(**) Adjusted EBITDA is net income before: (i) depreciation and amortization expenses; (ii) income tax and social contribution; (iii) financial result; and (iv) other operating revenues/expenses, net.

In 2Q15, net operating revenue, including construction revenue, reached R\$ 2.8 billion; a 2.5% increase compared to 2Q14.

Costs and expenses, including construction costs, totaled R\$ 2.4 billion, up by 1.5% compared to R\$ 2.3 billion recorded in 2Q14.

Adjusted EBIT, in the amount of R\$ 472.5 million, grew 7.6% from R\$ 439.1 million recorded in the same quarter of the previous year.

Adjusted EBITDA, in the amount of R\$ 756.6 million, increased 14.3% from R\$ 661.7 million recorded in 2Q14 (R\$ 3,355.1 million in the last 12 months).

The adjusted EBITDA margin was 26.8% in 2Q15, versus 24.0% in 2Q14 (30.6% in the last 12 months). Excluding construction revenues and construction costs, the adjusted EBITDA margin was 38.4% in 2Q15 (31.2% in 2Q14 and 42.4% in the last 12 months).

Net income totaled R\$ 337.3 million, 11.5% higher than R\$ 302.4 million recorded in 2Q14.

2. Gross operating revenue

Gross operating revenue from water and sewage, not including construction revenue, totaled R\$ 2.0 billion, a drop of R\$ 176.8 million or 7.9%, when compared to the R\$ 2.2 billion recorded in 2Q14.

The main factors that led to this variation were:

- Bonus granted within the Water Consumption Reduction Incentive Program, with a R\$ 231.0 million impact in 2Q15, versus the R\$ 88.1 million granted in 2Q14, leading to a decrease of 6.4% in gross operating revenue;
- Decrease of 7.5% in the Company's total billed volume (8.3% in water and 6.3% in sewage); and
- Decrease in the average billed price, due to the migration of clients to lower volume of consumption ranges.

Comments on the Company's Performance

The decline in gross operating revenue was mitigated by the application of contingency tariff, in the amount of R\$123.0 million, and by the application of the following adjustments:

- 6.5% repositioning tariff index since December 2014; and
- 15.2% tariff increase (7.8% ordinary tariff adjustment and 6.9% Extraordinary Tariff Revision) since June 2015, with a 1.5% impact in the quarter.

3. Construction revenue

Construction revenue increased R\$ 226.1 million or 33.3%, when compared to 2Q14. The variation was mainly due to higher investments in 2Q15.

4. Billed volume

The following tables show the water and sewage billed volume, quarter-on-quarter and semester-on-semester, per customer category and region.

5.1. Payroll and benefits

In 2Q15 payroll and benefits dropped R\$ 22.6 million or 4.1%, due to the following:

Adjusted EBITDA Reconciliation (Non-accounting measures)

25

- R\$ 15.9 million in provisions for severance payments (TAC); and
- R\$ 10.7 million in expenses related to the Profit Sharing Program, due to a higher reversion of provision in 2Q15, as a result of achievements lower than the targets estimated for the period.

The average wage increase of 6.8%, since May 2014 and of 9.7% since May 2015 were offset by the 4.4% drop in the number of employees, that reduced from 14,799 in 2Q14 to 14,147 this quarter.

5.2. Supplies

In 2Q15, expenses with supplies decreased R\$ 3.8 million or 8.1%, from R\$ 46.9 million to R\$ 43.1 million, mostly due to lower use of materials in preventive and corrective maintenance in several water and sewage systems, thus, resulting in a reduction of R\$ 3.0 million.

5.3. Services

Services expenses, in the amount of R\$ 270.0 million, dropped R\$ 81.6 million or 23.2%, in comparison to R\$351.6 million in 2Q14. The main factors were:

- Advertising campaigns, in the amount of R\$ 38.3 million, mainly due to the intensification in 2Q14, for the rational use of water;
- Estimate of service expenses, totaling R\$ 22.1 million, especially due to the lower expense related to advertising campaigns in 2Q15; and
- Expenses with risk contracts for credit recovery, in the amount of R\$ 7.8 million.

5.4. Electric power

Electric power expenses totaled R\$ 208.3 million, an increase of R\$ 63.8 million or 44.2% in comparison to the R\$ 144.5 million in 2Q14, chiefly due to the following.

- Average increase of 82.0% in the regulated market tariffs (ACR), with a 10.3% decrease in consumption; and
- Average increase of 210.4% in the grid market tariffs (TUSD).

PAGE: 15 of 76

Comments on the Company's Performance

The regulated market (ACR) accounts for 69.2% of the total electric power consumed by the Company, while the grid market represents 11.5% of total consumption.

5.5. General expenses

General expenses dropped R\$ 141.3 million or 74.4%, totaling R\$ 48.7 million, versus the R\$ 190.0 million recorded in 2Q14 mainly due to:

- R\$ 117.8 million decrease in the provision for lawsuits; and
- Lower provision for the Municipal Fund for Environmental Sanitation and Infrastructure, in the amount of R\$ 13.3 million, as a result of the decrease in revenues with the municipality of São Paulo.

5.6. Depreciation and amortization

R\$ 61.5 million increase or 27.6%, reaching R\$ 284.1 million in comparison to the R\$ 222.6 million recorded in 2Q14, mostly related to the addition intangible assets in operation.

5.7. Credit write-offs

Credit write-offs decreased R\$ 61.4 million, especially due to higher allowance for losses occurred in 2Q14, in municipalities served with water on wholesale basis.

6. Other operating revenues and expenses, net

Other net operational revenues and expenses reported an upturn of R\$ 6.5 million, mainly due to the gain from selling surplus energy in 2Q15, in the amount of R\$ 9.7 million.

7. Financial result

| Financial revenues | 90.5 | 73.9 | 16.6 | 22.5 |
| Financial expenses net of revenues | (64.5) | (74.4) | 9.9 | (13.3) |

7.1.1. Financial expenses

Financial expenses grew R\$ 6.7 million. The main reasons were:

- R\$ 3.3 million upturn in other financial expenses, mainly due to the increased recognition of interest arising from the startup of a sewage treatment station, financed through leasing; and
- R\$ 2.0 million increase in interest and charges on international loans and financing, especially due to the total debt increase, resulting from new funding.

Comments on the Company's Performance**7.1.2. Financial revenues**

Financial revenues increased R\$ 16.6 million, due to interest mainly over instalment agreement in 2Q15.

7.2. Monetary and exchange rate variation on assets and liabilities

| | <i>R\$ million</i> | | | |

| Currency exchange variation on loans and financing | 208.9 | 84.2 | 124.7 | 148.1 |

7.2.1. Monetary/exchange rate variation on liabilities

The effect on the monetary/currency exchange variation on liabilities in 2Q15 was R\$ 142.9 million, higher than in 2Q14, especially due to:

- An increase of R\$ 124.7 million in expenses with exchange rate change on loans and financing, due to a higher depreciation of the US dollar and the Yen versus the Brazilian Real in 2Q15 (3.3% and 5.0%, respectively), when compared to the depreciation recorded in 2Q14 (2.7% and 1.0%, respectively);

- R\$ 30.9 million decrease in other monetary variation expenses, chiefly due to the reversion of R\$ 25.6 million regarding provision for lawsuits in 2T15; and
- An upturn of R\$ 12.7 million in expenses with monetary variation on loans and financing, due to the increase in the IPCA in 2Q15 compared to 2Q14 (2.26% and 1.54%, respectively).

7.2.2. Monetary/Exchange rate variation on assets

R\$ 24.2 million increase, mainly due to the monetary updates on judicial deposits.

8. Income tax and social contribution

Recorded an R\$ 182.0 million upturn, due to the increase in taxable income in 2Q15 and to the impacts of deferred income tax and social contribution, versus 2Q14.

Comments on the Company's Performance**9. Indicators****9.1. Operating**

As a result of the water crisis, there was a substantial reduction in the water production volume, down by 14.6% in the quarter and 18.1% in the semester.

There was also a substantial decline in the index that measures water losses per connection per day (IPDT) which came to 272 liters/connection x day versus 356 liters/connection x day on the same period last year.

This reduction was the result not only of loss control initiatives, but also of the water crisis and the consequent need to reduce the network pressure as a demand management mechanism.

1 Operations

Companhia de Saneamento Básico do Estado de São Paulo ("SABESP" or the "Company") is a mixed-capital company headquartered in São Paulo, at Rua Costa Carvalho, 300, CEP 05429-900, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services in the State of São Paulo, as well as it supplies treated water and sewage services on a wholesale basis.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. The objective set in the new vision of SABESP is to be recognized as the company that ensured universal access to water and sewage services in its marketplace, in a sustainable and competitive manner, with excellence in customer service.

On June 30, 2015, the Company operated water and sewage services in 364 municipalities of the State of São Paulo. Most of these municipalities operations are based on 30-year concession, program and services contracts. The Company has two partial contracts with the municipality of Mogi das Cruzes, however, since most of municipality is serviced by wholesale, it was not included in the 364 municipalities. On June 30, 2015, the Company had 366 contracts.

SABESP is not temporarily operating in some municipalities due to judicial orders. The lawsuits in progress refer to Álvares Florence, Cajobi, Embaúba, Iperó and Macatuba, and the carrying amount of these municipalities' intangible assets was R\$11,328 on June 30, 2015 (R\$11,328 on December 31, 2014).

As of June 30, 2015, 53 concession agreements had expired and are being negotiated. From June 30, 2015 to 2030, 37 concession agreements will expire. Management believes that concession agreements expired and not yet renewed will result in new contracts, disregarding the risk of discontinuity in the provision of municipal water supply and sewage services. By June 30, 2015, 276 program and services contracts were signed (274 contracts on December 31, 2014).

As of June 30, 2015, the carrying amount of the underlying assets used in the 53 concessions of the municipalities under negotiation totaled R\$6,195,595, accounting for 22.91% of the total, and the related gross revenue for the six-month period then ended totaled R\$920,940, accounting for 16.61% of the total.

The Company's operations are concentrated in the municipality of São Paulo, which represents 49.15% of the gross revenues on June 30, 2015 (49.79% on June 30, 2014) and 42.42% of intangible assets (42.29% on December 31, 2014).

On June 23, 2010, the State of São Paulo, the Municipality of São Paulo, the Company and the regulatory agency “Sanitation and Energy Regulatory Agency – ARSESP” signed an agreement to share the responsibility for water supply and sewage services to the Municipality of São Paulo based on a 30-year concession agreement. This agreement is extendable for another 30 years, pursuant to the law. This agreement sets forth SABESP as the exclusive service provider and designates ARSESP as regulator, establishing prices, controlling and monitoring services.

Also, on June 23, 2010, the State of São Paulo, the city of São Paulo and SABESP signed the “Public service provision agreement of water supply and sewage services”, a 30-year concession agreement which is extendable for another 30 years. This agreement involves the following activities:

PAGE: 19 of 76

Notes to the Interim Financial Information

- i. protection of the sources of water in collaboration with other agencies of the State and the City;
- ii. capture, transport and treat of water;
- iii. collect, transport, treatment and final dispose of sanitary sewage; and
- iv. adoption of other actions of basic and environmental sanitation.

In the municipality of Santos, in the Santos coast region, which has a significant population, the Company operates under an authorization by public deed, a situation similar to other municipalities in that region and in the Ribeira valley, where the Company started to operate after the merger of the companies that formed it. As of June 30, 2015, the carrying amount of the municipality of Santos' intangible assets was R\$362,367 (R\$205,261 on December 31, 2014) and gross revenue in the six-month period ended June 30, 2015 was R\$132,720 (R\$117,885 on June 30, 2014).

Article 58 of Law 11,445/07 determines that precarious and overdue concessions, as well as those effective for an undetermined period of time, including those that do not have an instrument formalizing them, will be valid until December 31, 2010. However, Article 2 of Law 12,693 of July 24, 2012 allows program agreements to be executed until December 31, 2016.

The Company's Management understands that the concession agreements not yet renewed are valid and will be governed by Laws 8,987/95 and 11,445/07, including those municipalities served without an agreement.

Public deeds are valid and governed by the Brazilian Civil Code.

The Company's shares have been listed in the Novo Mercado (New Market) segment of BM&FBovespa under the ticker symbol SBSP3 since April 2002 and on the New York Stock Exchange (NYSE) as American Depositary Receipts ("ADRs") Level III, under the SBS code, since May 2002. In 2007, SABESP adhered to the Corporate Sustainability Index, or ISE of BM&FBovespa, which reflects the high level of commitment with sustainable development and social practices.

Since 2008, the Company has been setting up partnerships with other companies, which resulted in the following companies: Sesamm, Águas de Andradina, Saneaqua Mairinque, Aquapolo Ambiental, Águas de Castilho, Attend Ambiental and Paulista Geradora de Energia. Although SABESP has no majority interest in the capital stock of these companies, the shareholders' agreements provide for the power of veto and casting vote in certain issues jointly with associates, indicating the shared control in the management of investees.

Water shortage – the Company's operations have been influenced by the lowest rainfall and inflow never seen in 85 years, especially at the reservoirs composing the Cantareira System which, under usual conditions, is in charge for direct supply of approximately 8.8 million people. During the rainy season, from October 2014 to January 2015, rainfall remained below average, despite above average from February to March 2015. The expectation was that the water volume stored at the Cantareira System would recover, however, as the levels were already low due to the lack of rainfall during Summer in 2013 and 2014, rainfall index in the region, during the rainy season from October 2014 to March 2015, was not sufficient to recover the reservoirs, whose levels are below than the one seen in the historical series. To face this situation and ensure that the water supply is not interrupted, the Company has been adopting several measures, such as:

PAGE: 20 of 76

Notes to the Interim Financial Information

- Using pumps to remove water below the catchment level of the Cantareira System, the so-called “technical reserve”, which had never been used before to supply the population;
- Offering discounts (bonus) to consumers, whose volume consumed is below the average stipulated;
- Using water from other producing systems to serve consumers previously supplied by the Cantareira System;
- Intensifying the advertising campaigns towards the rational use of water;
- Reducing pressure in the distribution network, in order to prevent water losses;
- Reducing the water volume sold to municipalities which operate their own distribution networks;
- Making investments earlier than the planned time to expand water safety; and
- Implementing the contingency tariff for consumers whose volume consumed is above the average stipulated.

The water reservation volume at the reservoirs relies on several factors, such as levels of rain, temperature and atmospheric humidity, as well as the type and humidity of soil in water sources regions.

This scenario of water shortage also had adverse financial effects for the Company. As a result, since 2014 up to date, the Company has taken decisions to minimize these effects, including:

- Rearrangement of investments,
- Expense budget reduction,
- Negotiation of overdue receivables (the Company sent a list of 22 municipalities with unpaid water bills to the State CADIN, including those municipalities served by wholesale);
- Contracting guarantee insurance for escrow deposits; and
- Application of the extraordinary tariff revision since June 2015.

The Company's Management expects that the operating cash generation estimated for 2015 and the lines of credit available for investments will be sufficient to meet its short-term liabilities and not compromise the actions required to overcome the water shortage, thus preserving its consumers' supply.

The interim financial information was approved by the Board of Directors on August 13, 2015.

These policies are disclosed in Note 3 to the Annual Financial Statements.

4 Risk Management

4.1 Financial Risk Management

Financial risk factors

The Company's activities are affected by Brazilian economic scenario, making it exposed to market risk (exchange rate and interest rate), credit risk and liquidity risk. The Company's financial risk management is focused on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company has not utilized derivative instruments in any of the reported periods.

(a) Market risk

Foreign currency risk

SABESP's foreign exchange exposure implies market risks associated with currency fluctuations, since the Company has foreign currency-denominated liabilities, mainly US dollar and yen-denominated short and long-term loans.

PAGE: 22 of 76

Notes to the Interim Financial Information

The management of SABESP's foreign currency exposure considers several current and projected economic factors, besides market conditions.

This risk arises from the possibility that the Company may incur in losses due to exchange rate fluctuations that would impact liability balances of foreign currency-denominated loans and financing raised in the market and related financial expenses. The Company does not maintain hedge or swap contracts or any derivative financial instrument to hedge against this risk, but conducts an active management of debt, taking advantage of opportunities to change expensive debts with "cheaper" debts, reducing the cost through early maturity.

A significant amount of the Company's financial debt is indexed to the U.S. dollar and Yen, in the total amount of R\$5,140,060 on June 30, 2015 (R\$4,363,898 on December 31, 2014). Below, the Company's exposure to foreign exchange risk:

| | June 30, 2015 | | December 31, 2014 | |
|--|-------------------------|-----------|-----------------------------|------------|
| | Foreign currency | | R\$ Foreign currency | R\$ |
| Loans and financing– US\$ | 1,222,531 | 3,793,025 | 1,231,188 | 3,270,282 |
| Loans and financing – Yen | 51,854,547 | 1,317,624 | 48,066,910 | 1,068,527 |
| Interest and charges from loans and financing – US\$ | | 20,246 | | 17,703 |
| Interest and charges from loans and financing– Yen | | 9,165 | | 7,386 |
| Total exposure | | 5,140,060 | | 4,363,898 |
| Financing cost | | (18,067) | | (17,606) |
| Total loans in foreign currency (Note 15) | | 5,121,993 | | 4,346,292 |

The 18% increase in foreign currency-denominated debt from December 31, 2014 to June 30, 2015 was mainly due to the following:

- 1) Exchange rate changes, since the US dollar appreciated 16.8% from R\$2.6562 on December 31, 2014 to R\$3.1026 on June 30, 2015. The US dollar-denominated debt accounts for 74% of foreign currency-denominated debts; and

2) An 8% increase in Yen-denominated debt and 14% increase in the Yen.

On June 30, 2015, if the Brazilian real had depreciated or appreciated by 10% against the US dollar and Yen with all other variables held constant, effects on results before taxes on the six-month period ended June 30, 2015 would have been R\$514,006 (R\$436,390 on December 31, 2014), lower or higher, mainly as a result of foreign exchange losses or gains on the translation of foreign currency-denominated loans.

Scenario I below presents the effect in income statements for the next 12 months, considering the projected rates of the U.S. dollar and the Yen. Considering the other variables as remaining constant, the impacts for the next 12 months are shown in scenarios II and III with possible depreciations of 25% and 50%, respectively, in the Brazilian real.

Interest rate risk

This risk arises from the possibility that the Company could incur losses due to fluctuations in interest rates, increasing the financial expenses related to loans and financing.

The Company has not entered into any derivative contract to hedge against this risk; however continually monitors market interest rates, in order to evaluate the possible need to replace its debt.

PAGE: 24 of 76

Notes to the Interim Financial Information

The table below provides the Company's loans and financing subject to variable interest rate:

(i) TR – Interest Benchmark Rate

(ii) CDI - (Certificado de Depósito Interbancário), an interbank deposit certificate

(iii) TJLP - (Taxa de Juros a Longo Prazo), a long-term interest rate index

(iv) IPCA - (Índice Nacional de Preços ao Consumidor Amplo), a consumer price index

(v) LIBOR - London Interbank Offered Rate

As of June 30, 2015, if interest rates on loans and financing denominated in Brazilian reais had been 1% higher or lower with all other variables held constant, the effects on profit for the six-month period ended June 30, 2015, before taxes would have been R\$77,435 (R\$79,294 on December 31, 2014) lower or higher.

Another risk to which the Company is exposed, is the mismatch of the monetary restatement indices of its debts with those of its service revenues. Water supply and sewage services tariff adjustments do not necessarily follow the increases in the inflation indexes to adjust loans, financing and interest rates affecting the Company's indebtedness.

(b) Credit risk

Credit risk arises from cash and cash equivalents, deposits in banks and financial institutions, as well as credit exposures to wholesale basis and retail customers, including outstanding accounts receivable, restricted cash and accounts receivable from related parties. Credit risk exposure to customers is mitigated by sales to a dispersed base.

The maximum exposures to credit risk on June 30, 2015 are the carrying amounts of instruments classified as cash equivalents, deposits in banks and financial institutions, restricted cash, trade accounts receivable and accounts receivable from related parties. See additional information in Notes 6, 7, 8 and 9.

PAGE: 25 of 76

Notes to the Interim Financial Information

Regarding the financial assets held with financial institutions, the credit quality that is not past due or subject to provision for impairment can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates. The credit quality of counterparties which are banks, such as deposits and financial investments, the Company considers the lower rating of the counterparty published by three main international rating agencies (Fitch, Moody's and S&P), according to internal policy of market risk management:

| | June 30, 2015 | December 31, 2014 |
|---|----------------------|--------------------------|
| Cash at bank and short-term bank deposits | | |

| Other (*) | 617 | 644 |
| | 803,031 | 1,722,991 |

(*)This category includes current accounts and investment funds in banks, which have no credit rating information available.

The available credit rating information of the banks in which the Company made transactions during the period is as follows:

| Banks | Fitch | Moody's | Standard Poor's |
|--------------------------------|--------------|----------------|------------------------|
| Banco do Brasil S.A. | AAA (bra) | Aaa.br | - |
| Banco Santander Brasil S.A. | AAA (bra) | Aaa.br | brAAA |

| Banco Bradesco S.A. | AAA (bra) | Aaa.br | brAAA |
| Itaú Unibanco Holding S.A. | AAA (bra) | Aaa.br | brAAA |

(c) **Liquidity risk**

(c) Liquidity risk

The Company's liquidity is primarily reliant upon cash provided by operating activities, loans from Brazilian Federal and State governmental financial institutions, and financing in the domestic and international capital markets. The liquidity risk management considers the assessment of its liquidity requirements to ensure it has sufficient cash to meet its Capex and operating expenses needs, as well as the payment of debts.

The funds held by the Company are invested in interest-bearing current accounts, time deposits and securities, selecting instruments with appropriate maturity or liquidity sufficient to provide margin as determined by projections mentioned above.

The table below shows the financial liabilities of the Company, into relevant maturities, including the installment of principal and future interest to be paid according to the agreement.

(*)The Company also considered future commitments (construction not yet performed) not yet recognized in the financial statements related to São Lourenço PPP, due to the relevance of future cash flows, the impacts on its operations and the fact the Company already has formalized this commitment through an agreement signed by the parties.

Future interest

Future interest was calculated based on the contractual clauses for all agreements. For agreements with floating interest rate, the interest rates used correspond to the base dates above.

Cross default

The Company has loan and financing agreements including cross default clauses, i.e., the early maturity of any debt may imply the early maturity of these agreements. The indicators are continuously monitored in order to avoid the execution of this clause.

(d) Other price risks

The Company is exposed to the price risk of investment in equity instruments of Companhia de Transmissão de Energia Elétrica Paulista – CTEEP, solely held for trading purposes in the short term.

Sensitivity analysis of equity instruments price

The sensitivity analysis was determined based on the exposure to the equity instruments price at the end of the reporting period.

If the equity instrument price were 10% lower, the profit for the quarter ended June 30, 2015 would decrease by R\$5,737, net of taxes.

(e) Sensitivity analysis on interest rate risk

The table below shows the sensitivity analysis of the financial instruments, prepared in accordance with CVM Rule 475/2008 in order to evidence the balances of main financial assets and liabilities, calculated at a rate projected until the final settlement of each contract, considering a probable scenario (scenario I), appreciation of 25% (scenario II) and 50% (scenario III).

The purpose of the sensitivity analysis is to measure the impact of changes in the market over the financial instruments of the Company, considering constant all other variables. In the time of settlement, the amounts can be different from those presented above, due to the estimates used in the measurement.

4.2 Capital management

The Company's objectives when managing capital are ensure its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

The Company monitors capital based on the leverage ratio. This ratio corresponds to net debt divided by total capital. Net debt corresponds to total loans and financing less cash and cash equivalents. Total capital is calculated as total equity as shown in the statement of financial position plus net debt.

Notes to the Interim Financial Information

| | June 30, 2015 | December 31, 2014 |
|---------------------------------------|----------------------|--------------------------|

| Total capital | 24,226,298 | 22,367,179 |
| Leverage ratio | 42% | 41% |

The leverage ratio increased from the 41% as of December 31, 2014 to 42% on June 30, 2015, due to the increased in foreign-currency denominated loans and financing as a result of the foreign exchange rate variation in 2015.

4.3 Fair value estimates

It is assumed that balances from trade accounts receivable (current) and accounts payable to suppliers by carrying amount, less impairment, approximate their fair values, considering the short maturity. Long-term trade accounts receivable also approximate their fair values, as they will be adjusted by inflation and/or will bear contractual interest rates over time.

4.4 Financial Instruments

As of December 31, 2014 the Company had neither financial assets classified as held to maturity, available for sale and fair value through profit or loss nor financial liabilities classified as fair value through profit or loss. In the second quarter of 2015, the Company received CTEEP's shares, which were classified as financial asset held for trading and

are recognized at fair value through profit or loss. This is the only change in financial instruments classifications when compared to the year ended December 31, 2014. The Company's financial instruments included in the loans and receivables category comprise cash and cash equivalents, trade accounts receivable, balances with related parties, other accounts receivable, balances receivable from the Water National Agency – ANA, and the financial instruments under other liabilities category are comprised of balance payable to contractors and suppliers, loans and financing, balances payable deriving from the Public Private Partnership-PPP and program contract commitments, which are non-derivative financial assets and liabilities with fixed or determinable payments, not quoted in an active market.

The estimated fair values of financial instruments are as follows:

Additionally, SABESP has financial instrument assets receivable from related parties, in the amount of R\$817,674 as of June 30, 2015 (R\$223,983 as of December 31, 2014), which were calculated in accordance with the conditions negotiated between related parties. The conditions and additional information referring to these financial instruments are disclosed in Note 9 to this interim financial information and in Note 10 to the annual financial statements as of December 31, 2014. Part of this balance, totaling R\$747,111 (R\$155,493 on December 31, 2014), refers to reimbursement from additional retirement and pension plan - G0 which is indexed by IPCA plus simple interest of 0.5% p.m. This interest rate approximates that one practiced by federal government bonds (NTN-b) with terms similar to those of related-party transactions.

| Public-private partnership - PPP | 543,355 | 543,355 | 368,283 | 368,283 |

The criteria adopted to obtain the fair values of loans and financing, in preparing the interim financial information as of June 30, 2015, are consistent with those adopted in the Annual Financial Statements for the fiscal year ended December 31, 2014. In the Annual Financial Statements, these criteria are disclosed in Note 5.4.

Considering the nature of other financial instruments, assets and liabilities of the Company, the balances recognized in the statement of financial position approximate the fair values, taking into account the maturities close to the end of the reporting period, comparison of contractual interest rates with market rates in similar operations at the end of the reporting periods, their nature and maturity terms.

Estimates and judgments are continually evaluated and are based on historical experience and on other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The main accounting estimates and judgments are disclosed in Note 6 to the Annual Financial Statements as of December 31, 2014.

Notes to the Interim Financial Information

(*)On March 18, 2014, the State of São Paulo, the municipality of Diadema and SABESP entered into a “Water Supply and Sewage Public Utility Services Agreement” in the municipality of Diadema. Through this contract, the State of São Paulo and the municipality of Diadema have ensured to SABESP (or subsidiary) exclusive rights to render services for a 30-year term.

On this same date, judicial settlements were signed in lawsuits filed by SABESP against the municipality of Diadema and Saned – a municipal company. Through these settlements, SABESP, the municipality of Diadema and Saned agree to suspend the execution of suits to collect receivables related to water supply at wholesale and collection of indemnity debt. The debts will progressively decrease throughout a 30-year period, under the condition that there is a full compliance with the agreements and provision of services contract.

This balance is fully accrued as losses.

Additionally, in compliance with the judicial settlements signed between SABESP and the Municipality of Diadema on March 25, 2015, SABESP and Saned entered into a Share Purchase Agreement with Empresa de Água e Esgoto de Diadema S.A. (“EAED”) – a wholly-owned subsidiary of Saned.

On June 4, 2015, SABESP acquired the total shares of EAED, resulting in the write-off of trade accounts receivable and allowance for doubtful accounts with the municipality of Diadema, totaling R\$1,762. Additionally, SABESP’s quarterly information comprises the net balance of assets and liabilities acquired from EAED in the amount of R\$975, basically referring to property, plant and equipment, and liabilities related to employees. As these assets have no independent operating activity and were used to settle Diadema’s commitments with the Company, they are not characterized as business acquisition, as per Technical Pronouncement CPC 15 (R1) – Business Combinations, but an extension of services rendered by SABESP, without capacity to generate future economic benefits, decision-making power and operational autonomy, which also does not require the need to apply CPC 36 (R3) Consolidated Financial Statements.

From January to June 2015, there were no relevant changes in relation to the operations presented in the financial statements as of December 31, 2014.

(i) General customers - residential and small and mid-sized companies

(ii) Special customers - large consumers, commercial, industries, condominiums and special billing consumers (industrial waste, wells, etc.).

(iii) Agreements - installment payments of past-due receivables, plus monetary restatement and interest.

(iv) Wholesale basis customers - municipal governments - This balance refers to the sale of treated water to municipalities, which are responsible for distributing to, billing and charging final customers. Some of these municipalities are questioning in court the tariffs charged by SABESP, which have full allowance for doubtful accounts. Additionally, the overdue amounts are included in the allowance for doubtful accounts.

(b) Agreement with the State Government of São Paulo “GESP”

The first 24 installments of the agreement signed on March 18, 2015 were settled by transferring to SABESP 2,221,000 preferred shares issued by Companhia de Transmissão de Energia Elétrica Paulista - CTEEP, totaling R\$87,174, based on the share closing price on March 17, 2015.

On May 12, 2015, the transfer of shares issued by CTEEP to SABESP was concluded in order to settle the first 24 installments of the agreement signed with the State government on March 18, 2015. As of June 30, CTEEP’s shares were recorded under “Financial assets held for trading”, for R\$86,930, due to a reduction in its fair value, from thirty-nine reais and twenty-five centavos (R\$39.25) on March 18, 2015 to thirty-nine reais and fourteen centavos (R\$39.14) on June 30, 2015. The effect of this decrease was recorded under financial expenses and totaled R\$244.

On June 8, 2015, SABESP received dividends referring to the 2,221,000 shares, corresponding to R\$0.686875 per share, totaling R\$1,525.

(b) Agreement with the State Government of São Paulo “GESP”

(c) Contingent assets - GESP (not recorded)

SABESP had contingent assets with GESP, not recorded in assets referring to the additional retirement and pension paid (Law 4,819/58), as follows:

| | June 30, 2015 | December 31, 2014 |
|---|----------------------|--------------------------|
| Disputed amounts receivable | 815,175 | 783,422 |

| Total | 815,175 | 1,479,705 |

(d) Use of reservoirs – EMAE

Empresa Metropolitana de Águas e Energia S.A. - EMAE plans to receive for the credit and to obtain financial compensation for the use of water from the Guarapiranga and Billings reservoirs, which SABESP uses in its operations, as well as the reimbursement of damages related to the failure to pay appropriately.

The Company understands that no amounts are due for the use of these reservoirs given the grants already made. Should these reservoirs not be available for use to the Company, there could be the need to collect water in more distant places. There is a risk of not properly rendering services in the region, besides increasing water supply cost.

Several lawsuits were filed by EMAE. Currently, an arbitration proceeding is in progress related to the Guarapiranga reservoir and a lawsuit related to Billings reservoir, both pleading for financial compensation due to SABESP's water collect for public supply, alleging that this conduct has been causing permanent and growing loss in the capacity of generating electricity of Henry Borden hydroelectric power plant with financial losses.

Notes to the Interim Financial Information

SABESP understands that the expectation for all cases is of possible losses, and for the time being, it is not feasible to estimate the amounts involved, since they were not determined.

On April 10, 2014, we issued a Notice to the Market including the information about any future agreement. However, no adjustment was confirmed and no agreement was executed by either party up to date.

(e) Agreements with reduced tariffs with State and Municipal Government Entities that joined the Water Rational Use Program (PURA)

The Company has signed agreements with government entities related to the State Government and municipalities where it operates that benefit from a reduction of 25% in the tariff of water supply and sewage services when they are not in default. These agreements provide for the implementation of the rational water use program, which takes into consideration the reduction in the water consumption.

(f) Guarantees

The State Government provides guarantees for some loans and financing of the Company and does not charge any fee with respect to such guarantees.

(g) Personnel assignment agreement among entities related to the State Government

(ii) Covenants

As of June 30, 2015, the Company had met the requirements set forth by its loan and financing agreements.

Regarding the agreements with the BNDES, there is a collateral mechanism by which SABESP has assigned a portion of its tariff payment receivables to BNDES. Under this mechanism, from 18th to the 28th day of each month SABESP must ensure that a portion of the tariff payments received by it are deposited on a daily basis into a blocked collateral account, before being released to a regular movements account later in the day provided that BNDES has not notified the bank that SABESP is in default. Among the financial ratios set forth in the agreements with the BNDES, there is the adjusted net debt/adjusted Ebitda ratio. If this ratio is at or below 3.00, the amount that must pass through this blocked collateral account will be R\$230 million per month; and if the ratio is in the band between 3.00 and 3.80, the amount that must pass through the blocked collateral account will automatically increase by 20%, equivalent to R\$276 million per month.

The ratios recorded by the Company were 3.06, 3.09 and 3.17, on June 30, 2015, March 31, 2015 and December 31, 2014, respectively. As a result, since the second quarter of 2015, the monthly guarantee assigned has increased by 20%.

Notes to the Interim Financial Information

Currently, R\$226 million are pass through monthly in the blocked collateral account through the above mentioned mechanism. Considering that new loan agreements were signed with the BNDES, where the Company assigned additional guarantees of R\$50 million (already included the 20%), total guarantees to pass through to the blocked collateral account will be R\$276 million. The Company jointly with the BNDES are formalizing the operation of these guarantees.

For the Company to be in default and accordingly, subject to early maturity, the adjusted net debt/ adjusted Ebitda ratio of the agreements with the BNDES must exceed 3.80.

Notes to the Interim Financial Information

(b) Explanation on the nature of main classes of lawsuits

(I) Customer claims

Approximately 1,190 lawsuits were filed by commercial customers, which claim that their tariffs should correspond to other consumer categories, and 730 lawsuits which claim a reduction in the sewage tariff due to losses in the system, consequently requesting the refund of amounts charged by the Company and 60 lawsuits where customers plead the reduction in tariff under the category as “Social Welfare Entity”. The Company was granted both favorable and unfavorable final decisions at several court levels and recognized provisions when the chances of losses are probable. The decrease of R\$68,168 in the lawsuits classified as probable loss (net of escrow deposits) is mainly related to revisions of expectations caused by favorable decisions to the Company.

(II) Supplier claims

Suppliers’ claims include lawsuits filed by some suppliers alleging underpayment of monetary restatements, withholding of amounts related to the understated inflation rates deriving from Real economic plan, and the economic and financial imbalance of the agreements. These lawsuits are in progress at different courts and a provision is recognized when the chances of losses are probable.

(III) Other civil claims

These mainly refer to indemnities for property damage, pain and suffering, and loss of profits allegedly caused to third parties, filed at different court levels, dully accrued when classified as probable losses.

(IV) Tax claims

Tax claims refers mainly to issues related to tax collections challenged due to differences in the interpretation of legislation by the Company's management, accrued when classified as probable loss.

(V) Labor claims

The Company is a party to labor lawsuits, involving issues such as overtime, shift schedule, health hazard premium and hazardous duty premium, prior notice, change of function, salary equalization, and other. Part of the amount involved is in provisional or final execution at various court levels, and thus is classified as of probable loss and accordingly, accrued. The decrease of R\$29,686 in lawsuits with probable chances of losses (net of escrow deposits) is mainly related to reversals of provisions referring to settlements in the Company's administrative proceedings.

(VI) Environmental claims

Environmental claims refer to several administrative proceedings and lawsuits filed by government entities, including Companhia de Tecnologia de Saneamento Ambiental – Cetesb, Public Prosecution Office of the State of São Paulo and others, that aim affirmative and negative covenants and penalty is estimated due to failure to comply in addition to the imposition of indemnity due to environmental damages allegedly caused by the Company. The amounts accrued represent the best estimate of the Company at this moment, however, may differ from the amount to be disbursed as indemnity to alleged damages, in view of the current stage of referred proceedings. The decrease of R\$148,951 in lawsuits with expectation of probable losses (net of escrow deposits) is mainly related to two lawsuits, one due to change in its amount, totaling R\$36,501, due to the expectation of settlement with the parties involved and the other one due to provision reversal totaling R\$109,841, due to court decision favorable to the Company.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Shareholders, Board of Directors and Management of

Companhia de Saneamento Básico do Estado de São Paulo - SABESP

São Paulo - SP

Introduction

We have reviewed the accompanying interim financial information of Companhia de Saneamento Básico do Estado de São Paulo - SABESP (the “Company”) included in the Quarterly Information Form (ITR), for the quarter ended June 30, 2015, which comprises the financial position as of June 30, 2015 and the related statements of income and comprehensive income for the three and six-month periods then ended and changes in equity and cash flows for the six-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the interim financial information in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Information and in accordance with international standard IAS 34 - *Interim Financial Reporting*, issued by the International Accounting Standards Board (IASB), as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission, applicable to the preparation of Interim Financial Information - ITR. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might

be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, applicable to the preparation of Interim Financial Information - ITR, and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission.
