Table of Contents

Core Molding Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and include all of the information and disclosures required by accounting principles generally accepted in the United States of America for interim reporting, which are less than those required for annual reporting. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (all of which are normal and recurring in nature) necessary to present fairly the financial position of Core Molding Technologies, Inc. and its subsidiaries (Core Molding Technologies or the Company) at March 31, 2009, and the results of operations and cash flows for the three months ended March 31, 2009. The Consolidated Notes to Financial Statements, which are contained in the 2008 Annual Report to Shareholders, should be read in conjunction with these consolidated financial statements.

Core Molding Technologies and its subsidiaries operate in the plastics market in a family of products known as reinforced plastics . Reinforced plastics are combinations of resins and reinforcing fibers (typically glass or carbon) that are molded to shape. Core Molding Technologies operates four manufacturing facilities in Columbus, Ohio; Batavia, Ohio; Gaffney, South Carolina; and Matamoros, Mexico. The Columbus and Gaffney facilities produce reinforced plastics by compression molding sheet molding compound (SMC) in a closed mold process. Compression molding production capability has also been added to our new production facility in Matamoros, Mexico. The Matamoros facility also utilizes spray-up and hand lay-up open mold processes and resin transfer (RTM) closed molding utilizing the vacuum infusion process to produce reinforced plastic products. The Batavia facility produces reinforced plastic products by a spray-up open mold process and resin transfer molding (RTM) closed mold process utilizing multiple insert tooling (MIT). Core Molding Technologies also sells reinforced plastic products to the automotive-aftermarket industry through its subsidiary Core Automotive Technologies, doing business as Keystone Restyling Products.

2. Net (Loss) Income per Common Share

Net (loss) income per common share is computed based on the weighted average number of common shares outstanding during the period. Diluted net income per common share is computed similarly but include the effect of the assumed exercise of dilutive stock options and restricted stock under the treasury stock method.

The computation of basic and diluted net (loss) income per common share is as follows:

	Three Months Ended	
	March 31,	
	2009	2008
Net (loss) income	\$ (659,835)	\$ 864,153
Weighted average common shares outstanding	6,768,726	6,731,268
Plus: dilutive options assumed exercised		582,600
Less: shares assumed repurchased with proceeds from exercise		(297,484)
Plus: dilutive effect of nonvested restricted stock grants		20,840
Weighted average common and potentially issuable common shares outstanding	6,768,726	7,037,224
Basic net (loss) income per common share	\$ (0.10)	\$ 0.13
Diluted net (loss) income per common share	\$ (0.10)	\$ 0.12

All 570,225 shares of unexercised stock options at March 31, 2009 and 33,000 stock options at March 31, 2008 were not included in diluted earnings per share as they were anti-dilutive.

Table of Contents**3. Sales**

Core Molding Technologies currently has two major customers, Navistar, Inc. (Navistar) and PACCAR, Inc. (PACCAR). Major customers are defined as customers whose sales individually consist of more than ten percent of total sales. The following table presents sales revenue for the above-mentioned customers for the three months ended March 31, 2009 and 2008:

	Three Months Ended March 31,	
	2009	2008
Navistar product sales	\$ 10,057,223	\$ 13,474,970
Navistar tooling sales	302,795	2,756,950
Total Navistar sales	10,360,018	16,231,920
PACCAR product sales	4,191,729	7,405,632
PACCAR tooling sales	11,600	94,450
Total PACCAR sales	4,203,329	7,500,082
Other product sales	3,581,328	5,102,610
Other tooling sales	239,442	250,825
Total other sales	3,820,770	5,353,435
Total product sales	17,830,280	25,983,212
Total tooling sales	553,837	3,102,225
Total sales	\$ 18,384,117	\$ 29,085,437

4. Comprehensive (Loss) Income

Comprehensive (loss) income represents net income plus the results of certain equity changes not reflected in the Statements of Operations. The components of comprehensive (loss) income, net of tax, are as follows:

	Three Months Ended March 31,	
	2009	2008
Net (loss) income	\$ (659,835)	\$ 864,153
Hedge accounting effect of interest rate swaps, net of deferred income tax benefit of \$5,591 and \$36,044 for the three months ended March 31, 2009 and 2008 respectively.	(10,853)	(69,968)
Amortization of unrecognized loss on post retirement benefit, net of tax expense of \$11,361 for the three months ended March 31, 2008.		20,639
Comprehensive (loss) income	\$ (670,688)	\$ 814,824

Table of Contents**5. Postretirement Benefits**

The components of expense for all of Core Molding Technologies' postretirement benefits plans for the three months ended March 31, 2009 and 2008 are as follows:

	Three Months Ended March 31,	
	2009	2008
Pension expense:		
Defined contribution plan contributions	\$ 103,000	\$ 127,000
Multi-employer plan contributions	108,000	133,000
 Total pension expense	 211,000	 260,000
 Health and life insurance:		
Service cost	152,000	159,000
Interest cost	237,000	262,000
Amortization of net loss		32,000
 Net periodic benefit cost	 389,000	 453,000
 Total postretirement benefits expense	 \$ 600,000	 \$ 713,000

Core Molding Technologies has made contributions of approximately \$83,000 to pension plans and \$177,000 of postretirement healthcare payments through March 31, 2009 and expects to make approximately \$697,000 of defined contribution and multi-employer pension payments through the remainder of 2009 of which \$403,000 was accrued at December 31, 2008. The Company also expects to make approximately \$343,000 of postretirement healthcare payments through the remainder of 2009, all of which are accrued.

6. Debt**Credit Agreement; Amendment**

In December of 2008, the Company and its subsidiary, Corecomposites de Mexico, S. de R.L. de C.V., entered into a Credit Agreement (the "Credit Agreement") with KeyBank National Association ("KeyBank") as a lender, lead arranger, sole book runner and administrative agent. Under the Credit Agreement, KeyBank has made certain loans, which include (i) a \$12,000,000 construction loan, (ii) an \$8,000,000 construction loan, (iii) an \$8,000,000 revolving credit commitment, (iv) a \$2,678,563 term loan to refinance a previous term loan with KeyBank, and (v) a letter of credit in an undrawn face amount of \$3,332,493 with respect to the Company's existing industrial development revenue bond financing.

On March 31, 2009, the Company entered into a first amendment to the Credit Agreement with KeyBank (the "First Amendment"). Pursuant to the terms of the First Amendment, the lender agreed to modify certain terms of the Credit Agreement. These modifications included (1) modification of the definition of EBITDA to add back transition costs up to \$3,200,000 associated with the transition and startup of the new production facility in Matamoros and add back non-cash compensation expense recorded under SFAS 123R (2) modification of the fixed charge definition to exclude from consolidated interest expense any measure of ineffectiveness from interest rate swaps and amortization of loan origination and issuance costs (3) modification of the leverage ratio from 3.0x to 3.2x at June 30, 2009, 3.4x at September 30, 2009, and 3.2x at December 31, 2009 (4) increase the applicable margin for interest rates applicable to LIBOR loans effective March 31, 2009 to 400 basis points for both construction loans and the revolving line of credit; all rates decrease 25 basis points upon reaching a leverage ratio of less than 2.25 to 1.00 (5) increase the letter of credit fee on the Industrial Revenue Bond to 300 basis points (6) increase the 1% Libor floor on the \$8,000,000 construction

loan and revolving line of credit to 1.5% and (7) implement a 1.5% Libor floor on the \$12,000,000 construction loan.

Bank Covenants

The Company is required to meet certain financial covenants included in its debt agreements with respect to leverage ratios, fixed charge ratios, capital expenditures as well as other customary affirmative and negative covenants. As of March 31, 2009, the Company was in compliance with its financial debt covenants for the Line of Credit, the secured note payable, the two construction loans related to the new facility in Mexico, the letter of credit securing the Industrial Revenue Bond and certain equipment leases.

Table of Contents

Based on the Company's forecasts which are primarily based on industry analysts' estimates of 2009 heavy and medium-duty truck production volumes as well as other assumptions management believes to be reasonable, management believes that the Company will be able to maintain compliance with the covenants as amended under the First Amendment to the Credit Agreement for the next 12 months. Management believes that cash flow from operating activities together with available borrowings under the Credit Agreement will be sufficient to meet Core Molding Technologies liquidity needs. However, if a material adverse change in the financial position of Core Molding Technologies should occur, or if actual sales or expenses are substantially different than what has been forecasted, Core Molding Technologies' liquidity and ability to obtain further financing to fund future operating and capital requirements could be negatively impacted.

Interest Rate Swaps

In conjunction with its variable rate Industrial Revenue Bond (IRB) the Company has entered into an interest rate swap agreement, which is designated as a cash flow hedging instrument. Under this agreement, the Company pays a fixed rate of 4.89% to the counterparty and receives 76% of the 30-day commercial paper rate. The swap term and notional amount matches the payment schedule on the IRB with final maturity in April 2013. The difference paid or received varies as short-term interest rates change and is accrued and recognized as an adjustment to interest expense. While the Company is exposed to credit loss on its interest rate swap in the event of non-performance by the counterparty to the swap, management believes such non-performance is unlikely to occur given the financial resources of the counterparty. The effectiveness of the swap is assessed at each financial reporting date by comparing the commercial paper rate of the swap to the benchmark rate underlying the variable rate of the IRB. Any ineffectiveness of the swap is recorded as an adjustment to interest expense and historically has not been material. Interest income of \$10,352 and interest expense of \$41,201 were recorded at March 31, 2009 and 2008, respectively, related to ineffectiveness of the swap. The fair value of the swap was a liability of \$294,672 and \$322,108 as of March 31, 2009 and December 31, 2008, respectively. None of the changes in fair value of the interest rate swap have been excluded from the assessment of hedge effectiveness.

Effective January 1, 2004, the Company entered into an interest rate swap agreement, which is designated as a cash flow hedge of the Company's bank note payable. Under this agreement, the Company pays a fixed rate of 3.75% to the counterparty and receives LIBOR. The swap term and notional amount match the payment schedule on the bank note payable with final maturity in January 2011. The interest rate swap is a highly effective hedge because the amount, benchmark interest rate index, term, and repricing dates of both the interest rate swap and the hedged variable interest cash flows are exactly the same. The fair value of the swap was a liability of \$68,117 and \$79,973 as of March 31, 2009 and December 31, 2008 respectively. While the Company is exposed to credit loss on its interest rate swap in the event of non-performance by the counterparty to the swap, management believes that such non-performance is unlikely to occur given the financial resources of the counterparty.

Effective December 18, 2008, the Company entered into an interest rate swap agreement that will be in effect beginning May 1, 2009, which was designated as a cash flow hedge of the \$12,000,000 construction loan payable. Effective March 31, 2009, the interest terms in the Company's Credit Agreement related to the \$12 million dollar construction loan were amended. The Company calculated its effectiveness test and determined that its interest rate swap was no longer highly effective. As a result, the Company discontinued the use of hedge accounting effective March 31, 2009, and will begin recording all mark-to market adjustments within interest expense in the Company's Consolidated Statement of Operations. The pre-tax amount previously recognized in Accumulated Other Comprehensive Income, totaling \$145,684 on at March 31, 2009, will be amortized as an increase to interest expense over the remaining term of the interest rate swap agreement.

Line of Credit

At March 31, 2009, the Company had available a \$8,000,000 variable rate bank revolving line of credit under the Credit Agreement that is scheduled to mature on April 30, 2010. The line of credit bears interest at daily LIBOR with a floor of 150 basis points plus 400 additional basis points. The line of credit is collateralized by all the Company's assets. At March 31, 2009 and December 31, 2008 there was an outstanding balance of \$1,796,636 and \$1,194,000, respectively. The outstanding balance on the line of credit is not due until April 2010; however the Company anticipates paying off the balance within the next 12 months and therefore has classified the outstanding balance as a

current liability on the Company's consolidated balance sheet.

Table of Contents**7. Income Taxes**

Income taxes for the three months ended March 31, 2009 are estimated to be approximately 36% of total earnings before taxes. In the three months ended March 31, 2008 income taxes were estimated to be 32% of total earnings before taxes. The increase in effective rate is primarily due to a higher percentage of earnings being related to activities in the United States. The Company incurs a higher effective tax rate in the United States compared to that incurred on operations in Mexico.

The Company follows the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). As of March 31, 2009, the Company has no liability for unrecognized tax benefit liability under FIN 48. The Company does not anticipate that the unrecognized tax benefits will significantly change within the next twelve months.

The Company files income tax returns in the U.S. federal jurisdiction, Mexico and various state jurisdictions. The Company is no longer subject to U.S. federal and state income tax examinations by tax authorities for years before 2004 and is subject to income tax examinations by Mexican authorities since the Company began business in Mexico in 2001. The Company does not anticipate that the unrecognized tax benefits will significantly change within the next twelve months. The 2006 U.S. federal tax return was previously under an audit by the Internal Revenue Service (IRS). The audit was completed during the quarter ended March 31, 2009 with no findings and the Company has received a statement of no change from the IRS. There are currently no income tax audits in process.

8. Stock Based Compensation

The Company has a Long Term Equity Incentive Plan (the 2006 Plan), as approved by the shareholders in May 2006. This 2006 Plan replaced the Long Term Equity Incentive Plan (the Original Plan) as originally approved by the shareholders in May 1997 and as amended in May 2000. The 2006 Plan allows for grants to directors, officers and key employees of non-qualified stock options, incentive stock options, stock appreciation rights, restricted stock, performance shares, performance units and other incentive awards (Stock Awards) up to an aggregate of 3,000,000 awards, each representing a right to buy a share of Core Molding Technologies common stock. Stock Awards can be granted under the 2006 Plan through the earlier of December 31, 2015, or the date the maximum number of available awards under the 2006 Plan have been granted.

Stock Options

The following summarizes the activity relating to stock options under the plans mentioned above for the three months ended March 31, 2009:

	Number Of Shares	Weighted Average Exercise Price
Outstanding at December 31, 2008	570,225	\$ 3.30
Exercised		
Granted		
Forfeited		
Outstanding at March 31, 2009	570,225	\$ 3.30
Exercisable at March 31, 2009	489,395	\$ 3.29

The following summarizes the status of, and changes to, unvested options during the three months ended March 31, 2009:

Number Of Shares	Weighted Average Exercise Price
------------------------	--

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

Unvested at December 31, 2008	88,830		3.37
Granted			
Vested	(8,000)		3.28
Forfeited			
Unvested at March 31, 2009	80,830	\$	3.38

Table of Contents

At March 31, 2009 and 2008, there was \$122,204 and \$249,575, respectively, of total unrecognized compensation cost, related to unvested stock options granted under the plans. Total compensation cost related to incentive stock options for the three months ended March 31, 2009 and 2008 was \$23,576 and \$32,810, respectively. This compensation expense is allocated such that \$19,783 and \$25,773 are included in selling, general and administrative expenses and \$3,793 and \$7,037 are recorded in cost of sales for the three months ended March 31, 2009 and 2008 respectively.

Restricted Stock

In May of 2006, Core Molding Technologies began granting shares of its common stock to certain directors, officers, and key managers in the form of unvested stock (Restricted Stock). These awards are recorded at the market value of Core Molding Technologies common stock on the date of issuance and amortized ratably as compensation expense over the applicable vesting period.

The following summarizes the status of Restricted Stock grants as of March 31, 2009 and changes during the three months ended March 31, 2009:

	Number Of Shares	Weighted Average Grant Date Fair Value
Unvested balance at December 31, 2008	85,106	\$ 7.01
Granted		
Vested	(5,872)	6.87
Forfeited		
Unvested balance at March 31, 2009	79,234	\$ 7.03

As of March 31, 2009 and 2008, there was \$264,670 and \$269,504, respectively, of total unrecognized compensation cost related to Restricted Stock granted under the 2006 Plan. The total compensation costs related to restricted stock grants for the three months ended March 31, 2009 and 2008 was \$48,733 and \$34,654, respectively.

9. Fair Value of Financial Instruments

The Company's financial instruments consist of long-term debt, interest rate swaps, accounts receivable, and accounts payable. The carrying amount of these financial instruments approximated their fair value.

In September 2006, the FASB issued Statement No. 157 to define fair value, establish a framework for measuring fair value and to expand disclosures about Fair Value Measurements (SFAS No.157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 does not change the requirements to apply fair value in existing accounting standards. Under SFAS No. 157, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts. The standard clarifies that fair value should be based on the assumptions market participants would use when pricing the asset or liability.

To increase consistency and comparability in fair value measurements, SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy disclosed is based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy defined by SFAS No. 157 are as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical asset or liabilities that the company has the ability to access as of the reporting date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly through corroboration with observable market data.

Level 3 inputs are unobservable inputs, such as internally developed pricing models for the asset or liability due to little or no market activity for the asset or liability.

Table of Contents

The following table presents financial liabilities measured and recorded at fair value at the Company's Consolidated Balance Sheet on a recurring basis and their level within the fair value hierarchy as of March 31, 2009 and December 31, 2008:

	(Level 1)	(Level 2)	(Level 3)	March 31, 2009
Liabilities				
Interest rate swaps	\$	\$ 508,473	\$	\$ 508,473
Total	\$	\$ 508,473	\$	\$ 508,473
				December 31, 2008
Liabilities				
Interest rate swaps	\$	\$ 502,381	\$	\$ 502,381
Total	\$	\$ 502,381	\$	\$ 502,381

There were no non-recurring fair value measurements for the quarter ended March 31, 2009.

In March 2008, the FASB issued SFAS No. 161 to amend and expand the disclosure requirements of SFAS No. 133 with the intent to provide users of the financial statements with an enhanced understanding of how and why an entity uses derivative instruments, how these derivatives are accounted for and how the respective reporting entity's financial statements are affected. SFAS No. 161 is effective for fiscal years and interim periods beginning after November 15, 2008, and earlier application is encouraged. The Company adopted this standard on January 1, 2009.

Core Molding Technologies location on the Consolidated Balance Sheets (unaudited) were:

	Liability Derivatives	December 31, 2008
	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments under SFAS No. 133		
Interest rate risk activities	Interest rate swap	\$ 502,381
Total derivatives designated as hedging instruments under SFAS No. 133		\$ 502,381
Derivatives not designated as hedging instruments under SFAS No. 133		
Interest rate risk activities	Interest rate swap	\$
Total derivatives not designated as hedging instruments under SFAS No. 133		\$
Total Derivatives		\$ 502,381

The effect of derivative instruments on the Consolidated Statement of Operations (unaudited) was:

Derivatives in Cash Flow Hedging Relationships

Derivatives in SFAS No. 133 Cash Flow Hedging Relationships	Amount of (Gain) Loss Recognized in OCI on Derivative (Effective Portion)		Location of (Gain) Loss Reclassified from AOCI into Income (Effective Portion)	Amount of (Gain) Loss Reclassified from AOCI into Expense (Effective Portion)	
	March 31, 2009	March 31, 2008		March 31, 2009	March 31, 2008
Interest rate risk activities	6,092	147,202	Interest expense, net	\$ 55,050	14,629
Total	\$ 6,092	\$ 147,202		\$ 55,050	14,629

Table of Contents

	Location of (Gain) Loss Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)	Amount of (Gain) Loss Recognized in Income of Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)	
		March 31, 2009	March 31, 2008
Derivatives in SFAS No. 133 Cash Flow			
Hedging Relationships			
Interest rate risk activities	Interest expense	(10,352)	41,201
Total		\$ (10,352)	\$ 41,201

During first quarter of 2009 and 2008, the Company did not reclassify any amounts related to its cash flow hedges from accumulated other comprehensive loss to earnings due to the probability that certain forecasted transactions would not occur. As discussed at Note 6, the Company discontinued the use of hedge accounting for one of the interest rate swap effective March 31, 2009, and will begin recording all mark-to market adjustments related to this interest rate swap within interest expense in the Company's Consolidated Statement of Operations. It is anticipated that during the next twelve months the expiration and settlement of cash flow hedge contracts along with the amortization of losses on discontinued hedges will result in income statement recognition of amounts currently classified in accumulated other comprehensive loss of approximately \$13,262, net of taxes.

10. Recent Accounting Pronouncements

In December 2008, the FASB issued FSP FAS 132(R)-1 to amend SFAS No. 132(R), to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. FSP FAS 132(R)-1 is effective for fiscal years ending after December 15, 2009 with earlier adoption permitted. The Company is currently reviewing the additional disclosure requirements to determine the impact on the Consolidated Financial Statements and Notes to Consolidated Financial Statements.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1 to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as annual financial statements. This FSP is effective for interim reporting periods ending after June 15, 2009, with early adoption permitted. The Company is currently reviewing the additional disclosure requirements to determine the impact on the Consolidated Financial Statements and Notes to Consolidated Financial Statements.

In April 2009, the FASB issued FSP FAS 157-4 to provide additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. This FSP is effective for interim reporting periods ending after June 15, 2009, with early adoption permitted. The Company is currently reviewing the additional guidance to determine the impact on the Consolidated Financial Statements and Notes to Consolidated Financial Statements.

Table of Contents**Part I Financial Information****Item 2****Management's Discussion and Analysis of Financial Condition and Results of Operations**

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements within the meaning of the federal securities laws. As a general matter, forward-looking statements are those focused upon future plans, objectives or performance as opposed to historical items and include statements of anticipated events or trends and expectations and beliefs relating to matters not historical in nature. Such forward-looking statements involve known and unknown risks and are subject to uncertainties and factors relating to Core Molding Technologies operations and business environment, all of which are difficult to predict and many of which are beyond Core Molding Technologies' control. These uncertainties and factors could cause Core Molding Technologies' actual results to differ materially from those matters expressed in or implied by such forward-looking statements.

Core Molding Technologies believes that the following factors, among others, could affect its future performance and cause actual results to differ materially from those expressed or implied by forward-looking statements made in this report: business conditions in the plastics, transportation, watercraft and commercial product industries; federal and state regulations (including engine emission regulations); general economic conditions in the countries in which Core Molding Technologies operates; dependence upon two major customers as the primary source of Core Molding Technologies' sales revenues; recent efforts of Core Molding Technologies to expand its customer base; failure of Core Molding Technologies' suppliers to perform their contractual obligations; the availability of raw materials; inflationary pressures; new technologies; competitive and regulatory matters; labor relations; the loss or inability of Core Molding Technologies to attract and retain key personnel; changes to federal, state and local environmental laws and regulations; the availability of capital; the ability of Core Molding Technologies to provide on-time delivery to customers, which may require additional shipping expenses to ensure on-time delivery or otherwise result in late fees; risk of cancellation or rescheduling of orders; inefficiencies related to the transfer and start up of Core Molding Technologies new Matamoros production facility; management's decision to pursue new products or businesses which involve additional costs, risks or capital expenditures; and other risks identified from time-to-time in Core Molding Technologies other public documents on file with the Securities and Exchange Commission, including those described in Item 1A of the 2008 Annual Report to Shareholders on Form 10-K.

OVERVIEW

Core Molding Technologies is a compounder of sheet molding composite (SMC) and molder of fiberglass reinforced plastics. Core Molding Technologies produces high quality fiberglass reinforced molded products and SMC materials for varied markets, including light, medium, and heavy-duty trucks, automobiles and automotive aftermarkets, personal watercraft, and other commercial products. The demand for Core Molding Technologies' products is affected by economic conditions in the United States, Canada and Mexico, the cyclicity of the markets we serve, regulatory requirements, interest rates and other factors. Core Molding Technologies' manufacturing operations have a significant fixed cost component. Accordingly, during periods of changing demands, the profitability of Core Molding Technologies' operations may change proportionately more than revenues from operations.

On December 31, 1996, Core Molding Technologies acquired substantially all of the assets and assumed certain liabilities of Columbus Plastics, a wholly owned operating unit of Navistar's truck manufacturing division since its formation in late 1980. Columbus Plastics, located in Columbus, Ohio, was a compounder and compression molder of SMC. In 1998, Core Molding Technologies began compression molding operations at its second facility in Gaffney, South Carolina, and in October 2001, Core Molding Technologies acquired certain assets of Airshield Corporation. As a result of this acquisition, Core Molding Technologies expanded its fiberglass molding capabilities to include the spray up, hand-lay-up open mold processes and resin transfer (RTM) closed molding utilizing a vacuum infusion process. In September 2004, Core Molding Technologies acquired substantially all the operating assets of Keystone Restyling Products, Inc., a privately held manufacturer and distributor of fiberglass reinforced products for the automotive-aftermarket industry. In August 2005, Core Molding Technologies acquired certain assets of the Cincinnati Fiberglass Division of Diversified Glass, Inc., a Batavia, Ohio-based, privately held manufacturer and distributor of fiberglass reinforced plastic components supplied primarily to the heavy-duty truck market. The Batavia,

Ohio facility produces reinforced plastic products by a spray-up open mold process and RTM utilizing multiple insert tooling (MIT) closed mold process. In August of 2008, the Company entered into a construction agreement to begin building a new 437,000 square foot production facility in Matamoros, Mexico that will replace its currently leased facility. Occupancy is expected during the second quarter of 2009.

Table of Contents

Core Molding Technologies recorded a net loss for the three months ended March 31, 2009 of \$660,000, or \$(0.10) per basic and diluted share, compared with a net income of \$864,000, or \$.13 per basic and \$.12 per diluted share, for the three months ended March 31, 2008. During the three months ended March 31, 2009, the Company has incurred and recorded approximately \$1,200,000 of expenses for transfer and start-up costs associated with the construction of the Company's new production facility in Mexico. The Company has also experienced a 31% decrease in product sales in the first quarter of 2009 as compared to the same period in 2008. While industry analysts are forecasting an increase in truck orders in the second half of 2009, the Company recognizes that this expectation should be considered in light of an uncertain economy.

RESULTS OF OPERATIONS**Three Months Ended March 31, 2009, As Compared To Three Months Ended March 31, 2008**

Net sales for the three months ended March 31, 2009, totaled \$18,384,000, representing an approximate 37% decrease from the \$29,085,000 reported for the three months ended March 31, 2008. Included in total sales are tooling project sales of \$554,000 and \$3,102,000 for the three months ended March 31, 2009 and March 31, 2008, respectively. Tooling project sales result from billings to customers for molds and assembly equipment built specifically for their products. These sales are sporadic in nature. Total product sales, excluding tooling project sales, were approximately 31% lower for the three months ended March 31, 2009, as compared to the same period a year ago. The primary reason for the decrease in product sales is the continued downturn in the North American medium and heavy-duty truck market caused by the overall economic conditions.

Sales to Navistar totaled \$10,360,000 for the three months ended March 31, 2009, as compared to \$16,232,000 reported for the three months ended March 31, 2008. Included in total sales is \$303,000 of tooling sales for the three months ended March 31, 2009 compared to \$2,757,000 for the same three months in 2008. Product sales to Navistar decreased by 25% for the three months ended March 31, 2009 versus the same period of the prior year. The primary reason for the decrease in product sales are the continued downturn in the North American medium and heavy-duty truck market as noted above.

Sales to PACCAR totaled \$4,203,000 for the three months ended March 31, 2009, as compared to \$7,500,000 reported for the three months ended March 31, 2008. Total product sales to PACCAR decreased by 43% for the three months ended March 31, 2009 compared to the same period of the prior year. The decrease in total product sales is primarily due to the continued downturn in the North American medium and heavy-duty truck market and the United States economic conditions as noted above as well as decrease in sales for more mature products the Company manufactures for PACCAR.

Sales to other customers for the three months ended March 31, 2009 decreased 29% to \$3,821,000 compared to \$5,353,000 for the three months ended March 31, 2008. This decrease is primarily related to decreases in product sales to other North American medium and heavy-duty truck manufacturers amounting to approximately \$1,343,000.

Gross margin was approximately 8.6% of sales for the three months ended March 31, 2009, compared with 14.8% for the three months ended March 31, 2008. The decrease in gross margin was due to approximately \$1,071,000 of transition and start up costs incurred during the three months ended March 31, 2009 associated with the Company's new production facility in Mexico as well as lower fixed cost absorption due to lower product sales volumes. Our manufacturing operations have significant fixed costs such as salary labor, energy, depreciation, lease expense and post retirement healthcare costs that do not change proportionately with sales.

Selling, general and administrative expenses (SG&A) totaled \$2,500,000 for the three months ended March 31, 2009, decreasing from \$2,814,000 for the three months ended March 31, 2008. The primary reasons for the decrease were lower professional fees and lower labor and benefit costs as compared to the period ended March 31, 2008. Partially offsetting these reductions was approximately \$145,000 of transition and start-up costs incurred during the quarter associated with the Company's new production facility in Mexico.

Interest expense totaled \$110,000 for the three months ended March 31, 2009, compared to interest expense of \$229,000 for the three months ended March 31, 2008. The decrease in interest expense is primarily a result of lower interest rates and lower outstanding daily average balances on the line of credit. IRB ineffectiveness also contributed to the decrease in interest expenses due to approximately \$10,000 of interest income for the three months ended March 31, 2009 as compared to the \$41,000 of interest expense for the same period a year ago. Additionally the

Company capitalized interest of approximately \$58,000 during the quarter related to its new production facility in Mexico which will not be placed into service until the second quarter of 2009.

Table of Contents

Income taxes for the three months ended March 31, 2009 are estimated to be approximately 36% of total earnings before taxes. In the three months ended March 31, 2008 income taxes were estimated to be 32% of total earnings before taxes. The increase in effective rate is primarily due to a higher percentage of earnings being related to activities in the United States. The Company incurs a higher effective tax rate in the United States compared to that incurred on operations in Mexico.

Core Molding Technologies recorded a net loss for the three months ended March 31, 2009 of \$660,000 or \$(0.10) per basic and diluted share, compared with net income of \$864,000, or \$.13 per basic and \$.12 per diluted share, for the three months ended March 31, 2008.

Liquidity and Capital Resources

The Company's primary sources of funds have been cash generated from operating activities and borrowings from third parties. Primary cash requirements are for operating expenses and capital expenditures.

As widely reported, financial markets in the United States, Europe and Asia have been experiencing extreme disruption in recent months, including, among other things, extreme volatility in security prices, severely diminished liquidity and credit availability, rating downgrades of certain investments and declining valuations of others. Governments have taken unprecedented actions intended to address extreme market conditions that include severely restricted credit and declines in real estate values. While currently these conditions have not impaired the Company's ability to access credit markets and finance operations, there can be no assurance that there will not be a further deterioration in financial markets and confidence in major economies, which may impact the Company's ability to borrow in the future.

Cash provided by operating activities for the three months ended March 31, 2009 totaled \$729,000. Net losses of \$660,000 negatively impacted operating cash flow. Non-cash deductions of depreciation and amortization contributed \$924,000 to operating cash flow. In addition, the net increase in the postretirement healthcare benefits liability of \$211,000 is not a current cash obligation, and this item will not be a cash obligation until additional employees retire and begin to utilize these benefits. Changes in working capital increased cash provided by operating activities by \$126,000. Changes in working capital primarily relate to a decrease in accounts receivable due to decreases in product sales. These cash inflows were offset by an increase in prepaid expense primarily related to timing of payments for annual business insurance premiums as well as decreases in accounts payable and accrued liabilities.

Cash used in investing activities for the three months ended March 31, 2009 was \$4,580,000, primarily representing purchases related to the construction of the Company's new production facility in Mexico. The Company currently plans an additional \$5,681,000 of capital expenditures for the remainder of the year, of which \$4,629,000 relates to the completion of the Company's new production facility in Mexico. These capital additions will be funded by cash from operations, the Company's unused \$8,000,000 construction loan and borrowings on the Company's line of credit. The Company may also undertake other capital improvement projects in the future as deemed necessary and appropriate.

Financing activities increased cash by \$3,851,000. This increase is related to borrowings on the Company's construction loan of \$3,879,000 as well as net borrowings on the line of credit of \$603,000. This was partially offset by principal repayments on its secured note payable of \$321,000 and the Company's industrial revenue bond of \$150,000.

At March 31, 2009, the Company had no cash on hand and a line of credit of \$8,000,000, with a scheduled maturity of April 30, 2010. At March 31, 2009, Core Molding Technologies had outstanding borrowings of \$1,797,000 on the line of credit.

The Company is required to meet certain financial covenants included in its debt agreements with respect to leverage ratios, fixed charge ratios, capital expenditures as well as other customary affirmative and negative covenants. As of March 31, 2009, the Company was in compliance with its financial debt covenants for the Line of Credit, the secured note payable, the two construction loans related to the new facility in Mexico, the letter of credit securing the industrial revenue bond and certain equipment leases.

Table of Contents

On March 31, 2009, the Company entered into the First Amendment to the Credit Agreement with KeyBank. Pursuant to the terms of the First Amendment, the lender agreed to modify certain terms of the Credit Agreement. These modifications included (1) modification of the definition of EBITDA to add back transition costs up to \$3,200,000 associated with the transition and startup of the new production facility in Matamoros and add back non-cash compensation expense recorded under SFAS 123R (2) modification of the fixed charge definition to exclude from consolidated interest expense any measure of ineffectiveness from interest rate swaps and amortization of loan origination and issuance costs (3) modification of the leverage ratio from 3.0x to 3.2x at June 30, 2009, 3.4x at September 30, 2009, and 3.2x at December 31, 2009 (4) increase the applicable margin for interest rates applicable to LIBOR loans effective March 31, 2009 to 400 basis points for both construction loans and the revolving line of credit; all rates decrease 25 basis points upon reaching a leverage ratio of less than 2.25 to 1.00 (5) increase the letter of credit fee on the Industrial Revenue Bond to 300 basis points (6) increase the 1% Libor floor on the \$8,000,000 construction loan and revolving line of credit to 1.5% and (7) implement a 1.5% Libor floor on the \$12,000,000 construction loan. Based on the Company's forecasts which are primarily based on industry analysts' estimates of 2009 heavy and medium-duty truck production volumes as well as other assumptions management believes to be reasonable, management believes that the Company will be able to maintain compliance with the covenants as amended under the First Amendment to the Credit Agreement for the next 12 months. Management believes that cash flow from operating activities together with available borrowings under the Credit Agreement will be sufficient to meet Core Molding Technologies liquidity needs. However, if a material adverse change in the financial position of Core Molding Technologies should occur, or if actual sales or expenses are substantially different than what has been forecasted, Core Molding Technologies' liquidity and ability to obtain further financing to fund future operating and capital requirements could be negatively impacted.

Recent Accounting Pronouncements

In December 2008, the FASB issued FSP FAS 132(R)-1 to amend SFAS No. 132(R), to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. FSP FAS 132(R)-1 is effective for fiscal years ending after December 15, 2009 with earlier adoption permitted. The Company is currently reviewing the additional disclosure requirements to determine the impact on the Consolidated Financial Statements and Notes to Consolidated Financial Statements.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1 to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as annual financial statements. This FSP is effective for interim reporting periods ending after June 15, 2009, with early adoption permitted. The Company is currently reviewing the additional disclosure requirements to determine the impact on the Consolidated Financial Statements and Notes to Consolidated Financial Statements.

In April 2009, the FASB issued FSP FAS 157-4 to provide additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. This FSP is effective for interim reporting periods ending after June 15, 2009, with early adoption permitted. The Company is currently reviewing the additional guidance to determine the impact on the Consolidated Financial Statements and Notes to Consolidated Financial Statements.

Table of Contents**Critical Accounting Policies and Estimates**

Management's Discussion and Analysis of Financial Condition and Results of Operations discuss the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments, including those related to accounts receivable, inventories, post retirement benefits, workers compensation reserves, self-insured healthcare reserves and income taxes. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management believes the following critical accounting policies, among others, affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

Accounts receivable allowances: Management maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. The Company recorded an allowance for doubtful accounts of \$91,000 at March 31, 2009 and \$109,000 at December 31, 2008. Management also records estimates for customer returns and deductions, discounts offered to customers, and for price adjustments. Should customer returns and deductions, discounts, and price adjustments fluctuate from the estimated amounts, additional allowances may be required. The Company has reduced accounts receivable for chargebacks of \$690,000 at March 31, 2009 and \$740,000 at December 31, 2008.

Inventories: Inventories, which include material, labor and manufacturing overhead, are valued at the lower of cost or market. The inventories are accounted for using the first-in, first-out (FIFO) method of determining inventory costs. Inventory quantities on-hand are regularly reviewed, and where necessary, provisions for excess and obsolete inventory are recorded based on historical and anticipated usage.

Goodwill and Long-Lived Assets: Management evaluates whether impairment exists for goodwill and long-lived assets annually on December 31 or at interim periods if an indicator of impairment exists. Should actual results differ from the assumptions used to determine impairment, additional provisions may be required. If there is a sustained downturn in the economy or the disruption of the financial and credit markets continues, demand for our products could fall below our current expectations and our forecasts of revenues and operating results could decline. Impairment charges of our goodwill or long-lived assets may be required in the future if our expected future cash flows decline. The Company has not recorded any impairment to goodwill or long-lived assets for the three months ended March 31, 2009 or the year ended December 31, 2008. A 10% decrease in future cash flows would not adversely impact the net book value of goodwill and a 1% increase in the rate used to discount future cash flows would not adversely impact the net book value of goodwill.

Self-Insurance: The Company is self-insured with respect to most of its Columbus and Batavia, Ohio and Gaffney, South Carolina medical and dental claims and Columbus and Batavia, Ohio workers' compensation claims. The Company has recorded an estimated liability for self-insured medical and dental claims incurred but not reported and workers' compensation claims incurred but not reported at March 31, 2009 and December 31, 2008 of \$1,012,000 and \$1,109,000, respectively.

Post retirement benefits: Management records an accrual for postretirement costs associated with the health care plan sponsored by Core Molding Technologies. Should actual results differ from the assumptions used to determine the reserves, additional provisions may be required. In particular, increases in future healthcare costs above the assumptions could have an adverse effect on Core Molding Technologies' operations. The effect of a change in healthcare costs is described in Note 10 of the Consolidated Notes to Financial Statements, which are contained in the 2008 Annual Report to Shareholders. Core Molding Technologies recorded a liability for postretirement healthcare benefits based on actuarially computed estimates of \$16,089,000 at March 31, 2009 and \$15,878,000 at December 31,

2008.

Table of Contents

Revenue Recognition: Revenue from product sales is recognized at the time products are shipped and title transfers. Allowances for returned products and other credits are estimated and recorded as revenue is recognized. Tooling revenue is recognized when the customer approves the tool and accepts ownership. Progress billings and expenses are shown net as an asset or liability on the Company's balance sheet. Tooling in progress can fluctuate significantly from period to period and is dependent upon the stage of tooling projects and the related billing and expense payment timetable for individual projects and therefore does not necessarily reflect projected income or loss from tooling projects. At March 31, 2009 the Company has recorded a net liability related to tooling in progress of \$313,000, which represents approximately \$4,444,000 of progress tooling billings and \$4,131,000 of progress tooling expenses. At December 31, 2008 the Company had recorded a net liability related to tooling in progress of \$212,000, which represents approximately \$3,555,000 of progress tooling billings and \$3,343,000 of progress tooling expenses.

Income taxes: The Consolidated Balance Sheet at March 31, 2009 and December 31, 2008, includes a deferred tax asset of \$7,193,000 and \$7,188,000, respectively. The Company performs analyses to evaluate the balance of deferred tax assets that will be realized. Such analyses are based on the premise that the company is, and will continue to be, a going concern and that it is more likely than not that deferred tax benefits will be realized through the generation of future taxable income. For more information, refer to Note 9 in Core Molding Technologies 2008 Annual Report to Shareholders.

Part I Financial Information

Item 3

Quantitative and Qualitative Disclosures About Market Risk

Core Molding Technologies' primary market risk results from changes in the price of commodities used in its manufacturing operations. Core Molding Technologies is also exposed to fluctuations in interest rates and foreign currency fluctuations associated with the Mexican Peso. Core Molding Technologies does not hold any material market risk sensitive instruments for trading purposes.

Core Molding Technologies has the following five items that are sensitive to market risks: (1) Industrial Revenue Bond (IRB) with a variable interest rate (although Core Molding Technologies has an interest rate swap to fix the interest rate at 4.89%; (2) the Revolving Line of Credit, \$12,000,000 construction loan payable and \$8,000,000 construction loan payable under the Credit Agreement, each of which bears a variable interest rate; (3) bank note payable under the Credit Agreement, with a variable interest rate. Core Molding Technologies has an interest rate swap to fix the interest rate; (4) foreign currency purchases in which Core Molding Technologies purchases Mexican pesos with United States dollars to meet certain obligations that arise due to operations at the facility located in Mexico; and (5) raw material purchases in which Core Molding Technologies purchases various resins for use in production. The prices of these resins are affected by the prices of crude oil and natural gas as well as processing capacity versus demand.

Assuming a hypothetical 10% increase in commodity prices, Core Molding Technologies would be impacted by an increase in raw material costs, which would have an adverse effect on operating margins.

Assuming a hypothetical 10% change in short-term interest rates would impact the Company for the three months ended March 31, 2009. It would have impacted the interest paid on the Company's Line of Credit and the outstanding balance on the construction loan payable. The interest rate on these loans is impacted by LIBOR. Although a 10% change in short-term interest rates would impact the interest paid by the Company, it would not have a material effect on earnings before tax.

A 10% change in future interest rate would significantly impact the fair value of the Company's interest rate swaps with an offset to other comprehensive income.

Item 4T

Controls and Procedures

As of the end of the period covered by this report, the Company has carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act). Based upon this evaluation, the Company's management, including its Chief Executive Officer and its Chief Financial Officer, concluded that the Company's disclosure controls and procedures were (i) effective to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act was accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure, and (ii) effective to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commissions rules and forms.

There were no changes in internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that occurred in the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
