CAPITAL SENIOR LIVING CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2013

1. BASIS OF PRESENTATION

Capital Senior Living Corporation, a Delaware corporation (together with its subsidiaries, the Company), is one of the largest operators of senior living communities in the United States in terms of resident capacity. The Company owns, operates and manages senior living communities in geographically concentrated regions throughout the United States. As of June 30, 2013, the Company operated 104 senior living communities in 23 states with an aggregate capacity of approximately 13,900 residents, including 54 senior living communities which the Company either owned or in which the Company had an ownership interest and 50 senior living communities that the Company leased. As of June 30, 2013, the Company also operated one home care agency. The accompanying consolidated financial statements include the financial statements of Capital Senior Living Corporation and its wholly owned subsidiaries. All material intercompany balances and transactions have been eliminated in consolidation. The Company accounts for significant investments in unconsolidated companies, in which the Company has significant influence, using the equity method of accounting.

The accompanying consolidated balance sheet, as of December 31, 2012, has been derived from audited consolidated financial statements of the Company for the year ended December 31, 2012, and the accompanying unaudited consolidated financial statements, as of and for the three and six month periods ended June 30, 2013 and 2012, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and note disclosures normally included in the annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to those rules and regulations. For further information, refer to the financial statements and notes thereto for the year ended December 31, 2012, included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 8, 2013.

In the opinion of the Company, the accompanying consolidated financial statements contain all adjustments (all of which were normal recurring accruals) necessary to present fairly the Company's financial position as of June 30, 2013, results of operations for the three and six month periods ended June 30, 2013 and 2012, and cash flows for the six month periods ended June 30, 2013 and 2012. The results of operations for the three and six month periods ended June 30, 2013, are not necessarily indicative of the results for the year ending December 31, 2013.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments in Unconsolidated Joint Ventures

The Company accounts for its investments in unconsolidated joint ventures under the equity method of accounting. As of June 30, 2013, the Company owns member interests in three unconsolidated joint ventures. The Company has not consolidated these joint venture interests because the Company has concluded that the other member of each joint venture has substantive kick-out rights or substantive participating rights. Under the equity method of accounting the Company records its investments in unconsolidated joint ventures at cost and adjusts such investments for its share of earnings and losses of the joint ventures.

Lease Accounting

The Company determines whether to account for its leases as either operating, capital or financing leases depending on the underlying terms of each lease agreement. This determination of classification is complex and requires significant judgment relating to certain information including the estimated fair value and remaining economic life of the community, the Company's cost of funds, minimum lease payments and other lease terms. As of June 30, 2013, the Company leased 50 senior living communities, 48 of which the Company classified as operating leases and two of which the Company classified as capital lease and financing obligations. The Company incurs lease acquisition costs and amortizes these costs over the term of the respective lease agreement. Certain leases entered into by the Company qualified as sale/leaseback transactions and as such any related gains have been deferred and are being

Table of Contents

amortized over the respective lease term. Facility lease expense in the Company's Consolidated Statements of Operations and Comprehensive Loss includes rent expense plus amortization expense relating to leasehold acquisition costs offset by the amortization of deferred gains and lease incentives. There are various financial covenants and other restrictions in the Company's lease agreements. The Company was in compliance with all of its lease covenants at June 30, 2013.

Credit Risk and Allowance for Doubtful Accounts

The Company's resident receivables are generally due within 30 days from the date billed. Accounts receivable are reported net of an allowance for doubtful accounts, and represent the Company's estimate of the amount that ultimately will be collected. The adequacy of the Company's allowance for doubtful accounts is reviewed on an ongoing basis, using historical payment trends, write-off experience, analyses of receivable portfolios by payor source and aging of receivables, as well as a review of specific accounts, and adjustments are made to the allowance as necessary. Credit losses on resident receivables have historically been within management's estimates, and management believes that the allowance for doubtful accounts adequately provides for expected losses.

Employee Health and Dental Benefits and Insurance Reserves

The Company offers certain full-time employees an option to participate in its health and dental plans. The Company is self-insured up to certain limits and is insured if claims in excess of these limits are incurred. The cost of employee health and dental benefits, net of employee contributions, is shared between the corporate office and the senior living communities based on the respective number of plan participants. Funds collected are used to pay the actual program costs including estimated annual claims, third-party administrative fees, network provider fees, communication costs, and other related administrative costs incurred by the plans. Claims are paid as they are submitted to the Company's third-party administrator. The Company records a liability for outstanding claims and claims that have been incurred but not yet reported. This liability is based on the historical claim reporting lag and payment trends of health insurance claims. Management believes that the liability for outstanding losses and expenses is adequate to cover the ultimate cost of losses and expenses incurred at June 30, 2013; however, actual claims and expenses may differ. Any subsequent changes in estimates are recorded in the period in which they are determined.

The Company uses a combination of insurance and self-insurance for workers' compensation. Determining the reserve for workers' compensation losses and costs that the Company has incurred as of the end of a reporting period involves significant judgments based on projected future events including potential settlements for pending claims, known incidents which may result in claims, estimates of incurred but not yet reported claims, changes in insurance premiums, estimated litigation costs and other factors. The Company regularly adjusts these estimates to reflect changes in the foregoing factors. However, since this reserve is based on estimates, the actual expenses incurred may differ from the amounts reserved. Any subsequent changes in estimates are recorded in the period in which they are determined.

Income Taxes

At June 30, 2013, the Company had recorded on its Consolidated Balance Sheet net deferred tax assets of approximately \$11.8 million. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The effective tax rates for the first six month periods and second quarters of fiscal 2013 and 2012 differ from the statutory tax rates due to state income taxes and permanent tax differences. The Company is impacted by the Texas Margin Tax (TMT), which effectively imposes tax on modified gross revenues for communities within the State of Texas. The Company consolidated 36 Texas communities in the second quarter of fiscal 2013 and 35 Texas communities in the second quarter of fiscal 2012 and the TMT increased the overall provision for income taxes. Management regularly evaluates the future realization of deferred tax assets and provides a valuation allowance, if considered necessary, based on such evaluation. As part of the evaluation, management has evaluated future expectations of income and believes based upon this analysis that the realization of the net deferred tax assets is reasonably assured and therefore has not provided for a valuation allowance. However, the benefits of the net deferred tax assets might not be realized if actual results differ from expectations.

The Company evaluates uncertain tax positions through consideration of accounting and reporting guidance on criteria, measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition that is intended to provide better financial-statement comparability among different companies. The Company is required to recognize a tax benefit in its financial statements for an uncertain tax position only if management's assessment is that such position is more likely than not (i.e., a greater than 50% likelihood) to be upheld on audit based only on the technical merits of the tax position. The Company's policy is to recognize interest related to unrecognized tax benefits as interest expense and penalties as income tax expense. The Company is not subject to income tax examinations for tax years prior to 2006.

Table of Contents*Net (Loss) Income Per Share*

Basic net (loss) income per common share is computed by dividing net income remaining after allocation to unvested restricted shares by the weighted average number of common shares outstanding for the period. Except when the effect would be anti-dilutive, the calculation of diluted net income per common share includes the net impact of unvested restricted shares and shares that could be issued under outstanding stock options.

The following table sets forth the computation of basic and diluted net (loss) income per share (in thousands, except for per share amounts):

Treasury Stock

The Company accounts for treasury stock under the cost method and includes treasury stock as a component of stockholders' equity.

In addition, the Company earned \$0.1 million in management fees on the SHPIII/CSL Richmond Heights community in each of the six month periods ended June 30, 2013 and 2012.

Table of Contents*SHPIII/CSL Levis Commons*

In December 2007, the Company with SHPIII formed SHPIII/CSL Levis Commons, L.L.C. (SHPIII/CSL Levis Commons) to develop a senior housing community near Toledo, Ohio. Under the joint venture and related agreements, the Company earns development and management fees and may receive incentive distributions. The Company has contributed \$0.8 million to SHPIII/CSL Levis Commons for its 10% interest. The Company accounts for its investment in SHPIII/CSL Levis Commons under the equity method of accounting and recognized earnings (losses) in the equity of SHPIII/CSL Levis Commons of \$9,900 and (\$9,900) during the six month periods ended June 30, 2013 and 2012, respectively. In addition, the Company earned \$0.1 million in management fees on the SHPIII/CSL Levis Commons community in each of the six month periods ended June 30, 2013 and 2012.

4. FACILITY LEASE TRANSACTIONS

Effective June 27, 2012, the Company closed a lease modification transaction with Ventas, Inc. (Ventas) which resulted in the Company exchanging two of its owned communities for one of the communities in the existing Ventas lease portfolio and simultaneously leasing back the two communities exchanged (the Ventas Lease Transaction). This transaction was the result of negotiations for a solution to the anticipation of the Company not meeting certain lease coverage ratio requirements for its lease portfolio of ten properties with Ventas. The two communities previously owned by the Company are located in East Lansing, Michigan (the East Lansing Community) and Raleigh, North Carolina (the Raleigh Community) and were exchanged for a community located in Merrillville, Indiana (the Towne Centre Community). All three communities continue to be operated by the Company. In conjunction with this transaction, Ventas assumed approximately \$18.3 million of existing mortgage debt from Berkadia Commercial Mortgage LLC (Berkadia) and the Company received the Towne Centre Community unencumbered. All of the leased communities in the Ventas lease portfolio were modified to be coterminous with the East Lansing and Raleigh Community leases expiring on September 30, 2020, with two 5-year renewal extensions available at the Company's option, eliminate property-level lease covenants, and contain substantially similar terms and conditions. These leases were re-evaluated by the Company at the modification date and continue to be treated as operating leases. Under the terms of the original lease agreements with Ventas, the Company had previously deposited additional cash collateral of approximately \$3.4 million which was returnable to the Company once certain performance targets were reached. However, due to the rebalanced lease portfolio meeting the lease coverage ratio requirements, the Company negotiated the return of these deposits as a condition to the lease modification. Additionally, due to the extension of the lease terms for the Ventas lease portfolio to fiscal 2020, the rights of Ventas to reset the underlying values of the leased communities were deferred for five years.

Pursuant to Accounting Standards Codification (ASC) 840, *Leases*, the Company performed a sale/leaseback analysis to determine whether the East Lansing Community and Raleigh Community could be removed from its Consolidated Balance Sheets. Based upon the analysis performed, the Company concluded certain aspects of the lease modification would be considered forms of continuing involvement which precludes the Company from derecognizing these assets from its Consolidated Balance Sheets under sale/leaseback accounting criteria. Therefore, the Company recorded financing obligations equal to the fair market value of the communities exchanged and the mortgage debt assumed by Ventas. At the end of the lease term, including exercise of any renewal options, the net remaining financing obligation less the net carrying value of the leased assets will be recognized as a non-cash gain on sale of the East Lansing Community and Raleigh Community. Rental payments under these leases will not be reflected as a component of facility lease expense but will be recognized as a reduction of the financing obligation and interest expense based upon the Company's incremental borrowing rate at the time the transaction was closed. As a result of this transaction, the Company recorded additions to property and equipment of approximately \$13.2 million and Other assets, primarily consisting of lease intangibles, of approximately \$11.8 million within the Company's Consolidated Balance Sheets which will be depreciated or amortized over the estimated useful lives. The additions to property and equipment were reduced by approximately \$4.9 million which represented the unamortized portion of the deferred gain previously recognized by the Company when the Towne Centre Community had been sold in fiscal 2006. Lease intangibles consist of the fair value of in-place leases associated with the Towne Centre Community and the fair value attributable to Ventas deferring its right to reset the underlying values of the lease portfolio five years until fiscal 2020.

Table of Contents**5. ACQUISITIONS***Fiscal 2013*

Effective June 28, 2013, the Company closed the acquisition of one senior living community located in Greencastle, Indiana, for \$6.3 million (the Autumn Glen Transaction). The community consists of 52 assisted living units. The Company incurred approximately \$0.1 million in transaction costs related to this acquisition which have been included in general and administrative expenses within the Company's Consolidated Statements of Operations and Comprehensive Loss. Share Repurchases

On January 22, 2009, the Company's board of directors approved a share repurchase program that authorized the Company to purchase up to \$10.0 million of the Company's common stock. Purchases may be made from time to time using a variety of methods, which may include open market purchases, privately negotiated transactions or block trades, or by any combination of such methods, in accordance with applicable insider trading and other securities laws and regulations. The size, scope and timing of any purchases will be based on business, market and other conditions and factors, including price, regulatory and contractual requirements or consents, and capital availability. The repurchase program does not obligate the Company to acquire any particular amount of common stock and the share repurchase authorization has no stated expiration date. Shares of stock repurchased under the program will be held as treasury shares. Pursuant to this authorization, during fiscal 2009, the Company purchased 349,800 shares at an average cost of \$2.67 per share for a total cost to the Company of approximately \$0.9 million. On May 8, 2007, the Company's stockholders approved the 2007 Omnibus Stock and Incentive Plan for Capital Senior Living Corporation (the 2007 Plan), which provides for, among other things, the grant of restricted stock awards and stock options to purchase shares of the Company's common stock. The 2007 Plan authorizes the Company to issue up to 2.6 million shares of common stock and the Company has reserved 0.6 million shares of common stock for future issuance pursuant to awards under the 2007 Plan. Effective May 8, 2007, the 1997 Omnibus Stock and Incentive Plan (as amended, the 1997 Plan) was terminated and no additional shares will be granted under the 1997 Plan. The Company has reserved 0.3 million shares of common stock for future issuance upon the exercise of stock options that remain outstanding pursuant to the 1997 Plan.

Stock Options

The Company's stock option program is a long-term retention program that is intended to attract, retain and provide incentives for employees, officers and directors and to more closely align stockholder and employee interests. The Company's options generally vest over a period of one to five years and the related expense is amortized on a straight-line basis over the vesting period.

Table of Contents

A summary of the Company's stock option activity and related information for the six month period ended June 30, 2013, is presented below:

	Outstanding at Beginning of Period	Granted	Exercised	Forfeited	Outstanding at End of Period	Options Exercisable
Shares	265,930		211,780		54,150	54,150
Weighted average exercise price per share	\$ 6.28	\$	\$ 6.20	\$	\$ 6.58	\$ 6.58

The options outstanding and the options exercisable at June 30, 2013, each had an intrinsic value of \$0.9 million.

Restricted Stock

The Company may grant restricted stock awards to employees, officers, and directors in order to attract, retain, and provide incentives for such individuals and to more closely align stockholder and employee interests. For restricted stock awards without performance-based vesting conditions, the Company records compensation expense for the entire award on a straight-line basis over the requisite service period, which is generally a period of three to four years, but such awards are considered outstanding at the time of grant since the holders thereof are entitled to dividends and voting rights. For restricted stock awards with performance-based vesting conditions, total compensation expense is recognized over the requisite service period for each separately vesting tranche of the award as if the award is, in substance, multiple awards once the performance target is deemed probable of achievement. Performance goals are evaluated periodically and if such goals are not ultimately met or it is not probable the goals will be achieved, no compensation expense is recognized and any previously recognized compensation expense is reversed.

The Company recognizes compensation expense of a restricted stock award over its respective vesting or performance period based on the fair value of the award on the grant date, net of forfeitures. A summary of the Company's restricted stock awards activity and related information for the six month period ended June 30, 2013, is presented below:

	Outstanding at Beginning of Period	Issued	Vested	Forfeited	Outstanding at End of Period
Shares	803,218	369,215	280,520	12,736	879,177

The restricted stock outstanding at June 30, 2013, had an intrinsic value of \$21.0 million.

During the six months ended June 30, 2013, the Company awarded 369,215 shares of restricted common stock to certain employees and directors of the Company, of which 130,000 shares were subject to performance-based vesting conditions. The average market value of the common stock on the date of grant was \$24.16. These awards of restricted shares vest over a one to four-year period and had an intrinsic value of \$8.9 million on the date of issue.

Stock-Based Compensation

The Company uses the Black-Scholes option pricing model to estimate the grant date fair value of its stock options. The Black-Scholes model requires the input of certain assumptions including expected volatility, expected dividend yield, expected life of the option and the risk free interest rate. The expected volatility used by the Company is based primarily on an analysis of historical prices of the Company's common stock. The expected term of options granted is based primarily on historical exercise and vesting patterns on the Company's outstanding stock options. The risk free rate is based on zero-coupon U.S. Treasury yields in effect at the date of grant with the same period as the expected option life. The Company does not currently plan to pay dividends on its common stock and therefore has used a dividend yield of zero in determining the fair value of its awards. The option forfeiture rate assumption used by the Company, which affects the expense recognized as opposed to the fair value of the awards, is based primarily on the Company's historical option forfeiture patterns. The Company issued no stock options during each of the first six months of fiscal 2013 and 2012. The Company recognizes compensation expense of a restricted stock award over its respective vesting period based on the fair value of the award on the grant date, net of estimated forfeitures.

The Company has total stock-based compensation expense, including estimated forfeitures, of \$8.7 million, which was not recognized as of June 30, 2013, and expects this expense to be recognized over approximately a one to four-year period.

Table of Contents**9. CONTINGENCIES**

The Company has claims incurred in the normal course of its business. Most of these claims are believed by management to be covered by insurance, subject to normal reservations of rights by the insurance companies and possibly subject to certain exclusions in the applicable insurance policies. Whether or not covered by insurance, these claims, in the opinion of management, based on advice of legal counsel, should not have a material effect on the consolidated financial statements of the Company if determined adversely to the Company.

10. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amounts and fair values of financial instruments at June 30, 2013, and December 31, 2012, are as follows (in thousands):

	2013		2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	\$ 20,314	\$ 20,314	\$ 18,737	\$ 18,737

Notes payable	386,381	357,373	362,596	378,459

The following methods and assumptions were used in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents and Restricted cash: The carrying amounts reported in the Company's Consolidated Balance Sheets for cash and cash equivalents and restricted cash approximate fair value.

Notes payable: The fair value of notes payable is estimated using discounted cash flow analysis, based on current incremental borrowing rates for similar types of borrowing arrangements, which represent level 2 inputs as defined in the accounting standards codification.

Significant Financial and Operational Highlights

The Company provides senior living services to the elderly, including independent living, assisted living, skilled nursing and home care services. Many of the Company's communities offer a continuum of care to meet its residents' needs as they change over time. This continuum of care, which integrates independent living and assisted living and is bridged by home care through independent home care agencies or the Company's home care agency, sustains residents' autonomy and independence based on their physical and mental abilities.

The Company primarily derives its revenue by providing senior living and healthcare services to the elderly and operating senior living communities under joint venture arrangements. Improved operating results, recent acquisitions, and prudent expense management initiatives have fueled the Company's growing profitability. When comparing the first six months of fiscal 2013 to the first six months of fiscal 2012, the Company has generated total revenues of approximately \$173.4 million compared to total revenues of approximately \$149.2 million, respectively, representing an increase of approximately \$24.2 million, or 16.2%, of which approximately 98.1% were derived from resident and healthcare services during the first six months of fiscal 2013 compared to 98.2% during the first six months of fiscal 2012.

Joint Venture Transactions and Management Contracts

As of June 30, 2013, the Company managed 3 communities owned by joint ventures in which the Company has a minority interest. For communities owned by joint ventures, the Company typically receives a management fee of 5% of gross revenues.

The Company's joint venture management fees are primarily based on a percentage of gross revenues. As a result, the cash flow and profitability of such contracts to the Company are more dependent on the revenues generated by such communities and less dependent on net cash flow than for owned or leased communities. The management contracts are generally terminable only for cause or upon the sale of a community, subject to the Company's right to offer to purchase such community.

Three Months Ended June 30, 2013 Compared to the Three Months Ended June 30, 2012*Revenues.*

Total revenues were \$87.2 million for the three months ended June 30, 2013, compared to \$77.0 million for the three months ended June 30, 2012, representing an increase of \$10.2 million or 13.2%. This increase in revenue is primarily the result of an increase in resident and healthcare revenue of \$9.7 million and an increase in community reimbursement revenue of \$0.5 million.

The increase in resident and healthcare revenue primarily results from an increase of \$8.6 million from the senior living communities acquired by the Company during fiscal 2013 and subsequent to the second quarter of fiscal 2012 and an increase in average monthly rental rates of 1.7% at the Company's other consolidated same-store communities.

Community reimbursement revenue is comprised of reimbursable expenses from non-consolidated communities and joint ventures that the Company operates under long-term management agreements.

Expenses.

Total expenses were \$84.3 million in the second quarter of fiscal 2013 compared to \$73.6 million in the second quarter of fiscal 2012, representing an increase of \$10.7 million, or 14.5%. This increase is primarily the result of a \$6.2 million increase in operating expenses, a \$1.2 million increase in general and administrative expenses, a \$0.4 million increase in facility lease expense, a \$0.7 million increase in stock-based compensation expense, a \$1.7 million increase in depreciation and amortization expense, and a \$0.4 million increase in community reimbursement expense.

The increase in operating expenses primarily results from an increase of \$5.7 million from the senior living communities acquired by the Company during fiscal 2012 and 2013 and an increase in general overall operating costs at the Company's other consolidated same-store communities of \$0.5 million.

Table of Contents

General and administrative expenses increased \$1.2 million primarily from an increase of \$0.6 million in wages and benefits for existing and additional full-time employees hired subsequent to the second quarter of fiscal 2012 and an increase of \$0.6 million in employee insurance benefits and claims paid, which resulted in higher health insurance costs to the Company.

The increase in facility lease expense primarily results from the amortization of lease intangibles of approximately \$0.2 million and a reduction in deferred gain amortization of approximately \$0.4 million associated with the Ventas Lease Transaction combined with contingent annual rental rate escalations for certain existing leases. As of June 30, 2013, the Company had net deferred gains on sale/leaseback transactions of approximately \$21.2 million that are being recognized into income as a reduction to facility lease expense over their respective initial lease terms.

Depreciation and amortization expense increased \$1.7 million primarily from an increase of \$4.2 million from the senior living communities acquired by the Company during fiscal 2013 and subsequent to the second quarter of fiscal 2012, an increase of \$0.9 million as a result of the Ventas Lease Transaction and an increase of \$0.3 million as a result of an increase in depreciable assets at the Company's other consolidated same-store communities offset by a decrease in in-place lease amortization of approximately \$3.7 million for senior living communities acquired by the Company during fiscal 2011 and 2012 which were fully amortized during fiscal 2012 or the first quarter of fiscal 2013.

Community reimbursement expense represents payroll and administrative costs paid by the Company for the benefit of non-consolidated communities and joint ventures that the Company operates under long-term management agreements.

Other income and expense.

Interest income generally reflects interest earned on the investment of cash balances and interest earned on escrowed funds. Interest income decreased primarily due to lower average cash balances in the second quarter of fiscal 2013 when compared to the second quarter of fiscal 2012.

Interest expense increased \$1.4 million in the second quarter of fiscal 2013 when compared to the second quarter of fiscal 2012 primarily due to the additional mortgage debt associated with the senior living communities acquired by the Company during fiscal 2013 and subsequent to the second quarter of fiscal 2012.

Equity in earnings (losses) of unconsolidated joint ventures, net, represents the Company's share of the net earnings (losses) on its investments in SHPIII/CSL Miami, SHPIII/CSL Richmond Heights, and SHPIII/CSL Levis Commons.

Benefit for income taxes.

Benefit for income taxes for the second quarter of fiscal 2013 was \$0.6 million, or 22.8% of loss before income taxes, compared to a benefit for income taxes of \$0.2 million, or 22.4% of income before income taxes, for the second quarter of fiscal 2012. The effective tax rates for the second quarters of fiscal 2013 and 2012 differ from the statutory tax rates due to state income taxes and permanent tax differences. The Company is impacted by the TMT, which effectively imposes tax on modified gross revenues for communities within the State of Texas. The Company consolidated 36 Texas communities in the second quarter of fiscal 2013 and 35 Texas communities in the second quarter of fiscal 2012 and the TMT increased the overall provision for income taxes. Management regularly evaluates the future realization of deferred tax assets and provides a valuation allowance, if considered necessary, based on such evaluation. The Company has evaluated future expectations of income and believes, based upon this analysis, that the realization of net deferred tax assets is reasonably assured and therefore has not provided for a valuation allowance at June 30, 2013.

Net loss and comprehensive loss.

This increase in revenue is primarily the result of a \$23.5 million increase in resident and healthcare revenue, an increase in affiliated management services revenue of \$0.1 million and an increase in community reimbursement revenue of \$0.6 million.

The increase in resident and healthcare revenue primarily results from an increase of \$20.7 million from the senior living communities acquired by the Company during fiscal 2013 and subsequent to the first quarter of fiscal 2012 and an increase in average monthly rental rates of 2.1% at the Company's other consolidated same-store communities.

General and administrative expenses increased \$2.4 million primarily from an increase of \$0.2 million for the completion of a cost segregation tax study during the first quarter of fiscal 2013, an increase of \$1.1 million in wages and benefits for existing and additional full-time employees hired subsequent to the first quarter of fiscal 2012 and an increase of \$1.1 million in employee insurance benefits and claims paid, which resulted in higher health insurance costs to the Company.

The increase in facility lease expense primarily results from the amortization of lease intangibles of approximately \$0.4 million and a reduction in deferred gain amortization of approximately \$0.8 million associated with the Ventas Lease Transaction along with contingent annual rental rate escalations for certain existing leases. As of June 30, 2013, the Company had net deferred gains on sale/leaseback transactions of approximately \$21.2 million that are being recognized into income as a reduction to facility lease expense over their respective initial lease terms.

Liquidity and Capital Resources

The impact of the current economic environment could result in decreases in the fair value of assets, slowing of transactions, and tightening liquidity and credit markets. These impacts could make securing debt for acquisitions or financings for the Company, its joint ventures, or buyers of the Company's properties more difficult or on terms not acceptable to the Company. Additionally, the Company may be more susceptible to being negatively impacted by operating or performance deficits based on the exposure associated with certain development guarantees or lease coverage requirements.

In addition to approximately \$20.3 million of unrestricted cash balances on hand as of June 30, 2013, the Company's principal sources of liquidity are expected to be cash flows from operations and from SHPIII/CSL Miami, SHP III/CSL Richmond Heights, SHPIII/CSL Levis Commons, supplemental debt financings, and/or proceeds from the sale of assets. The Company expects its available cash and cash flows from operations and from SHPIII/CSL Miami, SHP III/CSL Richmond Heights, SHPIII/CSL Levis Commons, supplemental debt financings, and proceeds from the sale of assets, to be sufficient to fund its short-term working capital requirements. The Company's long-term capital requirements, primarily for acquisitions, conversions, and other corporate initiatives, could be dependent on its ability to access additional funds through joint ventures and the debt and/or equity markets. The Company, from time to time, considers and evaluates transactions related to its portfolio including supplemental debt financings, purchases and sales, reorganizations and other transactions. There can be no assurance that the Company will continue to generate cash flows at or above current levels or that the Company will be able to obtain the capital necessary to meet the Company's short and long-term capital requirements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Company's primary market risk is exposure to changes in interest rates on debt and lease instruments. As of June 30, 2013, the Company had \$386.4 million in outstanding debt comprised of various fixed and variable interest rate debt instruments of \$381.8 million and \$4.6 million, respectively. In addition, as of June 30, 2013, the Company had \$538.8 million in future lease obligations with contingent rent increases on certain leases based on changes in the consumer price index or certain operational performance measures.

Changes in interest rates would affect the fair market values of the Company's fixed rate debt instruments, but would not have an impact on the Company's earnings or cash flows. Increases in the consumer price index could have an effect on future facility lease expense if the leased community exceeds the contingent rent escalation thresholds set forth in each of the Company's lease agreements.
