Definitions Adjusted EBITDA represents earnings before interest, loss (gain) on extinguishment of debt, taxes, depreciation and amortization (“EBITDA”), adjusted for impairments, coal rationalization costs, changes to our contingent consideration liability related to our acquisition of CMT and the expiration of certain acquired contractual obligations. EBITDA and Adjusted EBITDA do not represent and should not be considered alternatives to net income or operating income under GAAP and may not be comparable to other similarly titled measures in other businesses. Management believes Adjusted EBITDA is an important measure of the operating performance and liquidity of the Company's net assets and its ability to incur and service debt, fund capital expenditures and make distributions. Adjusted EBITDA provides useful information to investors because it highlights trends in our business that may not otherwise be apparent when relying solely on GAAP measures and because it eliminates items that have less bearing on our operating performance and liquidity. EBITDA and Adjusted EBITDA are not measures calculated in accordance with GAAP, and they should not be considered a substitute for net income, operating cash flow or any other measure of financial performance presented in accordance with GAAP. EBITDA represents earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA attributable to SXC/SXCP represents Adjusted EBITDA less Adjusted EBITDA attributable to noncontrolling interests. Adjusted EBITDA/Ton represents Adjusted EBITDA divided by tons sold/handled.

Reconciliation to Adjusted EBITDA In June 2018, the Company recorded a loss in connection with the disposal of our interest in VISA SunCoke Limited. Reflects non-controlling interests in Indiana Harbor and the portion of the Partnership owned by public unitholders.

Reconciliation of Segment Adjusted EBITDA and Adjusted EBITDA per ton (1) Corporate and Other includes the results of our legacy coal mining business.

2019 Guidance Summary Reflects 2019 guidance if the merger of SXC and SXCP was completed on July 1, 2019. Exclude one-time Simplification Transaction costs of ~\$5M that will be expensed. See appendix for a definition and reconciliation of Adjusted EBITDA. Capital expenditures exclude the impact of capitalized interest. Operating cash flow lower by \$4M due to one-time transactions costs of ~\$5M, offset by ~\$1M of corporate cost synergies. Included in Operating Cash Flow. See “Reconciliation to Illustrate SXC FCF/share” slide in the appendix for tax synergies offset by higher cash taxes resulting from higher taxable income. Guidance remains unchanged from February 2019 announcement.

Thermal Coal Export Profitability (in \$ per metric tonne) (1) (2) Believe ILB export thermal profitable at Q1 '19 API2 benchmark pricing of ~\$75/t Based on average ILB cash cost, netback calculation implies attractive margins CMT well-positioned to serve ILB thermal coal producers (in \$ per short ton) (3) Netback calculation example assuming \$75 per metric tonne prompt API 2 benchmark (Q1 2019 average). Ocean Freight for 70,000 metric tonne US Gulf/ARA Coal Panamax freight. Consists of CN rail transportation from ILB coal mines to CMT and terminal transloading costs.
