

SOUTHWEST GAS CORP  
Form 10-Q  
November 07, 2013

**UNITED STATES**  
**SECURITIES AND EXCHANGE COMMISSION**  
**WASHINGTON, D.C. 20549**

**Form 10-Q**

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)**  
**OF THE SECURITIES EXCHANGE ACT OF 1934**  
**For the quarterly period ended September 30, 2013**  
**Commission File Number 1-7850**

**SOUTHWEST GAS CORPORATION**  
**(Exact name of registrant as specified in its charter)**

**California**  
**(State or other jurisdiction of**  
**incorporation or organization)**

**88-0085720**  
**(I.R.S. Employer**  
**Identification No.)**

**5241 Spring Mountain Road**

**Post Office Box 98510**

**Las Vegas, Nevada**  
**(Address of principal executive offices)**

**89193-8510**  
**(Zip Code)**

**Registrant's telephone number, including area code: (702) 876-7237**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, non-accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

Common Stock, \$1 Par Value, 46,350,863 shares as of October 28, 2013.

**SOUTHWEST GAS CORPORATION**  
September 30, 2013

Form 10-Q

## **Note 1 Nature of Operations and Basis of Presentation**

*Nature of Operations.* Southwest Gas Corporation and its subsidiaries (the Company) consist of two segments: natural gas operations (Southwest or the natural gas operations segment) and construction services. Southwest is engaged in the business of purchasing, distributing, and transporting natural gas for customers in portions of Arizona, Nevada, and California. Public utility rates, practices, facilities, and service territories of Southwest are subject to regulatory oversight. The timing and amount of rate relief can materially impact results of operations. Natural gas sales are seasonal, peaking during the winter months; therefore, results of operations for interim periods are not necessarily indicative of results for a full year. Natural gas purchases and the timing of related recoveries can materially impact liquidity. NPL Construction Co. (NPL or the construction services segment), a wholly owned subsidiary, is a full-service underground piping contractor that primarily provides utility companies with trenching and installation, replacement, and maintenance services for energy distribution systems. Typically, NPL revenues are lowest during the first quarter of the year due to unfavorable winter weather conditions. Operating revenues typically improve as more favorable weather conditions occur during the summer and fall months.

*Basis of Presentation.* The condensed consolidated financial statements included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles (GAAP) have been condensed or omitted pursuant to such rules and regulations. The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. In the opinion of management, all adjustments, consisting of normal recurring items and estimates necessary for a fair presentation of results for the interim periods, have been made. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the 2012 Annual Report to Shareholders, which is incorporated by reference into the 2012 Form 10-K, and the first and second quarter 2013 reports on Form 10-Q.

*Prepays and other current assets.* Prepays and other current assets includes gas pipe inventory and operating supplies of \$24 million at September 30, 2013 and \$25 million at December 31, 2012.

*Cash and Cash Equivalents.* For purposes of reporting consolidated cash flows, cash and cash equivalents include cash on hand and financial instruments with a purchase-date maturity of three months or less. Cash and cash equivalents fall within Level 1 (quoted prices for identical financial instruments) of the three-level fair value hierarchy that ranks the inputs used to measure fair value by their reliability. During the nine months ended September 30, 2013, approximately \$7.9 million of customer advances, upon contract expiration, were applied as contributions toward utility construction activity and represent a non-cash investing activity.

*Intercompany Transactions.* NPL recognizes revenues generated from contracts with Southwest (see **Note 3 Segment Information** below). Accounts receivable for these services are presented in the table below (thousands of dollars):

	<b>September 30, 2013</b>	<b>December 31, 2012</b>
Accounts receivable for NPL services	\$ 11,517	\$ 8,179

The accounts receivable balance, revenues, and associated profits are included in the condensed consolidated financial statements of the Company and were not eliminated during consolidation in accordance with accounting treatment for rate-regulated entities.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

*Other Property and Investments.* Other property and investments includes (millions of dollars):

	<b>September 30, 2013</b>	<b>December 31, 2012</b>
NPL property and equipment	\$ 315	\$ 287
NPL accumulated provision for depreciation and amortization	(157)	(136)
Net cash surrender value of COLI policies	88	80
Other property	11	11
<b>Total</b>	<b>\$ 257</b>	<b>\$ 242</b>

*Other Income (Deductions).* The following table provides the composition of significant items included in Other income (deductions) on the consolidated statements of income (thousands of dollars):

	<b>Three Months Ended</b>		<b>Nine Months Ended</b>		<b>Twelve Months Ended</b>	
	<b>September 30 2013</b>	<b>2012</b>	<b>September 30 2013</b>	<b>2012</b>	<b>September 30 2013</b>	<b>2012</b>
Change in COLI policies	\$ 2,500	\$ 2,200	\$ 8,100	\$ 5,500	\$ 9,200	\$ 8,100
Interest income	158	280	422	785	561	962
Pipe replacement costs	(42)	(973)	(163)	(2,015)	(828)	(3,663)
Miscellaneous income and (expense)	52	129	(170)	304	(907)	577
<b>Total other income (deductions)</b>	<b>\$ 2,668</b>	<b>\$ 1,636</b>	<b>\$ 8,189</b>	<b>\$ 4,574</b>	<b>\$ 8,026</b>	<b>\$ 5,976</b>

Included in the table above is the change in cash surrender values of company-owned life insurance ( COLI ) policies (including net death benefits recognized). These life insurance policies on members of management and other key employees are used by Southwest to indemnify itself against the loss of talent, expertise, and knowledge, as well as to provide indirect funding for certain nonqualified benefit plans. Current tax regulations provide for tax-free treatment of life insurance (death benefit) proceeds. Therefore, changes in the cash surrender value components of COLI policies, as they progress towards the ultimate death benefits, are also recorded without tax consequences. Pipe replacement costs include amounts associated with certain Arizona non-recoverable pipe replacement work. The replacement program work subject to non-recoverability was substantially completed in 2012.

*Final and Proposed Income Tax Regulations.* In September 2013, the United States Department of the Treasury and the Internal Revenue Service ( IRS ) issued final and proposed regulations for the tax treatment of tangible property. The final regulations include standards for determining whether and when a taxpayer must capitalize costs incurred in acquiring, maintaining, or improving tangible property. The final regulations are generally effective for tax years beginning on or after January 1, 2014, and may be adopted in earlier years under certain circumstances. Proposed regulations were also released that revise the rules for dispositions of tangible property and general asset accounts. The proposed regulations addressing dispositions and general asset accounts are also expected (when finalized) to be

effective for tax years starting on or after January 1, 2014, and may be adopted in earlier years under certain circumstances. The Company expects the IRS to issue natural gas industry guidance which will facilitate its analysis regarding the regulations' impact on natural gas distribution networks. Based upon preliminary analysis of the final and proposed regulations, and in anticipation of specific guidance for the natural gas industry, the Company expects the regulations could result in a modest acceleration of tax deductibility, and the deferral of tax payments.

**Note 2 Components of Net Periodic Benefit Cost**

Southwest has a noncontributory qualified retirement plan with defined benefits covering substantially all employees and a separate unfunded supplemental retirement plan ( SERP ) which is limited to officers. Southwest also provides postretirement benefits other than pensions ( PBOP ) to its qualified retirees for health care, dental, and life insurance.

Net periodic benefit costs included in the table below are components of an overhead loading process associated with the cost of labor. The overhead process ultimately results in allocation of net periodic benefit costs to the same accounts to which productive labor is charged. As a result, net periodic benefit costs become components of various accounts, primarily operations and maintenance expense, net utility plant, and deferred charges and other assets.

**Note 4 Derivatives and Fair Value Measurements**

*Derivatives.* In managing its natural gas supply portfolios, Southwest has historically entered into fixed- and variable-price contracts, which qualify as derivatives. Additionally, Southwest utilizes fixed-for-floating swap contracts ( Swaps ) to supplement its fixed-price contracts. The fixed-price contracts, firm commitments to purchase a fixed amount of gas in the future at a fixed price, qualify for the normal purchases and normal sales exception that is

allowed for contracts that are probable of delivery in the normal course of business, and are exempt from fair value reporting. The variable-price contracts have no significant market value. The Swaps are recorded at fair value.

The fixed-price contracts and Swaps are utilized by Southwest under its volatility mitigation programs to effectively fix the price on a portion (currently ranging from 25% to 35%, depending on the jurisdiction) of its natural gas supply portfolios. The maturities of the Swaps highly correlate to forecasted purchases of natural gas, during time frames ranging from October 2013 through March 2015. Under such contracts, Southwest pays the counterparty at a fixed rate and receives from the counterparty a floating rate per MMBtu ( dekatherm ) of natural gas. Only the net differential is actually paid or received. The differential is calculated based on the notional amounts under the contracts, which are detailed in the table below (thousands of dekatherms):

	<b>September 30, 2013</b>	<b>December 31, 2012</b>
Contract notional amounts	15,662	14,579

Southwest does not utilize derivative financial instruments for speculative purposes, nor does it have trading operations.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

The following table sets forth the gains and (losses) recognized on the Company's Swaps (derivatives) for the three-, nine-, and twelve-month periods ended September 30, 2013 and 2012 and their location in the Condensed Consolidated Statements of Income (thousands of dollars):

**Gains (losses) recognized in income for derivatives not designated as hedging instruments:**

(Thousands of dollars)

<b>Total</b>		\$	\$	\$	\$	\$	\$

\* Represents the impact of regulatory deferral accounting treatment under U.S. GAAP for rate-regulated entities. In January 2010, Southwest entered into two forward-starting interest rate swaps ( FSIRS ) to hedge the risk of interest rate variability during the period leading up to the planned issuance of fixed-rate debt to replace \$200 million of debt that matured in February 2011 and \$200 million that matured in May 2012. Both were designated cash flow hedges. The first FSIRS terminated in December 2010 concurrent with the related issuance of \$125 million 4.45% 10-year Senior Notes. The second FSIRS had a notional amount of \$100 million, and terminated in March 2012 concurrent with the related issuance of \$250 million 3.875% 10-year Senior Notes. No gain or loss was recognized in income (ineffective portion) for either FSIRS during any period, including the periods presented in the following table. See **Note 7 Equity, Other Comprehensive Income, and Accumulated Other Comprehensive Income** for additional information on both FSIRS contracts.

**Gains (losses) recognized in other comprehensive income for derivatives designated as cash flow hedging instruments:**

(Thousands of dollars)

	Three Months Ended September 30		Nine Months Ended September 30		Twelve Months Ended September 30	
	2013	2012	2013	2012	2013	2012
Amount of gain/(loss) realized/ unrealized on FSIRS recognized in other comprehensive income on derivative	\$	\$	\$	\$ 2,959	\$	\$ 1,383

The following table sets forth the fair values of the Company's Swaps and their location in the balance sheets (thousands of dollars):

**Fair values of derivatives not designated as hedging instruments:**

<b>September 30, 2013</b>		<b>Asset</b>	<b>Liability</b>	
<b>Instrument</b>	<b>Balance Sheet Location</b>	<b>Derivatives</b>	<b>Derivatives</b>	<b>Net Total</b>
Swaps	Other current liabilities	\$ 25	\$ (4,282)	\$ (4,257)
Swaps	Other deferred credits	8	(787)	(779)
<b>Total</b>		\$ 33	\$ (5,069)	\$ (5,036)

<b>December 31, 2012</b>		<b>Asset</b>	<b>Liability</b>	
<b>Instrument</b>	<b>Balance Sheet Location</b>	<b>Derivatives</b>	<b>Derivatives</b>	<b>Net Total</b>
Swaps	Deferred charges and other assets	\$ 132	\$ (126)	\$ 6
Swaps	Other current liabilities	391	(2,467)	(2,076)
Swaps	Other deferred credits	233	(552)	(319)
<b>Total</b>		\$ 756	\$ (3,145)	\$ (2,389)

The estimated fair values of the natural gas derivatives were determined using future natural gas index prices (as more fully described below). The Company has master netting arrangements with each counterparty that provide for the net settlement of all contracts through a single payment. As applicable, the Company has elected to reflect the net amounts in its balance sheets. The Company had no outstanding collateral associated with the Swaps during either period shown in the above table.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

Pursuant to regulatory deferral accounting treatment for rate-regulated entities, Southwest records the unrealized gains and losses in fair value of the Swaps as a regulatory asset and/or liability. When the Swaps mature, Southwest reverses any prior positions held and records the settled position as an increase or decrease of purchased gas under the related purchased gas adjustment ( PGA ) mechanism in determining its deferred PGA balances. Neither changes in fair value, nor settled amounts, of Swaps have a direct effect on earnings or other comprehensive income.

The following table shows the amounts Southwest paid to and received from counterparties for settlements of matured Swaps.

(Thousands of dollars)	<b>Three Months Ended</b>			<b>Nine Months Ended</b>			<b>Twelve Months Ended</b>		
	<b>September</b>			<b>September</b>			<b>September 30,</b>		
	<b>30, 2013</b>			<b>30, 2013</b>			<b>2013</b>		
Paid to counterparties	\$	342		\$	1,214		\$	2,260	
Received from counterparties	\$	7		\$	915		\$	1,549	

The following table details the regulatory assets/(liabilities) offsetting the derivatives at fair value in the balance sheets (thousands of dollars).

<b>September 30, 2013</b>		
<b>Instrument</b>	<b>Balance Sheet Location</b>	<b>Net Total</b>
Swaps	Prepays and other current assets	\$ 4,257
Swaps	Deferred charges and other assets	779
<b>December 31, 2012</b>		
<b>Instrument</b>	<b>Balance Sheet Location</b>	<b>Net Total</b>
Swaps	Other deferred credits	\$ (6)
Swaps	Prepays and other current assets	2,076
Swaps	Deferred charges and other assets	319

*Fair Value Measurements.* The estimated fair values of Southwest's Swaps were determined at September 30, 2013 and December 31, 2012 using New York Mercantile Exchange ( NYMEX ) futures settlement prices for delivery of natural gas at Henry Hub adjusted by the price of NYMEX ClearPort basis Swaps, which reflect the difference between the price of natural gas at a given delivery basin and the Henry Hub pricing points. These Level 2 inputs (inputs, other than quoted prices, for similar assets or liabilities) are observable in the marketplace throughout the full term of the Swaps, but have been credit-risk adjusted with no significant impact to the overall fair value measure.

The following table sets forth the Company's Level 2 financial assets and liabilities recorded at fair value:

**Level 2 Significant other observable inputs**

(Thousands of dollars)	<b>September 30, 2013</b>	<b>December 31, 2012</b>
<b>Assets at fair value:</b>		
Deferred charges and other assets - Swaps	\$	\$ 6
<b>Liabilities at fair value:</b>		
Other current liabilities - Swaps	(4,257)	(2,076)
Other deferred credits - Swaps	(779)	(319)
<b>Net Assets (Liabilities)</b>	<b>\$ (5,036)</b>	<b>\$ (2,389)</b>

No financial assets or liabilities accounted for at fair value fell within Level 1 or Level 3 of the fair value hierarchy.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

## Note 5 Long-Term Debt

Carrying amounts of the Company's long-term debt and their related estimated fair values as of September 30, 2013 and December 31, 2012 are disclosed in the following table. The fair values of the revolving credit facility (including commercial paper), the NPL revolving credit facility, and the variable-rate Industrial Development Revenue Bonds (IDRBs) approximate their carrying values, and are categorized as Level 1 (quoted prices for identical financial instruments) within the three-level fair value hierarchy that ranks the inputs used to measure fair value by their reliability. The market values of debentures (except the 6.1% Notes) and fixed-rate IDRBs are categorized as Level 2. The 6.1% Notes and NPL other debt obligations are categorized as Level 3 (based on significant unobservable inputs to their fair values). Fair values for the debentures, fixed-rate IDRBs, and NPL other debt obligations were determined through a market-based valuation approach, where fair market values are determined based on evaluated pricing data, such as broker quotes and yields for similar securities adjusted for observable differences. Significant inputs used in the valuation generally include benchmark yield curves and issuer spreads. The external credit rating, coupon rate, and maturity of each security are considered in the valuation, as applicable.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

In February 2013, a notice of mandatory tender was sent to holders of the Clark County, Nevada 5.45% Series 2003C and 5.80% Series 2003E IDRBs. These IDRBs (totaling \$45 million) were subject to mandatory tender on March 1, 2013 at a price of 100% plus accrued interest, and the Company tendered these IDRBs to the trustee for cancellation immediately following the mandatory tender, thereby extinguishing this debt. The Company facilitated the redemption primarily from borrowings under its \$300 million credit facility.

In September 2013, the Company redeemed at par the \$8.27 million 5.55% 1999 Series D IDRBs originally due in 2038. The Company facilitated the redemption primarily from borrowings under its \$300 million credit facility.

In October 2013, the Company issued \$250 million in 4.875% Senior Notes at a 0.078% discount. The notes will mature in October 2043. A portion of the net proceeds were used to temporarily pay down amounts outstanding under the credit facility. The remaining net proceeds are intended to be used for general corporate purposes.

**Note 6 Short-Term Debt**

In March 2012, Southwest replaced the existing \$300 million credit facility that was to expire in May 2012 with a \$300 million facility that is scheduled to expire in March 2017. Of the \$300 million available under the facility, \$150 million was designated by management for working capital purposes. Southwest had \$33 million in short-term borrowings outstanding on the credit facility at September 30, 2013 and no outstanding short-term borrowings at December 31, 2012. The weighted-average interest rate on these borrowings was 1.62% at September 30, 2013.

**Note 7 Equity, Other Comprehensive Income, and Accumulated Other Comprehensive Income**

The table below provides details of activity in equity during the nine months ended September 30, 2013.

	Southwest Gas Corporation Equity						
	Common Stock		Additional	Accumulated Other Comprehensive	Retained	Non-	Total

(1) Tax amounts are calculated using a 38% rate.

Approximately \$2.1 million of realized losses (net of tax) related to the FSIRS, reported in Accumulated other comprehensive income ( AOCI ) at September 30, 2013, will be reclassified into interest expense within the next 12 months, as the related interest payments on long-term debt occur.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

The following represents a rollforward of AOCI, presented on the Company's Condensed Consolidated Balance Sheets:

**AOCI Rollforward**

(Thousands of dollars)

	Defined Benefit Plans Tax (Expense)			FSIRS Tax (Expense)			AOCI

SOUTHWEST GAS CORPORATION

Form 10-Q

September 30, 2013**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Southwest Gas Corporation and its subsidiaries (the Company) consist of two business segments: natural gas operations (Southwest or the natural gas operations segment) and construction services.

Southwest is engaged in the business of purchasing, distributing, and transporting natural gas for customers in portions of Arizona, Nevada, and California. Southwest is the largest distributor of natural gas in Arizona, selling and transporting natural gas in most of central and southern Arizona, including the Phoenix and Tucson metropolitan areas. Southwest is also the largest distributor of natural gas in Nevada, serving the Las Vegas metropolitan area and northern Nevada. In addition, Southwest distributes and transports natural gas for customers in portions of California, including the Lake Tahoe area and the high desert and mountain areas in San Bernardino County.

As of September 30, 2013, Southwest had 1,883,000 residential, commercial, industrial, and other natural gas customers, of which 1,010,000 customers were located in Arizona, 688,000 in Nevada, and 185,000 in California. Residential and commercial customers represented over 99% of the total customer base. During the twelve months ended September 30, 2013, 56% of operating margin was earned in Arizona, 34% in Nevada, and 10% in California. During this same period, Southwest earned 85% of its operating margin from residential and small commercial customers, 4% from other sales customers, and 11% from transportation customers. These general patterns are expected to remain materially consistent for the foreseeable future.

Southwest recognizes operating revenues from the distribution and transportation of natural gas (and related services) to customers. Operating margin is the measure of gas operating revenues less the net cost of gas sold. Management uses operating margin as a main benchmark in comparing operating results from period to period. The principal factors affecting changes in operating margin are general rate relief and customer growth. All of Southwest's service territories have decoupled rate structures, which are designed to eliminate the direct link between volumetric sales and revenue, thereby mitigating the impacts of weather variability and conservation on margin, allowing the Company to aggressively pursue energy efficiency initiatives.

NPL Construction Co. (NPL or the construction services segment), a wholly owned subsidiary, is a full-service underground piping contractor that primarily provides utility companies with trenching and installation, replacement, and maintenance services for energy distribution systems. NPL operates in 20 major markets nationwide. Construction activity is cyclical and can be significantly impacted by changes in weather, general and local economic conditions (including the housing market), interest rates, employment levels, job growth, the equipment resale market, pipe replacement programs of utilities, and local and federal regulation (including tax rates and incentives). During the past few years, utilities have implemented or modified pipeline integrity management programs to enhance safety pursuant to federal and state mandates. These programs, coupled with bonus depreciation tax deduction incentives, have resulted in a significant increase in multi-year pipeline replacement projects throughout the country. Generally, revenues are lowest during the first quarter of the year due to less favorable winter weather conditions. Revenues typically improve as more favorable weather conditions occur during the summer and fall months. In certain circumstances, such as with large, longer duration bid contracts, or unit-price contracts with caps, results may be impacted by differences between costs incurred and those anticipated when the work was originally bid.

This Management's Discussion and Analysis (MD&A) of Financial Condition and Results of Operations should be read in conjunction with the consolidated financial statements and the notes thereto, as well as the MD&A, included in the 2012 Annual Report to Shareholders, which is incorporated by reference into the 2012 Form 10-K, and the first

and second quarter 2013 reports on Form 10-Q.

**SOUTHWEST GAS CORPORATION**  
September 30, 2013

Form 10-Q

## Executive Summary

The items discussed in this Executive Summary are intended to provide an overview of the results of the Company's operations. As needed, certain items are covered in greater detail in later sections of management's discussion and analysis. As reflected in the table below, the natural gas operations segment accounted for an average of 85% of twelve-month-to-date consolidated net income over the past two years. As such, management's discussion and analysis is primarily focused on that segment. Natural gas sales are seasonal, peaking during the winter months; therefore, results of operations for interim periods are not necessarily indicative of results for a full year.

### Summary Operating Results

### 3rd Quarter 2013 Overview

Natural gas operations highlights include the following:

Operating margin increased \$5 million, or 4%, compared to the prior-year quarter

Operating expenses increased \$7.6 million, or 5%, compared to the prior-year quarter

Other income improved \$1 million over the prior-year quarter

Net financing costs decreased \$1.3 million compared to the prior-year quarter

Redemption of the \$8.27 million 5.55% 1999 Series D fixed-rate IDRBs (originally due in 2038)

Issuance of \$250 million in 4.875% 30-year Senior Notes in October 2013

Construction services highlights include the following:

Revenues increased \$16.1 million, or 9%, compared to the prior-year quarter

Construction expenses increased \$13.3 million, or 9%, compared to the prior-year quarter

Contribution to net income increased \$2 million, or 28%, over the prior-year quarter

SOUTHWEST GAS CORPORATION  
September 30, 2013

Form 10-Q

*Customer Growth.* Southwest added 25,000 net new customers over the last twelve months. First-time meter sets approximated 21,000 during the same period. Recently, Southwest has experienced customer growth in excess of first-time meter sets as meters on previously vacant homes return to service. Southwest estimates that the remaining number of excess inactive meters is approximately 27,000 at September 30, 2013. Southwest projects customer growth associated with new meter sets of about 1% for 2013, and anticipates a continued gradual return of customers associated with previously vacant homes.

*Company-Owned Life Insurance ( COLI ).* Southwest has life insurance policies on members of management and other key employees to indemnify itself against the loss of talent, expertise, and knowledge, as well as to provide indirect funding for certain nonqualified benefit plans. The COLI policies have a combined net death benefit value of approximately \$234 million at September 30, 2013. The net cash surrender value of these policies (which is the cash amount that would be received if Southwest voluntarily terminated the policies) is approximately \$88.4 million at September 30, 2013 and is included in the caption Other property and investments on the balance sheet. The Company currently intends to hold the COLI policies for their duration and purchase additional policies as necessary. Current tax regulations provide for tax-free treatment of life insurance (death benefit) proceeds. Therefore, changes in the cash surrender value components of COLI policies as they progress toward the ultimate death benefits are also recorded without tax consequences. Cash surrender values are directly influenced by the investment portfolio underlying the insurance policies. This portfolio includes both equity and fixed income (mutual fund) investments. As a result, generally the cash surrender value (but not the net death benefit) moves up and down consistent with movements in the broader stock and bond markets. Cash surrender values of COLI policies increased \$8.1 million (including \$1 million of incremental death benefits) in the first nine months of 2013 and \$9.2 million during the twelve months ended September 30, 2013. Management currently expects average returns of \$2 million to \$4 million annually on the COLI policies, excluding any net death benefits recognized. Based on the current investment mix, both positive and negative deviations from expected levels are likely to continue.

*Liquidity.* Southwest believes its liquidity position is solid. Southwest has a \$300 million credit facility maturing in March 2017. The facility is provided through a consortium of eight major banking institutions. Historically, credit facility usage has been low and concentrated in the first half of the winter heating period when gas purchases require temporary financing. During the first nine months of 2013, credit facility usage was impacted by a \$79 million reduction in deferred purchased gas cost liabilities and the extinguishment of \$53 million in Clark County, Nevada IDRBS. The maximum amount outstanding on the credit facility (including a commercial paper program) during the third quarter of 2013 was \$183 million. At September 30, 2013, \$150 million was outstanding on the long-term portion of the credit facility (including \$50 million under the commercial paper program), and \$33 million was outstanding on the short-term portion. Southwest has no significant debt maturities prior to 2017.

*Issuance and Redemption of Debt.* In October 2013, the Company issued \$250 million in 4.875% Senior Notes, due July 2043. The net proceeds were used to temporarily pay down amounts outstanding under the credit facility. The remaining net proceeds are intended to be used for general corporate purposes. The \$8.27 million 5.55% 1999 Series D IDRBS originally due in 2038 were redeemed at par in September 2013.

*Construction Services.* NPL's contribution to net income for the twelve months ended September 30, 2013 was \$29.1 million, a \$16.2 million increase over the results for the corresponding prior-year period. The prior-year period included recognition of a \$16 million pretax loss on a large fixed-price contract. Included in the current twelve-month period is approximately \$3 million of revenue associated with change orders recorded in the fourth quarter of 2012 relating to that fixed-price contract for work previously performed (and associated costs, previously recognized) in the prior-year loss calculation. Also reflected in the current twelve-month period is \$6.5 million in gains on sale of

equipment (including \$3.5 million from the fourth quarter of 2012) which are significantly in excess of normal expected levels. Additionally, general and administrative costs on a fully annualized basis are expected to be higher than the current twelve-month average.

Form 10-Q

## Results of Natural Gas Operations

### Quarterly Analysis

	Three Months Ended September 30,	
	2013	2012
	(Thousands of dollars)	
Gas operating revenues	\$ 195,031	\$ 195,573
Net cost of gas sold	47,746	53,277
<b>Operating margin</b>	<b>147,285</b>	<b>142,296</b>
Operations and maintenance expense	95,981	90,627
Depreciation and amortization	48,427	46,763
Taxes other than income taxes	11,153	10,600
<b>Operating income (loss)</b>	<b>(8,276)</b>	<b>(5,694)</b>
Other income (deductions)	2,663	1,631
Net interest deductions	14,780	16,074
<b>Income (loss) before income taxes</b>	<b>(20,393)</b>	<b>(20,137)</b>
Income tax expense (benefit)	(8,454)	(8,748)
<b>Contribution to consolidated net income (loss)</b>	<b>\$ (11,939)</b>	<b>\$ (11,389)</b>

Operating margin increased \$5 million in the third quarter of 2013 compared to the third quarter of 2012. Rate relief in Nevada and California provided \$2 million of the increase in operating margin. New customers contributed an incremental \$1 million in operating margin during the third quarter of 2013, as approximately 25,000 net new customers were added during the last twelve months. Incremental margin from customers outside the decoupling mechanisms and other miscellaneous revenues contributed the remainder of the increase.

Operations and maintenance expense increased \$5.4 million, or 6%, between quarters primarily due to higher general costs and employee-related costs including pension expense. In addition, pipeline integrity management programs impacted current quarter expenses.

Depreciation and amortization expense increased \$1.7 million, or 4%, primarily due to a \$1.5 million increase in amortization associated with the recovery of Arizona regulatory assets, new conservation and energy efficiency programs in Nevada, and other amortization. Average gas plant in service for the current quarter increased \$230 million, or 5%, compared to the corresponding quarter a year ago. This was attributable to pipeline capacity reinforcement work, franchise requirements, scheduled and accelerated pipe replacement activities, and to a lesser degree, new business. However, due to depreciation rate decreases in Nevada (resulting from the most recent Nevada general rate case), depreciation on plant was relatively flat overall between periods.

Other income, which principally includes returns on COLI policies (including recognized net death benefits) and non-utility expenses, increased \$1 million between quarters. The current quarter reflects COLI policy cash surrender value increases of \$2.5 million, while the prior-year quarter includes \$2.2 million in COLI-related income. In addition, Arizona non-recoverable pipe replacement costs were \$931,000 lower in 2013 as compared to 2012 because this pipe replacement activity was substantially completed in 2012.

Net interest deductions decreased \$1.3 million between quarters, primarily due to cost savings from the early redemption of \$45 million in fixed-rate IDRBs in March 2013 and lower interest expense associated with deferred PGA balances payable. Beginning in the fourth quarter of 2013, interest expense will trend upward as a result of the October 2013 \$250 million 4.875% debt offering.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

Nine-Month Analysis

	Nine Months Ended September 30,	
	2013	2012
	(Thousands of dollars)	
Gas operating revenues	\$ 927,500	\$ 982,203
Net cost of gas sold	317,742	387,983
<b>Operating margin</b>	<b>609,758</b>	<b>594,220</b>
Operations and maintenance expense	288,003	278,361
Depreciation and amortization	144,492	139,428
Taxes other than income taxes	34,021	31,065
<b>Operating income</b>	<b>143,242</b>	<b>145,366</b>
Other income (deductions)	8,174	4,317
Net interest deductions	45,344	51,077
Income before income taxes	106,072	98,606
Income tax expense	36,755	33,997
<b>Contribution to consolidated net income</b>	<b>\$ 69,317</b>	<b>\$ 64,609</b>

Contribution to consolidated net income from natural gas operations increased by \$4.7 million in the first nine months of 2013 compared to the same period a year ago. The improvement was primarily due to an increase in other income and a decrease in net interest deductions, partially offset by a decrease in operating income.

Operating margin increased nearly \$16 million between periods. Rate relief in Nevada and California provided an approximate \$6 million increase in operating margin. New customers contributed an incremental \$5 million in operating margin during the first nine months of 2013. Incremental margin from customers outside the decoupling mechanisms and other miscellaneous revenues contributed the remainder of the increase.

Operations and maintenance expense increased \$9.6 million, or 3%, between periods primarily due to higher general costs and employee-related costs including pension expense, partially offset by lower legal claims and expenses.

Depreciation and amortization expense increased \$5.1 million, or 4% primarily due to a \$4.7 million increase in amortization associated with the recovery of Arizona regulatory assets, new conservation and energy efficiency programs in Nevada, and other amortization. Average gas plant in service for the current period increased \$217 million, or 4%, compared to the corresponding period a year ago. This was attributable to pipeline capacity reinforcement work, franchise requirements, scheduled and accelerated pipe replacement activities, and new business. Increased depreciation associated with the incremental plant in service was largely offset by lower depreciation rates in Nevada as a result of the most recent general rate case.

Taxes other than income taxes increased \$3 million between periods due to higher Arizona property taxes and changes resulting from the last Nevada general rate case, whereby modified business and mill taxes became components of operating expenses.

Other income increased \$3.9 million between the nine-month periods of 2013 and 2012. The current period reflects \$8.1 million of COLI policy cash surrender value increases and net death benefits recognized, while the prior-year period included \$5.5 million of COLI-related income. In addition, Arizona non-recoverable pipe replacement costs were \$1.9 million lower in the first nine months of 2013 as compared to the same period a year ago because this pipe replacement activity was substantially completed in 2012.

Net interest deductions decreased \$5.7 million between periods, primarily due to cost savings from refinancing \$200 million of debt in the first half of 2012, the early redemption of \$45 million in fixed-rate IDRBS in March 2013, and lower interest expense associated with deferred PGA balances payable. The prior-year period included a temporary increase in debt outstanding for approximately two months associated with the refinancing.

**SOUTHWEST GAS CORPORATION**  
**September 30, 2013**

Form 10-Q

Twelve-Month Analysis

	Twelve Months Ended September 30,	
	2013	2012
	(Thousands of dollars)	
Gas operating revenues	\$ 1,267,025	\$ 1,362,655
Net cost of gas sold	409,361	533,446
Operating margin	857,664	829,209
Operations and maintenance expense	379,621	368,114
Depreciation and amortization	191,099	183,684
Taxes other than income taxes	44,684	41,264
Operating income	242,260	236,147
Other income (deductions)	8,022	5,717
Net interest deductions	61,224	67,757
Income before income taxes	189,058	174,107
Income tax expense	67,731	60,726
Contribution to consolidated net income	\$ 121,327	\$ 113,381

The contribution to consolidated net income from natural gas operations increased \$7.9 million between the twelve-month periods of 2013 and 2012. The improvement was primarily due to increases in operating margin and other income and a decrease in interest deductions, partially offset by higher operating expenses.

Operating margin increased \$28 million, or 3%, between periods primarily due to \$17 million of combined rate relief in Arizona, Nevada, and California. Customer growth contributed \$7 million toward the increase. Incremental margin from customers outside the decoupling mechanisms and other miscellaneous revenues contributed the remainder of the increase.

Operations and maintenance expense increased \$11.5 million, or 3%, between periods primarily due to higher general costs and employee-related costs including pension expense, partially offset by lower legal claims and expenses.

Depreciation and amortization expense increased \$7.4 million, or 4%. Average gas plant in service for the current period increased \$225 million, or 5%, as compared to the prior-year period. This was attributable to pipeline capacity reinforcement work, franchise requirements, scheduled and accelerated pipe replacement activities, and to a lesser degree, new business. Increases in depreciation from these plant additions were partially offset by lower depreciation rates in Nevada (effective November 2012). Amortization associated with the recovery of Arizona regulatory assets, new conservation and energy efficiency programs in Nevada, and other amortization collectively increased \$5.9 million.

Taxes other than income taxes increased \$3.4 million between periods due to higher property taxes in Arizona and changes resulting from the most recent Nevada general rate case, whereby modified business and mill taxes became components of operating expenses.

Other income increased \$2.3 million between the twelve-month periods of 2013 and 2012. The current period reflects a \$9.2 million increase in COLI policy cash surrender values including net death benefits recognized, while the prior twelve-month period reflected an \$8.1 million increase in COLI-related income including recognized death benefits. In addition, Arizona non-recoverable pipe replacement costs were \$2.8 million lower in the current twelve-month period.

Net interest deductions decreased \$6.5 million between the twelve-month periods of 2013 and 2012 primarily due to cost savings from debt refinancing, redemptions, and lower interest expense associated with deferred PGA balances payable. The prior-year period included a temporary increase in debt outstanding for approximately two months associated with the debt refinancing in the first half of 2012.

**SOUTHWEST GAS CORPORATION**  
September 30, 2013

Form 10-Q

*Outlook for 2013 3rd Quarter Update*

Operating margin for 2013 is expected to be favorably influenced by customer growth similar to 2012, as well as by incremental margin associated with the Nevada rate case decision and the California attrition adjustment.

Operating expenses for 2013 compared to 2012 will continue to be impacted by inflation, general cost increases, and incremental depreciation expense related to plant additions. A reduction in depreciation rates in Nevada will mitigate higher regulatory amortization. Incremental costs, including a \$6.4 million increase in pension cost (\$5 million net) for 2013 and higher property and general taxes, are expected to result in an overall operating expense increase of approximately 3% to 4%.

COLI-related income of \$8.1 million and \$9.2 million for the nine and twelve months, respectively, ended September 30, 2013 are significantly in excess of expected average returns and are not likely sustainable at these levels for the mid to long term.

Southwest anticipates approximately \$4 million in net interest savings in 2013 compared to 2012 due to debt refinancings and redemptions. These savings relate to the March 2012 issuance of \$250 million in 3.875% Senior Notes and the repayment of the \$200 million of 7.625% debt that occurred in May 2012, as well as the August 2012 redemption of the \$14.3 million 1999 5.95% Series C IDRBs. Also included are interest savings associated with the redemption of the \$30 million 5.45% 2003 Series C and the \$15 million 5.80% 2003 Series E IDRBs in March 2013, and the \$8.27 million 5.55% 1999 Series D IDRBs in September 2013. These savings will be partially offset by the October 2013 issuance of \$250 million in 4.875% Senior Notes.

*Quarterly Analysis.* Contribution to consolidated net income from construction services for the three months ended September 30, 2013 improved \$2 million compared to the same period of 2012.

Revenues increased \$16.1 million when compared to the third quarter of 2012 primarily due to an increase in utility pipe replacement construction, which continues to be strong. Construction expenses increased \$13.3 million between quarters. During the current quarter, construction expenses were greater due to the increase in replacement construction work. Additionally, general and administrative costs (included within construction expenses) increased \$1.2 million primarily due to structural and transitional changes (including key management changes) initiated in response to the increasing size and complexity of NPL's business. Gains on sale of equipment (reflected as an offset to construction expenses) were \$704,000 and \$1.2 million during the third quarters of 2013 and 2012, respectively.

---

SOUTHWEST GAS CORPORATION  
September 30, 2013

Form 10-Q

*Nine-Month Analysis.* Contribution to consolidated net income from construction services for the nine months ended September 30, 2013 improved \$12.4 million compared to the same period of 2012 primarily due to an \$18 million pretax loss recognized on a large fixed-price contract in 2012.

Revenues increased \$27.9 million when compared to the first nine months of 2012, primarily due to an increase in replacement construction, partially offset by the winding down of a portion of work related to the large fixed-price contract noted above. Construction expenses increased \$3.9 million between the nine-month periods primarily due to replacement work in the current year and to an increase of \$5.4 million in general and administrative expense, resulting from changes introduced to address NPL's increased size and business complexity. Despite these increases, the construction expense variance between years was favorably impacted by an \$18 million loss in the prior-year period associated with the above-noted fixed-price contract. Depreciation expense increased \$4.8 million due to additional equipment purchases to support the growth in the volume of work being performed. Gains on sale of equipment (reflected as an offset to construction expenses) were \$3 million and \$4.5 million for the first nine months of 2013 and 2012, respectively.

*Twelve-Month Analysis.* The contribution to consolidated net income from construction services for the twelve-month period ended September 30, 2013 increased \$16.2 million compared to the same period of 2012.

Revenues increased \$39.8 million due primarily to an increase in utility customer contracts for pipe replacement work. Included in current period revenues is approximately \$3 million of revenue associated with fourth quarter 2012 change orders on the large fixed-price contract. Construction expenses increased \$7.9 million between twelve-month periods primarily due to additional pipe replacement work during the 2013 period. However, the construction expense variance between years was favorably impacted as the prior-year period included a \$16 million loss associated with the large fixed-price contract. This fixed-price contract is substantially complete and no further change orders are expected. General and administrative expense (included in construction expenses) increased \$6.7 million due to changes that were implemented to match NPL's increased size and business complexity. Depreciation expense rose \$7.6 million due to additional equipment purchased to support a significant growth in the volume of work being performed. Gains on sale of equipment were \$6.5 million and \$5.9 million for the twelve-month periods of 2013 and 2012, respectively.

NPL's revenues and operating profits are influenced by weather, customer requirements, mix of work, local economic conditions, bidding results, the equipment resale market, and the credit market. Typically, revenues are lowest during the first quarter of the year due to unfavorable winter weather conditions. Revenues generally improve as more favorable weather conditions occur during the summer and fall months. The current low interest rate environment, the impact of bonus depreciation legislation, and the regulatory environment (encouraging the natural gas industry to replace aging pipeline infrastructure) are having a positive influence on NPL's results.

During the past several years, NPL has focused its efforts on obtaining pipe replacement work under both blanket contracts and incremental bid projects. For the twelve months ended September 30, 2013 and 2012, revenues from replacement work were 71% and 76%, respectively, of total revenues. Federal and state pipeline safety-related programs and bonus depreciation incentives have resulted in many utilities undertaking multi-year distribution pipe replacement projects. NPL continues to bid on pipe replacement projects throughout the country.

*Outlook for 2013 3rd Quarter Update*

Revenues are subject to the timing and amount of work awarded to NPL by its utility customers. Based on the current status of bids and contracts in place, expectations are for full-year 2013 revenues to moderately exceed 2012 levels. Construction expenses for 2013 as a percentage of revenues are expected to continue at approximately the current year-to-date level as the total expected loss on the large fixed-price contract was recorded in 2012. Gains on sale of equipment (reflected as an offset to construction expenses) for 2013 are expected to be lower than those recognized in 2012 due to a reduction in capital replacement expenditures in the current year. The depreciation trend line should continue as the majority of capital expenditures for equipment in 2013 have been completed and the equipment deployed at the project sites.

SOUTHWEST GAS CORPORATION

Form 10-Q

## **Rates and Regulatory Proceedings**

*Nevada Infrastructure Replacement Mechanism.* As part of its Nevada general rate case application in April 2012, Southwest requested to implement an infrastructure replacement mechanism to defer and recover certain costs associated with up to \$40 million annually of proposed accelerated replacement of early vintage plastic and steel pipe. As part of its fourth quarter 2012 decision, the Public Utilities Commission of Nevada ( PUCN ) indicated a separate rulemaking docket would be needed to address the regulatory issues necessary to implement such a mechanism. In January 2013, the PUCN authorized the opening of a new docket to review the merits of such mechanisms. An initial round of comments and reply comments were submitted and a workshop on the matter was convened. The scope of the rulemaking was expanded in order to consider additional forms of recovery mechanisms. In July, the Administrative Law Judge in the docket forwarded a draft regulation to the Nevada Legislative Counsel Bureau ( LCB ) for review. The draft regulation allows the establishment of regulatory assets that recover the depreciation expense and authorized pre-tax rate of return of infrastructure replacement investments in between rate cases. The LCB proposed slight modifications to the regulation and returned it to the PUCN in August. The PUCN is expected to hold additional workshops, and subsequently convene a hearing, ultimately followed by a PUCN vote. A PUCN vote on the matter is currently expected by the end of the first quarter of next year.

Separately, in March 2013, Southwest submitted a petition to the PUCN requesting authority to defer certain costs associated with the proposed accelerated 2013 replacement of certain early vintage plastic pipe to coincide with bonus depreciation tax relief extended by The American Taxpayer Relief Act of 2012. In June 2013, a stipulation, which provides regulatory asset treatment for specific infrastructure replacement projects occurring during 2013 in the amount of \$2 million in Northern Nevada and approximately \$13.6 million in Southern Nevada, was reached by all parties. The PUCN approved the stipulation in June 2013. The Company is expecting to recover deferred depreciation amounts along with an allowed rate of return in its next general rate case.

*California Annual Attrition.* As part of the 2009 rate decision by the California Public Utilities Commission ( CPUC ) in Southwest's last California general rate case, attrition increases were authorized for the years 2010-2013. The level of increase authorized for 2013 was \$1.8 million in southern California, \$500,000 in northern California, and \$100,000 in South Lake Tahoe. However, the continued low interest rate environment triggered an automatic rate of return adjustment mechanism, which resulted in offsetting decreases of \$700,000 in southern California, \$500,000 in northern California, and \$100,000 in South Lake Tahoe. The resulting net margin impact for the California rate jurisdictions is an overall increase of \$1.1 million in 2013.

*California General Rate Case.* In December 2012, Southwest filed a general rate case application with the CPUC requesting annual revenue increases of \$5.6 million for southern California, \$3.2 million for northern California, and \$2.8 million for the South Lake Tahoe rate jurisdiction. The application included a capital structure consisting of 43% debt and 57% common equity, with an overall rate of return of 7.32% in southern California and 8.61% in both northern California and South Lake Tahoe. Southwest is also seeking to continue a Post-Test Year Ratemaking Mechanism, which allows for annual attrition increases. The application includes the addition of an Infrastructure Reliability and Replacement Adjustment Mechanism to facilitate and complement projects involving the enhancement and replacement of gas infrastructure, promoting timely cost recovery for qualifying non-revenue producing capital expenditures. Hearings on the general rate case application were held in August 2013. A final decision is expected in December 2013 with new rates effective January 2014.

*Customer-Owned Yardline ( COYL ) Program.* The Company received approval, in connection with its most recent Arizona general rate case, to implement a program to conduct leak surveys, replace, and relocate service lines and

meters for Arizona customers whose meters are set-off from the customer's home, which is not a traditional configuration. Customers with this configuration were previously responsible for the cost of maintaining these lines and were subject to the immediate cessation of natural gas service when low-pressure leaks occurred. To facilitate this program, the Company was authorized to collect estimated leak survey costs in rates commencing in 2012. Effective June 2013, the Arizona Corporation Commission (ACC) authorized a surcharge of \$0.00101 per therm (approximately \$600,000 annually) to recover the amount the Company would have earned if the additional pipe replacement costs themselves (approximately \$4 million through December 2012) had been included in rate base concurrent with the most recent Arizona rate case. The new surcharge is expected to be revised annually as the program progresses, with the undepreciated plant balance to be incorporated in base rates at the time of the next Arizona general rate case.

**SOUTHWEST GAS CORPORATION**  
September 30, 2013

Form 10-Q

*Federal Energy Regulatory Commission ( FERC ) Jurisdiction.* During the third quarter of 2013, Paiute Pipeline Company, a wholly owned subsidiary of Southwest, notified present and potential shippers of its plans to expand its existing transmission system to provide additional firm transportation-service capacity in the Elko County, Nevada area. This additional capacity is required to meet growing natural gas demands caused by increased residential and business load and the greater energy needs of mining operations in the area. Through the open season process, shippers responded with substantial interest. Dependent upon several variables, including the ultimate route of the project, the price of materials, and factors such as environmental impacts, the cost to complete this project has been estimated at approximately \$35 million and has a targeted in-service date of November 2015. In October, Paiute submitted a filing with the FERC requesting that its Staff initiate a pre-filing review of the proposed expansion project; a comprehensive application for the project is expected to follow completion of the pre-filing review.

**PGA Filings**

The rate schedules in all of Southwest's service territories contain provisions that permit adjustments to rates as the cost of purchased gas changes. These deferred energy provisions and purchased gas adjustment clauses are collectively referred to as PGA clauses. Differences between gas costs recovered from customers and amounts paid for gas by Southwest result in over- or under-collections. At September 30, 2013, over-collections in Arizona and southern Nevada resulted in a liability of \$16.9 million and under-collections in northern Nevada and California resulted in an asset of \$2.7 million on the Company's balance sheet. Filings to change rates in accordance with PGA clauses are subject to audit by state regulatory commission staffs. PGA changes impact cash flows but have no direct impact on profit margin. However, gas cost deferrals and recoveries can impact comparisons between periods of individual income statement components. These include Gas operating revenues, Net cost of gas sold, Net interest deductions, and Other income (deductions).

The following table presents Southwest's outstanding PGA balances receivable/(payable) (millions of dollars):

	<b>September 30, 2013</b>	<b>December 31, 2012</b>	<b>September 30, 2012</b>
Arizona	\$ (11.6)	\$ (46.6)	\$ (57.5)
Northern Nevada	0.2	(7.1)	(12.9)
Southern Nevada	(5.3)	(45.2)	(52.0)
California	2.5	6.0	(0.6)
	<b>\$ (14.2)</b>	<b>\$ (92.9)</b>	<b>\$ (123.0)</b>

*Arizona PGA Filings.* In Arizona, Southwest adjusts rates monthly for changes in purchased gas costs, within pre-established limits measured on a twelve-month rolling average. A temporary surcredit of \$0.08 per therm was put into place in December 2009 to help accelerate the refund of the over-collected balance to customers. During 2012, approximately \$40 million was refunded to customers via the surcredit; however, continued low natural gas prices resulted in a continuing balance due customers. In order to accelerate the refunds to customers, Southwest filed to temporarily increase this rate to \$0.10 per therm effective January 2013, which was approved by the ACC in December 2012. Approximately \$41.6 million was refunded to customers through the surcredit through the first nine months of 2013.

## **Capital Resources and Liquidity**

Cash on hand and cash flows from operations in the past twelve months provided the majority of cash used in investing activities (primarily for construction expenditures and property additions). Certain pipe replacement work was accelerated during 2011, 2012, and in the current year to take advantage of bonus depreciation tax incentives. During the past three years, the Company was able to achieve cost savings from debt refinancing and strategic debt redemptions. The Company's capitalization strategy is to maintain an appropriate balance of equity and debt to maintain strong investment-grade credit ratings, which should minimize interest costs.

### *Cash Flows*

*Operating Cash Flows.* Cash flows provided by consolidated operating activities decreased \$61.8 million in the first nine months of 2013 as compared to the same period of 2012. The decline in operating cash flows was attributable to temporary decreases in cash flows from working capital components overall (notably, refunds of PGA balances), partially offset by higher net income and non-cash depreciation expense.

SOUTHWEST GAS CORPORATION  
September 30, 2013

Form 10-Q

*Investing Cash Flows.* Cash used in consolidated investing activities decreased \$34.8 million in the first nine months of 2013 as compared to the same period of 2012. The decrease was primarily due to reduced equipment purchases by NPL.

*Financing Cash Flows.* Net cash used in consolidated financing activities decreased \$15.2 million in the first nine months of 2013 as compared to the same period of 2012. The current period includes the repayment of the \$30 million 2003 5.45% Series C IDRBs, the \$15 million 2003 5.8% Series E IDRBs, and the \$8.27 million 5.55% 1999 Series D IDRBs, partially offset by an increase in borrowings on the credit facility. The issuance amounts and remaining retirements of long-term debt primarily relate to borrowings and repayments under NPL's line of credit as well as borrowing under note agreements with two banking institutions entered into during the second quarter of 2013. The prior-year period included debt repayments of the \$12.4 million 1999 6.1% Series A fixed-rate IDRBs (repaid in January 2012), the \$200 million 7.625% Senior Notes (repaid in May 2012), and the repayment of outstanding borrowings on the credit facility. The repayments were partially offset by the issuance in the prior-year period of new debt including the \$250 million 3.875% Senior Notes. The second FSIRS contract was settled by paying \$21.8 million during the first quarter of 2012 (at maturity). Dividends paid increased in the first nine months of 2013 as compared to the first nine months of 2012 as a result of an increase in the quarterly dividend rate and an increase in the number of shares outstanding.

The capital requirements and resources of the Company generally are determined independently for the natural gas operations and construction services segments. Each business activity is generally responsible for securing its own financing sources.

#### *Gas Segment Construction Expenditures, Debt Maturities, and Financing*

During the twelve-month period ended September 30, 2013, construction expenditures for the natural gas operations segment were \$321 million. The majority of these expenditures represented costs associated with scheduled and accelerated replacement of existing transmission, distribution, and general plant (see also *Bonus Depreciation* below). Cash flows from operating activities of Southwest were \$250 million and provided approximately 66% of construction expenditures and dividend requirements of the natural gas operations segment. Other necessary funding was provided by cash on hand, external financing activities, and existing credit facilities.

Southwest estimates natural gas segment construction expenditures during the three-year period ending December 31, 2015 will be approximately \$1 billion. Of this amount, approximately \$320 million to \$340 million are expected to be incurred in 2013. Southwest has taken advantage of bonus depreciation tax benefits to accelerate projects that improve system flexibility and reliability (including replacement of early vintage plastic and steel pipe). Significant replacement activities are expected to continue during the next several years. During the three-year period, cash flows from operating activities of Southwest (including the bonus depreciation benefits) are expected to provide approximately 85% of the funding for the gas operations total construction expenditures and dividend requirements. Any additional cash requirements are expected to be provided by existing credit facilities and/or other external financing sources. The timing, types, and amounts of any additional external financings will be dependent on a number of factors, including the cost of gas purchases, conditions in the capital markets, timing and amounts of rate relief, growth levels in Southwest's service areas, and earnings. External financings could include the issuance of both debt and equity securities, bank and other short-term borrowings, and other forms of financing.

In March 2013, the Company redeemed at par its \$30 million 2003 5.45% Series C IDRBs and \$15 million 2003 5.8% Series E IDRBs. The Company facilitated the redemption primarily from borrowings under its \$300 million credit

facility.

In September 2013, the Company redeemed at par the \$8.27 million 5.55% 1999 Series D IDRBs originally due in 2038. The Company facilitated the redemption primarily from borrowings under its \$300 million credit facility.

In October 2013, the Company issued \$250 million in 4.875% Senior Notes at a 0.078% discount. The notes will mature in October 2043. A portion of the net proceeds were used to temporarily pay down amounts outstanding under the credit facility. The remaining net proceeds are intended to be used for general corporate purposes.

SOUTHWEST GAS CORPORATION  
September 30, 2013

Form 10-Q

During the nine months ended September 30, 2013, the Company issued shares of common stock through the Stock Incentive Plan, raising approximately \$1.4 million.

*Construction segment financings.* In May 2013, NPL entered into a \$20 million 1.68% note agreement with Banc of America Leasing & Capital, LLC to finance equipment purchases. The note will be repaid in sixty equal monthly installments until maturity in May 2018. Also in May 2013, NPL entered into a \$10 million 1.77% note agreement with Wells Fargo Equipment Finance Inc. to finance equipment purchases. The note will be repaid in sixty equal monthly installments until maturity in May 2018.

*Bonus Depreciation.* In January 2013, the American Taxpayer Relief Act of 2012 ( Taxpayer Relief Act ) was enacted extending the 50% bonus tax depreciation deduction provided for by earlier legislation for qualified property acquired or constructed and placed in-service during 2013. Based on forecasted qualifying construction expenditures, Southwest estimates the bonus depreciation provisions of the Taxpayer Relief Act will defer the payment of approximately \$35 million of federal income taxes for 2013.

#### *Dividend Policy*

In reviewing dividend policy, the Board of Directors ( Board ) considers the adequacy and sustainability of earnings and cash flows of the Company and its subsidiaries; the strength of the Company's capital structure; the sustainability of the dividend through all business cycles; and whether the dividend is within a normal payout range for its respective businesses. As a result of its ongoing review of dividend policy, in February 2013, the Board increased the quarterly dividend from 29.5 cents to 33 cents per share, effective with the June 2013 payment. Over time, the Board intends to increase the dividend such that the payout ratio approaches a local distribution company peer group average, while maintaining the Company's stable and strong credit ratings and the ability to effectively fund future rate base growth. The timing and amount of any future increases will be based upon the Board's continued review of the Company's dividend rate in the context of the performance of the Company's two operating segments and their future growth prospects.

#### *Liquidity*

Liquidity refers to the ability of an enterprise to generate sufficient amounts of cash through its operating activities and external financing to meet its cash requirements. Several general factors (some of which are out of the control of the Company) that could significantly affect liquidity in future years include: variability of natural gas prices, changes in the ratemaking policies of regulatory commissions, regulatory lag, customer growth in the natural gas segment's service territories, Southwest's ability to access and obtain capital from external sources, interest rates, changes in income tax laws, pension funding requirements, inflation, and the level of Company earnings. Natural gas prices and related gas cost recovery rates have historically had the most significant impact on Company liquidity.

On an interim basis, Southwest generally defers over- or under-collections of gas costs to PGA balancing accounts. In addition, Southwest uses this mechanism to either refund amounts over-collected or recoup amounts under-collected as compared to the price paid for natural gas during the period since the last PGA rate change went into effect. During the first nine months of 2013, refunds were made to customers and the net over-collected PGA balance declined \$78.7 million resulting in a net over-collection of \$14.2 million at September 30, 2013. See **PGA Filings** for more information.

The Company has a \$300 million revolving credit facility that expires in March 2017. Southwest has designated \$150 million of the \$300 million facility for long-term borrowing needs and the remaining \$150 million for working capital purposes. At September 30, 2013, \$150 million was outstanding on the long-term portion of the credit facility (including \$50 million under the commercial paper program), and \$33 million was outstanding on the short-term portion. The long-term balance at September 30, 2013 reflects the impacts of the PGA refunds and the extinguishment of \$45 million in Clark County, Nevada IDRBs in the first nine months of 2013. The maximum amount outstanding during the first nine months of 2013 was \$183 million (\$150 million outstanding on the long-term portion of the credit facility (including the commercial paper program) and \$33 million outstanding on the short-term portion). The credit facility can be used as necessary to meet liquidity requirements, including temporarily financing under-collected PGA balances, if any, or meeting the refund needs of over-collected balances. This credit facility has been adequate for Southwest's working capital needs outside of funds raised through operations and other types of external financing.

**SOUTHWEST GAS CORPORATION**  
September 30, 2013

Form 10-Q

The Company has a \$50 million commercial paper program. Any issuance under the commercial paper program is supported by the Company's current revolving credit facility and, therefore, does not represent additional borrowing capacity. Any borrowing under the commercial paper program will be designated as long-term debt. Interest rates for the commercial paper program are calculated at the current commercial paper rate during the borrowing term. At September 30, 2013, the maximum capacity under this program (\$50 million) was outstanding.

NPL has a \$75 million credit facility that is scheduled to expire in June 2015. At September 30, 2013, \$4 million was outstanding on the NPL credit facility.

The following table sets forth the ratios of earnings to fixed charges for the Company. Due to the seasonal nature of the Company's business, these ratios are computed on a twelve-month basis:

	For the Twelve Months Ended	
	September 30, 2013	December 31, 2012
Ratio of earnings to fixed charges	4.14	3.61

Earnings are defined as the sum of pretax income plus fixed charges. Fixed charges consist of all interest expense including capitalized interest, one-third of rent expense (which approximates the interest component of such expense), and net amortized debt costs.

*Credit Rating Upgrades.* In March 2013, Standard & Poor's Ratings Services (S&P) upgraded the Company's unsecured long-term debt ratings from BBB+ (with a stable outlook) to A- (with a stable outlook). S&P cited the Company's sustained improvements in cash flow and leverage measures and improved regulatory relationships in all three service territories. S&P debt ratings range from AAA (highest rating possible) to D (obligation is in default). The S&P rating of A- indicates the issuer of the debt is regarded as having a strong capacity to meet financial commitments.

In May 2013, Fitch Ratings (Fitch) upgraded the Company's senior unsecured ratings including IDRBs from A- (with a positive outlook) to A (with a stable outlook). Fitch cited the Company's stronger credit metrics and improved business risk profile. Fitch debt ratings range from AAA (highest credit quality) to D (defaulted debt obligation). The Fitch rating of A indicates low default risk and a strong ability to pay financial commitments.

### **Forward-Looking Statements**

This quarterly report contains statements which constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (Reform Act). All statements other than statements of historical fact included or incorporated by reference in this quarterly report are forward-looking statements, including, without limitation, statements regarding the Company's plans, objectives, goals, intentions, projections, strategies, future events or performance, and underlying assumptions. The words may, if, will, should, could, expect, plan, believe, estimate, predict, project, continue, forecast, intend, promote, and similar words and expressions used and intended to identify forward-looking statements. For example, statements regarding operating margin patterns, customer growth, the composition of our customer base, price volatility, seasonal patterns, payment of debt,

interest savings, the Company's COLI strategy, annual COLI returns, replacement market and new construction market, bonus depreciation tax deductions, amount and timing for completion of estimated future construction expenditures, forecasted operating cash flows and results of operations, incremental operating margin in 2013, operating expense increases in 2013, funding sources of cash requirements, sufficiency of working capital and current credit facility, bank lending practices, the Company's views regarding its liquidity position, ability to raise funds and receive external financing capacity, future dividend increases, earnings trends, NPL's projected financial performance and related market growth potential, pension and post-retirement benefits, certain benefits of tax acts, the effect of any rate changes or regulatory proceedings, including the California general rate case filing, pending or future infrastructure replacement mechanisms, statements regarding future gas prices, gas purchase contracts and derivative financial instruments, the impact of certain legal proceedings, and the timing and results of future rate hearings and approvals are forward-looking statements. All forward-looking statements are intended to be subject to the safe harbor protection provided by the Reform Act.

SOUTHWEST GAS CORPORATION  
September 30, 2013

Form 10-Q

A number of important factors affecting the business and financial results of the Company could cause actual results to differ materially from those stated in the forward-looking statements. These factors include, but are not limited to, customer growth rates, conditions in the housing market, the ability to recover costs through the PGA mechanisms, the effects of regulation/deregulation, the timing and amount of rate relief, changes in rate design, changes in gas procurement practices, changes in capital requirements and funding, the impact of conditions in the capital markets on financing costs, changes in construction expenditures and financing, changes in operations and maintenance expenses, effects of pension expense forecasts, accounting changes, future liability claims, changes in pipeline capacity for the transportation of gas and related costs, results of NPL bid work, impacts of structural and management changes at NPL, NPL construction expenses, differences between actual and originally expected outcomes of NPL bid or other fixed-price construction agreements, acquisitions and management's plans related thereto, competition, and our ability to raise capital in external financings. In addition, the Company can provide no assurance that its discussions regarding certain trends relating to its financing and operating expenses will continue in future periods. For additional information on the risks associated with the Company's business, see **Item 1A. Risk Factors** and **Item 7A. Quantitative and Qualitative Disclosures About Market Risk** in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

All forward-looking statements in this quarterly report are made as of the date hereof, based on information available to the Company as of the date hereof, and the Company assumes no obligation to update or revise any of its forward-looking statements even if experience or future changes show that the indicated results or events will not be realized. **We caution you not to unduly rely on any forward-looking statement(s).**

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

See **Item 7A. Quantitative and Qualitative Disclosures about Market Risk** in the Company's 2012 Annual Report on Form 10-K filed with the SEC. No material changes have occurred related to the Company's disclosures about market risk.

### **ITEM 4. CONTROLS AND PROCEDURES**

The Company has established disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to provide reasonable assurance that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and to provide reasonable assurance that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and benefits of controls must be considered relative to their costs. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or management override of the control. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Based on the most recent evaluation, as of September 30, 2013, management of the Company, including the Chief Executive Officer and Chief Financial Officer, believe the Company's disclosure controls and procedures are effective

at attaining the level of reasonable assurance noted above.

There have been no changes in the Company's internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the third quarter of 2013 that have materially affected, or are likely to materially affect, the Company's internal controls over financial reporting.

SOUTHWEST GAS CORPORATION  
September 30, 2013

Form 10-Q

**PART II OTHER INFORMATION**

**ITEM 1. LEGAL PROCEEDINGS**

The Company is named as a defendant in various legal proceedings. The ultimate dispositions of these proceedings are not presently determinable; however, it is the opinion of management that none of this litigation individually or in the aggregate will have a material adverse impact on the Company's financial position or results of operations.

**ITEMS 1A. through 3.** None.

**ITEM 4. MINE SAFETY DISCLOSURES** Not applicable.

**ITEM 5. OTHER INFORMATION** None.

**ITEM 6. EXHIBITS**

The following documents are filed, or furnished, as applicable, as part of this report on Form 10-Q:

- Exhibit 4.01 - Indenture, dated as of October 4, 2013, by and between Southwest Gas Corporation and The Bank of New York Mellon Trust Company, N.A., as Trustee. Incorporated herein by reference to Exhibit 4.1 to Form 8-K dated October 1, 2013. File No. 1-07850.
- Exhibit 12.01 - Computation of Ratios of Earnings to Fixed Charges.
- Exhibit 31.01 - Section 302 Certifications.
- Exhibit 32.01 - Section 906 Certifications.
- Exhibit 101 - The following materials from the Company's Quarterly Report on Form 10-Q for the quarter ended September 30, 2013, formatted in Extensible Business Reporting Language (XBRL): (i) the Condensed Consolidated Balance Sheets, (ii) the Condensed Consolidated Statements of Income, (iii) the Condensed Consolidated Statements of Comprehensive Income, (iv) the Condensed Consolidated Statements of Cash Flows, and (v) the Notes to the Condensed Consolidated Financial Statements.
