Wells Fargo Advantage Funds

Favorable U.S. economic and business conditions and the continuation of the low-interest-rate policy by the Fed positively influenced domestic equity markets.

Dear Valued Shareholder:

We are pleased to offer you this semi-annual report for the *Wells Fargo Advantage Global Dividend Opportunity Fund* for the six-month period that ended April 30, 2015. During the period, domestic and international stocks delivered positive returns to investors despite increasing volatility. The U.S. stock market returned 4.40% (as measured by the S&P 500 Index¹). Stocks of companies based in economically-developed markets outside the U.S. returned 5.50% (as measured by the MSCI EAFE Index (Net)²). Stocks in companies based in countries with economies that are still developing returned 3.97% (as measured by the MSCI Emerging Markets Index (Net)³).

Taken in the aggregate, data suggested that growth in business and economic activity in several global markets continued to improve at a moderate pace although economies in Japan and China faced challenges to sustained growth. Anticipation of interest-rate increases in the U.S., the decline of oil and natural gas prices during the second half of 2014, and a stronger U.S. dollar drove higher levels of volatility in investment markets throughout the period.

U.S. economic growth and Federal Reserve policies benefited equity investors.

The U.S. economy continued to grow, albeit slowly. Gross domestic product (GDP) was measured at an annual growth rate of 2.2% in the fourth quarter of 2014 and 0.2% in the first quarter of 2015. Rather than citing any fundamental weakness in the economy, many observers tended to attribute the lower first-quarter GDP growth rate to the challenges presented by another harsh winter, the increased strength of the U.S. dollar, and a decline in capital spending among U.S. energy companies struggling with oil and natural gas prices that fell dramatically earlier in the period before recovering somewhat in early 2015. Generally, corporate earnings were favorable, consumer confidence improved, and the labor market continued to recover. The unemployment rate declined from 5.7% in January 2015 to 5.4% in March 2015.

The U.S. Federal Reserve (Fed) ended its quantitative easing-related bond-buying program in October 2014 and maintained its low-interest-rate policy into 2015. Favorable U.S. economic and business conditions and the continuation of the low-interest-rate policy by the Fed positively influenced domestic equity markets. The Fed signaled that interest-rate increases could occur in 2015 if inflation and employment data continue to advance toward its longer-run goals of 2% inflation and an unemployment rate between 5.0% to 5.2%. Low interest rates globally have restrained bond yields and have highlighted the important role dividend-paying stocks can play in a well-diversified portfolio.

¹ The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value-weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.

² The Morgan Stanley Capital International Europe, Australasia, and Far East (MSCI EAFE) Index (Net) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. You cannot invest directly in an index. Source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, reviewed, or produced by MSCI.

³ The Morgan Stanley Capital International (MSCI) Emerging Markets Index (Net) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of emerging markets. The MSCI Emerging Markets Index (Net) consists of the following 23 emerging markets country indexes: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey, and United Arab Emirates. You cannot invest directly in an index.

Wells Fargo Advantage Global Dividend Opportunity 3
Fund

Europe and Asia focus on economic stimulus.

Overseas, central banks in Europe, Japan, and China sought to spark economic growth through low interest rates and easy-money policies. The currency and monetary policies of international central banks often had negative consequences for multinational corporations and investors based in the U.S. Corporate earnings and investment returns recorded in markets overseas were lowered upon translation to U.S. dollars because of the U.S. dollar's strength relative to other currencies.

The European Central Bank maintained low interest rates to encourage spending. In addition, it launched a quantitative-easing program through which it is expected to buy more than one trillion euros of mostly government bonds between March 2015 and September 2016. Initial signs suggested the moves benefited economic growth in some of the larger eurozone member countries, as for the first time in five years, all four of the region's largest economies recorded GDP growth during the first quarter of 2015. Nevertheless, a number of smaller countries in the region, perhaps most notably Greece, still struggled with high levels of sovereign debt and austerity programs intended to strengthen their financial positions.

In the Pacific region, the Bank of Japan maintained accommodative monetary policies as it sought to stimulate growth in an economy that has been beset by deflationary pressures during the past two decades. Japan's economy rebounded from a recession in the final quarter of 2014, but growth was weaker than expected. In China, economic growth remains positive but at lower levels than in recent years. In response, the People's Bank of China reduced interest rates in November 2014, February 2015, and once again after the close of the period in an effort to spark activity that will sustain higher growth.

Don't let short-term uncertainty derail long-term investment goals.

Periods of uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest with *Wells Fargo Advantage Funds*. We appreciate your confidence in us and remain committed to helping you meet your financial needs.

Sincerely,

Karla M. Rabusch

President

Average annual total returns¹ (%) as of April 30, 2015

	6 Months	1 Year	5 Year	Since inception 3-28-2007
Based on market value	(0.49)	3.17	4.42	0.18
Based on net asset value (NAV) per share	1.72	1.95	6.91	1.92

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

The Fund's expense ratio for the six months ended April 30, 2015, was 1.08%.

Comparison of NAV vs. market value since inception²

Derivatives involve risks, including interest-rate risk, credit risk, the risk of improper valuation, and the risk of non-correlation to the relevant instruments they are designed to hedge or closely track. There are numerous risks associated with transactions in options on securities and/or indexes. As a writer of an index call option, the Fund forgoes the opportunity to profit from increases in the values of securities held by the Fund. However, the Fund has retained the risk of loss (net of premiums received) should the price of the Fund's portfolio securities decline. Similar risks are involved with writing call options or secured put options on individual securities and/or indexes held in the Fund's portfolio. This combination of potentially limited appreciation and potentially unlimited depreciation over time may lead to a decline in the net asset value of the Fund. The Fund's dividend capture strategy may lead to a similar result. Dividend capture strategies involve the Fund purchasing a stock before an ex-dividend date so it becomes entitled to the dividend and then typically selling the stock on or after the stock's ex-dividend date. Any decline in the value of the stock reflecting the dividend payment may over time lead to a decline in the net asset value of the Fund. Dividend capture also increases the portfolio turnover rate and related transaction costs of the Fund. Foreign investments may contain more risk due to the inherent risks associated with changing political climates, foreign market instability, and foreign currency fluctuations. Risks of foreign investing are magnified in emerging or developing markets. Small- and mid-cap securities may be subject to special risks associated with narrower product lines and limited financial resources compared with their large-cap counterparts, and, as a result, small- and mid-cap securities may decline significantly in market downturns and may be more volatile than those of larger companies due to their higher risk of failure. High-yield, lower-rated bonds may contain more risk due to the increased possibility of default. Illiquid securities may be subject to wide fluctuations in market value. The Fund may be subject to significant delays in disposing of illiquid securities. Accordingly, the Fund may be forced to sell these securities at less than fair market value or may not be able to sell them when the adviser or subadviser believes that it is desirable to do so.

¹ Total returns based on market value are calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.

² This chart does not reflect any brokerage commissions charged on the purchase and sale of the Fund's common stock. Dividends and distributions paid by the Fund have the effect of reducing the Fund's NAV.

Wells Fargo Advantage Global Dividend Opportunity Fund 5

MANAGERS DISCUSSION

The Fund's average annual total return based on market value was (0.49)% during the six-month period that ended April 30, 2015. During the same period, the Fund's average annual total return based on net asset value was 1.72%.

Overview

Despite bouts of heightened volatility, global equity markets gained in value during the period. U.S. economic growth continued at a slow to moderate pace. While U.S. job growth was lackluster, adding about 200,000 jobs per month on average, unemployment gradually trended lower although labor force participation remains below historical levels. Weak first-quarter gross domestic product and job growth data appeared to be a hiccup induced largely by harsh winter weather and labor unrest at U.S. port facilities. After several years of negligible economic growth, Europe and Japan may be turning the corner, although robust recovery remains elusive. Lingering concerns about eurozone weakness gave way to renewed optimism as the European Central Bank announced plans to implement a quantitative easing (QE) program in order to stimulate growth and combat subdued inflation. QE in the U.S., which ended in October 2014, buoyed domestic equity and debt markets. QE is just getting started in Europe, and many observers expect a similar beneficial effect for investment markets there.

During the period, the Fund was positioned less defensively compared with recent past periods. With the close of QE in the U.S. and the U.S. Federal Reserve's articulated decision to begin the gradual return to more normal monetary policy as the financial crisis recedes into history, we deemed it prudent to reduce holdings of long-duration assets like preferred stocks, even though yields remain attractive. Dividend-paying stocks, particularly utilities, lagged badly in the past six months largely as a result of interest-rate concerns.

Ten largest holdings³ (%) as of April 30, 2015

GDF Suez	5.24
Hera SpA	5.18
Suez Environnement Company SA	5.00
Red Electrica Corporation SA	4.12
Chatham Lodging Trust	4.07
Veresen Incorporated	3.97
Deutsche Post AG	3.88
Veolia Environnement SA	3.63
Tribune Media Company Class A	2.75
Excel Trust Incorporated	2.72

Sector distribution⁴ as of April 30, 2015**Contributors to performance**

Fund holdings that contributed to performance included Suez Environnement Company SA, Excel Trust Incorporated, Shenandoah Telecommunications Company, Preferred Apartment Communities Incorporated, Summit Hotel Properties Incorporated, and Physicians Realty Trust. Suez benefited from the flight-to-quality utilities in Europe as energy-sensitive utilities lost favor among investors. Excel Trust was the subject of a private equity financed takeover bid that caused its stock price to climb. Shenandoah Telecom showed superior subscriber and profit growth compared with its wireless peers. Preferred Apartment Communities saw rapid growth from its innovative development pipeline. Summit Hotel Properties stumbled badly in 2013, appointed a new chief financial officer, and refocused in 2014. Investors have come to believe in the turnaround, which resulted in increased demand and a higher price for the stock. Physicians Realty Trust executed well following its IPO and continues to source off-market acquisitions of medical office buildings at attractive yields.

³The ten largest holdings, excluding cash and cash equivalents, are calculated based on the value of the investments divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.

⁴Amounts are calculated based on the total long-term investments of the Fund. These percentages are subject to change and may have changed since the date specified.

6 Wells Fargo Advantage Global Dividend Opportunity Fund

Performance highlights (unaudited)

Country allocation⁴ as of April 30, 2015**Detractors from performance**

Performance detractors included Red Electrica Corporacion SA, National Grid plc, and Pennon Group plc. Red Electrica, Pennon, Deutsche Post AG, ENI SpA, Veresen Incorporated, and Vodafone Group plc ADR were negatively affected by currency translation as the value of the U.S. dollar spiked against world currencies because the U.S. bond market maintained a yield premium over international markets, and expectations were that interest-rate increases could widen that differential. Red Electrica, the Spanish high-voltage network operator (in Spanish, red means network) actually was up modestly in

euro terms but the euro's value relative to the U.S. dollar fell from \$1.26 to \$1.11 during the period, and investment gains suffered upon translation from euros to U.S. dollars. The British energy and water utilities National Grid and Pennon struggled due to investor concerns that a change in leadership after national elections in May would result in a more restrictive regulatory regime for utilities. As it happened, the elections resulted in a slim outright majority for the incumbent Tory government, which is likely to help allay investor concerns.

The options overlay portfolio detracted from the Fund's performance. Options written on eurozone, Japan, and Hong Kong markets generated premiums from December 2014 through April 2015 that were more than offset by negative performance in November due to unexpected easing measures by the Bank of Japan.

Outlook

We are now seeing what appears to be a more solid economic recovery in the U.S. While stronger economic growth will be positive for the economy and for equity investors, stronger economic growth eventually will result in rising interest rates as monetary stimulus is withdrawn, and this could be a headwind for preferred and high-yielding common stocks. The options overlay portfolio holds agreements, called European Options, that obligate the management team to pay a counterparty an amount that is determined by the price of an underlying security or an index value at a specific time. When these positions are entered into, the management team collects a premium. These positions may generate losses in excess of the premium collected depending on changes in the price of the underlying security or index associated with the agreement. The key issue we consider in evaluating options is whether or not the premiums are sufficient rewards for the potential risks. To manage risks, we monitor the effect of underlying markets and volatility on the prices of securities or indexes associated with the options. If risk thresholds are exceeded, we will seek to neutralize risk by entering into offsetting agreements.

¹ Calculated based upon average shares outstanding

² Total return is calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares.

The accompanying notes are an integral part of these financial statements.

Notes to financial statements (unaudited)

Wells Fargo Advantage Global Dividend Opportunity Fund 15

1. ORGANIZATION

The *Wells Fargo Advantage Global Dividend Opportunity Fund* (the Fund) was organized as a statutory trust under the laws of the state of Delaware on December 21, 2006 and is registered as a diversified closed-end management investment company under the Investment Company Act of 1940, as amended. As an investment company, the Fund follows the accounting and reporting guidance in Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946, *Financial Services - Investment Companies*.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time).

Equity securities and options that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price. If no sale occurs on the primary exchange or market for the security that day, the prior day's price will be deemed stale and a fair value price will be determined in accordance with the Fund's Valuation Procedures.

Equity securities that are not listed on a foreign or domestic exchange or market, but have a public trading market, are valued at the quoted bid price from an independent broker-dealer that the Management Valuation Team of Wells Fargo Funds Management, LLC (Funds Management) has determined is an acceptable source.

Non-listed OTC options are valued at the evaluated price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

The values of securities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team.

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign securities are traded, but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of such securities, then fair value pricing procedures approved by the Board of Trustees of the Fund are applied. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. Foreign securities that are fair valued under these procedures are categorized as Level 2 and the application of these procedures may result in transfers between Level 1 and Level 2. Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in net asset values that are higher or lower than net asset values based on the last reported sales price or latest quoted bid price. On

April 30, 2015, such fair value pricing was used in pricing foreign securities.

Debt securities are valued at the evaluated bid price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined in good faith by the Board of Trustees. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team. The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market values, to assess the continued appropriateness of the fair valuation methodologies used. These securities are fair

16 Wells Fargo Advantage Global Dividend Opportunity Fund

Notes to financial statements (unaudited)

valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the inputs considered in the valuation process until there is a readily available price provided on an exchange or by an independent pricing service. Valuations received from an independent pricing service or independent broker-dealer quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. The values of other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting from changes in exchange rates. The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are included in net realized and unrealized gains or losses from investments.

Options

The Fund is subject to equity price risk and foreign currency exchange rate risk in the normal course of pursuing its investment objectives. The Fund may write covered call options or secured put options on individual securities and/or indexes. When the Fund writes an option, an amount equal to the premium received is recorded as a liability and is subsequently adjusted to the current market value of the written option. Premiums received from written options that expire unexercised are recognized as realized gains on the expiration date. For exercised options, the difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is treated as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in calculating the realized gain or loss on the sale. If a put option is exercised, the premium reduces the cost of the security purchased. The Fund, as a writer of an option, bears the market risk of an unfavorable change in the price of the security and/or index underlying the written option.

The Fund may also purchase call or put options. The premium is included in the Statement of Assets and Liabilities as an investment, the value of which is subsequently adjusted based on the current market value of the option. Premiums paid for purchased options that expire are recognized as realized losses on the expiration date. Premiums paid for purchased options that are exercised or closed are added to the amount paid or offset against the proceeds received for the underlying security to determine the realized gain or loss. The risk of loss associated with purchased options is limited to the premium paid.

Options traded on an exchange are regulated and terms of the options are standardized. Purchased options traded over-the-counter expose the Fund to counterparty risk in the event the counterparty does not perform. This risk can be

mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund's exposure to the counterparty.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Dividend income is recognized on the ex-dividend date, except for certain dividends from foreign securities, which are recorded as soon as the custodian verifies the ex-dividend date. Dividend income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Notes to financial statements (unaudited)

Wells Fargo Advantage Global Dividend Opportunity Fund 17

Distributions to shareholders

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with federal income tax regulations, which may differ in amount or character from net investment income and realized gains recognized for purposes of U.S. generally accepted accounting principles.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

Capital loss carryforwards that do not expire are required to be utilized prior to capital loss carryforwards that expire. As of October 31, 2014, capital loss carryforwards available to offset future net realized capital gains were as follows through the indicated expiration dates:

2016	2017	2018	No expiration	
			Short-term	Long-term
\$164,388,931	\$193,644,982	\$17,121,810	\$49,240,737	\$34,224,248

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- n Level 1 – quoted prices in active markets for identical securities
- n Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)

n Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

18 Wells Fargo Advantage Global Dividend Opportunity
Fund

Notes to financial statements (unaudited)

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of April 30, 2015:

The Fund recognizes transfers between levels within the fair value hierarchy at the end of the reporting period. At April 30, 2015, fair value pricing was used in pricing certain foreign securities and securities valued at \$124,590,040 were transferred from Level 1 to Level 2. The Fund did not have any transfers into/out of Level 3.

4. TRANSACTIONS WITH AFFILIATES AND OTHER EXPENSES**Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo), is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.95% of the Fund's average daily total assets. Total assets consist of the net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Funds Management has retained the services of certain subadvisers to provide daily portfolio management to the Fund. The fees for subadvisory services are borne by Funds Management. Wells Capital Management Incorporated, an affiliate of Funds Management and an indirect wholly owned subsidiary of Wells Fargo, is a subadviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.10% of the Fund's average daily total assets. Crow Point Partners, LLC, which is not an affiliate of Funds Management, is also a subadviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.20% of the Fund's average daily total assets.

Notes to financial statements (unaudited)

Wells Fargo Advantage Global Dividend Opportunity Fund 19

Administration fee

Funds Management also serves as the administrator to the Fund, providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized an unlimited number of shares with no par value. For the six months ended April 30, 2015 and the year ended October 31, 2014, the Fund did not issue any shares.

6. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the six months ended April 30, 2015 were \$188,767,209 and \$191,851,351, respectively.

7. DERIVATIVE TRANSACTIONS

During the six months ended April 30, 2015, the Fund entered into written options for economic hedging purposes.

During the six months ended April 30, 2015, the Fund had written call option activities as follows:

	Number of contracts	Premiums received
Options outstanding at October 31, 2014	700	\$ 238,429
Options written	2,226	441,320
Options expired	(1,742)	(452,264)
Options closed	(102)	(61,810)
Options exercised	(1,005)	(122,684)
Options outstanding at April 30, 2015	77	\$ 42,991

Open written call options at April 30, 2015 were as follows for the Fund:

Expiration date	Counterparty	Description	Number of contracts	Strike price	Value
5-15-2015	Citigroup	Hang Seng Index	77	30,158 HKD	\$(16,069)

The Fund had an average of 445 written option contracts during the six months ended April 30, 2015.

The fair value, realized gains or losses and change in unrealized gains or losses, if any, on derivative instruments are reflected in the appropriate financial statements.

For certain types of derivative transactions, the Fund has entered into International Swaps and Derivatives Association, Inc. master agreements (ISDA Master Agreements) or similar agreements with approved counterparties. The ISDA Master Agreements or similar agreements may have requirements to deliver/deposit securities or cash to/with an exchange or broker-dealer as collateral and allows the Fund to offset, with each counterparty, certain derivative financial instrument s assets and/or liabilities with collateral held or pledged. Collateral requirements differ by type of derivative. Collateral or margin requirements are set by the broker or exchange clearing house for exchange traded derivatives while collateral terms are contract specific for over-the-counter traded derivatives. Cash collateral that has been pledged to cover obligations of the Fund under ISDA Master Agreements or similar agreements, if any, will be reported separately in the Statement of Assets and Liabilities. Securities pledged as collateral, if any, for the same purpose are noted in the Portfolio of Investments. With respect to balance sheet offsetting, absent an event of default by the counterparty or a termination of the agreement, the reported amounts of financial assets and financial liabilities in the Statement of Assets and Liabilities are not offset across transactions between the Fund and the applicable counterparty. A reconciliation of the gross amounts on the Statement of Assets and Liabilities to the net amounts by derivative type, including any collateral exposure, is as follows:

Derivative type	Counterparty	Gross amounts of liabilities in the Statement of Assets and Liabilities	Amounts subject to netting agreements	Collateral pledged	Net amount of liabilities
Written options	Citigroup	\$16,069	\$ 0	\$ 0	\$ 16,069

20 Wells Fargo Advantage Global Dividend Opportunity
Fund

Notes to financial statements (unaudited)

8. CONCENTRATION RISK

Concentration risks result from exposure to a limited number of sectors. A fund that invests a substantial portion of its assets in any sector may be more affected by changes in that sector than would be a fund whose investments are not heavily weighted in any sector.

9. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

10. SUBSEQUENT DISTRIBUTION

On May 20, 2015, the Fund declared a distribution of \$0.18 per share payable on July 1, 2015 to shareholders of record on June 15, 2015.

This distribution is not reflected in the accompanying financial statements. The final determination of the source of all distributions is subject to change and made after the Fund's tax year-end.

Other information (unaudited)

Wells Fargo Advantage Global Dividend Opportunity Fund 21

TAX INFORMATION

Pursuant to Section 853 of the Internal Revenue Code, the following amounts were designated as foreign taxes paid for the fiscal year ended October 30, 2014. These amounts may be less than the actual foreign taxes paid for financial statement purposes. Foreign taxes paid or withheld should be included in taxable income with an offsetting deduction from gross income or as a credit for taxes paid to foreign governments. None of the income was derived from ineligible foreign sources as defined under Section 901(j) of the Internal Revenue Code.

Creditable foreign taxes paid	Per share amount	Foreign income as % of ordinary income distributions
\$2,598,551	\$0.0529	76.58%

PROXY VOTING INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available upon request, by calling **1-800-222-8222**, visiting our website at **wellsfargoadvantagefunds.com**, or visiting the SEC website at sec.gov. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on the Fund's website at **wellsfargoadvantagefunds.com** or by visiting the SEC website at sec.gov.

BOARD OF TRUSTEES AND OFFICERS

The following table provides basic information about the Board of Trustees (the Trustees) and Officers of the Fund. Each of the Trustees and Officers listed below acts in identical capacities for each fund in the Wells Fargo Advantage family of funds, which consists of 134 mutual funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and four closed-end funds, including the Fund (collectively the Fund Complex). The mailing address of each Trustee and Officer is 525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

24 Wells Fargo Advantage Global Dividend Opportunity
Fund

Automatic dividend reinvestment plan

AUTOMATIC DIVIDEND REINVESTMENT PLAN

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan (the Plan). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan (Plan Agent), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as dividends) payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in common shares. The shares are acquired by the Plan Agent for the participant s account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (newly issued common shares) or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions (market premium), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant s account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 30170, College Station, Texas 77842-3170 or by calling 1-800-730-6001.

List of abbreviations
