WisdomTree LargeCap Value Fund **EZY** (NYSE Arca Ticker)

SUMMARY PROSPECTUS July 30, 2012

Before you invest in the WisdomTree LargeCap Value Fund (the Fund), you may want to review the Fund's prospectus and statement of additional information, which contain more information about the Fund and the risks of investing in the Fund. The Fund's current prospectus and statement of additional information are incorporated by reference into this summary prospectus. You can find the Fund's prospectus and statement of additional information, as well as other information about the Fund, online at www.wisdomtree.com/prospectus. You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to getinfo@wisdomtree.com.

Investment Objective

The Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree LargeCap Value Index.

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.38%
Example	

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commission that retail investors may pay to buy and sell shares of the Fund. It also does not include the transaction fees on purchases and redemptions of Creation Units because these fees will not be imposed on retail investors. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
Portfolio Turnover	\$39	\$122	\$213	\$480

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are

Edgar Filing: WisdomTree Trust - Form 497K

not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 62% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

Principal Investment Strategies of the Fund

The Fund employs a passive management or indexing investment approach designed to track the performance of the WisdomTree LargeCap Value Index. The Fund attempts to invest all, or substantially all, of its assets in the common stocks that make up the Index. The Fund generally uses a Representative Sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole.

WisdomTree Trust Prospectus 1

The WisdomTree LargeCap Value Index is a fundamentally weighted index that is comprised of large-cap value companies. The Index consists of U.S. companies that have positive cumulative earnings over the past four fiscal quarters. Eligibility requirements also include: (i) market capitalization of at least \$100 million as of the annual Index rebalance; (ii) average daily dollar volume of at least \$200,000 for each of the six months preceding the Index rebalance; and (iii) a price to earnings ratio of at least 2 as of the Index rebalance. Additionally, companies must have positive earnings per share, positive book value per share, and positive sales per share statistics as of the Index rebalance. WisdomTree Investments, Inc. creates a value score for each company based on the company's price to earnings ratio, price to sales ratio, and price to book value and 1-year change in stock price. The top 30% of companies with the highest value scores within the 1,000 largest companies by market capitalization are included in the Index. Companies are weighted in the Index annually based on earnings. For these purposes, earnings are determined using a company's reported net income, excluding special items, applicable to common shareholders. The maximum weight of any one sector in the Index, at the time of the Index's annual rebalance, is capped at 25%. In response to market conditions, sector weights may fluctuate above 25% between annual Index rebalance dates.

WisdomTree Investments, Inc., as index provider, currently uses Standard & Poor's Global Industry Classification Standards (S&P GICS) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries.

Under normal circumstances, at least 95% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index. WisdomTree Asset Management, Inc. expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will be 95% or better.

To the extent that the Fund's underlying Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus, titled "Additional Investment Objective, Strategy and Risk Information."

- n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- n **Market Risk.** The trading prices of equity securities, fixed income securities, currencies, commodities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds (ETFs), Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Edgar Filing: WisdomTree Trust - Form 497K

Energy Investing. The Fund may invest in companies in the energy sector. The energy sector can be significantly affected by, among other things, economic growth, worldwide demand, international political instability, and volatile oil prices.

- n **Fiscal Policy Risk.** Any repeal of or failure to extend the current U.S. federal tax treatment of qualified dividend income could make certain dividend-paying securities less appealing to investors and could have a negative impact on the performance of the Fund.
- n **Information Technology Investing.** The Fund may invest in companies in the information technology sector. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development and government regulation.
- n **Investment Style Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.
- n **Issuer-Specific Risk.** Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.

- n **Large-Capitalization Investing.** The Fund invests primarily in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.
- n **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.
- n **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the WisdomTree Low P/E/LargeCap Value Spliced Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's name and investment objective changed effective June 19, 2009. Fund performance prior to June 19, 2009 reflects the investment objective and style of the Fund when it was the WisdomTree Low P/E Fund, and tracked the performance of the WisdomTree Low P/E Index.

The Fund's year-to-date total return as of June 29, 2012 was 7.47%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	22.39%	2Q/2009
Lowest Return	(25.20)%	4Q/2008

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2011

		Since Inception
	1 Year	(2/23/2007)
WisdomTree LargeCap Value Fund*		
Return Before Taxes Based on NAV	4.92%	(2.15)%
Return After Taxes on Distributions	4.34%	(2.81)%
Return After Taxes on Distributions and Sale of Fund Shares	3.18%	(2.21)%
Russell 1000® Value Index (reflects no deduction for fees, expenses, or taxes)	0.39%	(3.22)%
WisdomTree Low P/E/LargeCap Value Spliced Index** (reflects no deduction for fees, expenses, or taxes)	5.35%	(1.80)%

* The Fund's objective changed effective June 19, 2009. Prior to that date, the Fund sought to track the price and yield performance, before fees and expenses, of the WisdomTree Low P/E Index. After June 19, 2009, the Fund's objective seeks to track the price and yield performance, before fees and expenses, of the WisdomTree LargeCap Value Index.

** Reflects performance of the WisdomTree Low P/E Index through June 19, 2009 and the WisdomTree LargeCap Value Index thereafter.

Management**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation serves as sub-adviser to the Fund.

Portfolio Managers

Karen Q. Wong, CFA, a Managing Director, Equity Index Strategies, has been a portfolio manager of the Fund since February 2008.

Richard A. Brown, CFA, a Director, Equity Portfolio Management, has been a portfolio manager of the Fund since February 2008.

Thomas J. Durante, CFA, a Director, Senior Portfolio Manager, Equity, has been a portfolio manager of the Fund since February 2008.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (Creation Units), which only institutions or large investors may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund and/or a designated amount of U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.
