Edgar Filing: Gabelli Global Deal Fund - Form N-2/A

Approximate date of proposed public offering: As soon as practicable after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, as amended, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box)

When declared effective pursuant to section 8(c).

If appropriate, check the following box:

This [post-effective] amendment designates a new effective date for a previously filed [post-effective amendment] [registration statement].

This form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act and the Securities Act registration number of the earlier effective registration statement for the same offering is _____.

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities	Amount Being Registered	Proposed Maximum Offering Price Per Share	Proposed Maximum Aggregate Offering Price (1)(3)	Amount of Registration Fee
Preferred Shares, \$0.001 par value (2)			\$200,000,000	\$7,860(4)
Notes (2)				
Subscription Rights for Preferred Shares (2)				

(1) Estimated pursuant to Rule 457 solely for the purpose of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this registration statement.

(2) Subject to Note 3 below, there is being registered hereunder an indeterminate principal amount of preferred shares, notes, or subscription rights to purchase preferred shares as may be sold, from time to time.

(3) In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$200,000,000.

(4) Previously paid.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.

Subject to Completion,

Preliminary Base Prospectus dated July 11, 2008

PROSPECTUS

GABELLI

\$200,000,000

The Gabelli Global Deal Fund

Preferred Shares of Beneficial Interest, Notes and Subscription Rights

Investment Objective. The Gabelli Global Deal Fund, or the "Fund," is a non-diversified, closed-end management investment company, formed as a Delaware statutory trust, registered under the Investment Company Act of 1940. The Fund's investment objective is to achieve absolute returns in various market conditions without excessive risk of capital. Absolute returns are defined as positive total returns, regardless of the direction of securities markets. The Fund will seek to achieve its objective by investing primarily in merger arbitrage transactions and, to a lesser extent, in corporate reorganizations involving stubs, spin-offs and liquidations. Gabelli Funds, LLC serves as "Investment Adviser" to the Fund. An investment in the Fund is not appropriate for all investors. We cannot assure you that the Fund will achieve its objective.

We may offer, from time to time, in one or more offerings, our preferred shares, par value \$0.001 per share, our promissory notes, or our subscription rights to purchase our preferred shares, which we refer to collectively as the "securities." Securities may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a "Prospectus Supplement"). You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in our securities.

Our securities may be offered directly to one or more purchasers, including existing shareholders in a rights offering, through agents designated from time to time by us, or to or through underwriters or dealers. The Prospectus Supplement relating to the offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred shares will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. The Prospectus Supplement relating to any sale of notes will set forth the principal amount, interest rate, interest payment dates, prepayment protection (if any), and other matters. The Prospectus Supplement relating to any offering of subscription rights will set forth the number of preferred shares issuable upon the exercise of each right and the other terms of such rights offering. We may not sell any of our securities through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering of our securities. Our common shares are listed on the New York Stock Exchange (the "NYSE") under the symbol "GDL". On _____, the last reported sale price of our common shares was \$ _____. Shares of closed-end funds often trade at a discount from net asset value. This creates a risk of loss for an investor purchasing shares in a public offering.

Investing in the Fund's securities involves risks. See "Risk Factors and Special Considerations" for factors that should be considered before investing in securities of the Fund.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities by us through agents, underwriters or dealers unless accompanied by a Prospectus Supplement.

This prospectus sets forth concisely the information about the Fund that a prospective investor should know before investing. You should read this prospectus, which contains important information about the Fund, before deciding whether to invest in the securities, and retain it for future reference. A Statement of Additional Information, dated , 2008, containing additional information about the Fund, has been filed with the Securities and Exchange Commission and is incorporated by reference in its entirety into this prospectus. You may request a free copy of our annual and semi-annual reports, request a free copy of the Statement of Additional Information, the table of contents of which is on page 49 of this prospectus, request other information about us and make shareholder inquiries by calling (800) GABELLI (422-3554) or by writing to the Fund, or obtain a copy (and other information regarding the Fund) from the Securities and Exchange Commission's web site (<http://www.sec.gov>).

Our securities and notes do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

You should rely only on the information contained or incorporated by reference in this prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer to sell these securities in any state where the offer or sale is not permitted. You should not assume that the information contained in this prospectus is accurate as of any date other than the date of this prospectus.

PROSPECTUS SUMMARY

This is only a summary. This summary does not contain all of the information that you should consider before investing in our shares. You should review the more detailed information contained in this prospectus and the Statement of Additional Information, dated _____, 2008 (the "SAI").

The Fund The Gabelli Global Deal Fund is a non-diversified, closed-end management investment company organized under the laws of the State of Delaware on October 17, 2006. Throughout this prospectus, we refer to The Gabelli Global Deal Fund as the "Fund" or as "we." See "The Fund."

The Fund's outstanding common shares, par value \$0.001 per share, are listed on the New York Stock Exchange under the symbol "GDL." On _____, 2008, the last reported sale price of our common shares was \$ _____. As of March 31, 2008, the net assets of the Fund attributable to its common shares were \$ 381,782,789. As of March 31, 2008, the Fund had outstanding 21,270,610 common shares.

The Offering We may offer, from time to time, in one or more offerings, our preferred shares, \$0.001 par value per share, our notes or our subscription rights to purchase our preferred shares, which we refer to collectively as the "securities." The shares and notes may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each a "Prospectus Supplement"). You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in our securities. Our securities may be offered directly to one or more purchasers, including existing shareholders in a rights offering, through agents designated from time to time by us or to or through underwriters or dealers. The Prospectus Supplement relating to the offering will identify any agents, underwriters or dealers involved in the sale of our shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters, or among our underwriters, or the basis upon which such amount may be calculated. The Prospectus Supplement relating to any sale of preferred shares will set forth the liquidation preference and information about the dividend period, dividend rate, any call protection or non-call period and other matters. The Prospectus Supplement relating to any sale of notes will set forth information about the principal amount, interest rate, and call protection or non-call period and other matters. The Prospectus Supplement relating to any offering of subscription rights will set forth the number of preferred shares issuable upon the exercise of each right and the other terms of such rights offering. We may not sell any of our securities through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular offering.

Investment Objective The Fund's investment objective is to achieve absolute returns in various market conditions without excessive risk of capital. Absolute returns are defined as positive total returns, regardless of the direction of securities markets. To achieve its investment objective, the Fund, under normal market conditions, will invest primarily in securities of companies (both domestic and foreign) involved in publicly announced mergers, takeovers, tender offers and leveraged buyouts and, to a lesser extent, in corporate reorganizations involving stubs, spin-offs and liquidations. The key determinants of the profitability of a merger arbitrage transaction are the probability that the deal will close, the length of time to closing, the likelihood that the deal price will be increased or decreased and the level of short-term interest rates.

Merger arbitrage is a highly specialized investment approach generally designed to profit from the successful completion of proposed mergers, takeovers, tender offers and leveraged buyouts. Broadly speaking, an investor purchases the stock of a company in the process of being acquired by another company in anticipation of capturing the spread between the current market price and the acquisition price. A “stub” refers to a small stake in a target company division or subsidiary that is not purchased by an acquirer in a merger, takeover or leveraged buyout. The arbitrageur may buy the stub, and if the acquiring company is successful in boosting the target company’s appeal, the shares will benefit from a boost in price and the arbitrageur will profit. A spin-off occurs when an independent company is created from an existing part of another company through a distribution of new shares. An arbitrageur may benefit from the share price differential in the same manner as in traditional merger arbitrage if, upon completion of the spin-off, the separate securities trade for more in the aggregate than the former single security. Finally, when a company makes the decision to liquidate, or sell all of its assets, it is often worth more in liquidation than as an ongoing entity. An arbitrageur benefits when the company is able to distribute more than the price at which the stock is trading at the time the arbitrageur acquires its position. In order to minimize market exposure and volatility of such merger arbitrage strategies, the Fund may utilize hedging strategies, such as short selling and the use of options and futures. The Fund may hold a significant portion of its assets in liquid money market securities, which may include affiliated or unaffiliated money market mutual funds.

As a non-diversified investment company, the Investment Company Act of 1940 (the “1940 Act”) does not limit the proportion of the Fund’s assets it may invest in securities of a single issuer, however, certain tax diversification requirements will apply at the end of each quarter.

The Investment Adviser believes that blending traditional merger arbitrage for announced deals with strategies that focus on stubs, spin-offs and liquidations will produce absolute returns in excess of short-term interest rates with less volatility than the returns typically associated with conventional equity investing. A systematic and disciplined arbitrage program may produce attractive rates of return even in flat or down markets. The Investment Adviser will consider a number of factors in selecting merger arbitrage transactions in which to invest, including, but not limited to, the credibility, strategic motivation, and financial resources of the participants and the liquidity of the securities involved in the transaction.

Under normal circumstances, the Fund will invest at least 80% of its assets in securities or hedging arrangements relating to companies involved in corporate transactions or reorganizations, giving rise to the possibility of realizing gains upon or within relatively short periods of time after the completion of such transactions, or reorganizations. This policy is not fundamental and may be changed by the Fund with notice of not less than 60 days to its shareholders. In market cycles with scarce transaction opportunities, the Fund may seek to accomplish its objective of achieving absolute returns by temporarily investing in other assets, including, but not limited to, short-term debt securities, which may make it less likely for the Fund to achieve an attractive rate of return.

As a global fund, the Fund may invest without limitation in the securities of foreign and domestic issuers. The Fund’s investment strategy is to invest in merger arbitrage transactions and corporate reorganizations throughout the world. As the dollar volume and range of countries involved in significant merger arbitrage and corporate reorganizations has increased over the past several years, the Fund expects that its assets will usually be invested in several countries. Under normal market conditions, the Fund expects to have at least 40% of its assets invested in at least three countries, other than the United States. To the extent that the majority of mergers, takeovers, tender offers and leveraged buyouts and corporate reorganizations are concentrated in any given geographic region, such as Europe, North America or Asia, a relatively high proportion of the Fund’s assets may be invested in that particular region. See “Investment Objective and Policies.”

Payment on Notes Under applicable state law and our Charter, we may borrow money without prior approval of holders of common and preferred shares . We may issue debt securities, including notes, or other evidence of indebtedness and may secure any such notes or borrowings by mortgaging, pledging or otherwise subjecting as security our assets to the extent permitted by the 1940 Act or rating agency guidelines. Any borrowings, including without limitation the notes, will rank senior to the preferred shares and the common shares. The prospectus supplement will describe the interest payment provisions relating to notes. Interest on notes will be payable when due as described in the related prospectus supplement. If we do not pay interest when due, it will trigger an event of default and we will be restricted from declaring dividends and making other distributions with respect to our common shares and preferred shares.

Dividends and Preferred Share Distributions. Under current law, all preferred shares of the Fund must have the same seniority with respect to distributions. Accordingly, no full distribution will be declared or paid on any series of preferred shares of the Fund for any dividend period, or part thereof, unless full cumulative dividends due through the most recent dividend payment dates

for all series of outstanding preferred shares of the Fund are declared and paid. If full cumulative distributions due have not been declared and made on all outstanding preferred shares of the Fund, any distributions on such preferred shares will be made as nearly pro rata as possible in proportion to the respective amounts of distributions accumulated but unmade on each such series of preferred shares on the relevant dividend date.

In the event that for any calendar year the total distributions on the Fund's preferred shares exceed the Fund's current and accumulated earnings and profits, the excess distributions will generally be treated as a tax-free return of capital (to the extent of the shareholder's tax basis in his or her shares). The amount treated as a tax-free return of capital will reduce a shareholder's adjusted tax basis in his or her preferred shares, thereby increasing the shareholder's potential gain or reducing his or her potential loss on the sale of the shares.

Fixed Rate Preferred Shares . Distributions on fixed rate preferred shares, at the applicable annual rate of the per share liquidation preference, are cumulative from the original issue date and are payable, when, as and if declared by the Board of Trustees of the Fund (the "Board"), out of funds legally available therefor.

Variable Rate Preferred Shares . The holders of variable rate preferred shares are entitled to receive cash distributions, stated at annual rates of the applicable per share liquidation preference, that vary from dividend period to dividend period.

Common Share Distributions. For the fiscal year ended December 31, 2007, the Fund made distributions of \$1.20 per common share, none of which constituted a return of capital. The composition of each distribution is estimated based on earnings as of the record date for the distribution. The actual composition of each distribution may change based on the Fund's investment activity through the end of the calendar year.

Limitations on Distributions. If at any time the Fund has notes outstanding, the Fund will be prohibited from paying any distributions on any of its preferred shares or common shares (other than in additional shares), and from repurchasing any of such shares, unless, as provided in the 1940 Act, the value of its total assets, less certain ordinary course liabilities, exceed 300% of the amount of the debt outstanding and exceed 200% of the sum of the amount of debt and preferred shares outstanding.

Tax Treatment of Preferred Share Distributions The Fund expects that distributions on the preferred shares may consist of (i) long-term capital gain (gain from the sale of a capital asset held longer than 12 months), (ii) qualified dividend income (dividend income from certain domestic and foreign corporations) and (iii) investment company taxable income (other than qualified dividend income), including interest income, short-term capital gain and income from certain hedging and interest rate transactions. For individuals, the maximum federal income tax rate on long-term capital gain is currently 15%, on qualified dividend income is currently 15%, and on ordinary income (such as distributions from investment company taxable income that are not eligible for treatment as qualified dividend income) is currently 35%. Under current law, these tax rates are scheduled to apply through 2010. The Fund expects that a substantial portion of its income will consist of short-term capital gains. We cannot assure you what percentage of the distributions paid on the preferred shares, if any, will consist of tax advantaged qualified dividend income or long-term capital gains or what the tax rates on various types of income will be in future years. For a more detailed discussion, see "Taxation."

Use of Proceeds The Fund will use the net proceeds from the offering to purchase additional portfolio securities in accordance with its investment objective and policies. It is anticipated that the investment of proceeds will be substantially completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months. See "Use of Proceeds."

Exchange Listing The Fund's common shares are listed on the NYSE under the trading or "ticker" symbol "GDL." See "Description of the Securities." Future series of fixed rate preferred shares and subscription rights would also likely be listed on a stock exchange. Variable rate preferred shares and notes will not likely be listed on a stock exchange.

Market Price of Shares Common shares of closed-end investment companies often trade at prices lower than their net asset value. Common shares of closed-end investment companies may trade during some periods at prices higher than their net asset value and during other periods at prices lower than their net asset value. The Fund cannot assure you that its common shares will trade at a price higher than or equal to net asset value. The Fund's net asset value will be reduced immediately following this offering by the sales load and the amount of the offering expenses paid by the Fund. See "Use of Proceeds."

In addition to net asset value, the market price of the Fund's common shares may be affected by such factors as the Fund's dividend and distribution levels (which are affected by expenses)

and stability, market liquidity, market supply and demand, unrealized gains, general market and economic conditions and other factors. See "Risk Factors and Special Considerations," "Description of the Securities" and "Repurchase of Common Shares ."

Risk Factors and Special Considerations Risk is inherent in all investing. Therefore, before investing in securities of the Fund, you should consider the risks carefully.

Our Notes. An investment in our notes is subject to special risks. There may not be an established market for our notes. To the extent that our notes trade, they may trade at a price either higher or lower than their principal amount depending on interest rates, the rating (if any) on such notes and other factors. See "Risk Factors and Special Considerations — Special Risks to Holders of Notes."

Our Fixed Rate Preferred Shares . Prior to the offering of any additional series of fixed rate preferred shares, there will be no public market for such shares. During an initial period, not expected to exceed 30 days after the date of initial issuance, such shares may not be listed on any securities exchange. Consequently, an investment in such shares may be illiquid during such period. Fixed rate preferred shares may trade at a premium to or discount from liquidation preference for a variety of reasons, including changes in interest rates. See "Risk Factors and Special Considerations — Special Risks to Holders of Fixed Rate Preferred Shares ."

Our Variable Rate Preferred Shares . In the event any auction-rate preferred shares are issued, you may not be able to sell your auction-rate preferred shares at an auction if the auction fails, i.e., if more auction-rate preferred shares are offered for sale than there are buyers for those shares. In the event any auction-rate preferred shares are issued, if you try to sell your auction-rate preferred shares between auctions, you may not be able to sell them for their liquidation preference per share or such amount per share plus accumulated dividends. Due to recent market turmoil, most auction-rate preferred share auctions have been unable to hold successful auctions and holders of such shares have suffered reduced liquidity. See "Risk Factors and Special Considerations — Special Risks to Holders of Variable Rate Preferred Shares ."

Our Subscription Rights. There is a risk that changes in interest rates or changes in the credit quality of the Fund may result in the underlying preferred shares purchaseable upon exercise of the subscription rights being less attractive to investors at the conclusion of the subscription period. This may reduce or eliminate the value of the subscription rights. Investors who receive subscription rights may find that there is no market to sell rights they do not wish to exercise. If investors exercise only a portion of the rights, the number of preferred shares issued may be reduced, and the preferred shares may trade at less favorable prices than larger offerings for similar securities.

Credit Quality Ratings. In order to obtain and maintain attractive credit quality ratings for preferred shares or borrowings, the Fund's portfolio must satisfy over-collateralization tests established by the relevant rating agencies. These tests are more difficult to satisfy to the extent the Fund's portfolio securities are of lower credit quality, longer maturity or not diversified by issuer and industry. These guidelines could affect portfolio decisions and may be more stringent than those imposed by the 1940 Act. A rating by a rating agency does not eliminate or necessarily mitigate the risks of investing in our preferred shares , and a rating may not fully or accurately reflect all of the securities' credit risks. A rating does not address liquidity or any other market risks of the securities being rated. A rating agency could downgrade the rating of our notes, which may make such securities less liquid in the secondary market. If a rating agency downgrades the rating assigned to notes, we may alter our portfolio or redeem the preferred securities under certain circumstances. See "Risk Factors and Special Considerations — Credit Quality Ratings."

Common Share Repurchases. Repurchases of common shares by the Fund may reduce the net asset coverage of the notes and preferred shares, which could adversely affect their liquidity or market prices. See "Risk Factors and Special Considerations — Common Share Repurchases."

Preferred Shares Subordinated to Debt Securities. As provided in the 1940 Act, and subject to compliance with the Fund's investment limitations, the Fund may issue debt securities. In the event the Fund were to issue such securities, the Fund's obligations to make distributions and, upon liquidation of the Fund, liquidation payments in respect of its preferred shares would be subordinate to the Fund's obligations to make any principal and interest payments due and owing with respect to its outstanding debt securities. Accordingly, the Fund's issuance of debt securities would have the effect of creating special risks for the Fund's preferred shareholders that would not be present in a capital structure that did not include such securities. See "Risk Factors and Special Considerations — Special Risks of Debt Securities to Preferred Shares ."

Restrictions on Dividends and Other Distributions. Restrictions imposed on the declaration and payment of dividends or other distributions to the holders of the Fund's common shares and preferred shares, both by the 1940 Act and by requirements imposed by rating agencies, might impair the Fund's ability to maintain its qualification as a regulated investment company for U.S. federal income tax purposes. While the Fund intends to redeem its preferred shares or prepay its notes only to the extent necessary to enable the Fund to distribute its income as required to maintain its qualification as a regulated investment company under the Code, there can be no assurance that such actions can be effected in time to meet the Code requirements. See "Taxation" in the SAI.

Leverage Risk. The Fund intends to use financial leverage for investment purposes by issuing preferred shares or debt securities. A leveraged capital structure will create special risks not associated with unleveraged funds having a similar investment objective and policies. These include the possibility of greater loss and the likelihood of higher volatility of the net asset value of the Fund and the asset coverage for the preferred shares. Such volatility may increase the likelihood of the Fund having to sell investments in order to meet its obligations to make distributions on the preferred shares or principal or interest payments on debt securities, or to redeem preferred shares or repay debt, when it may be disadvantageous to do so. The use of leverage magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. To the extent that the Fund determines to employ leverage in its investment operations, the Fund will be subject to substantial risk of loss. The Fund cannot assure you that borrowings or the issuance of preferred shares will result in a higher yield or return to the holders of the common shares. Also, if the Fund is utilizing leverage, a decline in net asset value could affect the ability of the Fund to make common share distributions and such a failure to make distributions could result in the Fund ceasing to qualify as a regulated investment company under the Code. See "Taxation."

Preferred Share and Note Risk. The issuance of preferred securities causes the net asset value and market value of the common shares to become more volatile. If the interest rate on the notes or the dividend rate on the preferred shares approaches the net rate of return on the Fund's investment portfolio, the benefit of leverage to the holders of the common shares would be reduced. If the interest rate on the notes or the dividend rate on the preferred shares exceeds the net rate of return on the Fund's portfolio, the leverage will result in a lower rate of return to the holders of common shares than if the Fund had not issued preferred shares .

Any decline in the net asset value of the Fund's investments would be borne entirely by the holders of common shares. Therefore, if the market value of the Fund's portfolio declines, the leverage will result in a greater decrease in net asset value to the holders of common shares than if the Fund were not leveraged. This greater net asset value decrease will also tend to cause a greater decline in the market price for the common shares. The Fund might be in danger of failing to maintain the required asset coverage of the notes or preferred shares or of losing its ratings on the preferred shares or, in an extreme case, the Fund's current investment income might not be sufficient to meet the dividend requirements on the preferred shares. In order to counteract such an event, the Fund might need to liquidate investments in order to fund redemption of some or all of the preferred shares.

In addition, the Fund would pay (and the holders of common shares would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred shares, including any additional advisory fees on the incremental assets attributable to such shares. Holders of notes and preferred shares may have different interests than holders of common shares and at times may have disproportionate influence over the Fund's affairs. In the event the Fund fails to maintain the specified level of asset coverage of any notes outstanding, the holders of the notes will have the right to elect a majority of the Fund's trustees. In addition, holders of preferred shares, voting separately as a single class, have the right to elect two members of the Board at all times and in the event dividends become in arrears for two full years would have the right (subject to the rights of noteholders) to elect a majority of the Trustees until the arrearage is completely eliminated. In addition, preferred shareholders have class voting rights on certain matters, including changes in fundamental investment restrictions and conversion of the Fund to open-end status, and accordingly can veto any such changes. See "Risk Factors and Special Considerations — Preferred Share and Note Risk."

Special Risks Related to Preferred Shares . Special risks associated with the Fund investing in preferred shares include deferral of distributions or dividend payments, in some cases the right of an issuer never to pay missed dividends, subordination to debt and other liabilities, illiquidity, limited voting rights and redemption by the issuer. Because the Fund has no limit on its investment in non-cumulative preferred shares , the amount of dividends the Fund pays may be adversely affected if an issuer of non-cumulative preferred shares held by the Fund determines not to pay dividends on such shares . There is no assurance that dividends or distributions on preferred shares in which the Fund invests will be declared or otherwise made payable. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Special Risks Related to Preferred Shares ."

Merger Arbitrage Risk. The principal risk associated with the Fund's investment strategy is that certain of the proposed reorganizations in which the Fund invests may be renegotiated, terminated or involve a longer time frame than originally contemplated, in which case losses may be realized. The investment policies of the Fund are expected to lead to frequent changes

in investments, which increase transaction costs to the Fund, and may also result in accelerated recognition of short-term capital gain, which will be taxable to shareholders when distributed by the Fund. See "Risk Factors and Special Considerations — Risk of Investing in the Fund — Merger Arbitrage Risk."

Non-Diversified Status. As a non-diversified, closed-end management investment company under the 1940 Act, the Fund may invest a greater portion of its assets in a more limited number of issuers than may a diversified fund, and accordingly, an investment in the Fund may, under certain circumstances, present greater risk to an investor than an investment in a diversified company. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Non-Diversified Status."

Foreign Securities Risk. The Fund has no limit on the amount of its net assets it may invest in foreign securities. Investing in securities of foreign companies (or foreign governments), which are generally denominated in foreign currencies, may involve certain risks and opportunities not typically associated with investing in domestic companies and could cause the Fund to be affected favorably or unfavorably by changes in currency exchange rates and revaluation of currencies. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Foreign Securities Risk."

Lower Grade Securities. The Fund has no limit on the amount of its net assets it may invest in fixed-income securities rated below investment grade by recognized statistical rating agencies or unrated securities of comparable quality. However, the Fund does not expect these investments to exceed 10% of its total assets. The prices of these lower grade securities are more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade securities. Securities of below investment grade quality are predominantly speculative with respect to the issuer's capacity to pay interest and repay principal when due and therefore involve a greater risk of default and are commonly referred to as "junk bonds." See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Lower Grade Securities."

Derivative Transactions. The Fund may participate in certain derivative transactions. Such transactions entail certain execution, market, liquidity, hedging and tax risks. Participation in the options or futures markets and in currency exchange transactions involves investment risks and transaction costs to which the Fund would not be subject absent the use of these strategies. If the Investment Adviser's prediction of movements in the direction of the securities, foreign currency or interest rate markets is inaccurate, the consequences to the Fund may leave the Fund in a worse position than if it had not used such strategies. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Special Risks of Derivative Transactions."

Interest Rate Transactions. The Fund may enter into an interest rate swap or cap transaction with respect to all or a portion of any future series of variable rate preferred shares. The use of interest rate swaps and caps is a highly specialized activity that involves certain risks to the Fund including, among others, counterparty risk and early termination risk. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Swaps."

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. The Investment Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Management Risk."

Dependence on Key Personnel. The Investment Adviser is dependent upon the expertise of Mr. Mario J. Gabelli in providing advisory services with respect to the Fund's investments. If the Investment Adviser were to lose the services of Mr. Gabelli, its ability to service the Fund could be adversely affected. There can be no assurance that a suitable replacement could be found for Mr. Gabelli in the event of his death, resignation, retirement or inability to act on behalf of the Investment Adviser. See "Risk Factors and Special Considerations — Risks of Investing in the Fund — Dependence on Key Personnel."

Anti-Takeover Provisions. The Fund's Governing Documents (as defined herein) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to an open-end fund. See "Anti-Takeover Provisions of the Fund's Governing Documents."

The Fund has elected and has qualified for, and intends to remain qualified for, U.S. federal income tax purposes as a regulated investment company. Qualification requires, among other things, compliance by the Fund with certain distribution requirements. Statutory limitations on distributions on the common shares if the Fund fails to satisfy the 1940 Act's asset coverage requirements could jeopardize the Fund's ability to meet such distribution requirements. The Fund presently intends, however, to purchase or redeem preferred shares to the extent necessary in order to maintain compliance with such asset coverage requirements. See "Taxation" for a more complete discussion of these and other U.S. federal income tax considerations.

Management and Fees Gabelli Funds, LLC serves as the Fund's Investment Adviser and its fee is calculated on the basis of the Fund's managed assets, which includes all of the assets of the Fund without deduction for borrowings, repurchase transactions and other leveraging techniques, the liquidation value of any outstanding preferred shares or other liabilities except for certain ordinary course expenses. The fee may be higher when leverage is utilized, giving the Investment Adviser an incentive to utilize such leverage. The base rate will be an annual rate of 0.50% of the Fund's average weekly managed assets payable monthly in arrears. In addition, the Investment Adviser will be entitled to receive an annual performance fee as of the end of each calendar year if the total return of the Fund on its common shares during the calendar year in question exceeds the total return of an index of three-month U.S. Treasury bills (the "T-Bill Index") during the same period. If the Fund's total return for the calendar year equals the total return of the T-Bill Index for the same period plus 3.0 percentage points (300 basis points), the Investment Adviser will receive a performance fee of 0.75% of the Fund's average weekly managed assets during the period. This performance fee will be increased by 0.01 percentage point (one basis point) for each 0.04 percentage point (four basis points) by which the Fund's total return during the period exceeds the T-Bill Index total return plus 3.0 percentage points (300 basis points), up to a maximum performance fee of 1.50% if the excess performance over the T-Bill Index is 6.0 percentage points (600 basis points) or greater and will be decreased at the same rate for the amount by which the Fund's total return during the period is less than the T-Bill Index total return plus 3.0 percentage points (300 basis points), until no performance fee is payable if the Fund's total return is less than or equal to the T-Bill Index total return. See "Management of the Fund."

Under the performance fee arrangement, the annual rate of the total fees paid to the Investment Adviser can range from 0.50% to 2.00% of the Fund's average weekly managed assets.

Repurchase of Common Shares and Anti-takeover Provisions The Fund's Board has authorized the Fund to repurchase its common shares in the open market when the common shares are trading at a discount of 7.5% or more from net asset value (or such other percentage as the Board may determine from time to time). Although the Board has authorized such repurchases, the Fund is not required to repurchase its common shares. The Board has not established a limit on the number of shares that could be purchased during such period. Such repurchases are subject to certain notice and other requirements under the 1940 Act. See "Repurchase of Common Shares ."

Certain provisions of the Fund's Agreement and Declaration of Trust and By-Laws (collectively, the "Governing Documents") may be regarded as "anti-takeover" provisions. Pursuant to these provisions, only one of three classes of trustees is elected each year, and the affirmative vote of the holders of 75% of the outstanding shares of the Fund is necessary to authorize the conversion of the Fund from a closed-end to an open-end investment company. The overall effect of these provisions is to render more difficult the accomplishment of a merger with, or the assumption of control by, a principal shareholder. These provisions may have the effect of depriving Fund common shareholders of an opportunity to sell their shares at a premium to the prevailing market price. See "Anti-Takeover Provisions of the Fund's Governing Documents."

Custodian Mellon Trust of New England, NA (the "Custodian"), located at 135 Santilli Highway, Everett, Massachusetts 02149, serves as the custodian of the Fund's assets pursuant to a custody agreement. Under the custody agreement, the Custodian holds the Fund's assets in compliance with the 1940 Act. For its services, the Custodian receives a monthly fee based upon, among other things, the average value of the total assets of the Fund, plus certain charges.

Transfer Agent and Dividend Disbursing Agent American Stock Transfer & Trust Company, located at 59 Maiden Lane, New York, New York 10038, serves as the Fund's dividend disbursing agent, as agent under the Fund's automatic dividend reinvestment and voluntary cash purchase plan, and as transfer agent and registrar with respect to the common shares of the Fund.

FINANCIAL HIGHLIGHTS

The selected data below sets forth the per share operating performance and ratios for the periods presented. The financial information was derived from and should be read in conjunction with the Financial Statements of the Fund and Notes thereto, which are incorporated by reference into this prospectus and the SAI.

Selected data for a common share of beneficial interest outstanding throughout the period ended December 31, 2007 (d):

Operating Performance:

Net asset value, beginning of period.....	\$ 19.06(e)
Net investment income (a).....	0.37
Net realized and unrealized gain on investments, swap contracts, and foreign currency transactions	0.27
Total from investment operations.....	0.64

Distributions to Common Shareholders:

Net investment income.....	(0.30)
Net realized gains on investments, swap contracts, and foreign currency transactions.....	(0.90)
Total distributions to common shareholders.....	(1.20)

Fund Share Transactions:

Increased in net asset value from common share transactions	0.00 (f)
---	----------

Net Asset Value, End of Period.....	\$ 18.50
-------------------------------------	----------

Net Asset value total return*	3.35%
-------------------------------------	-------

Market value, end of period	\$ 15.96
-----------------------------------	----------

Total investment return**	(14.55)%
---------------------------------	----------

Ratios to Average net Assets and Supplemental Data:

Net assets end of period (in 000's).....	\$394,017
Ratio of net investment income to average net assets.....	2.12%(g)
Ratio of operating expenses to average net assets (b)(c).....	0.64%(g)
Portfolio turnover rate.....	177%

*Based on net asset value per share, at commencement of operations of \$19.06 per share, adjusted for reinvestment of distributions at the asset value per share on the ex-dividend dates. Total return for a period of less than one year is not annualized.

** Based on market value per share, at initial public offering of \$20.00 per share, adjusted for reinvestments of distributions at prices obtained under the Fund's dividend reinvestment plan. Total return for a period of less than one year is not annualized.

(a) Per share amounts have been calculated using the average shares outstanding method.

- (b) The ratio does not include a reduction of expenses for custodian fee credits on cash balances maintained with the custodian. Including such custodian fee credits, the expense ratio for the period ended December 31, 2007 would have been 0.63%.
- (c) The Fund incurred interest expense during the period ended December 31, 2007. If interest expenses had not been incurred, the ratio of operating expenses to average net assets would have been 0.62%.
- (d) The Gabelli Global Deal Fund commenced investment operations on January 31, 2007.
- (e) The beginning of the period NAV reflects a \$0.04 reduction for costs associated with the initial public offering.
- (f) Amount represents less than \$0.005 per share
- (g) Annualized.

USE OF PROCEEDS

The Investment Adviser expects that it will initially invest the proceeds of the offering in high quality short-term debt securities and instruments. The Investment Adviser anticipates that the investment of the proceeds will be made in accordance with the Fund's investment objective and policies as appropriate investment opportunities are identified, which is expected to substantially be completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months.

THE FUND

The Fund is a non-diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Delaware statutory trust on October 17, 2006, pursuant to an Agreement and Declaration of Trust governed by the laws of the State of Delaware. The Fund commenced its investment operations on January 31, 2007. The Fund's principal office is located at One Corporate Center, Rye, New York, 10580-1422 and its telephone number is (800) 422-3554.

INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The Fund's investment objective is to achieve absolute returns in various market conditions without excessive risk of capital. Absolute returns are defined as positive total returns, regardless of the direction of securities markets. The Fund will seek to achieve its objective by investing primarily in merger arbitrage transactions and, to a lesser extent, in corporate reorganizations involving stubs, spin-offs and liquidations. Under normal circumstances, the Fund will invest at least 80% of its assets in securities or hedging arrangements relating to companies involved in corporate transactions or reorganizations, giving rise to the possibility of realizing gains upon or within relatively short periods of time after the completion of such transactions or reorganizations.

The Investment Adviser considers the Fund's merger arbitrage investment results to be less volatile than overall stock price movements. While some periods will be more conducive to a merger arbitrage strategy than others, a systematic, disciplined arbitrage program may produce attractive rates of return over time even in flat or down markets. Except as otherwise stated, the Fund's investment objective and policies are not fundamental and may be changed without obtaining approval from the Fund's shareholders.

Investment Methodology of the Fund

In selecting transactions in which the Fund will invest, the Investment Adviser normally will consider the following factors, among others:

- the probability that the targeted acquisition or other transaction will close;
- the length of time to closing;
- the credibility, strategic motivation and financial resources of the participants;
- the liquidity of the securities involved in the transaction;
- the issuer's free cash flow and long-term earnings trends;

- the likelihood of an overbid; and
- the presence of a catalyst: something indigenous to the issuer, its industry, or country to surface additional value.

The Investment Adviser believes that blending traditional merger arbitrage for announced deals with strategies that focus on stubs, spin-offs and liquidations will produce absolute returns in excess of short-term interest rates with less volatility than the returns typically associated with equity investing. A systematic and disciplined arbitrage program may produce attractive rates of return even in flat or down markets.

9

Certain Investment Practices

Merger Arbitrage. The Fund will invest in the equity securities of companies which are involved in publicly announced mergers, takeovers and other corporate reorganizations. Merger arbitrage is a highly specialized investment approach generally designed to profit from the successful completion of proposed mergers, takeovers, tender offers and leveraged buyouts. Although a variety of strategies may be employed depending upon the nature of the reorganizations selected for investment, the most common merger arbitrage activity involves purchasing the shares of an announced acquisition target at a discount to their expected value upon completion of the acquisition. Although investors can utilize merger arbitrage techniques with respect to companies the investor believes may soon become subject to a merger proposal or negotiated transaction, the Fund intends to invest primarily in publicly announced transactions.

In general, securities which are the subject of such an offer or proposal sell at a premium to their historic market price immediately prior to the announcement of the offer but at a discount to what the stated or appraised value of the securities would be if the contemplated transaction were completed. Investments in these securities may be advantageous when the discount overstates the risk of the contingencies involved; undervalues the securities, assets or cash to be received by shareholders of the prospective portfolio company as a result of the contemplated transaction; or fails adequately to recognize the possibility that the offer or proposal may be replaced or superseded by an offer or proposal of greater value. The evaluation of such contingencies requires unusually broad knowledge and experience on the part of the Investment Adviser, which must appraise not only the value of the issuer and its component businesses as well as the assets or securities to be received as a result of the contemplated transaction, but also the financial resources and business motivation of the offering party and/or the dynamics and business climate when the offer or proposal is in process. Since such investments are ordinarily short-term in nature, they will tend to increase the turnover ratio of the Fund (which may exceed 300%), thereby increasing its brokerage and other transaction expenses. The Investment Adviser intends to select investments of this type which, in its view, have reasonable prospects of capital appreciation which are significant in relation to both the risk involved and the potential of available alternative investments.

Depending upon the level of merger activity and other economic and market conditions, the Fund may temporarily invest a substantial portion of its assets in other securities, including money market instruments such as Treasury bills and other short-term obligations of the U.S. Government, its agencies or instrumentalities; shares of one or more money market funds managed by the Investment Adviser or unaffiliated managers; negotiable bank certificates of deposit; prime commercial paper; and repurchase agreements with respect to the above securities.

The Fund may use hedging arrangements, including investments in options and futures, in order to reduce the risk of adverse price movements in securities it holds, with the goal of consistently achieving absolute returns. The Fund does not anticipate that its investments in futures contracts will require aggregate initial margins and premiums in excess of 5% of its assets or that the option premiums paid with respect to outstanding options will exceed 10% of its assets at any particular time.

As a global fund, the Fund may invest without limitation in the securities of foreign and domestic issuers. The Fund's investment strategy is to invest in merger arbitrage transactions and corporate reorganizations throughout the world. As the dollar volume and range of countries involved in significant merger arbitrage and corporate reorganizations has increased over the past several years, the Fund expects that its assets will usually be invested in several countries. Under normal market conditions, the Fund expects to have at least 40% of its assets invested in at least three countries, other than the United States. To the extent that the majority of mergers, takeovers, tender offers and leveraged buyouts and corporate reorganizations are concentrated in any given geographic region, such as Europe, North America or Asia, a relatively high proportion of the Fund's assets may be invested in that particular region.

Foreign Securities. The Fund may make unlimited investments in the securities of non-United States issuers, which are generally denominated in foreign currencies. See “Risk Factors and Special Considerations — Foreign Securities Risk.” The Fund may purchase sponsored American Depositary Receipts (“ADRs”) or United States dollar denominated securities of foreign issuers. ADRs are receipts issued by U.S. banks or trust companies in respect of securities of foreign issuers held on deposit for use in the U.S. securities markets.

Options. The Fund may purchase or sell, i.e., write, options on securities, securities indices and foreign currencies which are listed on a national securities exchange or in the over-the-counter (“OTC”) market as a means of achieving additional return or of hedging the value of the Fund’s portfolio. A call option is a contract that, in return for a premium, gives the holder of the option the right to buy from the writer of the call option the security or currency underlying the option at a specified exercise price at any time during the term of the option. The writer of the call option has the obligation, upon exercise of the option, to deliver the underlying security or currency upon payment of the exercise price during the option period. A put option is the reverse of a call option, giving the holder the right, in return for a premium, to sell the underlying security to the writer at a specified price and obligating the writer to purchase the underlying security from the holder at that price.

If the Fund has written an option, it may terminate its obligation by effecting a closing purchase transaction. This is accomplished by purchasing an option of the same series as the option previously written. However, with respect to exchange-traded options, once the Fund has been assigned an exercise notice, the Fund will be unable to effect a closing purchase transaction. Similarly, if the Fund is the holder of an option it may liquidate its position by effecting a closing sale transaction on an exchange. This is accomplished by selling an option of the same series as the option previously purchased. There can be no assurance that either a closing purchase or sale transaction can be effected when the Fund so desires.

The Fund will realize a profit from a closing transaction if the price of the transaction is less than the premium received from writing the option or is more than the premium paid to purchase the option; the Fund will realize a loss from a closing transaction if the price of the transaction is more than the premium received from writing the option or is less than the premium paid to purchase the option. Since call option prices generally reflect increases in the price of the underlying security, any loss resulting from the repurchase of a call option may also be wholly or partially offset by unrealized appreciation of the underlying security. Other principal factors affecting the market value of a put or a call option include supply and demand, prevailing interest rates, the current market price and price volatility of the underlying security, and the time remaining until the expiration date. Gains and losses on investment in options depend, in part, on the ability of the Investment Adviser to predict correctly the effect of these factors. The use of options cannot serve as a complete hedge since the price movement of securities underlying the options will not necessarily follow the price movements of the portfolio securities subject to the hedge.

An option position may be closed out only on an exchange which provides a secondary market for an option of the same series or in a private transaction. Although the Fund will generally purchase or write only those options for which there appears to be an active secondary market, there is no assurance that a liquid secondary market on an exchange will persist for any particular option. In such event, it might not be possible to effect closing transactions in particular options, so that the Fund would have to exercise its options in order to realize any profit and would incur brokerage commissions upon the exercise of call options and upon the subsequent disposition of underlying securities for the exercise of put options.

The sale of covered call options may also be used by the Fund to reduce the risks associated with individual investments and to increase total investment return.

In the event the Fund sells a put option or enters into long futures contracts, under current interpretations of the 1940 Act, an amount of cash, U.S. Government Securities or other liquid securities equal to the market value of the contract must be deposited and maintained in a segregated account with the Fund's custodian to collateralize the positions, in order for the Fund to avoid being treated as having issued senior security in the amount of its obligations. For short positions in futures contracts and sales of call options, the Fund may establish a segregated account (not with a futures commission merchant or broker) with cash, U.S. Government Securities or other high grade debt securities that, when added to amounts deposited with a futures commission merchant or a broker as margin, equal the market value of the instruments or currency underlying the futures contracts or call options, respectively (but are no less than the stock price of the call option or the market price at which the short positions were established).

Futures Contracts and Options on Futures. The Fund may purchase and sell financial futures contracts and options thereon which are traded on a commodities exchange or board of trade for certain hedging and risk management purposes. A financial futures contract is an agreement to purchase or sell an agreed amount of securities or currencies at a set price for delivery in the future. These futures contracts and related options may be on debt securities, financial indices, securities indices, U.S. government securities and foreign currencies. The Investment Adviser has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act and therefore is not subject to registration under the Commodity Exchange Act. Accordingly, the Fund's investments in derivative instruments described in this prospectus and the SAI are not limited by or subject to regulation under the Commodity Exchange Act or otherwise regulated by the Commodity Futures Trading Commission.

Swaps. The Fund may enter into total rate of return, credit default or other types of swaps and related derivatives for the purpose of hedging and risk management. These transactions generally provide for the transfer from one counterparty to another of certain risks inherent in the ownership of a financial asset such as a common stock or debt instrument. Such risks include, among other things, the risk of default and insolvency of the obligor of such asset, the risk that the credit of the obligor or the underlying collateral will decline or the risk that the common stock of the underlying issuer will decline in value. The transfer of risk pursuant to

a derivative of this type may be complete or partial, and may be for the life of the related asset or for a shorter period. These derivatives may be used as a risk management tool for a pool of financial assets, providing the Fund with the opportunity to gain or reduce exposure to one or more reference securities or other financial assets (each, a “Reference Asset”) without actually owning or selling such assets in order, for example, to increase or reduce a concentration risk or to diversify a portfolio. Conversely, these derivatives may be used by the Fund to reduce exposure to an owned asset without selling it.

Because the Fund would not own the Reference Assets, the Fund may not have any voting rights with respect to the Reference Assets, and in such cases all decisions related to the obligors or issuers of the Reference Assets, including whether to exercise certain remedies, will be controlled by the swap counterparties.

Total rate of return swaps and similar derivatives are subject to many risks, including the possibility that the market will move in a manner or direction that would have resulted in gain for the Fund had the swap or other derivative not been utilized (in which case it would have been better had the Fund not engaged in the interest rate hedging transactions), the risk of imperfect correlation between the risk sought to be hedged and the derivative transactions utilized, the possible inability of the counterparty to fulfill its obligations under the swap and potential illiquidity of the hedging instrument utilized, which may make it difficult for the Fund to close out or unwind one or more hedging transactions.

Total rate of return swaps and related derivatives are a relatively recent development in the financial markets. Consequently, there are certain legal, tax and market uncertainties that present risks in entering into such arrangements. There is currently little or no case law or litigation characterizing total rate of return swaps or related derivatives, interpreting their provisions, or characterizing their tax treatment. In addition, additional regulations and laws may apply to these types of derivatives that have not previously been applied. There can be no assurance that future decisions construing similar provisions to those in any swap agreement or other related documents or additional regulations and laws will not have an adverse effect on the Fund that utilizes these instruments.

Short Sales. The Fund may make short sales of securities. A short sale is a transaction in which the Fund sells a security it does not own in anticipation that the market price of that security will decline. The market value of the securities sold short of any one issuer will not exceed either 25% of the Fund’s total assets or 5% of such issuer’s voting securities. The Fund also will not make a short sale, if, after giving effect to such sale, the market value of all securities sold short exceeds 50% of the value of its assets. The Fund may also make short sales “against the box” without respect to such limitations. In this type of short sale, at the time of the sale, the Fund owns, or has the immediate and unconditional right to acquire at no additional cost, the identical security.

The Fund expects to make short sales both to obtain capital gains from anticipated declines in securities and as a form of hedging to offset potential declines in long positions in the same or similar securities. The short sale of a security is considered a speculative investment technique. Short sales “against the box” may be subject to special tax rules, one of the effects of which may be to accelerate income to the Fund.

When the Fund makes a short sale, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale in order to satisfy its obligation to deliver the security upon conclusion of the sale. The Fund may have to pay a fee to borrow particular securities and is often obligated to deliver any payments received on such borrowed securities, such as dividends.

If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss will be increased, by the transaction costs incurred by the Fund, including the costs associated with providing collateral to the broker-dealer (usually cash, United States government securities or other highly liquid debt securities) and the maintenance of collateral with its custodian. Although the Fund’s gain is

limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

Derivatives. Investments in options, futures and swaps are often referred to as derivatives transactions. The Fund expects that it will invest in these types of instruments primarily for hedging and risk management purposes and that its investments in derivatives and short sales for purposes unrelated to corporate transactions or reorganizations will not exceed 5% of its total assets.

There is no specific limit on the proportion of its assets that the Fund may use to invest in derivatives and conduct short sales in connection with its investments in corporate transactions and reorganizations, although the Fund expects that it will not be required to utilize more than 10% of the assets it has invested in a particular transaction to hedge its gains in such transaction.

Lower Grade Securities. The Fund may make unlimited investments in fixed income securities rated below investment grade by recognized statistical rating agencies or unrated securities of comparable quality, including securities of issuers in default, which are likely to have the lowest rating. However, the Fund does not expect these investments to exceed 10% of its total assets. These securities, which may be preferred shares or debt, are predominantly speculative and involve major risk exposure to adverse conditions. Debt securities that are rated lower than “BBB” by Standard & Poor’s Ratings Services, a division of The McGraw-Hill Companies, Inc. (“S&P”), or lower than “Baa” by Moody’s Investors Service, Inc. (“Moody’s”) or unrated securities considered by the Investment Adviser to be of comparable quality, are commonly referred to as “junk bonds.”

Generally, such lower grade securities and unrated securities of comparable quality offer a higher current yield than is offered by higher rated securities, but also (i) will likely have some quality and protective characteristics that, in the judgment of the rating organizations, are outweighed by large uncertainties or major risk exposures to adverse conditions and (ii) are predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal in accordance with the terms of the obligation. The market values of certain of these securities also tend to be more sensitive to individual corporate developments and changes in economic conditions than higher quality bonds. In addition, such securities generally present a higher degree of credit risk. The risk of loss due to default by these issuers is significantly grea
