Who Can Vote

Stockholders of record at the close of business on [•], 2008 (the "Record Date"), are entitled to vote, at the Special Meeting. As of the close of business on that date, the Company had [•] shares of common stock, \$0.0001 par value (the "Common Stock"), outstanding. The presence in person or by proxy of the holders of a majority of the outstanding Common Stock constitutes a quorum for the transaction of business at the Special Meeting. Each holder of Common Stock is entitled to one vote for each share held as of the Record Date.

How You Can Vote

You may vote your shares at the Special Meeting either in person or by proxy. To vote by proxy, you should mark, date, sign and mail the enclosed proxy in the prepaid envelope. Giving a proxy will not affect your right to vote your shares if you attend the Special Meeting and want to vote in person. The shares represented by the proxies received in response to this solicitation and not properly revoked will be voted at the Special Meeting in accordance with the instructions therein. On the matters coming before the Special Meeting for which a choice has been specified by a stockholder on the proxy card, the shares will be voted accordingly. If you return your proxy, but do not mark your voting preference, the individuals named as proxies will vote your shares **FOR** the approval of an amendment to the Company's Restated Certificate of Incorporation to effect a reverse stock split of the Common Stock, at any time prior to the date of the Company's 2008 Annual Meeting of Stockholders, at a specific ratio to be determined by the Board of Directors in its discretion within a range of not less than 1-for-2 and not more than 1-for-5.

Registered stockholders can simplify their voting and save the Company additional expense by calling [•] or voting via the Internet at [•]. Telephone and Internet voting information is provided on the proxy card if these options are available to you. 1

Required Vote

The proposal to approve an amendment to the Company's Restated Certificate of Incorporation to effect a reverse stock split of the Common Stock requires the affirmative vote of the majority of the shares outstanding on the Record Date. Abstentions will have the same effect as negative votes. If a broker which is the record holder of shares indicates on a proxy that it does not have discretionary authority to vote on the proposal as to such shares, or if shares are not voted in other circumstances in which proxy authority is defective or has been withheld with respect to the proposal, these non-voted shares will be counted for quorum purposes, but will have the same effect as negative votes.

Solicitation of Proxies

The Company will pay the cost of printing and mailing proxy materials. In addition to the solicitation of proxies by mail, solicitation may be made by directors, officers and other employees of the Company by personal interview, telephone or facsimile. No additional compensation will be paid to such persons for such solicitation. The Company will reimburse brokerage firms and others for their reasonable expenses in forwarding solicitation materials to beneficial owners of the Common Stock.

This will not limit your rights to attend or vote at the Special Meeting.

PROPOSAL 1

APPROVAL OF AN AMENDMENT TO THE COMPANY'S RESTATED CERTIFICATE OF INCORPORATION TO EFFECT A REVERSE STOCK SPLIT

The Board of Directors has adopted a resolution approving, declaring advisable and recommending to the stockholders for their approval the amendment to the Company's Restated Certificate of Incorporation, effecting,

at any time prior to the date of the Company's 2008 Annual Meeting of Stockholders, a reverse stock split of the Common Stock at a specific ratio to be determined by the Board of Directors in its discretion within a range of not less than 1-for-2 and not more than 1-for-5. If this proposal is approved, the Board of Directors will have the authority, but not the obligation, in its sole discretion, and without any further action on the part of the stockholders, to select a reverse split ratio within this range and to effect, at any time prior to the date of the Company's 2008 Annual Meeting of Stockholders, the reverse stock split by filing with the Secretary of State of the State of Delaware a Certificate of Amendment to the Company's Restated Certificate of Incorporation. The Board of Directors will have the ability to decline to file the Certificate of Amendment if they subsequently determine that the reverse stock split is no longer in the best interests of the Company.

If this proposal is approved and after the Board of Directors selects the ratio for the reverse stock split, then all of the outstanding shares of Common Stock on the date of the reverse stock split will be automatically converted into a smaller number of shares, at the ratio selected by the Board of Directors, as more fully described below. The ratio will be no less than 1-for-2 and no more than 1-for-5. The reverse stock split will also reduce the number of shares of Common Stock authorized for issuance at the same ratio.

Except for adjustments that may result from the treatment of fractional shares as described below, each stockholder will hold the same percentage of Common Stock outstanding immediately following the reverse stock split as that stockholder held immediately prior to the reverse stock split.

The form of the Certificate of Amendment to effect the reverse stock split is attached hereto as Appendix A. The following discussion is qualified in its entirety by the full text of the Certificate of Amendment, which is hereby incorporated by reference. We are proposing that the Board of Directors have the discretion to select the reverse stock split ratio from within a range, rather than proposing that stockholders approve a specific ratio at this time, in order to give the Board of Directors the flexibility to implement a reverse stock split at a ratio that reflects the Board's then-current assessment of the factors described below under "Determination of Reverse Stock Split Ratio." If the Board of Directors decides to implement a reverse stock split, the Company will file the Certificate of Amendment with the Delaware Secretary of State and the reverse stock split will be effective when it is filed with the Secretary of State of the State of Delaware or such later time as is chosen by the Board of Directors and set forth in the Certificate of Amendment.

Purpose of the Reverse Stock Split

The Board of Directors' primary objective in proposing the reverse stock split is to raise the per share trading price of the Common Stock. The Board believes that a higher price per share trading price would better enable the Company to maintain the listing of the Common Stock on The NASDAQ Capital Market and generate greater investor interest in the Company.

Because the Company failed to comply with the \$1.00 minimum bid price rule set forth in NASDAQ Marketplace Rule 4450(a)(5) for continued listing on The NASDAQ Global Market, we applied to transfer the Common Stock to The NASDAQ Capital Market. The Common Stock began trading on The NASDAQ Capital Market on October 24, 2007, and is currently listed on The NASDAQ Capital Market.

In order for the Common Stock to continue to be quoted on The NASDAQ Capital Market, we must satisfy various listing standards established by NASDAQ, including the requirement that we maintain a minimum bid price of our Common Stock above \$1.00 per share. In connection with the transfer of the Common Stock to The NASDAQ Capital Market, we were provided an additional 180 calendar days (until April 7, 2008) to comply with the \$1.00 minimum bid price continued listing requirement. In order to regain compliance with this requirement, the bid price of the Common Stock must close at \$1.00 per share or more for a minimum of 10 consecutive business days.

The Board of Directors believes that maintaining the listing of the Common Stock on The NASDAQ Capital Market is in the best interests of the Company and our stockholders. If the Common Stock were delisted from The NASDAQ Capital Market, the Board of Directors believes that the liquidity in the trading market for the Common Stock would be significantly decreased, which could reduce the trading price and increase the transaction costs of trading shares of the Common Stock. If the reverse stock split is approved by our stockholders

and implemented by the Board of Directors, we expect to satisfy the \$1.00 per share minimum bid price requirement for continued listing. However, despite the approval of the reverse stock split by our stockholders and the implementation of the reverse stock split by the Board of Directors, the Common Stock may nonetheless be delisted from The NASDAQ Capital Market due to our failure to comply with one or more of the NASDAQ Marketplace rules.

The Board further believes that an increased stock price may encourage investor interest and improve the marketability of our Common Stock to a broader range of investors, and thus enhance liquidity. Because of the trading volatility often associated with low-priced stocks, many brokerage firms and institutional investors have internal policies and practices that either prohibit them from investing in low-priced stocks or tend to discourage individual brokers from recommending low-priced stocks to their customers. Some of those policies and practices pertain to the payment of brokers' commissions and to time-consuming procedures that function to make the handling of lower-priced stocks unattractive to brokers from an economic standpoint. Additionally, because brokers' commissions on lower-priced stocks generally represent a higher percentage of the stock price than commissions on higher-priced stocks, the current share price of the Common Stock can result in an individual stockholder paying transaction costs that represent a higher percentage of total share value than would be the case if our share price were substantially higher. This factor may also limit the willingness of institutions to purchase our stock. The Board believes that the anticipated higher market price resulting from a reverse stock split would enable institutional investors and brokerage firms with such policies and practices to invest in our Common Stock.

Determination of Reverse Stock Split Ratio

The ratio of the reverse stock split, if approved and implemented, will be between and including 1-for-2 and 1-for-5, as determined by the Board of Directors in its sole discretion. In determining the reverse stock split ratio, the Board of Directors will consider numerous factors including:

- the historical and projected performance of our Common Stock and volume level before and after the reverse stock split,
- prevailing market conditions,
- general economic and other related conditions prevailing in our industry and in the marketplace generally,
- the projected impact of the selected reverse stock split ratio on trading liquidity in our Common Stock and our ability to continue our Common Stock's listing on The NASDAQ Capital Market,
- our capitalization (including the number of shares of our Common Stock issued and outstanding),
- the prevailing trading price for our Common Stock and the volume level thereof, and
- potential devaluation of our market capitalization as a result of a reverse stock split.

The purpose of asking for authorization to implement reverse stock split at a ratio to be determined by the Board of Directors, as opposed to a ratio fixed in advance, is to give the Board of Directors the flexibility to take into account then-current market conditions and changes in price of our Common Stock and to respond to other developments that may be deemed relevant, when considering the appropriate ratio.

Effects of Reverse Stock Split

A reverse stock split refers to a reduction in the number of outstanding shares of a class of a corporation's capital stock, which may be accomplished, as in this case, by reclassifying and combining all of our outstanding shares of Common Stock into a proportionately smaller number of shares. For example, if our Board of Directors decides to implement a 1-for-2.5 reverse stock split of our Common Stock, then a stockholder holding 2,500 shares of our Common Stock before the reverse stock split would instead hold 1,000 shares of our Common Stock immediately after the reverse stock split. Each stockholder's proportionate ownership of our outstanding shares of Common Stock would remain the same, except that stockholders that would otherwise receive fractional shares as a result of the reverse stock split will receive cash payments in lieu of fractional shares. All shares of our Common Stock will remain fully paid and non-assessable.

The primary purpose of the proposed reverse stock split of our Common Stock is to combine the issued and outstanding shares of our Common Stock into a smaller number of shares so that the shares of our Common Stock will trade at a higher price per share than recent trading prices. Although we expect the reverse stock split will result in an increase in the market price of our Common Stock, the reverse stock split may not increase the market price of our Common Stock in proportion to the reduction in the number of shares of our Common Stock outstanding or result in the permanent increase in the market price, which is dependent upon many factors, including the Company's performance, prospects and other factors detailed from time to time in our reports filed with the Securities and Exchange Commission. The history of similar reverse stock splits for companies in like circumstances is varied. If the reverse stock split is effected and the market price of our Common Stock declines, the percentage decline as an absolute number and as a percentage of our overall market capitalization may be greater than would occur in the absence of a reverse stock split.

In addition to increasing the market price of our Common Stock, a reverse stock split will also affect the presentation of stockholders' equity on our balance sheet. Specifically, because the par value per share of our Common Stock will not change, the reduction in the number of outstanding shares of Common Stock will cause our stated capital account to be reduced, and our additional paid-in capital to be increased by an equivalent amount. Total stockholders' equity will remain unchanged.

Because no fractional shares will be issued, holders of our Common Stock could be eliminated in the event that the proposed reverse stock split is implemented. However, we are not proposing the reverse stock split as the first step in a "going private" transaction. As of [•], 2008, we had approximately [•] record holders who held fewer than 5 shares of our Common Stock, out of a total of approximately [•] record holders. Therefore, we believe that a reverse stock split, even if approved and implemented at a ratio of 1-for-5, would have no significant effect on the number of record holders of our Common Stock.

Effect on Authorized and Outstanding Shares

The following table illustrates the effects of a 1-for-2, 1-for-2.5, 1-for-3, 1-for-3.5, 1-for-4, 1-for-4.5 and 1-for-5 reverse stock split, without giving effect to any adjustments for fractional shares of our Common Stock, on our authorized and outstanding shares of our Common Stock:

	Number of Shares as of December 31, 2007							
	Prior to Reverse Stock Split	1-for-2	1-for-2.5	1-for-3	1-for-3.5	1-for-4	1-for- 4.5	1-for-5
Authorized Common Stock	125,000,000	62,500,000	50,000,000	41,666,666	35,714,285	31,250,000	27,777,777	25,000,000
Common Stock:								
Outstanding	24,162,883	12,081,441	9,665,153	8,054,294	6,903,680	6,040,720	5,369,529	4,832,576
Issuable upon exercise of Options	4,352,646	2,176,323	1,741,058	1,450,882	1,243,613	1,088,161	967,254	870,529

Effect on Outstanding Options

The reverse stock split, when implemented, will affect the outstanding options to purchase our Common Stock. All of our equity incentive plans include provisions requiring appropriate adjustments to the number of shares of Common Stock covered by the plans and by stock options and other grants under those plans, as well as option exercise prices. For example, if we implement a 1-for-2.5 reverse stock split, each of our outstanding stock options would thereafter evidence the right to purchase two-fifths as many shares of our Common Stock (rounding any fractional shares down to the nearest whole share) and the exercise price per share would be two and a half times the previous exercise price (rounded up to the nearest cent). Further, the number of shares of our Common Stock reserved for issuance (including the number of shares subject to automatic annual increase and the maximum number of shares that may be subject to options) under our existing stock option plans and employee stock purchase plans will be reduced by the same ratio as selected for the reverse stock split.

No Fractional Shares

No fractional shares of Common Stock will be issued in connection with the reverse stock split. If as a result of the reverse stock split, a stockholder of record would otherwise hold a fractional share, the stockholder will receive a cash payment in lieu of the issuance of any such fractional share in an amount per share equal to the closing price per share on The NASDAQ Capital Market on the trading day immediately preceding the effective date of the reverse stock split (as adjusted to give effect to the reverse stock split), without interest. The ownership of a fractional interest will not give the holder thereof any voting, dividend or other right except to receive the cash payment therefor. The terms of some of our stock option plans do not require us to, and we therefore would not expect to, pay cash to option holders in lieu of any fraction of a share issuable upon the exercise of an option.

Stockholders should be aware that, under the escheat laws of the various jurisdictions where stockholders reside, where we are domiciled and where the funds will be deposited, sums due for fractional interests that are not timely claimed after the effective time may be required to be paid to the designated agent for each such jurisdiction. Thereafter, stockholders otherwise entitled to receive such funds may have to seek to obtain them directly from the state to which they were paid.

Accounting Matters

The par value of the shares of our Common Stock is not changing as a result of the implementation of the reverse stock split. Our stated capital, which consists of the par value per share of our Common Stock multiplied by the aggregate number of shares of our Common Stock issued and outstanding, will be reduced proportionately on the effective date of the reverse stock split. Correspondingly, our additional paid-in capital, which consists of the difference between our stated capital and the aggregate amount paid to us upon the issuance of all currently outstanding shares of our Common Stock, will be increased by a number equal to the decrease in stated capital. Further, net loss per share and book value per share will be increased as result of the reverse stock split because there will be fewer shares of Common Stock outstanding.

Implementation of Reverse Stock Split; Certificate of Amendment

If our stockholders approve this proposal, and the Board of Directors elects to effect the reverse stock split, we will file the Certificate of Amendment included as Appendix A to this proxy statement (as completed to reflect the reverse stock split ratio as determined by the Board of Directors, in its discretion, within the range of not less than 1-for-2 and not more than 1-for-5). The Certificate of Amendment will become effective when it is filed with the Secretary of State of the State of Delaware or such later time as is set forth in the Certificate of Amendment.

Possible Disadvantages of Reverse Stock Split

Even though the Board of Directors believes that the potential advantages of a reverse stock split outweigh any disadvantages that might result, the following are some of the possible disadvantages of a reverse stock split:

6

The reduced number of shares of our Common Stock resulting from a reverse stock split could adversely affect the liquidity of our Common Stock.

A reverse stock split could result in a significant devaluation of the Company's market capitalization and the trading price of its Common Stock, on an actual or an as-adjusted basis, based on the experience of other companies that have effected reverse stock splits.

A reverse stock split may leave certain stockholders with one or more "odd lots," which are stock holdings in amounts of less than 100 shares of our Common Stock. These odd lots may be more difficult to sell than shares of Common Stock in even multiples of 100. Additionally, any reduction in brokerage commissions resulting from the reverse stock split, as discussed above, may be offset, in whole or in part, by increased brokerage commissions required to be paid by stockholders selling odd lots created by the reverse stock split.

There can be no assurance that the market price per new share of our Common Stock after the reverse stock split will remain unchanged or increase in proportion to the reduction in the number of old shares of our Common Stock outstanding before the reverse stock split. For example, based on the market price of our Common Stock on [•], 2008 of \$[•] per share, if the stockholders approve this proposal and the Board of Directors select a reverse stock split ratio of 1-for-2.5, there can be no assurance that the post-split market price of our common stock would be \$[•] per share or greater.

Accordingly, the total market capitalization of our Common Stock after the proposed reverse stock split may be lower than the total market capitalization before the proposed reverse stock split and, in the future, the market price of our Common Stock following the reverse stock split may not exceed or remain higher than the market price prior to the proposed reverse stock split.

While the Board of Directors believes that a higher stock price may help generate investor interest, there can be no assurance that the reverse stock split will result in a per-share price that will attract institutional investors or investment funds or that such share price will satisfy the investing guidelines of institutional investors or investment funds. As a result, the trading liquidity of our common stock may not necessarily improve.

If the reverse stock split is effected and the market price of our Common Stock declines, the percentage decline may be greater than would occur in the absence of a reverse stock split. The market price of our Common Stock will, however, also be based on our performance and other factors, which are unrelated to the number of shares outstanding.

Effect on Beneficial Holders of Common Stock (i.e. stockholders who hold in [street name])

Upon the reverse stock split, the Company intends to treat shares of Common Stock held by stockholders in [street name], through a bank, broker or other nominee, in the same manner as registered stockholders whose shares of Common Stock are registered in their names. Banks, brokers or other nominees will be instructed to effect the reverse stock split for their beneficial holders holding the Common Stock in [street name]. However, these banks, brokers or other nominees may have different procedures than registered stockholders for processing the reverse stock split and making payment for fractional shares. If a stockholder holds shares of Common Stock with a bank, broker or other nominee and has any questions in this regard, stockholders are encouraged to contact their bank, broker or other nominee.

Effect on Registered [Book-Entry] Holders of Common Stock (i.e. stockholders that are registered on the transfer agent's books and records but do not hold certificates)

Some of the Company's registered holders of Common Stock may hold some or all of their shares electronically in book-entry form with the Company's transfer agent. These stockholders do not have stock certificates evidencing their ownership of the Common Stock. They are, however, provided with a statement reflecting the number of shares registered in their accounts.

If a stockholder holds registered shares in book-entry form with the transfer agent, no action needs to be taken to receive post-reverse stock split shares or cash payment in lieu of any fractional share interest, if applicable. If a stockholder is entitled to post-reverse stock split shares, a transaction statement will automatically be sent to the stockholder's address of record indicating the number of shares of Common Stock held following the reverse stock split.

If a stockholder is entitled to a payment in lieu of any fractional share interest, a check will be mailed to the stockholder's registered address as soon as practicable after the effective date of the reverse stock split. By signing and cashing the check, stockholders will warrant that they owned the shares of Common Stock for which they received a cash payment. The cash payment is subject to applicable federal and state income tax and state abandoned property laws.

Effect on Certificated Shares

Upon the reverse stock split, our transfer agent will act as our exchange agent and to act for holders of Common Stock in implementing the exchange of their certificates.

Commencing on the effective date of a reverse stock split, stockholders holding shares in certificated form will be sent a transmittal letter by Mellon Investor Services LLC, the transfer agent for the Common Stock. The letter of transmittal will contain instructions on how a stockholder should surrender his or her certificate(s) representing shares of the Common Stock ("Old Certificates") to the transfer agent in exchange for certificates representing the appropriate number of whole shares of post-reverse stock split Common Stock ("New Certificates"). No New Certificates will be issued to a stockholder until that stockholder has surrendered all Old Certificates, together with a properly completed and executed letter of transmittal, to the transfer agent. No stockholder will be required to pay a transfer or other fee to exchange the stockholder's Old Certificates.

Stockholders will then receive a New Certificate(s) representing the number of whole shares of Common Stock to which they are entitled as a result of the reverse stock split. Until surrendered, the Company will deem outstanding Old Certificates held by stockholders to be canceled and only to represent the number of whole shares of post-reverse stock split Common Stock to which these stockholders are entitled.

Any Old Certificates submitted for exchange, whether because of a sale, transfer or other disposition of stock, will automatically be exchanged for New Certificates.

If an Old Certificate has a restrictive legend on the back of the Old Certificate(s), the New Certificate will be issued with the same restrictive legends that are on the back of the Old Certificate(s).

If a Stockholder is entitled to a payment in lieu of any fractional share interest, such payment will be made as described above under "No Fractional Shares."

Stockholders should not destroy any stock certificate(s) and should not submit any certificate(s) until requested to do so.

Federal Income Tax Consequences

The following summary of the federal income tax consequences of a reverse stock split is based on current law, including the Internal Revenue Code of 1986, as amended, and is for general information only. The tax treatment of a stockholder may vary depending upon the particular facts and circumstances of such stockholder, and the discussion below may not address all the tax consequences for a particular stockholder. For example, foreign, state and local tax consequences are not discussed below. Accordingly, notwithstanding anything to the contrary, each stockholder should consult his or her tax advisor to determine the particular tax consequences to him or her of a reverse stock split, including the application and effect of federal, state, local and/or foreign income tax and other laws.

Generally, a reverse stock split will not result in the recognition of gain or loss for federal income tax purposes (except with respect to any cash received in lieu of a fractional share as described below). The adjusted basis of the new shares of Common Stock will be the same as the adjusted basis of old shares Common Stock exchanged for such new shares of Common Stock. The holding period of the new, post-split shares of Common Stock resulting from implementation of the reverse stock split will include the stockholder's respective holding periods for the pre-split shares of Common Stock exchanged for the new shares of Common Stock.

A stockholder who receives cash in lieu of a fractional share will be treated as if we had issued a fractional share to the stockholder and then immediately redeemed the fractional share for cash. Such stockholder should generally recognize gain or loss, as the case may be, measured by the difference between the amount of cash received and the basis of such stockholder's pre-split shares of Common Stock corresponding to the fractional share, had such fractional share actually been issued. Such gain or loss will be capital gain or loss (if such stock was held as a capital asset), and any such capital gain or loss will generally be long-term capital gain or loss to the extent such stockholder's holding period exceeds 12 months.

No Dissenters' Rights

The holders of shares of Common Stock will have no dissenters' rights of appraisal under Delaware law, our Restated Certificate of Incorporation or our Bylaws with respect to the Certificate of Amendment effectuating a reverse stock split.

Vote Required

In order to be adopted, this proposal must receive the affirmative vote of the majority of the shares of Common Stock outstanding on the Record Date.
