#### Financial performance

Adjusted profit before tax increased by 12% to £5.5bn as PCB and Barclaycard continued to grow profits. This was partly offset by reduced income in the Investment Bank, which made progress on its origination-led strategy whilst driving cost savings and RWA efficiencies

Adjusted income decreased 8% while impairment reduced by

29% due to a £732m reduction in Non-Core to £168m and 8% reduction in the Core business

Total adjusted operating expenses decreased 9% to £18.1bn driven by savings from Transform programmes and favourable currency movements. Operating expenses excluding CTA were £16.9bn, down from £18.7bn in 2013 and ahead of the £17bn 2014 target

Adjusted attributable profit was £2.8bn, resulting in EPS of 17.3p

Core  
RoE  
was  
9.2%  
(or  
10.9%  
excluding  
CTA)

Group RoE  
was 5.1%

Barclays Non-Core attributable loss reduced by 43% to £1.1bn, and RoE drag fell to 4.1%

Summary Group financials: Adjusted profits up 12%

1

EPS and RoE calculations are based on adjusted attributable profit, also taking into account tax credits on AT1 coupons |

Highlights  
Financial performance

PBT up 3% at £6.7bn:

PCB and Barclaycard profits up 29% and 13%  
respectively

Africa Banking profits down 6%, but up 13% on a  
constant currency basis

Investment Bank profits down 32% in a year of transition

Income fell 4% to £24.7bn

Impairment improved by 8% to £2.0bn, reflecting the improving UK economic environment benefitting PCB and reduced impairment in Africa Banking South Africa mortgages portfolio

Operating expenses down 6% to £16.1bn reflecting Transform savings across the businesses, partially offset by an increase in CTA spend, including restructuring of the branch network and technology improvements to increase automation in PCB

Core attributable profit was £3.9bn with Core EPS of 24p

Core RoE was 9.2% (10.9% excluding CTA) on average allocated equity of £42bn, up £6bn from 2013

Highlights

Loss before tax reduced by 24% to £1,180m as improvements in impairments and costs were partially offset by significant declines in income due to sales and rundown of businesses, securities and loans and the non-recurrence of favourable fair value movements on derivatives

2013 CTA spend primarily reflects restructuring in Europe, with the subsequent savings flowing through 2014 operating expenses

The income and costs relating to Spain will exit on completion, with a c.£280m reduction in annualised income, offset by c.£240m saving in gross costs

Period end equity reduced by £4.1bn to £11.0bn

Reduced loss and lower allocated equity reduced drag on Group RoE to 4.1%, well within the 6% to 3% drag guidance

Continued shrinkage and capital return in Non-Core

RWA reduction (£bn)

Good progress on CET1 ratio towards 2016 Transform target

FL CRD IV CET1 ratio up 120bps, or c.140bps if including the sale of the Spanish businesses, demonstrating good progress towards 2016 Transform target of greater than 11%

Continued capital build as FL CRDIV CET1 capital grew by £1.1bn to £41.5bn, after absorbing £3.3bn of adjusting items

Confident that our planned trajectory positions us well to meet future regulatory requirements

RWAs reduced by £41bn, or £46bn including the sale of the Spanish businesses, reflecting excellent progress on the run-down of Non-Core to £75bn

Increases due to model updates largely offset by methodology and policy driven decreases

RWAs (£bn)  
Highlights

RWAs reduced by £40.6bn, or £46bn including the sale of the Spanish businesses, reflecting excellent progress on the rundown of Non-Core, allowing for growth in Core businesses

Non-Core RWAs reduced £35bn to £75bn reflecting the disposal of businesses, rundown and exit of securities and loans, and derivative risk reductions

If excluding the impact of methodology and model changes, Investment Bank RWAs reduced by £11bn driven principally by trading book risk reductions

Increases due to model updates largely offset by methodology and policy driven decreases  
RWAs: Well managed to support business growth and returns

Continued progress on the transition towards our  
target  
end-state capital structure  
Evolution of capital structure  
Fully loaded CRD IV capital position

Fully loaded CRD IV CET1 ratio at 10.3% (10.2% on PRA transitional basis) on track to meet our target of > 11% in 2016. The ratio was well in excess of the 7% PRA regulatory target

Robust buffers to contingent capital triggers

AT1 contingent capital: c.330bps or £13.3bn

T2  
contingent  
capital:  
c.530bps  
or  
£21.5bn

As  
we  
build  
CET1  
capital  
over  
the  
transitional  
period,  
we  
expect  
to  
reach a range of 11.5-12% in end-state reflecting our intention to  
hold an internal management buffer of up to 150bps over  
future  
minimum  
requirements

Transitional total capital ratio increased to 16.5% (2013: 15.0%), and  
fully loaded total capital ratio increased to 15.4% (2013: 13.9%)

Further clarity required on Total Loss Absorbing Capacity (TLAC)  
quantum and composition. In the interim, we continue to build  
towards our target  
end-state capital structure which assumes at  
least 17% of total capital; final requirements subject to PRA  
discretion

Barclays 2015 Pillar 2A requirement as per the PRA's Individual Capital  
Guidance (ICG) is 2.8%. The ICG is subject to at least annual review

CET1 of 1.6% (assuming 56%)

AT1 of 0.5% (assuming 19%)

T2 of 0.7% (assuming 25%)

The PRA consultation on the Pillar 2 framework (CP1/15), and Basel

Committee consultations and reviews of approaches to Pillar 1 and Pillar 2 risk might further impact the Pillar 2A requirement in the future

13

We intend to manage our CET1 capital ratio to mitigate against the risk of mandatory distribution restrictions

Mandatory restrictions to discretionary distributions

2

will apply to all European banks, under CRD IV, from 1 January 2016 (Art. 162.2 of CRD)

As outlined in Art. 141 of CRD, mandatory distribution restrictions apply if an institution fails to meet the combined buffer requirement (CBR)

3

at which point a Maximum Distributable Amount (MDA) is calculated on a reducing scale

CBR is phased in from 2016. In end state, we intend to hold an internal management buffer of up to 150bps above CBR providing prudent headroom to the mandatory distribution restriction point

As at 1 January 2016, mandatory distribution restrictions on interest payment would apply at 7.2%, stepping up to 10.6% by 2019 when the CRD IV transitional rules are fully phased in

1

Barclays expects to have full discretion in the allocation of permitted distributions within the MDA

leverage  
exposure

1  
(£bn)  
Highlights

Leverage exposures during Q4 14 decreased by £91bn to £1,233bn

Loans and advances and other assets decreased by £52bn to £713bn primarily due to a seasonal reduction in settlement balances of £28bn and a £13bn reduction in cash balances

SFTs decreased £35bn to £157bn driven by a £26bn reduction in IFRS reverse repurchase agreements and £9bn in SFT adjustments, reflecting deleveraging in BNC and a seasonal reduction in trading volumes

Total derivative exposures decreased £8bn due to a £16bn reduction in the potential future exposure (PFE), partially offset by an increase in IFRS derivatives and cash collateral PFE on derivatives decreased £16bn to £179bn mainly due to reductions in business activity and optimisations, including trade compressions and tear-ups. This was partially offset by an increase relating to sold options driven by a change to the basis of calculation Other derivatives exposures (excluding PFE) increased £8bn to £92bn driven by an increase in IFRS derivatives of £57bn to £440bn and cash collateral £13bn to £73bn.

This was broadly offset by increases in allowable derivatives netting

Losses arise at OpCo, and are transmitted to HoldCo through write-down of intercompany instruments

Losses at HoldCo are limited to its investment in the OpCo

Losses should be allocated in accordance with the insolvency hierarchy, meaning *pari passu* treatment of equal-ranked internal and external claims

No creditor worse off  
than in insolvency safeguard expected to apply  
for senior unsecured debt

Expected  
creditor  
hierarchy  
during  
transition

1

Barclays position

Barclays has started to issue capital and term senior unsecured debt  
out of Barclays PLC, the Holding Company

To better align the credit proposition between investors in HoldCo and  
OpCo securities during the transition period, proceeds raised by  
Barclays PLC have been used to subscribe for capital and senior  
unsecured term debt in Barclays Bank PLC with corresponding ranking

As the HoldCo is a creditor of the OpCo alongside OpCo external  
creditors, respecting the creditor hierarchy should require *pari passu*  
treatment between internally and externally OpCo issued capital and  
debt of the same rank

1

Maturing  
capital  
and  
term  
senior  
unsecured

LEVERAGE

Barclays PLC

(HoldCo)

When required to qualify as TLAC

3

in a material subsidiary,

senior obligations with >1 year residual maturity would need

to be downstreamed in subordinated form to its excluded

liabilities

Investment at HoldCo gives exposure to diversified businesses

post ring-fencing, comparable to the position of OpCo investors

today

Evolving regulation, including the implementation of MREL beginning

1 Jan 2016 and any subsequent regulatory policy interpretations,

may require a change to the current approach. Any change would be

communicated to the market

Barclays PLC Parent Company Balance Sheet

Extract from notes to Parent Company Balance Sheet

46 Barclays PLC (the Parent Company)

Investment in subsidiary

The investment in subsidiary of £33,743m (2013: £30,059m) represents investments made into Barclays Bank PLC, including £4,326m (2013: £2,063m) of Additional Tier 1 (AT1) securities. The increase of £3,684m during the year was due to a £2,263m increased holding in Barclays Bank PLC issued securities and a further cash contribution of £1,421m.

Loans and advances to subsidiary and debt securities in issue

During the period, Barclays PLC issued £810m equivalent of Fixed Rate Subordinated Notes (Tier 2) and £2,056m equivalent of Fixed Rate Senior Notes accounted for as subordinated liabilities and debt securities in issue respectively. The proceeds raised through these transactions were used, respectively, to subscribe for £810m equivalent of Fixed Rate Subordinated Notes (Tier 2) issued by Barclays Bank PLC, and to make £2,056m equivalent of Fixed Rate Senior Loans to Barclays Bank PLC, in each case with a ranking corresponding to the notes issued by Barclays PLC.

PERFORMANCE  
OVERVIEW  
CAPITAL &  
LEVERAGE  
19

Proactive transition towards a HoldCo funding and

capital model positions us well to meet potential future TLAC requirements

While requirements remain to be set, Barclays current expectation is a multi-year conformance period

Good portion of OpCo term senior unsecured debt maturing before 2019 which can be refinanced from HoldCo

Based on Barclays current interpretation of TLAC requirements, proxy TLAC ratio at 24% 4 on the assumption that Barclays Bank PLC term non-structured senior unsecured debt is refinanced from HoldCo and subordinated to OpCo excluded liabilities

Currently do not intend to use HoldCo senior unsecured debt proceeds to subscribe for OpCo liabilities on a subordinated basis until required to do so

The future TLAC-ratio will further benefit from CET1 capital growth and AT1 issuance towards end-state expectations

As TLAC rules are finalised and as we approach implementation date, we will assess the appropriate composition and quantum of our future TLAC stack

High quality liquidity pool (£bn)  
Key messages

Further strengthened liquidity position with the Group liquidity pool up by £22bn to £149bn, building a larger surplus to the internal Liquidity Risk Appetite

Quality of the pool remains high:  
82% held in cash, deposits with central banks and high quality government bonds

Over 95% of government bonds are securities issued by UK, US, Japanese, French, German, Danish, Swiss and Dutch sovereigns

Even though not a regulatory requirement, the size of our liquidity pool is almost double that of wholesale debt maturing in less than a year

Additional significant sources of contingent funding in the form of high quality assets pre-positioned with central banks globally

Continued strengthening of estimated CRD IV/Basel 3 liquidity ratios:

Estimated LCR increased to 124%, mainly due to the increase in the size of the liquidity pool, resulting in a £30bn surplus above the future 100% requirement

Estimated NSFR strengthened to 102%, primarily driven by the progress on run-down of Non-Core

Maintaining a robust liquidity position, with pool well in excess of internal and external minimum requirements

We have £23bn of term funding maturing 2015 and £13bn maturing in 2016

We expect to issue a gross amount of £10-15bn in 2015 across public and private senior unsecured, secured and subordinated debt and to maintain a stable and diverse funding base by type, currency and distribution channel

|  
Continued strong asset quality  
|  
Africa Banking impairment was down 14% on a constant currency basis |

Credit impairment charges improved 8% to £2bn, reflecting  
lower impairments in PCB and Africa Banking

PCB benefitted from the improving economic environment in  
the UK, particularly for Corporate which benefited from one-off  
releases and lower defaults from large UK Corporate clients

Africa Banking saw improvements in the South Africa mortgages portfolio and business banking

Barclaycard increased 8% due to asset growth and enhanced coverage for forbearance. Delinquency rates remained broadly stable and the loan loss rate reduced 24bps to 308bps

Declining Loan Loss Rate (LLR) trend

across the Group reflecting Barclays  
well-managed and conservative risk  
profile

The Group LLR of 46bps remains  
significantly below the longer term  
average of 88bps

Group impairment charges improved  
29% year-on-year to £2.2bn  
(31 December 2013: £3.1bn), principally  
reflecting lower charges in Personal &  
Corporate Banking, Africa Banking and  
Non-Core

Group LLRs declining in both retail and  
wholesale in line with improving macro  
economic conditions  
Retail loan loss rate (bps)  
Group impairment improved 29%, with positive trends  
across businesses

The vast majority of the exposures to Spain have been disposed of as of 2 January 2015

Exposure to Spain, Italy, Portugal and Ireland reduced further, down 18% to £43.2bn in December 2014 in line with Non-Core strategy

£1bn of outstanding ECB LTRO as at 31 December 2014

Local net funding mismatches decreased  
Portugal: 1.9bn funding gap (2013: 3bn)  
Italy: 9.9bn funding gap (2013: 11.6bn)

We continue to explore options to exit our other European retail and corporate exposures or materially reduce the capital they consume  
Reduced exposure to Eurozone periphery

Current ratings reflect Barclays  
strong franchise ,

diverse revenue streams , good asset quality  
relative to peers , historically less volatile earnings  
than peers  
and sounds financial profile

S&P s Barclays PLC rating reflects 3 February  
2015 decision to remove sovereign support notches  
from UK and Swiss Bank Non-Operating Holding  
Company (NOHC) ratings to reflect their view that  
NOHCs in these jurisdictions are unlikely to receive  
sovereign support. Barclays PLC benefitted from 2  
notches of support previously

Negative outlook from Moody s reflect the expected  
removal of sovereign support notches

The outlooks on Barclays standalone credit profile  
remains stable by all rating agencies

LEVERAGE

Rating agencies evolving approach to bank ratings

3  
February  
2015  
announcement  
placed  
the  
OpCo  
ratings  
of  
most  
UK,  
German  
and  
Austrian  
banks  
on  
CreditWatch  
with  
Negative  
implications

to reflect their view that, with the implementation of BRRD bail-in powers in these jurisdictions as of 1 January 2015, sovereign support has become less predictable, but that they continue to see unresolved questions about how the legislation may operate.

S&P  
expect  
to  
resolve  
the  
CWN  
on  
affected  
banks  
by  
early  
May  
2015, which  
could  
see  
sovereign  
support  
notches  
removed  
for  
bank  
OpCos  
and  
their  
rated

subsidiaries  
and  
branches,  
in  
the  
same  
way  
as  
they  
have  
been  
removed  
for  
NOHCs.  
Barclays  
Bank  
PLC s  
rating  
currently benefit from two sovereign support notches

Concurrently,  
S&P  
are  
considering  
changes  
to  
their  
bank  
rating  
methodology  
to  
account  
for  
the  
impact  
that  
additional  
loss  
absorbing  
capacity (ALAC) instruments have on OpCo senior unsecured debt. This ALAC proposal has the potential to partially or completely  
mitigate  
the  
impact  
of  
sovereign  
support  
notch  
removal  
from  
some

bank  
Operating  
Companies,  
if  
implemented  
in  
the  
current  
draft  
form  
S&P

Barclays ratings currently include 3 notches of sovereign support, the negative outlook expressly references their publically stated intent to remove (in part or full) support notches from bank ratings

In parallel, Moody's is expected to implement their new proposed bank rating methodology which explicitly seeks to capture the impact of changing bank regulation and gives benefit to some asset classes from loss absorbing capacity, and a proposed methodology for rating counterparty risk

Moody's have indicated to the market that they seek to avoid rating volatility by announcing the implications of these changes in a clear manner during H1 15

While difficult to predict precisely, methodology changes could partially or fully offset any contemplated removal of sovereign support from some liabilities  
Moody's

In March 2014 Fitch revised the outlook on long term ratings to negative for banks in the US, EU and elsewhere that benefit from sovereign support floors

The agency is expected to take further action on sovereign support in H1 15, however as Barclays standalone credit rating does

benefit from sovereign support uplift at its current level, no rating implications are expected from any action as a consequence  
Fitch

CREDIT RATING

Barclays Full Year 2014 Fixed Income Investor Presentation

Potential outflows related to a multiple-notch credit downgrade are included in the liquidity risk appetite (LRA)

The table on the left hand side shows contractual collateral requirements and contingent obligations following potential future one and two notch long-term and associated short-term simultaneous downgrades across all credit rating agencies

1

During the year the Group strengthened its liquidity position, building a larger surplus to its liquidity risk appetite

This positions the Group well for any potential contractual or behavioural outflows as a consequence of the potential loss of A-1/P-1 short term ratings for Barclays Bank PLC as credit rating agencies assess sovereign support notches in their ratings

Behavioural outflows

## Summary

Diversified international bank focused on delivering improved and more sustainable returns

Concentrating on high growth opportunities where we have competitive advantage, eliminating marginal businesses and sharpening our focus on costs

Business model

Strengthened capital position with fully loaded CRD IV CET1 ratio of 10.3% as at 31 December 2014, on track to deliver a ratio of greater than 11% in 2016

Building on good track record in reducing RWAs as we run-down Barclays Non-Core and reinvest in Core businesses outside of the Investment Bank  
Capital

Diversified funding base, combining customer deposits and wholesale funding, in multiple currencies and different maturities

Robust liquidity position, well positioned to meet anticipated future regulatory requirements

Liquidity & funding

Proactive and practical approach to managing regulatory changes

Established track record of adapting to regulatory developments.  
Regulation

BCBS leverage ratio of 3.7% as at 31 December 2014, close to our target of greater than 4% in 2016

Planned reduction in leverage exposure by 2016 mainly through reduction in Barclays Non-Core and the Core Investment Bank

Leverage

Financial performance

Total income increased 1% to £8.8bn due to balance growth and improved savings margins in Personal

Net interest margin improved by 9bps to 300bps driven primarily by personal savings

Credit impairment charges improved 22% due to the improving economic environment in the UK

Corporate benefitted from one-off releases and lower defaults from large UK Corporate clients

Costs fell 7% due to savings from Transform programme, including branch optimisation (net branch closure of 72) and increased automation from technology improvements

Positive jaws contributed to an increased RoE of 11.9%, while RoTE improved to 15.8%

Continue to lead the UK banking market in technology:

3.6 million customers of mobile banking

2.2 million customers of Pingit

Payment volume through our Pingit app grew almost threefold in 2014

The number of personal unsecured loans originating through digital channels increased by over 80% year-on-year, and this now accounts for c. 35% of all personal unsecured lending

UK mortgage market stock share was 10.1%

Constant currency basis

PBT increased by 13%, driven by 7% income growth and a 14% reduction in credit impairment charges

NII benefitted from increased NIM driven by higher deposit margins in RBB South Africa in addition to strong growth in Corporate and Investment Banking loans

Impairment reduced 14% and the LLR improved by 35bps to 93bps driven by South Africa mortgages and business banking, partially offset by an increase in the card portfolio

Costs were up 8% due to inflationary increases resulting in higher staff costs. There was also increased CTA and spend on other key initiatives

RoE increased to 9.3% while RoTE was 12.9%

Operating costs (excluding CTA and bank levy) (£bn)

1

Africa Banking operating expenses were up 7% on a constant currency basis, due to local inflationary pressures and investment  
8%

Core costs (excluding CTA) decreased by 8% year-on-year  
driven by Transform saves as well as currency movements

Transform initiatives delivered significant and sustainable cost  
reductions across all businesses driven by restructuring,  
industrialisation and automation

Savings were partially offset by increased costs of litigation and  
conduct charges and associated legal fees

Net headcount reduced by 6,200 (5%) driven by voluntary  
redundancies through branch rationalisation and front office  
restructuring in the Investment Bank which was partially offset  
by in-sourcing in Barclaycard

CTA increased by £300m year-on-year primarily reflecting  
further restructuring in the Investment Bank

LEVERAGE

In line with the European Bank Recovery & Resolution  
Directive the UK Banking Act now includes a statutory

bail-in power

51

Under Depositor Preference, the BRRD introduces seniority of deposits from natural persons and SMEs over wholesale liabilities

The scope of the UK bail-in power extends to include all outstanding unsecured wholesale liabilities of original tenor greater than 7 days

Liabilities issued prior to the introduction of the statutory bail-in power, including those issued under non-EEA governing laws, may be subject to bail-in upon its introduction irrespective of issuance date, unless they are excluded liabilities

(i.e. all

outstanding unsecured liabilities with an original tenor greater than 7 days may be subject to bail-in Guiding principle is that the ordinary creditor hierarchy should be respected and that creditors holding eligible liabilities of equal rank should be treated equally

In light of Article 55 of the BRRD, and as requested by the PRA, Barclays has begun the process of including in the terms of its wholesale term debt securities, governed by non-EEA laws, a provision acknowledging the scope of the UK bail-in power

Note, the inclusion of such an acknowledgement is not intended to change the ranking or treatment of such non-EEA law governed instruments relative to EEA law governed instruments in respect of a UK bail-in, rather it clarifies that all such instruments should be treated equally in the event of a UK bail-in

Barclays Full Year 2014 Fixed Income Investor Presentation  
APPENDIX

Statutory bail-in of debt is a key part of the regulatory response to the financial crisis, aimed at avoiding the bail-out of failing financial institutions with tax-payer funds

European Bank Recovery and Resolution Directive  
( BRRD ):

a European-wide framework for the recovery and resolution of credit institutions and investment firms:

UK Banking Act:

in line with the BRRD, the UK Banking Act was amended in January 2015 to include a bail-in option

available to the UK resolution authority, enabling it recapitalise a failed institution by allocating losses to its shareholders and unsecured creditors by writing down and/or converting their claims to equity:

Certain liabilities excluded from scope, such as insured deposits, secured liabilities (Section 48B(8))

Powers to be exercised broadly in a manner that respects the hierarchy of claims in liquidation

Principle that at least senior creditors should receive no less favourable treatment than they would have received in an insolvency

Statutory bail-in power in respect of eligible liabilities, to be implemented in home state legislation by no later than 1 January 2016 (Article 130)

Requirement for eligible liabilities governed by non-EEA laws to include a contractual recognition by creditors that they are bound by any exercise of the statutory bail-in power (Article 55)

Considerations for Bondholders

Important Notice

The information, statements and opinions contained in this document do not constitute a public offer under any applicable legislation or the solicitation of any offer to buy any securities or financial instruments or any advice or recommendation with respect to such securities or financial instruments.

Forward-looking Statements

This document contains certain forward-looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934 and Section 27A of the US Securities Act of 1933, as amended, with respect to certain of the Group's plans and its current goals and objectives with respect to its future financial condition and performance. Barclays cautions readers that no forward-looking statement is a guarantee of performance and actual results could differ materially from those contained in the forward-looking statements. These forward-looking statements are based on the current expectations of management that they do not relate only to historical or current facts. Forward-looking statements sometimes use words such as "may", "will", "anticipate", "target", "projected", "expect", "estimate", "intend", "plan", "goal", "believe", "achieve" or other words and phrases. Forward-looking statements include, among others, statements regarding the Group's future financial position, income growth, assets, impairments, liabilities, business strategy, capital, leverage and other regulatory ratios, payment of dividends (including dividend pay-out ratios), projections for the banking and financial markets, projected costs or savings, original and revised commitments and targets in connection with the Group's business.

Group Strategy Update, run-down of assets and businesses within Barclays Non-Core, estimates of capital expenditures and pl operations, projected employee numbers and other statements that are not historical fact. By their nature, forward-looking state uncertainty because they relate to future events and circumstances. These may be affected by changes in legislation, the develop interpretations under International Financial Reporting Standards (IFRS), evolving practices with regard to the interpretation and regulatory standards, the outcome of current and future legal proceedings and regulatory investigations, future levels of co and actions of governmental and regulatory authorities, geopolitical risks and the impact of competition. In addition, factors in following may have an effect: capital, leverage and other regulatory rules (including with regard to the future structure of the C current and future periods; UK, US, Africa, Eurozone and global macroeconomic and business conditions; the effects of contin market related risks such as changes in interest rates and foreign exchange rates; effects of changes in valuation of credit marke valuation of issued securities; volatility in capital markets; changes in credit ratings of the Group; the potential for one or more Eurozone; the impact of EU and US sanctions on Russia; the implementation of the Transform Programme; and the success of disposals and other strategic transactions. A number of these influences and factors are beyond the Group's control. As a result results, dividend payments, and capital and leverage ratios may differ materially from the plans, goals, and expectations set for looking statements. Additional risks and factors are identified in our filings with the SEC, including our Annual Report on Form 31 December 2014 ( 2014 20-F ), which are available on the SEC's website at <http://www.sec.gov>.

Any forward-looking statements made herein speak only as of the date they are made and it should not be assumed that they ha in the light of new information or future events. #### Certain non-IFRS Measures

Barclays management believes that the non-International Financial Reporting Standards (non-IFRS) measures included in this  
information

to  
readers  
of  
its  
financial  
statements  
because  
they  
enable  
the

reader  
to  
identify  
a  
more  
consistent  
basis  
for  
comparing  
the  
business  
performance  
between  
financial  
periods,  
and  
provide  
more  
detail  
concerning  
the  
elements  
of  
performance  
which  
the  
managers  
of  
these  
businesses  
are  
most  
directly  
able  
to  
influence or are relevant for an assessment of the Group. They also reflect an important aspect of the way in which operating performance is monitored by Barclays management. However, any non-IFRS measures in this document are not a substitute for what should consider the IFRS measures as well. As management reviews the adjusting items

described  
below  
at  
a  
Group  
level,  
segmental  
results  
are  
presented

excluding these items in accordance with IFRS 8; "Operating Segments".

Statutory and adjusted performance is reconciled at a Group level only. Key non-

IFRS measures included in this document and the most directly comparable IFRS measures are described below. Quantitative  
measures to the relevant IFRS measures are included in Barclays

2014 20-F filed with the SEC on March 3, 2015 (available at

<http://www.sec.gov/Archives/edgar/data/312069/000119312515075307/d793693d20f.htm> ),

and  
such  
quantitative  
reconciliations  
are  
incorporated  
by  
reference  
into  
this  
document.

Adjusted profit before tax is the non-IFRS equivalent of profit before tax as it excludes the impact of own credit; provisions for

Adjusted total operating expenses represents operating expenses excluding the provisions for PPI and interest rate hedging redress for ongoing investigations and litigation relating to Foreign Exchange; and goodwill impairment. A reconciliation to IFRS is presented on page 198 of the 2014 20-F;

Adjusted cost: income ratio represents cost: income ratio excluding the impact of own credit; the provisions for PPI and interest rate hedging redress; gain on US Lehman acquisition assets; and provision for ongoing investigations and litigation relating to Foreign Exchange; ESHLA valuation revision. The comparable IFRS measure is cost: income ratio, which represents operating expenses to income ratio excluding insurance claims. A reconciliation to IFRS is presented on page 198 of the 2014 20-F;

Adjusted basic earnings per share represents adjusted attributable profit (page 212 of the 2014 20-F) divided by the basic weighted average number of shares in issue. The comparable IFRS measure is basic earnings per share, which represents profit after tax and non-controlling interests, divided by the basic weighted average number of shares in issue;

Adjusted return on average shareholders' equity represents adjusted attributable profit (page 212 of the 2014 20-F) divided by average equity, excluding non-controlling interests. The comparable IFRS measure is return on average shareholders' equity, which represents profit attributable to equity holders of the parent divided by average equity, excluding non-controlling interests;

Adjusted return on average tangible shareholders' equity represents adjusted attributable profit (page 212 of the 2014 20-F) divided by average adjusted tangible equity, excluding non-controlling interests. The comparable IFRS measure is return on average tangible shareholders' equity, which represents profit after tax and non-controlling interests, divided by average tangible equity (page 212 of the 2014 20-F);

Barclays Core results are non-IFRS measures because they represent the sum of five Operating Segments, each of which is prepared in accordance with IFRS 8; Operating Segments : Personal and Corporate Banking, Barclaycard, Africa Banking, Investment Bank and Global Office. A reconciliation to the corresponding statutory Group measures are provided on pages 197 and 198 of the 2014 20-F;

Constant currency results in Africa Banking are calculated by converting ZAR results into GBP using the average exchange rate for the year ended 31 December 2014 for the income statement and the 31 December 2014 closing exchange rate for the balance sheet and those rates to the results as of and for the year ended 31 December 2013, in order to eliminate the impact of movement in exchange rates between the two periods. See page 205 of the 2014 20-F for the corresponding statutory Group measures;

Liquidity Coverage Ratio (LCR) is calculated according to the Commission Delegated Regulation of October 2014 that supplements Directive 2009/138/EC (CRDIV) published by the European Commission in June 2013. The metric is a ratio that is not yet fully implemented in local regulations and, as such, represents a non-IFRS measure

Net Stable Funding Ratio (NSFR) is calculated according to the definition and methodology detailed in the standard provided by the European Central Bank on Banking Supervision. The original guidelines released in December 2010 (Basel III: International Framework for Liquidity Standards and Monitoring, December 2010) were revised for in January 2014 (Basel III: The Net Stable Funding Ratio, January 2014). This is a regulatory ratio that is not yet finalised in local regulations and, as such, represent a non-IFRS measure. This definition and the methodology used to calculate this metric is subject to further revisions ahead of the implementation date and Barclays' interpretation of this calculation.

consistent with that of other financial institutions;

Transitional CET1 ratio according to FSA October 2012. This measure is calculated by taking into account the statement of the Prudential Regulation Authority, the predecessor of the Prudential Regulation Authority, on CRD IV transitional provisions in October 2012, assuming applied as at 1 January 2014. This ratio is used as the relevant measure starting 1 January 2014 for purposes of determining whether a write-down trigger (specified as a Transitional CET1 ratio according to FSA October 2012 of less than 7.00%) has occurred under the terms of the Contingent Capital Notes issued by Barclays Bank PLC on November 21, 2012 (CUSIP: 06740L8C2) and April 10, 2013 (CUSIP: 06740L8C3). Please refer to page 155 of the 2014 20-F for a reconciliation of this measure to CRD IV CET1 ratio;

BCBS 270 leverage exposure makes certain adjustments to Total assets under IFRS in accordance with Barclays' understanding of the requirements that are expected to be included in the revised CRD IV text and guidance from regulators. The Leverage table in the 2014 20-F shows a reconciliation of BCBS 270 leverage exposure to total assets under IFRS;

BCBS 270 leverage ratio represents CRD IV Tier 1 capital divided by BCBS 270 leverage exposure. See the Leverage table in the 2014 20-F for a reconciliation of BCBS 270 leverage exposure to Total assets under IFRS; and

The estimate of Proxy Total Loss Absorbing Capacity (TLAC) ratio reflects Barclays' current understanding of how the Financial Stability Board's Consultative Document on Adequacy of loss-absorbing capacity of global systemically important banks in resolution may be applied in the United Kingdom. The estimate reflects certain assumptions on the inclusion or exclusion of certain liabilities where further regulatory guidance is necessary. Evolving regulation, including the implementation of MREL beginning 1 Jan 2016 and any subsequent regulatory guidance, may require a change to the current approach. As such metric is subject to further regulatory guidance and it is not yet implemented, the estimate of this metric represents a non-IFRS measure and is presented in this document for illustrative purposes.
