The following table sets forth the ratio of earnings to fixed charges for the year ended December 31, 2014.

	2014 Pro Forma(a)	2014 Actual
Ratio of Earnings to Fixed Charges	13.00x	16.95x

(a) The ratio of earnings to fixed charges for the year ended December 31, 2014 has been adjusted on a pro forma basis to give effect to the offer and sale of the Notes offered hereby and the intended application of the net proceeds from the sale of the Notes as contemplated under Use of Proceeds in the preliminary prospectus supplement. The pro forma interest rate was calculated based on a weighted-average interest rate of the Notes. For the purposes of computing this ratio, earnings consist of income from continuing operations before income taxes, non-controlling interest in earnings or losses of consolidated subsidiaries and income from equity affiliates plus (i) amortization of previously capitalized interest, (ii) distributed income from equity affiliates and (iii) fixed charges, minus interest capitalized during the period. Fixed charges consist of (i) interest incurred and amortization of debt expense plus (ii) the portion of rent expense representative of the interest factor.
