Form 10-K/A  
October 20, 2016

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549  
FORM 10-K/A

Amendment No. 1

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934  
For the fiscal year ended June 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 814-00659

PROSPECT CAPITAL CORPORATION

(Exact name of Registrant as specified in its charter)

Maryland 43-2048643  
(State or other jurisdiction of (I.R.S. Employer  
incorporation or organization) Identification No.)

10 East 40th Street, 42nd Floor  
New York, New York 10016  
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (212)  
448-0702

Securities registered pursuant to Section 12(b) of the Act:

Title of each class Name of each exchange on which registered

Common Stock, par value \$0.001 per share NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

---

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.  
Yes  No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

Edgar Filing: PROSPECT CAPITAL CORP - Form 10-K/A

The aggregate market value of the common equity held by non-affiliates of the Registrant as of December 31, 2015 was \$2.382 billion (based on the closing price on that date of \$6.98 on the NASDAQ Global Select Market). For the purposes of calculating this amount only, all executive officers and Directors are “affiliates” of the Registrant.

As of October 18, 2016, there were 358,042,158 shares of the Registrant’s common stock outstanding.

Documents Incorporated by Reference

Portions of the Registrant’s definitive Proxy Statement relating to the 2016 Annual Meeting of Stockholders, to be filed with the Securities and Exchange Commission, are incorporated by reference in Part III of this Annual Report on Form 10-K to the extent described therein.

EXPLANATORY NOTE

Prospect Capital Corporation (the “Company”) is filing this Amendment No. 1 on Form 10-K/A (this “Amendment”) to amend its Annual Report on Form 10-K for the fiscal year ended June 30, 2016, as filed with the Securities and Exchange Commission (the “SEC”) on August 29, 2016 (the “Original 10-K”). The primary purpose of this Amendment is to amend Item 15 to include the separate financial statements of First Tower Finance Company LLC (“First Tower Finance”) pursuant to Rule 3-09 of Regulation S-X (the “Rule 3-09 financial statements”). This Amendment also amends the following disclosures in the Original 10-K related to the Rule 3-09 financial statements:

Item 15 to provide the audited financial statements of First Tower Finance including the independent auditor’s report by RSM US LLP (“RSM”), First Tower Finance’s independent accountants, and to file RSM’s consent related to the financial statements contained in this filing.

In accordance with Rule 12b-15 under the Securities Exchange Act of 1934, this Amendment also includes currently dated certifications from the Company’s Chief Executive Officer and Chief Financial Officer as required by Sections 302 and 906 of the Sarbanes-Oxley Act of 2002. The certification exhibits have been revised accordingly.

This Amendment should be read in conjunction with the Original 10-K and the Company’s other filings made with the SEC subsequent to the filing of the Original 10-K on August 29, 2016. This Amendment is not intended to, nor does it, reflect events occurring after the filing of the Original 10-K, and does not modify or update the disclosures therein in any way other than as required to reflect the changes described above.

## FORWARD-LOOKING STATEMENTS

This report contains information that may constitute “forward-looking statements.” Generally, the words “believe,” “expect,” “intend,” “estimate,” “anticipate,” “project,” “will” and similar expressions identify forward-looking statements, which generally are not historical in nature. However, the absence of these words or similar expressions does not mean that a statement is not forward-looking. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future—including statements relating to volume growth, share of sales and earnings per share growth, and statements expressing general views about future operating results—are forward-looking statements. Management believes that these forward-looking statements are reasonable as and when made. However, caution should be taken not to place undue reliance on any such forward-looking statements because such statements speak only as of the date when made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. In addition, forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or projections. These risks and uncertainties include, but are not limited to, those described in Part I, “Item 1A. Risk Factors” and elsewhere in this report and those described from time to time in our future reports filed with the Securities and Exchange Commission.

The forward-looking statements contained in this report involve a number of risks and uncertainties, including statements concerning:

- our future operating results;
- our business prospects and the prospects of our portfolio companies;
- the impact of investments that we expect to make;
- our contractual arrangements and relationships with third parties;
- the dependence of our future success on the general economy and its impact on the industries in which we invest;
- the ability of our portfolio companies to achieve their objectives;
- difficulty in obtaining financing or raising capital, especially in the current credit and equity environment;
- the level and volatility of prevailing interest rates and credit spreads, magnified by the current turmoil in the credit markets;
- adverse developments in the availability of desirable loan and investment opportunities whether they are due to competition, regulation or otherwise;
- a compression of the yield on our investments and the cost of our liabilities, as well as the level of leverage available to us;
- our regulatory structure and tax treatment, including our ability to operate as a business development company and a regulated investment company;
- the adequacy of our cash resources and working capital;
- the timing of cash flows, if any, from the operations of our portfolio companies;
- the ability of the Investment Adviser to locate suitable investments for us and to monitor and administer our investments; and
- authoritative generally accepted accounting principles or policy changes from such standard-setting bodies as the Financial Accounting Standards Board, the Securities and Exchange Commission, Internal Revenue Service, the NASDAQ Global Select Market, and other authorities that we are subject to, as well as their counterparts in any foreign jurisdictions where we might do business.

## PART I

### Item 1. Business

In this report, the terms “Prospect,” “we,” “us” and “our” mean Prospect Capital Corporation and all entities included in our consolidated financial statements, unless the context specifically requires otherwise.

#### General

Prospect Capital Corporation is a financial services company that primarily lends to and invests in middle market privately-held companies. We are a closed-end investment company incorporated in Maryland. We have elected to be regulated as a business development company (“BDC”) under the Investment Company Act of 1940 (the “1940 Act”). As a BDC, we have elected to be treated as a regulated investment company (“RIC”), under Subchapter M of the Internal Revenue Code of 1986 (the “Code”). We were organized on April 13, 2004 and were funded in an initial public offering completed on July 27, 2004. We are one of the largest BDCs with approximately \$6.28 billion of total assets as of June 30, 2016.

We are externally managed by our investment adviser, Prospect Capital Management L.P. (“Prospect Capital Management” or the “Investment Adviser”). Prospect Administration LLC (“Prospect Administration” or the “Administrator”), a wholly-owned subsidiary of the Investment Adviser, provides administrative services and facilities necessary for us to operate.

Our investment objective is to generate both current income and long-term capital appreciation through debt and equity investments. We invest primarily in senior and subordinated debt and equity of private companies in need of capital for acquisitions, divestitures, growth, development, recapitalizations and other purposes. We work with the management teams or financial sponsors to seek investments with historical cash flows, asset collateral or contracted pro-forma cash flows.

We currently have nine origination strategies in which we make investments: (1) lending in private equity sponsored transactions, (2) lending directly to companies not owned by private equity firms, (3) control investments in corporate operating companies, (4) control investments in financial companies, (5) investments in structured credit, (6) real estate investments, (7) investments in syndicated debt, (8) aircraft leasing and (9) online lending. We continue to evaluate other origination strategies in the ordinary course of business with no specific top-down allocation to any single origination strategy.

**Lending in Private Equity Sponsored Transactions** – We make loans to companies which are controlled by leading private equity firms. This debt can take the form of first lien, second lien, unitranche or unsecured loans. In making these investments, we look for a diversified customer base, recurring demand for the product or service, barriers to entry, strong historical cash flow and experienced management teams. These loans typically have significant equity subordinate to our loan position. Historically, this strategy has comprised approximately 50%-60% of our business, but more recently it is less than 50% of our business.

**Lending Directly to Companies** – We provide debt financing to companies owned by non-private equity firms, the company founder, a management team or a family. Here, in addition to the strengths we look for in a sponsored transaction, we also look for the alignment with the management team with significant invested capital. This strategy often has less competition than the private equity sponsor strategy because such company financing needs are not easily addressed by banks and often require more diligence preparation. Direct lending can result in higher returns and lower leverage than sponsor transactions and may include warrants or equity to us. Historically, this strategy has comprised approximately 5%-15% of our business, but more recently it is less than 5% of our business.

**Control Investments in Corporate Operating Companies** – This strategy involves acquiring controlling stakes in non-financial operating companies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. We provide enhanced certainty of closure to our counterparties, give the seller personal liquidity and generally look for management to continue on in their current roles. This strategy has comprised approximately 10%-15% of our business.

**Control Investments in Financial Companies** – This strategy involves acquiring controlling stakes in financial companies, including consumer direct lending, sub-prime auto lending and other strategies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. These investments are often structured in a tax-efficient RIC-compliant partnership, enhancing returns. This strategy has comprised approximately 5%-15% of our business.

Investments in Structured Credit – We make investments in CLOs, generally taking a significant position in the subordinated interests (equity) of the CLOs. The CLOs include a diversified portfolio of broadly syndicated loans and do not have direct exposure to real estate, mortgages, debt or consumer based debt. The CLOs in which we invest are managed by top-tier collateral managers that have been thoroughly diligenced prior to investment. This strategy has comprised approximately 10%-20% of our business.

2

---

**Real Estate Investments** – We make investments in real estate through our wholly-owned tax-efficient real estate investment trust (“REIT”) National Property REIT Corp. (“NPRC”), the surviving entity of the May 23, 2016 merger with American Property REIT Corp. (“APRC”) and United Property REIT Corp. (“UPRC”). Our real estate investments are in various classes of fully developed and occupied real estate properties that generate current yields. We seek to identify properties that have historically high occupancy and steady cash flow generation. NPRC co-invests with established and experienced property managers that manage such properties after acquisition. This investment strategy has comprised approximately 5%-10% of our business.

**Investments in Syndicated Debt** – On an opportunistic basis, we make investments in loans and high yield bonds that have been sold to a syndicate of buyers. Here we look for investments with attractive risk-adjusted returns after we have completed a fundamental credit analysis. These investments are purchased with a long term, buy-and-hold outlook and we look to provide significant structuring input by providing anchoring orders. This strategy has comprised approximately 5%-10% of our business.

**Aircraft Leasing** – We invest in debt as well as equity in aircraft assets subject to commercial leases to credit-worthy airlines across the globe. These investments present attractive return opportunities due to cash flow consistency from long-lived assets coupled with hard asset collateral. We seek to deliver risk-adjusted returns with strong downside protection by analyzing relative value characteristics across the spectrum of aircraft types of all vintages. Our target portfolio includes both in-production and out-of-production jet and turboprop aircraft and engines, operated by airlines across the globe. This strategy comprised approximately 1% of our business.

**Online Lending** – We make investments in loans originated by certain consumer loan and small and medium sized business (“SME”) loan facilitators. We purchase each loan in its entirety (i.e., a “whole loan”). The borrowers are consumers and SMEs. The loans are typically serviced by the facilitators of the loans. This investment strategy has comprised approximately 4%-7% of our business.

We invest primarily in first and second lien secured loans and unsecured debt, which in some cases includes an equity component. First and second lien secured loans generally are senior debt instruments that rank ahead of unsecured debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Our investments in CLOs are subordinated to senior loans and are generally unsecured. We invest in debt and equity positions of CLOs which are a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. Our CLO investments are derived from portfolios of corporate debt securities which are generally risk rated from BB to B.

Typically, we concentrate on making investments in companies with annual revenues of less than \$750 million and enterprise values of less than \$1 billion. Our typical investment involves a secured loan of less than \$250 million. We also acquire controlling interests in companies in conjunction with making secured debt investments in such companies. In most cases, companies in which we invest are privately held at the time we invest in them. We refer to these companies as “target” or “middle market” companies and these investments as “middle market investments.” We seek to maximize total returns to our investors, including both current yield and equity upside, by applying rigorous credit analysis and asset-based and cash-flow based lending techniques to make and monitor our investments. We are constantly pursuing multiple investment opportunities, including purchases of portfolios from private and public companies, as well as originations and secondary purchases of particular securities. We also regularly evaluate control investment opportunities in a range of industries, and some of these investments could be material to us. There can be no assurance that we will successfully consummate any investment opportunity we are currently pursuing. If any of these opportunities are consummated, there can be no assurance that investors will share our view of valuation or that any assets acquired will not be subject to future write downs, each of which could have an adverse effect on our stock price.

#### “Spin-Offs” of Certain Business Strategies

We previously announced that we intend to unlock value by “spinning off” three “pure play” business strategies - our consumer online lending business, real estate business and structured credit business - to our shareholders in conjunction with rights offering capital raises in which existing Prospect shareholders could elect to participate in each offering or sell their rights. The goals of these “spin-offs” include leverage and earnings neutrality for Prospect. Our primary objective is to maximize the valuation of each offering (declining to proceed with any offering if we find

any valuation not to be attractive). The size and likelihood of each of these dispositions, some of which are expected to be partial rather than complete spin-offs, remain to be determined, but we currently expect the collective size of these three dispositions, if any, to be 10% or less of our asset base. Any such dispositions cannot occur unless and until our application for exemptive relief is granted by the SEC. Should the SEC not grant our application for exemptive relief, these dispositions will not occur as initially planned. The consummation of any of the dispositions also depends upon, among other things: market conditions, regulatory and exchange listing approval, and sufficient investor demand. There can be no assurance that we will consummate any of these dispositions.

### Our Investment Objective and Policies

Our investment objective is to generate both current income and long-term capital appreciation through debt and equity investments. We focus on making investments in private companies. We are a non-diversified company within the meaning of the 1940 Act.

We invest primarily in first and second lien secured loans and unsecured debt, which in some cases includes an equity component. First and second lien secured loans generally are senior debt instruments that rank ahead of unsecured debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Our investments in CLOs are subordinated to senior loans and are generally unsecured. We invest in debt and equity positions of CLOs which are a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. Our CLO investments are derived from portfolios of corporate debt securities which are generally risk rated from BB to B.

We also acquire controlling interests in companies in conjunction with making secured debt investments in such companies. These may be in several industries, including industrial, service, aircraft leasing, real estate and financial businesses.

We seek to maximize returns and minimize risk for our investors by applying rigorous analysis to make and monitor our investments. While the structure of our investments varies, we can invest in senior secured debt, senior unsecured debt, subordinated secured debt, subordinated unsecured debt, convertible debt, convertible preferred equity, preferred equity, common equity, warrants and other instruments, many of which generate current yield. While our primary focus is to seek current income through investment in the debt and/or dividend-paying equity securities of eligible privately-held, thinly-traded or distressed companies and long-term capital appreciation by acquiring accompanying warrants, options or other equity securities of such companies, we may invest up to 30% of the portfolio in opportunistic investments in order to seek enhanced returns for stockholders. Such investments may include investments in the debt and equity instruments of broadly-traded public companies. We expect that these public companies generally will have debt securities that are non-investment grade. Such investments may also include purchases (either in the primary or secondary markets) of the equity and junior debt tranches of a type of such pools known as CLOs. Structurally, CLOs are entities that are formed to hold a portfolio of senior secured loans made to companies whose debt is rated below investment grade or, in limited circumstances, unrated. The senior secured loans within a CLO are limited to senior secured loans which meet specified credit and diversity criteria and are subject to concentration limitations in order to create an investment portfolio that is diverse by senior secured loan, borrower, and industry, with limitations on non-U.S. borrowers. Within this 30% basket, we have and may make additional investments in debt and equity securities of financial companies and companies located outside of the United States. Our investments may include other equity investments, such as warrants, options to buy a minority interest in a portfolio company, or contractual payment rights or rights to receive a proportional interest in the operating cash flow or net income of such company. When determined by the Investment Adviser to be in our best interest, we may acquire a controlling interest in a portfolio company. Any warrants we receive with our debt securities may require only a nominal cost to exercise, and thus, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We have structured, and will continue to structure, some warrants to include provisions protecting our rights as a minority-interest or, if applicable, controlling-interest holder, as well as puts, or rights to sell such securities back to the company, upon the occurrence of specified events. In many cases, we obtain registration rights in connection with these equity interests, which may include demand and “piggyback” registration rights.

We plan to hold many of our debt investments to maturity or repayment, but will sell a debt investment earlier if a liquidity event takes place, such as the sale or recapitalization of a portfolio company, or if we determine a sale of such debt investment to be in our best interest.

We have qualified and elected to be treated for U.S. federal income tax purposes as a RIC under Subchapter M of the Code. As a RIC, we generally do not have to pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To continue to qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements (as described below). In addition, to qualify for RIC tax treatment, we must distribute to our stockholders, for each taxable year, at least 90% of our

“investment company taxable income,” which is generally our ordinary income plus the excess of our realized net short-term capital gains over our realized net long-term capital losses.

For a discussion of the risks inherent in our portfolio investments, see “Risk Factors – Risks Relating to Our Investments.”

#### Industry Sectors

Our portfolio is invested across 27 industry categories. Excluding our CLO investments, which do not have industry concentrations, no individual industry comprises more than 8.2% of the portfolio on either a cost or fair value basis.

### Ongoing Relationships with Portfolio Companies Monitoring

Prospect Capital Management monitors our portfolio companies on an ongoing basis. Prospect Capital Management will continue to monitor the financial trends of each portfolio company to determine if it is meeting its business plan and to assess the appropriate course of action for each company.

Prospect Capital Management employs several methods of evaluating and monitoring the performance and value of our investments, which may include, but are not limited to, the following:

- Assessment of success in adhering to the portfolio company's business plan and compliance with covenants;
- Regular contact with portfolio company management and, if appropriate, the financial or strategic sponsor to discuss financial position, requirements and accomplishments;
- Comparisons to other portfolio companies in the industry, if any;
- Attendance at and participation in board meetings of the portfolio company; and
- Review of monthly and quarterly financial statements and financial projections for the portfolio company.

### Investment Valuation

To value our investments, we follow the guidance of ASC 820, Fair Value Measurement ("ASC 820"), that defines fair value, establishes a framework for measuring fair value in conformity with GAAP, and requires disclosures about fair value measurements. In accordance with ASC 820, the fair value of our investments is defined as the price that we would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market in which that investment is transacted.

ASC 820 classifies the inputs used to measure these fair values into the following hierarchy:

- Level 1: Quoted prices in active markets for identical assets or liabilities, accessible by us at the measurement date.
- Level 2: Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.
- Level 3: Unobservable inputs for the asset or liability.

In all cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each investment.

Our Board of Directors has established procedures for the valuation of our investment portfolio. These procedures are detailed below.

Investments for which market quotations are readily available are valued at such market quotations.

For most of our investments, market quotations are not available. With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our Board of Directors has approved a multi-step valuation process each quarter, as described below.

1. Each portfolio company or investment is reviewed by our investment professionals with independent valuation firms engaged by our Board of Directors.
2. The independent valuation firms prepare independent valuations for each investment based on their own independent assessments and issues their report.
3. The Audit Committee of our Board of Directors reviews and discusses with the independent valuation firms the valuation reports, and then makes a recommendation to the Board of Directors of the value for each investment.

The Board of Directors discusses valuations and determines the fair value of each investment in our portfolio in good faith based on the input of the Investment Adviser, the respective independent valuation firm and the Audit Committee.

Our non-CLO investments are valued utilizing a yield analysis, enterprise value (“EV”) analysis, net asset value analysis, liquidation analysis, discounted cash flow analysis, or a combination of methods, as appropriate. The yield analysis uses loan spreads for loans, dividend yields for certain investments and other relevant information implied by market data involving identical or comparable assets or liabilities. Under the EV analysis, the EV of a portfolio company is first determined and allocated over the portfolio company’s securities in order of their preference relative to one another (i.e., “waterfall” allocation). To determine the EV, we typically use a market multiples approach that considers relevant and applicable market trading data of guideline public companies, transaction metrics from precedent merger and acquisitions transactions and/or a discounted cash flow analysis. The net asset value analysis is used to derive a value of an underlying investment (such as real estate property) by dividing a relevant earnings stream by an appropriate capitalization rate. For this purpose, we consider capitalization rates for similar properties as may be obtained from guideline public companies and/or relevant transactions. The liquidation analysis is intended to approximate the net recovery value of an investment based on, among other things, assumptions regarding liquidation proceeds based on a hypothetical liquidation of a portfolio company’s assets. The discounted cash flow analysis uses valuation techniques to convert future cash flows or earnings to a range of fair values from which a single estimate may be derived utilizing an appropriate discount rate. The measurement is based on the net present value indicated by current market expectations about those future amounts.

In applying these methodologies, additional factors that we consider in valuing our investments may include, as we deem relevant: security covenants, call protection provisions, and information rights; the nature and realizable value of any collateral; the portfolio company’s ability to make payments; the principal markets in which the portfolio company does business; publicly available financial ratios of peer companies; the principal market; and enterprise values, among other factors.

Our investments in CLOs are classified as ASC 820 Level 3 securities and are valued using a discounted cash flow model. The valuations have been accomplished through the analysis of the CLO deal structures to identify the risk exposures from the modeling point of view as well as to determine an appropriate call date (i.e., expected maturity). For each CLO security, the most appropriate valuation approach has been chosen from alternative approaches to ensure the most accurate valuation for such security. To value a CLO, both the assets and the liabilities of the CLO capital structure are modeled. Our valuation agent utilizes additional methods to validate the results from the discounted cash flow method, such as Monte Carlo simulations of key model variables, analysis of relevant data observed in the CLO market, and review of certain benchmark credit indices. We use a waterfall engine to store the collateral data, generate collateral cash flows from the assets based on various assumptions for the risk factors, distribute the cash flows to the liability structure based on the payment priorities, and discount them back using appropriate market discount rates. We are not responsible for and have no influence over the asset management of the portfolios underlying the CLO investments we hold as those portfolios are managed by non-affiliated third party CLO collateral managers. The main risk factors are: default risk, interest rate risk, downgrade risk, and credit spread risk. For a discussion of the risks inherent in determining the value of securities for which readily available market values do not exist, see “Risk Factors – Risks Relating to Our Business – Most of our portfolio investments are recorded at fair value as determined in good faith under the direction of our Board of Directors and, as a result, there is uncertainty as to the value of our portfolio investments.”

#### Managerial Assistance

As a BDC, we are obligated under the 1940 Act to make available to certain of our portfolio companies significant managerial assistance. “Making available significant managerial assistance” refers to any arrangement whereby we provide significant guidance and counsel concerning the management, operations, or business objectives and policies of a portfolio company. We are also deemed to be providing managerial assistance to all portfolio companies that we control, either by ourselves or in conjunction with others. The nature and extent of significant managerial assistance provided by us to controlled and non-controlled portfolio companies will vary according to the particular needs of each portfolio company. Examples of such activities include (i) advice on recruiting, hiring, management and termination of employees, officers and directors, succession planning and other human resource matters; (ii) advice on

capital raising, capital budgeting, and capital expenditures; (iii) advice on advertising, marketing, and sales; (iv) advice on fulfillment, operations, and execution; (v) advice on managing relationships with unions and other personnel organizations, financing sources, vendors, customers, lessors, lessees, lawyers, accountants, regulators and other important counterparties; (vi) evaluating acquisition and divestiture opportunities, plant expansions and closings, and market expansions; (vii) participating in audit committee, nominating committee, board and management meetings; (viii) consulting with and advising board members and officers of portfolio companies (on overall strategy and other matters); and (ix) providing other organizational, operational, managerial and financial guidance. Prospect Administration, when performing a managerial assistance agreement executed with each portfolio company to which we provide managerial assistance, arranges for the provision of such managerial assistance on our behalf. When doing so, Prospect

Administration utilizes personnel of our Investment Adviser. We, on behalf of Prospect Administration, invoice portfolio companies receiving and paying for managerial assistance, and we remit to Prospect Administration its cost of providing such services, including the charges deemed appropriate by our Investment Adviser for providing such managerial assistance. No income is recognized by Prospect.

#### Investment Adviser

Prospect Capital Management manages our investments as the Investment Adviser. Prospect Capital Management is a Delaware limited partnership that has been registered as an investment adviser under the Investment Advisers Act of 1940 (the “Advisers Act”) since March 31, 2004. Prospect Capital Management is led by John F. Barry III and M. Grier Eliasek, two senior executives with significant investment advisory and business experience. Both Messrs. Barry and Eliasek spend a significant amount of their time in their roles at Prospect Capital Management working on our behalf. The principal executive offices of Prospect Capital Management are 10 East 40th Street, 42nd Floor, New York, NY 10016. We depend on the due diligence, skill and network of business contacts of the senior management of the Investment Adviser. We also depend, to a significant extent, on the Investment Adviser’s investment professionals and the information and deal flow generated by those investment professionals in the course of their investment and portfolio management activities. The Investment Adviser’s senior management team evaluates, negotiates, structures, closes, monitors and services our investments. Our future success depends to a significant extent on the continued service of the senior management team, particularly John F. Barry III and M. Grier Eliasek. The departure of any of the senior managers of the Investment Adviser could have a materially adverse effect on our ability to achieve our investment objective. In addition, we can offer no assurance that Prospect Capital Management will remain the Investment Adviser or that we will continue to have access to its investment professionals or its information and deal flow. Under the Investment Advisory Agreement (as defined below), we pay Prospect Capital Management investment advisory fees, which consist of an annual base management fee based on our gross assets as well as a two-part incentive fee based on our performance. Mr. Barry currently controls Prospect Capital Management.

#### Investment Advisory Agreement

##### Terms

We have entered into an investment advisory and management agreement with the Investment Adviser, Prospect Capital Management L.P., (the “Investment Advisory Agreement”) under which the Investment Adviser, subject to the overall supervision of our Board of Directors, manages the day-to-day operations of, and provides investment advisory services to, us. Under the terms of the Investment Advisory Agreement, the Investment Adviser:

(i) determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes, (ii) identifies, evaluates and negotiates the structure of the investments we make (including performing due diligence on our prospective portfolio companies); and (iii) closes and monitors investments we make.

The Investment Adviser’s services under the Investment Advisory Agreement are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired. For providing these services the Investment Adviser receives a fee from us, consisting of two components: a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 2.00% on our total assets. For services currently rendered under the Investment Advisory Agreement, the base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of our gross assets at the end of the two most recently completed calendar quarters and appropriately adjusted for any share issuances or repurchases during the current calendar quarter.

The incentive fee has two parts. The first part, the income incentive fee, is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. For this purpose, pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees (other than fees for providing managerial assistance), such as commitment, origination, structuring, diligence and consulting fees and other fees that we receive from portfolio companies) accrued during the calendar quarter, minus our operating expenses for the quarter (including the base management fee, expenses payable under the Administration Agreement described below, and any interest expense and dividends paid on any issued and outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature (such as original issue discount, debt instruments with

payment-in-kind interest and zero coupon securities), accrued income that we have not yet received in cash. Pre-incentive fee net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, is compared to a “hurdle rate” of 1.75% per quarter (7.00% annualized).

7

---

The net investment income used to calculate this part of the incentive fee is also included in the amount of the gross assets used to calculate the 2.00% base management fee. We pay the Investment Adviser an income incentive fee with respect to our pre-incentive fee net investment income in each calendar quarter as follows:

• No incentive fee in any calendar quarter in which our pre-incentive fee net investment income does not exceed the hurdle rate;

• 100.00% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 125.00% of the quarterly hurdle rate in any calendar quarter (8.75% annualized assuming a 7.00% annualized hurdle rate); and

• 20.00% of the amount of our pre-incentive fee net investment income, if any, that exceeds 125.00% of the quarterly hurdle rate in any calendar quarter (8.75% annualized assuming a 7.00% annualized hurdle rate).

These calculations are appropriately prorated for any period of less than three months and adjusted for any share issuances or repurchases during the current quarter.

The second part of the incentive fee, the capital gains incentive fee, is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Advisory Agreement, as of the termination date), and equals 20.00% of our realized capital gains for the calendar year, if any, computed net of all realized capital losses and unrealized capital depreciation at the end of such year. In determining the capital gains incentive fee payable to the Investment Adviser, we calculate the aggregate realized capital gains, aggregate realized capital losses and aggregate unrealized capital depreciation, as applicable, with respect to each investment that has been in our portfolio. For the purpose of this calculation, an “investment” is defined as the total of all rights and claims which may be asserted against a portfolio company arising from our participation in the debt, equity, and other financial instruments issued by that company. Aggregate realized capital gains, if any, equal the sum of the differences between the aggregate net sales price of each investment and the aggregate cost basis of such investment when sold or otherwise disposed. Aggregate realized capital losses equal the sum of the amounts by which the aggregate net sales price of each investment is less than the aggregate cost basis of such investment when sold or otherwise disposed. Aggregate unrealized capital depreciation equals the sum of the differences, if negative, between the aggregate valuation of each investment and the aggregate cost basis of such investment as of the applicable calendar year-end. At the end of the applicable calendar year, the amount of capital gains that serves as the basis for our calculation of the capital gains incentive fee involves netting aggregate realized capital gains against aggregate realized capital losses on a since-inception basis and then reducing this amount by the aggregate unrealized capital depreciation. If this number is positive, then the capital gains incentive fee payable is equal to 20.00% of such amount, less the aggregate amount of any capital gains incentive fees paid since inception.

#### Examples of Quarterly Incentive Fee Calculation

##### Example 1: Income Incentive Fee\*

\*The hypothetical amount of pre-incentive fee net investment income shown is based on a percentage of total net assets.

##### Alternative 1

##### Assumptions

• Investment income (including interest, dividends, fees, etc.) = 1.25%

• Hurdle rate(1) = 1.75%

• Base management fee(2) = 0.50%

• Other expenses (legal, accounting, custodian, transfer agent, etc.)(3) = 0.20%

• Pre-incentive fee net investment income (investment income – (base management fee + other expenses)) = 0.55%

Pre-incentive net investment income does not exceed hurdle rate, therefore there is no income incentive fee.

Alternative 2

Assumptions

Investment income (including interest, dividends, fees, etc.) = 2.70%

Hurdle rate(1) = 1.75%

Base management fee(2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.)(3) = 0.20%

Pre-incentive fee net investment income (investment income – (base management fee + other expenses)) = 2.00%

Pre-incentive net investment income exceeds hurdle rate, therefore there is an income incentive fee payable by us to the Investment Adviser. The Income Incentive Fee would be calculated as follows:

= 100% × “Catch Up” + the greater of 0% AND (20% × (pre-incentive fee net investment income – 2.1875%))

= (100% × (2.00% - 1.75%)) + 0%

= 100% × 0.25% + 0%

= 0.25%

Alternative 3

Assumptions

Investment income (including interest, dividends, fees, etc.) = 3.00%

Hurdle rate(1) = 1.75%

Base management fee(2) = 0.50%

Other expenses (legal, accounting, custodian, transfer agent, etc.)(3) = 0.20%

Pre-incentive fee net investment income (investment income – (base management fee + other expenses)) = 2.30%

Pre-incentive net investment income exceeds hurdle rate, therefore there is an income incentive fee payable by us to the Investment Adviser. The Income Incentive Fee would be calculated as follows:

= 100% × “Catch Up” + the greater of 0% AND (20% × (pre-incentive fee net investment income – 2.1875%))

= (100% × (2.1875% – 1.75%)) + the greater of 0% AND (20% × (2.30% – 2.1875%))

= (100% × 0.4375%) + (20% × 0.1125%)

= 0.4375% + 0.0225%

= 0.46%

(1) Represents 7% annualized hurdle rate.

(2) Represents 2% annualized base management fee.

(3) Excludes organizational and offering expenses.

Example 2: Capital Gains Incentive Fee

Alternative 1

Assumptions

- Year 1: \$20 million investment made
- Year 2: Fair market value (“FMV”) of investment determined to be \$22 million
- Year 3: FMV of investment determined to be \$17 million
- Year 4: Investment sold for \$21 million

The impact, if any, on the capital gains portion of the incentive fee would be:

- Year 1: No impact
- Year 2: No impact
- Year 3: Decrease base amount on which the second part of the incentive fee is calculated by \$3 million (unrealized capital depreciation)
- Year 4: Increase base amount on which the second part of the incentive fee is calculated by \$4 million (\$1 million of realized capital gain and \$3 million reversal in unrealized capital depreciation)

Alternative 2

Assumptions

- Year 1: \$20 million investment made
- Year 2: FMV of investment determined to be \$17 million
- Year 3: FMV of investment determined to be \$17 million
- Year 4: FMV of investment determined to be \$21 million
- Year 5: FMV of investment determined to be \$18 million
- Year 6: Investment sold for \$15 million

The impact, if any, on the capital gains portion of the incentive fee would be:

- Year 1: No impact
- Year 2: Decrease base amount on which the second part of the incentive fee is calculated by \$3 million (unrealized capital depreciation)
- Year 3: No impact
- Year 4: Increase base amount on which the second part of the incentive fee is calculated by \$3 million (reversal in unrealized capital depreciation)
- Year 5: Decrease base amount on which the second part of the incentive fee is calculated by \$2 million (unrealized capital depreciation)
- Year 6: Decrease base amount on which the second part of the incentive fee is calculated by \$3 million (\$5 million of realized capital loss offset by a \$2 million reversal in unrealized capital depreciation)

Alternative 3

Assumptions

Year 1: \$20 million investment made in company A (“Investment A”) and \$20 million investment made in company B (“Investment B”)

Year 2: FMV of Investment A is determined to be \$21 million and Investment B is sold for \$18 million

Year 3: Investment A is sold for \$23 million

The impact, if any, on the capital gains portion of the incentive fee would be:

Year 1: No impact

Year 2: Decrease base amount on which the second part of the incentive fee is calculated by \$2 million (realized capital loss on Investment B)

Year 3: Increase base amount on which the second part of the incentive fee is calculated by \$3 million (realized capital gain on Investment A)

Alternative 4

Assumptions

Year 1: \$20 million investment made in company A (“Investment A”) and \$20 million investment made in company B (“Investment B”)

Year 2: FMV of Investment A is determined to be \$21 million and FMV of Investment B is determined to be \$17 million

Year 3: FMV of Investment A is determined to be \$18 million and FMV of Investment B is determined to be \$18 million

Year 4: FMV of Investment A is determined to be \$19 million and FMV of Investment B is determined to be \$21 million

Year 5: Investment A is sold for \$17 million and Investment B is sold for \$23 million

The impact, if any, on the capital gains portion of the incentive fee would be:

Year 1: No impact

Year 2: Decrease base amount on which the second part of the incentive fee is calculated by \$3 million (unrealized capital depreciation on Investment B)

Year 3: Decrease base amount on which the second part of the incentive fee is calculated by \$1 million (\$2 million in unrealized capital depreciation on Investment A and \$1 million recovery in unrealized capital depreciation on Investment B)

Year 4: Increase base amount on which the second part of the incentive fee is calculated by \$3 million (\$1 million recovery in unrealized capital depreciation on Investment A and \$2 million recovery in unrealized capital depreciation on Investment B)

Year 5: Increase base amount on which the second part of the incentive fee is calculated by \$1 million (\$3 million realized capital gain on Investment B offset by \$3 million realized capital loss on Investment A plus a \$1 million reversal in unrealized capital depreciation on Investment A from Year 4)

#### Duration and Termination

The Investment Advisory Agreement was originally approved by our Board of Directors on June 23, 2004 and was recently re-approved by the Board of Directors on June 21, 2016 for an additional one-year term expiring June 22, 2017. Unless terminated earlier as described below, it will remain in effect from year to year thereafter if approved annually by our Board of Directors or by the affirmative vote of the holders of a majority of our outstanding voting securities, including, in either case, approval by a majority of our directors who are not interested persons. The Investment Advisory Agreement will automatically terminate in the event of its assignment. The Investment Advisory Agreement may be terminated by either party without penalty upon not more than 60 days' written notice to the other. See "Risk Factors – Risks Relating to Our Business – We are dependent upon Prospect Capital Management's key management personnel for our future success."

#### Indemnification

The Investment Advisory Agreement provides that, absent willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, Prospect Capital Management and its officers, managers, agents, employees, controlling persons, members and any other person or entity affiliated with it are entitled to indemnification from us for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of Prospect Capital Management's services under the Investment Advisory Agreement or otherwise as the Investment Adviser.

#### Administration Agreement

We have also entered into an administration agreement (the "Administration Agreement") with Prospect Administration under which Prospect Administration, among other things, provides (or arranges for the provision of) administrative services and facilities for us. For providing these services, we reimburse Prospect Administration for our allocable portion of overhead incurred by Prospect Administration in performing its obligations under the Administration Agreement, including rent and our allocable portion of the costs of our Chief Financial Officer and Chief Compliance Officer and his staff, including the internal legal staff. Under this agreement, Prospect Administration furnishes us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities. Prospect Administration also performs, or oversees the performance of, our required administrative services, which include, among other things, being responsible for the financial records that we are required to maintain and preparing reports to our stockholders and reports filed with the SEC. In addition, Prospect Administration assists us in determining and publishing our net asset value, overseeing the preparation and filing of our tax returns and the printing and dissemination of reports to our stockholders, and generally oversees the payment of our expenses and the performance of administrative and professional services rendered to us by others. Under the Administration Agreement, Prospect Administration also provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance (see Managerial Assistance section below). The Administration Agreement may be terminated by either party without penalty upon 60 days' written notice to the other party. Prospect Administration is a wholly-owned subsidiary of the Investment Adviser.

The Administration Agreement provides that, absent willful misfeasance, bad faith or negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, Prospect Administration and its officers, managers, partners, agents, employees, controlling persons, members and any other person or entity affiliated with it are entitled to indemnification from us for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of Prospect Administration's services under the Administration Agreement or otherwise as administrator for us. Our payments to Prospect Administration are periodically reviewed by our Board of Directors.

#### Payment of Our Expenses

All investment professionals of the Investment Adviser and its respective staff, when and to the extent engaged in providing investment advisory and management services, and the compensation and routine overhead expenses of such personnel allocable to such services, will be provided and paid for by the Investment Adviser. We bear all other costs and expenses of our operations and transactions, including those relating to: organization and offering; calculation of our net asset value (including the cost and expenses of any independent valuation firm); expenses incurred by Prospect Capital Management payable to third parties, including agents, consultants or other advisers (such as independent valuation firms, accountants and legal counsel), in monitoring our financial and legal affairs and

in monitoring our investments and performing due diligence on our prospective portfolio companies; interest payable on debt, if any, and dividends payable on preferred stock, if any, incurred to finance our investments; offerings of our debt, our preferred shares, our common stock and other securities; investment advisory fees; fees payable to third parties, including agents, consultants or other advisors, relating to, or associated with, evaluating and making investments; transfer agent and custodial fees; registration fees; listing fees; taxes; independent directors' fees and expenses; costs of preparing and filing reports or other documents with the SEC; the costs of any reports, proxy statements or other notices to stockholders, including printing costs; our allocable portion of the fidelity bond, directors and officers/errors and omissions liability insurance, and any

other insurance premiums; direct costs and expenses of administration, including auditor and legal costs; and all other expenses incurred by us, by the Investment Adviser or by Prospect Administration in connection with administering our business, such as our allocable portion of overhead under the Administration Agreement, including rent and our allocable portion of the costs of our Chief Financial Officer and Chief Compliance Officer and his staff.

#### License Agreement

We entered into a license agreement with Prospect Capital Management pursuant to which Prospect Capital Management agreed to grant us a non-exclusive, royalty free license to use the name "Prospect Capital." Under this agreement, we have a right to use the Prospect Capital name, for so long as Prospect Capital Management or one of its affiliates remains the Investment Adviser. Other than with respect to this limited license, we have no legal right to the Prospect Capital name. This license agreement will remain in effect for so long as the Investment Advisory Agreement with the Investment Adviser is in effect.

#### Determination of Net Asset Value

The net asset value per share of our outstanding shares of common stock will be determined quarterly by dividing the value of total assets minus liabilities by the total number of shares outstanding.

In calculating the value of our total assets, we will value investments for which market quotations are readily available at such market quotations. Short-term investments which mature in 60 days or less, such as U.S. Treasury bills, are valued at amortized cost, which approximates market value. The amortized cost method involves recording a security at its cost (i.e., principal amount plus any premium and less any discount) on the date of purchase and thereafter amortizing/accreting that difference between the principal amount due at maturity and cost assuming a constant yield to maturity as determined at the time of purchase. Short-term securities which mature in more than 60 days are valued at current market quotations by an independent pricing service or at the mean between the bid and ask prices obtained from at least two brokers or dealers (if available, or otherwise by a principal market maker or a primary market dealer). Investments in money market mutual funds are valued at their net asset value as of the close of business on the day of valuation.

Most of the investments in our portfolio do not have market quotations which are readily available, meaning the investments do not have actively traded markets. Debt and equity securities for which market quotations are not readily available are valued with the assistance of an independent valuation service using a documented valuation policy and a valuation process that is consistently applied under the direction of our Board of Directors. For a discussion of the risks inherent in determining the value of securities for which readily available market values do not exist, see "Risk Factors – Risks Relating to Our Business – Most of our portfolio investments are recorded at fair value as determined in good faith under the direction of our Board of Directors and, as a result, there is uncertainty as to the value of our portfolio investments."

The factors that may be taken into account in valuing such investments include, as relevant, the portfolio company's ability to make payments, its estimated earnings and projected discounted cash flows, the nature and realizable value of any collateral, the financial environment in which the portfolio company operates, comparisons to securities of similar publicly traded companies, changes in interest rates for similar debt instruments and other relevant factors. Due to the inherent uncertainty of determining the fair value of investments that do not have readily available market quotations, the fair value of these investments may differ significantly from the values that would have been used had such market quotations existed for such investments, and any such differences could be material.

As part of the fair valuation process, the independent valuation firms engaged by the Board of Directors perform a review of each debt and equity investment requiring fair valuation and provide a range of values for each investment, which, along with management's valuation recommendations, is reviewed by our Audit Committee. Management and the independent valuation firms may adjust their preliminary evaluations to reflect comments provided by our Audit Committee. The Audit Committee reviews the final valuation reports and management's valuation recommendations and makes a recommendation to the Board of Directors based on its analysis of the methodologies employed and the various weights that should be accorded to each portion of the valuation as well as factors that the independent valuation firms and management may not have included in their evaluation processes. The Board of Directors then evaluates the Audit Committee recommendations and undertakes a similar analysis to determine the fair value of each investment in the portfolio in good faith.

Determination of fair values involves subjective judgments and estimates not susceptible to substantiation by auditing procedures. Accordingly, under current accounting standards, the notes to our financial statements will refer to the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our financial statements.

### Dividend Reinvestment Plan

We have adopted a dividend reinvestment and direct stock purchase plan that provides for reinvestment of our dividends or distributions on behalf of our stockholders, unless a stockholder elects to receive cash as provided below, and the ability to purchase additional shares by making optional cash investments. As a result, when our Board of Directors authorizes, and we declare, a cash dividend or distribution, then our stockholders who have not “opted out” of our dividend reinvestment and direct stock purchase plan will have their cash dividends or distributions automatically reinvested in additional shares of our common stock, rather than receiving the cash dividends or distributions. If you are not a current stockholder and want to enroll or have “opted out” and wish to rejoin, you may purchase shares directly through the plan or opt in by enrolling online or submitting to the plan administrator a completed enrollment form and, if you are not a current stockholder, making an initial investment of at least \$250.

No action is required on the part of a registered stockholder to have their cash dividend or distribution reinvested in shares of our common stock. A registered stockholder may elect to receive an entire dividend or distribution in cash by notifying the plan administrator and our transfer agent and registrar, in writing so that such notice is received by the plan administrator no later than the record date for dividends to stockholders. The plan administrator will set up a dividend reinvestment account for shares acquired pursuant to the plan for each stockholder who has not so elected to receive dividends and distributions in cash or who has enrolled in the plan as described herein (each, a “Participant”). The plan administrator will hold each Participant’s shares, together with the shares of other Participants, in non-certificated form in the plan administrator’s name or that of its nominee. Upon request by a Participant to terminate their participation in the plan, received in writing, via the internet or the plan administrator’s toll free number no later than 3 business days prior to a dividend or distribution payment date, such dividend or distribution will be paid out in cash and not be reinvested. If such request is received fewer than 3 business days prior to a dividend or distribution payment date, such dividend or distribution will be reinvested but all subsequent dividends and distributions will be paid to the stockholder in cash on all balances. Upon such termination of the Participant’s participation in the plan, all whole shares owned by the Participant will be issued to the Participant in certificated form and a check will be issued to the Participant for the proceeds of fractional shares less a transaction fee of \$15. Those stockholders whose shares are held by a broker or other financial intermediary may receive dividends or distributions in cash by notifying their broker or other financial intermediary of their election.

We primarily use newly-issued shares to implement reinvestment of dividends and distributions under the plan, whether our shares are trading at a premium or at a discount to net asset value. However, we reserve the right to purchase shares in the open market in connection with the implementation of reinvestment of dividends or distributions under the plan. The number of shares to be issued to a stockholder is determined by dividing the total dollar amount of the dividend or distribution payable to such stockholder by the market price per share of our common stock at the close of regular trading on the NASDAQ Global Select Market on the last business day before the payment date for such dividend or distribution. Market price per share on that date will be the closing price for such shares on the NASDAQ Global Select Market or, if no sale is reported for such day, at the average of their reported bid and asked prices. The number of shares of our common stock to be outstanding after giving effect to payment of the dividend or distribution cannot be established until the value per share at which additional shares will be issued has been determined and elections of our stockholders have been tabulated. Stockholders who do not elect to receive dividends and distributions in shares of common stock may experience accretion to the net asset value of their shares if our shares are trading at a premium at the time we issue new shares under the plan and dilution if our shares are trading at a discount. The level of accretion or discount would depend on various factors, including the proportion of our stockholders who participate in the plan, the level of premium or discount at which our shares are trading and the amount of the dividend or distribution payable to a stockholder.

There are no brokerage charges or other charges to stockholders who participate in reinvestment of dividends or distributions under the plan. The plan administrator’s fees under the plan are paid by us. If a participant elects by written notice to the plan administrator to have the plan administrator sell part or all of the shares held by the plan administrator in the participant’s account and remit the proceeds to the participant, the plan administrator is authorized to deduct a \$15 transaction fee plus a \$0.10 per share brokerage commissions from the proceeds.

Stockholders who receive dividends or distributions in the form of stock are subject to the same U.S. federal, state and local tax consequences as are stockholders who elect to receive their dividends or distributions in cash. A stockholder’s

basis for determining gain or loss upon the sale of stock received in a dividend or distribution from us will be equal to the total dollar amount of the dividend or distribution payable to the stockholder. Any stock received in a dividend or distribution will have a new holding period for tax purposes commencing on the day following the day on which the shares are credited to the U.S. Stockholder's account (as defined below).

Participants in the plan have the option of making additional cash payments to the plan administrator for investment in the shares at the then current market price. Such payments may be made in any amount from \$25 to \$10,000 per transaction. Participants in the plan may also elect to have funds electronically withdrawn from their checking or savings account each month. Direct debit of cash will be performed on the 10th of each month. Participants may elect this option by submitting a written authorization form or by enrolling online at the plan administrator's website. The plan administrator will use all funds received from participants

since the prior investment of funds to purchase shares of our common stock in the open market. We will not use newly-issued shares of our common stock to implement such purchases. Purchase orders will be submitted daily. The Plan Administrator may, at its discretion, submit purchase orders less frequently but no later than 30 days after receipt. The plan administrator will charge each stockholder who makes such additional cash payments \$2.50, plus a \$0.10 per share brokerage commission. Cash dividends and distributions payable on all shares credited to your plan account will be automatically reinvested in additional shares pursuant to the terms of the plan. Brokerage charges for some purchases are expected to be less than the usual brokerage charge for such transactions. Instructions sent by a participant to the plan administrator in connection with such participant's cash payment may not be rescinded. Participants may terminate their accounts under the plan by notifying the plan administrator via its website at [www.amstock.com](http://www.amstock.com) or by filling out the transaction request form located at the bottom of their statement and sending it to the plan administrator at American Stock Transfer & Trust Company, P.O. Box 922, Wall Street Station, New York, NY 10269-0560 or by calling the plan administrator's Interactive Voice Response System at (888) 888-0313. Upon termination, the stockholder will receive certificates for the full shares credited to your plan account. If you elect to receive cash, the plan administrator sells such shares and delivers a check for the proceeds, less the \$0.10 per share commission and the plan administrator's transaction fee of \$15. In every case of termination, fractional shares credited to a terminating plan account are paid in cash at the then-current market price, less any commission and transaction fee.

The plan may be terminated by us upon notice in writing mailed to each participant at least 30 days prior to any payable date for the payment of any dividend by us or distribution pursuant to any additional cash payment made. All correspondence concerning the plan should be directed to the plan administrator by mail at American Stock Transfer and Trust Company LLC, 6201 15th Avenue, Brooklyn, New York 11219, or by telephone at 888-888-0313. Stockholders who purchased their shares through or hold their shares in the name of a broker or financial institution should consult with a representative of their broker or financial institution with respect to their participation in our dividend reinvestment plan and direct stock purchase plan. Such holders of our stock may not be identified as our registered stockholders with the plan administrator and may not automatically have their cash dividend or distribution reinvested in shares of our common stock by the plan administrator.

#### Material U.S. Federal Income Tax Considerations

The following discussion is a general summary of the material U.S. federal income tax considerations applicable to us and to an investment in our shares. This summary does not purport to be a complete description of the income tax considerations applicable to us or our investors on such an investment. For example, we have not described tax consequences that we assume to be generally known by investors or certain considerations that may be relevant to certain types of holders subject to special treatment under U.S. federal income tax laws, including stockholders subject to the alternative minimum tax, tax-exempt organizations, insurance companies, dealers in securities, pension plans and trusts, financial institutions, U.S. Stockholders (as defined below) whose functional currency is not the U.S. dollar, persons who mark-to-market our shares and persons who hold our shares as part of a "straddle," "hedge" or "conversion" transaction. This summary assumes that investors hold our common stock as capital assets (within the meaning of the Code). The discussion is based upon the Code, Treasury regulations, and administrative and judicial interpretations, each as of the date of this report and all of which are subject to change, possibly retroactively, which could affect the continuing validity of this discussion. This summary does not discuss any aspects of U.S. estate or gift tax or foreign, state or local tax. It does not discuss the special treatment under U.S. federal income tax laws that could result if we invested in tax-exempt securities or certain other investment assets.

A "U.S. Stockholder" is a beneficial owner of shares of our common stock that is for U.S. federal income tax purposes:

• A citizen or individual resident of the United States;

• A corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state thereof or the District of Columbia;

• An estate, the income of which is subject to U.S. federal income taxation regardless of its source; or

• A trust if (1) a U.S. court is able to exercise primary supervision over the administration of such trust and one or more U.S. persons have the authority to control all substantial decisions of the trust or (2) it has a valid election in place to be treated as a U.S. person.

A “Non-U.S. Stockholder” is a beneficial owner of shares of our common stock that is not a partnership and is not a U.S. Stockholder.

15

---

If a partnership (including an entity treated as a partnership for U.S. federal income tax purposes) holds shares of our common stock, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. A prospective stockholder that is a partner of a partnership holding shares of our common stock should consult its tax advisor with respect to the purchase, ownership and disposition of shares of our common stock.

Tax matters are very complicated and the tax consequences to an investor of an investment in our shares will depend on the facts of his, her or its particular situation. We encourage investors to consult their own tax advisors regarding the specific consequences of such an investment, including tax reporting requirements, the applicability of U.S. federal, state, local and foreign tax laws, eligibility for the benefits of any applicable tax treaty and the effect of any possible changes in the tax laws.

#### Election to be Taxed as a RIC

As a business development company, we have elected and intend to continue to qualify to be treated as a RIC under Subchapter M of the Code. As a RIC, we generally are not subject to corporate-level U.S. federal income taxes on any ordinary income or capital gains that we distribute to our stockholders as dividends. To qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements (as described below). In addition, to obtain RIC tax treatment, we must distribute to our stockholders, for each taxable year, at least 90% of our “investment company taxable income,” which is generally our ordinary income plus the excess of realized net short-term capital gains over realized net long-term capital losses (the “Annual Distribution Requirement”).

#### Taxation as a RIC

In order to qualify as a RIC for U.S. federal income tax purposes, we must, among other things:

• Qualify to be treated as a business development company or be registered as a management investment company under the 1940 Act at all times during each taxable year;

• Derive in each taxable year at least 90% of our gross income from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock or other securities or currencies or other income derived with respect to our business of investing in such stock, securities or currencies and net income derived from an interest in a “qualified publicly traded partnership” (as defined in the Code) (the “90% Income Test”); and

• Diversify our holdings so that at the end of each quarter of the taxable year:

At least 50% of the value of our assets consists of cash, cash equivalents, U.S. government securities, securities of other RICs, and other securities if such other securities of any one issuer do not represent more than 5% of the value of our assets and more than 10% of the outstanding voting securities of the issuer (which for these purposes includes the equity securities of a “qualified publicly traded partnership”); and

No more than 25% of the value of our assets is invested in the securities, other than U.S. government securities or securities of other RICs, (i) of one issuer (ii) of two or more issuers that are controlled, as determined under applicable tax rules, by us and that are engaged in the same or similar or related trades or businesses or (iii) of one or more “qualified publicly traded partnerships,” (the “Diversification Tests”).

To the extent that we invest in entities treated as partnerships for U.S. federal income tax purposes (other than a “qualified publicly traded partnership”), we generally must include the items of gross income derived by the partnerships for purposes of the 90% Income Test, and the income that is derived from a partnership (other than a “qualified publicly traded partnership”) will be treated as qualifying income for purposes of the 90% Income Test only to the extent that such income is attributable to items of income of the partnership which would be qualifying income if realized by us directly. In addition, we generally must take into account our proportionate share of the assets held by partnerships (other than a “qualified publicly traded partnership”) in which we are a partner for purposes of the Diversification Tests. If the partnership is a “qualified publicly traded partnership,” the net income derived from such partnership will be qualifying income for purposes of the 90% Income Test, and interests in the partnership will be “securities” for purposes of the Diversification Tests. We monitor our investments in equity securities of entities that are treated as partnerships for U.S. federal income tax purposes to prevent our disqualification as a RIC.

In order to meet the 90% Income Test, we may establish one or more special purpose corporations to hold assets from which we do not anticipate earning dividend, interest or other qualifying income under the 90% Income Test. Any such special purpose corporation would generally be subject to U.S. federal income tax, and could result in a reduced after-tax yield on the portion of our assets held by such corporation.

Provided that we qualify as a RIC and satisfy the Annual Distribution Requirement, we will not be subject to U.S. federal income tax on the portion of our investment company taxable income and net capital gain (which we define as net long-term capital gains in excess of net short-term capital losses) we timely distribute to stockholders. We will be subject to U.S. federal income tax at the regular corporate rates on any income or capital gain not distributed (or deemed distributed) to our stockholders. Any undistributed taxable income is subject to U.S. federal income tax. We will be subject to a 4% non-deductible U.S. federal excise tax on certain undistributed income of RICs unless we distribute in a timely manner an amount at least equal to the sum of (i) 98% of our ordinary income recognized during the calendar year, (ii) 98.2% of our capital gain net income, as defined by the Code, recognized for the one year period ending October 31 in that calendar year and (iii) any income recognized, but not distributed, in preceding years. We may be required to recognize taxable income in circumstances in which we do not receive cash. For example, if we hold debt obligations that are treated under applicable tax rules as having original issue discount, we must include in income each year a portion of the original issue discount that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. Because any original issue discount accrued will be included in our investment company taxable income for the year of accrual, we may be required to make a distribution to our stockholders in order to satisfy the Annual Distribution Requirement, even though we will not have received any corresponding cash amount.

Gain or loss realized by us from warrants acquired by us as well as any loss attributable to the lapse of such warrants generally will be treated as capital gain or loss. Such gain or loss generally will be long-term or short-term, depending on how long we held a particular warrant. As a RIC, we are not allowed to carry forward or carry back a net operating loss for purposes of computing our investment company taxable income in other taxable years.

Although we do not presently expect to do so, we are authorized to borrow funds and to sell assets in order to satisfy distribution requirements. However, under the 1940 Act, we are not permitted to make distributions to our stockholders while our debt obligations and other senior securities are outstanding unless certain “asset coverage” tests are met. See “Regulation as a Business Development Company – Senior Securities.” Moreover, our ability to dispose of assets to meet our distribution requirements may be limited by (1) the illiquid nature of our portfolio and/or (2) other requirements relating to our status as a RIC, including the Diversification Tests. If we dispose of assets in order to meet the Annual Distribution Requirement or to avoid the excise tax, we may make such dispositions at times that, from an investment standpoint, are not advantageous.

On September 16, 2015, we received a private letter ruling from the Internal Revenue Service (the “IRS”) permitting us to pay up to 80% of our required dividends in stock for the tax years ending August 31, 2016 and August 31, 2017. Any dividends paid in stock will be taxable to the shareholder as if the dividend had been paid in cash and we will receive a dividend paid deduction for such distribution.

If we fail to satisfy the Annual Distribution Requirement or otherwise fail to qualify as a RIC in any taxable year, we would be subject to tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would we be required to make distributions. Distributions would generally be taxable to our individual and other non-corporate taxable stockholders as ordinary dividend income eligible for the reduced maximum rate applicable to qualified dividend income to the extent of our current and accumulated earnings and profits, provided certain holding period and other requirements are met. Subject to certain limitations under the Code, corporate distributees would be eligible for the dividends-received deduction. To qualify again to be taxed as a RIC in a subsequent year, we would be required to distribute to our shareholders our accumulated earnings and profits attributable to non-RIC years reduced by an interest charge on 50% of such earnings and profits payable by us as an additional tax. In addition, if we failed to qualify as a RIC for a period greater than two taxable years, then, in order to qualify as a RIC in a subsequent year, we would be required to elect to recognize and pay tax on any net built-in gain (the excess of aggregate gain, including items of income, over aggregate loss that would have been realized if we had been liquidated) or, alternatively, be subject to taxation on such built-in gain recognized for a period of ten years. Certain of our investment practices may be subject to special and complex U.S. federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, (ii) convert lower taxed long-term capital gain and qualified dividend income into higher taxed short-term capital gain or ordinary income, (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited), (iv) cause us to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the

time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the characterization of certain complex financial transactions, and (vii) produce income that will not be qualifying income for purposes of the 90% Income Test. We will monitor our transactions and may make certain tax elections in order to mitigate the effect of these provisions.

We may invest in preferred securities or other securities the U.S. federal income tax treatment of which may be unclear or may be subject to recharacterization by the IRS. To the extent the tax treatment of such securities or the income from such securities

differs from the expected tax treatment, it could affect the timing or character of income recognized, requiring us to purchase or sell securities, or otherwise change our portfolio, in order to comply with the tax rules applicable to RICs under the Code.

#### Taxation of U.S. Stockholders

Distributions by us generally are taxable to U.S. Stockholders as ordinary income or capital gains. Distributions of our “investment company taxable income” (which is, generally, our ordinary income plus realized net short-term capital gains in excess of realized net long-term capital losses) will be taxable as ordinary income to U.S. Stockholders to the extent of our current or accumulated earnings and profits, whether paid in cash or reinvested in additional common stock. Provided that certain holding period and other requirements are met, such distributions (if designated by us) may qualify (i) for the dividends received deduction available to corporations, but only to the extent that our income consists of dividend income from U.S. corporations and (ii) in the case of individual shareholders, as qualified dividend income eligible to be taxed at long-term capital gain rates to the extent that we receive qualified dividend income (generally, dividend income from taxable domestic corporations and certain qualified foreign corporations). There can be no assurance as to what portion, if any, of our distributions will qualify for favorable treatment as qualified dividend income.

Distributions of our net capital gain (which is generally our realized net long-term capital gains in excess of realized net short-term capital losses) properly designated by us as “capital gain dividends” will be taxable to a U.S. Stockholder as long-term capital gains, regardless of the U.S. Stockholder’s holding period for its common stock and regardless of whether paid in cash or reinvested in additional common stock. Distributions in excess of our current and accumulated earnings and profits first will reduce a U.S. Stockholder’s adjusted tax basis in such stockholder’s common stock and, after the adjusted basis is reduced to zero, will constitute capital gains to such U.S. Stockholder.

Although we currently intend to distribute any long-term capital gains at least annually, we may in the future decide to retain some or all of our long-term capital gains, and designate the retained amount as a “deemed distribution.” In that case, among other consequences, we will pay tax on the retained amount, each U.S. Stockholder will be required to include his, her or its proportionate share of the deemed distribution in income as if it had been actually distributed to the U.S. Stockholder, and the U.S. Stockholder will be entitled to claim a credit equal to its allocable share of the tax paid thereon by us. The amount of the deemed distribution net of such tax will be added to the U.S. Stockholder’s tax basis for his, her or its common stock. Since we expect to pay tax on any retained capital gains at our regular corporate tax rate, and since that rate is in excess of the maximum rate currently payable by individuals on long-term capital gains, the amount of tax that individual stockholders will be treated as having paid and for which they will receive a credit will exceed the tax they owe on the retained net capital gain. Such excess generally may be claimed as a credit against the U.S. Stockholder’s other U.S. federal income tax obligations or may be refunded to the extent it exceeds a stockholder’s liability for U.S. federal income tax. A stockholder that is not subject to U.S. federal income tax or otherwise required to file a U.S. federal income tax return would be required to file a U.S. federal income tax return on the appropriate form in order to claim a refund for the taxes we paid. In order to utilize the deemed distribution approach, we must provide written notice to our stockholders prior to the expiration of 60 days after the close of the relevant taxable year. We cannot treat any of our investment company taxable income as a “deemed distribution.”

For purposes of determining (1) whether the Annual Distribution Requirement is satisfied for any year and (2) the amount of capital gain dividends paid for that year, we may, under certain circumstances, elect to treat a dividend that is paid during the following taxable year as if it had been paid during the taxable year in question. If we make such an election, the U.S. Stockholder will still be treated as receiving the dividend in the taxable year in which the distribution is made. However, any dividend declared by us in October, November or December of any calendar year, payable to stockholders of record on a specified date in any such month and actually paid during January of the following year, will be treated as if it had been received by our U.S. Stockholders on December 31 of the year in which the dividend was declared.

If a U.S. Stockholder purchases shares of our common stock shortly before the record date of a distribution, the price of the shares will include the value of the distribution and the investor will be subject to tax on the distribution even though it represents a return of its investment.

A U.S. Stockholder generally will recognize taxable gain or loss if such U.S. Stockholder sells or otherwise disposes of its shares of our common stock. Any gain or loss arising from such sale or taxable disposition generally will be treated as long-term capital gain or loss if the U.S. Stockholder has held his, her or its shares for more than one year. Otherwise, it would be classified as short-term capital gain or loss. However, any capital loss arising from the sale or taxable disposition of shares of our common stock held for six months or less will be treated as long-term capital loss to the extent of the amount of capital gain dividends received, or undistributed capital gain deemed received, with respect to such shares. In addition, all or a portion of any loss recognized upon a taxable disposition of shares of our common stock may be disallowed if other substantially identical shares are purchased (whether through reinvestment of distributions or otherwise) within 30 days before or after the disposition. Capital losses are deductible

only to the extent of capital gains (subject to an exception for individuals under which a limited amount of capital losses may be offset against ordinary income).

In general, individual U.S. Stockholders currently are subject to a preferential rate on their net capital gain, or the excess of realized net long-term capital gain over realized net short-term capital loss for a taxable year, including long-term capital gain derived from an investment in our shares. Such rate is lower than the maximum rate on ordinary income currently payable by individuals. Corporate U.S. Stockholders currently are subject to U.S. federal income tax on net capital gain at ordinary income rates.

Certain U.S. Stockholders who are individuals, estates or trusts and whose income exceeds certain thresholds will be required to pay a 3.8% Medicare tax on all or a portion of their “net investment income,” which includes dividends received from us and capital gains from the sale or other disposition of our stock.

We will make available to each of our U.S. Stockholders, as promptly as possible after the end of each calendar year, a notice detailing, on a per share basis, the amounts includible in such U.S. Stockholder’s taxable income for such year as ordinary income and as long-term capital gain on form 1099-DIV. In addition, the amount and the U.S. federal tax status of each year’s distributions generally will be reported to the IRS. Distributions may also be subject to additional state, local and foreign taxes depending on a U.S. Stockholder’s particular situation.

Payments of dividends, including deemed payments of constructive dividends, or the proceeds of the sale or other taxable disposition of our common stock generally are subject to information reporting unless the U.S. Stockholder is an exempt recipient. Such payments may also be subject to U.S. federal backup withholding at the applicable rate if the recipient of such payment fails to supply a taxpayer identification number and otherwise comply with the rules for establishing an exemption from backup withholding. Backup withholding is not an additional tax, and any amounts withheld under the backup withholding rules generally will be allowed as a refund or credit against the holder’s U.S. federal income tax liability, provided that certain information is provided timely to the IRS.

#### Taxation of Non-U.S. Stockholders

Whether an investment in our common stock is appropriate for a Non-U.S. Stockholder will depend upon that person’s particular circumstances. An investment in our common stock by a Non-U.S. Stockholder may have adverse tax consequences. Non-U.S. Stockholders should consult their tax advisers before investing in our common stock.

Distributions of our “investment company taxable income” to Non-U.S. Stockholders that are not “effectively connected” with a U.S. trade or business conducted by the Non-U.S. Stockholder, will generally be subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate) to the extent of our current and accumulated earnings and profits.

We generally are not required to withhold federal tax for distributions to non-U.S. stockholders if (i) the distributions are properly reported to our stockholders as “interest-related dividends” or “short-term capital gain dividends,” (ii) the distributions are derived from sources specified in the Code for such dividends and (iii) certain other requirements were satisfied. However, depending on our circumstances, we may report all, some or none of our potentially eligible dividends as such qualified net interest income or as qualified short-term capital gains, and/or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. In order to qualify for this exemption from withholding, a Non-U.S. Stockholder needs to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or substitute form). In the case of shares held through an intermediary, the intermediary may withhold even if we report the payment as qualified net interest income or qualified short-term capital gain. Non-U.S. Stockholders should contact their intermediaries with respect to the application of these rules to their accounts. There can be no assurance as to what portion of our distributions will qualify for favorable treatment as qualified net interest income or qualified short-term capital gains.

Actual or deemed distributions of our net capital gain to a Non-U.S. Stockholder, and gains recognized by a Non-U.S. Stockholder upon the sale of our common stock, that are not effectively connected with a U.S. trade or business conducted by the Non-U.S. Stockholder, will generally not be subject to U.S. federal withholding tax and generally will not be subject to U.S. federal income tax unless the Non-U.S. Stockholder is a nonresident alien individual and is physically present in the United States for 183 or more days during the taxable year and meets certain other requirements.

Distributions of our “investment company taxable income” and net capital gain (including deemed distributions) to Non-U.S. Stockholders, and gains realized by Non-U.S. Stockholders upon the sale of our common stock that are

effectively connected with a U.S. trade or business conducted by the Non-U.S. Stockholder, will be subject to U.S. federal income tax at the graduated rates applicable to U.S. citizens, residents and domestic corporations. In addition, if such Non-U.S. Stockholder is a foreign corporation, it may also be subject to a 30% (or lower applicable treaty rate) branch profits tax on its effectively connected earnings and profits

for the taxable year, subject to adjustments, if its investment in our common stock is effectively connected with its conduct of a U.S. trade or business.

If we distribute our net capital gain in the form of deemed rather than actual distributions (which we may do in the future), a Non-U.S. Stockholder will be entitled to a U.S. federal income tax credit or tax refund equal to the stockholder's allocable share of the tax we pay on the capital gains deemed to have been distributed. In order to obtain the refund, the Non-U.S. Stockholder must obtain a U.S. taxpayer identification number and file a U.S. federal income tax return even if the Non-U.S. Stockholder would not otherwise be required to obtain a U.S. taxpayer identification number or file a U.S. federal income tax return.

#### Foreign Account Tax Compliance Act

In addition, after June 30, 2014, withholding at a rate of 30% will be required on interest and dividends, and after December 31, 2018, withholding at a rate of 30% will be required on gross proceeds from the sale of, shares of our stock held by or through certain foreign financial institutions (including investment funds), unless such institution enters into an agreement with the Secretary of the Treasury to report, on an annual basis, information with respect to interests in, and accounts maintained by, the institution to the extent such interests or accounts are held by certain U.S. persons or by certain non-U.S. entities that are wholly or partially owned by U.S. persons and to withhold on certain payments. Accordingly, the entity through which our shares are held will affect the determination of whether such withholding is required. An intergovernmental agreement between the United States and an applicable foreign country, or future Treasury regulations or other guidance, may modify these requirements. Similarly, dividends in respect of, and gross proceeds from the sale of, our shares held by an investor that is a non-financial non-U.S. entity that does not qualify under certain exemptions will be subject to withholding at a rate of 30%, unless such entity either (i) certifies to us that such entity does not have any "substantial United States owners" or (ii) provides certain information regarding the entity's "substantial United States owners," which we will in turn provide to the IRS. We will not pay any additional amounts to stockholders in respect of any amounts withheld. Non-U.S. Stockholders are encouraged to consult their tax advisors regarding the possible implications of the legislation on their investment in our shares.

A Non-U.S. Stockholder generally will be required to comply with certain certification procedures to establish that such holder is not a U.S. person in order to avoid backup withholding with respect to payments of dividends, including deemed payments of constructive dividends, or the proceeds of a disposition of our common stock. In addition, we are required to annually report to the IRS and each Non-U.S. Stockholder the amount of any dividends or constructive dividends treated as paid to such Non-U.S. Stockholder, regardless of whether any tax was actually withheld. Copies of the information returns reporting such dividend or constructive dividend payments and the amount withheld may also be made available to the tax authorities in the country in which a Non-U.S. Stockholder resides under the provisions of an applicable income tax treaty. Backup withholding is not an additional tax, and any amounts withheld under the backup withholding rules generally will be allowed as a refund or credit against a Non-U.S. Stockholder's U.S. federal income tax liability, if any, provided that certain required information is provided timely to the IRS.

Non-U.S. persons should consult their tax advisors with respect to the U.S. federal income tax and withholding tax, and state, local and foreign tax consequences of an investment in our common stock.

#### Failure to Obtain RIC Tax Treatment

If we were unable to obtain tax treatment as a RIC, we would be subject to tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would they be required to be made. Distributions would generally be taxable to our stockholders as ordinary dividend income eligible for the reduced maximum rate applicable for qualified dividend income to the extent of our current and accumulated earnings and profits. Subject to certain limitations under the Code, corporate distributees would be eligible for the dividends-received deduction.

Distributions in excess of our current and accumulated earnings and profits would be treated first as a return of capital to the extent of the stockholder's tax basis, and any remaining distributions would be treated as a capital gain.

The discussion set forth herein does not constitute tax advice, and potential investors should consult their own tax advisors concerning the tax considerations relevant to their particular situation.

#### Regulation as a Business Development Company

General

We are a closed-end, non-diversified investment company that has filed an election to be treated as a BDC under the 1940 Act and has elected to be treated as a RIC under Subchapter M of the Code. The 1940 Act contains prohibitions and restrictions relating to transactions between business development companies and their affiliates (including any investment advisers or sub-advisers),

20

---

principal underwriters and affiliates of those affiliates or underwriters and requires that a majority of the directors be persons other than “interested persons,” as that term is defined in the 1940 Act. In addition, the 1940 Act provides that we may not change the nature of our business so as to cease to be, or to withdraw our election as, a business development company unless approved by a majority of our outstanding voting securities.

We may invest up to 100% of our assets in securities acquired directly from issuers in privately negotiated transactions. With respect to such securities, we may, for the purpose of public resale, be deemed an “underwriter” as that term is defined in the Securities Act of 1933. Our intention is to not write (sell) or buy put or call options to manage risks associated with the publicly traded securities of our portfolio companies, except that we may enter into hedging transactions to manage the risks associated with interest rate, foreign currency and other market fluctuations. However, in connection with an investment or acquisition financing of a portfolio company, we may purchase or otherwise receive warrants to purchase the common stock of the portfolio company. Similarly, in connection with an acquisition, we may acquire rights to require the issuers of acquired securities or their affiliates to repurchase them under certain circumstances. We also do not intend to acquire securities issued by any investment company that exceed the limits imposed by the 1940 Act. Under these limits, except with respect to money market funds, we generally cannot acquire more than 3% of the voting stock of any regulated investment company, invest more than 5% of the value of our total assets in the securities of one investment company or invest more than 10% of the value of our total assets in the securities of more than one investment company. With regard to that portion of our portfolio invested in securities issued by investment companies, it should be noted that such investments subject our stockholders indirectly to additional expenses. None of these policies are fundamental and may be changed without stockholder approval.

#### Qualifying Assets

Under the 1940 Act, a business development company may not acquire any asset other than assets of the type listed in Section 55(a) of the 1940 Act, which are referred to as qualifying assets, unless, at the time the acquisition is made, qualifying assets represent at least 70% of the company’s total assets. The principal categories of qualifying assets relevant to our business are the following:

- Securities purchased in transactions not involving any public offering from the issuer of such securities, which issuer (subject to certain limited exceptions) is an eligible portfolio company, or from any person who is, or has
1. been during the preceding 13 months, an affiliated person of an eligible portfolio company, or from any other person, subject to such rules as may be prescribed by the SEC. An “eligible portfolio company” is defined in the 1940 Act and rules adopted pursuant thereto as any issuer which:
    - a. is organized under the laws of, and has its principal place of business in, the United States; is not an investment company (other than a small business investment company wholly owned by the business development company) or a company that would be an investment company but for certain exclusions under the
    - b. 1940 Act for certain financial companies such as banks, brokers, commercial finance companies, mortgage companies and insurance companies; and
    - c. satisfies any of the following:
      - i. does not have any class of securities with respect to which a broker or dealer may extend margin credit; is controlled by a business development company or a group of companies including a business development
      - ii. company and the business development company has an affiliated person who is a director of the eligible portfolio company;
      - iii. is a small and solvent company having total assets of not more than \$4 million and capital and surplus of not less than \$2 million;
      - iv. does not have any class of securities listed on a national securities exchange; or
      - v. has a class of securities listed on a national securities exchange, but has an aggregate market value of outstanding voting and non-voting common equity of less than \$250 million.
  2. Securities in companies that were eligible portfolio companies when we made our initial investment if certain other requirements are satisfied.
  3. Securities of any eligible portfolio company which we control.

4. Securities purchased in a private transaction from a U.S. issuer that is not an investment company or from an affiliated person of the issuer, or in transactions incident thereto, if the issuer is in bankruptcy and subject to reorganization or if the issuer, immediately prior to the purchase of its securities was unable to meet its obligations as they came due without material assistance other than conventional lending or financing agreements.
5. Securities of an eligible portfolio company purchased from any person in a private transaction if there is no ready market for such securities and we already own 60% of the outstanding equity of the eligible portfolio company.
6. Securities received in exchange for or distributed on or with respect to securities described in (1) through (4) above, or pursuant to the exercise of warrants or rights relating to such securities.
7. Cash, cash equivalents, U.S. government securities or high-quality debt securities maturing in one year or less from the time of investment.

In addition, a business development company must have been organized and have its principal place of business in the United States and must be operated for the purpose of making investments in the types of securities described in (1), (2), (3) or (4) above.

#### Managerial Assistance to Portfolio Companies

In order to count portfolio securities as qualifying assets for the purpose of the 70% test, a business development company must either control the issuer of the securities or must offer to make available to the issuer of the securities (other than small and solvent companies described above) significant managerial assistance; except that, where the business development company purchases such securities in conjunction with one or more other persons acting together, one of the other persons in the group may make available such managerial assistance. "Making available significant managerial assistance" refers to any arrangement whereby we provide significant guidance and counsel concerning the management, operations, or business objectives and policies of a portfolio company. We are also deemed to be providing managerial assistance to all portfolio companies that we control, either by ourselves or in conjunction with others. The nature and extent of significant managerial assistance provided by us will vary according to the particular needs of each portfolio company. Examples of such activities include advice on marketing, operations, fulfillment and overall strategy, capital budgeting, managing relationships with financing sources, recruiting management personnel, evaluating acquisition and divestiture opportunities, participating in board and management meetings, consulting with and advising officers of portfolio companies, and providing other organizational and financial guidance. We provide significant managerial assistance to all portfolio companies that we control, either by ourselves or in conjunction with others. Prospect Administration provides such managerial assistance on our behalf to portfolio companies, including controlled companies, when we are required to provide this assistance, utilizing personnel from Prospect Capital Management.

#### Temporary Investments

Pending investment in other types of "qualifying assets," as described above, our investments may consist of cash, cash equivalents, including money market funds, U.S. government securities or high quality debt securities maturing in one year or less from the time of investment, which we refer to, collectively, as temporary investments, so that 70% of our assets are qualifying assets. Typically, we will invest in money market funds, U.S. Treasury bills or in repurchase agreements that are fully collateralized by cash or securities issued by the U.S. government or its agencies. A repurchase agreement involves the purchase by an investor, such as us, of a specified security and the simultaneous agreement by the seller to repurchase it at an agreed upon future date and at a price which is greater than the purchase price by an amount that reflects an agreed-upon interest rate. There is no percentage restriction on the proportion of our assets that may be invested in such repurchase agreements. However, if more than 25% of our total assets constitute repurchase agreements from a single counterparty, we would not meet the Diversification Tests in order to qualify as a RIC for U.S. federal income tax purposes. Thus, we do not intend to enter into repurchase agreements with a single counterparty in excess of this limit. The Investment Adviser will monitor the creditworthiness of the counterparties with which we enter into repurchase agreement transactions.

#### Senior Securities

We are permitted, under specified conditions, to issue multiple classes of indebtedness and one class of stock senior to our common stock if our asset coverage, as defined in the 1940 Act, is at least equal to 200% immediately after each such issuance. In addition, while any preferred stock or public debt securities remain outstanding, we must make provisions to prohibit any distribution to our stockholders or the repurchase of such securities or shares unless we

meet the applicable asset coverage ratios after giving effect to such distribution or repurchase. We may also borrow amounts up to 5% of the value of our total assets for temporary or emergency purposes without regard to asset coverage. For a discussion of the risks associated with leverage, see “Risk Factors – Risks Relating to Our Securities.”

#### Code of Ethics

We, Prospect Capital Management and Prospect Administration have each adopted a code of ethics pursuant to Rule 17j-1 under the 1940 Act that establishes procedures for personal investments and restricts certain personal securities transactions. Personnel subject to each code may invest in securities for their personal investment accounts, including securities that may be purchased or held by us, so long as such investments are made in accordance with the code's requirements. For information on how to obtain a copy of each code of ethics, see "Available Information."

#### Compliance Policies and Procedures

We and the Investment Adviser have adopted and implemented written policies and procedures reasonably designed to prevent violation of the U.S. federal securities laws and are required to review these compliance policies and procedures annually for their adequacy and the effectiveness of their implementation and to designate a Chief Compliance Officer to be responsible for administering the policies and procedures. Brian H. Oswald serves as our Chief Compliance Officer.

#### Proxy Voting Policies and Procedures

We have delegated our proxy voting responsibility to Prospect Capital Management. The Proxy Voting Policies and Procedures of Prospect Capital Management are set forth below. The guidelines are reviewed periodically by Prospect Capital Management and our independent directors, and, accordingly, are subject to change.

**Introduction.** As an investment adviser registered under the Advisers Act, Prospect Capital Management has a fiduciary duty to act solely in the best interests of its clients. As part of this duty, Prospect Capital Management recognizes that it must vote client securities in a timely manner free of conflicts of interest and in the best interests of its clients.

These policies and procedures for voting proxies for Prospect Capital Management's Investment Advisory clients are intended to comply with Section 206 of, and Rule 206(4)-6 under, the Advisers Act.

**Proxy policies.** These policies are designed to be responsive to the wide range of subjects that may be the subject of a proxy vote. These policies are not exhaustive due to the variety of proxy voting issues that Prospect Capital Management may be required to consider. In general, Prospect Capital Management will vote proxies in accordance with these guidelines unless: (1) Prospect Capital Management has determined to consider the matter on a case-by-case basis (as is stated in these guidelines), (2) the subject matter of the vote is not covered by these guidelines, (3) a material conflict of interest is present, or (4) Prospect Capital Management might find it necessary to vote contrary to its general guidelines to maximize stockholder value and vote in its clients' best interests. In such cases, a decision on how to vote will be made by the Proxy Voting Committee (as described below). In reviewing proxy issues, Prospect Capital Management will apply the following general policies:

**Elections of directors.** In general, Prospect Capital Management will vote in favor of the management-proposed slate of directors. If there is a proxy fight for seats on the Board of Directors or Prospect Capital Management determines that there are other compelling reasons for withholding votes for directors, the Proxy Voting Committee will determine the appropriate vote on the matter. Prospect Capital Management believes that directors have a duty to respond to stockholder actions that have received significant stockholder support. Prospect Capital Management may withhold votes for directors that fail to act on key issues such as failure to implement proposals to declassify boards, failure to implement a majority vote requirement, failure to submit a rights plan to a stockholder vote and failure to act on tender offers where a majority of stockholders have tendered their shares. Finally, Prospect Capital Management may withhold votes for directors of non-U.S. issuers where there is insufficient information about the nominees disclosed in the proxy statement.

**Appointment of auditors.** Prospect Capital Management believes that the company remains in the best position to choose the auditors and will generally support management's recommendation.

**Changes in capital structure.** Changes in a company's charter, articles of incorporation or by-laws may be required by state or U.S. federal regulation. In general, Prospect Capital Management will cast its votes in accordance with the company's management on such proposal. However, the Proxy Voting Committee will review and analyze on a case-by-case basis any proposals regarding changes in corporate structure that are not required by state or U.S. federal regulation.

**Corporate restructurings, mergers and acquisitions.** Prospect Capital Management believes proxy votes dealing with corporate reorganizations are an extension of the investment decision. Accordingly, the Proxy Voting Committee will

analyze such proposals on a case-by-case basis.

23

---

Proposals affecting the rights of stockholders. Prospect Capital Management will generally vote in favor of proposals that give stockholders a greater voice in the affairs of the company and oppose any measure that seeks to limit those rights. However, when analyzing such proposals, Prospect Capital Management will weigh the financial impact of the proposal against the impairment of the rights of stockholders.

Corporate governance. Prospect Capital Management recognizes the importance of good corporate governance in ensuring that management and the Board of Directors fulfill their obligations to the stockholders. Prospect Capital Management favors proposals promoting transparency and accountability within a company.

Anti-takeover measures. The Proxy Voting Committee will evaluate, on a case-by-case basis, proposals regarding anti-takeover measures to determine the measure's likely effect on stockholder value dilution.

Stock splits. Prospect Capital Management will generally vote with the management of the company on stock split matters.

Limited liability of directors. Prospect Capital Management will generally vote with management on matters that would affect the limited liability of directors.

Social and corporate responsibility. The Proxy Voting Committee may review and analyze on a case-by-case basis proposals relating to social, political and environmental issues to determine whether they will have a financial impact on stockholder value. Prospect Capital Management may abstain from voting on social proposals that do not have a readily determinable financial impact on stockholder value.

Proxy voting procedures. Prospect Capital Management will generally vote proxies in accordance with these guidelines. In circumstances in which (1) Prospect Capital Management has determined to consider the matter on a case-by-case basis (as is stated in these guidelines), (2) the subject matter of the vote is not covered by these guidelines, (3) a material conflict of interest is present, or (4) Prospect Capital Management might find it necessary to vote contrary to its general guidelines to maximize stockholder value and vote in its clients' best interests, the Proxy Voting Committee will vote the proxy.

Proxy voting committee. Prospect Capital Management has formed a proxy voting committee to establish general proxy policies and consider specific proxy voting matters as necessary. In addition, members of the committee may contact the management of the company and interested stockholder groups as necessary to discuss proxy issues. Members of the committee will include relevant senior personnel. The committee may also evaluate proxies where we face a potential conflict of interest (as discussed below). Finally, the committee monitors adherence to guidelines, and reviews the policies contained in this statement from time to time.

Conflicts of interest. Prospect Capital Management recognizes that there may be a potential conflict of interest when it votes a proxy solicited by an issuer that is its advisory client or a client or customer of one of our affiliates or with whom it has another business or personal relationship that may affect how it votes on the issuer's proxy. Prospect Capital Management believes that adherence to these policies and procedures ensures that proxies are voted with only its clients' best interests in mind. To ensure that its votes are not the product of a conflict of interests, Prospect Capital Management requires that: (i) anyone involved in the decision making process (including members of the Proxy Voting Committee) disclose to the chairman of the Proxy Voting Committee any potential conflict that he or she is aware of and any contact that he or she has had with any interested party regarding a proxy vote; and (ii) employees involved in the decision making process or vote administration are prohibited from revealing how Prospect Capital Management intends to vote on a proposal in order to reduce any attempted influence from interested parties.

Proxy voting. Each account's custodian will forward all relevant proxy materials to Prospect Capital Management, either electronically or in physical form to the address of record that Prospect Capital Management has provided to the custodian.

Proxy recordkeeping. Prospect Capital Management must retain the following documents pertaining to proxy voting:

- copies of its proxy voting policies and procedures;
- copies of all proxy statements;
- records of all votes cast by Prospect Capital Management;
- copies of all documents created by Prospect Capital Management that were material to making a decision how to vote proxies or that memorializes the basis for that decision; and
-

copies of all written client requests for information with regard to how Prospect Capital Management voted proxies on behalf of the client as well as any written responses provided.

All of the above-referenced records will be maintained and preserved for a period of not less than five years from the end of the fiscal year during which the last entry was made. The first two years of records must be maintained at our office.

Proxy voting records. Clients may obtain information about how Prospect Capital Management voted proxies on their behalf by making a written request for proxy voting information to: Compliance Officer, Prospect Capital Management LLC, 10 East 40th Street, 42nd Floor, New York, NY 10016.

#### Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 imposes a variety of regulatory requirements on publicly-held companies. In addition to our Chief Executive and Chief Financial Officers' required certifications as to the accuracy of our financial reporting, we are also required to disclose the effectiveness of our disclosure controls and procedures as well as report on our assessment of our internal controls over financial reporting, the latter of which must be audited by our independent registered public accounting firm.

The Sarbanes-Oxley Act of 2002 also requires us to continually review our policies and procedures to ensure that we remain in compliance with all rules promulgated thereunder.

#### Available Information

We file with or submit to the SEC annual, quarterly and current periodic reports, proxy statements and other information meeting the informational requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). This information is available free of charge by contacting us at (212) 448-0702 or on our website at [www.prospectstreet.com](http://www.prospectstreet.com). Information contained on our website is not incorporated into this Annual Report and you should not consider such information to be part of this Annual Report. You also may inspect and copy these reports, proxy statements and other information, as well as the Annual Report and related exhibits and schedules, at the Public Reference Room of the SEC at 100 F Street NE, Washington, D.C. 20549. Such information is also available from the EDGAR database on the SEC's website at <http://www.sec.gov>. You also can obtain copies of such information, after paying a duplicating fee, by sending a request by e-mail to [publicinfo@sec.gov](mailto:publicinfo@sec.gov) or by writing the SEC's Public Reference Branch, Office of Consumer Affairs and Information Services, Securities and Exchange Commission, Washington, D.C. 20549. You may obtain information on the operation of the SEC's Public Reference Room by calling the SEC at (202) 551-8090 or (800) SEC-0330.

#### Item 1A. Risk Factors

You should carefully consider the risks described below, together with all of the other information included in this Annual Report, before you decide whether to make an investment in our securities. The risks set forth below are not the only risks we face. If any of the adverse events or conditions described below occurs, our business, financial condition and results of operations could be materially adversely affected. In such case, our NAV, and the trading price of our common stock could decline, or the value of our preferred stock, debt securities, and warrants, if any are outstanding, may decline, and you may lose all or part of your investment.

Our \$167.5 million of 5.50% convertible notes due 2016 are referred to as the 2016 Notes. Our \$129.5 million of 5.375% convertible notes due 2017 are referred to as the 2017 Notes. Our \$200.0 million of 5.75% convertible notes due 2018 are referred to as the 2018 Notes. Our \$200.0 million of 5.875% convertible notes due 2019 are referred to as the 2019 Notes. Our \$392.0 million of 4.75% convertible notes due 2020 are referred to as the 2020 Notes, and collectively with the 2016 Notes, the 2017 Notes, the 2018 Notes and the 2019 Notes, are the Convertible Notes. Our \$250.0 million of 5.875% unsecured notes due 2023 are referred to as the 2023 Notes. Our \$161.4 million of 6.25% unsecured notes due 2024 are referred to as the 2024 Notes. Our \$300.0 million of 5.00% unsecured notes due 2019 are referred to as the 5.00% 2019 Notes, and collectively with the 2023 Notes, the 2024 Notes, are the Public Notes. Any corporate notes issued pursuant to our medium term notes program with Incapital LLC are referred to as Prospect Capital InterNotes®.

### Risks Relating to Our Business

Capital markets may experience periods of disruption and instability. Such market conditions may materially and adversely affect debt and equity capital markets in the United States and abroad, which may have a negative impact on our business and operations.

From time to time, capital markets may experience periods of disruption and instability. For example, between 2007 and 2009, the global capital markets experienced an extended period of disruption as evidenced by a lack of liquidity in the debt capital markets, write-offs in the financial services sector, the re-pricing of credit risk and the failure of certain major financial institutions. Despite actions of the United States federal government and foreign governments, these events contributed to worsening general economic conditions that materially and adversely impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. While the adverse effects of these conditions have abated to a degree, global financial markets experienced significant volatility following the downgrade by Standard & Poor's on August 5, 2011 of the long-term credit rating of U.S. Treasury debt from AAA to AA+. These market conditions have historically and could again have a material adverse effect on debt and equity capital markets in the United States and Europe, which could have a materially negative impact on our business, financial condition and results of operations. We and other companies in the financial services sector may have to access, if available, alternative markets for debt and equity capital. In such circumstances, equity capital may be difficult to raise because subject to some limited exceptions, as a BDC, we are generally not able to issue additional shares of our common stock at a price less than net asset value without general approval by our stockholders, which we currently have, and approval of the specific issuance by our Board of Directors. In addition, our ability to incur indebtedness or issue preferred stock is limited by applicable regulations such that our asset coverage, as defined in the 1940 Act, must equal at least 200% immediately after each time we incur indebtedness or issue preferred stock. The debt capital that may be available, if at all, may be at a higher cost and on less favorable terms and conditions in the future. Any inability to raise capital could have a negative effect on our business, financial condition and results of operations.

Market conditions may in the future make it difficult to extend the maturity of or refinance our existing indebtedness, including the final maturity of our credit facility in March 2019, and any failure to do so could have a material adverse effect on our business. The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments. Given the extreme volatility and dislocation that the capital markets have historically experienced, many BDCs have faced, and may in the future face, a challenging environment in which to raise capital. We may in the future have difficulty accessing debt and equity capital, and a severe disruption in the global financial markets or deterioration in credit and financing conditions could have a material adverse effect on our business, financial condition and results of operations. In addition, significant changes in the capital markets, including the extreme volatility and disruption, have had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, could have a material adverse impact on our business, financial condition or results of operations. The Investment Adviser does not know how long the financial markets will continue to be affected by these events and cannot predict the effects of these or similar events in the future on the United States economy and securities markets or on our investments. The Investment Adviser monitors developments and seeks to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that it will be successful in doing so; and the Investment Adviser may not timely anticipate or manage existing, new or additional risks, contingencies or developments, including regulatory developments in the current or future market environment. We are required to record certain of our assets at fair value, as determined in good faith by our Board of Directors in accordance with our valuation policy. As a result, volatility in the capital markets may have a material adverse effect on our investment valuations and our net asset value, even if we plan to hold investments to maturity.

The downgrade of the U.S. credit rating and economic crisis in Europe could negatively impact our business, financial condition and earnings.

Although U.S. lawmakers passed legislation to raise the federal debt ceiling and Standard & Poor's Ratings Services affirmed its AA+ long-term sovereign credit rating on the United States and revised the outlook on the long-term rating from negative to stable in June of 2013, U.S. debt ceiling and budget deficit concerns together with signs of deteriorating sovereign debt conditions in Europe continue to present the possibility of a credit-rating downgrade, economic slowdowns, or a recession for the United States. The impact of any further downgrades to the U.S. government's sovereign credit rating or downgraded sovereign credit ratings of European countries or the Russian Federation, or their perceived creditworthiness could adversely affect the U.S. and global financial markets and economic conditions. These developments, along with any further European sovereign debt issues, could cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the debt markets on favorable terms. Continued adverse economic conditions could have a material adverse effect on our business, financial condition and results of operations.

In October 2014, the Federal Reserve announced that it was concluding its bond-buying program. It is unknown what effect, if any, the conclusion of this program will have on credit markets and the value of our investments. These and any future developments and reactions of the credit markets toward these developments could cause interest rates and borrowing costs to rise, which may negatively impact our ability to obtain debt financing on favorable terms.

Additionally, in January 2015, the Federal Reserve reaffirmed its view that the current target range for the federal funds rate was appropriate based on current economic conditions. However, if key economic indicators, such as the unemployment rate or inflation, do not progress at a rate consistent with the Federal Reserve's objectives, the target range for the federal funds rate may increase and cause interest rates and borrowing costs to rise, which may negatively impact our ability to access the debt markets on favorable terms.

Rising interest rates may adversely affect the value of our portfolio investments which could have an adverse effect on our business, financial condition and results of operations.

Our debt investments may be based on floating rates, such as London Interbank Offer Rate ("LIBOR"), EURIBOR, the Federal Funds Rate or the Prime Rate. General interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in the interest rates on new investments relative to interest rates on current investments could also have an adverse impact on our net interest income. An increase in interest rates could decrease the value of any investments we hold which earn fixed interest rates, including subordinated loans, senior and junior secured and unsecured debt securities and loans and high yield bonds, and also could increase our interest expense, thereby decreasing our net income. Also, an increase in interest rates available to investors could make investment in our common stock less attractive if we are not able to increase our dividend rate, which could reduce the value of our common stock.

Because we have borrowed money, and may issue preferred stock to finance investments, our net investment income depends, in part, upon the difference between the rate at which we borrow funds or pay distributions on preferred stock and the rate that our investments yield. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase except to the extent we have issued fixed rate debt or preferred stock, which could reduce our net investment income.

You should also be aware that a change in the general level of interest rates can be expected to lead to a change in the interest rate we receive on many of our debt investments. Accordingly, a change in the interest rate could make it easier for us to meet or exceed the performance threshold and may result in a substantial increase in the amount of incentive fees payable to our Investment Adviser with respect to the portion of the Incentive Fee based on income. Changes relating to the LIBOR calculation process may adversely affect the value of our portfolio of LIBOR-indexed, floating-rate debt securities.

In the recent past, concerns have been publicized that some of the member banks surveyed by the British Bankers' Association ("BBA") in connection with the calculation of LIBOR across a range of maturities and currencies may have been under-reporting or otherwise manipulating the inter-bank lending rate applicable to them in order to profit on their derivatives positions or to avoid an appearance of capital insufficiency or adverse reputational or other consequences that may have resulted from reporting inter-bank lending rates higher than those they actually

submitted. A number of BBA member banks entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations by regulators and governmental authorities in various jurisdictions are ongoing.

Actions by the BBA, regulators or law enforcement agencies as a result of these or future events, may result in changes to the manner in which LIBOR is determined. Potential changes, or uncertainty related to such potential changes may adversely affect the market for LIBOR-based securities, including our portfolio of LIBOR-indexed, floating-rate debt securities. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for LIBOR-based securities or the value of our portfolio of LIBOR-indexed, floating-rate debt securities. Volatility in the global financial markets resulting from relapse of the Eurozone crisis, geopolitical developments in Eastern Europe, turbulence in the Chinese stock markets and global commodity markets, the United Kingdom's vote to leave the European Union or otherwise could have a material adverse effect on our business, financial condition and results of operations.

Volatility in the global financial markets could have an adverse effect on the economic recovery in the United States and could result from a number of causes, including a relapse in the Eurozone crisis, geopolitical developments in Eastern Europe, turbulence in the Chinese stock markets and global commodity markets or otherwise. The effects of the Eurozone crisis, which began in late 2009 as part of the global economic and financial crisis, continued to impact the global financial markets through 2015. Numerous factors continued to fuel the Eurozone crisis, including continued high levels of government debt, the undercapitalization and liquidity problems of many banks in the Eurozone and relatively low levels of economic growth. These factors made it difficult or impossible for some countries in the Eurozone, including Greece, Ireland and Portugal, to repay or refinance their debt without the assistance of third parties. As a combination of austerity programs, debt write-downs and the European Central Bank's commitment to restore financial stability to the Eurozone and the finalization of the primary European Stability Mechanism bailout fund, in 2013 and into 2014 interest rates began to fall and stock prices began to increase. Although these trends helped to stabilize the effects of the Eurozone crisis in the first half of 2014, the underlying causes of the crisis were not completely eliminated. As a result, the financial markets relapsed toward the end of 2014. In particular, Greece's newly elected government, which campaigned against austerity measures, has been unable to reach an acceptable solution to the country's debt crisis with the European Union, and in June 2015, Greece failed to make a scheduled debt repayment to the International Monetary Fund, falling into arrears. Following further unsuccessful negotiations between the government of Greece and the European Union to solve the Greek debt crisis, on July 5, 2015, Greek voters rejected a bailout package submitted by the European Commission, the European Central Bank and the International Monetary Fund, and while the European Central Bank continues to extend credit to Greece, it is uncertain how long such support will last, whether Greece will receive and accept any future bailout packages and whether Greece will default on future payments. The result of continued defaults and the removal of credit support for Greek banks may cause Greece to exit the European Union, which could lead to significant economic uncertainty and abandonment of the Euro common currency, resulting in destabilization in the financial markets. Continued financial instability in Greece and in other similarly situated Eurozone countries could have a continued contagion effect on the financial markets. Stock prices in China have experienced a significant drop in the second quarter of 2015, resulting primarily from continued sell-off of shares trading in Chinese markets. The volatility has been followed by volatility in stock markets around the world, including in the United States, as well as increased turbulence in commodity markets, such as reductions in prices of crude oil. Although the Chinese government has already taken steps to halt the collapse, it is uncertain what effect such measures will have, if any. Continued sell-off and price drops in the Chinese stock markets may have a contagion effect across the financial markets. In addition, Russian intervention in Ukraine during 2014 significantly increased regional geopolitical tensions. In response to Russian actions, U.S. and European governments have imposed sanctions on a limited number of Russian individuals and business entities. The situation remains fluid with potential for further escalation of geopolitical tensions, increased severity of sanctions against Russian interests, and possible Russian counter-measures. Further economic sanctions could destabilize the economic environment and result in increased volatility. On June 23, 2016, voters in the United Kingdom referendum (the "Referendum") on the question of whether to remain or leave the European Union voted in a majority in favor of leaving the European Union ("Brexit"). This historic event is widely expected to have consequences that are both profound and uncertain for the economic and political future of the United Kingdom and the European Union, and those consequences include significant legal and business uncertainties pertaining to our investments. Due to the very recent occurrence of Brexit, the full scope and nature of the consequences are not at this

time known and are unlikely to be known for a significant period of time. However, Brexit has led to significant uncertainty in the business, legal and political environment. Risks associated with the outcome of the Referendum include short and long term market volatility and currency volatility (including volatility of the value of the British pound sterling relative to the United States dollar and other currencies and volatility in global currency markets generally), macroeconomic risk to the United Kingdom and European economies, impetus for further disintegration of the European Union and related political stresses (including those related to sentiment against cross border capital movements and activities of investors like us), prejudice to financial services businesses that are conducting business in the European Union and which are based in the United Kingdom, legal uncertainty regarding achievement of compliance with applicable financial and commercial laws and regulations in view of the expected steps to be taken pursuant to or in contemplation of Article 50 of the Treaty on European Union and negotiations undertaken under Article 218 of the Treaty on the Functioning of the European Union, and the unavailability of

timely information as to expected legal, tax and other regimes. Should the economic recovery in the United States be adversely impacted by increased volatility in the global financial markets caused by continued contagion from the Eurozone crisis, developments in respect of the Russian sanctions, further turbulence in Chinese stock markets and global commodity markets, Brexit or for any other reason, loan and asset growth and liquidity conditions at U.S. financial institutions, including us, may deteriorate.

We may suffer credit losses.

Investment in small and middle-market companies is highly speculative and involves a high degree of risk of credit loss. These risks are likely to increase during volatile economic periods. See “Risks Related to Our Investments.” Our financial condition and results of operations will depend on our ability to manage our future growth effectively. Prospect Capital Management has been registered as an investment adviser since March 31, 2004, and we have been organized as a closed-end investment company since April 13, 2004. Our ability to achieve our investment objective depends on our ability to grow, which depends, in turn, on the Investment Adviser’s ability to continue to identify, analyze, invest in and monitor companies that meet our investment criteria. Accomplishing this result on a cost-effective basis is largely a function of the Investment Adviser’s structuring of investments, its ability to provide competent, attentive and efficient services to us and our access to financing on acceptable terms. As we continue to grow, Prospect Capital Management will need to continue to hire, train, supervise and manage new employees. Failure to manage our future growth effectively could have a materially adverse effect on our business, financial condition and results of operations.

We are dependent upon Prospect Capital Management’s key management personnel for our future success.

We depend on the diligence, skill and network of business contacts of the senior management of the Investment Adviser. We also depend, to a significant extent, on the Investment Adviser’s access to the investment professionals and the information and deal flow generated by these investment professionals in the course of their investment and portfolio management activities. The senior management team of the Investment Adviser evaluates, negotiates, structures, closes, monitors and services our investments. Our success depends to a significant extent on the continued service of the senior management team, particularly John F. Barry III and M. Grier Eliasek. The departure of any of the senior management team could have a materially adverse effect on our ability to achieve our investment objective. In addition, we can offer no assurance that Prospect Capital Management will remain the Investment Adviser or that we will continue to have access to its investment professionals or its information and deal flow.

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we make in middle-market companies. We compete with other BDCs, public and private funds, commercial and investment banks, commercial financing companies, insurance companies, hedge funds, and, to the extent they provide an alternative form of financing, private equity funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. Some competitors may have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC and that the Code imposes on us as a RIC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to pursue attractive investment opportunities from time to time.

We do not seek to compete primarily based on the interest rates we offer and we believe that some of our competitors may make loans with interest rates that are comparable to or lower than the rates we offer. Rather, we compete with our competitors based on our existing investment platform, seasoned investment professionals, experience and focus on middle-market companies, disciplined investment philosophy, extensive industry focus and flexible transaction structuring.

We may lose investment opportunities if we do not match our competitors’ pricing, terms and structure. If we match our competitors’ pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss. As a result of operating in such a competitive environment, we may make investments that are on less favorable terms than what we may have originally anticipated, which may impact our return on these investments.

We fund a portion of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us.

Borrowings and other types of financing, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. Our lenders have fixed dollar claims on our assets that are superior to the claims of our common stockholders or any preferred stockholders. If the value of our assets increases, then leveraging would cause the net asset value to increase more sharply than it would have had we not leveraged. Conversely, if the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make common stock dividend payments. Leverage is generally considered a speculative investment technique.

Changes in interest rates may affect our cost of capital and net investment income.

A portion of the debt investments we make bears interest at fixed rates and other debt investments bear interest at variable rates with floors and the value of these investments could be negatively affected by increases in market interest rates. In addition, as the interest rate on our revolving credit facility is at a variable rate based on an index, an increase in interest rates would make it more expensive to use debt to finance our investments. As a result, an increase in market interest rates could both reduce the value of our portfolio investments and increase our cost of capital, which could reduce our net investment income or net increase in net assets resulting from operations.

We need to raise additional capital to grow because we must distribute most of our income.

We need additional capital to fund growth in our investments. A reduction in the availability of new capital could limit our ability to grow. We must distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, to our stockholders to maintain our status as a regulated investment company, or RIC, for U.S. federal income tax purposes. As a result, such earnings are not available to fund investment originations. We have sought additional capital by borrowing from financial institutions and may issue debt securities or additional equity securities. If we fail to obtain funds from such sources or from other sources to fund our investments, we could be limited in our ability to grow, which may have an adverse effect on the value of our common stock. In addition, as a business development company, we generally may not borrow money or issue debt securities or issue preferred stock unless immediately thereafter our ratio of total assets to total borrowings and other senior securities is at least 200%. This may restrict our ability to obtain additional leverage in certain circumstances.

We may experience fluctuations in our quarterly results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the level of structuring fees received, the interest or dividend rates payable on the debt or equity securities we hold, the default rate on debt securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets, and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Our most recent NAV was calculated on June 30, 2016 and our NAV when calculated effective September 30, 2016 and thereafter may be higher or lower.

Our NAV per share is \$9.62 as of June 30, 2016. NAV per share as of September 30, 2016 may be higher or lower than \$9.62 based on potential changes in valuations, issuances of securities, repurchases of securities, dividends paid and earnings for the quarter then ended. Our Board of Directors has not yet determined the fair value of portfolio investments at any date subsequent to June 30, 2016. Our Board of Directors determines the fair value of our portfolio investments on a quarterly basis in connection with the preparation of quarterly financial statements and based on input from independent valuation firms, the Investment Adviser, the Administrator and the Audit Committee of our Board of Directors.

The Investment Adviser's liability is limited under the Investment Advisory Agreement, and we are required to indemnify the Investment Adviser against certain liabilities, which may lead the Investment Adviser to act in a riskier manner on our behalf than it would when acting for its own account.

The Investment Adviser has not assumed any responsibility to us other than to render the services described in the Investment Advisory Agreement, and it will not be responsible for any action of our Board of Directors in declining to follow the Investment Adviser's advice or recommendations. Pursuant to the Investment Advisory Agreement, the Investment Adviser and its members and their respective officers, managers, partners, agents, employees, controlling persons and members and any other person or entity affiliated with it will not be liable to us for their acts under the Investment Advisory Agreement, absent willful misfeasance, bad faith, gross negligence or reckless disregard in the performance of their duties. We have agreed to indemnify, defend and protect the Investment Adviser and its members and their respective officers, managers, partners, agents, employees, controlling persons and members and any other person or entity affiliated with it with respect to all damages, liabilities, costs and expenses resulting from acts of the Investment Adviser not arising out of willful misfeasance, bad faith, gross negligence or reckless disregard in the performance of their duties under the Investment Advisory Agreement. These protections may lead the Investment Adviser to act in a riskier manner when acting on our behalf than it would when acting for its own account. Potential conflicts of interest could impact our investment returns.

Our executive officers and directors, and the executive officers of the Investment Adviser, may serve as officers, directors or principals of entities that operate in the same or related lines of business as we do or of investment funds managed by our affiliates. Accordingly, they may have obligations to investors in those entities, the fulfillment of which might not be in our best interests or those of our stockholders. Nevertheless, it is possible that new investment opportunities that meet our investment objective may come to the attention of one of these entities in connection with another investment advisory client or program, and, if so, such opportunity might not be offered, or otherwise made available, to us. However, as an investment adviser, Prospect Capital Management has a fiduciary obligation to act in the best interests of its clients, including us. To that end, if Prospect Capital Management or its affiliates manage any additional investment vehicles or client accounts in the future, Prospect Capital Management will endeavor to allocate investment opportunities in a fair and equitable manner over time so as not to discriminate unfairly against any client. If Prospect Capital Management chooses to establish another investment fund in the future, when the investment professionals of Prospect Capital Management identify an investment, they will have to choose which investment fund should make the investment.

In the course of our investing activities, under the Investment Advisory Agreement we pay base management and incentive fees to Prospect Capital Management and reimburse Prospect Capital Management for certain expenses it incurs. As a result of the Investment Advisory Agreement, there may be times when the senior management team of Prospect Capital Management has interests that differ from those of our stockholders, giving rise to a conflict. The Investment Adviser receives a quarterly income incentive fee based, in part, on our pre-incentive fee net investment income, if any, for the immediately preceding calendar quarter. This income incentive fee is subject to a fixed quarterly hurdle rate before providing an income incentive fee return to Prospect Capital Management. This fixed hurdle rate was determined when then current interest rates were relatively low on a historical basis. Thus, if interest rates rise, it would become easier for our investment income to exceed the hurdle rate and, as a result, more likely that Prospect Capital Management will receive an income incentive fee than if interest rates on our investments remained constant or decreased. Subject to the receipt of any requisite stockholder approval under the 1940 Act, our Board of Directors may adjust the hurdle rate by amending the Investment Advisory Agreement.

The income incentive fee payable by us is computed and paid on income that may include interest that has been accrued but not yet received in cash. If a portfolio company defaults on a loan that has a deferred interest feature, it is possible that interest accrued under such loan that has previously been included in the calculation of the income incentive fee will become uncollectible. If this happens, we will reverse the interest that was recorded but Prospect Capital Management is not required to reimburse us for any such income incentive fee payments that were received in the past but would reduce the current period incentive fee for the effects of the reversal, if any. If we do not have sufficient liquid assets to pay this incentive fee or distributions to stockholders on such accrued income, we may be required to liquidate assets in order to do so. This fee structure could give rise to a conflict of interest for Prospect Capital Management to the extent that it may encourage Prospect Capital Management to favor debt financings that

provide for deferred interest, rather than current cash payments of interest.

31

---

We have entered into a royalty-free license agreement with Prospect Capital Management. Under this agreement, Prospect Capital Management agrees to grant us a non-exclusive license to use the name "Prospect Capital." Under the license agreement, we have the right to use the "Prospect Capital" name for so long as Prospect Capital Management or one of its affiliates remains our investment adviser. In addition, we rent office space from Prospect Administration, an affiliate of Prospect Capital Management, and pay Prospect Administration our allocable portion of overhead and other expenses incurred by Prospect Administration in performing its obligations as Administrator under the Administration Agreement, including rent and our allocable portion of the costs of our Chief Financial Officer and Chief Compliance Officer and their respective staffs. This may create conflicts of interest that our Board of Directors monitors.

Our incentive fee could induce Prospect Capital Management to make speculative investments.

The incentive fee payable by us to Prospect Capital Management may create an incentive for the Investment Adviser to make investments on our behalf that are more speculative or involve more risk than would be the case in the absence of such compensation arrangement. The way in which the incentive fee payable is determined (calculated as a percentage of the return on invested capital) may encourage the Investment Adviser to use leverage to increase the return on our investments. Increased use of leverage and this increased risk of replacement of that leverage at maturity would increase the likelihood of default, which would disfavor holders of our common stock. Similarly, because the Investment Adviser will receive an incentive fee based, in part, upon net capital gains realized on our investments, the Investment Adviser may invest more than would otherwise be appropriate in companies whose securities are likely to yield capital gains, as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The incentive fee payable by us to Prospect Capital Management could create an incentive for the Investment Adviser to invest on our behalf in instruments, such as zero coupon bonds, that have a deferred interest feature. Under these investments, we would accrue interest income over the life of the investment but would not receive payments in cash on the investment until the end of the term. Our net investment income used to calculate the income incentive fee, however, includes accrued interest. For example, accrued interest, if any, on our investments in zero coupon bonds will be included in the calculation of our incentive fee, even though we will not receive any cash interest payments in respect of payment on the bond until its maturity date. Thus, a portion of this incentive fee would be based on income that we may not have yet received in cash in the event of default may never receive.

We may be obligated to pay our Investment Adviser incentive compensation even if we incur a loss.

The Investment Adviser is entitled to incentive compensation for each fiscal quarter based, in part, on our pre-incentive fee net investment income if any, for the immediately preceding calendar quarter above a performance threshold for that quarter. Accordingly, since the performance threshold is based on a percentage of our net asset value, decreases in our net asset value make it easier to achieve the performance threshold. Our pre-incentive fee net investment income for incentive compensation purposes excludes realized and unrealized capital losses or depreciation that we may incur in the fiscal quarter, even if such capital losses or depreciation result in a net loss on our statement of operations for that quarter. Thus, we may be required to pay the Investment Adviser incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter.

The Investment Adviser and Administrator have the right to resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our business, financial condition and results of operations.

The Investment Adviser and Administrator have the right, under the Investment Advisory Agreement and Administration Agreement, respectively, to resign at any time upon not less than 60 days' written notice, whether we have found a replacement or not. If the Investment Adviser or Administrator resigns, we may not be able to find a replacement or hire internal management or administration with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our business, financial condition and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities or our internal administration activities, as

applicable, is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by the Investment Adviser and its affiliates or the Administrator and its affiliates. Even if we are able to retain comparable management or administration, whether internal or external, the integration of such management or administration and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our business, financial condition and results of operations.

Changes in the laws or regulations governing our business or the businesses of our portfolio companies and any failure by us or our portfolio companies to comply with these laws or regulations could negatively affect the profitability of our operations or the profitability of our portfolio companies.

We are subject to changing rules and regulations of federal and state governments, as well as the stock exchange on which our common stock is listed. These entities, including the Public Company Accounting Oversight Board, the SEC and the NASDAQ Global Select Market, have issued a significant number of new and increasingly complex requirements and regulations over the course of the last several years and continue to develop additional regulations. In particular, changes in the laws or regulations or the interpretations of the laws and regulations that govern BDCs, RICs or non-depository commercial lenders could significantly affect our operations and our cost of doing business. We are subject to federal, state and local laws and regulations and are subject to judicial and administrative decisions that affect our operations, including our loan originations, maximum interest rates, fees and other charges, disclosures to portfolio companies, the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, or if we expand our business into jurisdictions that have adopted more stringent requirements than those in which we currently conduct business, we may have to incur significant expenses in order to comply, or we might have to restrict our operations. In addition, if we do not comply with applicable laws, regulations and decisions, we may lose licenses needed for the conduct of our business and be subject to civil fines and criminal penalties, any of which could have a material adverse effect upon our business, financial condition and results of operations.

Foreign and domestic political risk may adversely affect our business.

We are exposed to political risk to the extent that Prospect Capital Management, on its behalf and subject to its investment guidelines, transacts in securities in the U.S. and foreign markets. The governments in any of these jurisdictions could impose restrictions, regulations or other measures, which may have a material adverse impact on our strategy.

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results or prevent fraud. As a result, stockholders could lose confidence in our financial and other public reporting, which would harm our business and the trading price of our common stock.

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports and, together with adequate disclosure controls and procedures, are designed to prevent fraud. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations. In addition, any testing by us conducted in connection with Section 404 of the Sarbanes-Oxley Act, or the subsequent testing by our independent registered public accounting firm (when undertaken, as noted below), may reveal deficiencies in our internal controls over financial reporting that are deemed to be material weaknesses or that may require prospective or retroactive changes to our consolidated financial statements or identify other areas for further attention or improvement. Inferior internal controls could also cause investors and lenders to lose confidence in our reported financial information, which could have a negative effect on the trading price of our common stock.

We face cyber-security risks.

Our business operations rely upon secure information technology systems for data processing, storage and reporting. Despite careful security and controls design, implementation and updating, our information technology systems could become subject to cyber-attacks. Network, system, application and data breaches could result in operational disruptions or information misappropriation, which could have a material adverse effect on our business, results of operations and financial condition.

The failure in cyber-security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning, could impair our ability to conduct business effectively.

The occurrence of a disaster such as a cyber-attack, a natural catastrophe, an industrial accident, a terrorist attack or war, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber-attacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions. If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, regulatory penalties and/or customer dissatisfaction or loss.

We are dependent on information systems and systems failures could significantly disrupt our business, which may, in turn, negatively affect the market price of our common stock and our ability to pay dividends.

Our business is dependent on our and third parties' communications and information systems. Any failure or interruption of those systems, including as a result of the termination of an agreement with any third-party service providers, could cause delays or other problems in our activities. Our financial, accounting, data processing, backup or other operating systems and facilities may fail to operate properly or become disabled or damaged as a result of a number of factors including events that are wholly or partially beyond our control and adversely affect our business.

There could be:

- sudden electrical or telecommunications outages;
- natural disasters such as earthquakes, tornadoes and hurricanes;
- disease pandemics;
- events arising from local or larger scale political or social matters, including terrorist acts; and
- cyber-attacks.

These events, in turn, could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to pay dividends to our stockholders.

#### Risks Relating to Our Operation as a Business Development Company

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a BDC or be precluded from investing according to our current business strategy.

As a BDC, we may not acquire any assets other than "qualifying assets" unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. We may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could be found to be in violation of the 1940 Act provisions applicable to BDCs, which would have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. Because most of our investments will be in private companies, and therefore will be relatively illiquid, any such dispositions could be made at disadvantageous prices and could result in substantial losses.

If we fail to qualify as a RIC, we will have to pay corporate-level taxes on our income, and our income available for distribution would be reduced.

To maintain our qualification for U.S. federal income tax purposes as a RIC under Subchapter M of the Code and obtain RIC tax treatment, we must meet certain source of income, annual distribution and asset diversification requirements.

The source of income requirement is satisfied if we derive at least 90% of our annual gross income from interest, dividends, payments with respect to certain securities loans, gains from the sale or other disposition of securities or options thereon or foreign currencies, or other income derived with respect to our business of investing in such securities or currencies, and net income from interests in "qualified publicly traded partnerships," as defined in the Code.

The annual distribution requirement for a RIC is satisfied if we distribute at least 90% of our ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders on an annual basis.

Because we use debt financing, we are subject to certain asset coverage ratio requirements under the 1940 Act and financial covenants that could, under certain circumstances, restrict us from making distributions necessary to qualify for RIC tax treatment. If we are unable to obtain cash from other sources, we may fail to qualify for RIC tax treatment and, thus, may be subject to corporate-level income tax on all of our taxable income.

To maintain our qualification as a RIC, we must also meet certain asset diversification requirements at the end of each quarter of our taxable year. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments are in private companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses.

If we fail to qualify as a RIC for any reason or become subject to corporate income tax, the resulting corporate taxes would substantially reduce our net assets, the amount of income available for distribution, and the actual amount of our distributions. Such a failure would have a materially adverse effect on us and our stockholders. For additional information regarding asset coverage ratio and RIC requirements, see “Business – Material U.S. Federal Income Tax Considerations” and “Business – Regulation as a Business Development Company.”

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For U.S. federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as original issue discount or payment-in-kind interest, which represents contractual interest added to the loan balance and due at the end of the loan term. Such amounts could be significant relative to our overall investment activities. We also may be required to include in taxable income certain other amounts that we do not receive in cash. While we focus primarily on investments that will generate a current cash return, our investment portfolio currently includes, and we may continue to invest in, securities that do not pay some or all of their return in periodic current cash distributions.

Since in some cases we may recognize taxable income before or without receiving cash representing such income, we may have difficulty distributing at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, as required to maintain RIC tax treatment. Accordingly, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements. If we are not able to obtain cash from other sources, we may fail to qualify for RIC treatment and thus become subject to corporate-level income tax. See “Business – Material U.S. Federal Income Tax Considerations” and “Business – Regulation as a Business Development Company.”

Regulations governing our operation as a business development company affect our ability to raise, and the way in which we raise, additional capital.

We have incurred indebtedness under our revolving credit facility and through the issuance of the Unsecured Notes and, in the future, may issue preferred stock or debt securities and/or borrow additional money from banks or other financial institutions, which we refer to collectively as “senior securities,” up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted, as a BDC, to incur indebtedness or issue senior securities only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test, which would prohibit us from paying dividends in cash or other property and could prohibit us from qualifying as a RIC. If we cannot satisfy this test, we may be required to sell a portion of our investments or sell additional shares of common stock at a time when such sales may be disadvantageous in order to repay a portion of our indebtedness or otherwise increase our net assets. In addition, issuance of additional common stock could dilute the percentage ownership of our current stockholders in us.

As a BDC regulated under provisions of the 1940 Act, we are not generally able to issue and sell our common stock at a price below the current net asset value per share without stockholder approval. If our common stock trades at a discount to net asset value, this restriction could adversely affect our ability to raise capital. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the current net asset value of our common stock in certain circumstances, including if (i)(1) the holders of a majority of our shares (or, if less, at least 67% of a quorum consisting of a majority of our shares) and a similar majority of the holders of our shares who are not affiliated persons of us approve the sale of our common stock at a price that is less than the current net asset value, and (2) a majority of our Directors who have no financial interest in the transaction and a majority of our independent Directors (a) determine that such sale is in our and our stockholders' best interests and (b) in consultation with any underwriter or underwriters of the offering, make a good faith determination as of a time either immediately prior to the first solicitation by us or on our behalf of firm commitments to purchase such shares, or immediately prior to the issuance of such shares, that the price at which such shares are to be sold is not less than a price which closely approximates the market value of such shares, less any distributing commission or discount or if (ii) a majority of the number of the beneficial holders of our common stock entitled to vote at our annual meeting, without regard to whether a majority of such shares are voted in favor of the proposal, approve the sale of our common stock at a price that is less than the current net asset value per share.

To generate cash for funding new investments, we pledged a substantial portion of our portfolio investments under our revolving credit facility. These assets are not available to secure other sources of funding or for securitization. Our ability to obtain additional secured or unsecured financing on attractive terms in the future is uncertain.

Alternatively, we may securitize our future loans to generate cash for funding new investments. See "Securitization of our assets subjects us to various risks."

Securitization of our assets subjects us to various risks.

We may securitize assets to generate cash for funding new investments. We refer to the term securitize to describe a form of leverage under which a company such as us (sometimes referred to as an "originator" or "sponsor") transfers income producing assets to a single-purpose, bankruptcy-remote subsidiary (also referred to as a "special purpose entity" or "SPE"), which is established solely for the purpose of holding such assets and entering into a structured finance transaction. The SPE then issues notes secured by such assets. The special purpose entity may issue the notes in the capital markets either publicly or privately to a variety of investors, including banks, non-bank financial institutions and other investors. There may be a single class of notes or multiple classes of notes, the most senior of which carries less credit risk and the most junior of which may carry substantially the same credit risk as the equity of the SPE.

An important aspect of most debt securitization transactions is that the sale and/or contribution of assets into the SPE be considered a true sale and/or contribution for accounting purposes and that a reviewing court would not consolidate the SPE with the operations of the originator in the event of the originator's bankruptcy based on equitable principles. Viewed as a whole, a debt securitization seeks to lower risk to the note purchasers by isolating the assets collateralizing the securitization in an SPE that is not subject to the credit and bankruptcy risks of the originator. As a result of this perceived reduction of risk, debt securitization transactions frequently achieve lower overall leverage costs for originators as compared to traditional secured lending transactions.

In accordance with the above description, to securitize loans, we may create a wholly-owned subsidiary and contribute a pool of our assets to such subsidiary. The SPE may be funded with, among other things, whole loans or interests from other pools and such loans may or may not be rated. The SPE would then sell its notes to purchasers who we would expect to be willing to accept a lower interest rate and the absence of any recourse against us to invest in a pool of income producing assets to which none of our creditors would have access. We would retain all or a portion of the equity in the SPE. An inability to successfully securitize portions of our portfolio or otherwise leverage our portfolio through secured and unsecured borrowings could limit our ability to grow our business and fully execute our business strategy, and could decrease our earnings. However, the successful securitization of portions of our portfolio exposes us to a risk of loss for the equity we retain in the SPE and might expose us to greater risk on our remaining portfolio because the assets we retain may tend to be those that are riskier and more likely to generate losses. A successful securitization may also impose financial and operating covenants that restrict our business activities and may include limitations that could hinder our ability to finance additional loans and investments or to make the distributions required to maintain our status as a RIC under Subchapter M of the Code. The 1940 Act may also impose restrictions

on the structure of any securitizations.

36

---

Interests we hold in the SPE, if any, will be subordinated to the other interests issued by the SPE. As such, we will only receive cash distributions on such interests if the SPE has made all cash interest and other required payments on all other interests it has issued. In addition, our subordinated interests will likely be unsecured and rank behind all of the secured creditors, known or unknown, of the SPE, including the holders of the senior interests it has issued. Consequently, to the extent that the value of the SPEs portfolio of assets has been reduced as a result of conditions in the credit markets, or as a result of defaults, the value of the subordinated interests we retain would be reduced. Securitization imposes on us the same risks as borrowing except that our risk in a securitization is limited to the amount of subordinated interests we retain, whereas in a borrowing or debt issuance by us directly we would be at risk for the entire amount of the borrowing or debt issuance.

If the SPE is not consolidated with us, our only interest will be the value of our retained subordinated interest and the income allocated to us, which may be more or less than the cash we receive from the SPE, and none of the SPEs liabilities will be reflected as our liabilities. If the assets of the SPE are not consolidated with our assets and liabilities, then our interest in the SPE may be deemed not to be a qualifying asset for purposes of determining whether 70% of our assets are qualifying assets and the leverage incurred by such SPE may or may not be treated as borrowings by us for purposes of the requirement that we not issue senior securities in an amount in excess of our net assets.

We may also engage in transactions utilizing SPEs and securitization techniques where the assets sold or contributed to the SPE remain on our balance sheet for accounting purposes. If, for example, we sell the assets to the SPE with recourse or provide a guarantee or other credit support to the SPE, its assets will remain on our balance sheet.

Consolidation would also generally result if we, in consultation with the SEC, determine that consolidation would result in a more accurate reflection of our assets, liabilities and results of operations. In these structures, the risks will be essentially the same as in other securitization transactions but the assets will remain our assets for purposes of the limitations described above on investing in assets that are not qualifying assets and the leverage incurred by the SPE will be treated as borrowings incurred by us for purposes of our limitation on the issuance of senior securities.

The Investment Adviser may have conflicts of interest with respect to potential securitizations in as much as securitizations that are not consolidated may reduce our assets for purposes of determining its investment advisory fee although in some circumstances the Investment Adviser may be paid certain fees for managing the assets of the SPE so as to reduce or eliminate any potential bias against securitizations.

Our ability to invest in public companies may be limited in certain circumstances.

As a BDC, we must not acquire any assets other than “qualifying assets” specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our total assets are qualifying assets (with certain limited exceptions). Subject to certain exceptions for follow-on investments and distressed companies, an investment in an issuer that has outstanding securities listed on a national securities exchange may be treated as qualifying assets only if such issuer has a market capitalization that is less than \$250 million at the time of such investment.

#### Risks Relating to Our Investments

We may not realize gains or income from our investments.

We seek to generate both current income and capital appreciation. However, the securities we invest in may not appreciate and, in fact, may decline in value, and the issuers of debt securities we invest in may default on interest and/or principal payments. Accordingly, we may not be able to realize gains from our investments, and any gains that we do realize may not be sufficient to offset any losses we experience. See “Business – Our Investment Objective and Policies.”

Most of our portfolio investments are recorded at fair value as determined in good faith under the direction of our Board of Directors and, as a result, there is uncertainty as to the value of our portfolio investments.

A large percentage of our portfolio investments consist of securities of privately held companies. Hence, market quotations are generally not readily available for determining the fair values of such investments. The determination of fair value, and thus the amount of unrealized losses we may incur in any year, is to a degree subjective, and the Investment Adviser has a conflict of interest in making the determination. We value these securities quarterly at fair value as determined in good faith by our Board of Directors based on input from the Investment Adviser, our Administrator, a third party independent valuation firm and our Audit Committee. Our Board of Directors utilizes the services of an independent valuation firm to aid it in determining the fair value of any securities. The types of factors that may be considered in determining the fair values of our investments include the nature and realizable value of any

collateral, the portfolio company's ability to make payments and its earnings, the markets in which the portfolio company does business, comparison to publicly traded companies, discounted cash flow, current market interest rates and other relevant factors.

Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, the valuations may fluctuate significantly over short periods of time due to changes in current market conditions. The determinations of fair value by our Board of Directors may differ materially from the values that would have been used if an active market and market quotations existed for these investments. Our net asset value could be adversely affected if the determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

In addition, decreases in the market values or fair values of our investments are recorded as unrealized depreciation. Declines in prices and liquidity in the corporate debt markets experienced during a financial crisis will result in significant net unrealized depreciation in our portfolio. The effect of all of these factors on our portfolio will reduce our NAV by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses which could have a material adverse impact on our business, financial condition and results of operations. We have no policy regarding holding a minimum level of liquid assets. As such, a high percentage of our portfolio generally is not liquid at any given point in time. See “The lack of liquidity may adversely affect our business.”

Price declines and illiquidity in the corporate debt markets have adversely affected, and may in the future adversely affect, the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by or under the direction of our Board of Directors. As part of the valuation process, the types of factors that we may take into account in determining the fair value of our investments include, as relevant and among other factors: available current market data, including relevant and applicable market trading and transaction comparables, applicable market yields and multiples, security covenants, call protection provisions, information rights, the nature and realizable value of any collateral, the portfolio company’s ability to make payments, its earnings and discounted cash flows, the markets in which the portfolio company does business, comparisons of financial ratios of peer companies that are public, merger and acquisition comparables, our principal market (as the reporting entity) and enterprise values. Decreases in the market values or fair values of our investments are recorded as unrealized depreciation. The effect of all of these factors on our portfolio can reduce our net asset value by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

Our investments in prospective portfolio companies may be risky and we could lose all or part of our investment. Some of our portfolio companies have relatively short or no operating histories. These companies are and will be subject to all of the business risk and uncertainties associated with any new business enterprise, including the risk that these companies may not reach their investment objective and the value of our investment in them may decline substantially or fall to zero. In addition, investment in the middle market companies that we are targeting involves a number of other significant risks, including:

These companies may have limited financial resources and may be unable to meet their obligations under their securities that we hold, which may be accompanied by a deterioration in the value of their securities or of any collateral with respect to any securities and a reduction in the likelihood of our realizing on any guarantees we may have obtained in connection with our investment.

They may have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors’ actions and market conditions, as well as general economic downturns.

Because many of these companies are privately held companies, public information is generally not available about these companies. As a result, we will depend on the ability of the Investment Adviser to obtain adequate information to evaluate these companies in making investment decisions. If the Investment Adviser is unable to uncover all material information about these companies, it may not make a fully informed investment decision, and we may lose money on our investments.

They are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a materially adverse impact on

our portfolio company and, in turn, on us.

They may have less predictable operating results, may from time to time be parties to litigation, may be engaged in changing businesses with products subject to a risk of obsolescence and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position.

They may have difficulty accessing the capital markets to meet future capital needs.

Changes in laws and regulations, as well as their interpretations, may adversely affect their business, financial structure or prospects.

Increased taxes, regulatory expense or the costs of changes to the way they conduct business due to the effects of climate change may adversely affect their business, financial structure or prospects.

We acquire majority interests in operating companies engaged in a variety of industries. When we acquire these companies we generally seek to apply financial leverage to them in the form of debt. In most cases all or a portion of this debt is held by us, with the obligor being either the operating company itself, a holding company through which we own our majority interest or both. The level of debt leverage utilized by these companies makes them susceptible to the risks identified above.

In addition, our executive officers, directors and the Investment Adviser could, in the ordinary course of business, be named as defendants in litigation arising from proposed investments or from our investments in the portfolio companies.

The lack of liquidity in our investments may adversely affect our business.

We make investments in private companies. A portion of these investments may be subject to legal and other restrictions on resale, transfer, pledge or other disposition or will otherwise be less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. In addition, we face other restrictions on our ability to liquidate an investment in a business entity to the extent that we or the Investment Adviser has or could be deemed to have material non-public information regarding such business entity.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies may be susceptible to economic slowdowns or recessions and may be unable to repay our loans or meet other obligations during these periods. Therefore, our non-performing assets are likely to increase, and the value of our portfolio is likely to decrease, during these periods. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize a portfolio company's ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company. In addition, if one of our portfolio companies were to go bankrupt, even though we may have structured our interest as senior debt or preferred equity, depending on the facts and circumstances, including the extent to which we actually provided managerial assistance to that portfolio company, a bankruptcy court might re-characterize our debt or equity holding and subordinate all or a portion of our claim to those of other creditors.

Investments in equity securities, many of which are illiquid with no readily available market, involve a substantial degree of risk.

We may purchase common and other equity securities. Although common stock has historically generated higher average total returns than fixed income securities over the long-term, common stock has significantly more volatility in those returns and may significantly underperform relative to fixed income securities. The equity securities we acquire may fail to appreciate and may decline in value or become worthless and our ability to recover our investment will depend on our portfolio company's success. Investments in equity securities involve a number of significant risks, including:

Any equity investment we make in a portfolio company could be subject to further dilution as a result of the issuance of additional equity interests and to serious risks as a junior security that will be subordinate to all indebtedness (including trade creditors) or senior securities in the event that the issuer is unable to meet its obligations or becomes

subject to a bankruptcy process.

To the extent that the portfolio company requires additional capital and is unable to obtain it, we may not recover our investment.

In some cases, equity securities in which we invest will not pay current dividends, and our ability to realize a return on our investment, as well as to recover our investment, will be dependent on the success of the portfolio company. Even if the portfolio company is successful, our ability to realize the value of our investment may be dependent on the occurrence of a liquidity event, such as a public offering or the sale of the portfolio company. It is likely to take a significant amount of time before a liquidity event occurs or we can otherwise sell our investment. In addition, the equity securities we receive or invest in may be subject to restrictions on resale during periods in which it could be advantageous to sell them.

There are special risks associated with investing in preferred securities, including:

Preferred securities may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If we own a preferred security that is deferring its distributions, we may be required to report income for tax purposes before we receive such distributions.

Preferred securities are subordinated to debt in terms of priority to income and liquidation payments, and therefore will be subject to greater credit risk than debt.

Preferred securities may be substantially less liquid than many other securities, such as common stock or U.S. government securities.

Generally, preferred security holders have no voting rights with respect to the issuing company, subject to limited exceptions.

Additionally, when we invest in first lien senior secured loans (including unitranche loans), second lien senior secured loans or unsecured debt, we may acquire warrants or other equity securities as well. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity interests and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

We may invest, to the extent permitted by law, in the equity securities of investment funds that are operating pursuant to certain exceptions to the 1940 Act and in advisers to similar investment funds and, to the extent we so invest, will bear our ratable share of any such company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to Prospect Capital Management with respect to the assets invested in the securities and instruments of such companies. With respect to each of these investments, each of our common stockholders will bear his or her share of the management and incentive fee of Prospect Capital Management as well as indirectly bearing the management and performance fees and other expenses of any such investment funds or advisers.

There may be circumstances where our debt investments could be subordinated to claims of other creditors or we could be subject to lender liability claims.

If one of our portfolio companies were to go bankrupt, even though we may have structured our interest as senior debt, depending on the facts and circumstances, a bankruptcy court might recharacterize our debt holding as an equity investment and subordinate all or a portion of our claim to that of other creditors. In addition, lenders can be subject to lender liability claims for actions taken by them where they become too involved in the borrower's business or exercise control over the borrower. For example, we could become subject to a lender's liability claim, if, among other things, we actually render significant managerial assistance.

Our portfolio companies may incur debt or issue equity securities that rank equally with, or senior to, our investments in such companies.

Our portfolio companies may have, or may be permitted to incur, other debt or issue other equity securities that rank equally with or senior to our investments. By their terms, such instruments may provide that the holders are entitled to receive payment of dividends, interest or principal on or before the dates on which we are entitled to receive payments in respect of our investments. These debt instruments would usually prohibit the portfolio companies from paying interest on or repaying our investments in the event and during the continuance of a default under such debt. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of securities ranking senior to our investment in that portfolio company typically are entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying such holders, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of securities ranking equally

with our investments, we would have to share on an equal basis any distributions with other security holders in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

40

---

The rights we may have with respect to the collateral securing any junior priority loans we make to our portfolio companies may also be limited pursuant to the terms of one or more intercreditor agreements (including agreements governing “first out” and “last out” structures) that we enter into with the holders of senior debt. Under such an intercreditor agreement, at any time that senior obligations are outstanding, we may forfeit certain rights with respect to the collateral to the holders of the senior obligations. These rights may include the right to commence enforcement proceedings against the collateral, the right to control the conduct of such enforcement proceedings, the right to approve amendments to collateral documents, the right to release liens on the collateral and the right to waive past defaults under collateral documents. We may not have the ability to control or direct such actions, even if as a result our rights as junior lenders are adversely affected.

This risk is characteristic of many of the majority-owned operating companies in our portfolio in that any debt to us from a holding company and the holding company’s substantial equity investments in the related operating company are subordinated to any creditors of the operating company.

When we are a debt or minority equity investor in a portfolio company, we are often not in a position to exert influence on the entity, and other debt holders, other equity holders and portfolio company management may make decisions that could decrease the value of our portfolio holdings.

When we make debt or minority equity investments, we are subject to the risk that a portfolio company may make business decisions with which we disagree and the other equity holders and management of such company may take risks or otherwise act in ways that do not serve our interests. As a result, a portfolio company may make decisions that could decrease the value of our investment. In addition, when we hold a subordinate debt position, other more senior debt holders may make decisions that could decrease the value of our investment.

Our portfolio companies may be highly leveraged.

Some of our portfolio companies may be highly leveraged, which may have adverse consequences to these companies and to us as an investor. These companies may be subject to restrictive financial and operating covenants and the leverage may impair these companies’ ability to finance their future operations and capital needs. As a result, these companies’ flexibility to respond to changing business and economic conditions and to take advantage of business opportunities may be limited. Further, a leveraged company’s income and net assets will tend to increase or decrease at a greater rate than if borrowed money were not used.

Our portfolio contains a limited number of portfolio companies, some of which comprise a substantial percentage of our portfolio, which subjects us to a greater risk of significant loss if any of these companies defaults on its obligations under any of its debt securities.

A consequence of the limited number of investments in our portfolio is that the aggregate returns we realize may be significantly adversely affected if one or more of our significant portfolio company investments perform poorly or if we need to write down the value of any one significant investment. Beyond our income tax diversification requirements, we do not have fixed guidelines for diversification, and our portfolio could contain relatively few portfolio companies.

Our failure to make follow-on investments in our existing portfolio companies could impair the value of our portfolio. Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as “follow-on” investments, in order to: (1) increase or maintain in whole or in part our equity ownership percentage; (2) exercise warrants, options or convertible securities that were acquired in the original or subsequent financing or (3) attempt to preserve or enhance the value of our investment.

We may elect not to make follow-on investments, may be constrained in our ability to employ available funds, or otherwise may lack sufficient funds to make those investments. We have the discretion to make any follow-on investments, subject to the availability of capital resources. The failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our concentration of risk, because we prefer other opportunities, or because we are inhibited by compliance with BDC requirements or the desire to maintain our tax status.

We may be unable to invest the net proceeds raised from offerings and repayments from investments on acceptable terms, which would harm our financial condition and operating results.

Until we identify new investment opportunities, we intend to either invest the net proceeds of future offerings and repayments from investments in interest-bearing deposits or other short-term instruments or use the net proceeds from such offerings to reduce then-outstanding obligations under our credit facility. We cannot assure you that we will be able to find enough appropriate investments that meet our investment criteria or that any investment we complete using the proceeds from an offering or repayments will produce a sufficient return.

We may have limited access to information about privately-held companies in which we invest.

We invest primarily in privately-held companies. Generally, little public information exists about these companies, and we are required to rely on the ability of the Investment Adviser's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. These companies and their financial information are not subject to the Sarbanes-Oxley Act of 2002 and other rules that govern public companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investment.

We may not be able to fully realize the value of the collateral securing our debt investments.

Although a substantial amount of our debt investments are protected by holding security interests in the assets or equity interests of the portfolio companies, we may not be able to fully realize the value of the collateral securing our investments due to one or more of the following factors:

Our debt investments may be in the form of unsecured loans, therefore our liens on the collateral, if any, are subordinated to those of the senior secured debt of the portfolio companies, if any. As a result, we may not be able to control remedies with respect to the collateral.

The collateral may not be valuable enough to satisfy all of the obligations under our secured loan, particularly after giving effect to the repayment of secured debt of the portfolio company that ranks senior to our loan.

Bankruptcy laws may limit our ability to realize value from the collateral and may delay the realization process.

Our rights in the collateral may be adversely affected by the failure to perfect security interests in the collateral.

The need to obtain regulatory and contractual consents could impair or impede how effectively the collateral would be liquidated and could affect the value received.

Some or all of the collateral may be illiquid and may have no readily ascertainable market value. The liquidity and value of the collateral could be impaired as a result of changing economic conditions, competition, and other factors, including the availability of suitable buyers.

Our investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy contemplates potential investments in securities of foreign companies, including those located in emerging market countries. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. Such risks are more pronounced in emerging market countries.

Although currently substantially all of our investments are, and we expect that most of our investments will be, U.S. dollar-denominated, investments that are denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments.

We may expose ourselves to risks if we engage in hedging transactions.

We may employ hedging techniques to minimize certain investment risks, such as fluctuations in interest and currency exchange rates, but we can offer no assurance that such strategies will be effective. If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may utilize instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Hedging against a decline in the values of our portfolio positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging can establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions may also limit the opportunity for gain if the values of the portfolio positions should increase. Moreover, it may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price. Furthermore, our ability to engage in hedging transactions may also be adversely affected by rules adopted by the U.S. Commodity Futures Trading Commission.

The success of our hedging transactions depends on our ability to correctly predict movements, currencies and interest rates. Therefore, while we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. The degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies. We have no current intention of engaging in any of the hedging transaction described above, although it reserves the right to do so in the future.

Our Board of Directors may change our operating policies and strategies without prior notice or stockholder approval, the effects of which may be adverse to us and could impair the value of our stockholders' investment.

Our Board of Directors has the authority to modify or waive our current operating policies and our strategies without prior notice and without stockholder approval. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, financial condition, and value of our common stock. However, the effects might be adverse, which could negatively impact our ability to pay dividends and cause stockholders to lose all or part of their investment.

Our investments in CLOs may be riskier and less transparent to us and our stockholders than direct investments in the underlying companies.

We invest in CLOs. Generally, there may be less information available to us regarding the underlying debt investments held by CLOs than if we had invested directly in the debt of the underlying companies. As a result, our stockholders will not know the details of the underlying securities of the CLOs in which we will invest. Our CLO investments are subject to the risk of leverage associated with the debt issued by such CLOs and the repayment priority of senior debt holders in such CLOs. Our investments in portfolio companies may be risky, and we could lose all or part of our investment.

CLOs typically will have no significant assets other than their underlying senior secured loans; payments on CLO investments are and will be payable solely from the cash flows from such senior secured loans.

CLOs typically will have no significant assets other than their underlying senior secured loans. Accordingly, payments on CLO investments are and will be payable solely from the cash flows from such senior secured loans, net of all management fees and other expenses. Payments to us as a holder of CLO junior securities are and will be made only after payments due on the senior secured notes, and, where appropriate, the junior secured notes, have been made in full. This means that relatively small numbers of defaults of senior secured loans may adversely impact our returns.

Our CLO investments are exposed to leveraged credit risk.

Generally, we are in a subordinated position with respect to realized losses on the senior secured loans underlying our investments in CLOs. The leveraged nature of CLOs, in particular, magnifies the adverse impact of senior secured

loan defaults. CLO investments represent a leveraged investment with respect to the underlying senior secured loans. Therefore, changes in the market value of the CLO investments could be greater than the change in the market value of the underlying senior secured loans, which are subject to credit, liquidity and interest rate risk.

There is the potential for interruption and deferral of cash flow from CLO investments.

If certain minimum collateral value ratios and/or interest coverage ratios are not met by a CLO, primarily due to senior secured loan defaults, then cash flow that otherwise would have been available to pay distributions to us on our CLO investments may instead be used to redeem any senior notes or to purchase additional senior secured loans, until the ratios again exceed the minimum required levels or any senior notes are repaid in full. This could result in an elimination, reduction or deferral in the distribution and/or principal paid to the holders of the CLO investments, which would adversely impact our returns.

Investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments. Our CLO investment strategy allows investments in foreign CLOs. Investing in foreign entities may expose us to additional risks not typically associated with investing in U.S. issuers. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. Further, we, and the CLOs in which we invest, may have difficulty enforcing creditor's rights in foreign jurisdictions. In addition, the underlying companies of the CLOs in which we invest may be foreign, which may create greater exposure for us to foreign economic developments.

The payment of underlying portfolio manager fees and other charges on CLO investments could adversely impact our returns.

We may invest in CLO investments where the underlying portfolio securities may be subject to management, administration and incentive or performance fees, in addition to those payable by us. Payment of such additional fees could adversely impact the returns we achieve.

The inability of a CLO collateral manager to reinvest the proceeds of the prepayment of senior secured loans may adversely affect us.

There can be no assurance that for any CLO investment, in the event that any of the senior secured loans of a CLO underlying such investment are prepaid, the CLO collateral manager will be able to reinvest such proceeds in new senior secured loans with equivalent investment returns. If the CLO collateral manager cannot reinvest in new senior secured loans with equivalent investment returns, the interest proceeds available to pay interest on the rated liabilities and investments may be adversely affected.

Our CLO investments are subject to prepayments and calls, increasing re-investment risk.

Our CLO investments and/or the underlying senior secured loans may prepay more quickly than expected, which could have an adverse impact on our value. Prepayment rates are influenced by changes in interest rates and a variety of economic, geographic and other factors beyond our control and consequently cannot be predicted with certainty. In addition, for a CLO collateral manager there is often a strong incentive to refinance well performing portfolios once the senior tranches amortize. The yield to maturity of the investments will depend on the amount and timing of payments of principal on the loans and the price paid for the investments. Such yield may be adversely affected by a higher or lower than anticipated rate of prepayments of the debt.

Furthermore, our CLO investments generally do not contain optional call provisions, other than a call at the option of the holders of the equity tranches for the senior notes and the junior secured notes to be paid in full after the expiration of an initial period in the deal (referred to as the "non-call period").

The exercise of the call option is by the relevant percentage (usually a majority) of the holders of the equity tranches and, therefore, where we do not hold the relevant percentage we will not be able to control the timing of the exercise of the call option. The equity tranches also generally have a call at any time based on certain tax event triggers. In any event, the call can only be exercised by the holders of equity tranches if they can demonstrate (in accordance with the detailed provisions in the transaction) that the senior notes and junior secured notes will be paid in full if the call is exercised.

Early prepayments and/or the exercise of a call option otherwise than at our request may also give rise to increased re-investment risk with respect to certain investments, as we may realize excess cash earlier than expected. If we are unable to reinvest such cash in a new investment with an expected rate of return at least equal to that of the investment repaid, this may reduce our net income and, consequently, could have an adverse impact on our ability to pay

dividends.

44

---

We have limited control of the administration and amendment of senior secured loans owned by the CLOs in which we invest.

We are not able to directly enforce any rights and remedies in the event of a default of a senior secured loan held by a CLO vehicle. In addition, the terms and conditions of the senior secured loans underlying our CLO investments may be amended, modified or waived only by the agreement of the underlying lenders. Generally, any such agreement must include a majority or a super majority (measured by outstanding loans or commitments) or, in certain circumstances, a unanimous vote of the lenders. Consequently, the terms and conditions of the payment obligations arising from senior secured loans could be modified, amended or waived in a manner contrary to our preferences. We have limited control of the administration and amendment of any CLO in which we invest.

The terms and conditions of target securities may be amended, modified or waived only by the agreement of the underlying security holders. Generally, any such agreement must include a majority or a super majority (measured by outstanding amounts) or, in certain circumstances, a unanimous vote of the security holders. Consequently, the terms and conditions of the payment obligation arising from the CLOs in which we invest be modified, amended or waived in a manner contrary to our preferences.

Senior secured loans of CLOs may be sold and replaced resulting in a loss to us.

The senior secured loans underlying our CLO investments may be sold and replacement collateral purchased within the parameters set out in the relevant CLO indenture between the CLO and the CLO trustee and those parameters may typically only be amended, modified or waived by the agreement of a majority of the holders of the senior notes and/or the junior secured notes and/or the equity tranche once the CLO has been established. If these transactions result in a net loss, the magnitude of the loss from the perspective of the equity tranche would be increased by the leveraged nature of the investment.

Our financial results may be affected adversely if one or more of our significant equity or junior debt investments in a CLO vehicle defaults on its payment obligations or fails to perform as we expect.

We expect that a majority of our portfolio will consist of equity and junior debt investments in CLOs, which involve a number of significant risks. CLOs are typically highly levered up to approximately 10 times, and therefore the junior debt and equity tranches that we will invest in are subject to a higher risk of total loss. In particular, investors in CLOs indirectly bear risks of the underlying debt investments held by such CLOs. We will generally have the right to receive payments only from the CLOs, and will generally not have direct rights against the underlying borrowers or the entities that sponsored the CLOs. Although it is difficult to predict whether the prices of indices and securities underlying CLOs will rise or fall, these prices, and, therefore, the prices of the CLOs will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally.

The investments we make in CLOs are thinly traded or have only a limited trading market. CLO investments are typically privately offered and sold, in the primary and secondary markets. As a result, investments in CLOs may be characterized as illiquid securities. In addition to the general risks associated with investing in debt securities, CLOs carry additional risks, including, but not limited to: (i) the possibility that distributions from the underlying senior secured loans will not be adequate to make interest or other payments; (ii) the quality of the underlying senior secured loans may decline in value or default; and (iii) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the CLO or unexpected investment results. Further, our investments in equity and junior debt tranches of CLOs are subordinate to the senior debt tranches thereof.

Investments in structured vehicles, including equity and junior debt instruments issued by CLOs, involve risks, including credit risk and market risk. Changes in interest rates and credit quality may cause significant price fluctuations. Additionally, changes in the underlying senior secured loans held by a CLO may cause payments on the instruments we hold to be reduced, either temporarily or permanently. Structured investments, particularly the subordinated interests in which we invest, are less liquid than many other types of securities and may be more volatile than the senior secured loans underlying the CLOs in which we invest.

Non-investment grade debt involves a greater risk of default and higher price volatility than investment grade debt. The senior secured loans underlying our CLO investments typically are BB or B rated (non-investment grade) and in limited circumstances, unrated, senior secured loans. Non-investment grade securities are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default and higher price volatility than investment grade debt.

We will have no influence on management of underlying investments managed by non-affiliated third party CLO collateral managers.

We are not responsible for and have no influence over the asset management of the portfolios underlying the CLO investments we hold as those portfolios are managed by non-affiliated third party CLO collateral managers. Similarly, we are not responsible for and have no influence over the day-to-day management, administration or any other aspect of the issuers of the individual securities. As a result, the values of the portfolios underlying our CLO investments could decrease as a result of decisions made by third party CLO collateral managers.

The effects of compliance with the Volcker Rule may affect the CLO market in ways that we cannot currently anticipate.

Section 619 of the Dodd-Frank Act added a provision, commonly referred to as the “Volcker Rule,” to federal banking laws to prohibit covered banking entities from engaging in proprietary trading or acquiring or retaining an ownership interest in, sponsoring or having certain relationships with “covered funds.” Generally, a covered fund would include a hedge fund or a private equity fund; however, the definition is sufficiently broad that it may include certain CLOs.

The Volcker Rule provides that certain loan securitization vehicles are not considered “covered funds” for purposes of the prohibitions. In order to meet the definition of a loan securitization, the assets or holdings of the fund must, among other things, consist solely of loans and cannot include securities, such as bonds. In an effort to qualify for this “loan securitization” exclusion, many current CLOs are undertaking amendments to their related transaction documents that restrict the ability of the issuer to acquire bonds and certain other securities. Such an amendment may have the effect of reducing the return available to holders of CLO equity securities because bonds are generally higher yielding assets than are loans. In addition, the costs associated with such an amendment are typically paid out of the cash flow of the CLO, which could impact the return on our investment in any CLO equity securities. In addition, as a result of the uncertainty regarding the implementation and interpretation of the Volcker Rule, it is likely that many future CLOs will contain similar restrictions on the acquisition of bonds and certain other securities, which may have the effect of lowering returns on CLO equity securities. Our CLO equity portfolio is comprised principally of non-Volcker Rule compliant CLOs.

Generally, due to the lack of clarity as to the application of the Volcker Rule and the availability of certain exemptions, certain investors that are subject to the Volcker Rule may not be as interested in CLO investments in the future. Any decline in interest may adversely affect the market value or liquidity of any or all of the CLO investments we hold. Similarly, it is possible that uncertainty regarding the treatment of CLOs may adversely affect the volume of CLO issuance.

With respect to our online consumer lending initiative, we are dependent on the business performance and competitiveness of marketplace lending facilitators and our ability to assess loan underwriting performance and, if the marketplace lending facilitators from which we currently purchase consumer loans are unable to maintain or increase consumer loan originations, or if such marketplace lending facilitators do not continue to sell consumer loans to us, or we are unable to otherwise purchase additional loans, our business and results of operations will be adversely affected. With respect to our online consumer lending initiative, we invest primarily in marketplace loans through marketplace lending facilitators. We do not conduct loan origination activities ourselves. Therefore, our ability to purchase consumer loans, and our ability to grow our portfolio of consumer loans, is directly influenced by the business performance and competitiveness of the marketplace loan origination business of the marketplace lending facilitators from which we purchase consumer loans.

In addition, our ability to analyze the risk-return profile of consumer loans is significantly dependent on the marketplace facilitator's ability to effectively evaluate a borrower's credit profile and likelihood of default. The platforms from which we purchase such loans utilize credit decisioning and scoring models that assign each such loan offered a corresponding interest rate and origination fee. Our returns are a function of the assigned interest rate for each such particular loan purchased less any defaults over the term of the applicable loan. We evaluate the credit decisioning and scoring models implemented by each platform on a regular basis and leverage the additional data on loan history experience, borrower behavior, economic factors and prepayment trends that we accumulate to continually improve our own decisioning model. If we are unable to effectively evaluate borrowers' credit profiles or the credit decisioning and scoring models implemented by each platform, we may incur unanticipated losses which could adversely impact our operating results. Further, if the interest rates for consumer loans available through

marketplace lending platforms are set too high or too low, it may adversely impact our ability to receive returns on our investment that are commensurate with the risks we incur in purchasing the loans.

With respect to our online consumer lending initiative, we rely on the marketplace lending facilitators to service loans including pursuing collections against borrowers. Personal loans facilitated through the marketplace lending facilitators are not secured by any collateral, are not guaranteed or insured by any third-party and are not backed by any governmental authority in any way. Marketplace lending facilitators are therefore limited in their ability to collect on the loans if a borrower is unwilling or unable to repay. A borrower's ability to repay can be negatively impacted by increases in their payment obligations to other lenders under mortgage, credit card and other loans, including student loans and home equity lines of credit. These changes can result from

increases in base lending rates or structured increases in payment obligations and could reduce the ability of the borrowers to meet their payment obligations to other lenders and under the loans purchased by us. If a borrower defaults on a loan, the marketplace lending facilitators may outsource subsequent servicing efforts to third-party collection agencies, which may be unsuccessful in their efforts to collect the amount of the loan. Marketplace lending facilitators make payments ratably on an investor's investment only if they receive the borrower's payments on the corresponding loan. If they do not receive payments on the corresponding loan related to an investment, we are not entitled to any payments under the terms of the investment.

As servicers of the loans we purchase as part of our online consumer lending initiative, the marketplace lending facilitators have the authority to waive or modify the terms of a consumer loan without our consent or allow the postponement of strict compliance with any such term or in any manner grant any other indulgence to any borrower. If the marketplace lending facilitators approve a modification to the terms of any consumer loan it may adversely impact our revenues.

To continue to grow our online consumer lending initiative business, we rely on marketplace lending facilitators from which we purchase loans to maintain or increase their consumer loan originations and to agree to sell their consumer loans to us. However, we do not have any exclusive arrangements with any of the marketplace lending facilitators and have no agreements with them to provide us with a guaranteed source of supply. There can be no assurance that such marketplace lending facilitators will be able to maintain or increase consumer loan originations or will continue to sell their consumer loans to us, or that we will be able to otherwise purchase additional loans and, consequently, there can be no assurance that we will be able to grow our business through investment in additional loans. The consumer marketplace lending facilitators could elect to become investors in their own marketplace loans which would limit the amount of supply available for our own investments. An inability to expand our business through investments in additional consumer loans would reduce the return on investment that we might otherwise be able to realize from an increased portfolio of such investments. If we are unable to expand our business relating to our online consumer lending initiative, this may have a material adverse effect on our business, financial condition, results of operations and prospects.

Additionally, if marketplace lending facilitators are unable to attract qualified borrowers and sufficient investor commitments or borrowers and investors do not continue to participate in marketplace lending at current rates, the growth of loan originations will slow or loan originations will decrease. As a result of any of these factors, we may be unable to increase our consumer loan investments and our revenue may grow more slowly than expected or decline, which could have a material adverse effect on our business, financial condition and results of operations.

Marketplace lending facilitators on which we rely as part of our online consumer lending initiative depend on issuing banks to originate all loans and to comply with various federal, state and other laws.

Typically, the contracts between marketplace lending facilitators and their loan issuing banks are non-exclusive and do not prohibit the issuing banks from working with other marketplace lending facilitators or from offering competing services. Issuing banks could decide that working with marketplace lending facilitators is not in their interests, could make working with marketplace lending facilitators cost prohibitive or could decide to enter into exclusive or more favorable relationships with other marketplace lending facilitators that do not provide consumer loans to us. In addition, issuing banks may not perform as expected under their agreements. Marketplace lending facilitators could in the future have disagreements or disputes with their issuing banks. Any of these factors could negatively impact or threaten our ability to obtain consumer loans and consequently could have a material adverse effect on our business, financial condition, results of operations and prospects.

Issuing banks are subject to oversight by the FDIC and the states where they are organized and operate and must comply with complex rules and regulations, as well as licensing and examination requirements, including requirements to maintain a certain amount of regulatory capital relative to their outstanding loans. If issuing banks were to suspend, limit or cease their operations or the relationship between the marketplace lending facilitators and the issuing bank were to otherwise terminate, the marketplace lending facilitators would need to implement a substantially similar arrangement with another issuing bank, obtain additional state licenses or curtail their operations. If the marketplace lending facilitators are required to enter into alternative arrangements with a different issuing bank to replace their existing arrangements, they may not be able to negotiate a comparable alternative arrangement. This may result in their inability to facilitate loans through their platform and accordingly our inability to operate the business of

our online consumer lending initiative. If the marketplace lending facilitators were unable to enter into an alternative arrangement with a different issuing bank, they would need to obtain a state license in each state in which they operate in order to enable them to originate loans, as well as comply with other state and federal laws, which would be costly and time-consuming and could have a material adverse effect on our business, financial condition, results of operations and prospects. If the marketplace lending facilitators are unsuccessful in maintaining their relationships with the issuing banks, their ability to provide loan products could be materially impaired and our operating results could suffer.

Credit and other information that is received about a borrower may be inaccurate or may not accurately reflect the borrower's creditworthiness, which may cause the loans to be inaccurately priced.

The marketplace lending facilitators obtain borrower credit information from consumer reporting agencies, such as TransUnion, Experian or Equifax, and assign loan grades to loan requests based on credit decisioning and scoring models that take into account reported credit scores and the requested loan amount, in addition to a variety of other factors. A credit score or loan grade assigned to a borrower may not reflect that borrower's actual creditworthiness because the credit score may be based on incomplete or inaccurate consumer reporting data, and typically, the marketplace lending facilitators do not verify the information obtained from the borrower's credit report. Additionally, there is a risk that, following the date of the credit report that the models are based on, a borrower may have:

- become delinquent in the payment of an outstanding obligation;
- defaulted on a pre-existing debt obligation;
- taken on additional debt; or
- sustained other adverse financial events.

Borrowers supply a variety of information to the marketplace lending facilitators based on which the facilitators price the loans. In a number of cases, marketplace lending facilitators do not verify all of this information, and it may be inaccurate or incomplete. For example, marketplace lending facilitators do not always verify a borrower's stated tenure, job title, home ownership status or intention for the use of loan proceeds. Moreover, we do not, and will not, have access to financial statements of borrowers or to other detailed financial information about the borrowers. If we invest in loans through the marketplace provided by the marketplace lending facilitators based on information supplied by borrowers or third parties that is inaccurate, misleading or incomplete, we may not receive expected returns on our investments and this could have a material adverse impact on our business, financial condition, results of operations and prospects and our reputation may be harmed.

Marketplace lending is a relatively new lending method and the platforms of marketplace lending facilitators have a limited operating history relative to established consumer banks. Borrowers may not view or treat their obligations under any such loans we purchase as having the same significance as loans from traditional lending sources, such as bank loans.

The return on our investment in consumer loans depends on borrowers fulfilling their payment obligations in a timely and complete manner under the corresponding consumer loan. Borrowers may not view their obligations originated on the lending platforms that the marketplace lending facilitators provide as having the same significance as other credit obligations arising under more traditional circumstances, such as loans from banks or other commercial financial institutions. If a borrower neglects his or her payment obligations on a consumer loan or chooses not to repay his or her consumer loan entirely, we may not be able to recover any portion of our investment in the consumer loans. This will adversely impact our business, financial condition, results of operations and prospects.

Risks affecting investments in real estate.

We make investments in commercial and multi-family residential real estate through our wholly-owned tax-efficient real estate investment trust NPRC, the surviving entity of the May 23, 2016 merger of APRC and UPRC. A number of factors may prevent each of NPRC's properties and assets from generating sufficient net cash flow or may adversely affect their value, or both, resulting in less cash available for distribution, or a loss, to us. These factors include:

- national economic conditions;
- regional and local economic conditions (which may be adversely impacted by plant closings, business layoffs, industry slow-downs, weather conditions, natural disasters, and other factors);
- local real estate conditions (such as over-supply of or insufficient demand for office space);
- changing demographics;
- perceptions by prospective tenants of the convenience, services, safety, and attractiveness of a property;
- the ability of property managers to provide capable management and adequate maintenance;
- the quality of a property's construction and design;

- increases in costs of maintenance, insurance, and operations (including energy costs and real estate taxes);
- changes in applicable laws or regulations (including tax laws, zoning laws, or building codes);
- potential environmental and other legal liabilities;
- the level of financing used by NPRC in respect of its properties, increases in interest rate levels on such financings and the risk that NPRC will default on such financings, each of which increases the risk of loss to us;
- the availability and cost of refinancing;
- the ability to find suitable tenants for a property and to replace any departing tenants with new tenants;
- potential instability, default or bankruptcy of tenants in the properties owned by NPRC;
- potential limited number of prospective buyers interested in purchasing a property that NPRC wishes to sell; and
- the relative illiquidity of real estate investments in general, which may make it difficult to sell a property at an attractive price or within a reasonable time frame.

To the extent OID and PIK interest constitute a portion of our income, we will be exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash representing such income.

Our investments may include original issue discount, or OID, instruments and payment in kind, or PIK, interest arrangements, which represents contractual interest added to a loan balance and due at the end of such loan's term. To the extent OID or PIK interest constitute a portion of our income, we are exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash, including the following:

The higher interest rates of OID and PIK instruments reflect the payment deferral and increased credit risk associated with these instruments, and OID and PIK instruments generally represent a significantly higher credit risk than coupon loans.

Even if the accounting conditions for income accrual are met, the borrower could still default when our actual collection is supposed to occur at the maturity of the obligation.

OID and PIK instruments may have unreliable valuations because their continuing accruals require continuing judgments about the collectibility of the deferred payments and the value of any associated collateral. OID and PIK income may also create uncertainty about the source of our cash distributions.

For accounting purposes, any cash distributions to shareholders representing OID and PIK income are not treated as coming from paid-in capital, even if the cash to pay them comes from offering proceeds. As a result, despite the fact that a distribution representing OID and PIK income could be paid out of amounts invested by our stockholders, the 1940 Act does not require that stockholders be given notice of this fact by reporting it as a return of capital.

#### Risks Relating to Our Securities

Our credit ratings may not reflect all risks of an investment in our debt securities.

Our credit ratings are an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of our debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed above on the market value of or trading market for the publicly issued debt securities.

Senior securities, including debt, expose us to additional risks, including the typical risks associated with leverage and could adversely affect our business, financial condition and results of operations.

We currently use our revolving credit facility to leverage our portfolio and we expect in the future to borrow from and issue senior debt securities to banks and other lenders and may securitize certain of our portfolio investments. We also have the Unsecured Notes outstanding, which are a form of leverage and are senior in payment rights to our common stock.

With certain limited exceptions, as a BDC, we are only allowed to borrow amounts or otherwise issue senior securities such that our asset coverage, as defined in the 1940 Act, is at least 200% after such borrowing or other issuance. The amount of leverage

that we employ will depend on the Investment Adviser's and our Board of Directors' assessment of market conditions and other factors at the time of any proposed borrowing. There is no assurance that a leveraging strategy will be successful. Leverage involves risks and special considerations for stockholders, any of which could adversely affect our business, financial condition and results of operations, including the following:

- A likelihood of greater volatility in the net asset value and market price of our common stock;
- Diminished operating flexibility as a result of asset coverage or investment portfolio composition requirements required by lenders or investors that are more stringent than those imposed by the 1940 Act;
- The possibility that investments will have to be liquidated at less than full value or at inopportune times to comply with debt covenants or to pay interest or dividends on the leverage;
- Increased operating expenses due to the cost of leverage, including issuance and servicing costs;
- Convertible or exchangeable securities, such as the Convertible Notes outstanding or those issued in the future may have rights, preferences and privileges more favorable than those of our common stock;
- Subordination to lenders' superior claims on our assets as a result of which lenders will be able to receive proceeds available in the case of our liquidation before any proceeds will be distributed to our stockholders;
- Difficulty meeting our payment and other obligations under the Unsecured Notes and our other outstanding debt; The occurrence of an event of default if we fail to comply with the financial and/or other restrictive covenants contained in our debt agreements, including the credit agreement and each indenture governing the Unsecured Notes, which event of default could result in all or some of our debt becoming immediately due and payable;
- Reduced availability of our cash flow to fund investments, acquisitions and other general corporate purposes, and limiting our ability to obtain additional financing for these purposes;
- The risk of increased sensitivity to interest rate increases on our indebtedness with variable interest rates, including borrowings under our amended senior credit facility; and
- Reduced flexibility in planning for, or reacting to, and increasing our vulnerability to, changes in our business, the industry in which we operate and the general economy.

For example, the amount we may borrow under our revolving credit facility is determined, in part, by the fair value of our investments. If the fair value of our investments declines, we may be forced to sell investments at a loss to maintain compliance with our borrowing limits. Other debt facilities we may enter into in the future may contain similar provisions. Any such forced sales would reduce our net asset value and also make it difficult for the net asset value to recover. The Investment Adviser and our Board of Directors in their best judgment nevertheless may determine to use leverage if they expect that the benefits to our stockholders of maintaining the leveraged position will outweigh the risks.

In addition, our ability to meet our payment and other obligations of the Unsecured Notes and our credit facility depends on our ability to generate significant cash flow in the future. This, to some extent, is subject to general economic, financial, competitive, legislative and regulatory factors as well as other factors that are beyond our control. We cannot provide assurance that our business will generate cash flow from operations, or that future borrowings will be available to us under our existing credit facility or otherwise, in an amount sufficient to enable us to meet our payment obligations under the Unsecured Notes and our other debt and to fund other liquidity needs. If we are not able to generate sufficient cash flow to service our debt obligations, we may need to refinance or restructure our debt, including the Unsecured Notes, sell assets, reduce or delay capital investments, or seek to raise additional capital. If we are unable to implement one or more of these alternatives, we may not be able to meet our payment obligations under the Unsecured Notes and our other debt.

Illustration. The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of interest expense. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing below. The calculation assumes (i) \$6.3 billion in total assets, (ii) an average cost of funds of 5.38%, (iii) \$2.9 billion in debt outstanding and (iv) \$3.4 billion of shareholders' equity.

Assumed Return on Our Portfolio (net of expenses)	(10 )%	(5 )%	0 %	5 %	10 %
Corresponding Return to Stockholder	(23.1)%	(13.9)%	(4.6)%	4.7%	13.9%

The assumed portfolio return is required by regulation of the SEC and is not a prediction of, and does not represent, our projected or actual performance. Actual returns may be greater or less than those appearing in the table.

The Convertible Notes and the Public Notes present other risks to holders of our common stock, including the possibility that such notes could discourage an acquisition of us by a third party and accounting uncertainty. Certain provisions of the Convertible Notes and the Public Notes could make it more difficult or more expensive for a third party to acquire us. Upon the occurrence of certain transactions constituting a fundamental change, holders of the Convertible Notes and the Public Notes will have the right, at their option, to require us to repurchase all of their notes or any portion of the principal amount of such notes in integral multiples of \$1,000. We may also be required to increase the conversion rate or provide for conversion into the acquirer's capital stock in the event of certain fundamental changes with respect to the Convertible Notes. These provisions could discourage an acquisition of us by a third party.

The accounting for convertible debt securities is subject to frequent scrutiny by the accounting regulatory bodies and is subject to change. We cannot predict if or when any such change could be made and any such change could have an adverse impact on our reported or future financial results. Any such impacts could adversely affect the market price of our common stock.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. Payment of such dividends and repayment of the liquidation preference of such preferred stock must take preference over any dividends or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

Holders of any preferred stock we might issue would have the right to elect members of the board of directors and class voting rights on certain matters.

Holders of any preferred stock we might issue, voting separately as a single class, would have the right to elect two members of the board of directors at all times and in the event dividends become two full years in arrears would have the right to elect a majority of the directors until such arrearage is completely eliminated. In addition, preferred stockholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion to open-end status, and accordingly can veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies or the terms of our credit facilities, might impair our ability to maintain our qualification as a RIC for federal income tax purposes. While we would intend to redeem our preferred stock to the extent necessary to enable us to distribute our income as required to maintain our qualification as a RIC, there can be no assurance that such actions could be effected in time to meet the tax requirements.

In addition to regulatory restrictions that restrict our ability to raise capital, our credit facility contains various covenants which, if not complied with, could accelerate repayment under the facility, thereby materially and adversely affecting our liquidity, financial condition and results of operations.

The agreement governing our credit facility requires us to comply with certain financial and operational covenants. These covenants include:

- Restrictions on the level of indebtedness that we are permitted to incur in relation to the value of our assets;
- Restrictions on our ability to incur liens; and
- Maintenance of a minimum level of stockholders' equity.

As of June 30, 2016, we were in compliance with these covenants. However, our continued compliance with these covenants depends on many factors, some of which are beyond our control. Accordingly, there are no assurances that we will continue to comply with the covenants in our credit facility. Failure to comply with these covenants would result in a default under this facility which, if we were unable to obtain a waiver from the lenders thereunder, could result in an acceleration of repayments under the facility and thereby have a material adverse impact on our business, financial condition and results of operations.

Failure to extend our existing credit facility, the revolving period of which is currently scheduled to expire on March 27, 2019, could have a material adverse effect on our results of operations and financial position and our ability

to pay expenses and make distributions.

51

---

The revolving period for our credit facility with a syndicate of lenders is currently scheduled to terminate on March 27, 2019, with an additional one year amortization period (with distributions allowed) after the completion of the revolving period. During such one year amortization period, all principal payments on the pledged assets will be applied to reduce the balance. At the end of the one year amortization period, the remaining balance will become due, if required by the lenders. If the credit facility is not renewed or extended by the participant banks by March 27, 2019, we will not be able to make further borrowings under the facility after such date and the outstanding principal balance on that date will be due and payable on March 27, 2020. As of June 30, 2016, we did not have any outstanding borrowings under our credit facility. Interest on borrowings under the credit facility is one-month LIBOR plus 225 basis points with no minimum LIBOR floor. Additionally, the lenders charge a fee on the unused portion of the credit facility equal to either 50 basis points if at least 35% of the credit facility is drawn or 100 basis points otherwise. The credit facility requires us to pledge assets as collateral in order to borrow under the credit facility. If we are unable to extend our facility or find a new source of borrowing on acceptable terms, we will be required to pay down the amounts outstanding under the facility during the two-year term-out period through one or more of the following: (1) principal collections on our securities pledged under the facility, (2) at our option, interest collections on our securities pledged under the facility and cash collections on our securities not pledged under the facility, or (3) possible liquidation of some or all of our loans and other assets, any of which could have a material adverse effect on our results of operations and financial position and may force us to decrease or stop paying certain expenses and making distributions until the facility is repaid. In addition, our stock price could decline significantly, we would be restricted in our ability to acquire new investments and, in connection with our year-end audit, our independent registered accounting firm could raise an issue as to our ability to continue as a going concern. Failure to refinance our existing Unsecured Notes could have a material adverse effect on our results of operations and financial position.

The Unsecured Notes mature at various dates from August 15, 2016 to October 15, 2043. If we are unable to refinance the Unsecured Notes or find a new source of borrowing on acceptable terms, we will be required to pay down the amounts outstanding at maturity under the facility during the two-year term-out period through one or more of the following: (1) borrowing additional funds under our then current credit facility, (2) issuance of additional common stock or (3) possible liquidation of some or all of our loans and other assets, any of which could have a material adverse effect on our results of operations and financial position. In addition, our stock price could decline significantly; we would be restricted in our ability to acquire new investments and, in connection with our year-end audit, our independent registered accounting firm could raise an issue as to our ability to continue as a going concern. The trading market or market value of our publicly issued debt securities may fluctuate.

Our publicly issued debt securities may or may not have an established trading market. We cannot assure our noteholders that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

- the time remaining to the maturity of these debt securities;
- the outstanding principal amount of debt securities with terms identical to these debt securities;
- the ratings assigned by national statistical ratings agencies;
- the general economic environment;
- the supply of debt securities trading in the secondary market, if any;
- the redemption or repayment features, if any, of these debt securities;
- the level, direction and volatility of market interest rates generally; and
- market rates of interest higher or lower than rates borne by the debt securities.

Our noteholders should also be aware that there may be a limited number of buyers when they decide to sell their debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

Terms relating to redemption may materially adversely affect our noteholders return on any debt securities that we may issue.

If our noteholders' debt securities are redeemable at our option, we may choose to redeem their debt securities at times when prevailing interest rates are lower than the interest rate paid on their debt securities. In addition, if our noteholders' debt securities are subject to mandatory redemption, we may be required to redeem their debt securities also at times when prevailing interest rates are lower than the interest rate paid on their debt securities. In this circumstance, our noteholders may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as their debt securities being redeemed.

Our shares of common stock currently trade at a discount from net asset value and may continue to do so in the future, which could limit our ability to raise additional equity capital.

Shares of closed-end investment companies frequently trade at a market price that is less than the net asset value that is attributable to those shares. This characteristic of closed-end investment companies is separate and distinct from the risk that our net asset value per share may decline. It is not possible to predict whether any shares of our common stock will trade at, above, or below net asset value. The stocks of BDCs as an industry, including shares of our common stock, currently trade below net asset value as a result of concerns over liquidity, interest rate changes, leverage restrictions and distribution requirements. When our common stock is trading below its net asset value per share, we will not be able to issue additional shares of our common stock at its market price without first obtaining approval for such issuance from our stockholders and our independent directors. At our 2015 annual meeting of stockholders held on December 4, 2015 and continued until January 8, 2016, our stockholders approved our ability, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, to sell shares of our common stock at any level of discount from net asset value per share during the 12 month period following January 8, 2016.

There is a risk that investors in our common stock may not receive dividends or that our dividends may not grow over time and investors in our debt securities may not receive all of the interest income to which they are entitled.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. If we declare a dividend and if more stockholders opt to receive cash distributions rather than participate in our dividend reinvestment plan, we may be forced to sell some of our investments in order to make cash dividend payments.

In addition, due to the asset coverage test applicable to us as a BDC, we may be limited in our ability to make distributions. Further, if we invest a greater amount of assets in equity securities that do not pay current dividends, it could reduce the amount available for distribution.

The above-referenced restrictions on distributions may also inhibit our ability to make required interest payments to holders of our debt, which may cause a default under the terms of our debt agreements. Such a default could materially increase our cost of raising capital, as well as cause us to incur penalties under the terms of our debt agreements.

Investing in our securities may involve a high degree of risk and is highly speculative.

The investments we make in accordance with our investment objective may result in a higher amount of risk than alternative investment options and volatility or loss of principal. Our investments in portfolio companies may be speculative and aggressive, and therefore, an investment in our shares may not be suitable for someone with low risk tolerance.

Our stockholders will experience dilution in their ownership percentage if they opt out of our dividend reinvestment plan.

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan are automatically reinvested in shares of our common stock. As a result, our stockholders that opt out of our dividend reinvestment plan will experience dilution in their ownership percentage of our common stock over time.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

Sales of substantial amounts of our common stock, or the availability of such common stock for sale (including as a result of the conversion of the Convertible Notes into common stock), could adversely affect the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

If we sell shares of our common stock or securities to subscribe for or are convertible into shares of our common stock at a discount to our net asset value per share, stockholders who do not participate in such sale will experience immediate dilution in an amount that may be material.

At our 2015 annual meeting of stockholders held on December 4, 2015 and continued until January 8, 2016, our stockholders approved our ability, subject to the condition that the maximum number of shares salable below net asset value pursuant to this authority in any particular offering that could result in such dilution is limited to 25% of our then outstanding common stock immediately prior to each such offering, to sell shares of our common stock at any level of discount from net asset value per share during the 12 month period following January 8, 2016. The issuance or sale by us of shares of our common stock or securities to subscribe for or are convertible into shares of our common stock at a discount to net asset value poses a risk of dilution to our stockholders. In particular, stockholders who do not purchase additional shares of common stock at or below the discounted price in proportion to their current ownership will experience an immediate decrease in net asset value per share (as well as in the aggregate net asset value of their shares of common stock if they do not participate at all). These stockholders will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than the increase we experience in our assets, potential earning power and voting interests from such issuance or sale. In addition, such sales may adversely affect the price at which our common stock trades. We have sold shares of our common stock at prices below net asset value per share in the past and may do so to the future. We have not sold any shares of our common stock at prices below net asset value per share since December 3, 2014.

Our ability to enter into transactions with our affiliates is restricted.

We are prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of our independent directors. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities is our affiliate for purposes of the 1940 Act and we are generally prohibited from buying or selling any security or other property from or to such affiliate, absent the prior approval of our independent directors. The 1940 Act also prohibits “joint” transactions with an affiliate, which could include investments in the same portfolio company (whether at the same or different times), without prior approval of our independent directors. Subject to certain limited exceptions, we are prohibited from buying or selling any security or other property from or to the Investment Adviser and its affiliates and persons with whom we are in a control relationship, or entering into joint transactions with any such person, absent the prior approval of the SEC.

On February 10, 2014, we received an exemptive order from the SEC (the “Order”) that gave us the ability to negotiate terms other than price and quantity of co-investment transactions with other funds managed by the Investment Adviser or certain affiliates, including Priority Income Fund, Inc. and Pathway Energy Infrastructure Fund, Inc., subject to the conditions included therein. Under the terms of the relief permitting us to co-invest with other funds managed by our Investment Adviser or its affiliates, a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors must make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching of us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies. In certain situations where co-investment with one or more funds managed by the Investment Adviser or its affiliates is not covered by the Order, such as when there is an opportunity to invest in different securities of the same issuer, the personnel of the Investment Adviser or its affiliates will need to decide which fund will proceed with the investment. Such personnel will make these determinations based on policies and procedures, which are designed to reasonably ensure that investment opportunities are allocated fairly and equitably among affiliated funds over time and in a manner that is consistent with applicable laws, rules and regulations. Moreover, except in certain circumstances, when relying on the Order, we will be unable to invest in any issuer in which one or more funds managed by the Investment Adviser or its affiliates has previously invested.

The market price of our securities may fluctuate significantly.

The market price and liquidity of the market for our securities may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

-

significant volatility in the market price and trading volume of securities of business development companies or other companies in the energy industry, which are not necessarily related to the operating performance of these companies;  
price and volume fluctuations in the overall stock market from time to time;  
changes in regulatory policies or tax guidelines, particularly with respect to RICs or business development companies;  
loss of RIC qualification;

- changes in earnings or variations in operating results;
- changes in the value of our portfolio of investments;
- any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;
- departure of one or more of Prospect Capital Management's key personnel;
- operating performance of companies comparable to us;
- short-selling pressure with respect to shares of our common stock or BDCs generally;
- future sales of our securities convertible into or exchangeable or exercisable for our common stock or the conversion of such securities, including the Convertible Notes;
- uncertainty surrounding the strength of the U.S. economic recovery;
- concerns regarding European sovereign debt;
- changes in prevailing interest rates;
- litigation matters;
- general economic trends and other external factors; and
- loss of a major funding source.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has, from time to time, been brought against that company.

If our stock price fluctuates significantly, we may be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business.

There is a risk that you may not receive distributions or that our distributions may not grow over time.

We have made and intend to continue to make distributions on a monthly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results or maintain a tax status that will allow or require any specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage test applicable to us as a business development company, we may be limited in our ability to make distributions.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

Our charter and bylaws and the Maryland General Corporation Law contain provisions that may have the effect of delaying, deferring or preventing a transaction or a change in control that might involve a premium price for our stockholders or otherwise be in their best interest. These provisions may prevent stockholders from being able to sell shares of our common stock at a premium over the current of prevailing market prices.

Our charter provides for the classification of our Board of Directors into three classes of directors, serving staggered three-year terms, which may render a change of control or removal of our incumbent management more difficult. Furthermore, any and all vacancies on our Board of Directors will be filled generally only by the affirmative vote of a majority of the remaining directors in office, even if the remaining directors do not constitute a quorum, and any director elected to fill a vacancy will serve for the remainder of the full term until a successor is elected and qualifies. Our Board of Directors is authorized to create and issue new series of shares, to classify or reclassify any unissued shares of stock into one or more classes or series, including preferred stock and, without stockholder approval, to amend our charter to increase or decrease the number of shares of common stock that we have authority to issue, which could have the effect of diluting a stockholder's ownership interest. Prior to the issuance of shares of common stock of each class or series, including any reclassified series, our Board of Directors is required by our governing documents to set the terms, preferences, conversion or other rights, voting powers, restrictions, limitations as to dividends or other distributions, qualifications and terms or conditions of redemption for each class or series of shares of stock.

Our charter and bylaws also provide that our Board of Directors has the exclusive power to adopt, alter or repeal any provision of our bylaws, and to make new bylaws. The Maryland General Corporation Law also contains certain provisions that may limit the ability of a third party to acquire control of us, such as:

The Maryland Business Combination Act, which, subject to certain limitations, prohibits certain business combinations between us and an “interested stockholder” (defined generally as any person who beneficially owns 10% or more of the voting power of the common stock or an affiliate thereof) for five years after the most recent date on which the stockholder becomes an interested stockholder and, thereafter, imposes special minimum price provisions and special stockholder voting requirements on these combinations.

The Maryland Control Share Acquisition Act, which provides that “control shares” of a Maryland corporation (defined as shares of common stock which, when aggregated with other shares of common stock controlled by the stockholder, entitles the stockholder to exercise one of three increasing ranges of voting power in electing directors, as described more fully below) acquired in a “control share acquisition” (defined as the direct or indirect acquisition of ownership or control of “control shares”) have no voting rights except to the extent approved by stockholders by the affirmative vote of at least two-thirds of all the votes entitled to be cast on the matter, excluding all interested shares of common stock. The provisions of the Maryland Business Combination Act will not apply, however, if our Board of Directors adopts a resolution that any business combination between us and any other person will be exempt from the provisions of the Maryland Business Combination Act. Our Board of Directors has adopted a resolution that any business combination between us and any other person is exempted from the provisions of the Maryland Business Combination Act, provided that the business combination is first approved by the Board of Directors, including a majority of the directors who are not interested persons as defined in the 1940 Act. There can be no assurance that this resolution will not be altered or repealed in whole or in part at any time. If the resolution is altered or repealed, the provisions of the Maryland Business Combination Act may discourage others from trying to acquire control of us.

As permitted by Maryland law, our bylaws contain a provision exempting from the Maryland Control Share Acquisition Act any and all acquisitions by any person of our common stock. Although our bylaws include such a provision, such a provision may also be amended or eliminated by our Board of Directors at any time in the future, provided that we will notify the Division of Investment Management at the SEC prior to amending or eliminating this provision. However, as noted above, the SEC has recently taken the position that the Maryland Control Share Acquisition Act is inconsistent with the 1940 Act and may not be invoked by a BDC. It is the view of the staff of the SEC that opting into the Maryland Control Share Acquisition Act would be acting in a manner inconsistent with section 18(i) of the 1940 Act.

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering. In addition, if the subscription price is less than our net asset value per share, then you will experience an immediate dilution of the aggregate net asset value of your shares.

In the event we issue subscription rights, stockholders who do not fully exercise their subscription rights should expect that they will, at the completion of a rights offering pursuant to this prospectus, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights. We cannot state precisely the amount of any such dilution in share ownership because we do not know at this time what proportion of the shares will be purchased as a result of such rights offering.

In addition, if the subscription price is less than the net asset value per share of our common stock, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any decrease in net asset value is not predictable because it is not known at this time what the subscription price and net asset value per share will be on the expiration date of a rights offering or what proportion of the shares will be purchased as a result of such rights offering. Such dilution could be substantial.

We may in the future choose to pay dividends in our own stock, in which case our stockholders may be required to pay tax in excess of the cash they receive.

We may distribute taxable dividends that are payable in part in our stock. The IRS has issued a private letter ruling on cash/stock dividends paid by us if certain requirements are satisfied, and the ruling permits us to declare such taxable cash/stock dividends, up to 80% in stock, with respect to our taxable years ending August 31, 2016 and August 31, 2017. Taxable stockholders receiving such dividends would be required to include the full amount of the dividend as ordinary income (or as long-term capital gain to the extent such distribution is properly designated as a capital gain dividend) to the extent of our current and accumulated earnings and profits for United States federal income tax purposes. As a result, a U.S. Stockholder (as defined in “Material U.S. Federal Income Tax Considerations”) may be required to pay tax with respect to such dividends in excess of any cash received. If a U.S. Stockholder sells the stock it receives as a dividend in order to pay this tax, it may be subject to transaction fees (e.g., broker fees or transfer agent fees) and the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of its stock at the time of the sale. Furthermore, with respect to Non-U.S. Stockholders (as defined in “Material U.S. Federal Income Tax Considerations”), we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our stockholders determine to sell shares of our stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our stock. It is unclear whether and to what extent we will be able to pay dividends in cash and our stock.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

We do not own any real estate or other physical properties materially important to our operation. Our principal executive offices are located at 10 East 40th Street, New York, New York 10016, where we occupy our office space pursuant to our Administration Agreement with Prospect Administration. The office facilities, which are shared with the Investment Adviser and Administrator, consist of approximately 31,700 square feet, with various leases expiring up to and through 2023. We believe that our office facilities are suitable and adequate for our business as currently conducted.

Item 3. Legal Proceedings

From time to time, we may become involved in various investigations, claims and legal proceedings that arise in the ordinary course of our business. These matters may relate to intellectual property, employment, tax, regulation, contract or other matters. The resolution of such matters as may arise will be subject to various uncertainties and, even if such claims are without merit, could result in the expenditure of significant financial and managerial resources. We are not aware of any material legal proceedings as of June 30, 2016. Our Investment Adviser and Administrator have been named as defendants in a lawsuit filed on April 21, 2016 by a purported shareholder of Prospect in the United States District Court for the Southern District of New York under the caption Paskowitz v. Prospect Capital Management and Prospect Administration. The complaint alleges that the defendants received purportedly excessive management and administrative services fees from us in violation of Section 36(b) of the 1940 Act. The plaintiff seeks to recover on behalf of us damages in an amount not specified in the complaint. The defendants have informed us that they believe the complaint is without merit and intend to defend themselves vigorously against the plaintiff’s claims. We believe that the lawsuit is not likely to have a material adverse effect on Prospect. On June 30, 2016, the Investment Adviser and the Administrator filed a motion to dismiss the complaint.

Item 4. Mine Safety Disclosures

Not applicable.

## PART II

## Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is traded on the NASDAQ Global Select Market under the symbol "PSEC."

The following table sets forth, for the quarterly reporting periods indicated, the net asset value per share of our common stock and the high and low sales prices for our common stock, as reported on the NASDAQ Global Select Market. Our common stock historically has traded at prices both above and below its net asset value. There can be no assurance, however, that such premium or discount, as applicable, to net asset value will be maintained. See also "Item 1A. Risk Factors" in Part I of this report for additional information about the risks and uncertainties we face.

Year Ended	Net Asset Value Per Share(1)	Sales Price		Premium (Discount) of High Sales Price to Net Asset Value	Premium (Discount) of Low Sales Price to Net Asset Value
		High	Low		
June 30, 2015					
First quarter	\$ 10.47	\$ 11.00	\$ 9.90	5.1 %	(5.4 %)
Second quarter	10.35	9.92	8.11	(4.2 %)	(21.6 %)
Third quarter	10.30	8.81	8.23	(14.5 %)	(20.1 %)
Fourth quarter	10.31	8.65	7.22	(16.1 %)	(30.0 %)
June 30, 2016					
First quarter	\$ 10.17	\$ 7.99	\$ 6.98	(21.4 %)	(31.4 %)
Second quarter	9.65	7.63	6.20	(20.9 %)	(35.8 %)
Third quarter	9.61	7.48	5.26	(22.2 %)	(45.3 %)
Fourth quarter	9.62	7.86	7.15	(18.3 %)	(25.7 %)

## June 30, 2016

First quarter	\$ 10.17	\$ 7.99	\$ 6.98	(21.4 %)	(31.4 %)
Second quarter	9.65	7.63	6.20	(20.9 %)	(35.8 %)
Third quarter	9.61	7.48	5.26	(22.2 %)	(45.3 %)
Fourth quarter	9.62	7.86	7.15	(18.3 %)	(25.7 %)

Net asset value per share is determined as of the last day in the relevant quarter and therefore may not reflect the (1) net asset value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of the relevant quarter.

As of August 26, 2016, there were 130 shareholders of record of our common stock. This figure does not include a substantially greater number of beneficial holders of our common stock, whose shares are held in the names of brokers, dealers and clearing agencies.

## Distribution Policy

Through March 2010, we made quarterly distributions to our stockholders out of assets legally available for distribution. In June 2010, we changed our distribution policy from a quarterly payment to a monthly payment. To the extent prudent and practicable, we currently intend to continue making distributions on a monthly basis. Our ability to pay distributions could be affected by future business performance, liquidity, capital needs, alternative investment opportunities and loan covenants. Our distributions, if any, will be determined by our Board of Directors. Certain amounts of the monthly distributions may from time to time be paid out of our capital rather than from earnings for the quarter as a result of our deliberate planning or by accounting reclassifications.

As a RIC, we generally are not subject to U.S. federal income tax on income and gains we distribute each taxable year to our stockholders, provided that in such taxable year, we distribute an amount equal to at least 90% of our investment company taxable income (as defined by the Code) to our stockholders. Any undistributed taxable income is subject to U.S. federal income tax. In addition, we will be subject to a 4% non-deductible U.S. federal excise tax on certain undistributed income unless we distribute in a timely manner an amount at least equal to the sum of (i) 98% of our ordinary income recognized during the calendar year, (ii) 98.2% of our capital gain net income, as defined by the Code, recognized for the one year period ending October 31 in that calendar year and (iii) any income recognized, but not distributed, in preceding years.

We had an excise tax liability of \$305 for the calendar year ended December 31, 2015. Through June 30, 2016, we have an accrued excise tax payable of \$1,100. Tax characteristics of all distributions will be reported to stockholders, as appropriate, on Form 1099-DIV after the end of the calendar year.

Edgar Filing: PROSPECT CAPITAL CORP - Form 10-K/A

In addition, although we currently intend to distribute realized net capital gains (which we define as net long-term capital gains in excess of short-term capital losses), if any, at least annually out of the assets legally available for such distributions, we may decide in the future to retain such capital gains for investment. In such event, the consequences of our retention of net capital gains are described under “Material U.S. Federal Income Tax Considerations.” We can offer no assurance that we will achieve results that will permit the payment of any cash distributions and, if we issue senior securities, we may be prohibited from making distributions if doing so causes us to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of our borrowings. During the years ended June 30, 2016 and June 30, 2015, we distributed approximately \$356.1 million and \$421.6 million, respectively, to our stockholders. The following table summarizes our distributions declared and payable for the years ended June 30, 2015 and June 30, 2016.

Declaration Date	Record Date	Payment Date	Amount Per Share	Amount Distributed (in thousands)
2/3/2014	7/31/2014	8/21/2014	\$0.110475	\$ 37,863
2/3/2014	8/29/2014	9/18/2014	0.110500	37,885

5/6/2015	6/30/2015	7/23/2015	0.083330	29,923
Total declared and payable for the year ended June 30, 2015				\$ 421,594
5/6/2015	7/31/2015	8/20/2015	\$0.083330	\$ 29,909
5/6/2015	8/31/2015	9/17/2015	0.083330	29,605
8/24/2015	9/30/2015	10/22/2015	0.083330	29,601
8/24/2015	10/30/2015	11/19/2015	0.083330	29,600
11/4/2015	11/30/2015	12/24/2015	0.083330	29,611
11/4/2015	12/31/2015	1/21/2016	0.083330	29,616
11/4/2015	1/29/2016	2/18/2016	0.083330	29,641
2/9/2016	2/29/2016	3/24/2016	0.083330	29,663
2/9/2016	3/31/2016	4/21/2016	0.083330	29,674
2/9/2016	4/29/2016	5/19/2016	0.083330	29,702
5/9/2016	5/31/2016	6/23/2016	0.083330	29,730
5/9/2016	6/30/2016	7/21/2016	0.083330	29,758
Total declared and payable for the year ended June 30, 2016				\$ 356,110

Dividends and distributions to common stockholders are recorded on the ex-dividend date. As such, the table above includes distributions with record dates during the years ended June 30, 2016 and June 30, 2015. It does not include distributions previously declared to stockholders of record on any future dates, as those amounts are not yet determinable. The following dividends were previously declared and will be payable subsequent to June 30, 2016: \$0.08333 per share for July 2016 to holders of record on July 29, 2016 with a payment date of August 18, 2016; and \$0.08333 per share for August 2016 to holders of record on August 31, 2016 with a payment date of September 22, 2016.

### Dividend Reinvestment Plan

We maintain an “opt out” dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution (as discussed above), stockholders’ cash distributions will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash distributions. Stockholders who receive distributions in the form of stock are subject to the same U.S. federal, state and local tax consequences as are stockholders who elect to receive their distributions in cash. Stockholders are advised to consult with their brokers or financial institutions, as appropriate, with respect to the administration of their dividends and related instructions. See also “Dividend Reinvestment Plan” in Part I of this report for additional information.

We primarily use newly-issued shares to implement the plan, whether our shares are trading at a premium or at a discount to net asset value. However, we reserve the right to purchase shares in the open market in connection with the implementation of the plan. Our Board of Directors determines how the stock to be distributed as part of the plan is made available.

During the years ended June 30, 2016 and June 30, 2015, we distributed 2,725,222 and 1,618,566 shares of our common stock, respectively, in connection with the dividend reinvestment plan. All of the shares distributed were new issues. The following table summarizes the shares issued through the reinvestment of dividends in the years ended June 30, 2015 and June 30, 2016.

Record Date	Payment Date	Shares Issued	Value of Shares (in thousands)	% of Distribution	
6/30/2014	7/24/2014	98,503	\$ 1,074	2.8	%
7/31/2014	8/21/2014	129,435	1,412	3.7	%
8/29/2014	9/18/2014	113,020	1,154	3.0	%
9/30/2014	10/22/2014	138,721	1,346	3.5	%
10/31/2014	11/20/2014	136,076	1,314	3.4	%
11/28/2014	12/18/2014	162,173	1,370	3.5	%
12/31/2014	1/22/2015	151,538	1,279	3.2	%
1/30/2015	2/19/2015	146,186	1,279	3.2	%
2/27/2015	3/19/2015	113,596	971	3.2	%
3/31/2015	4/23/2015	131,971	1,140	3.8	%
4/30/2015	5/21/2015	137,878	1,122	3.8	%
5/29/2015	6/18/2015	159,469	1,220	4.1	%
Total issued in the year ended June 30, 2015		1,618,566	\$ 14,681		
6/30/2015	7/23/2015	193,892	\$ 1,425	4.8	%
7/31/2015	8/20/2015	152,896	1,115	3.7	%
8/31/2015	9/17/2015	143,685	1,142	3.9	%
9/30/2015	10/22/2015	189,172	1,402	4.7	%
10/30/2015	11/19/2015	182,331	1,349	4.6	%
11/30/2015	12/24/2015	167,727	1,211	4.1	%
12/31/2015	1/21/2016	299,423	1,749	5.9	%
1/29/2016	2/18/2016	255,743	1,685	5.7	%
2/29/2016	3/24/2016	146,899	1,027	3.5	%
3/31/2016	4/21/2016	324,060	2,430	8.2	%
4/29/2016	5/19/2016	338,027	2,522	8.5	%
5/31/2016	6/23/2016	331,367	2,581	8.7	%
Total issued in the year ended June 30, 2016		2,725,222	\$ 19,638		

Registered stockholders who opt out of the dividend reinvestment plan must notify the plan administrator prior to the payment date in order for that distribution to be paid in cash. As such, the table above includes distributions with payment dates during the years ended June 30, 2016 and June 30, 2015. It does not include distributions previously declared and recorded as payable to stockholders on any future dates, as those amounts are not yet determinable.

On February 9, 2016, we amended our dividend reinvestment plan that already provides for reinvestment of our dividends or distributions on behalf of our stockholders, unless a stockholder elects to receive cash, to add the ability of stockholders to purchase additional shares by making optional cash investments. Under the revised dividend reinvestment and direct stock repurchase plan, stockholders may elect to purchase additional shares through our transfer agent in the open market or in negotiated transactions.

Purchases of equity securities by the issuer and affiliated purchasers

On August 24, 2011, our Board of Directors approved a share repurchase plan (the “Repurchase Program”) under which we may repurchase up to \$100,000 of our common stock at prices below our net asset value per share. Prior to any repurchase, we are required to notify shareholders of our intention to purchase our common stock. We delivered a notice with our annual proxy mailing on September 23, 2015 and our most recent notice was delivered with a shareholder letter mailing on February 2, 2016. This notice extends for six months after the date that notice is delivered.

During the year ended June 30, 2016, we repurchased 4,708,750 shares of our common stock pursuant to our publicly announced Repurchase Program for \$34,140, or approximately \$7.25 weighted average price per share at approximately a 30% discount to net asset value as of June 30, 2015. Our NAV per share was increased by approximately \$0.02 for the year ended June 30, 2016 as a result of the share repurchases.

	Year Ended June 30, 2016
Repurchases of Common Stock	
Dollar amount repurchased	\$34,140
Shares Repurchased	4,708,750
Weighted average price per share	7.25
Weighted average discount to June 30, 2015 net asset value	30 %
Approximate dollar value of shares that may yet be purchased under the plan	\$65,860

There were no repurchases made for the years ended June 30, 2015 and 2014 under our Repurchase Program.

During the year ended June 30, 2016, Prospect officers purchased 16,909,556 shares of our stock, or 4.74% of total outstanding shares as of June 30, 2016, both through the open market transactions and shares issued in connection with our dividend reinvestment plan.

### Stock Performance Graph

The following graph compares a shareholder's cumulative total return for the last five fiscal years as if such amounts had been invested in: (i) our common stock; (ii) the stocks included in the S&P 500 Index; (iii) the stocks included in the S&P 500 Financials Sector Index; and (iv) a customized BDC Peer Group composed of Apollo Investment Corporation, Ares Capital Corporation, BlackRock Capital Investment Corporation, Gladstone Capital Corporation, and MVC Capital, Inc. The graph is based on historical stock prices and measures total shareholder return, which takes into account both changes in stock price and dividends. The total return assumes that dividends were reinvested daily and is based on a \$100 investment on June 30, 2011.

(1) Per share data is based on the weighted average number of common shares outstanding for the years presented (except for dividends to shareholders which is based on actual rate per share).

Total return based on market value is based on the change in market price per share between the opening and ending market prices per share in each year and assumes that dividends are reinvested in accordance with our (2)dividend reinvestment plan. Total return based on net asset value is based upon the change in net asset value per share between the opening and ending net asset values per share in each year and assumes that dividends are reinvested in accordance with our dividend reinvestment plan.

(3)Excludes equity investments and non-performing loans.

## Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

(All figures in this item are in thousands except share, per share and other data.)

The following discussion should be read in conjunction with our consolidated financial statements and related notes and other financial information appearing elsewhere in this Annual Report. In addition to historical information, the following discussion and other parts of this Annual Report contain forward-looking information that involves risks and uncertainties. Our actual results may differ significantly from any results expressed or implied by these forward-looking statements due to the factors discussed in Part II, "Item 1A. Risk Factors" and "Forward-Looking Statements" appearing elsewhere herein.

### Overview

The terms "Prospect," "we," "us" and "our" mean Prospect Capital Corporation and its subsidiaries unless the context specifically requires otherwise.

Prospect Capital Corporation is a financial services company that primarily lends to and invests in middle market privately-held companies. We are a closed-end investment company incorporated in Maryland. We have elected to be regulated as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act"). As a BDC, we have elected to be treated as a regulated investment company ("RIC"), under Subchapter M of the Internal Revenue Code of 1986 (the "Code"). We were organized on April 13, 2004 and were funded in an initial public offering completed on July 27, 2004.

On May 15, 2007, we formed a wholly-owned subsidiary Prospect Capital Funding LLC ("PCF"), a Delaware limited liability company and a bankruptcy remote special purpose entity, which holds certain of our portfolio loan investments that are used as collateral for the revolving credit facility at PCF. Our wholly-owned subsidiary Prospect Small Business Lending, LLC ("PSBL") was formed on January 27, 2014 and purchases small business whole loans on a recurring basis from online small business loan originators, including OnDeck Capital, Inc. ("OnDeck"). On September 30, 2014, we formed a wholly-owned subsidiary Prospect Yield Corporation, LLC ("PYC") and effective October 23, 2014, PYC holds our investments in collateralized loan obligations ("CLOs"). Each of these subsidiaries have been consolidated since operations commenced.

Effective July 1, 2014, we began consolidating certain of our wholly-owned and substantially wholly-owned holding companies formed by us in order to facilitate our investment strategy. The following companies have been included in our consolidated financial statements since July 1, 2014: AMU Holdings Inc. ("Airmall"); APH Property Holdings, LLC ("APH"); Arctic Oilfield Equipment USA, Inc.; CCPI Holdings Inc.; CP Holdings of Delaware LLC; Credit Central Holdings of Delaware, LLC; Energy Solutions Holdings Inc.; First Tower Holdings of Delaware LLC ("First Tower Delaware"); Harbortouch Holdings of Delaware Inc.; MITY Holdings of Delaware Inc.; Nationwide Acceptance Holdings LLC; NMMB Holdings, Inc.; NPH Property Holdings, LLC ("NPH"); STI Holding, Inc.; UPH Property Holdings, LLC ("UPH"); Valley Electric Holdings I, Inc.; Valley Electric Holdings II, Inc.; and Wolf Energy Holdings Inc. On October 10, 2014, concurrent with the sale of the operating company, our ownership increased to 100% of the outstanding equity of ARRM Services, Inc. which was renamed SB Forging Company, Inc. ("SB Forging"). As such, we began consolidating SB Forging on October 11, 2014. Effective May 23, 2016, in connection with the merger of American Property REIT Corp. ("APRC") and United Property REIT Corp. ("UPRC") with and into National Property REIT Corp. ("NPRC"), APH and UPH merged with and into NPH, and dissolved. We collectively refer to these entities as the "Consolidated Holding Companies."

We are externally managed by our investment adviser, Prospect Capital Management L.P. ("Prospect Capital Management" or the "Investment Adviser"). Prospect Administration LLC ("Prospect Administration"), a wholly-owned subsidiary of the Investment Adviser, provides administrative services and facilities necessary for us to operate. Our investment objective is to generate both current income and long-term capital appreciation through debt and equity investments. We invest primarily in senior and subordinated debt and equity of private companies in need of capital for acquisitions, divestitures, growth, development, recapitalizations and other purposes. We work with the management teams or financial sponsors to seek investments with historical cash flows, asset collateral or contracted pro-forma cash flows.

We currently have nine origination strategies in which we make investments: (1) lending in private equity sponsored transactions, (2) lending directly to companies not owned by private equity firms, (3) control investments in corporate operating companies, (4) control investments in financial companies, (5) investments in structured credit, (6) real estate investments, (7) investments in syndicated debt, (8) aircraft leasing and (9) online lending. We continue to evaluate other origination strategies in the ordinary course of business with no specific top-down allocation to any single origination strategy.

**Lending in Private Equity Sponsored Transactions** – We make loans to companies which are controlled by leading private equity firms. This debt can take the form of first lien, second lien, unitranche or unsecured loans. In making these investments, we look for a diversified customer base, recurring demand for the product or service, barriers to entry, strong historical cash flow and experienced management teams. These loans typically have significant equity subordinate to our loan position. Historically, this strategy has comprised approximately 50%-60% of our business, but more recently it is less than 50% of our business.

**Lending Directly to Companies** – We provide debt financing to companies owned by non-private equity firms, the company founder, a management team or a family. Here, in addition to the strengths we look for in a sponsored transaction, we also look for the alignment with the management team with significant invested capital. This strategy often has less competition than the private equity sponsor strategy because such company financing needs are not easily addressed by banks and often require more diligence preparation. Direct lending can result in higher returns and lower leverage than sponsor transactions and may include warrants or equity to us. Historically, this strategy has comprised approximately 5%-15% of our business, but more recently it is less than 5% of our business.

**Control Investments in Corporate Operating Companies** – This strategy involves acquiring controlling stakes in non-financial operating companies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. We provide enhanced certainty of closure to our counterparties, give the seller personal liquidity and generally look for management to continue on in their current roles. This strategy has comprised approximately 10%-15% of our business.

**Control Investments in Financial Companies** – This strategy involves acquiring controlling stakes in financial companies, including consumer direct lending, sub-prime auto lending and other strategies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. These investments are often structured in a tax-efficient RIC-compliant partnership, enhancing returns. This strategy has comprised approximately 5%-15% of our business.

**Investments in Structured Credit** – We make investments in CLOs, generally taking a significant position in the subordinated interests (equity) of the CLOs. The CLOs include a diversified portfolio of broadly syndicated loans and do not have direct exposure to real estate, mortgages, debt or consumer based debt. The CLOs in which we invest are managed by top-tier collateral managers that have been thoroughly diligenced prior to investment. This strategy has comprised approximately 10%-20% of our business.

**Real Estate Investments** – We make investments in real estate through our wholly-owned tax-efficient real estate investment trust (“REIT”) NPRC, the surviving entity of the May 23, 2016 merger with APRC and UPRC. Our real estate investments are in various classes of fully developed and occupied real estate properties that generate current yields. We seek to identify properties that have historically high occupancy and steady cash flow generation. NPRC co-invests with established and experienced property managers that manage such properties after acquisition. This investment strategy has comprised approximately 5%-10% of our business.

**Investments in Syndicated Debt** – On an opportunistic basis, we make investments in loans and high yield bonds that have been sold to a syndicate of buyers. Here we look for investments with attractive risk-adjusted returns after we have completed a fundamental credit analysis. These investments are purchased with a long term, buy-and-hold outlook and we look to provide significant structuring input by providing anchoring orders. This strategy has comprised approximately 5%-10% of our business.

**Aircraft Leasing** – We invest in debt as well as equity in aircraft assets subject to commercial leases to credit-worthy airlines across the globe. These investments present attractive return opportunities due to cash flow consistency from long-lived assets coupled with hard asset collateral. We seek to deliver risk-adjusted returns with strong downside protection by analyzing relative value characteristics across the spectrum of aircraft types of all vintages. Our target portfolio includes both in-production and out-of-production jet and turboprop aircraft and engines, operated by airlines across the globe. This strategy comprised approximately 1% of our business.

**Online Lending** – We make investments in loans originated by certain consumer loan and small and medium sized business (“SME”) loan facilitators. We purchase each loan in its entirety (i.e., a “whole loan”). The borrowers are consumers and SMEs. The loans are typically serviced by the facilitators of the loans. This investment strategy has comprised approximately 4%-7% of our business.

We invest primarily in first and second lien secured loans and unsecured debt, which in some cases includes an equity component. First and second lien secured loans generally are senior debt instruments that rank ahead of unsecured debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Our investments in CLOs are subordinated to senior loans and are generally unsecured. We invest in debt and equity positions of CLOs which are a form of securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. Our CLO investments are derived from portfolios of corporate debt securities which are generally risk rated from BB to B.

We hold many of our control investments in a two-tier structure consisting of a holding company and one or more related operating companies for tax purposes. These holding companies serve various business purposes including concentration of management teams, optimization of third party borrowing costs, improvement of supplier, customer, and insurance terms, and enhancement of co-investments by the management teams. In these cases, our investment in the holding company, generally as equity, its equity investment in the operating company and along with any debt from us directly to the operating company structure represents our total exposure for the investment. As of June 30, 2016, as shown in our Consolidated Schedule of Investments, the cost basis and fair value of our investments in controlled companies was \$1,768,220 and \$1,752,449, respectively. This structure gives rise to several of the risks described in our public documents and highlighted elsewhere in this Annual Report. On July 1, 2014, we began consolidating all wholly-owned and substantially wholly-owned holding companies formed by us for the purpose of holding our controlled investments in operating companies. There were no significant effects of consolidating these holding companies as they hold minimal assets other than their investments in the controlled operating companies. Investment company accounting prohibits the consolidation of any operating companies.

#### Fourth Quarter Highlights

##### Investment Transactions

We seek to be a long-term investor with our portfolio companies. During the three months ended June 30, 2016, we acquired \$62,930 of new investments, completed follow-on investments in existing portfolio companies totaling approximately \$214,370, funded \$3,682 of revolver advances, and recorded paid in kind (“PIK”) interest of \$13,056, resulting in gross investment originations of \$294,038. During the three months ended June 30, 2016, we sold our investment in Harbortouch and sold down two investments to lower retained amounts, and received several partial prepayments and amortization payments totaling \$383,460, including realized losses totaling \$6,180. The more significant of these transactions are discussed in “Portfolio Investment Activity.”

##### Debt Issuances and Redemptions

During the three months ended June 30, 2016, we issued \$13,573 aggregate principal amount of Prospect Capital InterNotes® for net proceeds of \$13,403. These notes were issued with stated interest rates of 5.50% with a weighted average interest rate of 5.50%. These notes mature between April 15, 2021 and June 15, 2021. The following table summarizes the Prospect Capital InterNotes® issued during the three months ended June 30, 2016.

Tenor at Origination (in years)	Principal Amount	Interest Rate Range	Weighted Average Interest Rate	Maturity Date Range
5	\$ 13,573	5.50%	5.50 %	April 15, 2021 – June 15, 2021

During the three months ended June 30, 2016, we repaid \$3,300 aggregate principal amount of Prospect Capital InterNotes® at par in accordance with the Survivor’s Option, as defined in the InterNotes® Offering prospectus. As a result of these transactions, we recorded a loss in the amount of the difference between the reacquisition price and the net carrying amount of the notes, net of the proportionate amount of unamortized debt issuance costs. The net gain on the extinguishment of Prospect Capital InterNotes® in the three months ended June 30, 2016 was \$310.

On June 16, 2016, we entered into an at-the-market program with FBR Capital Markets & Co. through which we could sell, by means of at-the-market offerings, from time to time, up to \$100,000 in aggregate principal amount of our existing 2024 Notes. During the period from June 28, 2016 to June 30, 2016, we issued \$1,380 in aggregate principal amount of our 2024 Notes for net proceeds of \$1,247 after commissions and offering costs.

##### Equity Issuances

On April 21, 2016, May 19, 2016 and June 23, 2016, we issued 324,060, 338,027 and 331,367 shares of our common stock in connection with the dividend reinvestment plan, respectively.

### “Spin-Offs” of Certain Business Strategies

We previously announced that we intend to unlock value by “spinning off” three “pure play” business strategies - our consumer online lending business, real estate business and structured credit business - to our shareholders in conjunction with rights offering capital raises in which existing Prospect shareholders could elect to participate in each offering or sell their rights. The goals of these “spin-offs” include leverage and earnings neutrality for Prospect. Our primary objective is to maximize the valuation of each offering (declining to proceed with any offering if we find any valuation not to be attractive). The size and likelihood of each of these dispositions, some of which are expected to be partial rather than complete spin-offs, remain to be determined, but we currently expect the collective size of these three dispositions, if any, to be 10% or less of our asset base. Any such dispositions cannot occur unless and until our application for exemptive relief is granted by the SEC. Should the SEC not grant our application for exemptive relief, these dispositions will not occur as initially planned. The consummation of any of the dispositions also depends upon, among other things: market conditions, regulatory and exchange listing approval, and sufficient investor demand. There can be no assurance that we will consummate any of these dispositions.

### Investment Holdings

As of June 30, 2016, we continue to pursue our investment strategy. At June 30, 2016, approximately \$5,897,708, or 171.6%, of our net assets are invested in 125 long-term portfolio investments and CLOs.

During the year ended June 30, 2016, we originated \$979,102 of new investments, primarily composed of \$570,338 of debt and equity financing to non-controlled portfolio investments, \$312,144 of debt and equity financing to controlled investments, and \$96,620 of subordinated notes in CLOs. Our origination efforts are focused primarily on secured lending to non-control investments to reduce the risk in the portfolio by investing primarily in first lien loans, though we also continue to close select junior debt and equity investments. Our annualized current yield was 12.7% and 13.2% as of June 30, 2015 and June 30, 2016, respectively, across all performing interest bearing investments. The increase in our current yield is primarily due to market fluctuations and the resulting decline in our portfolio value. Monetization of equity positions that we hold and loans on non-accrual status are not included in this yield calculation. In many of our portfolio companies we hold equity positions, ranging from minority interests to majority stakes, which we expect over time to contribute to our investment returns. Some of these equity positions include features such as contractual minimum internal rates of returns, preferred distributions, flip structures and other features expected to generate additional investment returns, as well as contractual protections and preferences over junior equity, in addition to the yield and security offered by our cash flow and collateral debt protections.

We are a non-diversified company within the meaning of the 1940 Act. As required by the 1940 Act, we classify our investments by level of control. As defined in the 1940 Act, “Control Investments” are those where there is the ability or power to exercise a controlling influence over the management or policies of a company. Control is generally deemed to exist when a company or individual possesses or has the right to acquire within 60 days or less, a beneficial ownership of 25% or more of the voting securities of an investee company. Under the 1940 Act, “Affiliate Investments” are defined by a lesser degree of influence and are deemed to exist through the possession outright or via the right to acquire within 60 days or less, beneficial ownership of 5% or more of the outstanding voting securities of another person. “Non-Control/Non-Affiliate Investments” are those that are neither Control Investments nor Affiliate Investments.

As of June 30, 2016, we own controlling interests in the following portfolio companies: Arctic Energy Services, LLC (“Arctic Energy”); CCPI Inc. (“CCPI”); CP Energy Services Inc. (“CP Energy”); Credit Central Loan Company, LLC (“Credit Central”); Echelon Aviation LLC (“Echelon”); Edmentum Ultimate Holdings, LLC (“Edmentum”); First Tower Finance Company LLC (“First Tower Finance”); Freedom Marine Solutions, LLC (“Freedom Marine”); Gulf Coast Machine & Supply Company (“Gulf Coast”); MITY, Inc. (“MITY”); NPRC; Nationwide Loan Company LLC (f/k/a Nationwide Acceptance LLC) (“Nationwide”); NMMB, Inc.; R-V Industries, Inc. (“R-V”); USES Corp. (“USES”); Valley Electric Company, Inc. (“Valley Electric”); and Wolf Energy, LLC. We also own an affiliated interest in BNN Holdings Corp and Targus International, LLC (“Targus”).

(1) Our CLO investments do not have industry concentrations and as such have been separated in the table above.

#### Portfolio Investment Activity

During the year ended June 30, 2016, we acquired \$375,409 of new investments, completed follow-on investments in existing portfolio companies totaling approximately \$573,338, funded \$9,824 of revolver advances, and recorded PIK interest of \$20,531, resulting in gross investment originations of \$979,102. The more significant of these transactions are briefly described below.

On July 1, 2015, we provided \$31,000 of first lien senior secured financing to Intelius, Inc. (“Intelius”), an online information commerce company, of which \$30,200 was funded at closing. On August 11, 2015, we made a \$13,500 follow-on first lien senior secured debt investment in Intelius, of which \$13,000 was funded at closing, to support an acquisition. The \$21,500 Term Loan A note bears interest at the greater of 6.5% or LIBOR plus 5.5% and has a final maturity of July 1, 2020. The \$21,500 Term Loan B note bears interest at the greater of 12.5% or LIBOR plus 11.5% and has a final maturity of July 1, 2020. The \$1,500 senior secured revolver, which was not funded at closing, bears interest at 9.5% or LIBOR plus 8.5% and has a final maturity of August 11, 2016.

On July 23, 2015, we made an investment of \$37,969 to purchase 80.73% of the subordinated notes issued by Halcyon Loan Advisors Funding 2015-3 Ltd. in a co-investment transaction with Priority Income Fund, Inc., a closed-end fund managed by an affiliate of Prospect Capital Management.

On August 6, 2015, we provided \$92,500 of first lien senior secured debt to support the refinancing of Crosman Corporation (“Crosman”). Concurrent with the refinancing, we received repayment of the \$40,000 second lien term loan previously outstanding. The \$52,500 Term Loan A note bears interest at the greater of 9.0% or LIBOR plus 8.7% and interest payment in kind of 4.0%, and has a final maturity of August 5, 2020. The \$40,000 Term Loan B note bears interest at the greater of 16.0% or LIBOR plus 15.7% and interest payment in kind of 4.0%, and has a final maturity of August 5, 2020.

On August 12, 2015, we made an investment of \$22,898 to purchase 50.04% of the subordinated notes issued by Octagon Investment Partners XVIII, Ltd.

On August 12, 2015, we sold 780 of our small business whole loans (with a cost of \$30,968) purchased from OnDeck to Jefferies Asset Funding LLC for proceeds of \$26,619, net of related transaction expenses, and a trust certificate representing a 41.54% interest in the MarketPlace Loan Trust, Series 2015-OD2. We realized a loss of \$775 on the sale.

On August 21, 2015, we committed to funding a \$16,000 second lien secured investment in Sitel Worldwide Corporation, a provider of customer care outsourcing services. The second lien term loan bears interest at the greater of 10.5% or LIBOR plus 9.5% and has a final maturity of September 18, 2022.

On September 16, 2015, we made an investment of \$26,773 to purchase 75.09% of the subordinated notes issued by Apidos CLO XXII in a co-investment transaction with Priority Income Fund, Inc., a closed-end fund managed by an affiliate of Prospect Capital Management.

On October 2, 2015, we provided \$17,500 of first lien senior secured debt to Easy Gardener Products, Inc., a designer, marketer, and manufacturer of branded lawn and garden products. The first lien term loan bears interest at the greater of 10.25% or LIBOR plus 10.0% and has a final maturity of September 30, 2020.

On October 16, 2015, we made a \$37,000 second lien secured debt investment in Universal Fiber Systems, LLC, a manufacturer of custom and specialty fiber products used in high performance applications. The second lien term loan bears interest at the greater of 10.5% or LIBOR plus 9.5% and has a final maturity of October 2, 2022.

On November 2, 2015, we provided \$50,000 of first lien senior secured debt to Coverall North America, Inc. (“Coverall”), a leading franchiser of commercial cleaning businesses. We invested \$25,000 in Term Loan A and \$25,000 in Term Loan B Notes. Term Loan A bears interest at the greater of 7.0% or LIBOR plus 6.0% and has a final maturity of November 2, 2020. Term Loan B bears interest at the greater of 12.0% or LIBOR plus 11.0% and has a final maturity of November 2, 2020. As part of the recapitalization, we received repayment of the \$49,600 loan outstanding.

On November 6, 2015, we made a \$20,000 second lien secured debt investment in SCS Merger Sub, Inc., a value-added reseller of data center-focused hardware, software and related services. The second lien term loan bears interest at the greater of 10.5% or LIBOR plus 9.5% and has a final maturity of October 30, 2023.

On November 9, 2015 and December 28, 2015, we made a combined \$30,100 follow-on first lien senior secured debt investment in System One Holdings, LLC (“System One”), to support an acquisition. The first lien term loan bears

interest at the greater of 11.25% or LIBOR plus 10.5% and has a final maturity of November 17, 2020.

71

---

On December 3, 2015, we provided \$245,900 of first lien senior secured debt to Broder Bros., Co. (“Broder”), a leading distributor of imprintable sportswear and accessories in the United States. We invested \$122,950 in Term Loan A and \$122,950 in Term Loan B Notes. Term Loan A bears interest at the greater of 7.0% or LIBOR plus 5.75% and has a final maturity of June 3, 2021. Term Loan B bears interest at the greater of 13.50% or LIBOR plus 12.25% and has a final maturity of June 3, 2021. As part of the recapitalization, we sold \$5,000 and received a repayment of \$245,900 of the previous loan outstanding. We realized no gain or loss on the sale.

On February 3, 2016, lenders foreclosed on Targus Group International, Inc., and our \$21,613 first lien term loan was extinguished and exchanged for 1,262,737 common units representing 12.63% equity ownership in Targus Cayman HoldCo Limited, the parent company of Targus. On February 17, 2016, we provided additional debt financing to support the recapitalization of Targus. As part of the recapitalization, we invested an additional \$1,263 in a new senior secured Term Loan A notes and were allocated \$3,788 in new senior secured Term Loan B notes. Term Loan A and Term Loan B bear interest payment in kind of 15.0%, and have a final maturity date of December 31, 2019. During the same period, Targus was written-down for tax purposes and a loss of \$14,194 was therefore realized for the amount that the amortized cost exceeded the fair value, reducing the amortized cost to \$3,479.

On April 29, 2016, we invested an additional \$25,000 of Senior Secured Term Loan A and \$25,000 of Senior Secured Term Loan B debt investments in Trinity Services Group, Inc. (“Trinity”).

On April 29, 2016, through our delayed draw term loan commitment with Instant Web, LLC, we funded \$8,000 of Senior Secured Term Loan A and \$8,000 of Senior Secured Term Loan B.

During the period from May 18, 2016 through June 22, 2016, we made \$34,726 of follow-on first lien senior secured debt investments in Empire Today, LLC.

On June 7, 2016, we made a \$19,000 second lien secured investment in Generation Brands Holdings, Inc., a leading designer and provider of lighting fixtures for commercial and residential applications. The second lien term loan bears interest at the greater of 11.0% or LIBOR plus 10.0% and has a final maturity of December 10, 2022.

On June 8, 2016, we made a \$17,000 first lien senior secured investment in Inpatient Care Management Company, LLC (“Inpatient Care”), a company providing general surgery services to hospitals with a focus on emergency care. The first lien term loan bears interest at the greater of 11.5% or LIBOR plus 10.5% and has a final maturity of June 8, 2021.

During the period from June 10, 2016 through June 29, 2016, we collectively invested an additional \$11,109 of second lien senior secured debt in NCP Finance Limited Partnership.

During the period from June 15, 2016 through June 29, 2016, we provided additional \$3,500 debt financing to USES and its subsidiaries in the form of additional Term Loan A debt and, in connection with this debt financing, USES issued to us 268,962 shares of its common stock representing a 99.96% common equity ownership interest in USES. Therefore, USES became a controlled company on June 30, 2016.

On June 17, 2016, we made a \$25,000 follow-on second lien secured debt investment in Instant Web, LLC.

Effective May 23, 2016, APRC and UPRC merged with and into NPRC, to consolidate all of our real estate holdings, with NPRC as the surviving entity. APRC and UPRC have been dissolved. No gain or loss was recognized upon the merger.

During the year ended June 30, 2016, we made 29 follow-on investments in NPRC totaling \$243,584 to support the online consumer lending initiative. We invested \$41,118 of equity through NPH and \$202,466 of debt directly to NPRC and its wholly-owned subsidiaries. We also provided \$12,449 of equity financing to NPRC, \$9,017 of which was for the acquisition of Orchard Village Apartments, a multi-family property located in Aurora, Illinois, and \$3,432 to fund capital expenditures for existing properties.

During the period from July 1, 2015 through May 23, 2016, we provided \$2,268 of equity financing to APRC, and \$4,484 debt and \$3,047 of equity financing to UPRC to fund capital expenditures for existing properties.

During the year ended June 30, 2016, we purchased \$68,799 of small business whole loans from OnDeck.

During the year ended June 30, 2016, we received full repayments on eleven investments, sold five investments in addition to five partial sales, and received several partial prepayments and amortization payments totaling \$1,338,875, net of realized losses totaling \$24,417. The more significant of these transactions are briefly described below.

On July 8, 2015, we sold 27.45% of the outstanding principal balance of the senior secured Term Loan A investment in InterDent, Inc. (“Interdent”) for \$34,415. We realized no gain or loss on the sale.

On July 24, 2015, TB Corp. repaid the \$23,628 loan receivable to us.

On August 7, 2015, Ryan, LLC repaid the \$72,701 loan receivable to us.

On September 1, 2015, BNN Holdings Corp. repaid the \$42,922 loans receivable to us.

On September 16, 2015, GTP Operations, LLC repaid the \$116,411 loan receivable to us.

On September 22, 2015, we sold 19.4% of the outstanding principal balance of the senior secured Term Loan A investment in Instant Web, LLC for \$29,447. We realized no gain or loss on the sale.

On September 25, 2015, we sold an additional 8.39% of the total outstanding principal balance of the senior secured Term Loan A investment in InterDent for \$10,516. We realized no gain or loss on the sale.

On September 25, 2015, Therakos, Inc. repaid the \$13,000 loan receivable to us.

On September 30, 2015, we restructured our investment in Arctic Energy. Concurrent with the restructuring, we exchanged our \$31,640 senior secured loan and our \$20,230 subordinated loan for Class D and Class E equity in Arctic Energy.

On October 9, 2015, BAART Programs, Inc. repaid the \$42,866 loans receivable to us.

On October 21, 2015, Aderant North American, Inc. repaid the \$7,000 loan receivable to us.

On October 30, 2015, we restructured our investment in CP Energy. Concurrent with the restructuring, we exchanged our \$86,965 senior secured loan and \$15,924 subordinated loan for Series B Redeemable Preferred Stock in CP Energy.

On October 30, 2015, we restructured our investment in Freedom Marine. Concurrent with the restructuring, we exchanged our \$32,500 senior secured loans for additional membership interest in Freedom Marine.

On November 16, 2015 and November 25, 2015, we sold our \$14,755 debt investment in American Gilsonite Company (“American Gilsonite”). We realized a loss of \$4,127 on the sale.

On November 30, 2015, Tolt Solutions, Inc. repaid the \$96,382 loan receivable to us.

On December 23, 2015, Stauber Performance Ingredients, Inc. repaid the \$16,811 loan receivable to us.

On January 21, 2016, we sold 100% of our CIFIC Funding 2011-I, Ltd. Class E and Class D notes with a cost basis of \$29,004. We realized a gain of \$3,911 on the sale.

On March 22, 2016 and March 24, 2016, United Sporting Company, Inc. partially repaid the \$17,391 loan receivable to us.

During the year ended June 30, 2016, we sold our \$16,100 debt investment in ICON Health and Fitness, Inc (“ICON”). We realized a loss of \$1,170 on the sale.

During the year ended June 30, 2016, our remaining investment in New Century Transportation, Inc. was written-off for tax purposes and a loss of \$187 was realized.

During the year ended June 30, 2016, our remaining investment in Wind River Resources Corporation (“Wind River”) was written-off for tax purposes and a loss of \$3,000 was realized.

During the period from May 3, 2016 through May 10, 2016, we collectively sold 72.10% of the outstanding principal balance of the Senior Secured Term Loan A investment in Trinity for \$25,000. There was no gain or loss realized on the sale.

On May 31, 2016, we sold our investment in Harbortouch Payments, LLC (“Harbortouch”) for total consideration of \$328,032, including fees and escrowed amounts. Prior to the sale, \$154,382 of Senior Secured Term Loan B loan outstanding was

converted to preferred equity. We received a repayment of \$146,989 loans receivable to us and \$157,639 of proceeds related to the equity investment. We recorded a realized loss of \$5,419 related to the sale. We also received a \$5,145 prepayment premium for early repayment of the outstanding loans, which was recorded as interest income in the year ended June 30, 2016 and a \$12,909 advisory fee for the transaction, which was recorded as other income in the year ended June 30, 2016. In addition, there is \$5,350 being held in escrow which will be recognized as additional realized gain if and when it is received. Concurrent with the sale, we made a \$27,500 second lien secured investment in Harbortouch.

During the year ended June 30, 2016, we received partial repayments of \$115,532 of our loans previously outstanding and \$12,396 as a return of capital on our equity investment in NPRC.

During the period from July 1, 2015 through May 23, 2016, we received a partial repayment of \$29,703 of our loan previously outstanding with APRC and recorded \$11,016 of dividend income from APRC in connection with the sale of its Vista Palma Sola (“Vista”) property.

During the period from July 1, 2015 through May 23, 2016, we received a partial repayment of \$7,567 of our loan previously outstanding with UPRC.

The following table provides a summary of our investment activity for each quarter within the three years ending June 30, 2016:

Quarter Ended	Acquisitions(1)	Dispositions(2)
September 30, 2013	537,851	145,176
December 31, 2013	608,154	255,238
March 31, 2014	1,343,256	197,947
June 30, 2014	444,104	169,617
September 30, 2014	714,255	690,194
December 31, 2014	522,705	224,076
March 31, 2015	219,111	108,124
June 30, 2015	411,406	389,168
September 30, 2015	345,743	436,919
December 31, 2015	316,145	354,855
March 31, 2016	23,176	163,641
June 30, 2016	294,038	383,460

(1) Includes investments in new portfolio companies, follow-on investments in existing portfolio companies, refinancings and PIK interest.

(2) Includes sales, scheduled principal payments, prepayments and refinancings.

#### Investment Valuation

In determining the range of values for debt instruments, except CLOs and debt investments in controlling portfolio companies, management and the independent valuation firm estimated corporate and security credit ratings and identified corresponding yields to maturity for each loan from relevant market data. A discounted cash flow analysis was then prepared using the appropriate yield to maturity as the discount rate, to determine a range of values. In determining the range of values for debt investments of controlled companies and equity investments, the enterprise value was determined by applying earnings before income tax, depreciation and amortization (“EBITDA”) multiples, the discounted cash flow technique, net income and/or book value multiples for similar guideline public companies and/or similar recent investment transactions. For stressed equity investments, a liquidation analysis was prepared. During the year ended June 30, 2016, we changed the valuation methodology for our REITs portfolio (American Property REIT Corp. (“APRC”), National Property REIT Corp. (“NPRC”), and United Property REIT Corp. (“UPRC”)) from averaging the net asset value and dividend yield method to averaging the net asset value and discounted cash flow method utilizing capitalization rates for similar guideline companies and/or similar recent investment transactions.

In determining the range of values for our investments in CLOs, management and the independent valuation firm used a discounted cash flow model. The valuations were accomplished through the analysis of the CLO deal structures to identify the risk exposures from the modeling point of view as well as to determine an appropriate call date. For each CLO security, the most appropriate valuation approach was chosen from alternative approaches to ensure the most accurate valuation for such security. To value a CLO, both the assets and the liabilities of the CLO capital structure are modeled. Our valuation agent utilizes additional methods to validate the results from the discounted cash flow method, such as Monte Carlo simulations of key model variables, analysis of relevant data observed in the CLO market, and review of certain benchmark credit indices. A waterfall engine was used to store the collateral data, generate collateral cash flows from the assets based on various assumptions for the risk factors, distribute the cash flows to the liability structure based on the payment priorities, and discount them back using proper discount rates to expected maturity or call date.

The Board of Directors looked at several factors in determining where within the range to value the asset including: recent operating and financial trends for the asset, independent ratings obtained from third parties, comparable multiples for recent sales of companies within the industry and discounted cash flow models for our investments in CLOs. The composite of all these analyses, applied to each investment, was a total valuation of \$5,897,708.

Our portfolio companies are generally lower middle market companies, outside of the financial sector, with less than \$100,000 of annual earnings before income tax, depreciation and amortization (“EBITDA”). We believe our market has experienced less volatility than others because we believe there are more buy and hold investors who own these less liquid investments.

Control investments offer increased risk and reward over straight debt investments. Operating results and changes in market multiples can result in dramatic changes in values from quarter to quarter. Significant downturns in operations can further result in our looking to recoveries on sales of assets rather than the enterprise value of the investment.

Transactions between our controlled investments and us have been detailed in Note 14 to the accompanying consolidated financial statements. Several control investments in our portfolio are under enhanced scrutiny by our senior management and our Board of Directors and are discussed below.

#### First Tower Finance Company LLC

We own 80.1% of First Tower Finance, which owns 100% of First Tower, LLC (“First Tower”), the operating company.

First Tower is a multiline specialty finance company based in Flowood, Mississippi with over 170 branch offices.

On June 15, 2012, we acquired 80.1% of First Tower businesses. As of June 30, 2016, First Tower had \$432,639 of finance receivables net of unearned charges. As of June 30, 2016, First Tower’s total debt outstanding to parties senior to us was \$365,448.

The Board of Directors decreased the fair value of our investment in First Tower to \$352,666, representing a premium of 8% to its amortized cost basis, as of June 30, 2016, from \$365,950, representing a premium of 15% to its amortized cost basis, as of June 30, 2015. The decline in fair value was driven by higher credit losses and reserves for insurance losses, as well as an increase in operating costs. First Tower’s operating costs were higher due to growth in loan originations as the company expands in newer states.

#### Freedom Marine Solutions, LLC

Prospect owns 100% of the equity of Energy Solutions, a Consolidated Holding Company. Energy Solutions owns 100% of Freedom Marine. Freedom Marine owns 100% of each of Vessel Company, LLC, Vessel Company II, LLC, and Vessel Company III, LLC. Freedom Marine owns, manages, and operates offshore supply vessels to provide transportation and support services for the oil and gas exploration and production industries in the Gulf of Mexico.

On December 29, 2014, Freedom Marine reached a settlement for and received \$5,174, net of third party obligations, related to the contingent earn-out from the sale of Gas Solutions in January 2012 which was retained by Freedom Marine. This is a final settlement and no further payments are expected from the sale.

On October 30, 2015, we restructured our investment in Freedom Marine. Concurrent with the restructuring, we exchanged our \$32,500 senior secured loans for additional membership interest in Freedom Marine.

The Board of Directors decreased the fair value of our investment in Freedom Marine to \$26,618 as of June 30, 2016, a discount of \$14,192 to its amortized cost, compared to the \$12,722 unrealized depreciation recorded at June 30, 2015. The decline in fair value was driven by the challenging environment for the oil and gas industry, which in turn

decreased demand for Freedom Marine's vessels.

---

#### Gulf Coast Machine & Supply Company

We own 100% of the preferred equity of Gulf Coast. Gulf Coast is a provider of value-added forging solutions to energy and industrial end markets.

On November 8, 2013, Gulf Coast issued \$25,950 of convertible preferred stock to Prospect (representing 99.9% of the voting securities of Gulf Coast) in exchange for crediting the same amount to the first lien term loan previously outstanding, leaving a first lien loan balance of \$15,000. As of June 30, 2016, Gulf Coast's total debt outstanding to parties senior to us was \$42,865.

Due to the continued depressed energy markets coupled with lower steel prices and lower margins from increased competition in non-oil and gas forging markets, the Board of Directors slightly decreased the fair value of our investment in Gulf Coast to \$7,312 as of June 30, 2016, a discount of \$53,063 to its amortized cost, compared to the \$45,032 unrealized depreciation recorded at June 30, 2015.

#### National Property REIT Corp.

NPRC is a Maryland corporation and a qualified REIT for federal income tax purposes. NPRC is held for purposes of investing, operating, financing, leasing, managing and selling a portfolio of real estate assets and engages in any and all other activities that may be necessary, incidental, or convenient to perform the foregoing. NPRC acquires real estate assets, including, but not limited to, industrial, commercial, and multi-family properties. NPRC may acquire real estate assets directly or through joint ventures by making a majority equity investment in a property-owning entity. Additionally, through its wholly-owned subsidiaries, NPRC invests in online consumer loans. Effective May 23, 2016, APRC and UPRC merged with and into NPRC, to consolidate all of our real estate holdings, with NPRC as the surviving entity. As of June 30, 2016, we own 100% of the fully-diluted common equity of NPRC.

During the period from July 1, 2015 through May 23, 2016, we provided \$2,268 of equity financing to APRC to fund capital expenditures for existing properties. In addition, during the period, we received a partial repayment of \$29,703 of our loan previously outstanding and recorded \$11,016 of dividend income in connection with the sale of Vista Palma Sola property.

During the period from July 1, 2015 through May 23, 2016, we provided \$4,484 and \$3,047 of debt and equity financing, respectively, to UPRC to fund capital expenditures for existing properties. In addition, during the period from July 1, 2015 through June 30, 2016, we received a partial repayment of \$7,567 of our loan previously outstanding.

During the year ended June 30, 2016, we provided \$9,017 of equity financing to NPRC for the acquisition of real estate properties and \$3,433 of equity financing to NPRC to fund capital expenditures for existing properties. In addition, during the year ended June 30, 2016, we received partial repayments of \$63,271 of our loans previously outstanding.

During the year ended June 30, 2016, we provided \$202,466 and \$41,118 of debt and equity financing, respectively, to NPRC to enable certain of its wholly-owned subsidiaries to invest in online consumer loans. In addition, during the year ended June 30, 2016, we received partial repayments of \$52,260 of our loans previously outstanding with NPRC and its wholly-owned subsidiaries and \$12,396 as a return of capital on our equity investment in NPRC.

The online consumer loan investments held by certain of NPRC's wholly-owned subsidiaries are unsecured obligations of individual borrowers that are issued in amounts ranging from \$1 to \$50, with fixed terms ranging from 18 to 84 months. As of June 30, 2016, the outstanding investment in online consumer loans by certain of NPRC's wholly-owned subsidiaries was comprised of 91,721 individual loans and had an aggregate fair value of \$674,423.

The average outstanding individual loan balance is approximately \$8 and the loans mature on dates ranging from October 31, 2016 to August 1, 2023 with a weighted- average outstanding term of 33 months as of June 30, 2016. Fixed interest rates range from 4.0% to 36.0% with a weighted-average current interest rate of 22.0%.

As of June 30, 2016, based on outstanding principal balance, 9.3% of the portfolio was invested in super prime loans (borrowers with a Fair Isaac Corporation score, "FICO score", of 720 or greater), 24.8% of the portfolio in prime loans (borrowers with a FICO score of 660 to 719) and 65.9% of the portfolio in near prime loans (borrowers with a FICO score of 580 to 659).

Edgar Filing: PROSPECT CAPITAL CORP - Form 10-K/A

Loan Type	Outstanding Balance	Interest Rate Range	Weighted Average Interest Rate*
Super Prime	\$ 66,152	4.0% - 36.0%	11.7%
Prime	175,899	5.3% - 36.0%	14.9%
Near Prime	467,106	6.0% - 36.0%	26.2%

\*Based on outstanding principal of the unsecured consumer loans.

As of June 30, 2016, our investment in NPRC had an amortized cost of \$727,376 and a fair value of \$843,933, including \$363,170 of fair value related to our investment in the online consumer loan subsidiary as discussed above. The remaining fair value of \$480,763 relates to NPRC's real estate portfolio was comprised of thirty eight multi-families properties, twelve self-storage units and three commercial properties. The following table shows the location, acquisition date, purchase price, and mortgage outstanding due to other parties for each of the properties held by NPRC as of June 30, 2016.

The Board of Directors increased the fair value of our investment in NPRC to \$843,933 as of June 30, 2016, a premium of \$116,557 from its amortized cost, compared to the \$49,350 unrealized appreciation, inclusive of APRC and UPRC, recorded at June 30, 2015. This increase is primarily due to improved operating performance at the property level and selected cap rates, partially offset by a decline in our online lending portfolio value resulting from an increase in delinquent loans.

NMMB, Inc.

Prospect owns 100% of the equity of NMMB Holdings, Inc. (“NMMB Holdings”), a Consolidated Holding Company. NMMB Holdings owns 96.33% of the fully-diluted equity of NMMB, Inc. (f/k/a NMMB Acquisition, Inc.) (“NMMB”), with NMMB management owning the remaining 3.67% of the equity. NMMB owns 100% of Refuel Agency, Inc. (“Refuel Agency”). Refuel Agency owns 100% of Armed Forces Communications, Inc. (“Armed Forces”). NMMB is an advertising media buying business.

On May 6, 2011, Prospect initially made a \$34,450 investment (of which \$31,750 was funded at closing) in NMMB Holdings and NMMB, of which \$24,250 was a senior secured term loan to NMMB, \$3,000 was a senior secured revolver to NMMB (of which \$300 was funded at closing), \$2,800 was a senior subordinated term loan to NMMB Holdings and \$4,400 to purchase 100% of the Series A Preferred Stock of NMMB Holdings. The proceeds received by NMMB were used to purchase 100% of the equity of Refuel Agency and assets related to the business for \$30,069, pay \$1,035 of structuring fees to Prospect (which was recognized by Prospect as structuring fee income), pay \$396 for third party expenses and \$250 was retained by NMMB for working capital.

The Board of Directors decreased the fair value of our investment in NMMB to \$10,007, representing a discount of 58% to its amortized cost basis, as of June 30, 2016, from \$12,052, representing a discount of 49% to its amortized cost basis, as of June 30, 2015. The decrease in fair value was driven by declining revenues from NMMB’s print business. The impact of this decline was partially offset by increases in gross profit and EBITDA margins as well as by growth in the digital and out-of-home advertising business lines.

USES Corp.

On June 15, 2016, we provided additional \$1,300 debt financing to USES and its subsidiaries in the form of additional Term Loan A debt and, in connection with such Term Loan A debt financing, USES issued to us 99,900 shares of its common stock. On June 29, 2016, we provided additional \$2,200 debt financing to USES and its subsidiaries in the form of additional Term Loan A debt and, in connection with such Term Loan A debt financing, USES issued to us 169,062 shares of its common

stock. As a result of such debt financing and recapitalization, as of June 29, 2016, we held 268,962 shares of USES common stock representing a 99.96% common equity ownership interest in USES.

We own 99.96% of USES as of June 30, 2016. USES provides industrial and environmental services in the Gulf States region. The company offers industrial services, such as tank and chemical cleaning, hydro blasting, waste management, vacuum, safety training, turnaround management, and oilfield. It also offers response/remediation services, including hazardous and non-hazardous material emergency response, oil spill response, industrial fire suppression, disaster response, remediation, demolition and safety training. The company serves pulp paper, oil and gas production, utilities, transportation, refinery, petrochemical, shipping, manufacturing, government, engineering, consulting, spill management and chemical industries.

The first half of 2016 saw the company's revenue suffer due to a pull back in capital and maintenance spending across the energy sector. In addition the company did not benefit from any large emergency response projects. As a result a number of changes have been made to position the company for growth again. The Company has replaced the CEO and CFO. Under the new leadership, the company is now operating under a right sized cost structure. The company is also improving its fleet of equipment with support from Prospect and other financing sources. Management has implemented a new sales strategy that is helping build the company's revenue backlog across multiple end markets and service lines.

Due to the softening of the energy markets partially offset by increased margins on projects, the Board of Directors determined the fair value of our investment in USES to be \$40,286 as of June 30, 2016, a discount of \$21,440 from its amortized cost, compared to the \$4,293 unrealized depreciation recorded at June 30, 2015.

Valley Electric Company, Inc.

We own 94.99% of Valley Electric as of June 30, 2016. Valley Electric owns 100% of the equity of VE Company, Inc., which owns 100% of the equity of Valley Electric Co. of Mt. Vernon, Inc. ("Valley"). Valley is a leading provider of specialty electrical services in the state of Washington and is among the top 50 electrical contractors in the U.S. The company, with its headquarters in Everett, Washington, offers a comprehensive array of contracting services, primarily for commercial, industrial, and transportation infrastructure applications, including new installation, engineering and design, design-build, traffic lighting and signalization, low to medium voltage power distribution, construction management, energy management and control systems, 24-hour electrical maintenance and testing, as well as special projects and tenant improvement services. Valley was founded in 1982 by the Ward family, who held the company until the end of 2012.

On December 31, 2012, we acquired 96.3% of the outstanding shares of Valley. On June 24, 2014, Prospect and management of Valley formed Valley Electric and contributed their shares of Valley stock to Valley Electric. Valley management made an additional equity investment in Valley Electric, reducing our ownership to 94.99%.

In early 2016, Valley's project backlog and revenue steadily improved primarily due to a more robust construction market in the state of Washington and successful project execution.

Due to the softening of the energy markets partially offset by increased project margins, the Board of Directors determined the fair value of our investment in Valley Electric to be \$31,091 as of June 30, 2016, a discount of \$29,345 from its amortized cost, compared to the \$28,340 unrealized depreciation recorded at June 30, 2015.

Equity positions in our portfolio are susceptible to potentially significant changes in value, both increases as well as decreases, due to changes in operating results and market multiples. Several of our controlled companies experienced such volatility and we recorded corresponding fluctuations in valuations during the year ended June 30, 2016. See above for discussions regarding the fluctuations in NPRC, First Tower Finance, USES, NMMB, Freedom Marine and Valley Electric. During the year ended June 30, 2016, the value of our investments in Arctic Energy, CP Energy and Gulf Coast decreased by \$22,024, \$12,188 and \$8,031, respectively, as a result of depressed earnings resulting from softness of the energy markets; Echelon decreased by \$5,166 due to aircraft sale proceeds and resulting dividend distribution; and R-V decreased by \$3,017 due to lower sales profitability. In total, ten of the controlled investments are valued at the original investment amounts or higher, and seven of the controlled investments have been valued at discounts to the original cost basis. Overall, at June 30, 2016, control investments are valued at \$15,771 below their amortized cost.

We hold two affiliate investments at June 30, 2016. Our affiliate portfolio companies did not experience a significant change in valuation during the year ended June 30, 2016. Overall, at June 30, 2016, affiliate investments are valued at \$562 above their amortized cost.

With the non-control/non-affiliate investments, generally, there is less volatility related to our total investments because our equity positions tend to be smaller than with our control/affiliate investments, and debt investments are generally not as susceptible to

large swings in value as equity investments. For debt investments, the fair value is generally limited on the high side to each loan's par value, plus any prepayment premium that could be imposed. Many of the debt investments in this category have not experienced a significant change in value, as they were previously valued at or near par value. Non-control/non-affiliate investments did not experience significant changes and are generally performing as expected or better. Two of our non-control/non-affiliate investments, Ark-La-Tex Wireline Services ("Ark-La-Tex"), LLC and Spartan Energy Services, Inc. ("Spartan"), are valued at a discount to amortized cost of \$32,548 and \$14,240, respectively, due to a decline in operating results from softness of the energy markets. During the year ended June 30, 2016, the value of our CLO residual interest investments decreased by \$114,133 primarily due to non-credit related changes in the capital markets impacting the underlying collateral and increasing our discount rate by 404 bps inclusive of new investments. Overall, at June 30, 2016, non-control/non-affiliate investments are valued \$57,551 below their amortized cost, excluding our investments in Ark-La-Tex, Spartan, and CLO investments, as the remaining companies are generally performing as or better than expected.

#### Capitalization

Our investment activities are capital intensive and the availability and cost of capital is a critical component of our business. We capitalize our business with a combination of debt and equity. Our debt as of June 30, 2016 consists of: a Revolving Credit Facility availing us of the ability to borrow debt subject to borrowing base determinations; Convertible Notes which we issued in February 2011, April 2012, August 2012, December 2012 and April 2014; Public Notes which we issued in March 2013, April 2014, December 2015, and from time to time, through our Baby Bond Program; and Prospect Capital InterNotes® which we issue from time to time. Our equity capital is comprised entirely of common equity.

The following table shows the maximum draw amounts and outstanding borrowings of our Revolving Credit Facility, Convertible Notes, Public Notes and Prospect Capital InterNotes® as of June 30, 2016 and June 30, 2015.

	June 30, 2016		June 30, 2015	
	Maximum	Amount	Maximum	Amount
	Draw Amount	Outstanding	Draw Amount	Outstanding
Revolving Credit Facility	\$885,000	\$—	\$885,000	\$368,700
Convertible Notes	1,089,000	1,089,000	1,239,500	1,239,500
Public Notes	709,657	709,657	548,094	548,094
Prospect Capital InterNotes®	908,808	908,808	827,442	827,442
Total	\$3,592,465	\$2,707,465	\$3,500,036	\$2,983,736

The following table shows the contractual maturities of our Revolving Credit Facility, Convertible Notes, Public Notes and Prospect Capital InterNotes® as of June 30, 2016.

	Payments Due by Period				
	Total	Less than 1 Year	1 – 3 Years	3 – 5 Years	After 5 Years
Revolving Credit Facility	\$—	\$—	\$—	\$—	\$—
Convertible Notes	1,089,000	167,500	529,500	392,000	—
Public Notes	709,657	—	—	300,000	409,657
Prospect Capital InterNotes®	908,808	8,819	257,198	360,599	282,192
Total Contractual Obligations	\$2,707,465	\$176,319	\$786,698	\$1,052,599	\$691,849

The Convertible Notes due August 15, 2016, with an outstanding balance of \$167,500 at June 30, 2016, were paid on August 15, 2016 from cash-on-hand, primarily generated from the sale of Harbortouch.

The following table shows the contractual maturities of our Revolving Credit Facility, Convertible Notes, Public Notes and Prospect Capital InterNotes® as of June 30, 2015.

	Payments Due by Period				
	Total	Less than 1 Year	1 – 3 Years	3 – 5 Years	After 5 Years
Revolving Credit Facility	\$368,700	\$—	\$—	\$368,700	\$—
Convertible Notes	1,239,500	150,000	497,500	592,000	—
Public Notes	548,094	—	—	300,000	248,094
Prospect Capital InterNotes®	827,442	—	54,509	369,938	402,995
Total Contractual Obligations	\$2,983,736	\$150,000	\$552,009	\$1,630,638	\$651,089

Historically, we have funded a portion of our cash needs through borrowings from banks, issuances of senior securities, including secured, unsecured and convertible debt securities, or issuances of common equity. For flexibility, we maintain a universal shelf registration statement that allows for the public offering and sale of our debt securities, common stock, preferred stock, subscription rights, and warrants and units to purchase such securities in an amount up to \$5,000,000 less issuances to date. As of June 30, 2016, we can issue up to \$4,807,503 of additional debt and equity securities in the public market under this shelf registration. We may from time to time issue securities pursuant to the shelf registration statement or otherwise pursuant to private offerings. The issuance of debt or equity securities will depend on future market conditions, funding needs and other factors and there can be no assurance that any such issuance will occur or be successful.

Each of our Unsecured Notes (as defined below) are our general, unsecured obligations and rank equal in right of payment with all of our existing and future unsecured indebtedness and will be senior in right of payment to any of our subordinated indebtedness that may be issued in the future. The Unsecured Notes are effectively subordinated to our existing secured indebtedness, such as our credit facility, and future secured indebtedness to the extent of the value of the assets securing such indebtedness and structurally subordinated to any existing and future liabilities and other indebtedness of any of our subsidiaries.

#### Revolving Credit Facility

On March 27, 2012, we closed on an extended and expanded credit facility with a syndicate of lenders through PCF (the “2012 Facility”). The lenders had extended commitments of \$857,500 under the 2012 Facility as of June 30, 2014, which was increased to \$877,500 in July 2014. The 2012 Facility included an accordion feature which allowed commitments to be increased up to \$1,000,000 in the aggregate. Interest on borrowings under the 2012 Facility was one-month LIBOR plus 275 basis points with no minimum LIBOR floor. Additionally, the lenders charged a fee on the unused portion of the 2012 Facility equal to either 50 basis points if at least half of the credit facility is drawn or 100 basis points otherwise.

On August 29, 2014, we renegotiated the 2012 Facility and closed an expanded five and a half year revolving credit facility (the “2014 Facility” and collectively with the 2012 Facility, the “Revolving Credit Facility”). The lenders have extended commitments of \$885,000 under the 2014 Facility as of June 30, 2016. The 2014 Facility includes an accordion feature which allows commitments to be increased up to \$1,500,000 in the aggregate. The revolving period of the 2014 Facility extends through March 2019, with an additional one year amortization period (with distributions allowed) after the completion of the revolving period. During such one year amortization period, all principal payments on the pledged assets will be applied to reduce the balance. At the end of the one year amortization period, the remaining balance will become due, if required by the lenders.

The 2014 Facility contains restrictions pertaining to the geographic and industry concentrations of funded loans, maximum size of funded loans, interest rate payment frequency of funded loans, maturity dates of funded loans and minimum equity requirements. The 2014 Facility also contains certain requirements relating to portfolio performance, including required minimum portfolio yield and limitations on delinquencies and charge-offs, violation of which could result in the early termination of the 2014 Facility. The 2014 Facility also requires the maintenance of a minimum liquidity requirement. As of June 30, 2016, we were in compliance with the applicable covenants.

Interest on borrowings under the 2014 Facility is one-month LIBOR plus 225 basis points with no minimum LIBOR floor. Additionally, the lenders charge a fee on the unused portion of the 2014 Facility equal to either 50 basis points if at least 35% of the credit facility is drawn or 100 basis points otherwise. The 2014 Facility requires us to pledge assets as collateral in order to borrow under the credit facility.

As of June 30, 2016 and June 30, 2015, we had \$538,456 and \$721,800, respectively, available to us for borrowing under the Revolving Credit Facility, of which the amount outstanding was \$0 and \$368,700, respectively. As additional eligible investments are transferred to PCF and pledged under the Revolving Credit Facility, PCF will generate additional availability up to the current commitment amount of \$885,000. As of June 30, 2016, the investments, including cash and money market funds, used as collateral for the Revolving Credit Facility had an aggregate fair value of \$1,373,569, which represents 22.1% of our total investments, including cash and money market funds. These assets are held and owned by PCF, a bankruptcy remote special purpose entity, and as such, these investments are not available to our general creditors. The release of any assets from PCF requires the approval of the facility agent.

In connection with the origination and amendments of the Revolving Credit Facility, we incurred \$12,405 of new fees and \$3,539 of fees carried over for continuing participants from the previous facility, which are being amortized over the term of the facility in accordance with ASC 470-50, of which \$7,525 remains to be amortized and is included within deferred financing costs on the Consolidated Statements of Assets and Liabilities as of June 30, 2016. During the year ended June 30, 2015, in accordance with ASC 470-50, we expensed \$332 of fees relating to credit providers in the 2012 Facility who did not commit to the 2014 Facility.

During the years ended June 30, 2016, 2015 and 2014, we recorded \$13,213, \$14,424, and \$12,216, respectively, of interest costs, unused fees and amortization of financing costs on the Revolving Credit Facility as interest expense.

#### Convertible Notes

On December 21, 2010, we issued \$150,000 aggregate principal amount of convertible notes that matured on December 15, 2015 (the "2015 Notes"). The 2015 Notes bore interest at a rate of 6.25% per year, payable semi-annually on June 15 and December 15 of each year, beginning June 15, 2011. Total proceeds from the issuance of the 2015 Notes, net of underwriting discounts and offering costs, were \$145,200. On December 15, 2015, we repaid the outstanding principal amount of the 2015 Notes, plus interest. No gain or loss was realized on the transaction.

On February 18, 2011, we issued \$172,500 aggregate principal amount of convertible notes that mature on August 15, 2016 (the "2016 Notes"), unless previously converted or repurchased in accordance with their terms. The 2016 Notes bear interest at a rate of 5.50% per year, payable semi-annually on February 15 and August 15 of each year, beginning August 15, 2011. Total proceeds from the issuance of the 2016 Notes, net of underwriting discounts and offering costs, were \$167,325. Between January 30, 2012 and February 2, 2012, we repurchased \$5,000 aggregate principal amount of the 2016 Notes at a price of 97.5, including commissions. The transactions resulted in our recognizing \$10 of loss in the year ended June 30, 2012. The 2016 Notes were repaid on maturity of August 15, 2016, after our June 30, 2016 fiscal year end.

On April 16, 2012, we issued \$130,000 aggregate principal amount of convertible notes that mature on October 15, 2017 (the "2017 Notes"), unless previously converted or repurchased in accordance with their terms. The 2017 Notes bear interest at a rate of 5.375% per year, payable semi-annually on April 15 and October 15 of each year, beginning October 15, 2012. Total proceeds from the issuance of the 2017 Notes, net of underwriting discounts and offering costs, were \$126,035. On March 28, 2016, we repurchased \$500 aggregate principal amount of the 2017 Notes at a price of 98.25, including commissions. The transaction resulted in our recognizing a \$9 gain for the period ended March 31, 2016.

On August 14, 2012, we issued \$200,000 aggregate principal amount of convertible notes that mature on March 15, 2018 (the "2018 Notes"), unless previously converted or repurchased in accordance with their terms. The 2018 Notes bear interest at a rate of 5.75% per year, payable semi-annually on March 15 and September 15 of each year, beginning March 15, 2013. Total proceeds from the issuance of the 2018 Notes, net of underwriting discounts and offering costs, were \$193,600.

On December 21, 2012, we issued \$200,000 aggregate principal amount of convertible notes that mature on January 15, 2019 (the "2019 Notes"), unless previously converted or repurchased in accordance with their terms. The 2019 Notes bear interest at a rate of 5.875% per year, payable semi-annually on January 15 and July 15 of each year, beginning July 15, 2013. Total proceeds from the issuance of the 2019 Notes, net of underwriting discounts and offering costs, were \$193,600.

On April 11, 2014, we issued \$400,000 aggregate principal amount of convertible notes that mature on April 15, 2020 (the "2020 Notes"), unless previously converted or repurchased in accordance with their terms. The 2020 Notes bear interest at a rate of 4.75% per year, payable semi-annually on April 15 and October 15 each year, beginning October 15, 2014. Total proceeds from the issuance of the 2020 Notes, net of underwriting discounts and offering costs, were \$387,500. On January 30, 2015, we repurchased \$8,000 aggregate principal amount of the 2020 Notes at a price of 93.0, including commissions. As a result of this transaction, we recorded a gain of \$332, in the amount of the difference between the reacquisition price and the net carrying amount of the notes, net of the proportionate amount of unamortized debt issuance costs.

Edgar Filing: PROSPECT CAPITAL CORP - Form 10-K/A

Certain key terms related to the convertible features for the 2016 Notes, the 2017 Notes, the 2018 Notes, the 2019 Notes and the 2020 Notes (collectively, the “Convertible Notes”) are listed below.
