Table of Contents**Part I****Item 1. Business (All dollars in thousands)****General**

Isabella Bank Corporation (the Corporation) is a registered financial services holding company incorporated in September 1988 under Michigan law. The Corporation has three subsidiaries: Isabella Bank (the Bank), IB&T Employee Leasing, LLC, and Financial Group Information Services. Isabella Bank has 25 banking offices located throughout Clare, Gratiot, Isabella, Mecosta, Midland, Montcalm, and Saginaw counties. The area includes significant agricultural production, light manufacturing, retail, gaming and tourism, and five colleges and universities. IB&T Employee Leasing, LLC is an employee leasing company. Financial Group Information Services renders computer services to the Corporation and its subsidiaries. All employees of the Corporation are employed by IB&T Employee Leasing, LLC which leases employees to the Corporation and each of its subsidiaries. The principal city in which the Corporation operates is Mount Pleasant, Michigan which has a population of approximately 26,000.

The Corporation's reportable segments are based on legal entities that account for at least 10% of net operating results. Retail banking operations for 2011, 2010, and 2009 represent approximately 90% or greater of the Corporation's total assets and operating results. As such, the Corporation has only one reportable segment.

Competition

The Corporation competes with other commercial banks, many of which are subsidiaries of other bank holding companies, savings and loan associations, mortgage brokers, finance companies, credit unions, and retail brokerage firms. The Bank is a community bank with a focus on providing high quality, personalized service at a fair price. The Bank offers a broad array of banking services to businesses, institutions, and individuals. Deposit services offered include checking accounts, savings accounts, certificates of deposit, direct deposits, cash management services, mobile and internet banking, electronic bill pay services, and automated teller machines. Lending activities include loans made pursuant to commercial and agricultural operating and real estate purposes, residential real estate loans, and consumer loans. The Bank also offers full service trust and brokerage services.

Lending

The Corporation limits lending activities primarily to local markets and has not purchased any loans from the secondary market. The Corporation does not make loans to fund leveraged buyouts, has no foreign corporate or government loans, and has limited holdings of corporate debt securities. The general lending philosophy is to limit concentrations to individuals and business segments. The following table sets forth the composition of the Corporation's loan portfolio as of December 31, 2011:

	Amount	%
Commercial		
Commercial real estate	\$ 258,095	34.40%
Commercial other	107,619	14.34%
Total commercial	365,714	48.74%
Agricultural		
Agricultural real estate	44,683	5.96%
Agricultural other	29,962	3.99%
Total agricultural	74,645	9.95%
Residential mortgage		
Senior liens	217,601	29.00%
Junior liens	21,246	2.83%
Home equity lines of credit	39,513	5.27%

Edgar Filing: ISABELLA BANK CORP - Form 10-K

Total residential mortgage	278,360	37.10%
Consumer		
Secured	26,174	3.49%
Unsecured	5,398	0.72%
Total consumer	31,572	4.21%
Total	\$ 750,291	100.00%

Table of Contents

The Corporation grants commercial, agricultural, residential, and consumer loans to customers situated primarily in Clare, Gratiot, Isabella, Mecosta, Midland, Montcalm, and Saginaw counties in Michigan. The ability of the borrowers to honor their repayment obligations is often dependent upon the real estate, agricultural, light manufacturing, retail, gaming and tourism, higher education, and general economic conditions of this region. Substantially all of the consumer and residential mortgage loans are secured by various items of property, while commercial loans are secured primarily by real estate, business assets, and personal guarantees; a portion of loans are unsecured.

Loans that management has the intent and ability to hold in its portfolio are reported at their outstanding principal balance adjusted for any charge-offs, the allowance for loans losses, and any deferred fees or costs. Interest income on loans is accrued over the term of the loan based on the principal amount outstanding. Loan origination fees and certain direct loan origination costs are capitalized and recognized as a component of interest income over the term of the loan using the level yield method.

The accrual of interest on mortgage and commercial loans is typically discontinued at the time the loan is 90 days or more past due unless the credit is well-secured and in the process of collection. Consumer loans are typically charged off no later than 180 days past due. Past due status is based on contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

For loans that are placed on nonaccrual status or charged off, all interest accrued in the current calendar year, but not collected, is reversed against interest income while interest accrued in prior calendar years, but not collected, is charged against the allowance for loan losses. The interest on these loans is accounted for on the cash basis, until qualifying for return to accrual status. Loans are returned to accrual status after six months of continuous performance. For impaired loans not classified as nonaccrual, interest income continues to be accrued over the term of the loan based on the principal amount outstanding.

Commercial and agricultural loans include loans for commercial real estate, commercial operating loans, farmland and agricultural production, and state and political subdivisions. Repayment of these loans is often dependent upon the successful operation and management of a business; thus, these loans generally involve greater risk than other types of lending. The Corporation minimizes its risk by limiting the amount of loans to any one borrower to \$12,500. Borrowers with credit needs of more than \$12,500 are serviced through the use of loan participations with other commercial banks. Commercial and agricultural real estate loans generally require loan to value limits of less than 80%. Depending upon the type of loan, past credit history, and current operating results, the Corporation may require the borrower to pledge accounts receivable, inventory, and fixed assets. Personal guarantees are generally required from the owners of closely held corporations, partnerships, and sole proprietorships. In addition, the Corporation requires annual financial statements, prepares cash flow analyses, and reviews credit reports as deemed necessary.

The Corporation offers adjustable rate mortgages, fixed rate balloon mortgages, construction loans, and fixed rate mortgage loans which typically have amortization periods up to a maximum of 30 years. Fixed rate loans with an amortization of greater than 15 years are generally sold upon origination to the Federal Home Loan Mortgage Corporation. Fixed rate residential mortgage loans with an amortization of 15 years or less may be held in the Corporation's portfolio, held for future sale, or sold upon origination. Factors used in determining when to sell these mortgages include management's judgment about the direction of interest rates, the Corporation's need for fixed rate assets in the management of its interest rate sensitivity, and overall loan demand.

Lending policies generally limit the maximum loan to value ratio on residential mortgages to 95% of the lower of the appraised value of the property or the purchase price, with the condition that private mortgage insurance is required on loans with loan to value ratios in excess of 80%. Substantially all loans upon origination have a loan to value ratio of less than 80%. Underwriting criteria for residential real estate loans include: evaluation of the borrower's ability to make monthly payments, the value of the property securing the loan, ensuring the payment of principal, interest, taxes, and hazard insurance does not exceed 28% of a borrower's gross income, all debt

Table of Contents

servicing does not exceed 36% of income, acceptable credit reports, verification of employment, income, and financial information. Appraisals are performed by independent appraisers and reviewed internally. All mortgage loan requests are reviewed by a mortgage loan committee or through a secondary market automated underwriting system; loans in excess of \$400 require the approval of the Bank's Internal Loan Committee, Board of Directors, or the Board of Director's Loan Committee.

Consumer loans include automobile loans, secured and unsecured personal loans, and overdraft protection related loans. Loans are amortized generally for a period of up to 6 years. The underwriting emphasis is on a borrower's ability to pay rather than collateral value. No consumer loans are sold to the secondary market.

Supervision and Regulation

The Corporation is subject to supervision and regulation by the Securities and Exchange Commission (SEC) under the Securities Act of 1933 and the Securities Exchange Act of 1934 and by the Board of Governors of the Federal Reserve Bank System (the FRB) under the Bank Holding Company Act of 1956 as amended (BHC Act), the Financial Services Holding Company Act of 2000, and the Dodd-Frank Act of 2011 (the Dodd-Frank Act). A bank holding company and its subsidiaries are able to conduct only the business of commercial banking and activities closely related or incidental to commercial banking (see Regulation below).

Isabella Bank is chartered by the State of Michigan and is a member of the FRB. The Bank's deposits are insured by the Federal Deposit Insurance Corporation (FDIC) to the extent provided by law. The Bank is a member of the Federal Home Loan Bank of Indianapolis. The Bank is supervised and regulated by the Michigan Office of Financial and Insurance Regulation (OFIR), the FRB, and the Consumer Financial Protection Bureau (CFPB). For further discussion, see Regulation below.

Personnel

As of December 31, 2011, the Corporation and its subsidiaries had 352 full-time equivalent employees. The Corporation provides group life, health, accident, disability, and other insurance programs for employees as well as a number of other employee benefit programs. The Corporation believes its relationship with its employees to be good. None of the Corporation's workforce is subject to collective bargaining agreements.

Legal Proceedings

There are various claims and lawsuits in which the Corporation and its subsidiaries are periodically involved, such as claims to enforce liens, condemnation proceedings on making and servicing of real property loans, and other issues incidental to the Corporation's business. However, the Corporation and its subsidiaries are not involved in any material pending litigation.

AVAILABLE INFORMATION

The Corporation's SEC filings (including the Corporation's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Definitive Proxy Statements, Current Reports on Form 8-K and amendments to those reports) are available through the Bank's website (www.isabellabank.com). The Corporation will provide paper copies of its SEC reports free of charge upon request of a shareholder.

The SEC maintains an internet site (<http://www.sec.gov>) that contains reports, proxy and information statements and other information regarding the Corporation (CIK #0000842517) and other issuers.

Table of Contents

REGULATION

The earnings and growth of the banking industry and, therefore, the earnings of the Corporation and of the Bank are affected by the credit policies of monetary authorities, including the FRB. An important function of the FRB is to regulate the national supply of bank credit in order to combat recessions and curb inflationary pressures. Among the instruments of monetary policy used by the FRB to implement these objectives are open market operations in U.S. Treasury and U.S. Government Agency securities, changes in the discount rate on member bank borrowings, and changes in reserve requirements against member bank deposits. These methods are used in varying combinations to influence overall growth of bank loans, investments and deposits and may also affect interest rates charged on loans or paid for deposits. The monetary policies of the FRB have had a significant effect on the operating results of commercial banks and related financial service providers in the past and are expected to continue to do so in the future. The effect of such policies upon the future business and earnings of the Corporation cannot be predicted.

The Corporation

The Corporation, as a financial services holding company, is regulated under the BHC Act, and is subject to the supervision of the FRB. The Corporation is registered as a financial services holding company with the FRB and is required to file with the FRB an annual report and such additional information as the FRB requires. The FRB makes inspections and examinations of the Corporation and its subsidiaries.

Prior to March 13, 2000, a bank holding company generally was prohibited under the BHC Act from acquiring the beneficial ownership or control of more than 5% of the voting shares or substantially all the assets of any company, including a bank, without the FRB's prior approval. Also, prior to March 13, 2000, a bank holding company generally was limited to engaging in banking and such other activities as determined by the FRB to be closely related to banking.

Under the Gramm-Leach-Bliley Act of 1999 (GLB Act), beginning March 13, 2000, an eligible bank holding company was able to elect to become a financial holding company and thereafter affiliate with securities firms and insurance companies and engage in other activities that are financial in nature. The GLB Act defines financial in nature to include securities underwriting, dealing and market making; sponsoring mutual funds and investment companies; insurance underwriting and agency; merchant banking activities; activities that the FRB has determined to be closely related to banking; and other activities that the FRB, after consultation with the Secretary of the Treasury, determines by regulation or order to be financial in nature or incidental to a financial activity. No FRB approval is required for a financial holding company to acquire a company, other than a bank holding company, bank or savings association, engaged in activities that are financial in nature or incidental to activities that are financial in nature, as defined in the GLB Act or as determined by the FRB.

A bank holding company is eligible to become a financial holding company if each of its subsidiary banks and savings associations is well capitalized under the prompt corrective action provisions of the Federal Deposit Insurance Act (FDI Act), is well managed and has a rating under the Community Reinvestment Act (CRA) of satisfactory or better. If any bank or savings association subsidiary of a financial holding company ceases to be well capitalized or well managed, the FRB may require the financial holding company to divest the subsidiary. Alternatively, the financial holding company may elect to conform its activities to those permissible for bank holding companies that do not elect to become financial holding companies. If any bank or savings association subsidiary of a financial holding company receives a CRA rating of less than satisfactory, the financial holding company will be prohibited from engaging in new activities or acquiring companies other than bank holding companies, banks or savings associations.

The Corporation became a financial holding company effective March 13, 2000. It continues to maintain its status as a bank holding company for purposes of other FRB regulations.

Table of Contents

Under FRB policy, the Corporation is expected to act as a source of financial strength to its subsidiary Bank and to commit resources to support its subsidiaries. This support may be required at times when, in the absence of such FRB policy, the Corporation would not otherwise be required to provide it.

Under Michigan law, if the capital of a Michigan state chartered bank (such as the Bank) has become impaired by losses or otherwise, the Commissioner of the OFIR may require that the deficiency in capital be met by assessment upon the bank's shareholders pro rata on the amount of capital stock held by each, and if any such assessment is not paid by any shareholder within 30 days of the date of mailing of notice thereof to such shareholder, cause the sale of the stock of such shareholder to pay such assessment and the costs of sale of such stock.

Any capital loans by a bank holding company to any of its subsidiary banks are subordinate in right of payment to deposits and to certain other indebtedness of such subsidiary bank. In the event of a bank holding company's bankruptcy, any commitment by the bank holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to a priority of payment. This priority would apply to guarantees of capital plans under the Federal Deposit Insurance Corporation Improvement Act of 1991.

The Sarbanes-Oxley Act of 2002 (SOX) contains important requirements for public companies in the area of financial disclosure and corporate governance. In accordance with Section 302(a) of SOX, written certifications by the Corporation's principal executive, financial, and accounting officers are required. These certifications attest that the Corporation's quarterly and annual reports filed with the SEC do not contain any untrue statement of a material fact. See the Certifications filed as Exhibits 31 (a) and (b) to this Form 10-K for such certification of the financial statements and other information for this 2011 Form 10-K. The Corporation has also implemented a program designed to comply with Section 404 of SOX, which included the identification of significant processes and accounts, documentation of the design of control effectiveness over process and entity level controls, and testing of the operating effectiveness of key controls. See Item 9A, Controls and Procedures for the Corporation's evaluation of its disclosure controls and procedures.

Certain additional information concerning regulatory guidelines for capital adequacy and other regulatory matters is presented herein under the caption Capital on page 35 and in the notes to the consolidated financial statements Note 15 Commitments and Other Matters and Note 16 Minimum Regulatory Capital Requirements .

Isabella Bank

The Bank is subject to regulation and examination primarily by OFIR and is also subject to regulation and examination by the FRB.

The agencies and federal and state laws extensively regulate various aspects of the banking business including, among other things, permissible types and amounts of loans, investments and other activities, capital adequacy, branching, interest rates on loans and on deposits and the safety and soundness of banking practices.

The deposits of the Corporation are insured up to applicable limits by the Deposit Insurance Fund (DIF) of the FDIC and are subject to deposit insurance assessments to maintain the DIF. The FDIC utilizes a risk-based assessment system that assesses insurance premiums based upon a risk matrix that takes into account a bank's capital level and supervisory ratings.

Banking laws and regulations also restrict transactions by insured banks owned by a bank holding company, including loans to and certain purchases from the parent holding company, non bank and bank subsidiaries of the parent holding company, principal shareholders, officers, directors and their affiliates, and investments by the subsidiary bank in the shares or securities of the parent holding company (or any of the other non bank or bank affiliates), or acceptance of such shares or securities as collateral security for loans to any borrower.

The Bank is also subject to legal limitations on the frequency and amount of dividends that can be paid to the Corporation. For example, a Michigan state chartered bank may not declare a cash dividend or a dividend in kind except out of net profits then on hand after deducting all losses and bad debts, and then only if it will have a

Table of Contents

surplus amounting to not less than 20% of its capital after the payment of the dividend. Moreover, a Michigan state chartered bank may not declare or pay any cash dividend or dividend in kind until the cumulative dividends on its preferred stock, if any, have been paid in full. Further, if the surplus of a Michigan state chartered bank is at any time less than the amount of its capital, before the declaration of a cash dividend or dividend in kind, it must transfer to surplus not less than 10% of its net profits for the preceding half year (in the case of quarterly or semiannual dividends) or the preceding two consecutive half year periods (in the case of annual dividends).

The payment of dividends by the Corporation and the Bank is also affected by various regulatory requirements and policies, such as the requirement to maintain adequate capital above regulatory guidelines. Federal laws impose further restrictions on the payment of dividends by insured banks that fail to meet specified capital levels. The FDIC may prevent an insured bank from paying dividends if the bank is in default of payment of any assessment due to the FDIC. In addition, payment of dividends by a bank may be prevented by the applicable federal regulatory authority if such payment is determined, by reason of the financial condition of such bank, to be an unsafe and unsound banking practice. The FRB and the FDIC have issued policy statements providing that bank holding companies and insured banks should generally pay dividends only out of current operating earnings. Additionally beginning in 2009, the FRB Board of Governors required the Corporation to notify the FRB prior to increasing its cash dividend by more than 10% over the prior year.

In 2010, the President signed into law the Dodd-Frank Act. The Dodd-Frank Act made sweeping changes in the regulation of financial institutions aimed at strengthening the sound operation of the financial services sector. Many of the provisions in the Dodd-Frank Act will not become effective until future years. The Dodd-Frank Act included the following provisions, among other things:

Directed the Federal Reserve to issue rules which to limit debit-card interchange fees for financial institutions with assets in excess of \$10,000,000;

Created the CFPB, which has rulemaking and enforcement authority for a wide range of consumer protection laws affecting financial institutions;

Increased leverage and risk-based capital requirements, FDIC premiums and examination fees;

Provided for new disclosure, say-on-pay, and other rules relating to executive compensation and corporate governance for public companies, including public financial institutions;

Permanently increased the federal deposit insurance coverage limit to \$250;

Provided for mortgage reform addressing a customer's ability to repay, restricted variable-rate lending, and made more loans subject to disclosure requirements and other restrictions; and

Created a financial stability oversight council that will recommend to the FRB increasingly strict rules for capital, leverage, liquidity, risk management and other requirements as companies grow in size and complexity.

Uncertainty remains as to the ultimate impact of the Dodd-Frank Act on the financial services industry as a whole and on the Corporation. In particular, many provisions of the Dodd-Frank Act are subject to rulemaking, which make it difficult to predict the impact of the Dodd-Frank Act on the Corporation, its customers and the financial services industry as a whole. While the overall effects of the Dodd-Frank Act remains unclear, management anticipates that it will be substantial. During 2011, the Corporation began to experience increased compensation costs as a result of staff additions necessary to comply with the new regulations.

The aforementioned regulations and restrictions may limit the Corporation's ability to obtain funds from the Bank for its cash needs, including payment of dividends and operating expenses.

Edgar Filing: ISABELLA BANK CORP - Form 10-K

The activities and operations of the Bank are also subject to other federal and state laws and regulations, including usury and consumer credit laws, the Federal Truth-in-Lending Act, Truth-in-Saving and Regulation Z of the FRB, the Federal Bank Merger Act, and the Bank Secrecy Act.

Table of Contents

Item 1A. Risk Factors

In the normal course of business the Corporation is exposed to various risks. These risks, if not managed correctly, could have a significant impact on the Corporation's earnings, capital, share price, and ability to pay dividends. In order to effectively monitor and control the following risks, management utilizes an enterprise risk model. Management balances the Corporation's strategic goals, including revenue and profitability objectives, with associated risks through the use of policies, systems, and procedures which have been adopted to identify, assess, control, monitor, and manage each risk area. Senior management continually reviews the adequacy and effectiveness of these policies, systems, and procedures.

In order to effectively monitor and control the following risks, management utilizes an enterprise risk process which covers each of the following areas.

Increases to loan losses and the Corporation's required allowance for loan losses

To manage the credit risk arising from lending activities, the Corporation's most significant source of credit risk, management maintains what it believes are sound underwriting policies and procedures. Management continuously monitors asset quality in order to manage the Corporation's credit risk to determine the appropriateness of valuation allowances. These valuation allowances take into consideration various factors including, but not limited to, local, regional, and national economic conditions.

The Corporation maintains an allowance for loan losses, which is a reserve established through a provision for loan losses charged to expense, that represents management's best estimate of losses that may be incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. The level of the allowance reflects management's continuing evaluation of industry concentrations; specific credit risks; loan loss experience; current loan portfolio quality; present economic, political and regulatory conditions; and unidentified losses inherent in the current loan portfolio. The determination of the appropriate level of the allowance for loan losses inherently involves a high degree of subjectivity and requires the Corporation to make significant estimates of current credit risks and economic trends, all of which may undergo material changes. Changes in economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem loans and other factors, both within and outside of the Corporation's control, may require an increase in the allowance for loan losses. In addition, bank regulatory agencies periodically review the Corporation's allowance for loan losses and may require an increase in the provision for loan losses or the recognition of further loan charge offs, based on judgments different than those of management.

Changes in economic conditions

An economic downturn within the Corporation's local markets, as well as downturns in the state or national markets, could negatively impact household and corporate incomes. This could lead to decreased demand for both loan and deposit products and lead to an increase of customers who fail to pay interest or principal on their loans. Management continually monitors key economic indicators in an effort to anticipate the possible effects of downturns in the local, regional, and national economies.

The Corporation's success depends primarily on the general economic conditions of the State of Michigan and the specific local markets in which the Corporation operates. Unlike larger national or other regional banks that are more geographically diversified, the Corporation provides banking and financial services to customers located primarily in the Clare, Gratiot, Isabella, Mecosta, Midland, Montcalm, and Saginaw counties in Michigan. The local economic conditions in these areas have a significant impact on the demand for the Corporation's products and services, as well as the ability of the Corporation's customers to repay loans, the value of the collateral securing loans and the stability of the Corporation's deposit funding sources. A significant decline in general economic conditions, caused by inflation, recession, acts of terrorism, outbreak of hostilities or

Table of Contents

other international or domestic occurrences, unemployment, changes in securities markets or other factors could impact these local economic conditions and, in turn, have a material adverse effect on the Corporation's financial condition and results of operations.

Changes in interest rates

Interest rate risk is the timing differences in the maturity or repricing frequency of a financial institution's interest earning assets and its interest bearing liabilities. Management monitors the potential effects of changes in interest rates through rate shock and gap analyses. To help mitigate the effects of changes in interest rates, management makes significant efforts to stagger projected cash flows and maturities of interest sensitive assets and liabilities.

Liquidity risk

Liquidity risk is the risk to earnings or capital arising from the Corporation's inability to meet its obligations when they come due without incurring unacceptable costs. Liquidity risk includes the inability to manage unplanned decreases or changes in funding sources, or failure to recognize or address changes in market conditions that affect the ability to liquidate assets quickly and with minimal loss in value. The Corporation has significant borrowing capacity through correspondent banks and the ability to sell certain investments to fund potential cash shortages, which management may use to help mitigate this risk.

The value of investment securities may be negatively impacted by fluctuations in the market

A volatile, illiquid market could require the Corporation to recognize an other-than-temporary impairment loss related to the investment securities held in the Corporation's portfolio. Management considers many factors in determining whether other-than-temporary impairment exists including the length of time and extent to which fair value has been less than cost, the investment credit rating, and the probability the issuer will be unable to pay the amount when due. The presence of these factors could lead to impairment charges. These risks are mitigated by the fact that the Corporation asserts that it does not intend to sell the security in an unrealized loss position and it is more likely than not it will not have to sell the securities before recovery of its cost basis.

Inadequate or failed internal processes, people, and systems, or external events

The Corporation is exposed to operational risk. Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems, or external events and includes reputation risk and transaction risk. Reputation risk is developing and retaining marketplace confidence in handling customers' financial transactions in an appropriate manner and protecting the safety and soundness of the Corporation. Transaction risk includes losses from fraud, error, the inability to deliver products or services, and loss or theft of information. Transaction risk also encompasses product development and delivery, transaction processing, information technology systems, and the internal control environment.

To help minimize the potential losses due to operational risks, management has established a robust system of internal controls as well as an internal audit department and has retained the services of a certified public accounting firm to assist in performing such internal audit work. The focus of these internal audit procedures is to verify the validity and appropriateness of various transactions, processes, and controls. The results of these procedures are reported to the Corporation's Audit Committee.

The adoption of, violations of, or nonconformance with laws, rules, regulations, or prescribed practices

The financial services industry and public companies are extensively regulated and must meet regulatory standards set by the FDIC, OFIR, the FRB, Financial Accounting Standards Board (FASB), SEC, Public Company Accounting Oversight Board (PCAOB), the CPFB, and other regulatory bodies. Federal and state

Table of Contents

laws and regulations are designed primarily to protect the deposit insurance funds and consumers, and not necessarily to benefit the Corporation's shareholders. The nature, extent, and timing of the adoption of significant new laws, changes in existing laws, or repeal of existing laws may have a material impact on the Corporation's business, results of operations, and financial condition, the effect of which is impossible to predict at this time.

The Corporation's compliance department annually assesses the adequacy and effectiveness of the Corporation's processes for controlling and managing its principal compliance risks.

The Corporation may not adjust to changes in the financial services industry

The Corporation's financial performance depends in part on its ability to maintain and grow its core deposit customer base and expand its financial services to its existing and new customers. In addition to other banks, competitors include savings associations, credit unions, securities dealers, brokers, mortgage bankers, investment advisors and finance and insurance companies. The increasingly competitive environment is, in part, a result of changes in technology and product delivery systems and the accelerating pace of consolidation among financial service providers. New competitors may emerge to increase the degree of competition for the Corporation's products and services. Financial services and products are also constantly changing. The Corporation's financial performance is also dependent upon customer demand for the Corporation's products and services and the Corporation's ability to develop and offer competitive financial products and services.

The Corporation may be required to recognize an impairment of goodwill

Goodwill represents the excess of the amounts paid to acquire subsidiaries over the fair value of their net assets at the date of acquisition. The majority of the recorded goodwill is related to acquisitions of other banks, which were subsequently merged into Isabella Bank. If it is determined that the goodwill has been impaired, the Corporation must write-down the goodwill by the amount of the impairment.

The Corporation may face increasing pressure from purchasers of its residential mortgage loans to repurchase loans sold or reimburse purchasers for losses related to such loans

The Corporation generally sells the fixed rate long term residential mortgage loans it originates in the secondary market. In response to the financial crisis, the purchasers of residential mortgage loans, such as government sponsored entities, have increased their efforts to require sellers of residential mortgage loans to either repurchase loans previously sold, or reimburse the purchasers for losses incurred on foreclosed loans due to actual or alleged failure to strictly conform to the purchaser's purchase criteria.

Consumers may decide not to use banks to complete their financial transactions.

Technology and other changes are allowing customers to complete financial transactions without the involvement of banks. For example, consumers can now pay bills and transfer funds directly without banks. The process of eliminating banks as intermediaries in financial transactions could result in the loss of fee income, as well as the loss of customer deposits and income generated from those deposits.

Changes to the financial services industry as a result of regulatory changes or actions, or significant litigation

The financial services industry is extensively regulated. The Corporation is subject to extensive state and federal regulation, supervision and legislation that govern almost all aspects of its operations. Laws and regulations may change from time to time and are primarily intended for the protection of consumers, depositors, and the deposit insurance funds. The impact of any changes to laws and regulations or other actions by regulatory agencies may negatively impact the Corporation or its ability to increase the value of its business. Regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the imposition of

Table of Contents

restrictions on the operation of an institution, the classification of assets by the institution and the adequacy of an institution's allowance for loan losses. Future regulatory changes or accounting pronouncements may increase the Corporation's regulatory capital requirements or adversely affect its regulatory capital levels. Additionally, actions by regulatory agencies or significant litigation against the Corporation could require the dedication of significant time and resources to defending its business and may lead to penalties.

Unauthorized disclosure of sensitive or confidential client or customer information, whether through a breach of computer systems or otherwise

As part of the Corporation's business, the Corporation collects and retains sensitive and confidential client and customer information on behalf of the Corporation and other third parties. Despite the security measures the Corporation has in place for its facilities and systems, and the security measures of its third party service providers, the Corporation may be vulnerable to security breaches, acts of vandalism, computer viruses, misplaced or lost data, human errors or other similar events. Any security breach involving the misappropriation, loss or other unauthorized disclosure of confidential customer information, whether by the Corporation or by its vendors, could severely damage the Corporation's reputation, expose it to the risks of litigation and liability, disrupt the Corporation's operations and have a material adverse effect on the Corporation's business.

Management's estimates and assumptions may be incorrect

The Corporation's consolidated financial statements conform with generally accepted accounting principles, which require management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements. These estimates are based on information available to management at the time the estimates are made. Actual results could differ from those estimates. For further discussion regarding significant accounting estimates, see Note 1- Nature of Operations and Summary of Significant Accounting Policies in the Notes to the Consolidated Financial Statements.

Disruption of infrastructure

The Corporation's operations depend upon its technological and physical infrastructure, including its equipment and facilities. Extended disruption of its vital infrastructure by fire, power loss, natural disaster, telecommunications failure, computer hacking and viruses, or other events outside of the Corporation's control, could affect the financial outcome of the Corporation or the financial services industry as a whole. The Corporation has developed disaster recovery plans, which provide detailed instructions covering all significant aspects of the Corporation's operations.

Increases in FDIC insurance premiums

The Corporation is unable to control the amount of premiums that it is required to pay for FDIC insurance. If there are additional bank or financial institution failures, the Corporation may be required to pay higher FDIC premiums. These announced increases have, and any future increases in FDIC insurance premiums will, materially adversely affect the Corporation's results of operations, financial condition and ability to continue to pay dividends on its common shares at the current rate.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Corporation's executive offices are located at 401 North Main Street, Mount Pleasant, Michigan 48858. Isabella Bank owns 25 branches and an operations center. The Corporation's facilities current, planned, and best use is for conducting its current activities, with the exception of approximately 75% of the Corporation's

Table of Contents

previous main office location, approximately 25% of the building that houses the Lake Isabella office, and approximately 25% of the building that houses the Corporation's mortgage processing operations which are leased to non-related parties. Management continually monitors and assesses the need for expansion and/or improvement for all facilities. In management's opinion, each facility has sufficient capacity and is in good condition.

Item 3. Legal Proceedings

The Corporation and its subsidiaries are not involved in any material pending legal proceedings. The Corporation, because of the nature of its business, is at times subject to numerous pending and threatened legal actions that arise out of the normal course of operating its business.

Table of Contents**Part II****Item 5. Market for Registrant's Common Equity, Related Shareholders' Matters and Issuer Purchases of Equity Securities****Common Stock and Dividend Information**

The Corporation's common stock is traded in the over the counter market. The common stock is quoted on the OTCQB tier of the OTC Markets Group, Inc.'s electronic quotation system (www.otcm Markets.com) under the symbol ISBA. Other trades in the common stock occur in privately negotiated transactions from time to time of which the Corporation may have little or no information.

Management has reviewed the information available as to the range of reported high and low bid quotations, including high and low bid information as reported by OTC Markets and as reported by the parties to privately negotiated transactions. The following table sets forth management's compilation of that information for the periods indicated. Price information obtained from OTC Markets reflects inter dealer prices, without retail mark up, mark down or commissions and may not necessarily represent actual transactions. Price information obtained from parties to privately negotiated transactions reflects actual closing prices that were disclosed to the Corporation, which management has not independently verified. The following compiled data is provided for information purposes only and should not be viewed as indicative of the actual or market value of the Corporation's common stock.

Isabella Bank Corporation's authorized common stock consists of 15,000,000 shares, of which 7,589,226 shares are issued and outstanding as of December 31, 2011. As of that date, there were 3,043 shareholders of record.

Table of Contents

The Board of Directors has authorized a common stock repurchase plan. On April 27, 2011, the Board of Directors amended the plan to allow for the repurchase of an additional 100,000 shares of the Corporation's common stock. These authorizations do not have expiration dates. As shares are repurchased under this plan, they revert back to the status of authorized, but unissued shares.

The following table provides information for the three month period ended December 31, 2011, with respect to this plan:

	Shares Repurchased		Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

ISABELLA BANK CORPORATION FINANCIAL REVIEW

(All dollars in thousands)

The following is management's discussion and analysis of the financial condition and results of operations for Isabella Bank Corporation. This discussion and analysis is intended to provide a better understanding of the consolidated financial statements and statistical data included elsewhere in the Annual Report.

Executive Summary

Isabella Bank Corporation, as well as all other financial institutions in Michigan and across the entire country, continues to experience the negative impacts on its operations from the persistent weak economy. The current economic environment has led to historically high levels of loans charged off and foreclosed asset and collection expenses.

In spite of the economic downturn that has occurred over the past few years, the Corporation continues to be profitable, with net income of \$10,210 for the year ended December 31, 2011. Not only has the Corporation remained profitable, its loan quality also compares well to its peers as its ratio of nonperforming loans to total loans was 0.95% as of December 31, 2011 compared to 3.26% for all bank holding companies in the Corporation's peer group as of September 30, 2011 (December 31, 2011 peer group ratios are not yet available). The Corporation's interest margins also continue to be strong, as the net yield on interest earning assets (on a fully taxable equivalent basis) was 3.87% for the year ended December 31, 2011.

Recent Legislation

The Health Care and Education Act of 2010 and the Patient Protection and Affordable Care Act could have a significant impact on the Corporation's operating results in future periods. Aside from the potential increases in the Corporation's health care costs, the implementation of the new rules and requirements is likely to require a substantial commitment from the Corporation's management.

The Dodd-Frank Act is very broad and complex legislation that puts in place a sweeping new financial services framework that is likely to have significant regulatory and legal consequences and will likely impact the Corporation's future operating results. Implementation of the Act will require compliance with numerous new regulations, which will increase compliance and documentation costs. For more information, see the summary of the Dodd-Frank Act under the heading "Supervision and Regulation" in Item 1, on page 5.

Other

The Corporation has not received any notices of regulatory actions as of February 16, 2012.

CRITICAL ACCOUNTING POLICIES:

The Corporation's significant accounting policies are set forth in Note 1 of the Consolidated Financial Statements. Of these significant accounting policies, the Corporation considers its policies regarding the allowance for loan losses, acquisition intangibles, and the determination of the fair value and assessment of other-than-temporary impairment of investment securities to be its most critical accounting policies.

The allowance for loan losses requires management's most subjective and complex judgment. Changes in economic conditions can have a significant impact on the allowance for loan losses and, therefore, the provision for loan losses and results of operations. The Corporation has developed appropriate policies and procedures for assessing the appropriateness of the allowance for loan losses, recognizing that this process requires a number of assumptions and estimates with respect to its loan portfolio. The Corporation's assessments may be impacted in

Table of Contents

future periods by changes in economic conditions, and the discovery of information with respect to borrowers which is not known to management at the time of the issuance of the consolidated financial statements. For additional discussion concerning the Corporation's allowance for loan losses and related matters, see the detailed discussion to follow under the heading Allowance for Loan Losses .

United States generally accepted accounting principles require that the Corporation determine the fair value of the assets and liabilities of an acquired entity, and record their fair value on the date of acquisition. The Corporation employs a variety of measures in the determination of the fair value, including the use of discounted cash flow analysis, market appraisals, and projected future revenue streams. For certain items that management believes it has the appropriate expertise to determine the fair value, management may choose to use its own calculations of the value. In other cases, where the value is not easily determined, the Corporation consults with outside parties to determine the fair value of the identified asset or liability. Once valuations have been adjusted, the net difference between the price paid for the acquired entity and the value of its balance sheet, including identifiable intangibles, is recorded as goodwill. This goodwill is not amortized, but is evaluated for impairment on at least an annual basis.

The Corporation currently has both available-for-sale and trading investment securities that are carried at fair value. Changes in the fair value of available-for-sale investment securities are included as a component of other comprehensive income, while declines in the fair value of these securities below their cost that are other-than-temporary are reflected as realized losses in the consolidated statements of income. The change in value of trading investment securities is included in current earnings. Management evaluates available-for-sale securities for indications of losses that are considered other-than-temporary, if any, on a regular basis. The market values for available-for-sale and trading investment securities are typically obtained from outside sources and applied to individual securities within the portfolio.

Due to the limited trading of certain auction rate money market preferred securities and preferred stocks during 2010, the Corporation utilized a discounted cash flow analysis to determine fair values on December 31, 2010. This analysis considered the creditworthiness of the counterparty, the timing of expected future cash flows, the current volume of trading activity, and recent trade prices. The discount rates used were determined by using the interest rates of similarly rated financial institution debt based on the weighted average of a range of terms for corporate bond interest rates, which were obtained from published sources and ranged from 3.90% to 6.90% as of December 31, 2010. During 2011, the markets for these securities have normalized and established regular trading patterns. As such, the Corporation determined the fair value for these securities based on quoted prices for identical securities, or based on quoted prices for similar securities as of December 31, 2011.

Table of Contents**DISTRIBUTION OF ASSETS, LIABILITIES, AND SHAREHOLDERS EQUITY****INTEREST RATE AND INTEREST DIFFERENTIAL**

The following schedules present the daily average amount outstanding for each major category of interest earning assets, nonearning assets, interest bearing liabilities, and noninterest bearing liabilities for the last three years. These schedules also presents an analysis of interest income and interest expense for the periods indicated. All interest income is reported on a fully taxable equivalent (FTE) basis using a 34% federal income tax rate. Nonaccruing loans, for the purpose of the following computations, are included in the average loan amounts outstanding. Federal Reserve and Federal Home Loan Bank stock holdings which are restricted are included in accrued income and other assets.

Table of Contents**Net Interest Income**

The Corporation derives the majority of its gross income from interest earned on loans and investments, while its most significant expense is the interest cost incurred for funds used. Net interest income is the amount by which interest income on earning assets exceeds the interest cost of deposits and borrowings. Net interest income is influenced by changes in the balance and mix of assets and liabilities and market interest rates. Management exerts some control over these factors; however, Federal Reserve monetary policy and competition have a significant impact. Interest income includes loan fees of \$2,385 in 2011, \$2,196 in 2010, and \$1,963 in 2009. For analytical purposes, net interest income is adjusted to a taxable equivalent basis by adding the income tax savings from interest on tax exempt loans and securities, thus making year to year comparisons more meaningful.

VOLUME AND RATE VARIANCE ANALYSIS

The following table details the dollar amount of changes in FTE net interest income for each major category of interest earning assets and interest bearing liabilities and the amount of change attributable to changes in average balances (volume) or average rates. The change in interest due to both volume and rate has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

	2011 Compared to 2010			2010 Compared to 2009

Borrowed funds	299	(705)	(406)	(171)	(406)	(577)
Total changes in interest expense	1,268	(2,269)	(1,001)	837	(3,472)	(2,635)
Net change in interest margin (FTE)	\$ 2,747	\$ (778)	\$ 1,969	\$ 306	\$ 1,536	\$ 1,842

During 2011, average interest earning assets increased by \$97,207. This increase resulted in \$4,015 of additional interest income which exceeded the \$3,047 decrease in interest income caused by declines in interest rates. Interest bearing liabilities increased \$86,196 at a cost of \$1,268 while the decline in rates, mostly those on time deposits and borrowed funds, decreased interest expense by \$2,269. The diminished interest income earned on assets resulted in a 0.17% decline in the net interest yield. Management anticipates that net interest margin yield will decline slightly during 2012 due to the following factors:

Based on the current economic conditions, management does not anticipate any changes in the target Fed funds rate in the foreseeable future. As such, changes in market rates may be unlikely. However, it is likely that the Corporation may see declines in the rates earned on interest earning assets as the interest rates on many types of loans including home equity lines of credit, residential balloon mortgages, variable rate commercial lines of credit, and investment securities with acceptable credit and interest rate risk are currently priced at or below the Corporation's current net yield on interest earning assets. Most of the potential declines would arise out of the Corporation's investment portfolio as the majority of securities that are called or mature in 2012 will be

reinvested at significantly lower rates.

Table of Contents

Interest rates on residential mortgage loans remain at or near historical lows. This rate environment has led to strong consumer demand for fixed rate mortgage products which are generally sold to the secondary market. As a result, there has been a significant decline in balloon mortgages, which are held on the Corporation's consolidated balance sheet. As these balloon mortgages have paid off, the proceeds from these loans have been reinvested (typically in the form of available-for-sale investment securities) at lower interest rates which has adversely impacted interest income.

While the Corporation's liability sensitive balance sheet has allowed it to benefit from decreases in interest rates, it also makes the Corporation sensitive to increases in deposit and borrowing rates. As part of the Corporation's goal to minimize the potential negative impacts of possible increases in future interest rates, management has been, and continues to be, actively working to lengthen the terms of its interest bearing liabilities. This lengthening has increased the Corporation's cost of funding, reducing net interest income in the short term.

Allowance for Loan Losses

The viability of any financial institution is ultimately determined by its management of credit risk. Loans outstanding represent the Corporation's single largest concentration of risk. The allowance for loan losses is management's estimation of probable losses inherent in the existing loan portfolio. Factors used to evaluate the loan portfolio, and thus to determine the current charge to expense, include recent loan loss history, financial condition of borrowers, amount of nonperforming and impaired loans, overall economic conditions and other factors. The following schedule summarizes the Corporation's chargeoff and recovery activity for the years ended December 31:

	2011	2010	2009	2008	2007
Allowance for loan losses - January 1	\$ 12,373	\$ 12,979	\$ 11,982	\$ 7,301	\$ 7,605
Allowance of acquired bank				822	
Loans charged off

Net loans charged off to average loans outstanding	0.51%	0.75%	0.70%	0.79%	0.25%
Total amount of loans outstanding	\$ 750,291	\$ 735,304	\$ 723,316	\$ 735,385	\$ 612,687
Allowance for loan losses as a % of loans	1.65%	1.68%	1.79%	1.63%	1.19%

The Corporation originates and sells fixed rate residential real estate mortgages to the Federal Home Loan Mortgage Corporation (Freddie Mac). The Corporation has not originated loans for either trading or its own portfolio that would be classified as subprime, nor has it originated adjustable rate mortgages or financed loans for more than 80% of market value unless insured by private third party insurance.

Table of Contents

As shown in the preceding table, when comparing 2011 to 2010, net loans charged off decreased by \$1,639. This improvement allowed the Corporation to reduce its provision for loan losses. While there have been marked improvements in the level of net loans charged off, which has contributed to the Corporation's ability to reduce its provision for loan losses, the overall local, regional and national economies have yet to show consistent improvement.

The Corporation allocates the allowance throughout its loan portfolio based on management's assessment of the underlying risks associated with each loan segment. Management's assessments include allocations based on specific impairment allocations, historical losses, internally assigned credit ratings, and past due and nonaccrual balances. A portion of the allowance for loan losses is not allocated to any one loan segment, but is instead a reflection of other qualitative risks within the Corporation's loan portfolio.

For further discussion on the allocation of the allowance for loan losses, see Note 6 Loans and Allowance for Loan Losses to the Corporation's consolidated financial statements.

Loans Past Due and Loans in Nonaccrual Status

Increases in past due and nonaccrual loans can have a significant impact on the allowance for loan losses. To determine the potential impact, and corresponding estimated losses, management analyzes its historical loss trends on loans past due 30-89 days, 90 days or more, and nonaccrual loans.

The following tables summarize the Corporation's past due and nonaccrual loans as of December 31:

	Total Past Due and Nonaccrual				
	2011	2010	2009	2008	2007
Commercial and agricultural	\$ 7,420	\$ 9,606	\$ 8,839	\$ 13,958	\$ 8,746

Table of Contents**Troubled Debt Restructurings**

The following table summarizes the Corporation's troubled debt restructurings as of December 31:

	2011			2010			2009			2008			2007
	Accruing Interest	Non-accrual	Total	Accruing Interest	Non-accrual	Total	Accruing Interest	Non-accrual	Total	Accruing Interest	Non-accrual	Total	Accruing Interest
Current	\$ 16,125	\$ 514	\$ 16,639	\$ 4,798	\$ 499	\$ 5,297	\$ 2,754	\$ 786	\$ 3,540	\$ 2,297	\$ 1,355	\$ 3,652	\$ 517
Past due 30-89 days	1,614	429	2,043	277	26	303	107	904	1,011	268		268	115
Past due 90 days or more		74	74		163	163		426	426		630	630	53
Total	\$ 17,739	\$ 1,017	\$ 18,756	\$ 5,075	\$ 688	\$ 5,763	\$ 2,861	\$ 2,116	\$ 4,977	\$ 2,565	\$ 1,985	\$ 4,550	\$ 685

The Corporation had no troubled debt restructurings in nonaccrual status as of December 31, 2007.

As a result of adopting the amendments in ASU No. 2011-02, the Corporation reassessed all loan restructurings that occurred on or after January 1, 2011 for identification as troubled debt restructurings (TDRs). The Corporation identified as TDRs certain loans for which the allowance for loan losses had previously been measured under a general allowance for loan losses methodology. Upon identifying those loans as TDRs, the Corporation identified them as impaired. The amendments in ASU No. 2011-02 require prospective application of the impairment measurement guidance for those loans newly identified as impaired. The Corporation's recorded investment in loans for which the allowance for credit losses was previously measured under a general allowance for credit losses methodology and are now impaired was \$5,136, with a specific valuation allowance of \$1,022 as of December 31, 2011.

The Corporation has taken aggressive actions to avoid foreclosures on borrowers who are willing to work with the Corporation in modifying their loans, thus making them more affordable. These loan modifications have allowed borrowers to develop a payment structure that will allow them to continue making payments in lieu of foreclosure. Troubled debt restructurings that have been placed in nonaccrual status may be placed back on accrual status after six months of continued performance.

Loan modifications are considered to be TDRs when the modification results in terms outside of normal lending practices to a borrower who is experiencing financial difficulties.

Typical concessions granted include, but are not limited to:

1. Agreeing to interest rates below prevailing market rates for debt with similar risk characteristics.
2. Extending the amortization period beyond typical lending guidelines for debt with similar risk characteristics.
3. Forbearance of principal.
4. Forbearance of accrued interest.

To determine if a borrower is experiencing financial difficulties, the Corporation considers if:

1. The borrower is currently in default on any of their debt.

Edgar Filing: ISABELLA BANK CORP - Form 10-K

2. It is likely that the borrower would default on any of their debt if the concession was not granted.
3. The borrower's cash flow was sufficient to service all of their debt if the concession was not granted.
4. The borrower has declared, or is in the process of declaring, bankruptcy.
5. The borrower is unlikely to continue as a going concern (if the entity is a business).

Table of Contents

The following tables summarize concessions granted by the Corporation to borrowers experiencing financial difficulties in the year ended December 31:

	2011			
	Below Market Interest Rate		Below Market Interest Rate and Extension of Amortization Period	
	Number of Loans	Pre-Modification Recorded Investment	Number of Loans	Pre-Modification Recorded Investment
Commercial				
Commercial real estate	1	\$ 408		\$
Commercial other	38	9,932	4	2,643
Total commercial	39	10,340	4	2,643
Agricultural other	8	1,321		
Residential mortgage				
Senior liens	19	2,161	17	1,754
Consumer				
Secured	6	65	1	4
Unsecured			2	20
Total consumer	6	65	3	24
Total	72	\$ 13,887	24	\$ 4,421

The Corporation did not restructure any loans through the forbearance of principal or accrued interest during 2011.

The Corporation has been successful in its efforts to restructure loans to reduce foreclosures. Of the 163 troubled debt restructurings granted since December 31, 2008, only 6 have defaulted.

Nonperforming Assets

The following table summarizes the Corporation's nonperforming assets as of December 31:

	2011	2010	2009	2008	2007
Nonaccrual loans	\$ 6,389	\$ 5,610	\$ 8,522	\$ 11,175	\$ 4,156
Accruing loans past due 90 days or more	760	486	768	1,251	1,727
Total nonperforming loans	7,149	6,096	9,290	12,426	5,883
Other real estate owned	1,867	2,039	1,141	2,770	1,376
Repossession assets	9	28	16	153	
Total nonperforming assets	\$ 9,025	\$ 8,163	\$ 10,447	\$ 15,349	\$ 7,259
Nonperforming loans as a % of total loans	0.95%	0.83%	1.28%	1.69%	0.96%

Nonperforming assets as a % of total assets	0.67%	0.67%	0.91%	1.35%	0.76%
--	--------------	--------------	--------------	--------------	--------------

Loans are placed in nonaccrual status when the foreclosure process has begun, generally after a loan is 90 days past due, unless they are well secured and in the process of collection. Upon transferring the loans to nonaccrual status, an evaluation to determine the net realizable value of the underlying collateral is performed. This evaluation is used to help determine if any charge downs are necessary. Loans may be placed back on accrual status after six months of continued performance.

Table of Contents

The following table summarizes the Corporation's nonaccrual loan balances by type as of December 31:

	2011	2010	2009	2008	2007
Commercial and agricultural	\$ 4,805	\$ 4,140	\$ 5,810	\$ 8,059	\$ 1,959
Residential mortgage	1,584	1,470	2,657	3,092	2,185
Consumer installment			55	24	12
	\$ 6,389	\$ 5,610	\$ 8,522	\$ 11,175	\$ 4,156

Included in nonaccrual commercial and agricultural loans was one loan with a balance of \$1,900 as of December 31, 2011 and \$2,679 as of December 31, 2010. As of December 31, 2011, there was no specific allocation established for this loan as it has been charged down to reflect the current market value of the real estate, while there was a specific allocation established in the amount of \$345 as of December 31, 2010. Nonaccrual commercial and agricultural loans also included one loan with a balance of \$1,014 as of December 31, 2011, for which there was no specific allocation established as the net realizable value of the loan's underlying collateral exceeded the loan's outstanding balance. Commercial and agricultural nonaccrual loans included one credit with a balance of \$1,800 as of December 31, 2009 which was subsequently transferred to other real estate owned in the third quarter of 2010. There were no other individually significant credits included in nonaccrual loans as of December 31, 2011, 2010, 2009, 2008, or 2007.

Included in the nonaccrual loan balances above were credits currently classified as restructured loans as of December 31:

	2011	2010	2009	2008
Commercial and agricultural	\$ 520	\$ 115	\$ 1,692	\$ 1,985
Residential mortgage	497	573	424	
	\$ 1,017	\$ 688	\$ 2,116	\$ 1,985

The Corporation had no restructured loans in nonaccrual status as of December 31, 2007.

The Corporation has devoted considerable attention to identifying impaired loans and adjusting the net carrying value of these loans to their current net realizable values through the establishment of a specific reserve or the recording of a charge off. To management's knowledge, all loans that are deemed to be impaired have been recognized. A continued decline in real estate values may require further write downs of loans in foreclosure and other real estate owned and could potentially have an adverse impact on the Corporation's financial performance.

Based on management's analysis, the allowance for loan losses is considered appropriate as of December 31, 2011. Management will continue to closely monitor its overall credit quality to ensure that the allowance for loan losses remains appropriate.

Table of Contents**Noninterest Income**

The following table shows the changes in noninterest income between the years ended December 31:

	2011	2010	Change		2009	Change	
			\$	%		\$	%
Service charges and fees

All other	484	482	2	0.4%	300	182	60.7%
Total other	1,456	1,729	(273)	-15.8%	1,340	389	29.0%
Total noninterest income	\$ 8,218	\$ 9,300	\$ (1,082)	-11.6%	\$ 10,156	\$ (856)	-8.4%

Significant changes in noninterest income are detailed below:

Management continuously analyzes various fees related to deposit accounts including service charges and NSF and overdraft fees. Based on these analyses, the Corporation makes any necessary adjustments to ensure that its fee structure is within the range of its competitors, while at the same time making sure that the fees remain fair to deposit customers. NSF and overdraft fees have been steadily declining over the past two years, with the decline accelerating in the third quarter of 2010 as a result of new regulatory guidance issued by the Federal Reserve Bank. The Corporation anticipates that NSF and overdraft fees will approximate current levels in 2012.

The increases in ATM and debit card fees are primarily the result of the increased usage of debit cards by customers. As management does not anticipate any significant changes to the ATM and debit card fee structures, these fees are expected to continue to increase as the usage of debit cards increases.

Trust fees have increased primarily due to increases in the size of the managed portfolio. As management anticipates continued growth in trust services, it anticipates trust fees to continue to increase in 2012.

Net originated mortgage servicing rights (OMSR) represent the fair value of servicing rights of loans sold to the secondary market, with changes in the fair value recorded in earnings. Changes in the fair value of OMSR are primarily driven by fluctuations in the

Edgar Filing: ISABELLA BANK CORP - Form 10-K

balance of loans sold to the secondary market and by offering rates on new residential mortgages. The losses incurred in 2011 were a result of historically low interest rates which increases the likelihood of refinancing activity, thus reducing the value of OMSR.

Table of Contents

As a result of lower than normal residential mortgage rates, the Corporation experienced increases in the volume of loans sold to the secondary market during 2009, leading to a corresponding increase in gains from the sale of mortgage loans in 2009. As the demand for new mortgages declined in 2010 and 2011, so did the gain from the sale of mortgage loans. The Corporation anticipates that the gain on sale of mortgages will remain at the current levels in 2012.

Fluctuations in the gains and losses related to trading securities and borrowings carried at fair value are caused by interest rate variances. Management does not anticipate any significant fluctuations in net trading activities in 2012 as significant interest rate changes are not expected.

The Corporation continually analyzes its available-for-sale investment portfolio for advantageous selling opportunities.

The Corporation's earnings from its joint venture in Corporate Settlement Solutions (a title insurance agency) have been negatively impacted by expenses incurred to enhance the services offered as well as expand their market area.

The fluctuations in all other income are spread throughout various categories, none of which are individually significant.

Noninterest Expenses

The following table shows the changes in noninterest expenses between the years ended December 31:

	2011	2010	Change		2009	Change	
			\$	%		\$	%

Table of Contents

Significant changes in noninterest expenses are detailed below:

Leased employee salaries increased during 2011 due to annual merit increases and staff additions. These staff additions have allowed the Corporation to continue to grow as well as to comply with new regulations, including the Dodd-Frank Act. Leased employee benefits fluctuate from period to period primarily as a result of changes in health care related expenses. The Corporation anticipates adding to staffing levels in 2012 to ensure compliance with new regulations set forth in the Dodd-Frank Act, which is estimated to increase salary and benefits by \$331.

FDIC insurance premium expense decreased in 2011 due to changes to the assessment rates on April 1, 2011. Premiums declined between 2009 and 2010 as a result of an FDIC special assessment of \$479 in September 2009. Management expects FDIC insurance premiums to decline slightly in 2012 due to the changes in assessment rates.

The increase in marketing and community relations in 2011 was primarily the result of a new initiative to track customer service satisfaction as well as the enhancement of the Corporation's website. The increase in marketing and community relations expenses in 2010 was primarily related to an increase in charitable contributions. Charitable contributions were essentially unchanged between 2010 and 2011 with no significant changes expected in 2012.

While foreclosed asset and collection expenses remain at historically high levels, they have declined significantly from 2010. Management anticipates that these expenses will approximate current levels in 2012.

The Corporation's legal expenses can fluctuate from period to period based on the volume of foreclosures as well as expenses related to the Corporation's ongoing operations, including regulatory compliance. The Corporation does not anticipate any significant fluctuations in legal expenses in 2012.

Audit and SOX compliance fees fluctuate due to the timing of the performance of recurring audit procedures.

Director fees declined in 2011 due to the retirement of several directors. Director fees are expected to approximate current levels in 2012.

The Corporation places a strong emphasis on customer service. To help enhance customer service satisfaction, the Corporation has made a significant investment in various training programs. These programs coupled with the customer service tracking initiative (noted above) will increase service levels which will increase shareholder value. Management expects that education related expenses to remain at current levels in 2012.

Postage and freight expenses have declined, and are expected to continue to decline, as a result of fewer special mailings as well as an increase in the Corporation's customer's usage of electronic statements.

Printing and supplies expenses have steadily declined since 2009 as the Corporation has instituted a document imaging solution decreasing the amount of paper and related supplies. Management anticipates this trend to continue in 2012.

Edgar Filing: ISABELLA BANK CORP - Form 10-K

The increase in consulting fees is due to succession planning for key executives to help the Board of Directors and management identify, attract, and retain future leaders.

The fluctuations in all other expenses are spread throughout various categories, none of which are individually significant.

Table of Contents**ANALYSIS OF CHANGES IN FINANCIAL CONDITION**

The following table shows the composition and changes in the Corporation's balance sheet as of December 31:

	2011	2010	Change	
			\$	%
ASSETS				
Cash and cash equivalents	\$ 28,590	\$ 18,109	\$ 10,481	57.88%
Certificates of deposit held in other financial institutions	8,924	15,808	(6,884)	-43.55%
Trading securities	4,710	5,837	(1,127)	-19.31%
Available-for-sale securities	425,120	330,724	94,396	28.54%
Mortgage loans available-for-sale	3,205	1,182	2,023	171.15%
Loans	750,291	735,304	14,987	2.04%
Allowance for loan losses	(12,375)	(12,373)	(2)	0.02%
Premises and equipment	24,626	24,627	(1)	0.00%
Corporate owned life insurance	22,075	17,466	4,609	26.39%
Accrued interest receivable	5,848	5,456	392	7.18%
Equity securities without readily determinable fair values	17,189	17,564	(375)	-2.14%
Goodwill and other intangible assets	46,792	47,091	(299)	-0.63%
Other assets	12,930	19,015	(6,085)	-32.00%
TOTAL ASSETS	\$ 1,337,925	\$ 1,225,810	\$ 112,115	9.15%
LIABILITIES AND SHAREHOLDERS' EQUITY				
Liabilities				
Deposits	\$ 958,164	\$ 877,339	\$ 80,825	9.21%
Borrowed funds	216,136	194,917	21,219	10.89%
Accrued interest payable and other liabilities	8,842	8,393	449	5.35%
Total liabilities	1,183,142	1,080,649	102,493	9.48%
Shareholders' equity	154,783	145,161	9,622	6.63%
TOTAL LIABILITIES AND SHAREHOLDERS' EQUITY	\$ 1,337,925	\$ 1,225,810	\$ 112,115	9.15%

As shown above, the Corporation enjoyed strong balance sheet growth since December 31, 2010. The primary driver behind this growth was excellent demand for deposit products. As loan demand did not keep pace with the increase in deposits, the Corporation increased its holdings in available-for-sale investment securities.

A discussion of changes in balance sheet amounts by major categories follows:

Certificates of deposit held in other financial institutions

During 2011, the Corporation reinvested maturities of certificates of deposit held in other financial institutions into available-for-sale investment securities to increase net interest margins (as the yields on available-for-sale investment securities exceeded the potential reinvestment rates for certificates of deposits held in other financial institutions during the year). This trend is likely to continue in 2012.

Trading securities

Trading securities are carried at fair value. The Corporation's overall intent is to maintain a trading portfolio to enhance the ongoing restructuring of assets and liabilities as part of our interest rate risk management objectives (See Note 4 "Trading Securities" of the Consolidated Financial Statements). Due to the current interest rate environment, the Corporation has allowed this balance to decline.

Table of Contents

The following is a schedule of the carrying value of trading securities as of December 31:

	2011	2010	2009
States and political subdivisions	\$ 4,710	\$ 5,837	\$ 9,962
Mortgage-backed			3,601
Total	\$ 4,710	\$ 5,837	\$ 13,563

Available-for-sale investment securities

The primary objective of the Corporation's investing activities is to provide for safety of the principal invested. Secondary considerations include the need for earnings, liquidity, and the Corporation's overall exposure to changes in interest rates. Securities currently classified as available-for-sale are stated at fair value.

The following is a schedule of the carrying value of investment securities available-for-sale as of December 31:

	2011	2010	2009
Government sponsored enterprises	\$ 397	\$ 5,404	\$ 19,471
States and political subdivisions	174,938	169,717	151,730
Auction rate money market preferred	2,049	2,865	2,973
Preferred stocks	5,033	6,936	7,054
Mortgage-backed securities	143,602	102,215	67,734
Collateralized mortgage obligations	99,101	43,587	10,104
Total	\$ 425,120	\$ 330,724	\$ 259,066

Excluding those holdings in government sponsored enterprises and municipalities within the state of Michigan, there were no investments in securities of any one issuer that exceeded 10% of shareholders' equity. The Corporation has a policy prohibiting investments in securities that it deems are unsuitable due to their inherent credit or market risks. Prohibited investments include stripped mortgage backed securities, zero coupon bonds, nongovernment agency asset backed securities, and structured notes. The Corporation's holdings in mortgage-backed securities and collateralized mortgage obligations include only government agencies and government sponsored agencies as the Corporation holds no investments in private label mortgage-backed securities or collateralized mortgage obligations.

Table of Contents

The following is a schedule of maturities of available-for-sale investment securities (at fair value) and their weighted average yield as of December 31, 2011. Weighted average yields have been computed on a fully taxable-equivalent basis using a tax rate of 34%. Auction rate money market preferred securities are long term floating rate instruments for which interest rates are set at periodic auctions. At each successful auction, the Corporation has the option to sell the security at par value. Additionally, the issuers of auction rate securities generally have the right to redeem or refinance the debt. Because of their variable monthly payments, auction rate money market preferreds, preferred stocks, mortgage-backed securities, and collateralized mortgage obligations are not reported by a specific maturity group. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations.

	Maturing									
	Within One Year		After One Year But Within Five Years		After Five Years But Within Ten Years		After Ten Years		Securities with Variable Monthly Payments or Continual Call Dates	
	Amount	Yield (%)	Amount	Yield (%)	Amount	Yield (%)	Amount	Yield (%)	Amount	Yield (%)
Government sponsored enterprises	\$		\$		\$ 397	7.91	\$		\$	
States and political subdivisions	8,441	3.24	35,904	4.12	93,189	3.87	37,404	2.84		
Mortgage-backed securities			271	5.68	73,974	1.91	69,357	1.97		
Collateralized mortgage obligations									99,101	2.76
Auction rate money market preferred									2,049	4.92
Preferred stocks									5,033	4.30
Total	\$ 8,441	3.24	\$ 36,175	4.13	\$ 167,560	3.01	\$ 106,761	2.28	\$ 106,183	2.88

Loans

The largest component of earning assets is loans. The proper management of credit and market risk inherent in the loan portfolio is critical to the financial well-being of the Corporation. To control these risks, the Corporation has adopted strict underwriting standards. These standards include specific criteria against lending outside the Corporation's defined market areas, lending limits to a single borrower, and strict loan to collateral value limits. The Corporation also monitors and limits loan concentrations extended to distressed industries. The Corporation has no foreign loans and there were no concentrations greater than 10% of total loans that are not disclosed as a separate category in the following table.

The following table presents the composition of the loan portfolio for the years ended December 31:

	2011	2010	2009	2008	2007
Commercial	\$ 365,714	\$ 348,852	\$ 340,274	\$ 324,806	\$ 238,306
Agricultural	74,645	71,446	64,845	58,003	47,407
Residential real estate mortgage	278,360	284,029	285,838	319,397	297,937
Installment	31,572	30,977	32,359	33,179	29,037
	\$ 750,291	\$ 735,304	\$ 723,316	\$ 735,385	\$ 612,687

Table of Contents

The following table presents the change in the loan categories for the years ended December 31:

	2011		2010		2009	
	\$ Change	% Change	\$ Change	% Change	\$ Change	% Change
Commercial	\$ 16,862	4.8%	\$ 8,578	2.5%	\$ 15,468	4.8%
Agricultural	3,199	4.5%	6,601	10.2%	6,842	11.8%
Residential real estate mortgage	(5,669)	-2.0%	(1,809)	-0.6%	(33,559)	-10.5%
Installment	595	1.9%	(1,382)	-4.3%	(820)	-2.5%
	\$ 14,987	2.0%	\$ 11,988	1.7%	\$ (12,069)	-1.6%

A substantial portion of the increase in total loans as of December 31, 2008 compared to December 31, 2007 was a result of the acquisition of Greenville Financial Corporation in January 2008. Pursuant to the acquisition, the Corporation purchased gross loans totaling \$88,613.

Corporate owned life insurance

During the third quarter of 2011, the Corporation purchased an additional \$4,000 of corporate owned life insurance policies. The Corporation purchased these additional policies to provide additional coverage for key employees, while also generating ongoing earnings as the cash surrender values of the policies increase.

Equity securities without readily determinable fair values

Included in equity securities without readily determinable fair values are restricted securities, which are carried at cost and investments in nonconsolidated entities accounted for under the equity method of accounting (see Note 1 Nature of Operations and Summary of Significant Accounting Policies of Notes to Consolidated Financial Statements).

Deposits

The main source of funds for the Corporation is deposits. The following table presents the composition of the deposit portfolio as of December 31:

	2011	2010	2009	2008	2007
Noninterest bearing deposits	\$ 119,072	\$ 104,902	\$ 96,875	\$ 97,546	\$ 84,846
Interest bearing demand deposits	163,653	142,259	128,111	113,973	105,526
Savings deposits	193,902	177,817	157,020	182,523	196,682
Certificates of deposit	395,777	386,435	356,594	340,976	311,976
Brokered certificates of deposit	54,326	53,748	50,933	28,185	28,197
Internet certificates of deposit	31,434	12,178	13,119	12,427	6,246
Total	\$ 958,164	\$ 877,339	\$ 802,652	\$ 775,630	\$ 733,473

The following table presents the change in the deposit categories for the years ended December 31:

	2011		2010		2009	
	\$ Change	% Change	\$ Change	% Change	\$ Change	% Change
Noninterest bearing deposits	\$ 14,170	13.5%	\$ 8,027	8.3%	\$ (671)	-0.7%
Interest bearing demand deposits	21,394	15.0%	14,148	11.0%	14,138	12.4%

Edgar Filing: ISABELLA BANK CORP - Form 10-K

Brokered certificates of deposit	578	1.1%	2,815	5.5%	22,748	80.7%
Internet certificates of deposit	19,256	158.1%	(941)	-7.2%	692	5.6%
Total	\$ 80,825	9.2%	\$ 74,687	9.3%	\$ 27,022	3.5%

Table of Contents

As shown in the preceding table, the Corporation has experienced strong deposit growth since December 30, 2010. This growth was the result of the Corporation offering products with competitive rates and terms, as well as focused marketing efforts to increase deposit market share in the communities served. While management anticipates that deposits will continue to increase in 2012, it is expected to be at a lower rate than 2011.

The following table shows the average balances and corresponding interest rates paid on deposit accounts as of December 31:

	2011		2010		2009	
	Amount	Rate	Amount	Rate	Amount	Rate
Noninterest bearing demand deposits	\$ 113,726		\$ 102,812		\$ 94,408	
Interest bearing demand deposits	152,530	0.12%	137,109	0.11%	116,412	0.13%
Savings deposits	192,999	0.25%	169,579	0.23%	177,538	0.22%
Time deposits	467,931	2.19%	430,892	2.55%	398,356	3.27%
Total	\$ 927,186		\$ 840,392		\$ 786,714	

The remaining maturity of time certificates and other time deposits of \$100 or more as of December 31, 2011 was as follows:

Maturity	
Within 3 months	\$ 42,270
Within 3 to 6 months	25,357
Within 6 to 12 months	63,423
Over 12 months	104,266
Total	\$ 235,316

Borrowed Funds

The following table summarizes the Corporation's borrowings as of December 31:

	2011		2010	
	Amount	Rate	Amount	Rate
Federal Home Loan Bank advances	\$ 142,242	3.16%	\$ 113,423	3.64%
Securities sold under agreements to repurchase without stated maturity dates	57,198	0.25%	45,871	0.25%
Securities sold under agreements to repurchase with stated maturity dates	16,696	3.51%	19,623	3.28%
Federal funds purchased			16,000	0.60%
Total	\$ 216,136	2.42%	\$ 194,917	2.56%

The maturity and weighted average interest rates of FHLB advances are as follows as of December 31:

	2011		2010	
	Amount	Rate	Amount	Rate
Fixed rate advances due 2011	\$		\$ 10,086	3.96%
One year putable advances due 2011			1,000	4.75%
Fixed rate advances due 2012	17,000	2.97%	17,000	2.97%
One year putable advances due 2012	15,000	4.10%	15,000	4.10%

Edgar Filing: ISABELLA BANK CORP - Form 10-K

Fixed rate advances due 2013	5,242	4.14%	5,337	4.14%
One year putable advances due 2013	5,000	3.15%	5,000	3.15%
Fixed rate advances due 2014	25,000	3.16%	25,000	3.16%
Fixed rate advances due 2015	45,000	3.30%	25,000	4.63%
Fixed rate advances due 2016	10,000	2.15%		
Fixed rate advances due 2017	20,000	2.56%	10,000	2.35%
Total	\$ 142,242	3.16%	\$ 113,423	3.64%

Table of Contents

The maturity and weighted average interest rates of securities sold under agreements to repurchase with stated maturity dates are as follows at December 31:

	2011		2010	
	Amount	Rate	Amount	Rate
Repurchase agreements due 2011	\$		\$ 858	1.51%
Repurchase agreements due 2012	428	2.08%	1,013	2.21%
Repurchase agreements due 2013	5,000	4.51%	5,127	4.45%
Repurchase agreements due 2014	10,869	3.12%	12,087	3.00%
Repurchase agreements due 2015	399	3.25%	538	3.25%
Total	\$ 16,696	3.51%	\$ 19,623	3.28%

Contractual Obligations and Loan Commitments

The Corporation has various financial obligations, including contractual obligations and commitments, which may require future cash payments. The following schedule summarizes the Corporation's non-cancelable obligations and future minimum payments as of December 31, 2011:

	Minimum Payments Due by Period					Total
	Due in One Year or Less	After One Year But Within Three Years	After Three Years But Within Five Years	After Five Years		
Deposits with no stated maturity	\$ 476,627	\$	\$	\$	\$	\$ 476,627
Certificates of deposit with stated maturities	265,299	110,092	99,094	7,052		481,537
Borrowed funds						
Short term borrowings	57,198					57,198
Long term borrowings	32,428	96,510	10,000	20,000		158,938
Total borrowed funds	89,626	96,510	10,000	20,000		216,136
Total contractual obligations	\$ 831,552	\$ 206,602	\$ 109,094	\$ 27,052		\$ 1,174,300

The Corporation also has loan commitments that may impact liquidity. The following schedule summarizes the Corporation's loan commitments and expiration dates by period as of December 31, 2011. Since many of these commitments historically have expired without being drawn upon, the total amount of these commitments does not necessarily represent future cash requirements of the Corporation.

	Expiration Dates by Period					Total
	Due in One Year or Less	After One Year But Within Three Years	After Three Years But Within Five Years	After Five Years		
Unused commitments to extend credit	\$ 61,415	\$ 27,740	\$ 10,591	\$ 3,076		\$ 102,822
Undisbursed loans	21,806					21,806
Standby letters of credit	4,461					4,461
Total loan commitments	\$ 87,682	\$ 27,740	\$ 10,591	\$ 3,076		\$ 129,089

Capital

The capital of the Corporation consists primarily of common stock, including shares to be issued, retained earnings, and accumulated other comprehensive income. The Corporation offers dividend reinvestment and employee, director, and shareholder stock purchase plans. Under the provisions of these plans, the Corporation

Table of Contents

issued 115,359 shares of common stock generating \$2,192 of capital during 2011, and 124,904 shares of common stock generating \$2,203 of capital in 2010. The Corporation also generates capital through the Isabella Bank Corporation and Related Companies Deferred Compensation Plan for Directors (the Directors Plan), its equity compensation plan (See Note 17 Benefit Plans of Notes to Consolidated Financial Statements). Pursuant to this plan, the Corporation generated \$615 and \$650 of capital in 2011 and 2010, respectively.

The Board of Directors has adopted a common stock repurchase plan. This plan was approved to enable the Corporation to repurchase the Corporation's common stock for reissuance to the dividend reinvestment plan, the employee stock purchase plan and for distributions from the Directors Plan. During 2011 and 2010 the Corporation repurchased 120,441 shares of common stock at an average price of \$18.30 and 138,970 shares of common stock at an average price of \$18.40, respectively.

Accumulated other comprehensive loss decreased \$4,198 in 2011 and consists of \$5,498 of unrealized gains on available-for-sale investment securities which was offset by a \$1,300 increase in unrecognized pension cost. These amounts are net of tax.

The Federal Reserve Board's current recommended minimum primary capital to assets requirement is 6.0%. The Corporation's Tier 1 capital to average assets ratio, which consists of shareholders' equity plus the allowance for loan losses less goodwill and acquisition intangibles, was 8.18% at December 31, 2011. There are no commitments for significant capital expenditures.

The Federal Reserve Board has established a minimum risk based capital standard. Under this standard, a framework has been established that assigns risk weights to each category of on and off-balance-sheet items to arrive at risk adjusted total assets. Regulatory capital is divided by the risk adjusted assets with the resulting ratio compared to the minimum standard to determine whether a corporation has adequate capital. The minimum standard is 8%, of which at least 4% must consist of equity capital net of goodwill and acquisition intangibles. The following table sets forth the percentages required under the Risk Based Capital guidelines and the Corporation's values at December 31:

	2011	2010	Required
Equity Capital	12.92%	12.72%	4.00%
Secondary Capital	1.25%	1.25%	4.00%
Total Capital	14.17%	13.97%	8.00%

Isabella Bank Corporation's secondary capital includes only the allowance for loan losses. The percentage for the secondary capital under the required column is the maximum amount allowed from all sources.

The Federal Reserve Board also prescribes minimum capital requirements for the Corporation's subsidiary Bank. At December 31, 2011, the Bank exceeded these minimums. For further information regarding the Bank's capital requirements, refer to Note 16 Minimum Regulatory Capital Requirements of the Notes to Consolidated Financial Statements.

Fair Value

The Corporation utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Securities available-for-sale, trading securities, and certain liabilities are recorded at fair value on a recurring basis. Additionally, from time to time, the Corporation may be required to record at fair value other assets on a nonrecurring basis, such as loans held-for-sale, foreclosed assets, originated mortgage servicing rights, and certain other assets and liabilities. These nonrecurring fair value adjustments typically involve the application of lower of cost or market accounting or write-downs of individual assets.

Table of Contents

The table below represents the activity in Level 3 inputs measured on a recurring basis for the year ended December 31:

	2011	2010
Level 3 inputs - January 1	\$ 9,801	\$ 10,027
Calls	(1,000)	
Transfer to Level 1 inputs	(5,033)	
Transfer to Level 2 inputs	(2,049)	
Net unrealized losses on available-for-sale investment securities	(1,719)	(226)
Level 3 inputs - December 31	\$	\$ 9,801

Securities classified as Level 3 in 2010 included securities in less liquid markets and included auction rate money market preferred securities and preferred stocks. Due to the limited trading of these securities during 2010, the Corporation utilized a discounted cash flow analysis to determine fair values on December 31, 2010. This analysis considered the creditworthiness of the counterparty, the timing of expected future cash flows, the current volume of trading activity, and recent trade prices. The discount rates used were determined by using the interest rates of similarly rated financial institution debt based on the weighted average of a range of terms for corporate bond interest rates, which were obtained from published sources and ranged from 3.90% to 6.90% as of December 31, 2010. During 2011, the markets for these securities have normalized and established regular trading patterns. As a result of this normalization, the Corporation measured preferred stocks with fair values of \$5,033 utilizing Level 1 inputs and auction rate money market preferred securities with fair values of \$2,049 utilizing Level 2 inputs based on the trade price of similar securities as of December 31, 2011.

For further information regarding fair value measurements see Note 1, Nature of Operations and Summary of Significant Accounting Policies and Note 20, Fair Value of the Consolidated Financial Statements.

Interest Rate Sensitivity

Interest rate sensitivity is determined by the amount of earning assets and interest bearing liabilities repricing within a specific time period, and their relative sensitivity to a change in interest rates. Management strives to achieve reasonable stability in the net interest margin through periods of changing interest rates. One tool used by management to measure interest rate sensitivity is gap analysis. As shown in the following table, the gap analysis depicts the Corporation's position for specific time periods and the cumulative gap as a percentage of total assets.

Trading securities are included in the 0 to 3 month time frame due to their repricing characteristics. Fixed interest rate investment securities are scheduled according to their contractual maturity. Fixed rate loans are included in the appropriate time frame based on their scheduled amortization. Variable rate loans, which totaled \$162,653 as of December 31, 2011, are included in the time frame of their earliest repricing. Time deposit liabilities are scheduled based on their contractual maturity except for variable rate time deposits in the amount of \$1,559 that are included in the 0 to 3 month time frame.

Savings, NOW accounts, and money market accounts have no contractual maturity date and are believed to be predominantly noninterest rate sensitive by management. These accounts have been classified in the gap table according to their estimated withdrawal rates based upon management's analysis of deposit runoff over the past five years. Management believes this runoff experience is consistent with its expectation for the future. As of December 31, 2011, the Corporation had a negative cumulative gap within one year. A negative gap position results when more liabilities, within a specified time frame, mature or reprice than assets.

Table of Contents

The following table shows the time periods and the amount of assets and liabilities available for interest rate repricing as of December 31, 2011. The interest rate sensitivity information for investment securities is based on the expected prepayments and call dates versus stated maturities. For purposes of this analysis, nonaccrual loans and the allowance for loan losses are excluded.

	0 to 3 Months	4 to 12 Months	1 to 5 Years	Over 5 Years

The following table shows the maturity of commercial and agricultural loans outstanding at December 31, 2011. Also provided are the amounts due after one year, classified according to the sensitivity to changes in interest rates.

	1 Year or Less	1 to 5 Years	Over 5 Years	Total
Commercial and agricultural	\$ 120,463	\$ 276,367	\$ 43,529	\$ 440,359
Interest sensitivity				
Loans maturing after one year that have:				
Fixed interest rates		\$ 238,963	\$ 32,178	
Variable interest rates		37,404	11,351	
Total		\$ 276,367	\$ 43,529	

Liquidity

Liquidity is monitored regularly by the Corporation's Market Risk Committee, which consists of members of senior management. The committee reviews projected cash flows, key ratios, and liquidity available from both primary and secondary sources.

The primary sources of the Corporation's liquidity are cash and cash equivalents, certificates of deposit held in other financial institutions, trading securities, and available-for-sale investment securities, excluding auction rate money market preferred securities and preferred stock as of December 31, 2010 due to their illiquidity. These categories totaled \$467,344 or 34.9% of assets as of December 31, 2011 as compared to \$360,677 or 29.4% in 2010. Liquidity is important for financial institutions because of their need to meet loan funding commitments, depositor withdrawal requests, and various other commitments discussed in the accompanying notes to consolidated financial statements. Liquidity varies significantly daily, based on customer activity.

Table of Contents

The following table summarizes the Corporation's sources and uses of cash for the years ended December 31:

	2011	2010	\$ Variance
Net cash provided by operating activities	\$ 18,860	\$ 26,521	\$ (7,661)
Net cash used in investing activities	(105,203)	(103,877)	(1,326)
Net cash provided by financing activities	96,824	70,983	25,841
Increase (decrease) in cash and cash equivalents	10,481	(6,373)	16,854
Cash and cash equivalents January 1	18,109	24,482	(6,373)
Cash and cash equivalents December 31	\$ 28,590	\$ 18,109	\$ 10,481

The primary source of funds for the Corporation is deposits. The Corporation emphasizes interest bearing time deposits as part of its funding strategy. The Corporation also seeks noninterest bearing deposits, or checking accounts, to expand its customer base, while reducing the Corporation's cost of funds.

The Corporation has the ability to borrow from the Federal Home Loan Bank, the Federal Reserve Bank, and through various correspondent banks as federal funds purchased. These funding methods typically carry a higher interest rate than traditional market deposit accounts. Some borrowed funds, including Federal Home Loan Bank Advances, Federal Reserve Bank Discount Window Advances, and repurchase agreements, require the Corporation to pledge assets, typically in the form of certificates of deposits held in other financial institutions, investment securities, or loans as collateral.

The Corporation had the ability to borrow up to an additional \$110,069, based on the assets currently pledged as collateral. The Corporation has pledged eligible mortgage loans and investment securities as collateral for any such borrowings.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

The Corporation's primary market risks are interest rate risk and liquidity risk. The Corporation has no significant foreign exchange risk and does not utilize interest rate swaps or derivatives, except for interest rate locks and forward loan commitments, in the management of its interest rate risk. Any changes in foreign exchange rates or commodity prices would have an insignificant impact on the Corporation's interest income and cash flows. The Corporation does have a significant amount of loans extended to borrowers in agricultural production. The cash flow of such borrowers and ability to service debt is largely dependent on commodity prices. The Corporation mitigates these risks by using conservative price and production yields when calculating a borrower's available cash flow to service their debt.

Interest rate risk (IRR) is the exposure of the Corporation's net interest income, its primary source of income, to changes in interest rates. IRR results from the difference in the maturity or repricing frequency of a financial institution's interest earning assets and its interest bearing liabilities. IRR is the fundamental method in which financial institutions earn income and create shareholder value. Excessive exposure to IRR could pose a significant risk to the Corporation's earnings and capital.

The Federal Reserve Board, the Corporation's primary Federal regulator, has adopted a policy requiring the Board of Directors and senior management to effectively manage the various risks that can have a material impact on the safety and soundness of the Corporation. The risks include credit, interest rate, liquidity, operational, and reputational. The Corporation has policies, procedures, and internal controls for measuring and managing these risks. Specifically, the IRR policy and procedures include defining acceptable types and terms of investments and funding sources, liquidity requirements, limits on investments in long term assets, limiting the mismatch in repricing opportunity of assets and liabilities, and the frequency of measuring and reporting to the Board of Directors.

Table of Contents

The Corporation uses several techniques to manage IRR. The first method is gap analysis. Gap analysis measures the cash flows and/or the earliest repricing of the Corporation's interest bearing assets and liabilities. This analysis is useful for measuring trends in the repricing characteristics of the balance sheet. Significant assumptions are required in this process because of the imbedded repricing options contained in assets and liabilities. A substantial portion of the Corporation's assets are invested in loans and investment securities with issuer call options. Residential real estate and other consumer loans have imbedded options that allow the borrower to repay the balance prior to maturity without penalty, while commercial and agricultural loans have prepayment penalties. The amount of prepayments is dependent upon many factors, including the interest rate of a given loan in comparison to the current interest rate for residential mortgages, the level of sales of used homes, and the overall availability of credit in the market place. Generally, a decrease in interest rates will result in an increase in the Corporation's cash flows from these assets. A significant portion of the Corporation's securities are callable or subject to prepayment. The call option is more likely to be exercised in a period of decreasing interest rates. Investment securities, other than those that are callable, do not have any significant imbedded options. Savings and checking deposits may generally be withdrawn on request without prior notice. The timing of cash flows from these deposits is estimated based on historical experience. Time deposits have penalties that discourage early withdrawals.

The second technique used in the management of IRR is to combine the projected cash flows and repricing characteristics generated by the gap analysis and the interest rates associated with those cash flows to project future interest income. By changing the amount and timing of the cash flows and the repricing interest rates of those cash flows, the Corporation can project the effect of changing interest rates on its interest income. Based on the projections prepared for the year ended December 31, 2011, the Corporation's net interest income would decrease slightly during a period of increasing interest rates.

Table of Contents

The following tables provide information about the Corporation's assets and liabilities that are sensitive to changes in interest rates as of December 31, 2011 and 2010. The Corporation has no interest rate swaps, futures contracts, or other derivative financial options. The principal amounts of assets and time deposits maturing were calculated based on the contractual payment and maturity dates. Savings and NOW accounts are based on management's estimate of their future cash flows.

Forward Looking Statements

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The Corporation intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Reform Act of 1995, and is including this statement for purposes of these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies and expectations of the Corporation, are generally identifiable by use of the words believe, expect, intend, anticipate, estimate, or similar expressions. The Corporation's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations and future prospects of the Corporation and the subsidiaries include, but are not limited to, changes in interest rates, general economic conditions, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government including policies of the U.S. Treasury, the Federal Reserve Board, the Federal Deposit Insurance Corporation, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Corporation's market area, and accounting principles, policies and guidelines. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning the Corporation and its business, including additional factors that could materially affect the Corporation's financial results, is included in the Corporation's filings with the Securities and Exchange Commission.

Item 8. Financial Statements and Supplementary Data

The following consolidated financial statements of the Corporation accompanied by the report of our independent registered public accounting firm are set forth on pages 42 through 94 of this report:

Report of Independent Registered Public Accounting Firm

Consolidated Balance Sheets

Consolidated Statements of Changes in Shareholders' Equity

Consolidated Statements of Income

Consolidated Statements of Comprehensive Income

Consolidated Statements of Cash Flows

Notes to Consolidated Financial Statements

The supplementary data regarding quarterly results of operations are set forth under the table headed "Summary of Selected Financial Data" under Item 6 on page 15 of this report.

Report of Independent Registered Public Accounting Firm

Shareholders and Board of Directors

Isabella Bank Corporation

Mount Pleasant, Michigan

We have audited the accompanying consolidated balance sheets of *Isabella Bank Corporation* as of December 31, 2011 and 2010, and the related consolidated statements of changes in shareholders' equity, income, comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2011. We also have audited *Isabella Bank Corporation's* internal control over financial reporting as of December 31, 2011, based on criteria established in the *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). *Isabella Bank Corporation's* management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the effectiveness of *Isabella Bank Corporation's* internal control over financial reporting, based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material misstatement exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. We believe that our audits provide a reasonable basis for our opinion.

A corporation's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A corporation's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the corporation; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the corporation are being made only in accordance with authorizations of management and directors of the corporation; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the corporation's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of *Isabella Bank Corporation* as of December 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011 in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion *Isabella Bank Corporation* maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the criteria established in the *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share amounts)

NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION AND CONSOLIDATION: The consolidated financial statements include the accounts of Isabella Bank Corporation (the Corporation), a financial services holding company, and its wholly owned subsidiaries, Isabella Bank (the Bank), Financial Group Information Services, and IB&T Employee Leasing, LLC. All intercompany balances and accounts have been eliminated in consolidation.

NATURE OF OPERATIONS: Isabella Bank Corporation is a financial services holding company offering a wide array of financial products and services in several mid-Michigan counties. Its banking subsidiary, Isabella Bank, offers banking services through 25 locations, 24 hour banking services locally and nationally through shared automatic teller machines, 24 hour online banking, and direct deposits to businesses, institutions, and individuals. Lending services offered include commercial loans, agricultural loans, residential real estate loans, and consumer loans. Deposit services include interest and noninterest bearing checking accounts, savings accounts, money market accounts, and certificates of deposit. Other related financial products include trust and investment services, safe deposit box rentals, and credit life insurance. Active competition, principally from other commercial banks, savings banks and credit unions, exists in all of the Corporation's principal markets. The Corporation's results of operations can be significantly affected by changes in interest rates or changes in the local economic environment.

Financial Group Information Services provides information technology services to Isabella Bank Corporation and its subsidiaries.

IB&T Employee Leasing provides payroll services, benefit administration, and other human resource services to Isabella Bank Corporation and its subsidiaries.

USE OF ESTIMATES: In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated balance sheet and reported amounts of revenues and expenses during the reporting year. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the fair value of certain available-for-sale investment securities, the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans, valuation of goodwill and other intangible assets, and determinations of assumptions in accounting for the defined benefit pension plan.

FAIR VALUE MEASUREMENTS: Fair value refers to the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants in the market in which the reporting entity transacts such sales or transfers based on the assumptions market participants would use when pricing an asset or liability. Assumptions are developed based on prioritizing information within a fair value hierarchy that gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data, such as the reporting entity's own data. The Corporation may choose to measure eligible items at fair value at specified election dates. Unrealized gains and losses on items for which the fair value measurement option has been elected are reported in earnings at each subsequent reporting date. The fair value option (i) may be applied instrument by instrument, with certain exceptions, allowing the Corporation to record identical financial assets and liabilities at fair value or by another measurement basis permitted under generally accepted accounting principles, (ii) is irrevocable (unless a new election date occurs) and (iii) is applied only to entire instruments and not to portions of instruments.

Table of Contents

For assets and liabilities recorded at fair value, it is the Corporation's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements for those financial instruments for which there is an active market. In cases where the market for a financial asset or liability is not active, the Corporation includes appropriate risk adjustments that market participants would make for nonperformance and liquidity risks when developing fair value measurements. Fair value measurements for assets and liabilities for which limited or no observable market data exists are accordingly based primarily upon estimates, are often calculated based on the economic and competitive environment, the characteristics of the asset or liability and other factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

The Corporation utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Investment securities available-for-sale, trading securities, and certain liabilities are recorded at fair value on a recurring basis. Additionally, from time to time, the Corporation may be required to record other assets at fair value on a nonrecurring basis, such as mortgage loans available-for-sale, impaired loans, foreclosed assets, originated mortgage servicing rights, goodwill, and certain other assets and liabilities. These nonrecurring fair value adjustments typically involve the application of lower of cost or market accounting or write downs of individual assets.

Fair Value Hierarchy

Under fair value measurement and disclosure authoritative guidance, the Corporation groups assets and liabilities measured at fair value into three levels, based on the markets in which the assets and liabilities are traded, and the reliability of the assumptions used to determine fair value, based on the prioritization of inputs in the valuation techniques. These levels are:

- Level 1: Valuation is based upon quoted prices for identical instruments traded in active markets.
- Level 2: Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model based valuation techniques for which all significant assumptions are observable in the market.
- Level 3: Valuation is generated from model based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs. Transfers between measurement levels are recognized at the end of reporting periods.

For a further discussion of fair value considerations, refer to Note 20 to the consolidated financial statements.

SIGNIFICANT GROUP CONCENTRATIONS OF CREDIT RISK: Most of the Corporation's activities conducted are with customers located within the central Michigan area. A significant amount of its outstanding loans are secured by commercial and residential real estate. Other than these types of loans, there is no significant concentration to any other industry or any one customer.

CASH AND CASH EQUIVALENTS: For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash and balances due from banks, federal funds sold, and other deposit accounts. Generally, federal funds sold are for a one day period. The Corporation maintains deposit accounts in various financial institutions which generally exceed federally insured limits or are not insured. Management does not believe the Company is exposed to any significant interest, credit or other financial risk as a result of these deposits.

Table of Contents

CERTIFICATES OF DEPOSIT HELD IN OTHER FINANCIAL INSTITUTIONS: Certificates of deposits held in other financial institutions consist of interest bearing certificates of deposit that mature within 3 years and are carried at cost.

TRADING SECURITIES: The Corporation engages in trading activities of its own accounts. Securities that are held principally for resale in the near term are recorded in the trading assets account at fair value with changes in fair value recorded in noninterest income. Interest income is included in net interest income.

AVAILABLE-FOR-SALE INVESTMENT SECURITIES: All purchases of investment securities are generally classified as available-for-sale. However, classification of investment securities as either held to maturity or trading may be elected by management of the Corporation. Securities classified as available-for-sale are recorded at fair value, with unrealized gains and losses, net of the effect of deferred income taxes, excluded from earnings and reported in other comprehensive income. Auction rate money market preferred securities and preferred stocks are considered equity securities for federal income tax purposes, and as such, no estimated federal income tax impact is expected or recorded. Auction rate money market preferred securities and preferred stock are recorded at fair value, with unrealized gains and losses, considered not other-than-temporary, excluded from earnings and reported in other comprehensive income. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Realized gains and losses on the sale of available-for-sale investment securities are determined using the specific identification method.

Investment securities are reviewed quarterly for possible other-than-temporary impairment (OTTI). In determining whether an other-than-temporary impairment exists for debt securities, management must assert that: (a) it does not have the intent to sell the security; and (b) it is more likely than not it will not have to sell the security before recovery of its cost basis. If these conditions are not met, the Corporation must recognize an other-than-temporary impairment charge through earnings for the difference between the debt security's amortized cost basis and its fair value, and such amount is included in noninterest income. For debt securities that do not meet the above criteria, and the Corporation does not expect to recover the security's amortized cost basis, the security is considered other-than-temporarily impaired. For these debt securities, the Corporation separates the total impairment into the credit risk loss component and the amount of the loss related to market and other risk factors. In order to determine the amount of the credit loss for a debt security, the Corporation calculates the recovery value by performing a discounted cash flow analysis based on the current cash flows and future cash flows management expects to recover. The amount of the total other-than-temporary impairment related to the credit risk is recognized in earnings and is included in noninterest income. The amount of the total other-than-temporary impairment related to other risk factors is recognized as a component of other comprehensive income. For debt securities that have recognized an other-than-temporary impairment through earnings, if through subsequent evaluation there is a significant increase in the cash flow expected, the difference between the amortized cost basis and the cash flows expected to be collected is accreted as interest income.

Available-for-sale equity securities are reviewed for other-than-temporary impairment at each reporting date. This evaluation considers a number of factors including, but not limited to, the length of time and extent to which the fair value has been less than cost, the financial condition and near term prospects of the issuer, and management's ability and intent to hold the securities until fair value recovers. If it is determined that management does not have the ability and intent to hold the securities until recovery or that there are conditions that indicate that a security may not recover in value then the difference between the fair value and the cost of the security is recognized in earnings and is included in noninterest income. No such losses for debt or equity securities were recognized in 2011, 2010, or 2009.

LOANS: Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding principal balance adjusted for any charge-offs, the allowance for loans losses, and any deferred fees or costs on originated loans. Interest income on loans is accrued over the term of the loan based on the principal amount outstanding. Loan origination fees and certain direct loan origination costs are capitalized and recognized as a component of interest income over the term of the loan using the level yield method.

Table of Contents

The accrual of interest on agricultural, commercial and mortgage loans is discontinued at the time the loan is 90 days or more past due unless the credit is well secured and in the process of collection. Consumer loans are typically charged off no later than 180 days past due. Past due status is based on contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

For loans that are placed on non-accrual status or charged off, all interest accrued in the current calendar year, but not collected, is reversed against interest income while interest accrued in prior calendar years, but not collected is charged against the allowance for loan losses. The interest on these loans is accounted for on the cash-basis, until qualifying for return to accrual status. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured. For impaired loans not classified as nonaccrual, interest income continues to be accrued over the term of the loan based on the principal amount outstanding.

ALLOWANCE FOR LOAN LOSSES: The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of the loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are deemed to be impaired. For such loans that are also analyzed for specific allowance allocations, an allowance is established when the discounted cash flows or collateral value or observable market price of the impaired loan is lower than the carrying value of that loan. The general component covers non classified loans and is based on historical loss experience. An unallocated component is maintained to cover uncertainties that management believes affect its estimate of probable losses based on qualitative factors. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Loans may be classified as impaired if they meet one or more of the following criteria:

1. There has been a chargeoff of its principal balance;
2. The loan has been classified as a troubled debt restructuring; or
3. The loan is in nonaccrual status.

Impairment is measured on a loan by loan basis for agricultural and commercial loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral, less cost to sell, if the loan is collateral dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment.

LOANS HELD FOR SALE: Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or fair value as determined by aggregating outstanding commitments from investors or current investor yield requirements. Net unrealized losses, if any, are recognized through a valuation allowance of which the provision is accounted for in other noninterest expenses in the consolidated statements of income.

Mortgage loans held for sale are sold with the mortgage servicing rights retained by the Corporation. The carrying value of mortgage loans sold is reduced by the cost allocated to the associated mortgage servicing rights. Gains or losses on sales of mortgage loans are recognized based on the difference between the selling price and the carrying value of the related mortgage loans sold.

Table of Contents

TRANSFERS OF FINANCIAL ASSETS: Transfers of financial assets, including mortgage loans and participation loans are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is determined to be surrendered when 1) the assets have been legally isolated from the Corporation, 2) the transferee obtains the right (free of conditions that constrain it from taking advantage of the right) to pledge or exchange the transferred assets and 3) the Corporation does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity. Other than servicing, the Corporation has no substantive continuing involvement related to these loans.

SERVICING: Servicing assets are recognized as separate assets when rights are acquired through purchase or through sale of financial assets. The Corporation has no purchased servicing rights. For sales of mortgage loans, a portion of the cost of originating the loan is allocated to the servicing right based on relative fair value. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses.

Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying rights into tranches based on predominant risk characteristics, such as interest rate, loan type, and investor type. Impairment is recognized through a valuation allowance for an individual tranche, to the extent that fair value is less than the capitalized amount for the tranche. If the Corporation later determines that all or a portion of the impairment no longer exists for a particular tranche, a reduction of the valuation allowance may be recorded as an increase to income. Capitalized servicing rights are reported in other assets and are amortized into noninterest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. The unpaid principal balance of mortgages serviced for others was \$304,626 and \$309,882 with capitalized servicing rights of \$2,374 and \$2,667 at December 31, 2011 and 2010, respectively.

Servicing fee income is recorded for fees earned for servicing loans for others. The fees are based on a contractual percentage of the outstanding principal; or a fixed amount per loan and are recorded as income when earned. The Corporation recorded servicing fee revenue of \$732, \$760, and \$724 related to residential mortgage loans serviced for others during 2011, 2010, and 2009, respectively and is included in other non interest income.

LOANS ACQUIRED THROUGH TRANSFER: Authoritative accounting guidance related to acquired loans requires that a valuation allowance for loans acquired in a transfer, including in a business combination, reflect only losses incurred after acquisition, and should not be recorded at acquisition. This standard applies to any loan acquired in a transfer that shows evidence of credit quality deterioration since it was originated.

FORECLOSED ASSETS: Assets acquired through, or in lieu, of loan foreclosure are held for sale and are initially recorded at the lower of the Corporation's carrying amount or fair value less estimated selling costs at the date of transfer, establishing a new cost basis. Any write downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan losses. After foreclosure, property held for sale is carried at the lower of the new cost basis or fair value less costs to sell. Impairment losses on property to be held and used are measured at the amount by which the carrying amount of property exceeds its fair value. Costs relating to holding these assets are expensed as incurred. Valuations are periodically performed by management, and any subsequent write-downs are recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the lower of the Corporation's carrying amount or fair value less costs to sell. Foreclosed assets of \$1,876 and \$2,067 as of December 31, 2011 and 2010, respectively, are included in Other Assets on the accompanying consolidated balance sheets.

PREMISES AND EQUIPMENT: Land is carried at cost. Buildings and equipment are carried at cost, less accumulated depreciation which is computed principally by the straight-line method based upon the estimated useful lives of the related assets, which range from 3 to 40 years. Major improvements are capitalized and

Table of Contents

appropriately amortized based upon the useful lives of the related assets or the expected terms of the leases, if shorter, using the straight-line method. Maintenance, repairs and minor alterations are charged to current operations as expenditures occur. Management annually reviews these assets to determine whether carrying values have been impaired.

FDIC INSURANCE PREMIUM: In 2009, the Corporation was required to prepay quarterly FDIC risk-based assessments for the fourth quarter of 2009 and each of the quarters in the years ending December 31, 2010, 2011 and 2012. The assessments for 2010 through 2012, which had a carrying balance of \$2,588 and \$3,586 as of December 31, 2011 and 2010, respectively, have been recorded as a prepaid asset in the accompanying consolidated balance sheets in Other Assets, and will be expensed on a ratable basis quarterly through December 31, 2012.

EQUITY SECURITIES WITHOUT READILY DETERMINABLE FAIR VALUES: Included in equity securities without readily determinable fair values are restricted securities, which are carried at cost, and investments in nonconsolidated entities accounted for under the equity method of accounting.

Equity securities without readily determinable fair values consist of the following as of December 31:

	2011	2010
Federal Home Loan Bank Stock	\$ 7,380	\$ 7,596
Investment in Corporate Settlement Solutions	6,611	6,793
Federal Reserve Bank Stock	1,879	1,879
Investment in Valley Financial Corporation	1,000	1,000
Other	319	296
Total	\$ 17,189	\$ 17,564

EQUITY COMPENSATION PLAN: At December 31, 2011, the Isabella Bank Corporation and Related Companies Deferred Compensation Plan for Directors (the Directors Plan) had 218,023 shares eligible to be issued to participants, for which an associated grantor trust (Rabbi Trust) held 16,585 shares. The Corporation had 224,663 shares to be issued in 2010, with 32,686 shares held in the Rabbi Trust. Compensation costs relating to share based payment transactions are recognized in the consolidated financial statements as the services are rendered, with the cost measured based on the fair value of the equity or liability instruments issued (see Equity Compensation Plan in Note 17.) The Corporation has no other share-based compensation plans.

CORPORATE OWNED LIFE INSURANCE: The Corporation has purchased life insurance policies on key members of management. In the event of death of one of these individuals, the Corporation would receive a specified cash payment equal to the face value of the policy. Such policies are recorded at their cash surrender value, or the amount that can be realized on the balance sheet dates. Increases in cash surrender value in excess of single premiums paid are reported as Other Noninterest Income.

As of December 31, 2011 and 2010, the present value of the post retirement benefits payable by the Corporation to the covered employees was estimated to be \$2,633 and \$2,573, respectively, and is included in Accrued Interest Payable and Other Liabilities on the consolidated balance sheets. The periodic policy maintenance costs were \$60 and \$68 for 2011 and 2010, respectively.

ACQUISITION INTANGIBLES AND GOODWILL: The Corporation previously acquired branch facilities and related deposits in business combinations accounted for as a purchase. The acquisitions included amounts related to the valuation of customer deposit relationships (core deposit intangibles). Core deposit intangibles arising from acquisitions are included in Other Assets and are being amortized over their estimated lives and evaluated for potential impairment on at least an annual basis. Goodwill, which is included in Other Assets, represents the excess of purchase price over identifiable assets, is not amortized but is evaluated for impairment

Table of Contents

on at least an annual basis. Goodwill is typically qualitatively evaluated to determine if it is more likely than not that the carrying balance is impaired. If it is determined that the carrying balance of goodwill is more likely than not to be impaired, management performs a cash flow valuation to determine the extent of the potential impairment. Acquisition intangibles are tested for impairment with a cash flow valuation. This valuation method requires a significant degree of management judgment. In the event the projected undiscounted net operating cash flows for these intangible assets are less than the carrying value, the asset is recorded at fair value as determined by the valuation model.

OFF BALANCE SHEET CREDIT RELATED FINANCIAL INSTRUMENTS: In the ordinary course of business, the Corporation has entered into commitments to extend credit, including commitments under credit card arrangements, home equity lines of credit, commercial letters of credit, and standby letters of credit. Such financial instruments are recorded only when funded.

FEDERAL INCOME TAXES: Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax assets or liability is determined based on the tax effects of the temporary differences between the book and tax bases on the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws. Valuation allowances are established, where necessary, to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the year plus or minus the change during the year in deferred tax assets and liabilities.

The Corporation analyzes its filing positions in the jurisdictions where it is required to file income tax returns, as well as all open tax years in these jurisdictions. The Corporation has also elected to retain its existing accounting policy with respect to the treatment of interest and penalties attributable to income taxes, and continues to reflect any charges for such, to the extent they arise, as a component of its noninterest expenses.

MARKETING COSTS: Marketing costs are expensed as incurred (see Note 11).

RECLASSIFICATIONS: Certain amounts reported in the 2010 and 2009 consolidated financial statements have been reclassified to conform with the 2011 presentation.

NOTE 2 COMPUTATION OF EARNINGS PER SHARE

Basic earnings per share represents income available to common shareholders divided by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustments to income that would result from the assumed issuance. Potential common shares that may be issued by the Corporation relate solely to outstanding shares in the Directors Plan, see Note 17.

Earnings per common share have been computed based on the following:

	2011	2010	2009
Average number of common shares outstanding for basic calculation	7,572,841	7,541,676	7,517,276
Average potential effect of shares in the Directors Plan (1)	194,634	187,744	181,319
Average number of common shares outstanding used to calculate diluted earnings per common share	7,767,475	7,729,420	7,698,595
Net income	\$ 10,210	\$ 9,045	\$ 7,800
Earnings per share			
Basic	\$ 1.35	\$ 1.20	\$ 1.04
Diluted	\$ 1.31	\$ 1.17	\$ 1.01

(1) Exclusive of shares held in the Rabbi Trust

NOTE 3 ACCOUNTING STANDARDS UPDATES

Recently Adopted Accounting Standards Updates

Accounting Standards Update (ASU) No. 2010-06: *Improving Disclosures about Fair Value Measurement*

In January 2010, ASU No. 2010-06 amended Accounting Standards Codification (ASC) Topic 820 Fair Value Measurements and Disclosures to add new disclosures for: (1) significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfers and (2) presenting separately information about purchases, sales, issuances and settlements for Level 3 fair value instruments (as opposed to reporting activity as net).

ASU No. 2010-06 also clarified existing disclosures by requiring reporting entities to provide fair value measurement disclosures for each class of assets and liabilities and to provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements.

The new authoritative guidance was effective for interim and annual periods beginning after December 15, 2009 except for the disclosures about purchases, sales, issuances and settlements in the rollforward of activity in Level 3 fair value measurements, which was effective for interim and annual periods beginning after December 15, 2010. The new guidance did not have a significant impact on the Corporation's consolidated financial statements.

ASU No. 2011-01: *Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20*

In January 2011, ASU No. 2011-01 amended ASC Topic 310, Receivables to temporarily delay the effective date of new disclosures related to troubled debt restructurings as required in ASU No. 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which was initially intended to be effective for interim and annual periods ending after December 15, 2010. The effective date of the new disclosures about troubled debt restructurings was delayed to coordinate with the newly issued guidance for determining what constitutes a troubled debt restructuring (ASU No. 2011-02). The new disclosures were effective for interim and annual periods beginning on or after June 15, 2011 and increased the level of reporting disclosures related to troubled debt restructurings.

ASU No. 2011-02: *A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*

In April 2011, ASU No. 2011-02 amended ASC Topic 310, Receivables to clarify authoritative guidance as to what loan modifications constitute concessions, and would therefore be considered a troubled debt restructuring. Classification as a troubled debt restructuring will automatically classify such loans as impaired. ASU No. 2011-02 clarifies that:

If a debtor does not otherwise have access to funds at a market rate for debt with similar risk characteristics as the modified debt, the modification would be considered to be at a below-market rate, which may indicate that the creditor has granted a concession.

A modification that results in a temporary or permanent increase in the contractual interest rate cannot be presumed to be at a rate that is at or above a market rate and therefore could still be considered a concession.

A creditor must consider whether a borrower's default is probable on any of its debt in the foreseeable future when assessing financial difficulty.

A modification that results in an insignificant delay in payments is not a concession.

In addition, ASU No. 2011-02 clarifies that a creditor is precluded from using the effective interest rate test in the debtor's guidance on modification of payables (ASC Topic 470, Debt) when evaluating whether a modification constitutes a troubled debt restructuring. The new authoritative guidance was effective for interim and annual

Table of Contents

periods beginning on or after June 15, 2011 and increased the volume of loans that the Corporation classified as troubled debt restructurings and required additional disclosures (see Note 6 Loans and Allowance for Loan Losses).

ASU No. 2011-08: Testing Goodwill for Impairment

In September 2011, ASU No. 2011-08 amended ASC Topic 350, Goodwill and Other to simplify the testing of goodwill impairments. This update will allow for a qualitative assessment of goodwill to determine whether or not it is necessary to perform the two-step impairment test described in ASC Topic 350. While the new authoritative guidance is effective for fiscal years beginning after December 15, 2011, the Corporation elected to early adopt the guidance as of December 31, 2011. The new guidance did not have any impact on the Corporation's consolidated financial statements.

Pending Accounting Standards Updates

ASU No. 2011-03: Reconsideration of Effective Control for Repurchase Agreements

In April 2011, ASU No. 2011-03 amended ASC Topic 310, Transfers and Servicing to eliminate from the assessment of effective control, the criteria calling for the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed upon terms, even in the event of the transferee's default. The assessment of effective control should instead focus on the transferor's contractual rights and obligations. The new authoritative guidance is effective for interim and annual periods beginning on or after December 15, 2011 and is not expected to impact the Corporation's consolidated financial statements.

ASU No. 2011-04: Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS

In May 2011, ASU No. 2011-04 amended ASC Topic 820, Fair Value Measurement to align fair value measurements and disclosures in U.S. Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRS). The ASU changes the wording used to describe the requirements in GAAP for measuring fair value and disclosures about fair value.

The ASU clarifies the application of existing fair value measurements and disclosure requirements related to:

The application of highest and best use and valuation premise concepts.

Measuring the fair value of an instrument classified in a reporting entity's stockholders' equity.

Disclosure about fair value measurements within Level 3 of the fair value hierarchy.

The ASU also changes particular principles or requirements for measuring fair value and disclosing information measuring fair value and disclosures related to:

Measuring the fair value of financial instruments that are managed within a portfolio.

Application of premiums and discounts in a fair value measurement.

The new authoritative guidance is effective for interim and annual periods beginning on or after December 15, 2011 and is not expected to have a significant impact on the Corporation's consolidated financial statements.

ASU No. 2011-05: Presentation of Comprehensive Income

Edgar Filing: ISABELLA BANK CORP - Form 10-K

In June 2011, ASU No. 2011-05 amended ASC Topic 220, Comprehensive Income to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. In addition, to increase the prominence of items reported in other comprehensive income, and to facilitate the convergence of GAAP and IFRS, the FASB eliminated the option to present components of other comprehensive income as part of the statement of changes in shareholders' equity.

Table of Contents

The new authoritative guidance is effective for interim and annual periods beginning on or after December 15, 2011 and is not expected to have a significant impact on Corporation's consolidated financial statements since the Corporation has always elected to present a separate statement of comprehensive income.

NOTE 4 TRADING SECURITIES

Trading securities, at fair value, consist of the following investments at December 31:

	2011	2012
States and political subdivisions	\$ 4,710	\$ 5,837

Included in the net trading losses of \$78 during 2011, were \$60 of net trading losses on securities that relate to the Corporation's trading portfolio as of December 31, 2011. Included in net trading gains of \$94 during 2010, were \$74 of net trading gains on securities that relate to the Corporation's trading portfolio as of December 31, 2010.

NOTE 5 AVAILABLE-FOR-SALE INVESTMENT SECURITIES

The amortized cost and fair value of available-for-sale investment securities, with gross unrealized gains and losses, are as follows as of December 31:

	Amortized Cost	2011		Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Government sponsored enterprises	\$ 395	\$ 2	\$	\$ 397
States and political subdivisions	166,832	8,157	51	174,938
Auction rate money market preferred	3,200		1,151	2,049
Preferred stocks	6,800		1,767	5,033
Mortgage-backed securities	140,842	2,807	47	143,602
Collateralized mortgage obligations	96,545	2,556		99,101
Total	\$ 414,614	\$ 13,522	\$ 3,016	\$ 425,120

	Amortized Cost	2010		Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Government sponsored enterprises	\$ 5,394	\$ 10	\$	\$ 5,404
States and political subdivisions	167,328	3,349	960	169,717
Auction rate money market preferred	3,200		335	2,865
Preferred stocks	7,800		864	6,936
Mortgage-backed securities	101,096	1,633	514	102,215
Collateralized mortgage obligations	44,617	103	1,133	43,587
Total	\$ 329,435	\$ 5,095	\$ 3,806	\$ 330,724

Table of Contents

The amortized cost and fair value of available-for-sale securities by contractual maturity at December 31, 2011 are as follows:

	Due in One Year or Less	Maturing			Securities With Variable Monthly Payments or Continual Call Dates	Total
		After One Year But Within Five Years	After Five Years But Within Ten Years	After Ten Years		
Government sponsored enterprises	\$	\$	\$ 395	\$	\$	\$ 395
States and political subdivisions	8,381	34,610	87,436	36,405		166,832
Auction rate money market preferred					3,200	3,200
Preferred stocks					6,800	6,800
Mortgage-backed securities					140,842	140,842
Collateralized mortgage obligations					96,545	96,545
Total amortized cost	\$ 8,381	\$ 34,610	\$ 87,831	\$ 36,405	\$ 247,387	\$ 414,614
Fair value	\$ 8,441	\$ 35,904	\$ 93,586	\$ 37,404	\$ 249,785	\$ 425,120

Expected maturities for government sponsored enterprises and states and political subdivisions may differ from contractual maturities because issuers may have the right to call or prepay obligations.

As auction rate money market preferreds and preferred stocks have continual call dates, they are not reported by a specific maturity group. Because of their variable monthly payments, mortgage-backed securities and collateralized mortgage obligations are not reported by a specific maturity group.

A summary of the activity related to the sale of available-for-sale debt securities is as follows during the years ended December 31:

	2011	2010	2009
Proceeds from sales of securities	\$ 8,877	\$ 18,303	\$ 32,204
Gross realized gains	\$ 3	\$ 351	\$ 648
Gross realized losses		(3)	
Net realized gains	\$ 3	\$ 348	\$ 648
Applicable income tax expense	\$ 1	\$ 118	\$ 220

The cost basis used to determine the realized gains or losses of securities sold was the amortized cost of the individual investment security as of the trade date.

Information pertaining to available-for-sale securities with gross unrealized losses at December 31 aggregated by investment category and length of time that individual securities have been in continuous loss position, follows:

	2011
	Less Than Twelve Months
	Over Twelve Months

Edgar Filing: ISABELLA BANK CORP - Form 10-K

Number of securities in an unrealized loss position:		82		4	86

As a result of market conditions associated with certain auction rate money market preferred investment securities, \$7,800 of the Corporation's initial investment of \$11,000 converted to preferred stocks with debt like characteristics in 2009. Due to the limited trading of these securities in 2009 and 2010, the Corporation utilized a discounted cash flow analysis to determine fair values on December 31, 2010. This analysis considered the creditworthiness of the counterparty, the timing of expected future cash flows, the current volume of trading activity, and recent trade prices. The discount rates used were determined by using the interest rates of similarly rated financial institution's debt based on the weighted average of a range of terms for corporate bond interest rates, which were obtained from published sources and ranged from 3.90% to 6.90% as of December 31, 2010. During 2011, the markets for these securities have normalized and established regular trading patterns. As such, the Corporation determined the fair value for these securities based on quoted prices for identical securities, or based on quoted prices for similar securities as of December 31, 2011.

As of December 31, 2011 and December 31, 2010, management conducted an analysis to determine whether all securities currently in an unrealized loss position, including auction rate money market preferred securities and preferred stocks, should be considered other-than-temporarily-impaired (OTTI). Such analyses considered, among other factors, the following criteria:

Has the value of the investment declined more than what is deemed to be reasonable based on a risk and maturity adjusted discount rate?

Is the investment credit rating below investment grade?

Is it probable that the issuer will be unable to pay the amount when due?

Is it more likely than not that the Corporation will not have to sell the security before recovery of its cost basis?

Has the duration of the investment been extended?

As of December 31, 2011, the Corporation held an auction rate money market preferred security and preferred stocks which continued to be in an unrealized loss position as a result of the securities' interest rates, as they are currently lower than the offering rates of securities with similar characteristics. Management has determined that any declines in the fair value of these securities are the result of changes in interest rates and not risks related to the underlying credit quality of the security. Additionally, none of these securities are deemed to be below investment grade, management does not intend to sell the securities in an unrealized loss position, and it is more likely than not that the Corporation will not have to sell the securities before recovery of their cost basis. As a result, the Corporation has not recognized an other-than-temporary impairment related to these declines in fair value.

Based on the Corporation's analysis using the above criteria, the fact that management has asserted that it does not have the intent to sell these securities in an unrealized loss position, and that it is more likely than not the

Table of Contents

Corporation will not have to sell the securities before recovery of their cost basis, management does not believe that the values of any such securities are other-than-temporarily impaired as of as of December 31, 2011 or 2010.

NOTE 6 LOANS AND ALLOWANCE FOR LOAN LOSSES (ALLL)

The Corporation grants commercial, agricultural, residential, and consumer loans to customers situated primarily in Clare, Gratiot, Isabella, Mecosta, Midland, Montcalm, and Saginaw counties in Michigan. The ability of the borrowers to honor their repayment obligations is often dependent upon the real estate, agricultural, light manufacturing, retail, gaming and tourism, higher education, and general economic conditions of this region. Substantially all of the consumer and residential mortgage loans are secured by various items of property, while commercial loans are secured primarily by real estate, business assets, and personal guarantees; a portion of loans are unsecured.

Loans that management has the intent and ability to hold in its portfolio are reported at their outstanding principal balance adjusted for any charge-offs, the allowance for loans losses, and any deferred fees or costs. Interest income on loans is accrued over the term of the loan based on the principal amount outstanding. Loan origination fees and certain direct loan origination costs are capitalized and recognized as a component of interest income over the term of the loan using the level yield method.

The accrual of interest on agricultural, commercial and mortgage loans is typically discontinued at the time the loan is 90 days or more past due unless the credit is well-secured and in the process of collection. Consumer loans are typically charged off no later than 180 days past due. Past due status is based on contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

For loans that are placed on nonaccrual status or charged off, all interest accrued in the current calendar year, but not collected, is reversed against interest income while interest accrued in prior calendar years, but not collected, is charged against the allowance for loan losses. The interest on these loans is accounted for on the cash basis, until qualifying for return to accrual status. Loans are returned to accrual status after six months of continuous performance. For impaired loans not classified as nonaccrual, interest income continues to be accrued over the term of the loan based on the principal amount outstanding.

Commercial and agricultural loans include loans for commercial real estate, commercial operating loans, farmland and agricultural production, and state and political subdivisions. Repayment of these loans is often dependent upon the successful operation and management of a business; thus, these loans generally involve greater risk than other types of lending. The Corporation minimizes its risk by limiting the amount of loans to any one borrower to \$12,500. Borrowers with credit needs of more than \$12,500 are serviced through the use of loan participations with other commercial banks. Commercial and agricultural real estate loans generally require loan-to-value limits of less than 80%. Depending upon the type of loan, past credit history, and current operating results, the Corporation may require the borrower to pledge accounts receivable, inventory, and property and equipment. Personal guarantees are generally required from the owners of closely held corporations, partnerships, and sole proprietorships. In addition, the Corporation requires annual financial statements, prepares cash flow analyses, and reviews credit reports as deemed necessary.

The Corporation offers adjustable rate mortgages, fixed rate balloon mortgages, construction loans, and fixed rate mortgage loans which typically have amortization periods up to a maximum of 30 years. Fixed rate loans with an amortization of greater than 15 years are generally sold upon origination to the Federal Home Loan Mortgage Corporation. Fixed rate residential mortgage loans with an amortization of 15 years or less may be held in the Corporation's portfolio, held for future sale, or sold upon origination. Factors used in determining when to sell these mortgages include management's judgment about the direction of interest rates, the Corporation's need for fixed rate assets in the management of its interest rate sensitivity, and overall loan demand.

Table of Contents

Lending policies generally limit the maximum loan-to-value ratio on residential mortgages to 95% of the lower of the appraised value of the property or the purchase price, with the condition that private mortgage insurance is required on loans with loan to value ratios in excess of 80%. Substantially all loans upon origination have a loan to value ratio of less than 80%. Underwriting criteria for residential real estate loans include: evaluation of the borrower's ability to make monthly payments, the value of the property securing the loan, ensuring the payment of principal, interest, taxes, and hazard insurance does not exceed 28% of a borrower's gross income, all debt servicing does not exceed 36% of income, acceptable credit reports, verification of employment, income, and financial information. Appraisals are performed by independent appraisers and reviewed internally. All mortgage loan requests are reviewed by a mortgage loan committee or through a secondary market automated underwriting system; loans in excess of \$400 require the approval of the Bank's Internal Loan Committee, Board of Directors, or the Board of Directors Loan Committee.

Consumer loans include automobile loans, secured and unsecured personal loans, and overdraft protection related loans. Loans are amortized generally for a period of up to 6 years. The underwriting emphasis is on a borrower's perceived intent and ability to pay rather than collateral value. No consumer loans are sold to the secondary market.

The ALLL is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the ALLL when management believes the uncollectibility of the loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The ALLL is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The primary factors behind the determination of the level of the ALLL are specific allocations for impaired loans, historical loss percentages, as well as unallocated components. Specific allocations for impaired loans are primarily determined based on the difference between the net realizable value of the loan's underlying collateral or the net present value of the projected payment stream and its recorded investment. Historical loss allocations are calculated at the loan class and segment levels based on a migration analysis of the loan portfolio over the preceding three years. An unallocated component is maintained to cover uncertainties that management believes affect its estimate of probable losses based on qualitative factors. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Table of Contents**Allowance for Loan Losses**

A summary of changes in the allowance for loan losses (ALLL) and the recorded investment in loans by segments follows:

	Allowance for Credit Losses and Recorded Investment in Loans					
	Year Ended December 31, 2011

Internally assigned risk ratings are reviewed, at a minimum, when loans are renewed or when management has knowledge of improvements or deterioration of the credit quality of individual credits. Descriptions of the internally assigned risk ratings for commercial and agricultural loans are as follows:

1. **EXCELLENT Substantially Risk Free**

Credit has strong financial condition and solid earnings history, characterized by:

High liquidity, strong cash flow, low leverage.

Unquestioned ability to meet all obligations when due.

Experienced management, with management succession in place.

Secured by cash.

Table of Contents

2. HIGH QUALITY Limited Risk

Credit with sound financial condition and has a positive trend in earnings supplemented by:

Favorable liquidity and leverage ratios.

Ability to meet all obligations when due.

Management with successful track record.

Steady and satisfactory earnings history.

If loan is secured, collateral is of high quality and readily marketable.

Access to alternative financing.

Well defined primary and secondary source of repayment.

If supported by guaranty, the financial strength and liquidity of the guarantor(s) are clearly evident.

3. HIGH SATISFACTORY Reasonable Risk

Credit with satisfactory financial condition and further characterized by:

Working capital adequate to support operations.

Cash flow sufficient to pay debts as scheduled.

Management experience and depth appear favorable.

Loan performing according to terms.

If loan is secured, collateral is acceptable and loan is fully protected.

4. LOW SATISFACTORY Acceptable Risk

Credit with bankable risks, although some signs of weaknesses are shown:

Would include most start-up businesses.

Occasional instances of trade slowness or repayment delinquency may have been 10-30 days slow within the past year.

Management's abilities are apparent, yet unproven.

Weakness in primary source of repayment with adequate secondary source of repayment.

Loan structure generally in accordance with policy.

If secured, loan collateral coverage is marginal.

Adequate cash flow to service debt, but coverage is low.

To be classified as less than satisfactory, only one of the following criteria must be met.

5. SPECIAL MENTION Criticized

Credit constitutes an undue and unwarranted credit risk but not to the point of justifying a classification of substandard. The credit risk may be relatively minor yet constitute an unwarranted risk in light of the circumstances surrounding a specific loan:

Downward trend in sales, profit levels and margins.

Impaired working capital position.

Cash flow is strained in order to meet debt repayment.

Table of Contents

Loan delinquency (30-60 days) and overdrafts may occur.

Shrinking equity cushion.

Diminishing primary source of repayment and questionable secondary source.

Management abilities are questionable.

Weak industry conditions.

Litigation pending against the borrower.

Collateral / guaranty offers limited protection.

Negative debt service coverage, however the credit is well collateralized and payments are current.

6. SUBSTANDARD Classified

Credit where the borrower's current net worth, paying capacity, and value of the collateral pledged is inadequate. There is a distinct possibility that the Corporation will implement collection procedures if the loan deficiencies are not corrected. In addition, the following characteristics may apply:

Sustained losses have severely eroded the equity and cash flow.

Deteriorating liquidity.

Serious management problems or internal fraud.

Original repayment terms liberalized.

Likelihood of bankruptcy.

Inability to access other funding sources.

Reliance on secondary source of repayment.

Litigation filed against borrower.

Collateral provides little or no value.

Requires excessive attention of the loan officer.

Borrower is uncooperative with loan officer.

7. VULNERABLE Classified

Credit is considered Substandard and warrants placing on nonaccrual. Risk of loss is being evaluated and exit strategy options are under review. Other characteristics that may apply:

Insufficient cash flow to service debt.

Minimal or no payments being received.

Limited options available to avoid the collection process.

Transition status, expect action will take place to collect loan without immediate progress being made.

8. DOUBTFUL Workout

Credit has all the weaknesses inherent in a Substandard loan with the added characteristic that collection and/or liquidation is pending. The possibility of a loss is extremely high, but its classification as a loss is deferred until liquidation procedures are completed, or reasonably estimable. Other characteristics that may apply:

Normal operations are severely diminished or have ceased.

Seriously impaired cash flow.

Table of Contents

Original repayment terms materially altered.

Secondary source of repayment is inadequate.

Survivability as a going concern is impossible.

Collection process has begun.

Bankruptcy petition has been filed.

Judgments have been filed.

Portion of the loan balance has been charged-off.

9. LOSS Charge off

Credits are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification is for charged off loans but does not mean that the asset has absolutely no recovery or salvage value. These loans are further characterized by:

Liquidation or reorganization under bankruptcy, with poor prospects of collection.

Fraudulently overstated assets and/or earnings.

Collateral has marginal or no value.

Debtor cannot be located.

Over 120 days delinquent.

The Corporation's primary credit quality indicators for residential real estate and consumer loans is the individual loan's past due aging. The following tables summarize the Corporation's past due and current loans as of December 31:

	Accruing Interest and Past Due:			2011		
	30-89 Days	90 Days or More	Nonaccrual	Total Past Due and Nonaccrual	Current	Total

Impaired Loans

As a result of adopting the amendments in ASU No. 2011-02, the Corporation reassessed all loan restructurings that occurred on or after January 1, 2011 for identification as troubled debt restructurings (TDR s). The Corporation identified as TDR s certain loans for which the allowance for loan losses had previously been measured under a general allowance for loan losses methodology. Upon identifying those loans as TDR s, the Corporation classified them as impaired. The amendments in ASU No. 2011-02 require retrospective application of the impairment measurement guidance for those loans newly identified as impaired during the period. The Corporation s recorded investment in loans for which the allowance for credit losses was previously measured under a general allowance for credit losses methodology and are now impaired was \$5,136, with a specific valuation allowance of \$1,022 as of December 31, 2011.

Loans may be classified as impaired if they meet one or more of the following criteria:

1. There has been a chargeoff of its principal balance (in whole or in part);
2. The loan has been classified as a TDR; or

Edgar Filing: ISABELLA BANK CORP - Form 10-K

3. The loan is in nonaccrual status.

Impairment is measured on a loan by loan basis for commercial, commercial real estate loans, agricultural, or agricultural mortgage loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral, less cost to sell, if the loan is collateral dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment.

Interest income is recognized on impaired loans in nonaccrual status on the cash basis, but only after all principal has been collected. For impaired loans not in nonaccrual status, interest income is recognized daily as earned according to the terms of the loan agreement.

Table of Contents

The following is a summary of information pertaining to impaired loans as of and for the year ended December 31:

	Outstanding Balance	2011 Unpaid Principal Balance	Valuation Allowance	2011 Year to Date Average Outstanding Balance	Interest Income Recognized

Total impaired loans	\$ 12,654
Valuation allowance related to impaired loans	\$ 612
Year to date average outstanding balance of impaired loans	\$ 13,249
Year to date interest income recognized on impaired loans	\$ 340

The Corporation had committed to advance \$243 in connection with impaired loans, which include TDRs, as of December 31, 2011. No additional funds were committed to be advanced in connection with impaired loans, as of December 31, 2010.

Troubled Debt Restructurings

Loan modifications are considered to be TDRs when the modification includes terms outside of normal lending practices to a borrower who is experiencing financial difficulties.

Typical concessions granted include, but are not limited to:

Edgar Filing: ISABELLA BANK CORP - Form 10-K

1. Agreeing to interest rates below prevailing market rates for debt with similar risk characteristics.
2. Extending the amortization period beyond typical lending guidelines for debt with similar risk characteristics.
3. Forbearance of principal.
4. Forbearance of accrued interest.

Table of Contents

To determine if a borrower is experiencing financial difficulties, the Corporation considers if:

1. The borrower is currently in default on any of their debt.
2. It is likely that the borrower would default on any of their debt if the concession was not granted.
3. The borrower's cash flow was sufficient to service all of their debt if the concession was not granted.
4. The borrower has declared, or is in the process of declaring, bankruptcy.
5. The borrower is a going concern (if the entity is a business).

The following is a summary of information pertaining to TDRs during 2011:

	Number of Loans	Pre-Modification Recorded Investment	Post-Modification Recorded Investment
Commercial			
Commercial real estate	1	\$ 408	\$ 408
Commercial other	42	12,575	12,132
Total commercial	43	12,983	12,540

Unsecured			2	20
Total consumer	6	65	3	24
Total	72	\$ 13,887	24	\$ 4,421

Table of Contents

The Corporation did not restructure any loans through the forbearance of principal or accrued interest during 2011.

Based on the Corporation's historical loss experience, losses associated with TDRs are not significantly different than other impaired loans within the same loan segment. As such, TDRs, including TDRs that have been modified in the past 12 months that subsequently defaulted, are analyzed in the same manner as other impaired loans within their respective loan segment. The Corporation had no loans that were modified as troubled debt restructurings since January 1, 2010 that subsequently defaulted.

The following is a summary of TDR loan balances as of December 31:

	2011	2010	2009
Troubled debt restructurings	\$ 18,756	\$ 5,763	\$ 4,977

NOTE 7 PREMISES AND EQUIPMENT

A summary of premises and equipment at December 31 follows:

	2011	2010
Land	\$ 5,174	\$ 4,694
Buildings and improvements	22,397	21,502
Furniture and equipment	26,926	25,822
Total	54,497	52,018
Less: accumulated depreciation	29,871	27,391
Premises and equipment, net	\$ 24,626	\$ 24,627

Depreciation expense amounted to \$2,521, \$2,522 and \$2,349 in 2011, 2010, and 2009, respectively.

NOTE 8 GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amount of goodwill was \$45,618 at December 31, 2011 and 2010.

Identifiable intangible assets at year end were as follows:

	2011		
	Gross Intangible Assets	Accumulated Amortization	Net Intangible Assets
Core deposit premium resulting from acquisitions	\$ 5,373	\$ 4,199	\$ 1,174
	2010		
	Gross Intangible Assets	Accumulated Amortization	Net Intangible Assets
Core deposit premium resulting from acquisitions	\$ 5,373	\$ 3,900	\$ 1,473

Amortization expense associated with identifiable intangible assets was \$299, \$338, and \$375 in 2011, 2010, and 2009, respectively.

Table of Contents

Estimated amortization expense associated with identifiable intangibles for each of the next five years succeeding December 31, 2011, and thereafter is as follows:

Year	Amount
2012	\$ 260
2013	221
2014	183
2015	145
2016	106
Thereafter	259
	\$ 1,174

NOTE 9 DEPOSITS

Scheduled maturities of time deposits for the next five years, and thereafter, are as follows:

Year	Amount
2012	\$ 265,299
2013	63,290
2014	46,802
2015	55,493
2016	43,601
Thereafter	7,052
	\$ 481,537

Interest expense on time deposits greater than \$100 was \$4,302 in 2011, \$4,427 in 2010, and \$5,246 in 2009.

NOTE 10 BORROWED FUNDS

Borrowed funds consist of the following obligations at December 31:

	2011		2010	
	Amount	Rate	Amount	Rate
Federal Home Loan Bank advances	\$ 142,242	3.16%	\$ 113,423	3.64%
Securities sold under agreements to repurchase without stated maturity dates	57,198	0.25%	45,871	0.25%
Securities sold under agreements to repurchase with stated maturity dates	16,696	3.51%	19,623	3.28%
Federal funds purchased			16,000	0.60%
Total	\$ 216,136	2.42%	\$ 194,917	2.56%

The Federal Home Loan Bank borrowings are collateralized by U.S. government and federal agency securities and a blanket lien on all qualified 1-to-4 family mortgage loans. Advances are also secured by FHLB stock owned by the Corporation. The Corporation had the ability to borrow up to an additional \$110,069, based on the assets currently pledged as collateral.

Table of Contents

The maturity and weighted average interest rates of FHLB advances are as follows as of December 31:

	2011		2010	
	Amount	Rate	Amount	Rate
Fixed rate advances due 2011	\$		\$ 10,086	3.96%
One year putable advances due 2011			1,000	4.75%
Fixed rate advances due 2012	17,000	2.97%	17,000	2.97%
One year putable advances due 2012	15,000	4.10%	15,000	4.10%
Fixed rate advances due 2013	5,242	4.14%	5,337	4.14%
One year putable advances due 2013	5,000	3.15%	5,000	3.15%
Fixed rate advances due 2014	25,000	3.16%	25,000	3.16%
Fixed rate advances due 2015	45,000	3.30%	25,000	4.63%
Fixed rate advances due 2016	10,000	2.15%		
Fixed rate advances due 2017	20,000	2.56%	10,000	2.35%
Total	\$ 142,242	3.16%	\$ 113,423	3.64%

Securities sold under agreements to repurchase are classified as secured borrowings. Securities sold under agreements to repurchase without stated maturity dates generally mature within one to four days from the transaction date. Securities sold under agreements to repurchase are reflected at the amount of cash received in connection with the transaction. The securities underlying the agreements have a fair value of \$99,869 and \$86,381 at December 31, 2011 and 2010, respectively. Such securities remain under the control of the Corporation. The Corporation may be required to provide additional collateral based on the fair value of underlying securities.

The maturity and weighted average interest rates of securities sold under agreements to repurchase with stated maturity dates are as follows at December 31:

	2011		2010	
	Amount	Rate	Amount	Rate
Repurchase agreements due 2011	\$		\$ 858	1.51%
Repurchase agreements due 2012	428	2.08%	1,013	2.21%
Repurchase agreements due 2013	5,000	4.51%	5,127	4.45%
Repurchase agreements due 2014	10,869	3.12%	12,087	3.00%
Repurchase agreements due 2015	399	3.25%	538	3.25%
Total	\$ 16,696	3.51%	\$ 19,623	3.28%

Securities sold under repurchase agreements without stated maturity dates, federal funds purchased, and Federal Reserve Bank discount window advances generally mature within one to four days from the transaction date. The following table provides a summary of short term borrowings for the years ended December 31:

	2011			2010		
	Maximum Month-End Balance	YTD Average Balance	Weighted Average Interest Rate During the Period	Maximum Month-End Balance	YTD Average Balance	Weighted Average Interest Rate During the Period
Securities sold under agreements to repurchase without stated maturity dates	\$ 57,198	\$ 45,397	0.25%	\$ 56,410	\$ 44,974	0.28%
Federal funds purchased	18,300	3,467	0.51%	16,000	333	0.60%
Federal Reserve Bank discount window advance				7,500	103	0.75%

Table of Contents

The Corporation had pledged certificates of deposit held in other financial institutions, trading securities, available-for-sale securities, and 1-4 family mortgage loans in the following amounts at December 31:

	2011	2010
Pledged to secure borrowed funds	\$ 292,092	\$ 297,297
Pledged to secure repurchase agreements	99,869	86,381
Pledged for public deposits and for other purposes necessary or required by law	26,761	14,626
Total	\$ 418,722	\$ 398,304

The Corporation had no investment securities that are restricted to be pledged for specific purposes.

NOTE 11 OTHER NONINTEREST EXPENSES

A summary of expenses included in Other Noninterest Expenses are as follows for the year ended December 31:

	2011	2010	2009
Marketing and community relations	\$ 1,174	\$ 1,093	\$ 894
Directors fees	842	887	923
Audit and SOX compliance fees	714	710	546
Foreclosed asset and collection	576	916	831
Education and travel	526	499	395
Printing and supplies	405	420	529
Postage and freight	388	395	472
Consulting fees	386	167	201
Legal fees	302	382	415
Amortization of deposit premium	299	338	375
All other	1,573	1,499	1,798
Total other	\$ 7,185	\$ 7,306	\$ 7,379

NOTE 12 FEDERAL INCOME TAXES

Components of the consolidated provision for income taxes are as follows for the year ended December 31:

	2011	2010	2009
Currently payable	\$ 965	\$ 1,425	\$ 1,487
Deferred expense (benefit)	389	179	(641)
Income tax expense	\$ 1,354	\$ 1,604	\$ 846

The reconciliation of the provision for federal income taxes and the amount computed at the federal statutory tax rate of 34% of income before federal income taxes is as follows for the years ended December 31:

2011	2010	2009
------	------	------

Table of Contents

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for federal income tax purposes. Significant components of the Corporation's deferred tax assets and liabilities, included in other assets in the accompanying consolidated balance sheets, are as follows as of December 31:

	2011	2010
Deferred tax assets		
Allowance for loan losses	\$ 3,278	\$ 3,270
Deferred directors' fees	2,384	2,364
Employee benefit plans	158	122
Core deposit premium and acquisition expenses	800	694
Net unrealized losses on trading securities	364	400
Net unrecognized actuarial loss on pension plan	1,780	1,109
Life insurance death benefit payable	804	804
Alternative minimum tax	729	686
Other	260	219
Total deferred tax assets	10,557	9,668
Deferred tax liabilities		
Prepaid pension cost	851	851
Premises and equipment	992	902
Accretion on securities	34	36
Core deposit premium and acquisition expenses	1,102	1,000
Net unrealized gains on available-for-sale securities	4,564	847
Other	937	518
Total deferred tax liabilities	8,480	4,154
Net deferred tax assets	\$ 2,077	\$ 5,514

The Corporation and its subsidiaries are subject to U.S. federal income tax. The Corporation is no longer subject to examination by taxing authorities for years before 2008. There are no material uncertain tax positions requiring recognition in the Corporation's consolidated financial statements. The Corporation does not expect the total amount of unrecognized tax benefits to significantly increase in the next twelve months.

The Corporation recognizes interest and/or penalties related to income tax matters in income tax expense. The Corporation does not have any amounts accrued for interest and penalties at December 31, 2011 and 2010 and is not aware of any claims for such amounts by federal income tax authorities.

Included in other comprehensive income for 2011 and 2010 are the changes in unrealized losses of \$1,719 and unrealized losses of \$226, respectively, related to auction rate money market securities and preferred stock. For federal income tax purposes, these securities are considered equity investments for which no federal deferred income taxes are expected or recorded.

Table of Contents**NOTE 13 OFF-BALANCE-SHEET ACTIVITIES****Credit-Related Financial Instruments**

The Corporation is party to credit related financial instruments with off-balance-sheet risk. These financial instruments are entered into in the normal course of business to meet the financing needs of its customers. These financial instruments, which include commitments to extend credit and standby letters of credit, involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. The contract or notional amounts of these instruments reflect the extent of involvement the Corporation has in a particular class of financial instrument.

	Contract Amount	
	2011	2010
Unfunded commitments under lines of credit	\$ 102,822	\$ 110,201
Commercial and standby letters of credit	4,461	4,881
Commitments to grant loans	21,806	13,382

Unfunded commitments under lines of credit are commitments for possible future extensions of credit to existing customers. These commitments may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements.

Commercial and standby letters of credit are conditional commitments issued by the Corporation to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements, including commercial paper, bond financing, and similar transactions. These commitments to extend credit and letters of credit mature within one year. The credit risk involved in these transactions is essentially the same as that involved in extending loans to customers. The Corporation evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Corporation upon the extension of credit, is based on management's credit evaluation of the borrower. While the Corporation considers standby letters of credit to be guarantees, the amount of the liability related to such guarantees on the commitment date is not significant and a liability related to such guarantees is not recorded on the consolidated balance sheets.

Commitments to grant loans are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The amount of collateral obtained, if it is deemed necessary by the Corporation, is based on management's credit evaluation of the customer. Commitments to grant loans include loans committed to be sold to the secondary market.

The Corporation's exposure to credit-related loss in the event of nonperformance by the counter parties to the financial instruments for commitments to extend credit and standby letters of credit could be up to the contractual notional amount of those instruments. The Corporation uses the same credit policies in deciding to make these commitments as it does for extending loans to customers. No significant losses are anticipated as a result of these commitments.

NOTE 14 ON-BALANCE SHEET ACTIVITIES***Derivative Loan Commitments***

Mortgage loan commitments are referred to as derivative loan commitments if the loan that will result from exercise of the commitment will be held for sale upon funding. The Corporation enters into commitments to fund residential mortgage loans at specific times in the future, with the intention that these loans will subsequently be sold in the secondary market. A mortgage loan commitment binds the Corporation to lend funds to a potential borrower at a specified interest rate within a specified period of time, generally up to 60 days after inception of the rate lock.

Table of Contents

Outstanding derivative loan commitments expose the Corporation to the risk that the price of the loans arising from the exercise of the loan commitment might decline from the inception of the rate lock to funding of the loan due to increases in mortgage interest rates. If interest rates increase, the value of these loan commitments decreases. Conversely, if interest rates decrease, the value of these loan commitments increases. The notional amount of undesignated interest rate lock commitments was \$875 and \$547 at December 31, 2011 and 2010, respectively.

Forward Loan Sale Commitments

To protect against the price risk inherent in derivative loan commitments, the Corporation utilizes both mandatory delivery and best efforts forward loan sale commitments to mitigate the risk of potential decreases in the values of loan that would result from the exercise of the derivative loan commitments.

With a mandatory delivery contract, the Corporation commits to deliver a certain principal amount of mortgage loans to an investor at a specified price on or before a specified date. If the Corporation fails to deliver the amount of mortgages necessary to fulfill the commitment by the specified date, it is obligated to pay a pair-off fee, based on then current market prices, to the investor to compensate the investor for the shortfall.

With a best efforts contract, the Corporation commits to deliver an individual mortgage loan of a specified principal amount and quality to an investor if the loan to the underlying borrower closes. Generally, the price the investor will pay the seller for an individual loan is specified prior to the loan being funded (e.g. on the same day the lender commits to lend funds to a potential borrower).

The Corporation expects that these forward loan sale commitments will experience changes in fair value opposite to the change in fair value of derivative loan commitments. The notional amount of undesignated forward loan sale commitments was \$4,080 and \$1,729 at December 31, 2011 and 2010, respectively.

The fair values of the rate lock loan commitments related to the origination of mortgage loans that will be held for sale and the forward loan sale commitments are deemed insignificant by management and, accordingly, are not recorded in the accompanying consolidated financial statements.

NOTE 15 COMMITMENTS AND OTHER MATTERS

Banking regulations require the Bank to maintain cash reserve balances in currency or as deposits with the Federal Reserve Bank. At December 31, 2011 and 2010, the reserve balances amounted to \$821 and \$470, respectively.

Banking regulations limit the transfer of assets in the form of dividends, loans, or advances from the Bank to the Corporation. At December 31, 2011, substantially all of the Bank's assets were restricted from transfer to the Corporation in the form of loans or advances. Consequently, bank dividends are the principal source of funds for the Corporation. Payment of dividends without regulatory approval is limited to the current years retained net income plus retained net income for the preceding two years, less any required transfers to common stock. At January 1, 2012, the amount available for dividends without regulatory approval was approximately \$13,235.

NOTE 16 MINIMUM REGULATORY CAPITAL REQUIREMENTS

The Corporation (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the Federal Reserve Bank and the Federal Deposit Insurance Corporation (the Regulators). Failure to meet minimum capital requirements can initiate mandatory and possibly additional discretionary actions by the Regulators that if undertaken, could have a material effect on the Corporation's and Bank's financial statements. Under regulatory capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation and the Bank must meet specific capital guidelines that include quantitative

Table of Contents

measures of their assets, liabilities, capital, and certain off-balance-sheet items, as calculated under regulatory accounting standards. The Bank's capital amounts and classifications are also subject to qualitative judgments by the Regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Corporation and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and Tier 1 capital to average assets (as defined). Management believes, as of December 31, 2011 and 2010, that the Corporation and the Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2011, the most recent notifications from the Regulators categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the following tables. There are no conditions or events since the notifications that management believes has changed the Bank's categories. The Corporation's and the Bank's actual capital amounts and ratios are also presented in the table.

	Actual		Minimum Capital Requirement		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2011						
Total capital to risk weighted assets

Consolidated	99,192	8.42	47,116	4.00	N/A	N/A

Table of Contents**NOTE 17 BENEFIT PLANS****401(k) Plan**

The Corporation has a 401(k) plan in which substantially all employees are eligible to participate. Employees may contribute up to 50% of their compensation subject to certain limits based on federal tax laws. The Corporation makes a 3.0% safe harbor contribution for all eligible employees and matching contributions equal to 50% of the first 4.0% of an employee's compensation contributed to the Plan during the year. Employees are 100% vested in the safe harbor contributions and are 0% vested through their first two years of employment and are 100% vested after 6 years of service for matching contributions. For 2011, 2010 and 2009, expenses attributable to the Plan were \$652, \$625, and \$617, respectively.

Defined Benefit Pension Plan

The Corporation has a non-contributory defined benefit pension plan which was curtailed in 2007. Due to the curtailment, future salary increases will not be considered and the benefits are based on years of service and the employee's five highest consecutive years of compensation out of the last ten years of service rendered through March 1, 2007.

Changes in the projected benefit obligation and plan assets during each year, the funded status of the plan, and the net amount recognized on the Corporation's consolidated balance sheets using an actuarial measurement date of December 31, are summarized as follows during the years ended December 31:

	2011	2010
Change in benefit obligation		
Benefit obligation, January 1	\$ 9,660	\$ 8,897
Interest cost	507	531
Actuarial loss	1,750	679
Benefits paid, including plan expenses	(583)	(447)
Benefit obligation, December 31	11,334	9,660
Change in plan assets		
Fair value of plan assets, January 1	8,900	8,355
Investment return	148	945
Contributions	138	47
Benefits paid, including plan expenses	(583)	(447)
Fair value of plan assets, December 31	8,603	8,900
Deficiency in funded status at December 31, included on the consolidated balance sheets in accrued interest payable and other liabilities	\$ (2,731)	\$ (760)
	2011	2010
Change in accrued pension benefit costs		
Accrued benefit cost at January 1	\$ (760)	\$ (542)
Contributions	138	47
Net periodic cost for the year	(138)	(193)
Net change in unrecognized actuarial loss and prior service cost	(1,971)	(72)
Accrued pension benefit cost at December 31	\$ (2,731)	\$ (760)

Table of Contents

Amounts recognized as a component of other comprehensive income (loss) consist of the following amounts during the years ended December 31:

	2011	2010	2009
Change in unrecognized pension cost	\$ (1,971)	\$ (72)	\$ 374
Tax effect	671	25	(127)
Net	\$ (1,300)	\$ (47)	\$ 247

The accumulated benefit obligation was \$11,334 and \$9,660 at December 31, 2011 and 2010, respectively.

The Company has recorded the funded status of the Plan in its consolidated balance sheets. The Company adjusts the underfunded status in a liability account to reflect the current funded status of the plan. Any gains or losses that arise during the period but are not recognized as components of net periodic benefit cost will be recognized as a component of other comprehensive income (loss). The components of net periodic benefit cost are as follows for the years ended December 31:

	2011	2010	2009
Net periodic benefit cost			
Interest cost on projected benefit obligation	\$ 507	\$ 531	\$ 504
Expected return on plan assets	(522)	(491)	(524)
Amortization of unrecognized actuarial net loss	153	153	169
Net periodic benefit cost	\$ 138	\$ 193	\$ 149

Accumulated other comprehensive income (loss) at December 31, 2011 includes net unrecognized actuarial losses before income taxes of \$5,233, of which \$253 is expected to be amortized into benefit cost during 2012.

The actuarial assumptions used in determining the projected benefit obligation are as follows for the year ended December 31:

	2011	2010	2009
Discount rate	4.22%	5.36%	5.87%
Expected long-term rate of return	6.00%	6.00%	6.00%

The actuarial weighted average assumptions used in determining the net periodic pension costs are as follows for the year ended December 31:

	2011	2010	2009
Discount rate	5.36%	6.10%	5.87%
Expected long-term return on plan assets	6.00%	6.00%	6.00%

As a result of the curtailment of the Plan, there is no rate of compensation increase considered in the above assumptions.

The expected long term rate of return is an estimate of anticipated future long term rates of return on plan assets as measured on a market value basis. Factors considered in arriving at this assumption include:

Historical longer term rates of return for broad asset classes.

Edgar Filing: ISABELLA BANK CORP - Form 10-K

Actual past rates of return achieved by the plan.

The general mix of assets held by the plan.

The stated investment policy for the plan.

The selected rate of return is net of anticipated investment related expenses.

Table of Contents**Plan Assets**

The Corporation's overall investment strategy is to moderately grow the portfolio by investing 50% of the portfolio in equity securities and 50% in fixed income securities. This strategy is designed to generate a long term rate of return of 6.0%. Equity securities primarily consist of the S&P 500 Index with a smaller allocation to the Small Cap and International Index. Fixed income securities are invested in the Bond Market Index. The Plan has appropriate assets invested in short term investments to meet near-term benefit payments.

The asset mix and the sector weighting of the investments are determined by the pension committee, which is comprised of members of management of the Corporation. Consultations are held with a third party investment advisor retained by the Corporation to manage the Plan. The Corporation reviews the performance of the advisor no less than annually.

The fair values of the Corporation's pension plan assets by asset category were as follows as of December 31:

Description	2011		2010	
	Total	(Level 2)	Total	(Level 2)
Asset Category				
Short-term investments	\$ 16	\$ 16	\$ 108	\$ 108
Common collective trusts				
Fixed income	4,357	4,357	4,470	4,470
Equity investments	4,230	4,230	4,322	4,322
	\$ 8,603	\$ 8,603	\$ 8,900	\$ 8,900

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010:

Short-term investments: Shares of a money market portfolio, which is valued using amortized cost, which approximates fair value.

Common collective trusts: These investments are public investment securities valued using the net asset value (NAV) provided by a third party investment advisor. The NAV is quoted on a private market that is not active; however, the unit price is based on underlying investments which are traded on an active market.

The Corporation anticipates contributions of \$135 to the plan in 2012.

Estimated future benefit payments are as follows for the next ten years:

Year	Amount
2012	\$ 416
2013	415
2014	508
2015	554
2016	559
Years 2017 - 2021	3,155

The components of projected net periodic benefit cost are as follows for the year ended December 31:

2012

Edgar Filing: ISABELLA BANK CORP - Form 10-K

Interest cost on projected benefit obligation	\$ 470
Expected return on plan assets	(508)
Amortization of unrecognized actuarial net loss	291
Net periodic benefit cost	\$ 253

Table of Contents

Equity Compensation Plan

Pursuant to the terms of the Isabella Bank Corporation and Related Companies Deferred Compensation Plan for Directors (the Directors Plan), directors of the Corporation and its subsidiaries are required to defer at least 25% of their earned board fees into the Directors Plan. The fees are converted on a quarterly basis into the shares of the Corporation's common stock based on the fair value of a share of common stock as of the relevant valuation date. Stock credited to a participant's account is eligible for stock and cash dividends as declared. Upon retirement from the board or the occurrence of certain other events, the participant is eligible to receive a lump-sum, in-kind, distribution of all of the stock that is then in his or her account, and any unconverted cash will be converted to and rounded up to whole shares of stock and distributed, as well. The Directors Plan does not allow for cash settlement, and therefore, such share-based payment awards qualify for classification as equity. All authorized but unissued shares of common stock are eligible for issuance under the Directors Plan. The Corporation may also purchase shares of common stock on the open market to meet its obligations under the Directors Plan.

The Corporation maintains a Rabbi Trust to fund the Directors Plan. A Rabbi Trust is an irrevocable grantor trust to which the Corporation may contribute assets for the limited purpose of funding a nonqualified deferred compensation plan. Although the Corporation may not reach the assets of the Rabbi Trust (Trust) for any purpose other than meeting its obligations under the Directors Plan, the assets of the Trust remain subject to the claims of the Corporation's creditors and are included in the consolidated financial statements. The Corporation may contribute cash or common stock to the Trust from time to time for the sole purpose of funding the Directors Plan. The Trust will use any cash that the Corporation contributed to purchase shares of the Corporation's common stock on the open market through the Corporation's brokerage services department.

The components of shares eligible to be issued under the Directors Plan were as follows as of December 31:

	2011		2010	
	Eligible Shares	Fair Value	Eligible Shares	Fair Value
Unissued	201,438	\$ 4,774	191,977	\$ 3,321
Shares held in Rabbi Trust	16,585	393	32,686	565
Total	218,023	\$ 5,167	224,663	\$ 3,886

Other Employee Benefit Plans

The Corporation maintains two nonqualified supplementary employee retirement plans to provide supplemental retirement benefits to specified participants. Expenses related to these programs for 2011, 2010, and 2009 were \$444, \$363, and \$343, respectively, and are being recognized over the participants' expected years of service.

The Corporation maintains a non-leveraged employee stock ownership plan (ESOP) and a profit sharing plan which was frozen to new participants on December 31, 2006. Contributions to the plans are discretionary and are approved by the Board of Directors and recorded as compensation expense. During 2009, the Board of Directors approved a contribution of \$50 to the ESOP. The Corporation made no contributions in 2010 or 2011. Compensation cost related to the plans for 2011, 2010, and 2009 were \$20, \$0, and \$50, respectively. Total allocated shares outstanding related to the ESOP at December 31, 2011, 2010, and 2009 were 246,404, 246,419, and 271,421, respectively. Such shares are included in the computation of dividends and earnings per share in each of the respective years.

The Corporation maintains a self-funded medical plan under which the Corporation is responsible for the first \$50 per year of claims made by a covered family. Medical claims are subject to a lifetime maximum of \$5,000 per covered individual. Expenses are accrued based on estimates of the aggregate liability for claims incurred and the Corporation's experience. Expenses were \$2,045 in 2011, \$2,101 in 2010 and \$2,155 in 2009.

Table of Contents

The Corporation maintains the Isabella Bank Corporation Stockholder Dividend Reinvestment Plan and Employee Stock Purchase Plan (the Dividend Reinvestment Plan). The dividend reinvestment feature of the Dividend Reinvestment Plan allows shareholders to purchase previously unissued Isabella Bank Corporation common shares using dividends paid on shares held in the plan. The employee stock purchase feature of the Dividend Reinvestment Plan allows employees and directors to purchase Isabella Bank Corporation common stock through payroll deduction. The shareholder stock purchase feature of the Dividend Reinvestment Plan enables existing shareholders to purchase additional shares of the Corporation's stock directly from the Corporation. The number of shares reserved for issuance under these plans were 885,000, with 197,719 shares unissued at December 31, 2011. During 2011, 2010 and 2009, 115,359, 124,904, and 126,874 shares were issued for \$2,192, \$2,203, and \$2,396, respectively, in cash pursuant to these plans.

NOTE 18 ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Comprehensive income (loss) includes net income as well as unrealized gains and losses, net of tax, on available-for-sale investment securities owned and changes in the funded status of the Corporation's defined benefit pension plan, which are excluded from net income. Unrealized investment securities gains and losses and changes in the funded status of the pension plan, net of tax, are excluded from net income, and are reflected as a direct charge or credit to shareholders' equity. Comprehensive income (loss) and the related components are disclosed in the accompanying consolidated statements of comprehensive income for each of the years ended December 31, 2011, 2010, and 2009.

The following is a summary of the components comprising the balance of accumulated other comprehensive income (loss) reported on the consolidated balance sheets as of December 31 (presented net of tax):

	2011	2010
Unrealized gains on available-for-sale investment securities	\$ 5,942	\$ 444
Unrecognized pension costs	(3,453)	(2,153)
Accumulated other comprehensive income (loss)	\$ 2,489	\$ (1,709)

NOTE 19 RELATED PARTY TRANSACTIONS

In the ordinary course of business, the Corporation grants loans to principal officers and directors and their affiliates (including their families and companies in which they have 10% or more ownership). Annual activity during the years ended December 31 consisted of the following:

	2011	2010
Balance, beginning of year	\$ 4,347	\$ 4,142
New loans	1,800	3,038
Repayments	(2,419)	(2,833)
Balance, ending of year	\$ 3,728	\$ 4,347

Total deposits of these principal officers and directors and their affiliates amounted to \$7,664 and \$11,556 at December 31, 2011 and 2010, respectively. In addition, Isabella Bank Corporation's Employee Stock Ownership Plan held deposits with the Bank aggregating \$275 and \$254, respectively, at December 31, 2011 and 2010.

NOTE 20 FAIR VALUE**Estimated Fair Values of Financial Instruments Not Recorded at Fair Value in their Entirety on a Recurring Basis**

Disclosure of the estimated fair values of financial instruments, which differ from carrying values, often requires the use of estimates. In cases where quoted market values in an active market are not available, the Corporation uses present value techniques and other valuation methods to estimate the fair values of its financial instruments. These valuation methods require considerable judgment and the resulting estimates of fair value can be significantly affected by the assumptions made and methods used.

Table of Contents

The carrying amount and estimated fair value of financial instruments not recorded at fair value in their entirety on a recurring basis on the Corporation's consolidated balance sheets are as follows as of December 31:

	2011		2010	
	Estimated Fair Value	Carrying Value	Estimated Fair Value	Carrying Value
ASSETS				
Cash and demand deposits due from banks	\$ 28,590	\$ 28,590	\$ 18,109	\$ 18,109
Certificates of deposit held in other financial institutions	8,977	8,924	15,908	15,808
Mortgage loans available-for-sale	3,252	3,205	1,182	1,182
Net loans	756,802	737,916	734,634	722,931
Accrued interest receivable	5,848	5,848	5,456	5,456
Equity securities without readily determinable fair values	17,189	17,189	17,564	17,564
Originated mortgage servicing rights	2,374	2,374	2,673	2,667
LIABILITIES				
Deposits without stated maturities	476,627	476,627	424,978	424,978
Deposits with stated maturities	499,644	481,537	454,332	452,361
Borrowed funds	222,538	210,894	190,180	184,494
Accrued interest payable	967	967	1,003	1,003

Financial Instruments Recorded at Fair Value

The table below presents the recorded amount of assets and liabilities measured at fair value on December 31:

Description	Total	2011			Total	2010	
		(Level 1)	(Level 2)	(Level 3)		(Level 2)	(Level 3)

Table of Contents

Following is a description of the valuation methodologies and key inputs used to measure financial assets and liabilities recorded at fair value, as well as a description of the methods and significant assumptions used to estimate fair value disclosures for financial instruments not recorded at fair value in their entirety on a recurring basis. For financial assets and liabilities recorded at fair value, the description includes an indication of the level of the fair value hierarchy in which the assets or liabilities are classified.

Cash and demand deposits due from banks: The carrying amounts of cash and short term investments, including Federal funds sold, approximate fair values.

Certificates of deposit held in other financial institutions: Interest bearing balances held in unaffiliated financial institutions include certificates of deposit and other short term interest bearing balances that mature within 3 years. Fair value is determined using prices for similar assets with similar characteristics.

Investment securities: Investment securities are recorded at fair value on a recurring basis. Level 1 fair value measurement is based upon quoted prices for identical instruments. Level 2 fair value measurement is based upon quoted prices for similar instruments. If quoted prices are not available, fair values are measured using independent pricing models or other model based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss and liquidity assumptions. Level 2 securities include bonds issued by government sponsored enterprises, states and political subdivisions, mortgage-backed securities, collateralized mortgage obligations issued by government sponsored enterprises, and auction rate money market preferred securities. The values for Level 1 and Level 2 investment securities are generally obtained from an independent third party. On a quarterly basis, management compares the values provided to alternative pricing sources.

Securities classified as Level 3 in 2010 included securities in less liquid markets and included auction rate money market preferred securities and preferred stocks. Due to the limited trading of these securities during 2010, the Corporation utilized a discounted cash flow analysis to determine fair values on December 31, 2010. This analysis considered the creditworthiness of the counterparty, the timing of expected future cash flows, the current volume of trading activity, and recent trade prices. The discount rates used were determined by using the interest rates of similarly rated financial institution debt based on the weighted average of a range of terms for corporate bond interest rates, which were obtained from published sources and ranged from 3.90% to 6.90% as of December 31, 2010. During 2011, the markets for these securities have normalized and established regular trading patterns. As a result of this normalization, the Corporation measured preferred stocks with fair values of \$5,033 utilizing Level 1 inputs and auction rate money market preferred securities with fair values of \$2,049 utilizing Level 2 inputs based on the trade price of similar securities as of December 31, 2011.

The table below represents the activity in auction rate money market preferred available-for-sale investment securities measured with Level 3 inputs on a recurring basis for the years ended December 31:

	2011	2010
Level 3 inputs January 1	\$ 2,865	\$ 2,973
Transfer to Level 2 inputs	(2,049)	
Net unrealized losses on available-for-sale investment securities	(816)	(108)
Level 3 inputs December 31	\$	\$ 2,865

The table below represents the activity in preferred stock available-for-sale investment securities measured with Level 3 inputs on a recurring basis for the years ended December 31:

	2011	2010
Level 3 inputs January 1	\$ 6,936	\$ 7,054
Calls	(1,000)	
Transfer to Level 1 inputs	(5,033)	
Net unrealized losses on available-for-sale investment securities	(903)	(118)
Level 3 inputs December 31	\$	\$ 6,936

Table of Contents

Mortgage loans available-for-sale: Mortgage loans available-for-sale are carried at the lower of cost or fair value. The fair value of mortgage loans available-for-sale are based on what price secondary markets are currently offering for portfolios with similar characteristics. As such, the Corporation classifies loans subjected to nonrecurring fair value adjustments as Level 2.

Loans: For variable rate loans with no significant change in credit risk, fair values are based on carrying values. Fair values for fixed rate loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The resulting amounts are adjusted to estimate the effect of changes in the credit quality of borrowers since the loans were originated.

The Corporation does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and a specific allowance for loan losses may be established. Loans for which it is probable that payment of interest and principal will be significantly different than the contractual terms of the original loan agreement are considered impaired. Once a loan is identified as impaired, management measures the estimated impairment. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value, or discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans.

The Corporation reviews the net realizable values of the underlying collateral for collateral dependent impaired loans on at least a quarterly basis for all loan types. To determine the collateral value, management utilizes independent appraisals, broker price opinions, or internal evaluations. These valuations are reviewed to determine whether an additional discount should be applied given the age of market information that may have been considered as well as other factors such as costs to carry and sell an asset if it is determined that the collateral will be liquidated in connection with the ultimate settlement of the loan. The Corporation uses these valuations to determine if any charge offs or specific reserves are necessary. The Corporation may obtain new valuations in certain circumstances, including when there has been significant deterioration in the condition of the collateral, if the foreclosure process has begun, or if the existing valuation is deemed to be outdated.

Impaired loans where an allowance is established based on the net realizable value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraisal value, the Corporation records the loan as nonrecurring Level 2. When a current appraised value is not available or management determines the fair value of collateral is further impaired below the appraised value, the Corporation records the impaired loans as nonrecurring Level 3.

Accrued interest: The carrying amounts of accrued interest approximate fair value.

Goodwill and other intangible assets: Acquisition intangibles and goodwill are evaluated for potential impairment on at least an annual basis. Goodwill is typically qualitatively evaluated to determine if it is more likely than not that the carrying balance is impaired. If it is determined that the carrying balance of goodwill is more likely than not to be impaired, management performs a cash flow valuation to determine the extent of the potential impairment. Acquisition intangibles are tested for impairment with a cash flow valuation. This valuation method requires a significant degree of management judgment. In the event the projected undiscounted net operating cash flows for these intangible assets are less than the carrying value, the asset is recorded at fair value as determined by the valuation model. If the testing resulted in impairment, the Corporation would classify goodwill and other acquisition intangibles subjected to nonrecurring fair value adjustments as Level 3. For the years ended December 31, 2011 and 2010, there were no impairments recorded on goodwill and other acquisition intangibles.

Equity securities without readily determinable fair values: The Corporation has investments in equity securities without readily determinable fair values as well as investments in joint ventures. The assets are individually reviewed for impairment on an annual basis, or more frequently if an indication of impairment exists, by

Table of Contents

comparing the carrying value to the estimated fair value. The lack of an independent source to validate fair value estimates, including the impact of future capital calls and transfer restrictions, is an inherent limitation in the valuation process. The Corporation classifies nonmarketable equity securities and its investments in joint ventures subjected to nonrecurring fair value adjustments as Level 3. For the years ended December 31, 2011 and 2010, there were no impairments recorded on equity securities without readily determinable fair values.

Foreclosed assets: Upon transfer from the loan portfolio, foreclosed assets are adjusted to and subsequently carried at the lower of carrying value or fair value less costs to sell. Net realizable value is based upon independent market prices, appraised values of the collateral, or management's estimation of the value of the collateral and as such, the Corporation classifies foreclosed assets as a nonrecurring Level 2. When management determines that the net realizable value of the collateral is further impaired below the appraised value but there is no observable market price, the Corporation records the foreclosed asset as nonrecurring Level 3.

Originated mortgage servicing rights: Originated mortgage servicing rights are subject to impairment testing. A valuation model, which utilizes a discounted cash flow analysis using interest rates and prepayment speed assumptions currently quoted for comparable instruments and a discount rate determined by management, is used for impairment testing. If the valuation model reflects a value less than the carrying value, originated mortgage servicing rights are adjusted to fair value through a valuation allowance as determined by the model. As such, the Corporation classifies loan servicing rights subject to nonrecurring fair value adjustments as Level 2.

Deposits: Demand, savings, and money market deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for variable rate certificates of deposit approximate their recorded carrying value. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Borrowed funds: The carrying amounts of federal funds purchased, borrowings under overnight repurchase agreements, and other short-term borrowings maturing within ninety days approximate their fair values. The fair values of the Corporation's other borrowed funds are estimated using discounted cash flow analyses based on the Corporation's current incremental borrowing arrangements.

The Corporation has elected to measure a portion of borrowed funds at fair value. These borrowings are recorded at fair value on a recurring basis, with the fair value measurement estimated using discounted cash flow analysis based on the Corporation's current incremental borrowing rates for similar types of borrowing arrangements. Changes in the fair value of these borrowings are included in noninterest income. As such, the Corporation classifies other borrowed funds as Level 2.

Commitments to extend credit, standby letters of credit and undisbursed loans: Fair values for off balance sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into consideration the remaining terms of the agreements and the counterparties' credit standings. The Corporation does not charge fees for lending commitments; thus it is not practicable to estimate the fair value of these instruments.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Corporation believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement.

Table of Contents

The changes in fair value of assets and liabilities recorded at fair value through earnings on a recurring basis and changes in assets and liabilities recorded at fair value on a nonrecurring basis, for which an impairment, or reduction of an impairment, was recognized in 2011 and 2010, are summarized as follows:

Description	Year Ended December 31					
	2011		2010		Total

NOTE 22 - OPERATING SEGMENTS

The Corporation's reportable segments are based on legal entities that account for at least 10 percent of net operating results. Retail banking operations for 2011, 2010, and 2009 represent approximately 90% or greater of the Corporation's total assets and operating results. As such, no additional segment information is presented.

Table of Contents

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Corporation's management carried out an evaluation, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of December 31, 2011, pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures as of December 31, 2011, are effective in timely alerting them to material information relating to the Corporation (including its consolidated subsidiaries) required to be included in the Corporation's periodic filings under the Exchange Act.

Changes in Internal Control

The Corporation also conducted an evaluation of internal control over financial reporting to determine whether any changes occurred during the quarter ended December 31, 2011, that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting. Based on this evaluation, management has concluded that there have been no such changes during the quarter ended December 31, 2011.

Management's Report on Internal Control Over Financial Reporting

We are responsible for the preparation and integrity of our published consolidated financial statements. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and, accordingly, include amounts based on judgments and estimates made by our management. We also prepared the other information included in the annual report and are responsible for its accuracy and consistency with the consolidated financial statements.

We are responsible for establishing and maintaining a system of internal control over financial reporting, which is intended to provide reasonable assurance to our management and Board of Directors regarding the reliability of our consolidated financial statements. The system includes but is not limited to:

A documented organizational structure and division of responsibility;

Established policies and procedures, including a code of conduct to foster a strong ethical climate which is communicated throughout the Corporation;

Internal auditors that monitor the operation of the internal control system and report findings and recommendations to management and the Audit Committee;

Procedures for taking action in response to an internal audit finding or recommendation;

Regular reviews of our consolidated financial statements by qualified individuals; and

The careful selection, training and development of our people.

Edgar Filing: ISABELLA BANK CORP - Form 10-K

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention or overriding of controls. Also, the effectiveness of an internal control system may change over time. We have implemented a system of internal control that was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles.

Table of Contents

We have assessed our internal control system in relation to criteria for effective internal control over financial reporting described in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission.

Based upon these criteria, we believe that, as of December 31, 2011, our system of internal control over financial reporting was effective.

Our independent registered public accounting firm, Rehmann Robson, P.C., has audited our 2011 consolidated financial statements. Rehmann Robson, P.C. was given unrestricted access to all financial records and related data, including minutes of all meetings of stockholders, the Board of Directors and committees of the Board. Rehmann Robson, P.C. has issued an unqualified audit opinion on our 2011 consolidated financial statements as a result of the audit which also includes Rehmann Robson, P.C.'s attestation report on the effectiveness of the Corporation's internal control.

Table of Contents**Part III****Item 10. Directors and Executive Officers and Corporate Governance**

For information concerning directors and certain executive officers of the Corporation, see "Election of Directors" and "Section 16(a) Beneficial Ownership Reporting Compliance" in the Corporation's Proxy Statement for the Annual Meeting of Shareholders to be held May 1, 2012 ("Proxy Statement") which is incorporated herein by reference.

For information concerning the Corporation's Audit Committee financial experts, see "Committees of the Board of Directors and Meeting Attendance" in the Proxy Statement which is incorporated herein by reference.

The Corporation has adopted a Code of Business Conduct and Ethics that applies to the Corporation's Chief Executive Officer and Chief Financial Officer. The Corporation shall provide to any person without charge upon request, a copy of its Code of Business Conduct and Ethics. Written requests should be sent to: Secretary, Isabella Bank Corporation, 401 North Main Street, Mount Pleasant, Michigan 48858.

Item 11. Executive Compensation

For information concerning executive compensation, see "Executive Officers," "Compensation Committee Report," "Compensation Committee Interlocks and Insider Participation," "Compensation Discussion and Analysis," and "Remuneration of Directors" in the Proxy Statement which is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

For information concerning the security ownership of certain owners and management, see "Security Ownership of Certain Beneficial Owners and Management" in the Proxy Statement which is incorporated herein by reference.

Equity Compensation Plan Information

The following table provides information as of December 31, 2011, with respect to compensation plans under which common shares of the Corporation are authorized for issuance to directors, officers or employees in exchange for consideration in the form of goods or services.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants, and Rights (A)	Weighted Average Exercise Price of Outstanding Options, Warrants, and Rights (B)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (A)) (C)
Equity compensation plans approved by Shareholders: None			
Equity compensation plans not approved by shareholders (1) (2):			
Deferred director compensation plan	218,023	(1)(2)	(1)(2)
Total	218,023		

(1)

Edgar Filing: ISABELLA BANK CORP - Form 10-K

Pursuant to the terms of the Deferred Compensation Plan for Directors (Directors Plan), directors of the Corporation and its subsidiaries are required to defer at least 25% of their earned board fees into the Directors Plan. Deferred fees are converted on a quarterly basis into stock units of the Corporation s common stock. The fees are converted on a quarterly basis into shares of the Corporation s common stock

Table of Contents

based on the fair value of a share of common stock as of the relevant valuation date. Stock credited to a participant's account is eligible for stock and cash dividends as declared. Upon retirement from the board or the occurrence of certain other events, the participant is eligible to receive a lump-sum, in-kind, distribution of all of the stock that is then in his or her account, and any unconverted cash will be converted to and rounded up to whole shares of stock and distributed, as well. The Directors Plan does not allow for cash settlement, and therefore, such share based payment awards qualify for classification as equity. All authorized but unissued shares of common stock are eligible for issuance under the Directors Plan. As of December 31, 2011, the Directors Plan had 218,023 shares eligible to be issued under the Directors Plan.

(2) The Rabbi Trust holds 16,585 shares for the benefit of participants pursuant to the Directors Plan. Accordingly, such shares are not included in the number of securities issuable in column (A) or the weighted average price calculation in column (B), nor are potential future contributions included in column (C).

Item 13. Certain Relationships and Related Transactions, and Director Independence

For information, see Indebtedness of and Transactions with Management and Election of Directors in the Proxy Statement, which is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

For information concerning the principal accountant fees and services see Fees for Professional Services Provided by Rehmann Robson, P.C. and Pre-approval Policies and Procedures in the Proxy Statement which is incorporated herein by reference.
