In the Preliminary Prospectus, we proposed to offer 4,645,000 shares of our common stock at an estimated price range of between \$13.00 and \$15.00 per share, with an over-allotment option of 696,750 shares of common stock. You should read the entire Preliminary Prospectus carefully, especially the **Risk Factors** section and the consolidated financial statements and related notes, together with this free writing prospectus, before deciding to invest in these securities. Net Proceeds

Edgar Filing: AMBIT BIOSCIENCES CORP - Form FWP

We estimate that the net proceeds from this offering will be approximately \$57.6 million, or approximately \$66.7 million if the underwriters exercise their over-allotment option in full, based on an initial public offering price of \$8.00 per share, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. We also expect to receive \$25.1 million from the sale by us of shares of our common stock in a concurrent private placement to certain of our existing stockholders at a price per share equal to the initial public offering price. These amounts of estimated net proceeds and our intended uses of such proceeds following the offering remain unchanged from that described in Use of Proceeds in the Preliminary Prospectus.

Potential purchases by existing stockholders or their affiliates

Entities affiliated with OrbiMed Private Investments III, LP and Radius Venture Partners III, QP LP, each of which is a current stockholder, have indicated an interest in purchasing an aggregate of 187,500 shares of our common stock in this offering. However, because indications of interest are not binding agreements or commitments to purchase, our underwriters may determine to sell more, less or no shares in this offering to any of these stockholders, or any of these stockholders may determine to purchase more, less or no shares in this offering.

Pro forma as adjusted consolidated balance sheet data

DILUTION

If you invest in our common stock in this offering, your ownership interest will be diluted to the extent of the difference between the initial public offering price per share and the pro forma as adjusted net tangible book value per share of our common stock after this offering.

Our historical net tangible book deficit of our common stock as of March 31, 2013 was approximately \$(210.0) million, or \$(52,638.60) per share, based on the 3,990 shares of common stock outstanding as of March 31, 2013. Historical net tangible book deficit per share is determined by dividing the number of shares of common stock outstanding as of March 31, 2013 into our total tangible assets (total assets less intangible assets) less total liabilities and convertible preferred stock.

On a pro forma basis, after giving effect to the conversion of all outstanding shares of convertible preferred stock into 6,449,073 shares of common stock, including the shares of redeemable convertible preferred stock to be issued pursuant to the exercise of the GrowthWorks put right, with the resulting reclassification of our redeemable non-controlling interest to additional paid-in capital, a component of stockholders deficit, and the reclassification of our redeemable convertible preferred stock warrant liabilities to additional paid-in capital, our net tangible book deficit as of March 31, 2013 would have been approximately \$(23.9) million, or approximately \$(3.71) per share.

Investors participating in this offering will incur immediate, substantial dilution. After giving effect to (1) the sale by us of shares of common stock in the concurrent private placement to certain of our existing stockholders at an initial public offering price of \$8.00 per share, (2) the sale of common stock offered by us in this offering at an initial public offering price of \$8.00 per share, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us, and (3) the pro forma transactions described in the preceding paragraph, our pro forma as adjusted net tangible book value as of March 31, 2013 would have been approximately \$58.7 million, or approximately \$3.32 per share of common stock. This represents an immediate increase in pro forma as adjusted net tangible book value of \$7.03 per share to existing stockholders, and an immediate dilution of \$4.68 per share to investors participating in this offering. The following table illustrates this per share dilution to investors participating in this offering:

Initial public offering price per share	\$ 8.00
Historical net tangible book deficit per share as of March 31, 2013	\$ (52,638.60)
Pro forma decrease in net tangible book deficit per share attributable to pro forma transactions described in preceding paragraphs	52,634.89
Pro forma net tangible book value (deficit) per share as of March 31, 2013	(3.71)
Pro forma increase in net tangible book value per share attributable to investors participating in this offering	7.03
Pro forma as adjusted net tangible book value per share after this offering	3.32

Edgar Filing: AMBIT BIOSCIENCES CORP - Form FWP

Pro forma dilution per share to investors participating in this offering	\$ 4.68
--	---------

If the underwriters exercise their over-allotment option in full to purchase 1,218,750 additional shares of common stock in this offering, our pro forma as adjusted net tangible book value per share after the offering and concurrent private placement would be \$3.23 per share, the increase in the pro forma net tangible book value per share to existing stockholders would be \$6.94 per share and the dilution to investors participating in this offering would be \$4.77 per share.

The following table summarizes, on the pro forma as adjusted basis described above as of March 31, 2013, the differences between the number of shares of common stock purchased from us by existing stockholders, which includes the concurrent private placement to certain of our existing stockholders, and by new investors participating in this offering, the total consideration and the average price per share paid to us by existing stockholders and by investors participating in this offering, before deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us, at an initial public offering price of \$8.00 per share:

	Shares Purchased		Total Consideration		Average Price Per Share
	Number	Percentage	Amount	Percentage	
Existing stockholders before this offering	9,587,558	54%	\$ 235,999,314	78%	\$ 24.62
Investors participating in this offering	8,125,000	46%	65,000,000	22%	8.00
Total	17,712,558	100%	\$ 300,999,314	100%	

Except as otherwise indicated, the discussion and tables above assume no exercise of the underwriters' over-allotment option or any outstanding options or warrants. If the underwriters' over-allotment option is exercised in full, the number of shares of common stock held by existing stockholders will be reduced to 51% of the total number of shares of common stock to be outstanding after this offering, and the number of shares of common stock held by investors participating in this offering will be further increased to 9,343,750, or 49% of the total number of shares of common stock to be outstanding after this offering.

The number of shares in the table above excludes, as of March 31, 2013:

1,214,212 shares of common stock issuable upon exercise of stock options outstanding as of March 31, 2013, at a weighted-average exercise price of \$8.75 per share;

6,117 shares of common stock reserved for future issuance under our 2011 pre-IPO plan as of March 31, 2013 and an aggregate of 625,000 additional shares of common stock that will be available under our 2013 post-IPO plan, which will become effective upon the closing of this offering;

125,000 shares of common stock reserved for issuance under our 2013 employee stock purchase plan, or ESPP, which will become effective upon the closing of this offering; and

1,800,920 shares of common stock issuable upon the exercise of warrants outstanding as of March 31, 2013, at a weighted-average exercise price of \$3.30 per share.

Effective immediately upon the signing of the underwriting agreement for this offering, an aggregate of 631,117 and 125,000 shares of our common stock will be reserved for future issuance under our 2013 post-IPO plan and ESPP, respectively, which includes 6,117 shares of common stock reserved for future issuance under our 2011 pre-IPO plan as of March 31, 2013 that will be allocated to our 2013 post-IPO plan, and these share reserves will also be subject to automatic annual increases in accordance with the terms of the plans. Furthermore, we may choose to raise additional capital through the sale of equity or convertible debt securities due to market conditions or strategic considerations even if we believe we have sufficient funds for our current or future operating plans. To the extent that any of these options or warrants is exercised, new options are issued under our equity incentive plans or we issue additional shares of common stock, other equity securities or convertible debt securities in the future, there will be further dilution to investors participating in this offering.

The number of shares and percentage of shares beneficially owned before the offering shown in the table is based upon 6,453,063 shares of common stock outstanding as of March 31, 2013, which gives effect to (1) the conversion of all outstanding shares of our convertible preferred stock into shares of common stock and (2) the exercise of the put right held by GrowthWorks Canadian Fund Ltd., or the GrowthWorks put right, which shall occur simultaneously with the conversion of the outstanding shares of our preferred stock into shares of our common stock. The percentage ownership information assumes no exercise of the underwriters over-allotment option.

Each individual or entity shown in the table has furnished information with respect to beneficial ownership. We have determined beneficial ownership in accordance with the SEC's rules. These rules generally attribute beneficial ownership of securities to persons who possess sole or shared voting power or investment power with respect to those securities. In addition, the rules include shares of common stock issuable pursuant to the exercise of stock options, warrants or other rights that are either immediately exercisable or exercisable on May 30, 2013, which is 60 days after March 31, 2013. These shares are deemed to be outstanding and beneficially owned by the person holding those options or warrants for the purpose of computing the percentage ownership of that person, but they are not treated as outstanding for the purpose of computing the percentage ownership of any other person. Unless otherwise indicated, the persons or entities identified in this table have sole voting and investment power with respect to all shares shown as beneficially owned by them, subject to applicable community property laws.
