Agbami Field kicks-off production in the sea of Nigeria

Rio de Janeiro, July 31, 2008 PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces that the Agbami Field produced its first oil on July 29 2008. Petrobras holds a 13% share in the venture, together with StatoilHydro and Chevron, the operator. The Nigerian companies Nigerian National Petroleum Corporation and Famfa Oil Limited are also partners in Agbami Field as concessionaries.

The FPSO (Floating Production, Storage and Offloading) type vessel that operates in the blocks OML-127/128 (Agbami) is the biggest ever installed in the world for this purpose and is capable of producing 250,000 barrels of oil per day (bpd). The field's average water depth is 1400 meters.

Production is expected to peak in the second half of 2009. Petrobras's share will be around 33,000 bpd of the light oil production, with API gravities ranging from 45 to 48 degrees. This production will represent some 13.4% of the volume Petrobras produces abroad.

Petrobras has had a wide-range participation in all Agbami production development stages, with professionals assigned to several project areas ever since its conception, making a decisive contribution with their knowledge on deepwater exploration and production.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
