QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended February 25, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-08504

UNIFIRST CORPORATION
(Exact name of Registrant as Specified in Its Charter)

Massachusetts
(State or Other Jurisdiction of
Incorporation or Organization)

04-2103460
(I.R.S. Employer
Identification No.)

68 Jonspin Road, Wilmington, MA
(Address of Principal Executive Offices)

01887
(Zip Code)

(978) 658-8888
(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Edgar Filing: UNIFIRST CORP - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Smaller Reporting Company Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date.

The number of outstanding shares of UniFirst Corporation Common Stock and Class B Common Stock at March 30, 2012 were 15,051,774 and 4,885,277, respectively.

UniFirst Corporation and Subsidiaries
Notes to Consolidated Financial Statements

1. Basis of Presentation

These Consolidated Financial Statements of UniFirst Corporation (the “Company”) have been prepared, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (“US GAAP”) have been condensed or omitted pursuant to such rules and regulations; however, the Company believes that the information furnished reflects all adjustments (consisting only of normal recurring adjustments) which are, in the opinion of management, necessary for a fair statement of results for the interim period.

It is suggested that these Consolidated Financial Statements be read in conjunction with the financial statements and the notes thereto included in the Company’s Annual Report on Form 10-K for the fiscal year ended August 27, 2011. There have been no material changes in the accounting policies followed by the Company during the current fiscal year. Results for an interim period are not indicative of any future interim periods or for an entire fiscal year.

2. Recent Accounting Pronouncements

In May 2011, the FASB issued updated accounting guidance to amend existing requirements for fair value measurements and disclosures. The guidance expands the disclosure requirements around fair value measurements categorized in Level 3 of the fair value hierarchy and requires disclosure of the level in the fair value hierarchy of items that are not measured at fair value but whose fair value must be disclosed. It also clarifies and expands upon existing requirements for fair value measurements of financial assets and liabilities as well as instruments classified in shareholders’ equity. The guidance is effective for interim and annual financial periods beginning after December 15, 2011. The Company does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In June 2011, the FASB issued updated accounting guidance that improves the comparability, consistency, and transparency of financial reporting and increases the prominence of items reported in other comprehensive income by eliminating the option to present components of other comprehensive income as part of the statement of changes in shareholders’ equity. The amendments to the existing standard require that all nonowner changes in shareholders’ equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments to the existing standard do not change the current option for presenting components of other comprehensive income (“OCI”) gross or net of the effect of income taxes, provided that such tax effects are presented in the statement in which OCI is presented or disclosed in the notes to the financial statements. Additionally, the standard does not affect the calculation or reporting of earnings per share. This guidance is effective for annual reporting periods, and any interim periods within those annual periods, that begin after December 15, 2011 and is to be applied retrospectively, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In September 2011, the FASB issued updated guidance intended to simplify how entities, both public and nonpublic, test for goodwill and impairment. This guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. Also, the guidance improves the examples of events and circumstances that an entity having a reporting unit with a zero or negative carrying amount should consider in determining whether to measure an impairment loss, if any, under the second step of the goodwill impairment test. This guidance is effective for annual and interim goodwill impairment tests performed for

fiscal years beginning after December 15, 2011, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In September 2011, the FASB issued updated guidance applicable to nongovernmental employers that participate in multiemployer pension and other postretirement benefit plans. The revised accounting rules will require enhanced disclosures relating to an employer's participation in a multiemployer pension plan, but more limited disclosures for multiemployer plans that provide postretirement benefits other than pensions. This guidance is effective for fiscal years ending after December 15, 2011, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In December 2011, the FASB issued updated guidance that requires companies with financial instruments and derivative instruments that are offset on the balance sheet or subject to a master netting arrangement to provide additional disclosures regarding the instrument's impact on a company's financial position. This guidance is effective for interim and annual fiscal periods beginning on or after January 1, 2013. The Company does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

3. Acquisitions

During the twenty-six weeks ended February 25, 2012, the Company acquired no businesses. Whenever the Company acquires a business, consistent with current accounting guidance, the results of operations of the acquisition are included in the Company's consolidated financial results from the date of the acquisition.

4. Fair Value Measurements

US GAAP establishes a framework for measuring fair value and establishes disclosure requirements about fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

The fair value hierarchy prescribed under US GAAP contains three levels as follows:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

All financial assets or liabilities that are measured at fair value on a recurring basis (at least annually) have been segregated into the most appropriate level within the fair value hierarchy based on the inputs used to determine the fair value at the measurement date. The assets or liabilities measured at fair value on a recurring basis are summarized in the table below (in thousands):

	As of February 25, 2012			
	Level 1	Level 2	Level 3	Fair Value
Assets:				
Cash equivalents	\$ 40,563	\$ —	\$ —	\$ 40,563

Total	\$ 40,563	\$ —	\$ —	\$ 40,563
-------	-----------	------	------	-----------

The Company's cash equivalents listed above represent money market securities and are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. The Company does not adjust the quoted market price for such financial instruments.

5. Derivative Instruments and Hedging Activities

In January 2008, the Company entered into an interest rate swap agreement to manage its exposure to interest rate movements and the related effect on its variable rate debt. The Company concluded that the interest rate swap met the criteria to qualify as a cash flow hedge under US GAAP. Accordingly, the Company reflected all changes in the fair value of the swap agreement in accumulated other comprehensive income, a component of shareholders' equity. The swap agreement, with a notional amount of \$100.0 million, matured on March 14, 2011. The Company paid a fixed rate of 3.51% and received a variable rate tied to the three month LIBOR rate.

As of February 25, 2012 and August 27, 2011, there were no fair value amounts recorded by the Company related to this agreement as it matured on March 14, 2011. As of February 25, 2012, we had no outstanding derivative instruments.

The Company recorded any realized gains or losses from its interest rate swap as an adjustment to interest expense in its Consolidated Statements of Income. For the thirteen weeks ended February 26, 2011, the Company reclassified a loss from accumulated other comprehensive income into interest expense totaling \$0.8 million. For the twenty-six weeks ended February 26, 2011, the Company reclassified a loss from accumulated other comprehensive income into interest expense totaling \$1.6 million.

6. Employee Benefit Plans

Defined Contribution Retirement Savings Plan

The Company has a defined contribution retirement savings plan with a 401(k) feature for all eligible employees not under collective bargaining agreements. The Company matches a portion of the employee's contribution and can make an additional contribution at its discretion. Contributions charged to expense under the plan for the thirteen weeks ended February 25, 2012 and February 26, 2011 were \$2.9 million and \$2.6 million, respectively. Contributions charged to expense under the plan for the twenty-six weeks ended February 25, 2012 and February 26, 2011 were \$5.8 million and \$5.2 million, respectively.

Pension Plans and Supplemental Executive Retirement Plans

The Company maintains an unfunded Supplemental Executive Retirement Plan for certain eligible employees of the Company, a non-contributory defined benefit pension plan covering union employees at one of its locations, and a frozen pension plan the Company assumed in connection with its acquisition of Textilease Corporation in fiscal 2004. The amount charged to expense related to these plans for both the thirteen weeks ended February 25, 2012 and February 26, 2011 was \$0.5 million. The amounts charged to expense related to these plans for the twenty-six weeks ended February 25, 2012 and February 26, 2011 were \$1.1 million and \$1.0 million, respectively.

7. Net Income Per Share

The Company calculates net income per share in accordance with US GAAP, which requires the Company to allocate income to its unvested participating securities as part of its earnings per share ("EPS") calculations. The following table sets forth the computation of basic earnings per share using the two-class method for amounts attributable to the Company's shares of Common Stock and Class B Common Stock (in thousands, except per share data):

Edgar Filing: UNIFIRST CORP - Form 10-Q

	Thirteen weeks ended		Twenty-six weeks ended	
	February 25, 2012	February 26, 2011	February 25, 2012	February 26, 2011
Net income	\$19,196	\$16,277	\$44,998	\$40,041
Allocation of net income for Basic:				
Common Stock	\$15,081	\$12,750	\$35,341	\$31,356
Class B Common Stock	3,765	3,218	8,832	7,921
Unvested participating shares	350	309	825	764
	\$19,196	\$16,277	\$44,998	\$40,041
Weighted average number of shares for Basic:				
Common Stock	14,873	14,778	14,856	14,766
Class B Common Stock	4,640	4,661	4,640	4,662
Unvested participating shares	394	408	396	410
	19,907	19,847	19,892	19,838
Earnings per share for Basic:				
Common Stock	\$1.01	\$0.86	\$2.38	\$2.12
Class B Common Stock	\$0.81	\$0.69	\$1.90	\$1.70

For diluted EPS, the Company is required to calculate diluted EPS for Common Stock using the more dilutive of the following two methods:

- The treasury stock method; or
- The two-class method assuming a participating security is not exercised or converted.

For the thirteen and twenty-six weeks ended February 25, 2012, the Company's diluted EPS assumes the conversion of all vested Class B Common Stock into Common Stock and uses the two-class method for its unvested participating shares as follows (in thousands, except per share data):

	Thirteen weeks ended February 25, 2012			Twenty-six weeks ended February 25, 2012		
	Earnings to Common shareholders	Common Shares	EPS	Earnings to Common shareholders	Common Shares	EPS
As reported - Basic	\$ 15,081	14,873	\$ 1.01	\$ 35,341	14,856	\$ 2.38
Add: effect of dilutive potential common shares						
Share-based awards	—	92	—	—	79	—
Class B Common Stock	3,765	4,640	—	8,832	4,640	—

Edgar Filing: UNIFIRST CORP - Form 10-Q

Add: Undistributed earnings allocated to unvested participating shares	337	—		799	—	
Less: Undistributed earnings reallocated to unvested participating shares	(320)	—		(759)	—	
Diluted EPS – Common Stock	\$ 18,863	19,605	\$ 0.96	\$ 44,213	19,575	\$ 2.26

Share-based awards that would result in the issuance of 17,454 and 16,369 shares of Common Stock were excluded from the calculation of diluted earnings per share for the thirteen and twenty-six weeks ended February 25, 2012, respectively, because they were anti-dilutive.

For the thirteen and twenty-six weeks ended February 26, 2011, the Company's diluted EPS assumes the conversion of all vested Class B Common Stock into Common Stock and uses the two-class method for its unvested participating shares as follows (in thousands, except per share data):

	Thirteen weeks ended February 26, 2011			Twenty-six weeks ended February 26, 2011		
	Earnings to Common shareholders	Common Shares	EPS	Earnings to Common shareholders	Common Shares	EPS
As reported - Basic	\$ 12,750	14,778	\$ 0.86	\$ 31,356	14,766	\$ 2.12
Add: effect of dilutive potential common shares						
Share-based awards	—	89		—	75	
Class B Common Stock	3,218	4,661		7,921	4,662	
Add: Undistributed earnings allocated to unvested participating shares	295	—		737	—	
Less: Undistributed earnings reallocated to unvested participating shares	(280)	—		(700)	—	
Diluted EPS – Common Stock	\$ 15,983	19,528	\$ 0.82	\$ 39,314	19,503	\$ 2.02

Share-based awards that would result in the issuance of 19,197 and 127,780 shares of Common Stock were excluded from the calculation of diluted earnings per share for the thirteen and twenty-six weeks ended February 26, 2011, respectively, because they were anti-dilutive.

8. Asset Retirement Obligations

The Company recognizes asset retirement obligations in the period in which they are incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived asset. The Company continues to depreciate, on a straight-line basis, the amount added to property, plant and equipment and recognizes accretion expense in connection with the discounted liability over the various remaining lives which range from approximately one to thirty-two years.

A reconciliation of the Company's asset retirement liability is as follows (in thousands):

	February 25, 2012
Beginning balance as of August 27, 2011	\$ 9,488
Accretion expense	316
Ending balance as of February 25, 2012	\$ 9,804

Asset retirement obligations are included in long-term accrued liabilities in the accompanying Consolidated Balance Sheet.

9. Commitments and Contingencies

The Company and its operations are subject to various federal, state and local laws and regulations governing, among other things, the generation, handling, storage, transportation, treatment and disposal of hazardous waste and other substances. In particular, industrial laundries use and must dispose of detergent waste water and other residues, and, in the past used perchloroethylene and other dry cleaning solvents. The Company is attentive to the environmental concerns surrounding the disposal of these materials and has, through the years, taken measures to avoid their improper disposal. In the past, the Company has settled, or contributed to the settlement of, actions or claims brought against the Company relating to the disposal of hazardous materials and there can be no assurance that the Company will not have to expend material amounts to remediate the consequences of any such disposal in the future.

US GAAP requires that a liability for contingencies be recorded when it is probable that a liability has occurred and the amount of the liability can be reasonably estimated. Significant judgment is required to determine the existence of a liability, as well as the amount to be recorded. The Company regularly consults with attorneys and outside consultants in its consideration of the relevant facts and circumstances before recording a contingent liability. Changes in enacted laws, regulatory orders or decrees, management's estimates of costs, insurance proceeds, participation by other parties, the timing of payments and the input of outside consultants and attorneys based on changing legal or factual circumstances could have a material impact on the amounts recorded for environmental and other contingent liabilities.

Under environmental laws, an owner or lessee of real estate may be liable for the costs of removal or remediation of certain hazardous or toxic substances located on, or in, or emanating from, such property, as well as related costs of investigation and property damage. Such laws often impose liability without regard to whether the owner or lessee knew of, or was responsible for the presence of such hazardous or toxic substances. There can be no assurances that acquired or leased locations have been operated in compliance with environmental laws and regulations or that future uses or conditions will not result in the imposition of liability upon the Company under such laws or expose the Company to third-party actions such as tort suits. The Company continues to address environmental conditions under terms of consent orders negotiated with the applicable environmental authorities or otherwise with respect to sites located in or related to Woburn, Massachusetts, Somerville, Massachusetts, Springfield, Massachusetts, Uvalde, Texas, Stockton, California, three sites related to former operations in Williamstown, Vermont, as well as sites located in Goldsboro, North Carolina, Wilmington, North Carolina and Landover, Maryland.

The Company has accrued certain costs related to the sites described above as it has been determined that the costs are probable and can be reasonably estimated. The Company continues to implement mitigation measures and to monitor environmental conditions at the Somerville, Massachusetts site. The Company also has potential exposure related to an additional parcel of land (the "Central Area") related to the Woburn, Massachusetts site discussed above. Currently, the consent decree for the Woburn site does not define or require any remediation work in the Central Area. The United States Environmental Protection Agency (the "EPA") has provided the Company and other signatories to the consent decree with comments on the design and implementation of groundwater and soil remedies at the Woburn site and investigation of environmental conditions in the Central Area. The Company, and other signatories, have implemented and proposed to do additional work at the Woburn site but many of the EPA's comments remain to be resolved. The Company has accrued costs to perform certain work responsive to EPA's comments. In addition, in April 2011, the Company received a request from the EPA under the Clean Air Act for information regarding its handling of and operations with respect to the laundering of soiled towels. The Company has responded to this request.

The Company routinely reviews and evaluates sites that may require remediation and monitoring and determines its estimated costs based on various estimates and assumptions. These estimates are developed using its internal sources or by third party environmental engineers or other service providers. Internally developed estimates are based on:

- Management's judgment and experience in remediating and monitoring the Company's sites;
- Information available from regulatory agencies as to costs of remediation and monitoring;
- The number, financial resources and relative degree of responsibility of other potentially responsible parties (PRPs) who may be liable for remediation and monitoring of a specific site; and
- The typical allocation of costs among PRPs.

There is usually a range of reasonable estimates of the costs associated with each site. The Company's accruals reflect the amount within the range that constitutes its best estimate. Where it believes that both the amount of a particular liability and the timing of the payments are reliably determinable, the Company adjusts the cost in current dollars using a rate of 3% for inflation until the time of expected payment and discounts the cost to present value using current risk-free interest rates. As of February 25, 2012, the risk-free interest rates utilized by the Company ranged from 2.0% to 3.1%.

For environmental liabilities that have been discounted, the Company includes interest accretion, based on the effective interest method, in selling and administrative expenses on the Consolidated Statements of Income. The changes to the Company's environmental liabilities for the twenty-six weeks ended February 25, 2012 are as follows (in thousands):

	February 25, 2012
Beginning balance as of August 27, 2011	\$ 18,368
Costs incurred for which reserves have been provided	(694)
Insurance proceeds received	137
Interest accretion	316
Change in discount rates	760

Edgar Filing: UNIFIRST CORP - Form 10-Q

Balance as of February 25, 2012 \$ 18,887

Anticipated payments and insurance proceeds of currently identified environmental remediation liabilities as of February 25, 2012, for the next five fiscal years and thereafter, as measured in current dollars, are reflected below.

(In thousands)	2012	2013	2014	2015	2016	Thereafter	Total
Estimated costs – current dollars	\$ 3,641	\$ 2,366	\$ 1,766	\$ 919	\$ 766	\$ 12,386	\$ 21,844
Estimated insurance proceeds	(22)	(173)	(159)	(173)	(159)	(1,893)	(2,579)
Net anticipated costs	\$ 3,619	\$ 2,193	\$ 1,607	\$ 746	\$ 607	\$ 10,493	\$ 19,265
Effect of inflation							7,301
Effect of discounting							(7,679)
Balance as of February 25, 2012							\$ 18,887

Estimated insurance proceeds are primarily received from an annuity received as part of a legal settlement with an insurance company. Annual proceeds of approximately \$0.3 million are deposited into an escrow account which funds remediation and monitoring costs for three sites related to former operations in Williamstown, Vermont. Annual proceeds received but not expended in the current year accumulate in this account and may be used in future years for costs related to this site through the year 2027. As of February 25, 2012, the balance in this escrow account, which is held in a trust and is not recorded in the Company's Consolidated Balance Sheet, was approximately \$3.0 million. Also included in estimated insurance proceeds are amounts the Company is entitled to receive pursuant to legal settlements as reimbursements from three insurance companies for estimated costs at the site in Uvalde, Texas.

The Company's nuclear garment decontamination facilities are licensed by the Nuclear Regulatory Commission ("NRC"), or, in certain cases, by the applicable state agency, and are subject to regulation by federal, state and local authorities. There can be no assurance that such regulation will not lead to material disruptions in the Company's garment decontamination business.

From time to time, the Company is also subject to legal proceedings and claims arising from the conduct of its business operations, including litigation related to charges for certain ancillary services on invoices, personal injury claims, customer contract matters, employment claims and environmental matters as described above.

While it is impossible to ascertain the ultimate legal and financial liability with respect to contingent liabilities, including lawsuits and environmental contingencies, the Company believes that the aggregate amount of such liabilities, if any, in excess of amounts accrued or covered by insurance, will not have a material adverse effect on the consolidated financial position and/or results of operations of the Company. It is possible, however, that future financial position or results of operations for any particular period could be materially affected by changes in the Company's assumptions or strategies related to these contingencies or changes out of the Company's control.

10. Income Taxes

The Company's effective income tax rate was 38.3% for both the thirteen and twenty-six weeks ended February 25, 2012 as compared to 38.2% and 37.5% for the thirteen and twenty-six weeks ended February 26, 2011, respectively. The increase in the effective income tax rate for the twenty-six weeks ended February 25, 2012 was due to the fact that the 2011 rate benefited from the reversal of tax contingency reserves related to the resolution of certain

state tax audits. The Company recognizes interest and penalties related to uncertain tax positions as a component of income tax expense which is consistent with the recognition of these items in prior reporting periods. During the twenty-six weeks ended February 25, 2012, there were no material changes in the amount of unrecognized tax benefits or the amount accrued for interest and penalties.

U.S. and Canadian federal income tax statutes have lapsed for filings up to and including fiscal years 2007 and 2004, respectively. With a few exceptions, the Company is no longer subject to state and local income tax examinations for periods prior to fiscal 2006. The Company is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change significantly in the next 12 months.

11. Long-Term Debt

On May 5, 2011, the Company entered into a \$250.0 million unsecured revolving credit agreement (the "Credit Agreement") with a syndicate of banks, which matures on May 4, 2016. Under the Credit Agreement, the Company is able to borrow funds at variable interest rates based on, at the Company's election, the Eurodollar rate or a base rate, plus in each case a spread based on the Company's consolidated funded debt ratio. Availability of credit requires compliance with certain financial and other covenants, including a maximum consolidated funded debt ratio and minimum consolidated interest coverage ratio as defined in the Credit Agreement. The Company tests its compliance with these financial covenants on a fiscal quarterly basis. At February 25, 2012, the interest rates applicable to the Company's borrowings under the Credit Agreement would be calculated as LIBOR plus 100 basis points at the time of the respective borrowing. As of February 25, 2012, the Company had no outstanding borrowings, letters of credit amounting to \$43.2 million and \$206.8 million available for borrowing under the Credit Agreement.

Prior to May 5, 2011, the Company had a \$225.0 million unsecured revolving credit agreement (the "Prior Credit Agreement") with a syndicate of banks, which was scheduled to mature on September 13, 2011. In connection with the Company's entry into the Credit Agreement, the Company terminated the Prior Credit Agreement.

On September 14, 2006, the Company issued \$100.0 million of floating rates notes ("Floating Rate Notes") pursuant to a Note Purchase Agreement ("2006 Note Agreement"). The Floating Rate Notes mature on September 14, 2013, bear interest at LIBOR plus 50 basis points and may be repaid at face value two years from the date of issuance.

As of February 25, 2012, the Company was in compliance with all covenants under the Credit Agreement and the 2006 Note Agreement.

12. Other Comprehensive Income

The components of other comprehensive income are as follows (in thousands):

	Thirteen weeks ended		Twenty-six weeks ended	
	February	February	February	February
	25,	26,	25,	26,
	2012	2011	2012	2011
Net income	\$ 19,196	\$ 16,277	\$ 44,998	\$ 40,041
Other comprehensive income, net of tax:				
Foreign currency translation adjustments	5,088	3,907	(2,310)	6,798
Interest rate swap	—	461	—	917
Comprehensive income	\$ 24,284	\$ 20,645	\$ 42,688	\$ 47,756

13. Segment Reporting

Operating segments are identified as components of an enterprise for which separate discrete financial information is available for evaluation by the chief operating decision-maker, or decision-making group, in making decisions on how to allocate resources and assess performance. The Company's chief operating decision maker is the Company's chief executive officer. The Company has six operating segments based on the information reviewed by its chief executive officer: US Rental and Cleaning, Canadian Rental and Cleaning, Manufacturing ("MFG"), Corporate, Specialty Garments Rental and Cleaning ("Specialty Garments") and First Aid. The US Rental and Cleaning and Canadian Rental and Cleaning operating segments have been combined to form the US and Canadian Rental and Cleaning reporting segment, and as a result, the Company has five reporting segments.

The US and Canadian Rental and Cleaning reporting segment purchases, rents, cleans, delivers and sells, uniforms and protective clothing and non-garment items in the United States and Canada. The laundry locations of the US and Canadian Rental and Cleaning reporting segment are referred to by the Company as "industrial laundries" or "industrial laundry locations."

The MFG operating segment designs and manufactures uniforms and non-garment items solely for the purpose of providing these goods to the US and Canadian Rental and Cleaning reporting segment. MFG revenues are generated when goods are shipped from the Company's manufacturing facilities, or its subcontract manufacturers, to other Company locations. These revenues are recorded at a transfer price which is typically in excess of the actual manufacturing cost. Products are carried in inventory and subsequently placed in service and amortized at this transfer price. On a consolidated basis, intercompany revenues and income are eliminated and the carrying value of inventories and rental merchandise in service is reduced to the manufacturing cost. Income before income taxes from MFG net of the intercompany MFG elimination offsets the merchandise amortization costs incurred by the US and Canadian Rental and Cleaning reporting segment as the merchandise costs of this reporting segment are amortized and recognized based on inventories purchased from MFG at the transfer price which is above the Company's manufacturing cost.

The Corporate operating segment consists of costs associated with the Company's distribution center, sales and marketing, information systems, engineering, materials management, manufacturing planning, finance, budgeting, human resources, other general and administrative costs and interest expense. The revenues generated from the Corporate operating segment represent certain direct sales made by the Company directly from its distribution center. The products sold by this operating segment are the same products rented and sold by the US and Canadian Rental and Cleaning reporting segment. In the table below, no assets or capital expenditures are presented for the Corporate operating segment because no assets are allocated to this operating segment in the information reviewed by the chief executive officer. However, depreciation and amortization expense related to certain assets are reflected in income from operations and income before income taxes for the Corporate operating segment. The assets that give rise to this depreciation and amortization are included in the total assets of the US and Canadian Rental and Cleaning reporting segment as this is how they are tracked and reviewed by the Company. The majority of expenses accounted for within the Corporate segment relate to costs of the US and Canadian Rental and Cleaning segment, with the remainder of the costs relating to the Specialty Garment and First Aid segments.

The Specialty Garments operating segment purchases, rents, cleans, delivers and sells, specialty garments and non-garment items primarily for nuclear and cleanroom applications. The First Aid operating segment sells first aid cabinet services and other safety supplies.

The Company refers to the US and Canadian Rental and Cleaning, MFG, and Corporate reporting segments combined as its "core laundry operations," which is included as a subtotal in the following tables (in thousands):

Edgar Filing: UNIFIRST CORP - Form 10-Q

14. Subsequent Events

On March 27, 2012, the Company entered into a settlement related to environmental litigation. As a result of the settlement, the Company expects to recognize a pre-tax gain in its fiscal third quarter of approximately \$6.7 million. Such gain consists of contingent amounts previously received but not recognized into income as well as amounts that the Company expects to receive in the third quarter.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SAFE HARBOR FOR FORWARD LOOKING STATEMENTS

This Quarterly Report on Form 10-Q and any documents incorporated by reference contain forward looking statements within the meaning of the federal securities laws. Forward looking statements contained in this Quarterly Report on Form 10-Q and any documents incorporated by reference are subject to the safe harbor created by the Private Securities Litigation Reform Act of 1995. Forward looking statements may be identified by words such as "estimates," "anticipates," "projects," "plans," "expects," "intends," "believes," "seeks," "could," "should," "may," "will," or variations thereof, and similar expressions and by the context in which they are used. Such forward looking statements are based upon our current expectations and speak only as of the date made. Such statements are highly dependent upon a variety of risks, uncertainties and other important factors that could cause actual results to differ materially from those reflected in such forward looking statements. Such factors include, but are not limited to, uncertainties caused by the continuing adverse worldwide economic conditions, uncertainties regarding our ability to consummate and successfully integrate acquired businesses, uncertainties regarding any existing or newly-discovered expenses and liabilities related to environmental compliance and remediation, our ability to compete successfully without any significant degradation in our margin rates, seasonal fluctuations in business levels, our ability to preserve positive labor relationships and avoid becoming the target of corporate labor unionization campaigns that could disrupt our business, the effect of currency fluctuations on our results of operations and financial condition, our dependence on third parties to supply us with raw materials, any loss of key management or other personnel, increased costs as a result of any future changes in federal or state laws, rules and regulations or governmental interpretation of such laws, rules and regulations, uncertainties regarding the price levels of natural gas, electricity, fuel and labor, the impact of adverse economic conditions and the current tight credit markets on our customers and such customers' workforces, the level and duration of workforce reductions by our customers, the continuing increase in domestic healthcare costs, demand and prices for our products and services, rampant criminal activity and instability in Mexico where our principal garment manufacturing plants are located, additional professional and internal costs necessary for compliance with recent and proposed future changes in Securities and Exchange Commission, New York Stock Exchange and accounting rules, strikes and unemployment levels, our efforts to evaluate and potentially reduce internal costs, economic and other developments associated with the war on terrorism and its impact on the economy, general economic conditions and other factors described under "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended August 27, 2011 and in other filings with the Securities and Exchange Commission. We undertake no obligation to update any forward looking statements to reflect events or circumstances arising after the date on which such statements are made.

Business Overview

UniFirst Corporation, together with its subsidiaries, hereunder referred to as "we", "our", the "Company", or "UniFirst", is one of the largest providers of workplace uniforms and protective clothing in the United States. We design, manufacture, personalize, rent, clean, deliver, and sell a wide range of uniforms and protective clothing, including shirts, pants, jackets, coveralls, lab coats, smocks, aprons and specialized protective wear, such as flame resistant and high visibility garments. We also rent industrial wiping products, floor mats, facility service products and other non-garment items, and provide first aid cabinet services and other safety supplies, to a variety of manufacturers, retailers and service companies.

We serve businesses of all sizes in numerous industry categories. Typical customers include automobile service centers and dealers, delivery services, food and general merchandise retailers, food processors and service operations, light manufacturers, maintenance facilities, restaurants, service companies, soft and durable goods wholesalers, transportation companies, and others who require employee clothing for image, identification, protection or utility

purposes. We also provide our customers with restroom supplies, including air fresheners, paper products and hand soaps.

At certain specialized facilities, we also decontaminate and clean work clothes that may have been exposed to radioactive materials and service special cleanroom protective wear. Typical customers for these specialized services include government agencies, research and development laboratories, high technology companies and utilities operating nuclear reactors.

We continue to expand into additional geographic markets through acquisitions and organic growth. We currently service over 240,000 customer locations in the United States, Canada and Europe from 214 customer service, distribution and manufacturing facilities.

As discussed and described in Note 13 to the Consolidated Financial Statements, we have five reporting segments: US and Canadian Rental and Cleaning, Manufacturing (“MFG”), Corporate, Specialty Garments Rental and Cleaning (“Specialty Garments”) and First Aid. We refer to the laundry locations of the US and Canadian Rental and Cleaning reporting segment as “industrial laundries” or “industrial laundry locations”, and to the US and Canadian Rental and Cleaning, MFG, and Corporate reporting segments combined as our “core laundry operations.”

Critical Accounting Policies and Estimates

The discussion of our financial condition and results of operations is based upon the Consolidated Financial Statements, which have been prepared in conformity with United States generally accepted accounting principles (“US GAAP”). As such, management is required to make certain estimates, judgments and assumptions that are believed to be reasonable based on the information available. These estimates and assumptions affect the reported amount of assets and liabilities, revenues and expenses, and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, the most important and pervasive accounting policies used and areas most sensitive to material changes from external factors. See Note 1 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended August 27, 2011 for additional discussion of the application of these and other accounting policies.

Results of Operations

The following table presents certain selected financial data, including the percentage of revenues represented by each item, for the thirteen and twenty-six weeks ended February 25, 2012 and the thirteen and twenty-six weeks ended February 26, 2011. Cost of revenues presented in the table below include merchandise costs related to the amortization of rental merchandise in service and direct sales as well as labor and other production, service and delivery costs associated with operating our industrial laundries, Specialty Garments facilities, First Aid locations and our distribution center. Selling and administrative costs include costs related to our sales and marketing functions as well as general and administrative costs associated with our corporate offices and operating locations including information systems, engineering, materials management, manufacturing planning, finance, budgeting, and human resources.

(1) Exclusive of depreciation on our property, plant and equipment and amortization on our intangible assets.

General

We derive our revenues through the design, manufacture, personalization, rental, cleaning, delivering, and selling of a wide range of uniforms and protective clothing, including shirts, pants, jackets, coveralls, lab coats, smocks and aprons and specialized protective wear, such as flame resistant and high visibility garments. We also rent industrial wiping products, floor mats, facility service products, other non-garment items, and provide first aid cabinet services and other safety supplies, to a variety of manufacturers, retailers and service companies. We have five reporting segments: US and Canadian Rental and Cleaning, Manufacturing (“MFG”), Corporate, Specialty Garments Rental and Cleaning (“Specialty Garments”) and First Aid. We refer to the US and Canadian Rental and Cleaning, MFG, and Corporate reporting segments combined as our “core laundry operations.”

Cost of revenues includes merchandise costs related to the amortization of rental merchandise in service and direct sales as well as labor and other production, service and delivery costs, and distribution costs associated with operating our core laundry operations, Specialty Garments facilities, and First Aid locations. Selling and administrative costs include costs related to our sales and marketing functions as well as general and administrative costs associated with our corporate offices and operating locations including information systems, engineering, materials management, manufacturing planning, finance, budgeting, and human resources.

As part of our recent revenue growth, we have been experiencing increased merchandise costs. This increase has been primarily due to our increased investment in merchandise to the levels needed to support our growing wearer base. During fiscal 2009 and early fiscal 2010, our results of operations benefited from our utilization of used

garments that our customers returned to us as a result of reductions in their workforces. Since fiscal 2010, we have put significantly more new garments into service to meet the day-to-day needs of our existing wearer base. In addition, increased new account sales, including some larger national accounts, have also required us to make a large initial investment in merchandise. The increased merchandise cost is also the result of strong growth in our flame resistant and high visibility product lines. This growth is the result of increased oil and natural gas exploration as well as tighter regulations that have caused uniform wearers in a number of industries to convert to these more protective garments. In addition to a higher number of new garments being placed in service to support our customer base, we have also been impacted by higher fabric prices in our overall merchandise costs. We expect the increase in merchandise costs to continue throughout fiscal 2012, which will have a negative effect on our margins throughout this period.

The price of fuel and energy needed to run our vehicles and equipment is unpredictable and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by OPEC and other oil and gas producers, war and unrest in oil producing countries, regional production patterns, limits on refining capacities, natural disasters and environmental concerns. As discussed below, the recent increases in fuel costs have had a negative impact on our delivery and production costs. Further increases in fuel costs could impact our results going forward.

The current worldwide economic weakness and uncertainty as well as high unemployment rates in the U.S. and Canada may negatively impact our revenues and operating performance in fiscal 2012 and beyond due to the impact on spending plans and employment levels of our customers and sales prospects.

On March 27, 2012, we entered into a settlement related to environmental litigation. As a result of the settlement, we expect to recognize a pre-tax gain in our fiscal third quarter of approximately \$6.7 million. Such gain consists of contingent amounts previously received but not recognized into income as well as amounts that we expect to receive in the third quarter. We anticipate this gain will positively impact our third quarter earnings by approximately \$0.21 per diluted common share.

Thirteen weeks ended February 25, 2012 compared with thirteen weeks ended February 26, 2011

Revenues

(In thousands, except percentages)	February 25, 2012	February 26, 2011	Dollar Change	Percent Change
Core Laundry Operations	\$ 277,247	\$ 246,868	\$ 30,379	12.3 %
Specialty Garments	23,501	23,516	(15)	-0.1
First Aid	9,211	8,211	1,000	12.2
Consolidated total	\$ 309,959	\$ 278,595	\$ 31,364	11.3 %

For the thirteen weeks ended February 25, 2012, our consolidated revenues increased by \$31.4 million from the comparable period in fiscal 2011, or 11.3%. This increase was primarily driven by a \$30.4 million increase in revenues in our core laundry operations. Core laundry revenues increased to \$277.2 million for the thirteen weeks ended February 25, 2012 from \$246.9 million for the comparable period of 2011, or 12.3%. This increase was primarily attributable to positive organic growth of 11.2%. Organic growth is comprised of new sales, additions to our existing customer base and price increases, offset by lost accounts and reductions to our existing customer base. Our positive organic growth rate in our core laundry operations was accompanied by positive acquisition related growth of 1.2% offset by the effect of unfavorable fluctuations in the Canadian foreign exchange rate, which accounted for a 0.1% decrease in revenue for the thirteen weeks ended February 25, 2012 compared to the same period in fiscal 2011.

Specialty Garments' revenues were \$23.5 million for both the second quarter of fiscal 2012 and fiscal 2011. First Aid revenues increased by \$1.0 million, or 12.2%, for the thirteen weeks ended February 25, 2012 as compared to the same period in fiscal 2011 as a result of better performance from the segment's wholesale distribution and pill packaging operations.

Cost of Revenues

Cost of revenues increased as a percentage of revenues from 63.3%, or \$176.2 million, for the thirteen weeks ended February 26, 2011, to 65.0%, or \$201.4 million, for the thirteen weeks ended February 25, 2012. This increase was primarily the result of an increase in overall merchandise costs as a percentage of revenues in our core laundry operations. These higher costs were partially offset by lower payroll, energy and other production costs as a percentage of revenues in our core laundry operations, primarily due to the strong revenue growth this segment experienced in the thirteen weeks ended February 25, 2012.

Selling and Administrative Expense

Our selling and administrative expense decreased as a percentage of revenues to 19.7%, or \$61.2 million, for the thirteen weeks ended February 25, 2012, from 21.0%, or \$58.6 million, for the thirteen weeks ended February 26, 2011. This decrease was primarily due to lower payroll, payroll-related and other general and administrative costs as a percentage of revenues primarily due to the strong revenue growth we experienced in the thirteen weeks ended February 25, 2012.

Depreciation and Amortization

Edgar Filing: UNIFIRST CORP - Form 10-Q

Our depreciation and amortization expense was \$16.5 million, or 5.3% of revenues, for the thirteen weeks ended February 25, 2012 compared to \$16.1 million, or 5.8% of revenues, for the thirteen weeks ended February 26, 2011. Depreciation and amortization expense increased due to capital expenditure and acquisition activity in earlier periods but decreased as a percentage of revenues due to the strong revenue growth we experienced in the thirteen week ended February 25, 2012.

Income from Operations

For the thirteen weeks ended February 25, 2012 and February 26, 2011, changes in our revenues and costs as discussed above resulted in the following changes in our income from operations:

(In thousands, except percentages)	February 25, 2012	February 26, 2011	Dollar Change	Percent Change
Core Laundry Operations	\$ 27,449	\$ 23,078	\$ 4,371	18.9 %
Specialty Garments	2,576	3,728	(1,152)	-30.9
First Aid	811	867	(56)	-6.4
Consolidated total	\$ 30,836	\$ 27,673	\$ 3,163	11.4 %

Other (Income) expense

Other (income) expense, which includes interest expense, interest income and foreign currency exchange (gain) loss, reflected income of \$0.3 million for the thirteen weeks ended February 25, 2012, as compared to expense of \$1.3 million for the thirteen weeks ended February 26, 2011. The decrease was due to net interest expense in the thirteen weeks ended February 26, 2011 of \$1.5 million compared to net interest income of \$0.2 million in the thirteen weeks ended February 25, 2012. This decrease was primarily due to our repayment of \$75.0 million in fixed-rate notes in June 2011 as well as the effect of an interest rate swap that matured in March 2011.

Provision for Income Taxes

Our effective income tax rate was 38.3% for the thirteen weeks ended February 25, 2012, which was relatively consistent with the comparable period in 2011 when our effective tax rate was 38.2%.

Twenty-six weeks ended February 25, 2012 compared with twenty-six weeks ended February 26, 2011

Revenues

(In thousands, except percentages)	February 25, 2012	February 26, 2011	Dollar Change	Percent Change
Core Laundry Operations	\$ 549,520	\$ 485,559	\$ 63,961	13.2 %
Specialty Garments	53,769	49,327	4,442	9.0
First Aid	19,695	16,799	2,896	17.2
Consolidated total	\$ 622,984	\$ 551,685	\$ 71,299	12.9 %

For the twenty-six weeks ended February 25, 2012, our consolidated revenues increased by \$71.3 million from the comparable period in fiscal 2011, or 12.9%. The consolidated increase was primarily driven by a \$64.0 million increase in our core laundry segments. Core laundry operations' revenues increased to \$549.5 million for the twenty-six weeks ended February 25, 2012 from \$485.6 million for the comparable period of fiscal 2011, an increase of 13.2%. The increase in our core laundry operations was primarily driven by organic growth of 11.6%, which is

comprised of new sales, additions to our existing customer base and price increases offset by lost accounts and reductions to our existing customer base. In addition, we benefited from acquisition-related growth which accounted for an increase in revenue of 1.6% for the twenty-six weeks ended February 25, 2012.

Specialty Garments' revenues increased to \$53.8 million in the twenty-six weeks ended February 25, 2012 from \$49.3 million in the comparable period of 2011, an increase of 9.0%. The increase in this segment's revenues was primarily related to the timing and length of our customers' power reactor outages in the U.S. and Canadian markets, increased project-based revenues, as well as a strong performance from the segment's European and clean room operations. First Aid revenues increased by \$2.9 million, or 17.2%, in the twenty-six weeks ended February 25, 2012 as compared with the same period in fiscal 2011 as a result of better performance from the segment's wholesale distribution and pill packaging operations.

Cost of Revenues

Cost of revenues increased from \$339.5 million, or 61.5% of revenues, for the twenty-six weeks ended February 26, 2011 to \$396.6 million, or 63.7% of revenues, for the twenty-six weeks ended February 25, 2012. This increase was primarily the result of an increase in overall merchandise costs as a percentage of revenues in our core laundry operations as well as higher fuel costs as a percentage of revenues associated with operating our fleet of delivery trucks. These increases were partially offset by lower payroll, payroll-related and other production costs as a percentage of revenues, primarily due to the strong revenue growth the core laundry operations segment experienced in the twenty-six weeks ended February 25, 2012.

Selling and Administrative Expense

Our selling and administrative expenses decreased to 19.3% of revenues, or \$120.3 million, for the twenty-six weeks ended February 25, 2012 from 20.6% of revenues, or \$113.8 million, for the twenty-six weeks ended February 26, 2011. This decrease was due to lower payroll and payroll-related costs as a percentage of revenues, primarily due to the strong revenue growth we experienced in the twenty-six weeks ended February 25, 2012. In the twenty-six weeks ended February 25, 2012, we recorded a charge of \$0.8 million related to the effect of discount rate fluctuations on the value of our environmental liabilities, which was offset by environmental insurance recoveries totaling \$1.4 million. In the twenty-six weeks ended February 26, 2011, we recorded a benefit of \$1.3 million related to the effect of discount rate fluctuations on the value of our environmental liabilities.

Depreciation and Amortization

Our depreciation and amortization expense was \$32.9 million, or 5.3% of revenues, for the twenty-six weeks ended February 25, 2012 compared to \$31.6 million, or 5.7% of revenues, for the twenty-six weeks ended February 26, 2011. Depreciation and amortization expense increased due to capital expenditure and acquisition activity in earlier periods but decreased as a percentage of revenues due to strong revenue growth we experienced in the twenty-six weeks ended February 25, 2012.

Income from Operations

For the twenty-six weeks ended February 25, 2012 and February 26, 2011, the revenue growth in our operations, as well as the change in our costs as discussed above, resulted in the following changes in our income from operations:

(In thousands, except percentages)	February 25, 2012	February 26, 2011	Dollar Change	Percent Change
Core Laundry Operations	\$ 62,431	\$ 57,492	\$ 4,939	8.6 %
Specialty Garments	9,142	7,757	1,385	17.9

Edgar Filing: UNIFIRST CORP - Form 10-Q

First Aid	1,617	1,594	23	1.5
Consolidated total	\$ 73,190	\$ 66,843	\$ 6,347	9.5 %

Other (Income) expense

Other (income) expense, which includes interest expense, interest income and foreign currency exchange (gain) loss, was \$0.3 million for the twenty-six weeks ended February 25, 2012 as compared with \$2.8 million for the twenty-six weeks ended February 26, 2011. The decrease was primarily due to net interest expense in the twenty-six weeks ended February 26, 2011 of \$3.2 million compared to net interest income of \$0.3 million in the twenty-six weeks ended February 25, 2012. This decrease was primarily due to our repayment of \$75.0 million in fixed-rate notes in June 2011 as well as the effect of an interest rate swap that matured in March 2011. The benefit related to lower net interest expense was partially offset by foreign exchange losses of \$0.6 million in the first six months of fiscal 2012 compared to foreign exchange gains of \$0.4 million in the comparable period of fiscal 2011.

Provision for Income Taxes

Our effective income tax rate was 38.3% for the twenty-six weeks ended February 25, 2012, as compared to 37.5% for the twenty-six weeks ended February 26, 2011. Our tax rate in the twenty-six weeks ended February 25, 2012 was higher than the comparable period of 2011 primarily due to the fact that the 2011 rate benefited from the reversal of tax contingency reserves related to the resolution of certain state tax audits.

Liquidity and Capital Resources

General

As of February 25, 2012, we had cash and cash equivalents of \$59.3 million and working capital of \$291.6 million. We believe that current cash and cash equivalent balances and cash generated from operations and amounts available under our Credit Agreement (defined below) will be sufficient to meet our currently anticipated working capital and capital expenditure requirements for at least the next 12 months.

Sources and Uses of Cash

During the twenty-six weeks ended February 25, 2012, we generated cash from operating activities of \$60.4 million resulting primarily from net income of \$45.0 million, net of non-cash amounts charged for depreciation, amortization and accretion of \$33.6 million and share-based compensation of \$3.7 million. We also generated cash as a result of decreases in prepaid taxes of \$4.4 million and increases in accruals of \$1.9 million. These inflows were partially offset by increases in accounts receivable of \$11.7 million, increases in rental merchandise in service of \$10.2 million, increases in prepaid expenses of \$3.2 million, decreases in accounts payable of \$1.7 million and increases in inventories of \$1.3 million. We used cash to, among other things, invest \$34.3 million in capital expenditures and pay down debt in the amount of approximately \$15.4 million.

We have accumulated \$49.0 million in cash outside the United States that is expected to be invested indefinitely outside the United States. If these funds were distributed to the U.S. in the form of dividends, the Company would be subject to additional U.S. income taxes.

Long-Term Debt and Borrowing Capacity

On May 5, 2011, we entered into a \$250.0 million unsecured revolving credit agreement (the "Credit Agreement") with a syndicate of banks, which matures on May 4, 2016. Under the Credit Agreement, we are able to borrow funds at variable interest rates based on, at our election, the Eurodollar rate or a base rate, plus in each case a spread based on our consolidated funded debt ratio. Availability of credit requires compliance with certain financial and other

covenants, including a maximum consolidated funded debt ratio and minimum consolidated interest coverage ratio as defined in the Credit Agreement. We test our compliance with these financial covenants on a fiscal quarterly basis. At February 25, 2012, the interest rates applicable to our borrowings under the Credit Agreement would be calculated as LIBOR plus 100 basis points at the time of the respective borrowing. As of February 25, 2012, we had no outstanding borrowings, letters of credit amounting to \$43.2 million and \$206.8 million available for borrowing under the Credit Agreement.

Prior to May 5, 2011, we had a \$225.0 million unsecured revolving credit agreement (the "Prior Credit Agreement") with a syndicate of banks, which was scheduled to mature on September 13, 2011. In connection with our entry into the Credit Agreement, we terminated the Prior Credit Agreement.

On September 14, 2006, we issued \$100.0 million of floating rates notes ("Floating Rate Notes") pursuant to a Note Purchase Agreement ("2006 Note Agreement"). The Floating Rate Notes mature on September 14, 2013, bear interest at LIBOR plus 50 basis points and may be repaid at face value two years from the date of issuance.

As of February 25, 2012, we were in compliance with all covenants under the Credit Agreement and the 2006 Note Agreement.

Commitments and Contingencies

We are subject to various federal, state and local laws and regulations governing, among other things, the generation, handling, storage, transportation, treatment and disposal of hazardous wastes and other substances. In particular, industrial laundries currently use and must dispose of detergent waste water and other residues, and, in the past, used perchloroethylene and other dry cleaning solvents. We are attentive to the environmental concerns surrounding the disposal of these materials and have, through the years, taken measures to avoid their improper disposal. Over the years, we have settled, or contributed to the settlement of, actions or claims brought against us relating to the disposal of hazardous materials and there can be no assurance that we will not have to expend material amounts to remediate the consequences of any such disposal in the future.

US GAAP requires that a liability for contingencies be recorded when it is probable that a liability has occurred and the amount of the liability can be reasonably estimated. Significant judgment is required to determine the existence of a liability, as well as the amount to be recorded. We regularly consult with attorneys and outside consultants in our consideration of the relevant facts and circumstances before recording a contingent liability. Changes in enacted laws, regulatory orders or decrees, management's estimates of costs, insurance proceeds, participation by other parties, the timing of payments and the input of outside consultants and attorneys based on changing legal or factual circumstances could have a material impact on the amounts recorded for environmental and other contingent liabilities.

Under environmental laws, an owner or lessee of real estate may be liable for the costs of removal or remediation of certain hazardous or toxic substances located on, or in, or emanating from such property, as well as related costs of investigation and property damage. Such laws often impose liability without regard to whether the owner or lessee knew of, or was responsible for, the presence of such hazardous or toxic substances. There can be no assurances that acquired or leased locations have been operated in compliance with environmental laws and regulations or that future uses or conditions will not result in the imposition of liability upon our Company under such laws or expose our Company to third party actions such as tort suits. We continue to address environmental conditions under terms of consent orders negotiated with the applicable environmental authorities or otherwise with respect to sites located in or related to Woburn, Massachusetts, Somerville, Massachusetts, Springfield, Massachusetts, Uvalde, Texas, Stockton, California, three sites in Williamstown, Vermont, as well as sites located in Goldsboro, North Carolina, Wilmington, North Carolina and Landover, Maryland.

We have accrued certain costs related to the sites described above as it has been determined that the costs are probable and can be reasonably estimated. We continue to implement mitigation measures and to monitor environmental conditions at the Somerville, Massachusetts site. We also have potential exposure related to an additional parcel of land (the “Central Area”) related to the Woburn, Massachusetts site discussed above. Currently, the consent decree for the Woburn site does not define or require any remediation work in the Central Area. The United States Environmental Protection Agency (the “EPA”) has provided us and other signatories to the consent decree with comments on the design and implementation of groundwater and soil remedies at the Woburn site and investigation of environmental conditions in the Central Area. We, and other signatories, have implemented and proposed to do additional work at the Woburn site but many of the EPA’s comments remain to be resolved. We have accrued costs to perform certain work responsive to EPA’s comments. In addition, in April 2011, we received a request from the EPA under the Clean Air Act for information regarding our handling of and operations with respect to the laundering of soiled towels. We have responded to this request.

We routinely review and evaluate sites that may require remediation and monitoring and determine our estimated costs based on various estimates and assumptions. These estimates are developed using our internal sources or by third-party environmental engineers or other service providers. Internally developed estimates are based on:

- Management’s judgment and experience in remediating and monitoring our sites;
- Information available from regulatory agencies as to costs of remediation and monitoring;
- The number, financial resources and relative degree of responsibility of other potentially responsible parties (PRPs) who may be liable for remediation and monitoring of a specific site; and
- The typical allocation of costs among PRPs.

There is usually a range of reasonable estimates of the costs associated with each site. Our accruals represent the amount within the range that constitutes our best estimate. When we believe that both the amount of a particular liability and the timing of the payments are reliably determinable, we adjust the cost in current dollars using a rate of 3% for inflation until the time of expected payment and discount the cost to present value using current risk-free interest rates. As of February 25, 2012, the risk-free interest rates we utilized ranged from 2.0% to 3.1%.

For environmental liabilities that have been discounted, we include interest accretion, based on the effective interest method, in selling and administrative expenses on the Consolidated Statements of Income. The changes to the amounts of our environmental liabilities for the thirteen weeks ended February 25, 2012 are as follows (in thousands):

	February 25, 2012
Beginning balance as of August 27, 2011	\$ 18,368
Costs incurred for which reserves have been provided	(694)
Insurance proceeds received	137
Interest accretion	316
Change in discount rates	760
Balance as of February 25, 2012	\$ 18,887

Edgar Filing: UNIFIRST CORP - Form 10-Q

Anticipated payments and insurance proceeds relating to currently identified environmental remediation liabilities as of February 25, 2012, for the next five fiscal years and thereafter, as measured in current dollars, are reflected below (in thousands).

Fiscal year ended August	2012	2013	2014	2015	2016	Thereafter	Total
Estimated costs – current dollars	\$ 3,641	\$ 2,366	\$ 1,766	\$ 919	\$ 766	\$ 12,386	\$ 21,844
Estimated insurance proceeds	(22)	(173)	(159)	(173)	(159)	(1,893)	(2,579)
Net anticipated costs	\$ 3,619	\$ 2,193	\$ 1,607	\$ 746	\$ 607	\$ 10,493	\$ 19,265
Effect of inflation							7,301
Effect of discounting							(7,679)
Balance as of February 25, 2012							\$ 18,887

Estimated insurance proceeds are primarily received from an annuity received as part of our legal settlement with an insurance company. Annual proceeds of approximately \$0.3 million are deposited into an escrow account which funds remediation and monitoring costs for three sites related to our former operations in Williamstown, Vermont. Annual proceeds received but not expended in the current year accumulate in this account and may be used in future years for costs related to this site through the year 2027. As of February 25, 2012, the balance in this escrow account, which is held in a trust and is not recorded in our Consolidated Balance Sheet, was approximately \$3.0 million. Also included in estimated insurance proceeds are amounts we are entitled to receive pursuant to legal settlements as reimbursements from three insurance companies for estimated costs at the site in Uvalde, Texas.

Our nuclear garment decontamination facilities are licensed by the Nuclear Regulatory Commission (“NRC”), or, in certain cases, by the applicable state agency, and are subject to regulation by federal, state and local authorities. There can be no assurance that such regulation will not lead to material disruptions in our garment decontamination business.

From time to time, we are also subject to legal proceedings and claims arising from the conduct of our business operations, including litigation related to charges for certain ancillary services on invoices, personal injury claims, customer contract matters, employment claims and environmental matters as described above.

While it is impossible for us to ascertain the ultimate legal and financial liability with respect to contingent liabilities, including lawsuits and environmental contingencies, we believe that the aggregate amount of such liabilities, if any, in excess of amounts we have accrued or covered by insurance, will not have a material adverse effect on our consolidated financial position or results of operations. It is possible, however, that future financial position and/or results of operations for any particular future period could be materially affected by changes in our assumptions or strategies related to these contingencies or changes out of our control.

Off-Balance Sheet Arrangements

As of February 25, 2012, we did not have any off-balance-sheet arrangements, as defined in Item 303(a)(4)(ii) of Securities and Exchange Commission Regulation S-K.

Seasonality

Historically, our revenues and operating results have varied from quarter to quarter and are expected to continue to fluctuate in the future. These fluctuations have been due to a number of factors, including: general economic conditions in our markets; the timing of acquisitions and of commencing start-up operations and related costs; our effectiveness in integrating acquired businesses and start-up operations; the timing of nuclear plant outages; capital expenditures; seasonal rental and purchasing patterns of our customers; and price changes in response to competitive factors. In addition, our operating results historically have been lower during the second and fourth fiscal quarters than during the other quarters of the fiscal year. The operating results for any historical quarter are not necessarily indicative of the results to be expected for an entire fiscal year or any other interim periods.

Effects of Inflation

In general, we believe that our results of operations are not dependent on moderate changes in the inflation rate. Historically, we have been able to manage the impacts of more significant changes in inflation rates through our customer relationships, customer agreements that generally provide for price increases consistent with the rate of inflation, and continued focus on improvements of operational productivity.

Energy Costs

Significant increases in energy costs, specifically with respect to natural gas and gasoline, can materially affect our results of operations and financial condition. The recent increases in fuel costs have had a negative impact on our delivery and production costs. Further increases in fuel costs could impact our results going forward.

Contractual Obligations and Other Commercial Commitments

As of February 25, 2012, there were no material changes in our contractual obligations that were disclosed in our Annual Report on Form 10-K for the year ended August 27, 2011.

Recent Accounting Pronouncements

In May 2011, the FASB issued updated accounting guidance to amend existing requirements for fair value measurements and disclosures. The guidance expands the disclosure requirements around fair value measurements categorized in Level 3 of the fair value hierarchy and requires disclosure of the level in the fair value hierarchy of items that are not measured at fair value but whose fair value must be disclosed. It also clarifies and expands upon existing requirements for fair value measurements of financial assets and liabilities as well as instruments classified in shareholders' equity. The guidance is effective for interim and annual financial periods beginning after December 15, 2011. We do not expect the adoption of this guidance to have a material impact on our Consolidated Financial Statements.

In June 2011, the FASB issued updated accounting guidance that improves the comparability, consistency, and transparency of financial reporting and increases the prominence of items reported in other comprehensive income by eliminating the option to present components of other comprehensive income as part of the statement of changes in shareholders' equity. The amendments to the existing standard require that all nonowner changes in shareholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The amendments to the existing standard do not change the current option for presenting components of other comprehensive income ("OCI") gross or net of the effect of income taxes, provided that such tax effects are presented in the statement in which OCI is presented or disclosed in the notes to the financial statements. Additionally, the standard does not affect the calculation or reporting of earnings per share. This guidance is effective for annual reporting periods, and any interim periods within those annual periods, that begin after December 15, 2011 and is to be applied retrospectively, with early adoption permitted. We do not expect the adoption of this guidance to have a material impact on our Consolidated Financial Statements.

In September 2011, the FASB issued updated guidance intended to simplify how entities, both public and nonpublic, test for goodwill and impairment. This guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. Also, the guidance improves the examples of events and circumstances that an entity having a reporting unit with a zero or negative carrying amount should consider in determining whether to measure an impairment loss, if any, under the second step of the goodwill impairment test. This guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, with early adoption permitted. We do not expect the adoption of this guidance to have a material impact on our Consolidated Financial Statements.

In September 2011, the FASB issued updated guidance applicable to nongovernmental employers that participate in multiemployer pension and other postretirement benefit plans. The revised accounting rules will require enhanced disclosures relating to an employer's participation in a multiemployer pension plan, but more limited disclosures for multiemployer plans that provide postretirement benefits other than pensions. This guidance is effective for fiscal years ending after December 15, 2011, with early adoption permitted. We do not expect the adoption of this guidance to have a material impact on our Consolidated Financial Statements.

In December 2011, the FASB issued updated guidance that requires companies with financial instruments and derivative instruments that are offset on the balance sheet or subject to a master netting arrangement to provide additional disclosures regarding the instrument's impact on a company's financial position. This guidance is effective for interim and annual fiscal periods beginning on or after January 1, 2013. We do not expect the adoption of this guidance to have a material impact on our Consolidated Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Risk

We have determined that all of our foreign subsidiaries operate primarily in local currencies that represent the functional currencies of such subsidiaries. All assets and liabilities of our foreign subsidiaries are translated into U.S. dollars using the exchange rate prevailing at the balance sheet date. The effects of exchange rate fluctuations on the translation of assets and liabilities are recorded as a component of shareholders' equity. Revenues and expenses are translated at the average exchange rates in effect during each month of the fiscal year. As such, our financial condition and operating results are affected by fluctuations in the value of the U.S. dollar as compared to currencies in foreign countries. Revenues denominated in currencies other than the U.S. dollar represented approximately 9% of total consolidated revenues for both the thirteen and twenty-six weeks ended February 25, 2012, and total assets denominated in currencies other than the U.S. dollar represented approximately 11% of total consolidated assets at both February 25, 2012 and August 27, 2011. If exchange rates had increased or decreased by 10% from the actual rates in effect during the thirteen and twenty-six weeks ended and as of February 25, 2012, our revenues would have increased or decreased by approximately \$2.7 million and \$5.5 million, respectively, and assets as of February 25, 2012 would have increased or decreased by approximately \$12.9 million.

We do not operate a hedging program to mitigate the effect of a significant change in the value of our foreign subsidiaries functional currencies, which include the Canadian Dollar, Euro, British Pound, and Mexican Peso, as compared to the U.S. dollar. Any gains or losses resulting from foreign currency transactions, including exchange rate fluctuations on intercompany accounts are reported as transaction (gains) losses in our other expense (income). The intercompany payables and receivables are denominated in Canadian Dollars, Euros, British Pounds and Mexican Pesos. During the thirteen and twenty-six weeks ended February 25, 2012, transaction (gains) losses included in other (income) expense were approximately \$(0.1) million and \$0.6 million, respectively. If the exchange rates had increased or decreased by 10% during both the thirteen and twenty-six weeks ended February 25, 2012, we would have recognized exchange gains or losses of approximately \$0.9 million.

Interest Rate Sensitivity

We are exposed to market risk from changes in interest rates which may adversely affect our financial position, results of operations and cash flows. In seeking to minimize the risks from interest rate fluctuations, we manage these exposures through our regular operating and financing activities. We are exposed to interest rate risk primarily through our borrowings under our Credit Agreement with a syndicate of banks and our Floating Rate Notes which were purchased by a group of insurance companies pursuant to the 2006 Note Agreement. Under both agreements, we borrow funds at variable interest rates based on the Eurodollar rate or LIBOR rates. If the LIBOR and Eurodollar rates fluctuated by 10% from the actual rates in effect during the thirteen and twenty-six weeks ended February 25, 2012, our interest expense would have fluctuated by less than \$0.1 million from the interest expense recognized for both periods.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based upon their evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that material information relating to the Company required to be disclosed by the Company in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and to ensure that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurances of achieving the desired control objectives, and management necessarily was required to apply its judgment in designing and evaluating the controls and procedures. We continue to review our disclosure controls and procedures, and our internal control over financial reporting, and may from time to time make changes aimed at enhancing their effectiveness and to ensure that our systems evolve with our business.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the second quarter of fiscal year 2012 that have materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are subject to legal proceedings and claims arising from the current conduct of our business operations, including personal injury, customer contract, employment claims and environmental matters as described in our Consolidated Financial Statements. We maintain insurance coverage providing indemnification against many of such claims, and we do not expect that we will sustain any material loss as a result thereof. Refer to Note 9, “Commitments and Contingencies,” to the Consolidated Financial Statements for further discussion.

ITEM 1A. RISK FACTORS

Edgar Filing: UNIFIRST CORP - Form 10-Q

To our knowledge, there have been no material changes in the risk factors described in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended August 27, 2011. In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended August 27, 2011, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition and/or operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
