Table of Contents**Management's Discussion of Funds Performance** (audited)**Market Environment Overview**

The international equity markets, measured by the MSCI EAFE Index, a broad measure of equity performance for the developed world outside the U.S. and Canada, returned -0.92% in the 12-month period that ended March 31, 2015 (the period), which lagged the S&P 500 Index by 13.65%. Measured in local currency, the MSCI EAFE Index returned 17.74% over the period, outperforming the return of the S&P 500 Index by 5.01%. It is important to note that the foreign currency component of the developed world returns subtracted approximately 18.7 percentage points from the returns of the MSCI EAFE Index. During the period, the British pound, Japanese yen and euro (which account for about 75% of the MSCI EAFE Index currency exposure) all weakened against the U.S. dollar by approximately 11%, 14% and 22%, respectively. Weakening currencies relative to the U.S. dollar decreases the value of foreign investments measured in U.S. dollars and tend to decrease returns experienced by U.S. investors who invest overseas, while strengthening currencies relative to the U.S. dollar have the opposite effect.

Although the MSCI EAFE Index lagged the broad U.S. domestic markets in U.S. dollar terms, in local currency terms it was a pretty strong performance year for international equity markets. The Eurozone region reacted positively to expectations and the monetary easing actions from the European Central Bank (ECB). Over the period, the euro weakened substantially as a result of the ECB's expansionary policies, which helped contribute to positive performance of the equity market, particularly the export focused firms. Japan, one of the best performing countries in local currency terms, also helped contribute with strong positive performance as a result of continued monetary and fiscal stimulus. Broad emerging market equities, in local currency terms, lagged both the U.S. and international developed markets. It seems investors were cautious about the potential ramifications from the U.S. Federal Reserve ending its quantitative easing program even though the ECB and the Bank of Japan have increased liquidity.

In local currency terms, nine out of ten sectors within the MSCI EAFE Index were positive, with Information Technology, Healthcare and Consumer Discretionary sectors leading and Materials and Energy sectors lagging. The only sector that recorded negative performance over the period was the Energy sector, which was negatively impacted by the decline in oil prices. The Information Technology and Consumer Discretionary sectors tend to be cyclically focused and were able to benefit from positive central bank actions and from consumers with greater disposable income due to the decline in gas prices.

WisdomTree's international dividend-weighted Funds are designed to track Indexes based on the dividend stream generated by the companies included in the Index. The dividend stream is defined as the sum of all dividends paid over the prior 12 months for each company. There are two primary factors that drive performance differentials versus market cap-weighted benchmarks. The first is aggregate exposure to one or more sectors or countries. The second is stock selection within each sector or country. Both of these are determined as part of WisdomTree's rules-based index methodology. These exposures are not subjectively determined. Rather, they are objectively determined at the Index rebalancing dates based on the dividend stream.

WisdomTree's best performing Fund for the full period was the WisdomTree Japan Hedged Equity Fund (DXJ), returning 29.30% over the period. Japan's economic policy, aggressive inflation target and accommodative central bank helped equities climb higher. The Japanese yen weakened about 14 percent over the time period, and because DXJ neutralizes the currency exposure, the performance was not hurt from this depreciation. The WisdomTree Japan Hedged SmallCap Equity Fund (DXJS) was also able to deliver strong performance over the period, up 25.86%, but the WisdomTree Japan SmallCap Dividend Fund (DFJ) was only able to return 9.26% since it does not hedge the currency exposure.

The WisdomTree Europe Hedged Equity Fund (HEDJ) delivered a 24.02% return over the period, outperforming its performance benchmark by 3.56%. The monetary easing actions by the ECB over the period were successful at weakening the euro, suppressing bond yields and driving equity prices higher. The WisdomTree Germany Hedged Equity Fund (DXGE) also benefited from these actions over the period by returning 23.70%. The euro weakened about 22 percent over the time period, and because HEDJ and DXGE neutralize the currency exposure, their performance was not hurt from this depreciation.

Fund returns are shown at NAV. Please see Performance Summaries on the subsequent pages for more complete performance information. Please see page 26 for the list of index descriptions.

Fund performance assumes reinvestment of dividends and capital gain distributions. An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Funds' performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. Past performance is no guarantee of future results. The WisdomTree Australia Dividend Fund (the "Fund") seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Australia Dividend Index.

The Fund returned -8.30% at net asset value (NAV) for the fiscal year ending March 31, 2015 (for more complete performance information please see the chart below). The Fund benefited most from its position in the Healthcare sector. The Fund's position in the Consumer Staples sector created the greatest drag on performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to

The WisdomTree Europe Dividend Growth Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Europe Dividend Growth Index.

The Fund returned -6.35% at net asset value (NAV) from Fund inception on May 7, 2014 to March 31, 2015 (for more complete performance information please see the chart below). The Fund benefited most from its position in the Healthcare sector. The Fund's position in the Energy sector created the greatest drag on performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to

Edgar Filing: WisdomTree Trust - Form N-CSR

calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of the Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **As of the Fund's current prospectus dated August 1, 2014, as supplemented January 1, 2015, the Fund's annual expense ratio was 0.58%.**

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Edgar Filing: WisdomTree Trust - Form N-CSR

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of the Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **As of the Fund's current prospectus dated August 1, 2014, as supplemented January 1, 2015, the Fund's annual expense ratio was 0.58%.**

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **As of the Fund's current prospectus dated August 1, 2014, as supplemented January 1, 2015, the Fund's net and gross annual expense ratios were 0.43% and 0.48%, respectively. WisdomTree Asset Management, Inc. has contractually agreed to limit the management fee to 0.43% through July 31, 2015, unless earlier terminated by the Board of Trustees of the Trust for any reason at any time.**

¹ Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on April 8, 2014.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

The WisdomTree United Kingdom Hedged Equity Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree United Kingdom Hedged Equity Index.

The Fund returned 4.71% at net asset value (NAV) for the fiscal year ending March 31, 2015 (for more complete performance information please see the chart below). The Fund benefited most from its position in the Consumer Discretionary sector. The Fund's position in the Energy sector created the greatest drag on performance.

Edgar Filing: WisdomTree Trust - Form N-CSR

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of the Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **As of the Fund's current prospectus dated August 1, 2014, as supplemented January 1, 2015, the Fund's annual expense ratio was 0.48%.**

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of cost: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2014 to March 31, 2015.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled **Expenses Paid During the Period 10/1/14 to 3/31/15** to estimate the expenses you paid on your account during the period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

- ³ Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. For the periods in which the investment adviser waived advisory fees, the total return would have been lower if certain expenses had not been waived (Notes 2 and 3).
- ⁴ The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.
- ⁵ Included in the expense ratio are proxy expenses. Without these proxy expenses, the expense ratio would have been 0.58%.
- ⁶ Annualized.
- ⁷ The expense ratio includes investment advisory fee waivers. Without these investment advisory fee waivers, the expense ratio would have been unchanged.
- ⁸ Portfolio turnover rate is not annualized and excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation, as well.

- ² Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. For the periods in which the investment adviser waived advisory fees for the WisdomTree Japan SmallCap Dividend Fund, the total return would have been lower if certain expenses had not been waived (Notes 2 and 3).
- ³ The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.
- ⁴ The expense ratio includes investment advisory fee waivers. Without these investment advisory fee waivers, the expense ratio would have been unchanged.
- ⁵ Included in the expense ratio are proxy expenses. Without these proxy expenses, the expense ratio would have been 0.58%.
- ⁶ Annualized.
- ⁷ Portfolio turnover rate is not annualized and excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation, as well.

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (Index) developed by WisdomTree Investments, Inc. (WisdomTree Investments). WisdomTree Investments is the parent company of WisdomTree Asset Management, Inc. (WTAM), the investment adviser to each Fund and the Trust. WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified.

In the normal course of business, the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (the Codification) is the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds:

Investment Valuation The net asset value (NAV) of each Fund 's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund 's net assets by the number of Fund shares outstanding. Each Fund issues and redeems shares at NAV only in large blocks of shares known as creation units, which only certain institutions or large investors may purchase or redeem. Shares of each Fund are listed on a national securities exchange and trade at market prices. Most investors will buy and sell shares through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV or less than NAV. In calculating each Fund 's NAV, investments are valued under policies approved by the Board of Trustees. Equity securities (including preferred stock) traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Unlisted equity securities (including preferred stock) are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price. Short-term debt securities with remaining maturities of 60 days or less generally are valued at current market quotations or mean prices obtained from broker-dealers or independent pricing service providers. Each Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded. Forward foreign currency contracts are valued daily using WM/Reuters closing spot and forward rates as of 4:00 p.m. London time, except for the Korea Hedged Equity Fund, which values forward foreign currency contracts daily using Tullet Prebon closing spot and forward rates as of 2:00 p.m. Singapore time.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund 's investments will be fair valued in accordance with the Fund 's pricing policy. The Board of Trustees of the Trust has established a pricing committee (the Pricing Committee) which is comprised of senior representatives of WTAM and which reports to the Board of Trustees on a quarterly basis. In the event that a financial instrument cannot be valued based upon a price from a national securities exchange, independent pricing service provider or broker-dealer quotation, or such prices are deemed to not reflect current market value, the Pricing Committee may value the financial instrument in good faith under the policies and procedures approved by the Board of Trustees based on current facts and circumstances. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations, securities whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events . An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund 's next NAV calculation time that may materially affect the value of a Fund 's investment (e.g., government action, natural disaster, or significant market fluctuation). When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy of inputs to be used when determining fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity 's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including each Fund 's assumptions in determining the fair value of investments)

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

Edgar Filing: WisdomTree Trust - Form N-CSR

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation or market activity; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund's NAV is computed and that may materially affect the value of the Fund's investments).

The valuation techniques and significant inputs used in determining the fair market value measurements for Level 2 and Level 3 positions are as follows:

Financial instruments are generally valued by independent pricing service providers that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. Depending on the type of financial instrument, the independent pricing service providers internal pricing models may use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Financial instruments that use similar valuation techniques and observable inputs as described above and have an appropriate level of market activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate. Over-the-counter financial derivative instruments derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These instruments are normally valued on the basis of broker-dealer quotations or independent pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative instruments can be estimated by an independent pricing service provider using a series of techniques including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, credit risks/spreads, interest rates, yield curves, default and exchange rates. Derivative contracts that use valuation techniques and observable inputs as described above and have an appropriate level of market activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate.

Determination of a fair value by the Pricing Committee may include significant unobservable inputs and therefore would be reflected as a Level 3 of the fair value hierarchy. The Pricing Committee may employ a market-based valuation approach which may use, among other potential considerations, related or comparable securities, recent transactions, market multiples, book values, and other relevant information to determine fair value. The Pricing Committee may also use an income-based valuation approach in which anticipated future cash flows of the financial instrument are discounted to calculate fair value. The Pricing Committee meets at least on a monthly basis to review and discuss the appropriateness of such fair values using more current information such as, recent security news, recent market transactions, updated corporate action information and/or other macro or security specific events. Also, when observable inputs become available, the Pricing Committee conducts back testing of the methodologies used to value Level 3 financial instruments to substantiate the unobservable inputs used to value those investments. Such back testing includes comparing Level 3 investment values to observable inputs such as exchange-traded prices, transaction prices, and/or vendor prices.

The following is a summary of the fair valuations according to the inputs used as of March 31, 2015 in valuing each Fund's assets:

Derivatives and Hedging Disclosure Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Funds have invested in derivatives, specifically forward foreign currency contracts during the fiscal year or period ended March 31, 2015 which are detailed in the tables herein. The Funds derivative agreements contain credit-risk related contingent features which include, but are not limited to, a percentage decline in the Funds NAV over a specified time period. If an event occurred at March 31, 2015 that triggered a contingent feature, the counterparty to the agreement may require the Funds to post additional collateral or terminate the derivative positions and demand payment. Any collateral posted with respect to the derivative positions would be used to offset or reduce the payment. The maximum exposure to derivatives agreements with credit-risk related contingent features would be the total value of derivatives in net liability positions for each Fund, as disclosed on pages 179 and 180. At March 31, 2015, the Funds did not receive or post collateral with any counterparty for derivatives and no event occurred that triggered a credit-risk-related contingent feature.

The Funds listed below have invested in derivatives, specifically forward foreign currency contracts for the fiscal year or period ended March 31, 2015, which are detailed in the tables herein. All of the derivative instruments disclosed and described herein are subject to risk. Risks may arise upon entering into forward foreign currency contracts from the potential inability of a counterparty to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

As of March 31, 2015, the effects of such derivative instruments on each Fund's financial position as reflected in the Statements of Assets and Liabilities are presented in the summary below:

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Dividend income is recognized on the ex-dividend date, net of any foreign taxes withheld. Interest income including amortization of premiums and discounts, is accrued daily. The value of additional securities received as dividend payments is recorded as income and as an increase to the cost basis of such securities.

Foreign Currency Translation The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies, are translated into U.S. dollars using exchange rates prevailing on the respective dates of such transactions that are deemed appropriate by WTAM. Realized and unrealized foreign exchange gains and losses on investments are included as a component of net realized gain (loss) from investment transactions and net change in unrealized appreciation (depreciation) from investment transactions, respectively, on the Statement of Operations. Net realized and unrealized foreign exchange gains or losses arising from sales of foreign currencies, including gains and losses of forward foreign currency contracts, currency gains or losses recognized between the trade and settlement dates on investment transactions, and the difference between the amounts of dividends and foreign withholding taxes recorded on the Funds' books and the U.S. dollar equivalent of the amounts actually received or paid are included in net realized gain (loss) from forward foreign currency contracts and foreign currency related transactions and/or net change in unrealized appreciation (depreciation) from forward foreign currency contracts and translation of assets and liabilities denominated in foreign currencies in the Statement of Operations. Certain foreign exchange gains and losses included in realized and unrealized gains or losses are included in, or are a reduction of, ordinary income in accordance with U.S. Federal income tax regulations.

Expenses/Reimbursements Under the investment advisory agreement for each Fund, except Europe Dividend Growth Fund, Europe Hedged SmallCap Equity Fund, Germany Hedged Equity Fund, International Hedged Dividend Growth Fund, Japan Hedged Capital Goods Fund, Japan Hedged Financials Fund, Japan Hedged Health Care Fund, Japan Hedged Real Estate Fund, Japan Hedged SmallCap Equity Fund, Japan Hedged Tech, Media and Telecom Fund, Korea Hedged Equity Fund and United Kingdom Hedged Equity Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of trustees who are not interested persons of the Trust (Independent Trustees); (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's Chief Compliance Officer (CCO); (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM.

Under the investment advisory agreement for Europe Dividend Growth Fund, Europe Hedged SmallCap Equity Fund, Germany Hedged Equity Fund, International Hedged Dividend Growth Fund, Japan Hedged Capital Goods Fund, Japan Hedged Financials Fund, Japan Hedged Health Care Fund, Japan Hedged Real Estate Fund, Japan Hedged SmallCap Equity Fund, Japan Hedged Tech, Media and Telecom Fund, Korea Hedged Equity Fund and United Kingdom Hedged Equity Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other fees, charges, taxes, levies or expenses (such as stamp taxes) incurred in connection with the execution of portfolio transactions or in connection with creation and redemption transactions (including without limitation any fees, charges, taxes, levies or expenses related to the purchase or sale of an amount of any currency, or the partition or repatriation of any security or other asset, related to the execution

The internal expenses of pooled investment vehicles in which the Funds may invest (acquired fund fees and expenses) are not expenses of the Funds and are not paid by WTAM.

During the fiscal year ended March 31, 2015, the Trust incurred expenses pertaining to proxy printing, mailing and solicitation. These proxy expenses are not paid by WTAM. During the period, each Fund in the Trust borne its pro rata allocation of these proxy expenses.

Pursuant to a separate contractual arrangement, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WTAM receives a fee, as shown on the Statements of Operations under Service fees, of up to 0.0044% of each Fund's average daily net assets for providing such services and paying such expenses. WTAM provides CCO services to the Trust.

Currency Transactions The Funds may enter into foreign currency forward and foreign currency futures contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. The Funds, other than Europe Hedged Equity Fund, Europe Hedged SmallCap Equity Fund, Germany Hedged Equity Fund, International Hedged Dividend Growth Fund, Japan Hedged Capital Goods Fund, Japan Hedged Equity Fund, Japan Hedged Financials Fund, Japan Hedged Health Care Fund, Japan Hedged Real Estate Fund, Japan Hedged SmallCap Equity Fund, Japan Hedged Tech, Media and Telecom Fund, Korea Hedged Equity Fund and the United Kingdom Hedged Equity Fund, do not expect to engage in currency transactions for the purpose of hedging against declines in the value of a Fund's assets that are denominated in one or more foreign currencies. The Funds may not enter into such contracts for speculative purposes.

Forward Foreign Currency Contracts A forward foreign currency contract (Forward Contract) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large, commercial banks) and their customers. A Forward Contract generally does not require an initial margin deposit and no commissions are charged at any stage for trades. However, if a Fund is in an unrealized loss position on a Forward Contract, it may be required to pledge collateral (or additional collateral) to the counterparty. If a Fund is in an unrealized gain position on a Forward Contract, it may receive collateral from the counterparty.

Risks may arise upon entering into Forward Contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

Fluctuations in the value of open Forward Contracts are recorded for book purposes as unrealized gains or losses on Forward Contracts by the Funds. Realized gains and losses on Forward Contracts include net gains or losses recognized by the Funds on contracts which have matured or were sold.

The following Forward Contracts were open at March 31, 2015:

Securities Lending Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. It is the Funds' policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high-grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The cash collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. The value of the investment of cash collateral for securities on loan along with the obligation to return such collateral are included on the Statements of Assets and Liabilities. The value of securities received as collateral for securities on loan are not included on the Statements of Assets and Liabilities because the receiving Fund does not have the right to sell or repledge the securities received as collateral. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees, all of which are included in the securities lending income earned by the Funds and disclosed on the Statement of Operations. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. Dividends received while a security is out on loan are not considered Qualified Dividend Income (QDI) under the specific criteria issued by the Internal Revenue Service and are subject to taxation at the shareholder's ordinary income tax rate instead of the lower long-term capital gains tax rate. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

Master Netting Arrangements Accounting Standards Update No. 2011-11 Disclosures about Offsetting Assets and Liabilities (ASU 2011-11) is generally intended to (i) help investors and other financial statement users to better assess the effect or potential effect of offsetting arrangements on a company's financial position, (ii) improve transparency in the reporting of how companies mitigate credit risk, and (iii) facilitate comparisons between those entities that prepare their financial statements on the basis of GAAP and those entities that prepare their financial statements on the basis of international financial reporting standards. ASU 2011-11 requires entities to disclose (i) gross and net information about both instruments and transactions eligible for offset in the financial statements, and (ii) instruments and transactions subject to an agreement similar to a master netting agreement. ASU 2011-11 is limited in scope to the following financial instruments, to the extent they are offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement: (i) recognized derivative instruments accounted for under ASC 815 (Derivatives and Hedging); (ii) repurchase agreements and reverse repurchase agreements; and (iii) securities borrowing and securities lending transactions.

In order to better define its contractual rights and to secure rights that will help a Fund mitigate its counterparty risk, a Fund may enter into an International Swaps and Derivatives Association, Inc. Master Agreement (ISDA Master Agreement) or similar agreement with its counterparties. An ISDA Master Agreement is a bilateral agreement between a Fund and a counterparty that governs over-the-counter derivatives (OTC), including Forward Contracts, and typically contains, among other things, collateral posting terms, netting and rights of set-off provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, a Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and receivables to create a single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

Collateral requirements generally differ by type of derivative. Collateral terms are contract-specific for OTC derivatives (e.g. foreign exchange contracts, options and certain swaps). Generally, for transactions traded under an ISDA Master Agreement, the collateral requirements are calculated by netting the marked to market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by a Fund and the counterparty. Generally, the amount of collateral due from or to a counterparty must exceed a minimum transfer amount threshold before a transfer is required to be made. To the extent amounts due to a Fund from its derivatives counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance.

A Fund's security lending activities are governed by a Securities Lending Authorization Agreement (Lending Agreement) between the Fund and the lending agent. The Lending Agreement authorizes the lending agent to lend qualifying U.S. and foreign securities held by a Fund to approved borrowers (each a Borrower). To mitigate borrower risk, a Fund typically receives from a Borrower, collateral in the form of U.S. dollar cash and/or securities issued or guaranteed by the U.S. government or its agencies in excess of the market value of the securities loaned. Under the provisions of the Lending Agreement, a Fund shall have, as to the collateral, all of the rights and remedies of a secured party under applicable law. A Fund is exposed to risk of loss if a Borrower defaults on its obligation to return borrowed securities and the value of the collateral a Fund received is insufficient to cover the market value of the securities loaned. Also, the lending agent is permitted to invest the cash collateral it receives from a Borrower into a money market fund which is subject to market fluctuation. Therefore, a Fund is exposed to risk of loss if the value of invested cash collateral is insufficient to satisfy the Fund's obligation to return the full amount owed to such Borrower.

For financial reporting purposes, the Funds elect to not offset assets and liabilities subject to an ISDA Master Agreement or Lending Agreement, if any, in the Statements of Assets and Liabilities. Therefore, all qualifying transactions are presented on a gross basis in the Statements of Assets and Liabilities. As of March 31, 2015, the impact of netting of assets and liabilities and the offsetting of collateral pledged or received based on contractual netting/set-off provisions in the ISDA Master Agreement and the Lending Agreement are detailed in the following table:

¹ The amount of collateral presented has been limited such that the net amount by counterparty cannot be less than zero. A breakout of the total amount of cash and non-cash securities lending collateral received is located in the Schedule of Investments.

Short-Term Investments Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments include short-term obligations issued by the U.S. government, its agencies, non-U.S. government agencies, negotiable certificates of deposit (CDs), fixed time deposits and bankers' acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Tax Information and Dividends and Distributions to Shareholders It is each Fund's policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (the "Code"). Each Fund intends to qualify for and to elect treatment as a separate Regulated Investment Company ("RIC") under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. There can be no guarantee that a Fund will pay dividends. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with the requirements of the Code and the U.S. Treasury regulations. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions that exceed earnings and profit for tax purposes are reported for tax purposes as a return of capital.

3. ADVISORY FEES AND TRANSACTIONS

WTAM has overall responsibility for the general management and administration of the Trust. WTAM provides an investment program for each Fund. WTAM has arranged for Mellon Capital Management Corporation ("MCM") to provide sub-advisory services to the Funds. MCM is compensated by WTAM at no additional cost to the Funds. WTAM also arranges for transfer agency, custody, fund accounting, fund administration, securities lending and all other non-distribution related services necessary for the Funds to operate, which are generally under separate agreements entered into between the Trust on behalf of the Funds and the applicable service provider. Under the investment advisory agreement for each Fund, WTAM agrees to pay all expenses of the Funds except for certain expenses described in Note 2.

Pursuant to a separate contractual arrangement, as also described in Note 2, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees in exchange for a fee of up to 0.0044% of each Fund's average daily net assets. WTAM expects to receive advisory fees from each Fund, based on a percentage of the Fund's average daily net assets, as shown in the following table:

Each Fund may purchase shares of affiliated exchanged-traded funds (ETF) in secondary market transactions. For the fiscal year or period ended March 31, 2015, WTAM waived its advisory fees for each Fund's investment, associated with daily uninvested cash, in correlated affiliated ETFs net of any incremental costs as a result of these transactions (fund accounting, safekeeping, transaction fees, etc.) that are paid by WTAM out of the advisory fee received from the affiliated ETFs. Please see Note 7 for additional information on Other Affiliated Parties and Transactions. WTAM has also contractually agreed to limit the advisory fee to 0.43% through July 31, 2015, unless earlier terminated by the Board of Trustees of the Trust, for the Japan Hedged Capital Goods Fund, Japan Hedged Financials Fund, Japan Hedged Health Care Fund, Japan Hedged Real Estate Fund, and the Japan Hedged Tech, Media and Telecom Fund.

4. CAPITAL SHARE TRANSACTIONS

As of March 31, 2015, there were an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in creation units or multiples thereof. Except when aggregated in creation units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. The consideration for the purchase of creation units of a Fund generally consists of the in-kind contribution of a designated portfolio of equity securities constituting a portfolio sampling representation of the securities included in the relevant Fund's underlying Index and an amount of cash. Investors purchasing and redeeming creation units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of creation units.

* Under the Regulated Investment Company Modernization Act of 2010, a Fund is permitted to carry forward any new capital losses for an unlimited period. Additionally, such capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law. The character of these losses is noted above.

Capital losses incurred after October 31 (post-October capital losses) and late year ordinary losses incurred after December 31 within the taxable year are deemed to arise on the first business day of each Fund s next taxable year.

During the fiscal year or period ended March 31, 2015, the following Funds incurred and will elect to defer post-October capital losses and late year ordinary losses as follows:

These differences are primarily due to redemptions-in-kind, foreign currency transactions, investments in passive foreign investments companies, investments in partnerships, and utilization of earnings and profits distributed to the shareholders on redemption of shares.

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the fiscal year or period ended March 31, 2015, the Funds did not have any liabilities for unrecognized tax benefits relating to uncertain income tax positions they have taken or expect to take in the future. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in Other expenses on the Statements of Operations. The Funds file tax returns with the Internal Revenue Service, the State of New York, and various other states. Generally, each of the tax years in the four-year period ended March 31, 2015, remains subject to examination by taxing authorities.

8. RECENT ACCOUNTING PRONOUNCEMENT

In June 2014, The FASB issued *ASU 2014-11 Transfers & Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures* to improve the financial reporting of repurchase agreements and other similar transactions. The guidance includes expanded disclosure requirements for entities that enter into repurchase agreements or securities lending transactions. The guidance is effective for financial statements with fiscal years beginning on or after January 1, 2015, and interim periods within those fiscal years. Management is evaluating the impact, if any, of this guidance on the Trust's financial statement disclosures.

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of WisdomTree Australia Dividend Fund, WisdomTree DEFA Equity Income Fund, WisdomTree DEFA Fund, WisdomTree Europe Dividend Growth Fund, WisdomTree Europe Hedged Equity Fund, WisdomTree Europe Hedged SmallCap Equity Fund, WisdomTree Europe SmallCap Dividend Fund, WisdomTree Germany Hedged Equity Fund, WisdomTree International Dividend Ex-Financials Fund, WisdomTree International Hedged Dividend Growth Fund, WisdomTree International LargeCap Dividend Fund, WisdomTree International MidCap Dividend Fund, WisdomTree International SmallCap Dividend Fund, WisdomTree Japan Hedged Capital Goods Fund, WisdomTree Japan Hedged Equity Fund, WisdomTree Japan Hedged Financials Fund, WisdomTree Japan Hedged Health Care Fund, WisdomTree Japan Hedged Real Estate Fund, WisdomTree Japan Hedged SmallCap Equity Fund, WisdomTree Japan Hedged Tech, Media and Telecom Fund, WisdomTree Japan SmallCap Dividend Fund, WisdomTree Korea Hedged Equity Fund, and WisdomTree United Kingdom Hedged Equity Fund (twenty-three of the investment funds constituting WisdomTree Trust (the "Trust")) as of March 31, 2015, and the related statements of operations, the statements of changes in net assets and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2015, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of WisdomTree Australia Dividend Fund, WisdomTree DEFA Equity Income Fund, WisdomTree DEFA Fund, WisdomTree Europe Dividend Growth Fund, WisdomTree Europe Hedged Equity Fund, WisdomTree Europe Hedged SmallCap Equity Fund, WisdomTree Europe SmallCap Dividend Fund, WisdomTree Germany Hedged Equity Fund, WisdomTree International Dividend Ex-Financials Fund, WisdomTree International Hedged Dividend Growth Fund, WisdomTree International LargeCap Dividend Fund, WisdomTree International MidCap Dividend Fund, WisdomTree International SmallCap Dividend Fund, WisdomTree Japan Hedged Capital Goods Fund, WisdomTree Japan Hedged Equity Fund, WisdomTree Japan Hedged Financials Fund, WisdomTree Japan Hedged Health Care Fund, WisdomTree Japan Hedged Real Estate Fund, WisdomTree Japan Hedged SmallCap Equity Fund, WisdomTree Japan Hedged Tech, Media and Telecom Fund, WisdomTree Japan SmallCap Dividend Fund, WisdomTree Korea Hedged Equity Fund and WisdomTree United Kingdom Hedged Equity Fund of WisdomTree Trust at March 31, 2015, the results of their operations, the changes in their net assets and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

Approval of Investment Advisory and Sub-Advisory Agreements (unaudited)

Approval of Investment Sub-Advisory Agreement with respect to the WisdomTree Europe Hedged SmallCap Equity Fund (the Fund)

At a meeting of the Board of Trustees (the Board) of the WisdomTree Trust (the Trust) held on December 11-12, 2014, the Trustees (the Trustees), including those Trustees who are not interested persons (as defined in the Investment Company Act of 1940, as amended) of the Trust (the Independent Trustees), considered the approval of the Investment Advisory Agreement (the Advisory Agreement), pursuant to which WisdomTree Asset Management, Inc. (WTAM) will provide the Fund with investment advisory services, and the Sub-Investment Advisory Agreement (together with the Advisory Agreement, the Agreements), pursuant to which Mellon Capital Management Corporation (the Sub-Adviser) will coordinate the investment and reinvestment of the assets of the Fund.

In considering whether to approve the Agreements, the Trustees considered and discussed information and analysis provided by WTAM. The Trustees, a majority of whom are Independent Trustees, were assisted in their review by independent legal counsel and met with counsel in executive session separate from representatives of WTAM and the Sub-Adviser. In considering the approval of the Agreements, the Board considered all factors that it believed to be relevant, including those discussed below. The Board did not identify any one factor as dispositive, and each Trustee may have attributed different weights to the factors considered.

Analysis of Nature, Extent, and Quality of Services to be Provided to the Fund

The Board considered information provided to them at the meeting and in previous presentations throughout the year from WTAM representatives regarding the nature, extent, and quality of the services provided to the WisdomTree funds, recognizing WTAM's and the Sub-Adviser's operational capabilities and resources. The Board also discussed WTAM's proposed role as index provider to the Fund. The Board also noted the extensive responsibilities that WTAM will have as investment adviser to the Fund, including the selection of, and supervisory responsibilities and activities over, the Sub-Adviser, including oversight of the Sub-Adviser's compliance with fund policies and objectives, oversight of general fund compliance with federal and state laws and the implementation of Board directives as they relate to the Fund. The Board also considered research support available to, and management capabilities of, the Fund's management personnel and that WTAM will provide oversight of day-to-day fund operations, including fund accounting, administration and legal assistance in meeting disclosure and regulatory requirements.

Based on review of this information and the other factors considered at the meeting, the Board concluded that the nature, extent and quality of services to be provided by WTAM and the Sub-Adviser under the Advisory Agreement and Sub-Advisory Agreement, respectively, are adequate and appropriate.

Comparative Analysis of the Fund's Performance, Advisory Fees and Fund Expenses

As the Fund had not yet commenced operations, the Board was not able to review the Fund's performance. The Board discussed with representatives of WTAM and the Sub-Adviser the portfolio management team and the investment strategies to be employed in the management of the Fund's assets. The Board noted the reputation and experience of WTAM and the Sub-Adviser.

The Board considered the fee to be paid to WTAM by the Fund. The Board examined the fee to be paid by the Fund in light of fees paid to other investment advisers by comparable funds and the method of computing the Fund's fee. The Board also considered the fee to be paid to the Sub-Adviser in relation to the fee to be paid to WTAM by the Fund and the respective services to be provided by the Sub-Adviser and WTAM. The Board also noted the Sub-Adviser's fee will be paid by WTAM (out of its fee from the Fund) and not the Fund. Based on this review, the Board concluded that the fees to be paid to WTAM and the Sub-Adviser were reasonable in light of the considerations described above.

Analysis of Profitability and Economies of Scale

As the Fund had not yet commenced operations, WTAM representatives were not able to review the dollar amount of expenses allocated and profit received by WTAM, or any economies of scale. The Board considered potential benefits to WTAM and the Sub-Adviser from acting as investment adviser and sub-investment adviser, respectively. The Board also considered the uncertainty of the estimated asset levels and the renewal requirements for advisory agreements and their ability to review the advisory fees annually after the initial term of the Agreements. The Board determined that because the Fund had not yet commenced operations, economies of scale were not a factor, but, to the extent in the future it were determined that material economies of scale had not been shared with the Fund, the Board would seek to have those economies of scale shared with the Fund in connection with future renewals.

Edgar Filing: WisdomTree Trust - Form N-CSR

Conclusion

In evaluating the Agreements, the Board considered the conclusions and determinations discussed above and also relied on its knowledge, gained through meetings and other interactions with WTAM and the Sub-Adviser, of other funds advised by WTAM and the Sub-Adviser. In light of the foregoing, the Board determined to approve the Agreements.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com, or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing. There are risks associated with investing, including possible loss of principal. Past performance does not guarantee future results. Indexes are unmanaged and you cannot invest directly in an index.

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effect of varied economic conditions. Funds that focus their investments in one country or region may be significantly impacted by events and developments associated with the region which can adversely affect performance. Funds focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Inflation protected securities do not eliminate risks associated with inflation or deflation. Investments in currency involve additional special risks, such as credit risk and interest rate fluctuations. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effect of varied economic conditions. As these Funds can have a high concentration in some issuers the Funds can be adversely impacted by changes affecting such issuers. Due to the investment strategy of certain Funds they may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.

Transactions in Fund shares will result in brokerage commissions and will generate tax consequences. Shares may be sold through brokerage accounts, but may be redeemed from the Funds only in large amounts of 50,000 shares or more.

Market Environment Overview

The emerging markets, measured by the MSCI Emerging Markets Index, a broad measure of equity performance for emerging markets, returned 0.44% in the 12-month period that ended March 31, 2015. (the period). The global ex-U.S. equity markets, measured by the MSCI ACWI ex-USA Index, a broad measure of equity performance for both developed and emerging markets excluding the U.S., returned -1.01% over the period. Both the MSCI Emerging Market Index and MSCI ACWI ex-USA Index lagged the S&P 500 Index by 12.29% and 13.74%, respectively. In local currency terms, the MSCI Emerging Markets Index and MSCI ACWI ex-USA Index returned 10.92% and 15.45%, respectively. It is important to note that the returns in local terms were very competitive to those of the S&P 500 Index, but underlying currency exposure subtracted significantly from U.S. dollar based returns. One of the most significant events over the period for international investing was the strengthening U.S. dollar, primarily driven by a combination of the Federal Reserve successfully tapering its quantitative easing program and expectations of a future interest rate increase.

Within the MSCI Emerging Markets Index, in local currency terms, eight out of ten sectors were positive. The Healthcare and Information Technology sectors led performance, while the Energy and Materials sectors lagged. Within the MSCI ACWI ex-USA Index, in local currency terms, nine out of ten sectors were positive, with Healthcare and Information Technology sectors leading and Energy and Materials sectors lagging. Another significant event over the period was the substantial decline in oil during the second half of 2014, which had a negative impact on the energy sector and oil producing countries, but was positive for to countries that import a lot of oil.

* Total returns shown are for the period December 10, 2014 (commencement of operations) to March 31, 2015.

WisdomTree's emerging market and global ex-U.S. Fundamental-weighted Funds are designed to track indexes based on the dividend or earnings stream generated by the companies included in the index. The dividend stream is defined as the sum of all dividends paid over the prior 12 months for each company. The earnings stream is defined as the total dollar level of earnings for all companies within each Index. There are two primary factors that drive performance differentials versus market cap-weighted benchmarks. The first is aggregate exposure to one or more sectors or countries. The second is stock selection within each sector or country. Both of these are determined as part of WisdomTree's rules-based index methodology. These exposures are not subjectively determined. Rather, they are objectively determined at the Index rebalancing dates based on the dividend stream or earnings stream.

While the overall emerging markets lagged both the broad U.S. and developed international markets there was a noticeable difference in performance between the different sectors and countries. The WisdomTree India Earnings Fund was the best performing Fund over the full period, outperforming broader emerging markets by approximately 20%. India benefited from optimism that newly elected Prime Minister Narendra Modi will be able to reform India's economy and unlock their vast growth potential. They also benefited from lower oil prices over the period because they are net importers. The WisdomTree Emerging Markets Equity Income Fund (DEM) returned -9.40%, while the MSCI Emerging Markets Index was up 0.44% for the period. DEM was overweight the Energy and Materials sector and underweight Information Technology. Over the period, the Energy and Materials sector witnessed the worst performance, while Information Technology was the second best performing sector. DEM also had an overweight exposure to Russia. Although Russian equities were positive over the period in local terms, the Ruble depreciated around 40% against the dollar, negatively impacting the returns to U.S. investors who do not neutralize the currency exposure. On the other hand, The WisdomTree Emerging Markets Consumer Growth Fund (EMCG), which focuses on the consumer sectors and therefore underweights energy and large banks, outperformed its performance benchmark, the MSCI Emerging Market Index, by 2.80%.

Among the WisdomTree global and global-ex-U.S. Funds, the WisdomTree Global ex-U.S. Real Estate Fund (DRW) was the best performing Fund, returning 12.08% over the period and outperforming its benchmark by 3.28%. As global interest rates fell over the period there was demand for high income asset classes like real estate. The worst performing Fund over the period was the WisdomTree Global Natural Resources Fund (GNAT), which returned -23.84% over the period. The Fund invests heavily in the Energy and Materials sectors, which were the two worst performing sectors over the period, driven by lower oil prices, a stronger dollar and slower than expected global growth.

Fund returns are shown at NAV. Please see Performance Summaries on the subsequent pages for more complete performance information. Please see page 19 for the list of index descriptions.

Fund performance assumes reinvestment of dividends and capital gain distributions. An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses are not available

The Fund returned 5.71% at net asset value (NAV) for the fiscal year ending March 31, 2015 (for more complete performance information please see the chart below). The Fund benefited most from its position in Hong Kong. The Fund's position in Australia created the greatest drag on performance.

Edgar Filing: WisdomTree Trust - Form N-CSR

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of the Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **As of the Fund's current prospectus dated August 1, 2014, as supplemented January 1, 2015, the Fund's annual expense ratio was 0.48%.**

The Fund returned 2.57% at net asset value (NAV) from Fund inception on December 10, 2014 to March 31, 2015 (for more complete performance information please see the chart below). The Fund benefited most from its position in the Information Technology sector. The Fund's position in the Industrials sector created the greatest drag on performance.

Edgar Filing: WisdomTree Trust - Form N-CSR

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of the Fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **As of the Fund's current prospectus dated August 1, 2014, as supplemented January 1, 2015, the Fund's annual expense ratio was 0.58%.**

¹ Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on December 10, 2014.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. The WisdomTree Global Natural Resources Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global Natural Resources Index.

The Fund returned -23.84% at net asset value (NAV) for the fiscal year ending March 31, 2015 (for more complete performance information please see the chart below). The Fund benefited most from its position in Sweden. The Fund's position in the United States of America created the greatest drag on performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors' assessments of the underlying value of the Fund's portfolio securities.

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of cost: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 1, 2014 to March 31, 2015.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 10/1/14 to 3/31/15 to estimate the expenses you paid on your account during the period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

- ³ Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. For the periods in which the investment adviser waived advisory fees for the WisdomTree Asia Pacific ex-Japan Fund, the total return would have been lower if certain expenses had not been waived (Notes 2 and 3).
- ⁴ The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.
- ⁵ Included in the expense ratio are proxy expenses. Without these proxy expenses, the expense ratio would have been 0.48%.
- ⁶ The expense ratio includes investment advisory fee waivers. Without these investment advisory fee waivers, the expense ratio would have been unchanged.
- ⁷ Annualized.
- ⁸ Portfolio turnover rate is not annualized and excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation, as well.
- ⁹ Included in the expense ratio are proxy expenses. Without these proxy expenses, the expense ratio would have been 0.63%.

WisdomTree India Earnings Fund (India Earnings Fund) (consolidated)	February 22, 2008
WisdomTree Middle East Dividend Fund (Middle East Dividend Fund)	July 16, 2008

The India Earnings Fund makes its investments through the WisdomTree India Investment Portfolio, Inc. (the Portfolio), a wholly owned subsidiary organized in the Republic of Mauritius. The Portfolio was incorporated under the provisions of the Mauritius Companies Act, 2001 and holds a Global Business License Category 1 issued by the Financial Services Commission. The Portfolio is advised by WisdomTree Asset Management, Inc. (WTAM) and is sub-advised by Mellon Capital Management Corporation (MCM). For the India Earnings Fund, the accompanying financial statements reflect the financial position of the Fund and the results of operations on a consolidated basis with the Portfolio. All inter-company accounts and transactions have been eliminated in the consolidation.

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (Index) developed by WisdomTree Investments, Inc. (WisdomTree Investments). WisdomTree Investments is the parent company of WTAM, the investment adviser to each Fund and the Trust. WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified. The securities in each Index are weighted based on earnings or earnings yield.

In the normal course of business, the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (the Codification) is the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds:

Edgar Filing: WisdomTree Trust - Form N-CSR

Use of Estimates The preparation of financial statements in conformity with GAAP, requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reporting period. Actual results could differ from those estimates.

Investment Valuation The net asset value (NAV) of each Fund s shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per

WisdomTree Global/Global ex-U.S. and Emerging/Frontier Markets Funds 95

Table of Contents**Notes to Financial Statements** (continued)

share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding. Each Fund issues and redeems shares at NAV only in large blocks of shares known as creation units, which only certain institutions or large investors may purchase or redeem. Shares of each Fund are listed on a national securities exchange and trade at market prices. Most investors will buy and sell shares through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV or less than NAV. In calculating each Fund's NAV, investments are valued under policies approved by the Board of Trustees. Equity securities (including preferred stock) traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Unlisted equity securities (including preferred stock) are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price. Short-term debt securities with remaining maturities of 60 days or less generally are valued at current market quotations or mean prices obtained from broker-dealers or independent pricing service providers. Each Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded. Forward foreign currency contracts are valued daily using WM/Reuters closing spot and forward rates as of 4:00 p.m. London time. Fixed income securities generally are valued at current market quotations or mean prices obtained from broker-dealers or independent pricing services. Broker-dealers or independent pricing service providers, in determining the value of securities may consider such factors as recent transactions, indications from broker-dealers yields and quoted prices on similar securities, and market sentiment for the type of security.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund's investments will be fair valued in accordance with the Fund's pricing policy. The Board of Trustees of the Trust has established a pricing committee (the Pricing Committee) which is comprised of senior representatives of WTAM and which reports to the Board of Trustees on a quarterly basis. In the event that a financial instrument cannot be valued based upon a price from a national securities exchange, independent pricing service provider or broker-dealer quotation, or such prices are deemed to not reflect current market value, the Pricing Committee may value the financial instrument in good faith under the policies and procedures approved by the Board of Trustees based on current facts and circumstances. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations, securities whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV calculation time that may materially affect the value of a Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy of inputs to be used when determining fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk—for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including each Fund's assumptions in determining the fair value of investments)

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a

security in default or bankruptcy proceedings for which there is no current market quotation or market activity; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund's NAV is computed and that may materially affect the value of the Fund's investments).

The valuation techniques and significant inputs used in determining the fair market value measurements for Level 2 and Level 3 positions are as follows:

Financial instruments are generally valued by independent pricing service providers that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. Depending on the type of financial instrument, the independent pricing service providers internal pricing models may use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Financial instruments that use similar valuation techniques and observable inputs as described above and have an appropriate level of market activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate. Over-the-counter financial derivative instruments derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These instruments are normally valued on the basis of broker-dealer quotations or independent pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative instruments can be estimated by an independent pricing service provider using a series of techniques including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, credit risks/spreads, interest rates, yield curves, default and exchange rates. Derivative contracts that use valuation techniques and observable inputs as described above and have an appropriate level of market activity are categorized as Level 2 of the fair value hierarchy, otherwise a Level 3 fair value classification is appropriate.

Determination of a fair value by the Pricing Committee may include significant unobservable inputs and therefore would be reflected as a Level 3 of the fair value hierarchy. The Pricing Committee may employ a market-based valuation approach which may use, among other potential considerations, related or comparable securities, recent transactions, market multiples, book values, and other relevant information to determine fair value. The Pricing Committee may also use an income-based valuation approach in which anticipated future cash flows of the financial instrument are discounted to calculate fair value. The Pricing Committee meets at least on a monthly basis to review and discuss the appropriateness of such fair values using more current information such as, recent security news, recent market transactions, updated corporate action information and/or other macro or security specific events. Also, when observable inputs become available, the Pricing Committee conducts back testing of the methodologies used to value Level 3 financial instruments to substantiate the unobservable inputs used to value those investments. Such back testing includes comparing Level 3 investment values to observable inputs such as exchange-traded prices, transaction prices, and/or vendor prices.

The following is a summary of transfers between fair value measurement levels that occurred during fiscal year ended March 31, 2015. The Funds have elected to use the beginning of period method for transfers between fair value measurement levels.

Fund	Transfers from Level 1 to Level 2¹
Emerging Markets Consumer Growth Fund	\$ 100,864
Emerging Markets SmallCap Dividend Fund	\$ 3,729,529
Middle East Dividend Fund	\$ 38,847

¹ Transfers from Level 1 to Level 2 are as a result of the unavailability of a quoted price in an active market for identical investments as of March 31, 2015.

Derivatives and Hedging Disclosure Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Funds have invested in derivatives, specifically forward foreign currency contracts during the fiscal year or period ended March 31, 2015 which are detailed in the tables herein. The Funds derivative agreements contain credit-risk related contingent features which include, but are not limited to, a percentage decline in the Funds NAV over a specified time period. If an event occurred at March 31, 2015 that triggered a contingent feature, the counterparty to the agreement may require the Funds to post additional collateral or terminate the derivative positions and demand payment. Any collateral posted with respect to the derivative positions would be used to offset or reduce the payment. The maximum exposure to derivatives agreements with credit-risk related contingent features would be the total value of derivatives in net liability positions for each Fund, as disclosed on page 108. At March 31, 2015, the Funds did not receive or post collateral with any counterparty for derivatives and no event occurred that triggered a credit-risk-related contingent feature.

The Funds listed below have invested in derivatives, specifically forward foreign currency contracts for the fiscal year or period ended March 31, 2015, which are detailed in the tables herein. All of the derivative instruments disclosed and described herein are subject to risk. Risks may arise upon entering into forward foreign currency contracts from the potential inability of a counterparty to meet the terms of their contracts

and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

¹ For the period December 10, 2014 (commencement of operations) through March 31, 2015, the volume of derivative activity for the period is based on intra-month balances.

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Dividend income is recognized on the ex-dividend date, net of any foreign taxes withheld. Interest income including amortization of premiums and discounts, is accrued daily. The value of additional securities received as dividend payments is recorded as income and as an increase to the cost basis of such securities.

Foreign Currency Translation The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies, are translated into U.S. dollars using exchange rates prevailing on the respective dates of such transactions that are deemed appropriate by WTAM. Realized and unrealized foreign exchange gains and losses on investments are included as a component of net realized gain (loss) from investment transactions and net change in unrealized appreciation (depreciation) from investment transactions, respectively, on the Statement of Operations. Net realized and unrealized foreign exchange gains or losses arising from sales of foreign currencies, including gains and losses of forward foreign currency contracts, currency gains or losses recognized between the trade and settlement dates on investment transactions, and the difference between the amounts of dividends and foreign withholding taxes recorded on the Funds' books and the U.S. dollar equivalent of the amounts actually received or paid are included in net realized gain (loss) from forward foreign currency contracts and foreign currency related transactions and/or net change in unrealized

appreciation (depreciation) from forward foreign currency contracts and translation of assets and liabilities denominated in foreign currencies in the Statement of Operations. Certain foreign exchange gains and losses included in realized and unrealized gains or losses are included in, or are a reduction of, ordinary income in accordance with U.S. Federal income tax regulations.

Expenses/Reimbursements Under the investment advisory agreement for each Fund, except Emerging Markets Consumer Growth Fund and Emerging Markets Dividend Growth Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of trustees who are not interested persons of the Funds (Independent Trustees); (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's Chief Compliance Officer (CCO); (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM.

Under the investment advisory agreement for Emerging Markets Consumer Growth Fund and Emerging Markets Dividend Growth Fund, WTAM has agreed to pay all expenses of the Trust, except for: (i) brokerage expenses and other fees, charges, taxes, levies or expenses (such as stamp taxes) incurred in connection with the execution of portfolio transactions or in connection with creation and redemption transactions (including without limitation any fees, charges, taxes, levies or expenses related to the purchase or sale of an amount of any currency, or the partition or repatriation of any security or other asset, related to the execution of portfolio transactions or any creation or redemption transactions); (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of each Independent Trustee; (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's CCO; (vi) extraordinary expenses (in each case as determined by a majority of the Independent Trustees); (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; (viii) interest and taxes of any kind or nature (including, but not limited to, income, excise, transfer and withholding taxes); (ix) fees and expenses related to the provision of securities lending services; and (x) the advisory fee payable to WTAM.

The internal expenses of pooled investment vehicles in which the Funds may invest (acquired fund fees and expenses) are not expenses of the Funds and are not paid by WTAM.

During the fiscal year or period ended March 31, 2015, the Trust incurred expenses pertaining to proxy printing, mailing and solicitation. These proxy expenses are not paid by WTAM. During the period, each Fund in the Trust bore its pro rata allocation of these proxy expenses.

Pursuant to a separate contractual arrangement, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WTAM receives a fee, as shown on the Statements of Operations under Service fees, of up to 0.0044% of each Fund's average daily net assets for providing such services and paying such expenses. WTAM provides CCO services to the Trust.

Currency Transactions The Funds may enter into forward foreign currency contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. The Funds do not expect to engage in currency transactions for the purpose of hedging against declines in the value of the Fund's assets that are denominated in one or more foreign currencies. The Funds may not enter into such contracts for speculative purposes.

Forward Foreign Currency Contracts A forward foreign currency contract (Forward Contract) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large, commercial banks) and their customers. A Forward Contract generally does not require an initial margin deposit and no commissions are charged at any stage for trades. However, if a Fund is in an unrealized loss position on a Forward Contract, it may be required to pledge collateral (or additional collateral) to the counterparty. If a Fund is in an unrealized gain position on a Forward Contract, it may receive collateral from the counterparty.

Risks may arise upon entering into Forward Contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

Fluctuations in the value of open Forward Contracts are recorded for book purposes as unrealized gains or losses on Forward Contracts by the Funds. Realized gains and losses on Forward Contracts include net gains or losses recognized by the Funds on contracts which have matured or were sold.

Securities Lending Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. It is the Funds' policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high-grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The cash collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. The value of the investment of cash collateral for securities on loan along with the obligation to return such collateral are included on the Statements of Assets and Liabilities. The value of securities received as collateral for securities on loan are not included on the Statements of Assets and Liabilities because the receiving Fund does not have the right to sell or repledge the securities received as collateral. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees, all of which are included in the securities lending income earned by the Funds and disclosed on the Statement of Operations. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. Dividends received while a security is out on loan are not considered Qualified Dividend Income (QDI) under the specific criteria issued by the Internal Revenue Service and are subject to taxation at the shareholder's ordinary income tax rate instead of the lower long-term capital gains tax rate. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

Master Netting Arrangements Accounting Standards Update No. 2011-11 Disclosures about Offsetting Assets and Liabilities (ASU 2011-11) is generally intended to (i) help investors and other financial statement users to better assess the effect or potential effect of offsetting arrangements on a company's financial position, (ii) improve transparency in the reporting of how companies mitigate credit risk, and (iii) facilitate comparisons between those entities that prepare their financial statements on the basis of GAAP and those entities that prepare their financial statements on the basis of international financial reporting standards. ASU 2011-11 requires entities to disclose (i) gross and net information about both instruments and transactions eligible for offset in the financial statements, and (ii) instruments and transactions subject to an agreement similar to a master netting agreement. ASU 2011-11 is limited in scope to the following financial instruments, to the extent they are offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement: (i) recognized derivative instruments accounted for under ASC 815 (Derivatives and Hedging); (ii) repurchase agreements and reverse repurchase agreements; and (iii) securities borrowing and securities lending transactions.

In order to better define its contractual rights and to secure rights that will help a Fund mitigate its counterparty risk, a Fund may enter into an International Swaps and Derivatives Association, Inc. Master Agreement (ISDA Master Agreement) or similar agreement with its counterparties. An ISDA Master Agreement is a bilateral agreement between a Fund and a counterparty that governs over-the-counter derivatives (OTC), including Forward Contracts, and typically contains, among other things, collateral posting terms, netting and rights of set-off provisions in the event of a default and/or termination event. Under an ISDA Master Agreement, a Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and receivables to create a single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

Collateral requirements generally differ by type of derivative. Collateral terms are contract-specific for OTC derivatives (e.g. foreign exchange contracts, options and certain swaps). Generally, for transactions traded under an ISDA Master Agreement, the collateral requirements are calculated by netting the marked to market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by a Fund and the counterparty. Generally, the amount of collateral due from or to a counterparty must exceed a minimum transfer amount threshold before a transfer is required to be made. To the extent amounts due to a Fund from its derivatives counterparties are not fully collateralized, contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance.

A Fund's security lending activities are governed by a Securities Lending Authorization Agreement (Lending Agreement) between the Fund and the lending agent. The Lending Agreement authorizes the lending agent to lend qualifying U.S. and foreign securities held by a Fund to approved borrowers (each a Borrower). To mitigate borrower risk, a Fund typically receives from a Borrower, collateral in the form of U.S. dollar cash and/or securities issued or guaranteed by the U.S. government or its agencies in excess of the market value of the securities loaned. Under the provisions of the Lending Agreement, a Fund shall have, as to the collateral, all of the rights and remedies of a secured party under applicable law. A Fund is exposed to risk of loss if a Borrower defaults on its obligation to return borrowed securities and the value of the collateral a Fund received is insufficient to cover the market value of the securities loaned. Also, the lending agent is permitted to invest the cash collateral it receives from a Borrower into a money market fund which is subject to market fluctuation. Therefore, a Fund is exposed to risk of loss if the value of invested cash collateral is insufficient to satisfy the Fund's obligation to return the full amount owed to such Borrower.

Edgar Filing: WisdomTree Trust - Form N-CSR

For financial reporting purposes, the Funds elect to not offset assets and liabilities subject to an ISDA Master Agreement or Lending Agreement, if any, in the Statements of Assets and Liabilities. Therefore, all qualifying transactions are presented on a gross basis in

Short-Term Investments Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments include short-term obligations issued by the U.S. government, its agencies, non-U.S. government agencies, negotiable certificates of deposit (CDs), fixed time deposits and bankers' acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Tax Information and Dividends and Distributions to Shareholders It is each Fund's policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (the Code). Each Fund intends to qualify for and to elect treatment as a separate Regulated Investment Company (RIC) under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. There can be no guarantee that a Fund will pay dividends. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with the requirements of the Code and the U.S. Treasury regulations. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions that exceed earnings and profit for tax purposes are reported for tax purposes as a return of capital. The India Earnings Fund has filed an election to treat the Portfolio as a pass-through entity for tax purposes.

3. ADVISORY FEES AND TRANSACTIONS

WTAM has overall responsibility for the general management and administration of the Trust. WTAM provides an investment program for each Fund. WTAM has arranged for MCM to provide sub-advisory services to the Funds. MCM is compensated by WTAM at no additional cost to the Funds. WTAM also arranges for transfer agency, custody, fund accounting, fund administration, securities lending and all other non-distribution related services necessary for the Funds to operate, which are generally under separate agreements entered into between the Trust on behalf of the Funds and the applicable service provider. Under the investment advisory agreement for each Fund, WTAM agrees to pay all expenses of the Funds except for certain expenses described in Note 2.

Pursuant to a separate contractual arrangement, as also described in Note 2, WTAM arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees in exchange for a fee of up to 0.0044% of each Fund's average daily net assets. WTAM expects to receive advisory fees from each Fund, based on a percentage of the Fund's average daily net assets, as shown in the following table:

Each Fund may purchase shares of affiliated exchanged-traded funds (ETF) in secondary market transactions. For the fiscal year or period ended March 31, 2015, WTAM waived its advisory fees for each Fund's investment, associated with daily uninvested cash, in correlated affiliated ETFs net of any incremental costs as a result of these transactions (fund accounting, safekeeping, transaction fees, etc.) that are paid by WTAM out of the advisory fee received from the affiliated ETFs. The table below indicates the waiver. Please see Note 8 for additional information on Other Affiliated Parties and Transactions.

4. CAPITAL SHARE TRANSACTIONS

As of March 31, 2015, there were an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in creation units or multiples thereof. Except when aggregated in creation units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. The consideration for the purchase of creation units of a Fund generally consists of the in-kind contribution of a designated portfolio of equity securities constituting a portfolio sampling representation of the securities included in the relevant Fund's underlying Index and an amount of cash. The India Earnings Fund and Middle East Dividend Fund issue and redeem shares on a cash basis only. Investors purchasing and redeeming creation units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of creation units.

5. INVESTMENT PORTFOLIO TRANSACTIONS

* Under the Regulated Investment Company Modernization Act of 2010, a Fund is permitted to carry forward any new capital losses for an unlimited period. Additionally, such capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law. The character of these losses is noted above.

Capital losses incurred after October 31 (post-October capital losses) and late year ordinary losses incurred after December 31 within the taxable year are deemed to arise on the first business day of each Fund's next taxable year.

During the fiscal year or period ended March 31, 2015, the following Funds incurred and will elect to defer post-October capital losses and late year ordinary losses as follows:

These differences are primarily due to redemptions-in-kind, foreign currency transactions, investments in passive foreign investment companies, non-deductible expenses, investments in partnerships, and investments in real estate investment trusts.

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the fiscal year or period ended March 31, 2015, the Funds did not have any liabilities for unrecognized tax benefits relating to uncertain income tax positions they have taken or expect to take in the future. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and

penalties in Other expenses on the Statements of Operations. The Funds file tax returns with the Internal Revenue Service, the State of New York, and various other states. Generally, each of the tax years in the four-year period ended March 31, 2015, remains subject to examination by taxing authorities.

Table of Contents**Notes to Financial Statements** (continued)**7. MAURITIUS INCOME TAX**

The Portfolio holds a tax residency certificate issued by the Mauritian Revenue authorities which entitles it to claim the benefits of the double taxation avoidance agreement entered between India and Mauritius (tax treaty). Since the India Earnings Fund makes its investments through the Portfolio, a wholly owned subsidiary organized in the Republic of Mauritius, this structure should permit the India Earnings Fund to benefit from the tax treaty. The Supreme Court of India upheld the validity of this tax treaty in response to a lower court challenge contesting the treaty s applicability to entities such as the India Earnings Fund. In March 2012, the Indian Finance Minister introduced a new chapter to the Indian Income Tax Act, 1961 (IT Act), which included certain General Anti-Avoidance Rules (GAAR). The Finance Bill, 2015 (FB 2015) proposes to amend the IT Act to defer the applicability of GAAR to financial years beginning on or after 1 April 2017. The FB 2015 has also grandfathered all investments made into India up-to April 1, 2017 from the applicability of GAAR. No assurance can be given that the terms of the tax treaty will not be subject to re-negotiation in future. Any change in the provision of the tax treaty or in its applicability to the India Earnings Fund could result in imposition of withholding and other taxes on the India Earnings Fund by the tax authorities in India. This would reduce the return to the India Earnings Fund on its investments and the return received by India Earnings Fund shareholders.

In the recent scrutiny audits concluded that have not involved the Portfolio, the tax authorities in India have sought to apply a Minimum Alternate Tax (MAT) on certain Foreign Portfolio Investors investing into India on the income earned up to a period of seven prior years (which is the statute of limitation in India). Pursuant to several representations, the Indian Government has formed a Committee to provide it with a recommendation on the applicability of MAT to foreign investors, until which no further notices for scrutiny of prior years will be issued nor will any action be taken for the recovery of any tax demands raised. To date, the Portfolio has not received any notice seeking the application of MAT to the India Earnings Fund for any prior year and the recommendation of the Committee on the applicability of MAT to foreign entities generally as well to entities that benefit from a tax treaty would determine any potential imposition of taxes on income earned by the India Earnings Fund for prior years.

Reference to investments by the India Earnings Fund herein should be understood to refer to investments by the Portfolio.

The taxable profits derived from the worldwide income of the wholly owned subsidiary of the India Earnings Fund, the Portfolio, is subject to income tax at the rate of 15% in the Republic of Mauritius. As with all Mauritian tax residents, the Portfolio is entitled to a foreign tax credit (FTC) on its foreign sourced income. The FTC is based on the lower of the Mauritian tax or the foreign taxes incurred. Where documentary evidence is not available to substantiate the foreign taxes suffered, the FTC can be presumed to be 80% of the Mauritian tax on its foreign source income. The presumed FTC effectively reduces the Mauritian income tax rate on the foreign sourced income of the Portfolio to a maximum of 3%. Interest income on call and deposit accounts with Mauritian banks is exempt from tax, and there is no tax on capital gains in Mauritius. Effective August 8, 2012, in connection with the new advisory agreement, the Mauritius income tax is paid by WTAM.

9. DEMAND NOTE

During the fiscal year ended March 31, 2015, the India Earnings Fund had a demand note agreement with Bank of America, N.A. which allowed the Fund to borrow up to \$300,000,000 until the stated maturity date of October 3, 2014. During the fiscal year ended March 31, 2015, the Fund utilized the demand note and borrowed for a period of 5 days with an average outstanding loan balance of \$293,235,779 and a weighted average interest rate of 2.56% per annum. Interest expense related to the loan for the fiscal year ended March 31, 2015 was \$102,633. At March 31, 2015, the Fund did not have any amounts outstanding under the demand note agreement.

10. RECENT ACCOUNTING PRONOUNCEMENT

In June 2014, The FASB issued *ASU 2014-11 Transfers & Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures* to improve the financial reporting of repurchase agreements and other similar transactions. The guidance includes expanded disclosure requirements for entities that enter into repurchase agreements or securities lending transactions. The guidance is effective for financial statements with fiscal years beginning on or after January 1, 2015, and interim periods within those fiscal years. Management is evaluating the impact, if any, of this guidance on the Trust's financial statement disclosures.

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders of WisdomTree Trust:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of WisdomTree Asia Pacific ex-Japan Fund, WisdomTree China Dividend ex-Financials Fund, WisdomTree Commodity Country Equity Fund, WisdomTree Emerging Markets Consumer Growth Fund, WisdomTree Emerging Markets Dividend Growth Fund, WisdomTree Emerging Markets Equity Income Fund, WisdomTree Emerging Markets ex-State-Owned Enterprises Fund, WisdomTree Emerging Markets SmallCap Dividend Fund, WisdomTree Global Equity Income Fund, WisdomTree Global Ex-US Dividend Growth Fund, WisdomTree Global ex-U.S. Real Estate Fund, WisdomTree Global ex-U.S. Utilities Fund, WisdomTree Global Natural Resources Fund, WisdomTree India Earnings Fund (consolidated) and WisdomTree Middle East Dividend Fund (fifteen of the investment funds constituting WisdomTree Trust (the "Trust")) as of March 31, 2015, and the related statements of operations, the statements of changes in net assets, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2015, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of WisdomTree Asia Pacific ex-Japan Fund, WisdomTree China Dividend ex-Financials Fund, WisdomTree Commodity Country Equity Fund, WisdomTree Emerging Markets Consumer Growth Fund, WisdomTree Emerging Markets Dividend Growth Fund, WisdomTree Emerging Markets Equity Income Fund, WisdomTree Emerging Markets ex-State-Owned Enterprises Fund, WisdomTree Emerging Markets SmallCap Dividend Fund, WisdomTree Global Equity Income Fund, WisdomTree Global Ex-US Dividend Growth Fund, WisdomTree Global ex-U.S. Real Estate Fund, WisdomTree Global ex-U.S. Utilities Fund, WisdomTree Global Natural Resources Fund, WisdomTree India Earnings Fund (consolidated) and WisdomTree Middle East Dividend Fund of WisdomTree Trust at March 31, 2015, the results of their operations, the changes in their net assets, and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

Approval of Investment Advisory and Sub-Advisory Agreements (unaudited)

Approval of Investment Sub-Advisory Agreement with respect to the WisdomTree Emerging Markets ex-State-Owned Enterprises Fund

At a meeting of the Board of Trustees (the Board) of the WisdomTree Trust (the Trust) held on September 18-19, 2014, the Trustees (the Trustees), including those Trustees who are not interested persons (as defined in the Investment Company Act of 1940, as amended) of the Trust (the Independent Trustees), considered the approval of the Investment Advisory Agreement (the Advisory Agreement), pursuant to which WisdomTree Asset Management, Inc. (WTAM) will provide the Fund with investment advisory services, and the Sub-Investment Advisory Agreement (together with the Advisory Agreement, the Agreements), pursuant to which Mellon Capital Management Corporation (the Sub-Adviser) will coordinate the investment and reinvestment of the assets of the Fund.

In considering whether to approve the Agreements, the Trustees considered and discussed information and analysis provided by WTAM. The Trustees, a majority of whom are Independent Trustees, were assisted in their review by independent legal counsel and met with counsel in executive session separate from representatives of WTAM and the Sub-Adviser. In considering the approval of the Agreements, the Board considered all factors that it believed to be relevant, including those discussed below. The Board did not identify any one factor as dispositive, and each Trustee may have attributed different weights to the factors considered.

Analysis of Nature, Extent, and Quality of Services to be Provided to the Fund

The Board considered information provided to them at the meeting and in previous presentations throughout the year from WTAM representatives regarding the nature, extent, and quality of the services provided to the WisdomTree funds, recognizing WTAM's and the Sub-Adviser's operational capabilities and resources. The Board also discussed WTAM's proposed role as index provider to the Fund. The Board also noted the extensive responsibilities that WTAM will have as investment adviser to the Fund, including the selection of, and supervisory responsibilities and activities over, the Sub-Adviser, including oversight of the Sub-Adviser's compliance with Fund policies and objectives, oversight of general Fund compliance with federal and state laws and the implementation of Board directives as they relate to the Fund. The Board also considered research support available to, and management capabilities of, the Fund's management personnel and that WTAM will provide oversight of day-to-day fund operations, including fund accounting, administration and legal assistance in meeting disclosure and regulatory requirements.

Based on review of this information and the other factors considered at the meeting, the Board concluded that the nature, extent and quality of services to be provided by WTAM and the Sub-Adviser under the Advisory Agreement and Sub-Advisory Agreement, respectively, are adequate and appropriate.

Comparative Analysis of the Fund's Performance, Advisory Fees and Fund Expenses

As the Fund had not yet commenced operations, the Board was not able to review the Fund's performance. The Board discussed with representatives of WTAM and the Sub-Adviser the portfolio management team and the investment strategies to be employed in the management of the fund's assets. The Board noted the reputation and experience of WTAM and the Sub-Adviser.

The Board considered the fee to be paid to WTAM by the Fund. The Board examined the fee to be paid by the fund in light of fees paid to other investment advisers by comparable funds and the method of computing the fund's fee. The Board also considered the fee to be paid to the Sub-Adviser in relation to the fee to be paid to WTAM by the Fund and the respective services to be provided by the Sub-Adviser and WTAM. The Board also noted the Sub-Adviser's fee will be paid by WTAM (out of its fee from the fund) and not the fund. Based on this review, the Board concluded that the fees to be paid to WTAM and the Sub-Adviser were reasonable in light of the considerations described above.

Analysis of Profitability and Economies of Scale

As the fund had not yet commenced operations, WTAM representatives were not able to review the dollar amount of expenses allocated and profit received by WTAM, or any economies of scale. The Board considered potential benefits to WTAM and the Sub-Adviser from acting as investment adviser and sub-investment adviser, respectively. The Board also considered the uncertainty of the estimated asset levels and the renewal requirements for advisory agreements and their ability to review the advisory fees annually after the initial term of the Agreements. The Board determined that because the fund had not yet commenced operations, economies of scale were not a factor, but, to the extent in the future it were determined that material economies of scale had not been shared with the fund, the Board would seek to have those economies of scale shared with the fund in connection with future renewals.

Edgar Filing: WisdomTree Trust - Form N-CSR

Conclusion

In evaluating the Agreements, the Board considered the conclusions and determinations discussed above and also relied on its knowledge, gained through meetings and other interactions with WTAM and the Sub-Adviser, of other funds advised by WTAM and the Sub-Adviser. In light of the foregoing, the Board determined to approve the Agreements.

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effect of varied economic conditions. Funds that focus their investments in one country or region may be significantly impacted by events and developments associated with the region which can adversely affect performance. Funds focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Inflation protected securities do not eliminate risks associated with inflation or deflation. Investments in currency involve additional special risks, such as credit risk and interest rate fluctuations. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effect of varied economic conditions. As these Funds can have a high concentration in some issuers the Funds can be adversely impacted by changes affecting such issuers. Due to the investment strategy of certain Funds they may make higher capital gain distributions than other ETFs. Market Environment Overview

The U.S. equity market, as measured by the S&P 500[®] Index, returned 12.73% for the 12-month period ended March 31, 2015 (the period). After bottoming in March of 2009, the S&P 500 recorded its sixth straight year of gains. Measured from March 31, 2009 through March 31, 2015, the six year cumulative total return on the S&P 500[®] Index was 194.30%. This represents a substantial recovery in the equity markets as earnings and dividend levels reached and surpassed previous levels. In fact, this was also enough for the S&P 500[®] Index to reach new highs.

While the overall return for the period was positive, it was marked by several bouts of volatility. One of the most significant events over the period was the substantial decline in the price of oil during the second half of 2014. Although the decline in the price of oil dragged down returns for the energy sector, the lower gas prices at the pump were considered positive for consumers. Another important trend over the period was the strengthening U.S. dollar, which was primarily driven by a combination of additional monetary easing by the Bank of Japan (BOJ) and the European Central Bank (ECB), coupled with the Federal Reserve (Fed) successfully tapering its quantitative easing program. Since the global financial crisis, the Fed and central banks around the world have embraced policies to provide ample liquidity to the markets with the goal of keeping interest rates low and credit flowing. However, as the U.S. economy continues to heal and with the Fed ending its quantitative easing program, there is now a divergence among central bank policies which has driven the U.S. dollar stronger over the period. Even given this divergence, U.S. interest rates fell over the period as liquidity from the BOJ and ECB compressed global interest rates.

WisdomTree Funds Performance Overview

The following table reflects the WisdomTree Funds' performance versus their capitalization-weighted benchmark indexes:

Ticker	WisdomTree Fund	1-Year NAV Return	Performance Benchmark	1-Year Return	Difference
DTN	WisdomTree Dividend ex-Financials Fund	11.27%	Dow Jones U.S. Select Dividend Index SM	10.13%	1.14%
EPS	WisdomTree Earnings 500 Fund	11.28%	S&P 500 [®] Index	12.73%	-1.45%
DHS	WisdomTree Equity Income Fund	10.64%	Russell 1000 [®] Value Index	9.33%	1.31%
DLN	WisdomTree LargeCap Dividend Fund	11.08%	S&P 500 [®] Index	12.73%	-1.65%
EZY	WisdomTree LargeCap Value Fund	14.73%	Russell 1000 [®] Value Index	9.33%	5.40%
DON	WisdomTree MidCap Dividend Fund	14.46%	S&P MidCap 400 [®] Index	12.19%	2.27%
EZM	WisdomTree MidCap Earnings Fund	9.99%	S&P MidCap 400 [®] Index	12.19%	-2.20%
DES	WisdomTree SmallCap Dividend Fund	8.33%	Russell 2000 [®] Index	8.21%	0.12%
EES	WisdomTree SmallCap Earnings Fund	4.89%	Russell 2000 [®] Index	8.21%	-3.32%
DTD	WisdomTree Total Dividend Fund	11.47%	Russell 3000 [®] Index	12.37%	-0.90%
EXT	WisdomTree Total Earnings Fund	10.93%	Russell 3000 [®] Index	12.37%	-1.44%
DGRW	WisdomTree U.S. Dividend Growth Fund	13.94%	NASDAQ U.S. Dividend Achievers TM Select Index	9.62%	4.32%
DGRS	WisdomTree U.S. SmallCap Dividend Growth Fund	8.37%	Russell 2000 [®] Index	8.21%	0.16%

The top-performing performance benchmark within the aforementioned chart was the S&P 500[®] Index, which is a measure of large cap stocks. Of the performance benchmarks shown, the Russell 2000[®] Index was the lowest performer, indicating that small cap stocks lagged large and mid-caps over the period. Within the Russell 2000[®] Index, small cap energy exposure was a leading detractor from performance over the period.

WisdomTree's fundamentally-weighted Funds are designed to track indexes based on the dividend stream or earnings stream, respectively, generated by the companies included in the underlying WisdomTree Index. The dividend stream is defined as the sum of the dollar value of dividends indicated to be paid by each company. The earnings stream is defined as the total dollar level of earnings for all companies within each Index. There

(unaudited) (concluded)

are two primary factors that drive performance differentials of the WisdomTree Funds and Indexes versus their performance benchmarks. The first is aggregate exposure to one or more sectors. The second is stock selection within each sector. Both of these are determined as part of WisdomTree's rules-based index methodology. These exposures are not subjectively determined. Rather, they are objectively determined at the Index rebalancing dates based on the dividend or earnings stream.

Nine of the ten sectors represented within the S&P 500® Index experienced positive performance over the period. The best-performing sector over the period was the Healthcare sector, with Consumer Discretionary and Information Technology close behind. Each of these sectors delivered a return greater than 18% over the period. The Healthcare sector continued to perform well, positively affected by the tailwinds from the implementation of the Affordable Care Act and performance from high growth areas like biotechnology and life sciences. Consumer Discretionary and Information Technology tend to be higher growth and more economically sensitive sectors, which allowed them to benefit from a continual improvement in the economy and consumers with greater disposable income due to the decline in gas prices. The worst performing sectors over the period was the Energy, Telecommunication Services and Materials sectors. The Energy sector was negatively impacted from the decline in oil prices, driven by increased supply and a stronger U.S. dollar. The Materials sector was also negatively impacted by the stronger U.S. dollar and weaker than expected global growth.

The performance of most WisdomTree dividend-weighted Funds compared to their performance benchmark was favorable over the period. This ultimately makes sense, in that WisdomTree's dividend-focused approaches have tended to historically tilt greater weight toward dividend-paying firms, and dividend paying equities tend to do well when interest rates decline. The performance of most of the WisdomTree earnings-weighted Funds compared to their performance benchmarks was unfavorable over the period. The WisdomTree earnings-weighted Funds displayed above track an underlying WisdomTree Index that focuses solely on generating exposure to the performance of companies that have generated positive profits on a cumulative basis leading up to the Index screening date. Although we feel investing in only profitable companies is a long term prudent strategy, during certain years, market performance can be driven by momentum and future growth expectations of more speculative and less profitable companies.

The strongest relative performance advantage measured versus the requisite performance benchmarks came with respect to the WisdomTree LargeCap Value Fund (EZY), outperforming its performance benchmark by 5.40%, driven primarily by stock selection within Healthcare and Industrials sectors. The WisdomTree U.S. Dividend Growth Fund (DGRW) also saw strong relative outperformance. DGRW's forward looking dividend growth methodology and quality screens contributed to the outperformance against its performance benchmark over the period, which primarily focuses on past historical dividend growth as a criteria for index inclusion. The WisdomTree MidCap Dividend Fund (DON) also displayed strong performance over the period and outperformed its performance benchmark, primarily due to stock selection among Financials and Industrials.

Fund returns are shown at NAV. Please see Performance Summaries on the subsequent pages for more complete performance information. Please see page 16 for the list of index descriptions.

Fund performance assumes reinvestment of dividends and capital gain distributions. An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Funds' performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. Past performance is no guarantee of future results.
