other key employees are used by Southwest to indemnify itself against the loss of talent, expertise, and knowledge, as well as to provide indirect funding for certain nonqualified benefit plans. Current tax

Edgar Filing: SOUTHWEST GAS CORP - Form 10-Q

regulations provide for tax-free treatment of life insurance (death benefit) proceeds. Therefore, the change in the cash surrender value components of COLI policies, as they progress toward the ultimate death benefits, is also recorded without tax consequences.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Reclassifications. A reclassification between two miscellaneous operating cash flow categories was made to the prior year's financial information to present it on a basis comparable with the current year's presentation with no impact on net cash provided by operating activities.

Note 2 Components of Net Periodic Benefit Cost

Southwest has a noncontributory qualified retirement plan with defined benefits covering substantially all employees and a separate unfunded supplemental retirement plan (SERP) which is limited to officers. Southwest also provides postretirement benefits other than pensions (PBOP) to its qualified retirees for health care, dental, and life insurance benefits.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Note 4 Derivatives and Fair Value Measurements

Derivatives. In managing its natural gas supply portfolios, Southwest has historically entered into fixed- and variable-price contracts, which qualify as derivatives. Additionally, Southwest utilizes fixed-for-floating swap contracts (Swaps) to supplement its fixed-price contracts. The fixed-price contracts, firm commitments to purchase a fixed amount of gas in the future at a fixed price, qualify for the normal purchases and normal sales exception that is allowed for contracts that are probable of delivery in the normal course of business and are exempt from fair value reporting. The variable-price contracts have no significant market value. The Swaps are recorded at fair value.

The fixed-price contracts and Swaps are utilized by Southwest under its volatility mitigation programs to effectively fix the price on a portion (ranging from 25% to 50%, depending on the jurisdiction) of its natural gas supply portfolios. The maturities of the Swaps highly correlate to forecasted purchases of natural gas, during time frames ranging from April 2011 through October 2012. Under such contracts, Southwest pays the counterparty at a fixed rate and receives from the counterparty a floating rate per MMBtu (dekatherm) of natural gas. Only the net differential is actually paid or received. The differential is calculated based on the notional amounts under the contracts, which are detailed in the table below (thousands of dekatherms):

	March 31, 2011	December 31, 2010
Swaps contracts	16,657	14,207

Southwest does not utilize derivative financial instruments for speculative purposes, nor does it have trading operations.

Gains (losses) recognized in income for derivatives not designated as hedging instruments:

(Thousands of dollars)

Instrument	Location of Gain or (Loss) Recognized in Income on Derivative	Three Months Ended March 31		Twelve Months Ended March 31	
		2011	2010	2011	2010
Swaps	Net cost of gas sold	\$ 289	\$ (16,342)	\$ (11,059)	\$ (11,765)
Swaps	Net cost of gas sold	(289) *	16,342 *	11,059 *	11,765 *
Total		\$ -	\$ -	\$ -	\$ -

* Represents the impact of regulatory deferral accounting treatment under U.S. GAAP for rate-regulated entities.

In January 2010, Southwest entered into two forward starting interest rate swaps (FSIRS) to hedge the risk of interest rate variability during the period leading up to the planned issuance of fixed-rate debt to replace \$200 million of debt that matured in February 2011 and \$200 million maturing in May 2012. The counterparties to each agreement are four major banking institutions. The first FSIRS was a designated cash flow hedge and terminated in December 2010 concurrent with the related issuance of \$125 million 4.45% 10-year Senior Notes. The terms of the second FSIRS are as follows:

Notional amount	\$100 million
Fixed rate to be paid by Southwest	4.78%
Mandatory termination date (on or before)	March 20, 2012

Southwest previously designated the second FSIRS agreement as a cash flow hedge of forecasted future interest payments. At the inception of the hedge, the terms of the derivative were the same as a perfect hypothetical derivative; thus, there is an expectation that there will be no

Edgar Filing: SOUTHWEST GAS CORP - Form 10-Q

ineffectiveness, and that the effective portion of unrealized gains and losses on the FSIRS leading up to the forecasted debt issuance will be reported as a component of other comprehensive income. At termination, the final value will be reclassified from accumulated other comprehensive income into earnings over the term of the debt issuance, which is the same period the hedged forecasted transaction affects earnings. However, should conditions occur that indicate the existence of ineffectiveness (e.g., deterioration of counterparty creditworthiness, delay in the forecasted debt issuance, etc.), Southwest will measure ineffectiveness by comparing the change in fair value of the FSIRS with the change in fair value of a hypothetical swap (the hypothetical derivative method). Gains and losses due to ineffectiveness will be recognized immediately in earnings. At March 31, 2011, the remaining FSIRS continued to qualify as an effective hedge. There was no gain or (loss) reclassified from accumulated other comprehensive income (AOCI) into

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

income (effective portion) and no gain or (loss) recognized in income (ineffective portion) for the Company's remaining derivative designated as a hedging instrument. See **Note 6 Equity, Comprehensive Income, and Accumulated Other Comprehensive Income** for additional information on both FSIRS contracts.

Gains (losses) recognized in other comprehensive income for derivatives designated as cash flow hedging instruments:

(Thousands of dollars)

	Three Months Ended		Twelve Months Ended	
	March 31, 2011	March 31, 2010	March 31, 2011	March 31, 2010
Amount of gain (loss) on unrealized FSIRS recognized in other comprehensive income on derivative (effective portion)	\$ 671	\$ (987)	\$ (5,097)	\$ (987)
Amount of loss on realized FSIRS recognized in other comprehensive income on derivative	-	-	(11,691)	-
	\$ 671	\$ (987)	\$ (16,788)	\$ (987)

The following table sets forth the fair values of the Company's Swaps and FSIRS and their location in the balance sheets (thousands of dollars):

Fair values of derivatives not designated as hedging instruments:

March 31, 2011		Asset	Liability	
Instrument	Balance Sheet Location	Derivatives	Derivatives	Net Total
Swaps	Deferred charges and other assets	\$ 733	\$ (4)	\$ 729
Swaps	Other current liabilities	902	(8,189)	(7,287)
Total		\$ 1,635	\$ (8,193)	\$ (6,558)

December 31, 2010		Asset	Liability	
Instrument	Balance Sheet Location	Derivatives	Derivatives	Net Total
Swaps	Deferred charges and other assets	\$ 656	\$ -	\$ 656
Swaps	Other current liabilities	65	(11,547)	(11,482)
Total		\$ 721	\$ (11,547)	\$ (10,826)

Fair values of derivatives designated as hedging instruments:

March 31, 2011		Asset	Liability	
Instrument	Balance Sheet Location	Derivatives	Derivatives	Net Total
FSIRS	Other current liabilities	\$ -	\$ (6,084)	\$ (6,084)

December 31, 2010		Asset	Liability	
Instrument	Balance Sheet Location	Derivatives	Derivatives	Net Total
FSIRS	Other deferred credits	\$ -	\$ (6,755)	\$ (6,755)

The estimated fair values of the natural gas derivatives were determined using future natural gas index prices (as more fully described below). The Company has master netting arrangements with each counterparty that provide for the net settlement of all contracts through a single

Edgar Filing: SOUTHWEST GAS CORP - Form 10-Q

payment. As applicable, the Company has elected to reflect the net amounts in its balance sheets.

Pursuant to regulatory deferral accounting treatment for rate-regulated entities, Southwest records the unrealized gains and losses in fair value of the Swaps as a regulatory asset and/or liability. When the Swaps settle, Southwest reverses any prior positions held and records the settled position as an increase or decrease in purchased gas under the related purchased gas adjustment (PGA) mechanism in determining its deferred PGA balances. Neither changes in the fair value of the Swaps nor settled amounts have a direct effect on earnings or other comprehensive income.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

The following table shows the amounts Southwest paid to and received from counterparties for settlements of matured Swaps.

(Thousands of dollars)	Three Months Ended March 31, 2011	Twelve Months Ended March 31, 2011
Paid to counterparties	\$ 3,979	\$ 17,833

No amounts were received from counterparties for settlements of matured Swaps for the three months and twelve months ended March 31, 2011.

The following table details the regulatory assets/(liabilities) offsetting the amounts in the balance sheets (thousands of dollars).

March 31, 2011		
Instrument	Balance Sheet Location	Net Total
Swaps	Other deferred credits	\$ (729)
Swaps	Prepays and other current assets	7,287

December 31, 2010		
Instrument	Balance Sheet Location	Net Total
Swaps	Other deferred credits	\$ (656)
Swaps	Prepays and other current assets	11,482

Fair Value Measurements. The estimated fair values of Southwest's Swaps were determined at March 31, 2011 and December 31, 2010 using NYMEX futures settlement prices for delivery of natural gas at Henry Hub adjusted by the price of NYMEX ClearPort basis Swaps, which reflect the difference between the price of natural gas at a given delivery basin and the Henry Hub pricing points. These Level 2 inputs are observable in the marketplace throughout the full term of the Swaps, but have been credit-risk adjusted with no significant impact to the overall fair value measure.

The estimated fair values of Southwest's FSIRS were determined using a discounted cash flow model that utilizes forward interest rate curves. The inputs to the model are the terms of the FSIRS. These Level 2 inputs are observable in the marketplace throughout the full term of the FSIRS, but have been credit-risk adjusted with no significant impact to the overall fair value measure.

The following table sets forth, by level within the three-level fair value hierarchy that ranks the inputs used to measure fair value by their reliability, the Company's financial assets and liabilities that were accounted for at fair value:

Level 2 - Significant other observable inputs

(Thousands of dollars)	March 31, 2011	December 31, 2010
Assets at fair value:		
Deferred charges and other assets - Swaps	\$ 729	\$ 656
Liabilities at fair value:		
Other current liabilities - Swaps	(7,287)	(11,482)
Other current liabilities - FSIRS	(6,084)	-
Other deferred credits - FSIRS	-	(6,755)
Net Assets (Liabilities)	\$ (12,642)	\$ (17,581)

No financial assets or liabilities accounted for at fair value fell within Level 1 or Level 3 of the fair value hierarchy.

Note 5 Long-Term Debt

Carrying amounts of the Company's long-term debt and their related estimated fair values as of March 31, 2011 and December 31, 2010 are disclosed in the following table. The fair values of the revolving credit facility and the variable-rate Industrial Development Revenue Bonds (IDRBs) approximate carrying value. Market values for the debentures, fixed-rate IDRBs, and other indebtedness were determined based on dealer quotes using trading records for March 31, 2011 and December 31, 2010, as applicable, and other secondary sources which are customarily consulted for data of this kind.

* Net actuarial gain (loss), less amortization of unamortized benefit plan cost

** FSIRS unrealized gain of \$416,000 recognized in other comprehensive income plus the portion of the previous FSIRS realized loss that was reclassified to net income in the current period (\$181,000).

Approximately \$741,000 of realized/unrealized losses (net of tax) related to the FSIRS reported in AOCI at March 31, 2011 will be reclassified into expense within the next 12 months as the related interest payments on long-term debt occur.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Southwest Gas Corporation and its subsidiaries (the Company) consist of two business segments: natural gas operations (Southwest or the natural gas operations segment) and construction services.

Southwest is engaged in the business of purchasing, distributing, and transporting natural gas in portions of Arizona, Nevada, and California. Southwest is the largest distributor in Arizona, selling and transporting natural gas in most of central and southern Arizona, including the Phoenix and Tucson metropolitan areas. Southwest is also the largest distributor of natural gas in Nevada, serving the Las Vegas metropolitan area and northern Nevada. In addition, Southwest distributes and transports natural gas in portions of California, including the Lake Tahoe area and the high desert and mountain areas in San Bernardino County.

On a seasonally adjusted basis as of March 31, 2011, Southwest had 1,844,000 residential, commercial, industrial, and other natural gas customers, of which 996,000 customers were located in Arizona, 665,000 in Nevada, and 183,000 in California. Residential and commercial customers represented over 99% of the total customer base. During the twelve months ended March 31, 2011, 54% of operating margin was earned in Arizona, 35% in Nevada, and 11% in California. During this same period, Southwest earned 86% of its operating margin from residential and small commercial customers, 4% from other sales customers, and 10% from transportation customers. These general patterns are expected to remain materially consistent for the foreseeable future.

Southwest recognizes operating revenues from the distribution and transportation of natural gas (and related services) to customers. Operating margin is the measure of gas operating revenues less the net cost of gas sold. Management uses operating margin as a main benchmark in comparing operating results from period to period. The principal factors affecting operating margin are general rate relief, weather, conservation and efficiencies, and customer growth. Of these, weather is the primary reason for volatility in margin. Variances in temperatures from normal levels, primarily in Arizona, can have a significant impact on the margin and associated net income of the Company. A decoupled rate structure designed to mitigate the impact of weather variability as well as conservation on margin is utilized in the Nevada service territories. Weather impacts and conservation are also offset by the margin tracking mechanism in Southwest's California service territories.

NPL Construction Co. (NPL or the construction services segment), a wholly owned subsidiary, is a full-service underground piping contractor that provides utility companies with trenching and installation, replacement, and maintenance services for energy distribution systems. NPL operates in 18 major markets nationwide. Construction activity is cyclical and can be significantly impacted by changes in general and local economic conditions, including the housing market, interest rates, employment levels, job growth, the equipment resale market, pipe replacement programs of utilities, and local and federal tax rates. Generally, revenues and profits are lowest during the first quarter of the year due to less favorable winter weather conditions. Operating results typically improve as more favorable weather conditions occur during the summer and fall months.

This Management's Discussion and Analysis (MD&A) of Financial Condition and Results of Operations should be read in conjunction with the consolidated financial statements and the notes thereto, as well as the MD&A, included in the 2010 Annual Report to Shareholders, which is incorporated by reference into the 2010 Form 10-K.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Executive Summary

The items discussed in this Executive Summary are intended to provide an overview of the results of the Company's operations. As needed, certain items are covered in greater detail in later sections of management's discussion and analysis. As reflected in the table below, the natural gas operations segment accounted for an average of 90% of twelve-month-to-date consolidated net income over the past two years. As such, management's discussion and analysis is primarily focused on that segment. Natural gas sales are seasonal, peaking during the winter months; therefore, results of operations for interim periods are not necessarily indicative of the results for a full year.

Summary Operating Results

	Period Ended March 31,			
	Three Months		Twelve Months	
	2011	2010	2011	2010
	(In thousands, except per share amounts)			
<u>Contribution to net income</u>				
Natural gas operations	\$ 68,015	\$ 65,317	\$ 94,080	\$ 94,885
Construction services	534	(669)	13,698	7,264
Net income	\$ 68,549	\$ 64,648	\$ 107,778	\$ 102,149
<u>Average number of common shares outstanding</u>				
	45,763	45,221	45,538	44,948
<u>Basic earnings per share</u>				
Consolidated	\$ 1.50	\$ 1.43	\$ 2.37	\$ 2.27
<u>Natural Gas Operations</u>				
Operating margin	\$ 270,047	\$ 262,254	\$ 783,525	\$ 771,171

Consolidated results for the first quarter of 2011 improved compared to the same period in 2010. The improvement primarily resulted from increased gas segment operating margin and lower financing costs, partially offset by increased operating costs.

1st Quarter 2011 Overview

Natural gas operations highlights include the following:

Operating margin increased approximately \$8 million compared to the prior-year quarter primarily due to weather (\$6 million), rate relief in California (\$1 million), and customer growth (\$1 million)

Net financing costs declined \$2.1 million between quarters

Quarterly dividend increased from 25 cents to 26.5 cents per share, effective with the June 2011 payment

Standard & Poor's upgraded the Company's credit rating from BBB to BBB+ in April 2011

Liquidity position remains strong

Construction Services highlights include the following:

Revenues increased 38% compared to the prior-year quarter

Contribution to consolidated net income improved \$1.2 million between quarters

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Weather. The rate structures in each of Southwest's three states provide varying levels of protection from risks that drive operating margin volatility, particularly weather risk and conservation efforts. Southwest's exposure to these risks on operating margin is largely limited to its Arizona operating areas as both Nevada and California operations are now under decoupled rate structures. During the first quarters of both 2010 and 2011, overall Arizona weather was relatively normal; however, some unusually cold weather in early February 2011 provided an incremental \$6 million of operating margin compared to the first quarter of 2010.

Arizona Rate Proceedings. In December 2010, the Arizona Corporation Commission (ACC) issued a Policy Statement which allows utilities to file proposals for alternative mechanisms, including revenue-per-customer decoupling, in their next general rate case to address the financial disincentives to utilities of promoting energy efficiency. In anticipation of the Policy Statement, the Company's recent Arizona rate case filing requested a rate structure to decouple recovery of the Company's fixed costs from fluctuations in usage, both higher and lower, to enable the Company to aggressively advocate increased energy efficiency by its customers by eliminating the existing financial disincentive. The Arizona rate case is progressing consistent with the procedural schedule established by the Administrative Law Judge (ALJ). For more information see the **Rates and Regulatory Proceedings** discussion.

Customer Growth. Southwest completed 15,000 first-time meter sets over the last twelve months. These meter sets led to 14,000 net additional active customers. Southwest continues to project net customer growth of 1% or less for 2011.

Credit Rating Upgrade. In April 2011, Standard & Poor's Ratings Services (S&P) upgraded the Company's unsecured long-term debt ratings from BBB (with a positive outlook) to BBB+ (with a stable outlook). S&P cited the Company's improved financial results and stable financial metrics. S&P debt ratings range from AAA (highest rating possible) to D (obligation is in default). The S&P rating of BBB+ indicates the issuer of the debt is regarded as having an adequate capacity to pay interest and repay principal.

Liquidity. Southwest believes its liquidity position remains strong. Southwest has a \$300 million credit facility maturing in May 2012, \$150 million of which is designated for working capital needs. The facility is provided through a consortium of eight major banking institutions. The facility was not used during the first quarter of 2011 and there was no balance outstanding at March 31, 2011, leaving the entire \$300 million available for long-term and working capital needs. The lack of usage was primarily due to existing cash reserves and natural gas prices that were relatively stable. The current slowdown in housing construction has also allowed Southwest to fund construction expenditures primarily with internally generated cash.

Refinancing. In February 2011, the Company repaid the matured 8.375% \$200 million Notes using the entire proceeds (\$125 million) of the 6.1% Senior Notes (issued in February 2011) and \$75 million of the total \$125 million proceeds of 4.45% Senior Notes (issued in December 2010). The Company will reflect future interest expense savings due to lower interest rates obtained on the new notes.

SOUTHWEST GAS CORPORATION

Form 10-Q

Results of Natural Gas Operations

Quarterly Analysis

	Three Months Ended	
	2011	2010
	March 31,	
	(Thousands of dollars)	
Gas operating revenues	\$ 553,853	\$ 614,509
Net cost of gas sold	283,806	352,255
Operating margin	270,047	262,254
Operations and maintenance expense	90,950	86,705
Depreciation and amortization	43,881	42,696
Taxes other than income taxes	9,869	9,766
Operating income	125,347	123,087
Other income (deductions)	(236)	(531)
Net interest deductions	17,828	18,024
Net interest deductions on subordinated debentures	-	1,912
Income before income taxes	107,283	102,620
Income tax expense (benefit)	39,268	37,303
Contribution to consolidated net income	\$ 68,015	\$ 65,317

Contribution to consolidated net income from natural gas operations improved by \$2.7 million in the first quarter of 2011 compared to the same period a year ago. The improvement was primarily due to an increase in operating margin and a decrease in financing costs, partially offset by higher operating expenses.

Operating margin increased \$8 million in the first quarter of 2011 compared to the first quarter of 2010. Differences in heating demand, caused primarily by weather variations, provided \$6 million of the operating margin increase. While overall temperatures in both quarters were relatively normal, some unusually cold weather occurred in Arizona in early February 2011, resulting in the incremental operating margin. Rate relief in California provided \$1 million of the operating margin increase. New customers contributed an incremental \$1 million in operating margin as 14,000 net new customers were added during the last twelve months.

Operations and maintenance expense increased \$4.2 million, or 5%, between quarters primarily due to increases in employee-related costs and approximately \$1 million of costs associated with restoring service to 19,000 Arizona customers in early February 2011, following an outage due to extreme weather conditions.

Depreciation expense increased \$1.2 million, or 3%, as a result of additional plant in service. Average gas plant in service for the current period increased \$150 million, or 3%, compared to the corresponding period a year ago.

Net financing costs decreased \$2.1 million between periods primarily due to the redemption of \$100 million of Subordinated Debentures in March 2010.

Operating income	213,724	216,006
Other income (deductions)	4,311	7,845
Net interest deductions	74,917	73,933
Net interest deductions on subordinated debentures	-	7,710
Income before income taxes	143,118	142,208
Income tax expense	49,038	47,323
Contribution to consolidated net income	\$ 94,080	\$ 94,885

Contribution to consolidated net income from natural gas operations decreased by \$805,000 in the current twelve-month period as compared to the corresponding period a year ago. The decrease in contribution was a result of higher operating expenses and a decline in other income, partially offset by increased operating margin and reduced financing costs.

Operating margin increased \$12 million between periods. Rate relief provided \$9 million of the operating margin increase, consisting of \$6 million in Nevada and \$3 million in California. Differences in heating demand caused primarily by weather variations between periods accounted for \$1 million in incremental operating margin. Customer growth contributed \$2 million in operating margin.

Operations and maintenance expense increased \$8.2 million, or 2%, primarily due to higher general costs and employee-related benefit costs including pension expense. The increases were mitigated by cost containment efforts (including lower staffing levels) and a decrease in uncollectible expense, partially due to the impact of a tracking mechanism in Nevada for the gas-cost portion of uncollectible accounts.

Depreciation expense increased \$4.4 million, or 3%, as a result of additional plant in service. The increase was mitigated by lower depreciation rates in the Nevada rate jurisdictions, effective June 2009. Average gas plant in service for the current period increased \$138 million, or 3%, compared to the corresponding period a year ago. This was attributable to reinforcement work, franchise requirements, routine pipe replacement activities and new business.

Other income, which principally includes returns on COLI policies and non-utility expenses, declined \$3.5 million between the twelve-month periods of 2011 and 2010. The current period includes \$10.5 million of COLI cash surrender value increases compared to \$11.6 million of cash surrender value increases in the prior-year period. COLI income in both periods was very high due to strong equity market returns on investments underlying the policies.

Net financing costs decreased \$6.7 million between the twelve-month periods of 2011 and 2010 primarily due to the redemption of the Subordinated Debentures in March 2010.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Results of Construction Services

Quarter. Contribution to consolidated net income from construction services for the three months ended March 31, 2011 increased \$1.2 million compared to the same period of 2010.

Revenues increased \$20.3 million, a 38% improvement, when compared to the same period of 2010. Revenue from replacement construction continues to be strong. During the quarter, revenue from bid projects increased and offset revenue from new construction that remained at low levels. Construction expenses increased \$18 million. Gains on sale of equipment were \$885,000 and \$232,000 for the first quarters of 2011 and 2010, respectively.

Twelve Months-to-Date. The contribution to consolidated net income from construction services for the twelve-month period ended March 31, 2011 increased \$6.4 million compared to the same period of 2010.

Revenues increased \$60.3 million due primarily to an increase in the volume of replacement work. Construction expenses increased \$50.8 million between the twelve-month periods due primarily to the increase in replacement construction work, while depreciation expense declined \$2.1 million due to the timing of equipment purchases. Gains on sale of equipment were \$2.2 million and \$2.5 million for the twelve-month periods of 2011 and 2010, respectively.

NPL s revenues and operating profits are influenced by weather, customer requirements, mix of work, local economic conditions, bidding results, the equipment resale market, and the credit market. Typically, revenues and profit are lowest during the first quarter of the year due to unfavorable winter weather conditions. Operating results typically improve as more favorable weather conditions occur during the summer and fall months.

Rates and Regulatory Proceedings

Arizona Energy Efficiency and Decoupling Proceeding. In August 2010, the ACC issued a Notice of Proposed Rulemaking on Gas Energy Efficiency, which adopted an energy efficiency requirement for Arizona s gas utilities, including Southwest, to achieve cumulative annual energy savings of 6% by December 2020. In October 2010, the Chairman of the ACC issued a draft Policy Statement, which would allow utilities to file proposals for alternative mechanisms including revenue-per-customer decoupling, in connection with a general rate case to address the financial disincentives to utilities of promoting energy efficiency. The Policy Statement was approved by the ACC in December 2010.

Arizona General Rate Case. Southwest filed a general rate application with the ACC in November 2010 requesting an increase in authorized annual operating revenues of \$73.2 million, or 9.26%, to reflect increased operating costs, investments in infrastructure, and costs of capital, as well as margin attrition due to decreased average usage by customers. The application requests an overall rate of return of 9.73% on original cost rate base of \$1.074 billion, an 11% return on common equity, and a capital structure utilizing 52% common equity.

The rate case filing also requested a rate structure to decouple recovery of the Company s fixed costs from fluctuations in usage, both higher and lower, and enable the Company to aggressively advocate for increased energy efficiency by its customers. The filed structure anticipated the approval of the Policy Statement discussed in the *Arizona Energy Efficiency and Decoupling Proceeding* section above. The proposed mechanism, referred to as the Energy Efficiency Enabling Provision (EEEP), is a revenue-per-customer decoupling mechanism designed to eliminate the link between volumetric sales and revenues that currently exists with traditional rate designs, such that the existing financial disincentive associated with the Company s pursuit of cost effective energy efficiency is eliminated. This will allow management to focus on customers and to concentrate its attention on the cost of providing service. The pursuit of increased energy efficiency by customers is supported by the requested approval of a detailed energy efficiency and renewable energy resource plan. The rate case is progressing consistent with the procedural schedule established by the ALJ. Intervenor testimony is due in June and a decision by the ACC is expected in late 2011 or early 2012.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

PGA Filings

The rate schedules in all of Southwest's service territories contain provisions that permit adjustments to rates as the cost of purchased gas changes. These deferred energy provisions and purchased gas adjustment clauses are collectively referred to as PGA clauses. Differences between gas costs recovered from customers and amounts paid for gas by Southwest result in over- and under-collections. At March 31, 2011, over-collections in all service territories resulted in a liability of \$90.8 million on the Company's balance sheet. Filings to change rates in accordance with PGA clauses are subject to audit by state regulatory commission staffs. PGA changes impact cash flows but have no direct impact on profit margin. However, gas cost deferrals and recoveries can impact comparisons between periods of individual income statement components. These include Gas operating revenues, Net cost of gas sold, Net interest deductions, and Other income (deductions).

As of March 31, 2011, December 31, 2010, and March 31, 2010, Southwest had the following outstanding PGA balances receivable/(payable) (millions of dollars):

	March 31, 2011	December 31, 2010	March 31, 2010
Arizona	\$ (29.7)	\$ (45.2)	\$ (30.9)
Northern Nevada	(11.5)	(8.4)	(5.5)
Southern Nevada	(49.5)	(69.8)	(53.1)
California	(0.1)	0.4	(3.8)
	\$ (90.8)	\$ (123.0)	\$ (93.3)

Capital Resources and Liquidity

Cash on hand and cash flows from operations have generally been sufficient over the past two years to provide for net investing activities (primarily construction expenditures and property additions). During the past two years, the Company has been able to use cash inflows to reduce the net amount of debt outstanding. The Company's capitalization strategy is to maintain an appropriate balance of equity and debt.

To facilitate future financings, the Company has a universal shelf registration statement providing for the issuance and sale of registered securities from time to time, which may consist of secured debt, unsecured debt, preferred stock, or common stock. The number and dollar amount of securities issued under the universal shelf registration statement, which was filed with the SEC and automatically declared effective in December 2008, will be determined at the time of the offerings, if any, and presented in the applicable prospectuses.

Cash Flows

Operating Cash Flows. Cash flows provided by consolidated operating activities decreased \$31.8 million in the first quarter of 2011 as compared to the same period in 2010. The primary drivers of the change were temporary fluctuations in working capital components partially offset by an increase in net income between periods.

Investing Cash Flows. Net cash used in consolidated investing activities increased \$19.4 million in the first quarter of 2011 as compared to the same period in 2010. The increase was primarily due to additional construction expenditures, including routine and accelerated pipe replacement (to take advantage of bonus depreciation tax incentives), and equipment purchases by NPL due to increased replacement construction work of its customers.

Financing Cash Flows. Net cash used in consolidated financing activities decreased \$69.8 million during the first quarter of 2011 as compared to the same period in 2010 primarily due to the issuance of new debt (\$125 million 6.1% Senior Notes), partially offset by debt repayments including the \$200 million 8.375% Notes repaid in February 2011. Dividends paid increased in the first quarter of 2011 as compared to 2010 as a result of a quarterly dividend increase and an increase in the number of shares outstanding.

The capital requirements and resources of the Company generally are determined independently for the natural gas operations and construction services segments. Each business activity is generally responsible for securing its own financing sources. The capital requirements and resources of the construction services segment are not material to the overall capital requirements and resources of the Company.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Gas Segment Construction Expenditures, Debt Maturities, and Financing

During the twelve-month period ended March 31, 2011, construction expenditures for the natural gas operations segment were \$191 million. The majority of these expenditures represented costs associated with routine and accelerated replacement of existing transmission, distribution, and general plant (see also *Bonus Depreciation* below). Cash flows from operating activities of Southwest were \$307 million which provided sufficient funding for construction expenditures and dividend requirements of the natural gas operations segment.

Southwest estimates natural gas segment construction expenditures during the three-year period ending December 31, 2013 will be approximately \$680 million (including \$110 million of accelerated expenditures). During the three-year period, cash flows from operating activities of Southwest (including bonus depreciation benefits) are expected to provide approximately 80% of the gas operations total construction expenditures and dividend requirements. During the three-year period, the Company expects to raise approximately \$15 million from its various common stock programs. Any cash requirements not met by operating activities are expected to be provided by cash on hand, existing credit facilities and/or other external financing sources. The timing, types, and amounts of these additional external financings will be dependent on a number of factors, including conditions in the capital markets, timing and amounts of rate relief, growth levels in Southwest service areas, and earnings. These external financings may include the issuance of both debt and equity securities, bank and other short-term borrowings, and other forms of financing.

In December 2010, the Company issued \$125 million in 4.45% Senior Notes, due December 2020 at a discount of 0.182%. A portion of the net proceeds was used to pay down borrowings under the credit facility. In February 2011, the Company used approximately \$75 million of the remaining net proceeds in connection with its repayment of the 8.375% \$200 million Notes that matured in February 2011. The remaining proceeds were used for general corporate purposes.

In February 2011, the Company issued \$125 million of 6.1% Senior Notes to certain institutional investors pursuant to a November 2010 note purchase agreement. The Senior Notes are unsecured and unsubordinated obligations of the Company, due in February 2041. Funds from the issuance were used to partially repay the 8.375% \$200 million Notes that matured in February 2011.

Southwest also has \$200 million of long-term debt maturing in May 2012 and plans to fund that obligation by issuing \$200 million of debentures by the maturity date. In connection with the planned 2012 debt issuance, the Company, in January 2010, entered into a forward-starting interest rate swap (FSIRS) agreement to partially hedge the risk of interest rate variability during the period leading up to the planned issuance. See **Note 4 Derivatives and Fair Value Measurements** for more information on the FSIRS.

During the quarter ended March 31, 2011, the Company issued shares of common stock through the Stock Incentive Plan, raising approximately \$4 million.

Bonus Depreciation. As a result of two tax acts signed into law in 2010, bonus tax depreciation of 100% is available for qualified property acquired or constructed and placed in service from September 9, 2010 through December 31, 2011 and 50% bonus tax depreciation is available for qualified property acquired or constructed and placed in service from January 1, 2012 through December 31, 2012. Based on forecasted qualifying construction expenditures, Southwest estimates the bonus depreciation provisions of the two acts will defer the payment of approximately \$55 million and \$25 million of federal income taxes during 2011 and 2012, respectively.

Dividend Policy

The Company has a common stock dividend policy which states that common stock dividends will be paid at a prudent level that is within the normal dividend payout range for its respective businesses, and that the dividend will be established at a level considered sustainable in order to minimize business risk and maintain a strong capital structure throughout all economic cycles. In February 2011, the Board of Directors increased the quarterly dividend payout from 25 cents to 26.5 cents per share, effective with the June 2011 payment.

SOUTHWEST GAS CORPORATION
March 31, 2011

Form 10-Q

Liquidity

Liquidity refers to the ability of an enterprise to generate sufficient amounts of cash through its operating activities and external financing to meet its cash requirements. Several general factors (some of which are out of the control of the Company) that could significantly affect liquidity in future years include: variability of natural gas prices, changes in the ratemaking policies of regulatory commissions, regulatory lag, customer growth in the natural gas segment's service territories, Southwest's ability to access and obtain capital from external sources, interest rates, changes in income tax laws, pension funding requirements, inflation, and the level of Company earnings. Natural gas prices and related gas cost recovery rates have historically had the most significant impact on Company liquidity.

On an interim basis, Southwest generally defers over- or under-collections of gas costs to PGA balancing accounts. In addition, Southwest uses this mechanism to either refund amounts over-collected or recoup amounts under-collected as compared to the price paid for natural gas during the period since the last PGA rate change went into effect. At March 31, 2011, the combined balance in the PGA accounts totaled an over-collection of \$90.8 million. See **PGA Filings** for more information on recent regulatory filings.

The Company has a \$300 million credit facility that expires in May 2012. Southwest has designated \$150 million of the \$300 million facility as long-term debt and the remaining \$150 million for working capital purposes. At March 31, 2011, no borrowings were outstanding on either the long-term or short-term portion of the credit facility and the Company had \$108 million of cash on hand. Neither the short-term nor long-term portion of the facility was used during the first quarter of 2011. The credit facility can be used as necessary to meet liquidity requirements, including temporarily financing under-collected PGA balances, if any, or meeting the refund needs of over-collected balances. This credit facility has been, and is expected to continue to be, adequate for Southwest's working capital needs outside of funds raised through operations and other types of external financing. Management believes the Company currently has a solid liquidity position.

The following table sets forth the ratios of earnings to fixed charges for the Company. Due to the seasonal nature of the Company's business, these ratios are computed on a twelve-month basis:

	For the Twelve Months Ended	
	March 31, 2011	December 31, 2010
Ratio of earnings to fixed charges	3.00	2.87

Earnings are defined as the sum of pretax income plus fixed charges. Fixed charges consist of all interest expense including capitalized interest, one-third of rent expense (which approximates the interest component of such expense), and net amortized debt costs.

Company-Owned Life Insurance (COLI). Southwest has life insurance policies on members of management and other key employees to indemnify itself against the loss of talent, expertise, and knowledge, as well as to provide indirect funding for certain nonqualified benefit plans. The COLI policies have a combined net death benefit value of approximately \$217 million at March 31, 2011. The net cash surrender value of these policies (which is the cash amount the Company would receive if it voluntarily terminated the policies) is approximately \$74 million at March 31, 2011 and is included in the caption "Other property and investments" on the balance sheet.

Forward-Looking Statements

This quarterly report contains statements which constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (Reform Act). All statements other than statements of historical fact included or incorporated by reference in this quarterly report are forward-looking statements, including, without limitation, statements regarding the Company's plans, objectives, goals, projections, strategies, future events or performance, and underlying assumptions. The words may, will, should, could, expect, plan, anticipate, estimate, predict, continue, forecast, and similar words and expressions are generally used and intended to identify forward-looking statements. For example, statements regarding operating margin patterns, customer growth, the composition of our customer base, price volatility, seasonal patterns, the

SOUTHWEST GAS CORPORATION

Form 10-Q

Company's COLI strategy, timing of improvements in the housing market, amount and timing for completion of estimated future construction expenditures, forecasted operating cash flows and results of operations, funding sources of cash requirements, sufficiency of working capital, bank lending practices, the Company's views regarding its liquidity position, ability to raise funds and receive external financing, the amount and form of any such financing, future financing cost savings, plans to fund maturing obligations, the effectiveness of the forward-starting interest rate swap agreement in hedging against changing interest rates, liquidity, certain benefits of tax acts, statements regarding future gas prices, gas purchase contracts and derivative financial interests, the impact of certain legal proceedings, and the timing and results of future rate hearings and approvals are forward-looking statements. All forward-looking statements are intended to be subject to the safe harbor protection provided by the Reform Act.

A number of important factors affecting the business and financial results of the Company could cause actual results to differ materially from those stated in the forward-looking statements. These factors include, but are not limited to, the impact of weather variations on customer usage, customer growth rates, conditions in the housing market, the ability to recover costs through PGA mechanisms, the effects of regulation/deregulation, the timing and amount of rate relief, changes in rate design, changes in gas procurement practices, changes in capital requirements and funding, the impact of conditions in the capital markets on financing costs, changes in construction expenditures and financing, renewal of franchises, easements and rights-of-way, changes in operations and maintenance expenses, effects of pension expense forecasts, accounting changes, future liability claims, changes in pipeline capacity for the transportation of gas and related costs, acquisitions and management's plans related thereto, competition, and the ability to raise capital in external financings. In addition, the Company can provide no assurance that its discussions regarding certain trends relating to its financing and operations and maintenance expenses will continue in future periods. For additional information on the risks associated with the Company's business, see **Item 1A. Risk Factors** and **Item 7A. Quantitative and Qualitative Disclosures About Market Risk** in the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

All forward-looking statements in this quarterly report are made as of the date hereof, based on information available to the Company as of the date hereof, and the Company assumes no obligation to update or revise any of its forward-looking statements even if experience or future changes show that the indicated results or events will not be realized. **We caution you not to unduly rely on any forward-looking statement(s).**

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See **Item 7A. Quantitative and Qualitative Disclosures about Market Risk** in the Company's 2010 Annual Report on Form 10-K filed with the SEC. No material changes have occurred related to the Company's disclosures about market risk.

ITEM 4. CONTROLS AND PROCEDURES

The Company has established disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to provide reasonable assurance that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and to provide reasonable assurance that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and benefits of controls must be considered relative to their costs. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or management override of the control. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Based on the most recent evaluation, as of March 31, 2011, management of the Company, including the Chief Executive Officer and Chief Financial Officer, believe the Company's disclosure controls and procedures are effective at attaining the level of reasonable assurance noted above.

There have been no changes in the Company's internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the first quarter of 2011 that have materially affected, or are likely to materially affect, the Company's internal controls over financial reporting.
